NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

THREE MONTHS AND NINE MONTHS ENDED SEPTEMBER 30, 2012 AND 2011

(UNAUDITED)

NOTE 1: BASIS OF PRESENTATION

The accompanying condensed consolidated financial statements and footnotes thereto are unaudited.

The Condensed Consolidated Balance Sheets as of September 30, 2012 and December 31, 2011, the Condensed Consolidated Statements of Operations for the three and nine months ended September 30, 2012 and 2011 and the Condensed Consolidated Statements of Cash Flows for the nine months ended September 30, 2012 and 2011 have been prepared by us without audit, and in accordance with the requirements of Form 10-Q and, therefore, they do not include all information and footnotes necessary for a fair presentation of financial position, results of operations, and cash flows in conformity with accounting principles generally accepted in the United States of America. In our opinion, the accompanying unaudited condensed consolidated financial statements contain all adjustments necessary to present fairly in all material respects our financial position as of September 30, 2012, results of operations for the three and nine months ended September 30, 2012 and 2011 and cash flows for the nine months ended September 30, 2012 and 2011. All such adjustments are of a normal recurring nature. The results of operations and cash flows for the three and nine months ended September 30, 2012 are not necessarily indicative of the results to be expected for the full year. We have evaluated subsequent events through the filing of this Form 10-Q with the SEC, and determined there have not been any events that have occurred that would require adjustments to our unaudited Condensed Financial Statements.

The information contained in this report on Form 10-Q should be read in conjunction with our Form 10-K for our fiscal year ended December 31, 2011.

The preparation of financial statements in conformity with accounting principals generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the amounts of assets, liabilities, revenue, costs and expenses. Actual results could differ from these estimates.

Agreement with Simon Property Group, L.P.

In April 2011, we signed an exclusive rights agreement with a Top Mall Developer (the "Simon Property Group") to create a location-based mobile marketing network called **Mobiquity Networks**. The 50 mall agreement runs through December of 2015 and includes top malls in the Simon Mall portfolio. This new alliance will give advertisers the opportunity to reach millions of mall visitors per month with mobile digital content and offers when they are most receptive to advertising messages.

In connection with Eye Corp., Mobiquity Networks will deliver digital content and offers to shoppers on their mobile devices through Eye Corp's extensive Mall Advertising Network. Eye Corp and Mobiquity Networks have an exclusive agreement to build a location-based mobile marketing network throughout Eye Corp's Mall Advertising network. New properties to be added to the Mobiquity Networks portfolio will include iconic malls in the top DMA's (designated market area) in the US. These prestigious malls further complement Mobiquity Networks' portfolio of prominent malls including Queens Center Mall in New York City, Northbridge in Chicago, and Santa Monica Place in Los Angeles.

Ace's Location-Based Mobile advertising medium is designed to reach on-the-go shoppers via their mobile devices with free rich media content delivered using Bluetooth or Wi-Fi. This advertising medium offers extremely targeted messaging engineered to engage and influence shoppers as they move about the mall environment. Eye Corp, along with Ace Marketing, will jointly create mobile marketing programs for existing clients in conjunction with their already active in mall advertising programs. Mobiquity Networks proximity marketing units will be strategically positioned in shopping malls near entrances, anchor stores, escalators and other high-traffic, and high dwell-time areas. NOTE 2: ACCOUNTING PRONOUNCEMENTS

Except for rules and interpretive releases of the SEC under authority of federal securities laws and a limited number of grandfathered standards, the *FASB Accounting Standards Codification*TM (“ASC”) is the sole source of authoritative GAAP literature recognized by the FASB and applicable to the Company. Management has reviewed the aforementioned rules and releases and believes any effect will not have a material impact on the Company's present or future financial statements.

NOTE 3: SUMMARY OF SELECTED SIGNIFICANT ACCOUNTING POLICIES

The Company records all shipping and handling fees billed to customers as revenues and related costs as cost of goods sold, when incurred.

Actual results could differ from those estimates.

NOTE 4: LOSS PER SHARE

Basic loss per common share is computed by dividing net loss by the weighted average number of shares of common stock outstanding during the period. Dilutive loss per share gives effect to stock options and warrants, which are considered to be dilutive common stock equivalents. Basic loss per common share was computed by dividing net loss by the weighted average number of shares of common stock outstanding. The number of common shares potentially issuable upon the exercise of certain options and warrants that were excluded from the diluted loss per common share calculation was approximately 15,600,000 and 14,200,000 because they are anti-dilutive as a result of a net loss for the three months ended September 30, 2012 and 2011, respectively.

NOTE 5: STOCK COMPENSATION

Compensation costs related to share-based payment transactions, including employee stock options, are recognized in the financial statements utilizing the straight line method for the cost of these awards.

The Company's results for the three month periods ended September 30, 2012 and 2011 include employee share-based compensation expense totaling approximately \$(23,000) and \$85,000, respectively. The Company's results for the nine month periods ended September 30, 2012 and 2011 include employee share-based compensation expense totaling approximately \$944,000 and \$262,000, respectively. Such amounts have been included in the Condensed Consolidated Statements of Operations within selling, general and administrative expenses. No income tax benefit has been recognized in the statement of operations for share-based compensation arrangements due to a history of operating losses.

The following table summarizes stock-based compensation expense for the three and nine months ended September 30, 2012 and 2011:

	Three Months Ended		Nine Months Ended

NOTE 6: STOCK OPTION PLAN

During Fiscal 2005, the Company established, and the stockholders approved, an Employee Benefit and Consulting Services Compensation Plan (the "2005 Plan") for the granting of up to 2,000,000 non-statutory and incentive stock options and stock awards to directors, officers, consultants and key employees of the Company. On June 9, 2005, the Board of Directors amended the Plan to increase the number of stock options and awards to be granted under the Plan to 4,000,000. In October 2009, the Company established and the stockholders approved a 2009 Employee Benefit and Consulting Services Compensation Plan (the "2009 Plan") for granting up to 4,000,000 non-statutory and incentive stock options and awards to directors, officers, consultants and employees of the Company. (The 2005 Plan and the 2009 Plan are collectively referred to as the "Plans".)

All stock options under the Plans are granted at or above the fair market value of the common stock at the grant date. Employee and non-employee stock options vest over varying periods and generally expire either 5 or 10 years from the grant date.

The fair value of options at the date of grant was estimated using the Black-Scholes option pricing model. The fair values of these restricted stock awards are equal to the market value of the Company's stock on the date of grant, after taking into certain discounts. The expected volatility is based upon historical volatility of our stock and other contributing factors. The expected term is based upon observation of actual time elapsed between date of grant and exercise of options for all employees. Previously, such assumptions were determined based on historical data.

The Company began as a promotional products company and has since evolved into an integrated marketing solutions company. Ace currently focuses on four business verticals; Branding, Interactive, Direct Relationship Marketing and

Mobile Marketing.

The **Mobile Marketing** advertising medium continues to gain momentum in marketing spending. It gives advertisers the ability to reach consumers with their message as they are ready to make their purchasing decision.

Ace Marketing & Promotions' subsidiary **Mobiquity Networks** provides location-based mobile marketing services via Bluetooth and Wi-Fi that requires no GPS tracking and no need to download an application. Mobiquity utilizes a targeted, location-based approach to reach audiences on their mobile devices when it matters most. The Company has built an extensive location based mobile marketing mall network which currently enables access to over 96 million mobile customer visits per month while they are shopping. Our network allows brands to engage their potential customers with the right offer at the right place at the right time....when they are about to make a purchasing decision.

Mobiquity currently has over 600 zones throughout 75 malls with over 96 million monthly visits to those malls. These zones create a cloud of coverage so that visitors do not need to go directly to one of these zone access points. Some of our land mark malls include, but are not limited to:

- Roosevelt Field – NY
- The Galleria – Houston
- Lenox Square – Atlanta
- Northbridge – Chicago
- Santa Monica Place – LA
- Copley Place – Boston

Location-Based Mobile Marketing combined with Out-Of-Home Advertising results in strong opt-in rates due to proximity of the Network. Through its subsidiary Mobiquity Networks, Management believes that Ace is the first Location-Based Mobile Marketing Company focused on US shopping malls and has built and controls the only national proximity marketing mall network. An exclusive contract with leading Out-Of-Home advertising company, Eye Corp. will enable Ace to remain a leader in US malls. According to the agreement, Eye Corp. is exclusive to Ace for five years. Eye Corp. is a subsidiary of Ten Network Holdings, a public company with its headquarters in Australia. Eye Corp. has an exclusive agreement with Simon Malls to manage their non-digital assets in all mall properties and has a full-time sales force that maintains relationships with over 800 brands. Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with generally accepted accounting principles in the United States. The preparation of financial statements requires management to make estimates and disclosures on the date of the financial statements. On an on-going basis, we evaluate our estimates including, but not limited to, those related to revenue recognition. We use authoritative pronouncements, historical experience and other assumptions as the basis for making judgments. Actual results could differ from those estimates. We believe that the following critical accounting policies affect our more significant judgments and estimates in the preparation of our financial statements.

REVENUE RECOGNITION. Revenues are recognized when title and risk of loss transfers to the customer and the earnings process is complete. In general, title passes to our customers upon the customer's receipt of the merchandise. Revenue is accounted by reporting revenue gross as a principal versus net as an agent. Revenue is recognized on a gross basis since our company has the risks and rewards of ownership, latitude in selection of vendors and pricing, and

bears all credit risk. Our company records all shipping and handling fees billed to customers as revenues, and related costs as cost of goods sold, when incurred.

ALLOWANCE FOR DOUBTFUL ACCOUNTS. We are required to make judgments based on historical experience and future expectations, as to the realizability of our accounts receivable. We make these assessments based on the following factors: (a) historical experience, (b) customer concentrations, (c) customer credit worthiness, (d) current economic conditions, and (e) changes in customer payment terms.

STOCK BASED COMPENSATION. The Company records compensation expense associated with stock options and other equity-based compensation. Share-based compensation expense is determined based on the grant-date fair value estimated using the Black Scholes method. The Company recognizes compensation expense on a straight-line basis over the requisite service period of the award.

RESULTS OF OPERATIONS

The following table sets forth certain selected unaudited condensed consolidated statement of operations data for the periods indicated in dollars and as a percentage of total net revenues. The following discussion relates to our results of operations for the periods noted and is not necessarily indicative of the results expected for any other interim period or any future fiscal year. In addition, we note that the period-to-period comparison may not be indicative of future performance.

Also, it is our practice to pass freight costs on to our customers. Reimbursement of freight costs which are included in revenues have lower profit margins than sales of our promotional products and has the effect of reducing our overall gross profit margin on sales of products, particularly on smaller orders. If you exclude the proximity costs of \$50,514 from our third quarter of 2012 cost of revenues, our gross profit percentage would have been approximately 32.8%.

Mobiquity Networks

In February 2012, we announced our plans to have the architecture for our proprietary mobile marketing solutions; “Mall-Offers Wi-Fi” and “mallooffers.com” completed by the end of the first quarter of 2012 and that we begin to rollout the solutions on our nationwide Mobiquity Network.

Mobiquity Networks is currently operational in 75 malls across the US and has access to approximately 96 million shopper visits per month.

The Mall-Offers Platform will list specials from retailers in each mall throughout the Mobiquity Network. The specials will be accessible on the secured Wi-Fi network that Mobiquity has already installed in each of its 75 malls across the US. Shoppers with smart phones will simply connect to “Mall-Offers Wi-Fi” and browse by either retailer or category on their mobile device. The solution will not require the shopper to download an app and access to Mall Offers will be completely free for the user. Mallooffers.com is a website that aggregates all of the special offers, coupons and discounts offered by all of the participating retailers in all of the malls within the Mobiquity Network. Consumers will have the ability to search for specials by mall, store name or category prior to going to the mall or on their mobile devices. This will help the consumer to choose which mall to visit as well as which store within the mall to purchase their item of interest. The website will also offer consumers the ability to register for special alerts from their favorite stores. The consumer can choose to receive an email or text whenever their favorite store has a special offer.

Our Mall-Offers Platform should help address the mobile marketing industry’s single largest issue, which is delivering relevant offers to consumers at the point of purchase. Management believes that most mall retailers desire to have a mobile marketing strategy but haven’t figured out how to get in front of consumers at the point of sale. The Mall-Offers Platform gives us the ability to offer the hundreds of retailers in each mall within the Mobiquity Network a true mobile marketing solution. In 2012 both companies and their sales agencies now realize the implementation of a mobile strategy is now a necessity. The activation needs to go beyond simple banner and pop-up ads on a mobile website or the development of an app. Consumers are seeking relevant content and valuable offers, not ambush advertising. The new Mall Offers Wi-Fi Network will give retailers and company brands access to consumers and consumers’ access to the offers they want to see.

As a result of the foregoing, Management is excited to have several million dollars of proposals that we have
