Shareholders, Management and Board Members

Telecomunicações de São Paulo S.A. □ TELESP

São Paulo - SP

1. We have audited the accompanying balance sheets (company and consolidated) of Telecomunicações de São Paulo S.A. □ TELESP as of December 31, 2008, and the related statements of income, shareholders' equity, cash flows and value added for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements.

2. We conducted our audit in accordance with generally accepted auditing standards in Brazil which comprised: (a) the planning of our work, taking into consideration the materiality of balances, the volume of transactions and the accounting and internal control systems of Telecomunicações de São Paulo S.A. □ TELESP, (b) the examination, on a test basis, of the documentary evidence and accounting records supporting the amounts and disclosures in the financial statements, and (c) an assessment of the accounting practices used and significant estimates made by management of Telecomunicações de São Paulo S.A. □ TELESP, as well as an evaluation of the overall financial statement presentation.

3. In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Telecomunicações de São Paulo S.A. □ TELESP at December 31, 2008, and the results of its operations, its shareholders' equity, its cash flows and value added for the year then ended, in accordance with the accounting practices adopted in Brazil.

1

4. We have formerly audited the financial statements (company and consolidated) for the year ended December 31, 2007, comprising the balance sheet as of that date, and the related statements of operations, of shareholders' equity and of changes in financial position for the year then ended, in addition to supplementary information including the statements of cash flows and of value added, on which we issued an unqualified report dated February 18, 2008. As mentioned in Note 3, the accounting practices adopted in Brazil were subjected to changes effective from January 1, 2008. The financial statements for the year ended December 31, 2007, presented in conjunction with 2008 financial statements, were prepared in accordance with the accounting practices effectively adopted in Brazil through December 31, 2007 and, as allowed by CPC Technical Pronouncement No. 13 □ First Time Adoption of Law No. 11638/07 and Provisional Executive Act No. 449/08, do not include any adjustments for

purposes of comparison between the years.

São Paulo, February 16, 2009.

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Notes to the financial statements

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

1. Operations and background

a) Controlling shareholders

Telecomunicações de São Paulo S.A. - Telesp (hereinafter Telesp or Company), is headquartered at Rua Martiniano de Carvalho, 851, in the capital of the State of São Paulo. Telesp belongs to the Telefónica Group, telecommunications industry leader in Spain and present in several European and Latin American countries. The Company is controlled by Telefónica S.A., which as of December 31, 2008, holds total indirect interest of 87.95% of which 85.57% are common shares and 89.13% are preferred shares.

b) Operations

The Company's basic business purpose is the rendering of fixed wire telephone services in the state of São Paulo under Fixed Switch Telephone Service Concession Agreement - STFC granted by the National Communications Agency (ANATEL), which is in charge of regulating the telecommunications sector in Brazil (Note 1.c). The Company has also authorizations from ANATEL, directly or through its subsidiaries, to provide other telecommunications services, such as data communication to the business market and broadband internet services under the *Speedy and Ajato* brand and since the second half 2007, pay TV services (i) by satellite all over the country (Telefônica TV Digital) and (ii) using MMDS technology in the cities of São Paulo, Rio de Janeiro, Curitiba and Porto Alegre.

The Company is registered with the Brazilian Securities Commission (CVM) as a public held company and its shares are traded on the São Paulo Stock Exchange (BOVESPA). The Company is also registered with the US Securities and Exchange Commission (SEC) and its American Depository Shares (ADS's) - level II are traded on the New York Stock Exchange (NYSE).

c) The STFC concession agreement

The Company is a concessionaire of the fixed switch telephone service (STFC) to render local and domestic long-distance calls originated in Region 3, which comprises the State of São Paulo, in Sectors 31, 32 and 34, established in the General Concession Plan (PGO).

TELECOMUNICAÇÕES DE SÃO PAULO S.A. ☐ TELESP

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

1. Operations and background (Continued)

c) The STFC concession agreement

The current Concession Agreement's renewal, dated December 22, 2005, in force since January 1, 2006, awarded as an onerous title, will be valid until December 31, 2025. However, the agreement can be reviewed on December 31, 2010, 2015 and 2020. Such condition allows ANATEL to set up new requirements and goals for univerzaliation and quality of telecommunication services, according to the conditions in force by that moment.

The Concession Agreement establishes that all assets owned by the Company and which are indispensable to the provision of the services described on such agreement are considered reversible assets and are deemed to be part of the concession assets. These assets will be automatically returned to ANATEL upon expiration of the concession agreement, according to the regulation in force by that moment. On December 31, 2008, the net book value of reversible assets is estimated at R\$6,929,532 (R\$7,187,898 in 2007), comprised of switching and transmission equipment and public use terminals, external network equipment, energy equipment and system and operation support equipment.

Every two years, during the agreement's new 20-year period, public regime companies will have to pay a renewal fee which will correspond to 2% of its prior-year SFTC revenue, net of taxes and social contributions. Exceptionally, the first payment of this biannual fee happened on April 30, 2007 by value of R\$224,760, based on the 2006 STFC net revenues. The next payment is scheduled for April 30 of 2009 based on the 2008 net revenues (note 21).

d) The telecommunications services subsidiaries and associated companies

A. Telecom S.A.

A. Telecom S.A. is a closely held, wholly-owned by the Company. It is engaged primarily in providing the telecommunication and data services and customer internal telephony network maintenance. The principal services are as follows:

10

1. Operations and Background (Continued)

d) The telecommunications services subsidiaries and associated companies (Continued)

Aliança Atlântica Holding B.V.:

A company formed under the laws of the Netherlands in Amsterdam, whose main asset is the participation of 0.61% in Portugal Telecom. As of December 31, 2008, the Company holds a 50% interest in Aliança Atlântica and

Telefónica S.A. holds the remaining 50%.

Companhia AIX de Participações

This company is engaged in both direct and indirect development of activities related to the construction, conclusion and operation of underground fiber optic networks. Currently, Telesp holds 50% interest in this company.

Companhia ACT de Participações

Companhia ACT is engaged in providing technical assistance for the preparation of Rede Refibra project, by providing studies to make it more profitable, as well as inspect the activities in progress related to the project. Currently, Telesp holds 50% interest in this company.

2. Corporate events

a) Acquisition of Telefônica Televisão Participações S.A. (formerly Navytree Participações S.A)

On October 31, 2007, ANATEL concluded the regulatory analysis of the association between Abril Group and the Company signed on October 29, 2006, and approved such operation.

Accordingly, the Company acquired 100% of the capital of Telefonica Televisão Participações S.A.(TTP), a company that owns interests in companies providing subscription TV services. Telefonica Televisão holds the following ownership interests:

2. Corporate events (Continued)

a) Acquisition of Telefônica Televisão Participações S.A. (formerly Navytree Participações S.A) (Continued)

	Ownership Interests	
	ON	PN
Telefônica Sistemas de Televisão S.A.	100.00%	100.00%
Comercial Cabo TV São Paulo S.A.	19.90%	100.00%
Lemontree Participações S.A.	-	100.00%
TVA Sul Paraná S.A.	49.00%	100.00%
GTR-T Participações e Empr.S.A.	-	100.00%

On February 29, 2008, the Company paid up a capital increase in Telefônica Televisão with shares held in A.Telecom. With this operation, A.Telecom became a wholly-owned subsidiary of TTP.

Edgar Filing: TELESP HOLDING CO - Form 6-K

On July 25, 2008 the Company paid up a capital increase in Telefonica Televisão with shares held in Telefonica Data S.A. With this operation, T.Data became a wholly-owned subsidiary of TTP.

On October 31, 2007, Anatel concluded the process of regulation assessment of the association between Abril Group and the Company and approved the transaction. The process is being analyzed by CADE, in competition point of view.

b) Merger of Telefônica Data Brasil Participações Ltda. and Telefônica Televisão Participações S.A.

Pursuant to the Relevant Fact published on October 21, 2008, the Company's Board of Directors approved, on that date, the proposed corporate reorganization involving the Company, Telefônica Data do Brasil Participações Ltda. (DABR) and Telefônica Televisão Participações S.A. (TTP), as approved at the General Shareholders' Meeting held by Telesp on November 11, 2008.

13

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

2. Corporate events (Continued)

The transaction included the following steps:

1st Step: DABR was merged into Telesp and, as a result, the company and its shares ceased to exist. Telesp shares then owned by DABR were directly assigned to controlling shareholder SP Telecomunicações Participações Ltda. upon merger, with the rights applicable to outstanding shares issued by TELESP remaining unchanged. DABR's net equity included goodwill from Telesp shares, in the amount of R\$185,511, which was recorded at the acquisition date based on future profits. In accordance with Law No. 9532/1997, amortization of goodwill will provide Telesp with a tax benefit of R\$63,074 to be capitalized by the controlling shareholder upon realization, pursuant to CVM Instruction No. 319/1999. Other shareholders have preemptive rights in the subscription of capital increases.

b) Merger of Telefônica Data Brasil Participações Ltda. and Telefônica Televisão Participações S.A. (Continued)

The following table shows DABR's merged equity:

	DABR
Assets	
Current assets	1,021
Permanent assets	
Investments	63,074
	<hr/>
Goodwill	185,511
Provision for safeguarding shareholders' rights	(122,437)

Fixed assets	44

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

2. Corporate events (Continued)

The following table shows TTP's merged equity:

	TTP
	<hr/>
Assets	
Current assets	1,744
Permanent assets	
Investments	1,108,872
Liabilities	
Current liabilities	(3)
	<hr/>

Net equity (*)	1,110,613
----------------	-----------

(*) Net equity in the amount of R\$1,110,613 represented the Company's investment in TTP on the merger date.

b) Merger of Telefônica Data Brasil Participações Ltda. and Telefônica Televisão Participações S.A. (Continued)

For merger purposes, the net equities of TTP and DABR were measured at book value on September 30, 2008 and October 17, 2008, respectively, by an independent appraiser whose appointment was ratified at the General Shareholders' Meeting held by Telesp on November 11, 2008. The merged companies had no unrecorded contingent liabilities that would have been assumed by Telesp as a result of this transaction. The transaction is not subject to approval by Brazilian or foreign regulatory entities or anti-trust agencies. No withdrawal rights were exercised since the subsidiaries had no minority interests.

Telesp's management believes that this corporate reorganization meets the Company's and its shareholders' interests, and will allow increased synergies, optimized managerial risks and simpler administrative and corporate structures, reducing costs as well as generating tax benefits opportunities and cash flow improvement for the Company and its shareholders.

15

TELECOMUNICAÇÕES DE SÃO PAULO S.A. ☐ TELESP

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

3. Basis of presentation of the financial statements

The accompanying individual and consolidated financial statements as of December 31, 2008 and 2007 were prepared in accordance with accounting practices adopted in Brazil, which are based on accounting practices issued from Brazilian corporate law and accounting standards and procedures established by the Brazilian Securities Commission (CVM).

On January 1, 2008, Law No. 11638, of December 28, 2007 became effective, which substantially amends Chapter XV of Law No. 6404 (Corporation Law), which addresses the financial statements. On December 3, 2008, Provisional Executive Act (MP) No. 449 was published and produced some adjustments in Law No. 6404 and of Law No. 11638.

As permitted by CVM Resolution No. 565, which approved Technical Pronouncement No. 13, issued by the Brazilian Accounting Pronouncements Committee (CPC), the Company opted for the first-time adoption of Law No. 11638 and of MP No. 449/08 in its financial statements for the year ended December 31, 2008. Accordingly, there were changes in the accounting practices as compared to the year ended December 31, 2007.

16

TELECOMUNICAÇÕES DE SÃO PAULO S.A. ☐ TELESP

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

3. Base of presentation of the financial statements (Continued)

Changes in accounting practices taken into consideration when preparing or presenting the financial statements for the year ended December 31, 2008 and the initial balance sheet for December 31, 2008 were measured and recorded by the Company based on the following accounting pronouncements issued by the Brazilian Accounting Pronouncements Committee (CPC) and approved by the Brazilian Securities Commission (CVM):

- Conceptual Framework for Preparation and Presentation of the Financial Statements, as approved by CVM Resolution No. 539;
- CPC 01 Impairment of Assets;
- CPC 02 Effects on Changes in Exchange Rates and Financial Statement Conversions;
- CPC 03 Cash Flows Statements;
- CPC 04 Intangible Assets;
- CPC 05 Related Party Disclosures;
- CPC 06 Capital Lease;
- CPC 09 Statement of Value Added;
- CPC 12 Present Value Adjustment;
- CPC 13 First-time adoption of Law No. 11638/07 and Provisional Executive Act No. 449/08;
- CPC 14 Financial Instruments: Recognition, Measurement and Disclosure.

The initial balance sheet as of December 31, 2007 (*transition date*) was prepared considering the required exceptions and some of the elective exemptions permitted by CPC Technical Pronouncement No. 13, with only the exempted classification of financial instruments being relevant. Although CPC Technical Pronouncement No.14 requires the financial instruments to be classified upon initial recognition, for the purpose of first-time adoption, CPC Technical Pronouncement No. 13 allows classification on the *transition date*, which was the option elected by the Company.

Pursuant to the requirements for the first-time adoption of the new accounting practices, the Company presents below, for fiscal year 2008, a brief description and the amounts impacting shareholders' equity and net income, from the company and consolidated, as these relate to the changes introduced by Law No. 11638/08 and by Provisional Executive Act No. 449/08.

17

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

3. Base of presentation of the financial statements (Continued)

a) Capital lease: CPC Technical Pronouncement No.06

Assets under lease agreements are classified either as finance leases or operating leases. Under a finance lease, a lessor transfers substantially all the risks and rewards incident to ownership to the lessee. All other leases are classified as operating leases.

In the capacity of lessor, the Company executed lease agreements for IT equipment (‘‘Posto Informático’’) that meet the criteria of finance leases. On the date the equipment is installed, income is recognized for the present value of lease payments and matched with accounts receivable. Investments made in the acquisition of equipment are recorded as ‘‘Inventories’’ and recognized as lease costs upon installation. The difference between gross and net investment value is recognized as unrealized financial income and the related financial expenses are posted to each period over the lease term reflecting a periodic interest rate on the outstanding liability balance.

b) Financial instruments: CPC Technical Pronouncement No. 14 and CVM Instruction No. 475

Financial assets and liabilities should be initially classified and measured based on the following categories:

Financial assets	Valuation method
Financial assets at fair value through profit or loss	Fair value
Investments held to maturity	Amortized cost
Loans and receivables	Amortized cost
Available for sale	Fair value
Financial liabilities	
Financial liabilities at fair value through profit or loss	Fair value
Financial liabilities not at fair value	Amortized cost

Financial assets and liabilities recognized on the balance sheet for December 31, 2008 are shown by category in Note 34.

18

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

3. Base of presentation of the financial statements (Continued)

b) Financial instruments: CPC Technical Pronouncement No. 14 and CVM Instruction No. 475 (Continued)

Financial assets and liabilities should be initially measured at fair value. The fair value of financial assets and liabilities is determined based on (i) the price quoted in an active market or, if an active market does not exist, (ii) valuation techniques that allow estimating fair value on the transaction date, considering arm’s length transactions between knowledgeable and willing parties.

Financial assets and liabilities are subsequently measured at fair value or amortized cost. Amortized cost corresponds to (i) the initial carrying amount of financial assets or liabilities (ii) less amortizations of principal and (iii) more or less interest accrued under the effective interest method.

The effects of subsequent measurement of financial assets and liabilities are directly posted to the net income for the year as financial income or expenses, except for financial assets available for sale, whose subsequent measurement is reflected under shareholders' equity as adjustments for equity valuation (Note 11).

Derivative financial instruments are classified as financial assets or liabilities at fair value through profit and loss, except where they meet the criteria for hedge instruments.

Derivatives aimed at protecting specific market risks (foreign currency and interest rate risks) and considered to be effective are classified as fair value hedges. In this category both the derivative and the hedged item are adjusted to fair value at each balance sheet date.

c) Present value adjustment: CPC Technical Pronouncement No. 12

Some long-term assets and liabilities must be initially measured at the discounted present value. The Company adopted this concept for ICMS assets generated by the acquisition of fixed assets, to be realized over 48 months.

19

TELECOMUNICAÇÕES DE SÃO PAULO S.A. – TELESP

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

3. Base of presentation of the financial statements (Continued)

d) Cumulative translation adjustments: CPC Technical Pronouncement No. 02

Foreign exchange gains and losses arising from the translation into reais of foreign investments accounted for under the equity method of accounting using a different functional currency must be recorded under the parent company's shareholders' equity as Cumulative Translation Adjustments. The Company has investments in Aliança Atlântica (jointly-owned subsidiary) head quartered in the Netherlands.

The effects of the first-time adoption of Law No. 11638/07 and Provisional Executive Act No. 449/08 on net income and shareholders' equity for 2008 are shown below:

Effects of first-time adoption	Net income		Company / Consolidated
	Company	Consolidated	Shareholders' equity
Balances per 12/31/2008 financial statements	2,419,971	2,419,971	10,045,692

Effects of Law No. 11638/07	(43,639)	(43,639)	79,511

d) Cumulative translation adjustments: CPC Technical Pronouncement No. 02 (Continued)

(*) Breakdown of equity pick-up	Amount
Discount to present value of long-term assets	(1,890)
Additions to property, plant and equipment	15
Lease (lessor and lessee)	(33,981)
Financial instruments	121

Total	(35,735)
-------	----------

Additionally, due to the elimination of the non-operating income/expenses account by Provisional Executive No. 449/08, the Company reclassified R\$8,376 and R\$131,596 reported in the financial statements for the years ended December 31, 2008 and 2007, respectively, to other operating income/expenses accounts and net proceeds from the sale of fixed assets and investment, as well its disclosure in note.

The approval of the financial statements conclusion occurred in an Executive Committee Meeting on February 12, 2009.

Assets and liabilities are classified as current when their realization or liquidation will probably occur in the next twelve months. Otherwise, they will be classified as non-current assets and liabilities.

Accounting estimates are considered for the financial statements preparation process. Such estimates are based on objective and subjective factors according to management's judgment for the appropriate amounts to be recorded in the financial statements.

Transactions which involve estimates mentioned above may result in different amounts when realized in subsequent periods due to inaccurate results regarding the estimate process. The Company revises its estimation and assumptions periodically.

The consolidated financial statements include the accounts and transactions of the following directly and indirectly wholly-owned subsidiaries and jointly controlled affiliates which are proportionally consolidated, according to the corporate participation described below:

21

TELECOMUNICAÇÕES DE SÃO PAULO S.A. TELESP

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

3. Base of presentation of the financial statements (Continued)

d) Cumulative translation adjustments: CPC Technical Pronouncement No. 02 (Continued)

Subsidiaries	2008	2007
A.Telecom S.A.	100%	100%
Telefonica Data S.A.	100%	100%
Aliança Atlântica Holding B.V.	50%	50%
Companhia AIX de Participações	50%	50%
Companhia ACT de Participações	50%	50%

Telefônica Televisão Participações S.A.	-	100%
Telefônica Sistemas de Televisão S.A.	100%	100%

Due to the acquisition of Telefônica Televisão Participações (note 2.a), the Company's consolidate results for the year ended as of December 31, 2007 include the consolidate results of TTP from October to December 2007.

In consolidation, all assets, liabilities, revenues and expenses resulting from intercompany transactions and equity holdings among the consolidated companies have been eliminated.

For the financial statements as of December 31, 2007, certain accounts were reclassified to allow adequacy and consistency thereof with the current period. However, the amounts of these reclassifications are immaterial in relation to the financial statements taken as whole.

4. Summary of principal accounting practices

a) Cash and cash equivalents: include cash, positive current account balances, and investments redeemable 90 days from the balance sheet dates basically comprising CDB (Bank Deposit Certificate) indexed to CDI (Interbank Deposit Certificate) with quick liquidity and unlikely change in market value.

22

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

4. Summary of principal accounting practices (Continued)

b) Trade accounts receivable, net: are stated at the rendered service value according to the contracted conditions adjusted by the estimated amount of eventual losses. This caption also includes accounts receivable from services rendered but not billed at the balance sheet date. Allowance for doubtful account is recorded in order to cover eventual losses and mainly considers the average default rate. This item, in the consolidated financial statements, includes finance lease receivables (lessor) as mentioned in Note 3.a.

c) Foreign currency transactions: transactions in foreign currencies are recorded at the prevailing exchange rate at the date of the transaction. Foreign currency denominated assets and liabilities are remeasured using the exchange rate at the balance sheet date. Exchange differences resulting from foreign currency transactions were recognized in financial income and financial expenses.

d) Inventories: are stated at average acquisition cost, net of allowance for reduction to realizable value. This corresponds to items for use, maintenance or resale, and the latter includes equipment for finance lease operations (Note 3.a)

e) Investments: wholly, jointly-owned subsidiaries and affiliated are accounted for under the equity method. Other corporate investments are considered to be available-for-sale financial assets valued at market value based on the latest stock exchange rate for the year (Note 3.b). On the consolidated financial statements, all the investments accounted for an equity method are consolidated. The subsidiaries are consolidated as of December 31, of each period.

f) Property, plant and equipment: this item is measured at acquisition and/or construction cost, less accumulated depreciation and any impairment losses, if applicable. Asset costs are capitalized until the asset becomes operational.

Costs incurred after the asset becomes operational are immediately expensed, under the accrual method of accounting. Expenses that represent asset improvement (expanded installed capacity or useful life) are capitalized.

Depreciation is calculated under the straight-line method based on the estimated useful lives of the assets and as determined by the Public Telecommunications Service regulations. The main depreciation rates are shown in Note 12.

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

4. Summary of principal accounting practices (Continued)

g) Intangible assets: these are stated at acquisition and/or construction cost, less accumulated depreciation and any impairment losses, if applicable.

Intangible assets with finite lives are amortized on the straight-line basis over their estimated useful life. Intangible assets with indefinite useful lives are not amortized but tested for impairment annually or when there is an indication that their carrying amount may not be recovered.

Goodwill arising from the acquisition of investments and recorded based on future profits will be treated as intangible assets with indefinite useful lives. Until December 31, 2008, amortization of goodwill was based on results estimated for 10-year periods; goodwill will no longer be amortized starting January 1, 2009, being thus subjected to annual impairment testing (Note h).

h) Asset recoverability test: Management conducts annual reviews of the net book value of its assets in order to evaluate events or changes in economic, operating or technological circumstances that may indicate asset impairment or loss in its carrying amount. In cases where the net book value exceeds the realizable value an impairment provision is recognized to adjust the asset's net book value to its realizable value.

i) Income tax and social contribution: corporate income tax and social contribution are accounted for on the accrual basis and are presented net of prepaid taxes, paid during the year. Deferred taxes assets and liabilities attributable to temporary differences and tax loss carry-forwards are recognized as deferred tax assets and liabilities, if applicable, on the assumption of future realization within the parameters established by CVM Deliberation 273/1998 and CVM Instruction No. 371/2002.

j) Reserves for contingencies, net: it is made based on management's judgment and it is composed by several administrative and legal proceedings. It is recognized for those cases in which an unfavorable outcome is considered probable at the balance sheet date. This reserve is presented net of the corresponding escrow deposits and classified as labor, civil or tax contingency (Note 20).

(A free translation of the original report issued in Portuguese)

4. Summary of principal accounting practices (Continued)

k) Revenue recognition: revenues related to Telecommunications services rendered are recorded on the accrual basis. Revenue unbilled from the date of the last billing until the date of the balance sheet is recognized in the month the service is rendered.

Revenue from the sales of cards for public phones is deferred and recognized in income as the cards are utilized based on consumption estimates.

Income from equipment under lease agreements classified as finance leases is recognized upon equipment installation, when the risk is actually transferred. Income is recognized for the present value of lease payments (Note 3.a).

l) Concession agreement's renewal fee: it is a fee which will be paid every two years, during the 20-year period that the concession agreement is in force, equivalent to 2% of its prior-year SFTC net revenue, according to the contract. Expenses are proportionally recognized during corresponding 24 months (Note 21).

m) Financial income (expense), net: represent interest, monetary and exchange variations arising from financial investments, debentures, loans and financing obtained and granted, as well as the results of derivative operations (hedge).

Declared interest on shareholders' equity is included in these accounts, however for disclosure purposes; the amount declared in the year was reversed to retained earnings in equity.

n) Pension and other post-retirement benefit: the Company sponsors individual and multiemployer post-retirement and health assistance plans for its employees. Actuarial liabilities, with characteristics of defined benefit, were calculated using the projected unit credit method, as provided for by CVM Deliberation No. 371/2000. Other considerations related to such plans are described in Note 32.

o) Financial instruments: are measured at fair value or amortized cost in the December 31, 2008 financial statements, as described in Note 3.b. For the year ended December 31, 2007, loans, financing and derivative instruments are shown at contractually agreed rates.

4. Summary of principal accounting practices (Continued)

p) Earnings per share: it is calculated based on net income for the year and the total number of shares outstanding at the balance sheet date. The difference between the Company's and the consolidated net income for the year ended December 31, 2007, in the amount of R\$209, refers to donations directly recorded as capital reserves at subsidiary A. Telecom S.A., accounted for under the equity method by the Company (Note 11).

5. Cash and cash equivalents

	Company		Consolidated	
	2008	2007	2008	2007

6. Trade accounts receivable, net (Continued)

Subsidiary A.Telecom offers □Posto Informático□, a product that consists in the lease of IT equipment to small- and medium-sized companies for fixed installments received over the agreed term. Considering the related contractual conditions, the Company classified this product as □Finance Lease□ in its December 31, 2008 financial statements (Note 3.a).

The Consolidated accounts receivable as of December 31, 2008. reflects the following effects:

	2008
Present value of minimum payments receivable	139,214
Unrealized financial income	20,154
Gross investment in finance lease receivables at year-end	159,368
Allowance for doubtful accounts	(26,159)
Financial Leases receivable, net	133,209
Current amount	77,651
Noncurrent amount	61,563

Aging list of financial leases receivable:

Year	Gross investment	Present value
------	------------------	---------------

Falling due within one year	77,651	77,651
Falling due within five years	81,717	61,563
	<hr/>	<hr/>
Total	159,368	139,214
	<hr/>	<hr/>

There are neither unsecured residual values that produce benefits to the lessor nor contingent payments recognized as revenues during the year.

Total	<u>1,495,894</u>	<u>1,548,813</u>	<u>1,612,323</u>	<u>1,657,353</u>
Current	925,877	1,023,430	1,032,516	1,117,982
Non-current	570,017	525,383	579,807	539,371

(*) Refers to credits on the acquisition of property, plant and equipment items, available for offset against VAT obligations in 48 months.

7.1. Deferred income and social contribution taxes

The Company recognized deferred income and social contribution tax assets considering the existence of taxable income in the last five fiscal years and the expected generation of future taxable profit discounted to present value based on a technical feasibility study, approved by the Board of Directors on December 19, 2008, as provided for in CVM Instruction No. 371/2002.

Company estimates the realization of the deferred taxes as of December 31, 2008 as follows:

28

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

7. Deferred and recoverable taxes (Continued)

7.1. Deferred income and social contribution taxes (Continued)

Year	Company	Consolidated
2009	499,985	502,119
2010	212,139	215,097
2011	135,675	135,675
2012	101,904	101,904
Thereafter	73,084	73,084
Total	<u>1,022,787</u>	<u>1,027,879</u>

The recoverable amounts above are based on projections subject to changes in the future.

Tax losses and temporary differences in the respective amounts of R\$62,512 and R\$35,379 were not recognized by the subsidiaries at December 31, 2008 in view of the unlikely generation of future taxable profits.

7.2. Merger tax credits

In October 2008, the merger of DABR into the Company through a corporate reorganization process mentioned in Note 2.b resulted in the recognition of merged tax credits arising from goodwill recorded by DABR in connection with the investment made in Telesp in 2006.

Additionally, the Company has tax credits arising from corporate reorganization processes following corporate investments acquired in prior years, as shown in the table below.

The Company's accounting records for corporate and fiscal purposes include specific (merged) goodwill and reserve accounts, and the related amortization, reversal of provision and tax credit realization are as follows:

29

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

7. Deferred and recoverable taxes (Continued)

7.2. Merged tax credits (Continued)

Company/Consolidated	2008		2007
	DABR	Spanish/ Figueira	Spanish/ Figueira
Balance sheet			
Goodwill, net of accumulated amortization	176,236	213,514	295,600
Provision for safeguarding shareholders' rights, net of reversals	(116,316)	(140,919)	(195,096)
Net amount □ tax credit	59,920	72,595	100,504
Statement of income			
Goodwill amortization for the year	(9,276)	(82,086)	(82,086)
Reversal of provision for safeguarding shareholders' rights	6,122	54,177	54,177

rights for the year			
Tax credit for the year	3,154	27,909	27,909
	<hr/>	<hr/>	<hr/>
Effect on net income for the year	-	-	-
	<hr/>	<hr/>	<hr/>

For calculation of the tax credits resulting from acquisition, income and social contribution tax rates are 25% and 9%, respectively.

As shown above, goodwill amortization, net of provision reversal and of the corresponding tax credit, had no impact on P&L.

For presentation purposes, the net amount of R\$132,515 (R\$92,863 under non-current assets and R\$39,652 under current assets), basically representing merger tax credit, was classified in the balance sheet as deferred and recoverable taxes. Goodwill amortization and provision reversal are recognized in the accounting records as operating income and expenses, and the related tax credit is recognized as provision for income and social contribution taxes.

The tax benefit generated by the amortization of DABR goodwill will be reversed to the Company's controlling shareholder, SP Telecomunicações Holding Ltda., through a capital increase with the issuance of the Company's shares. Other shareholders will be entitled to preemptive rights in the subscription of capital increases that may occur.

13. Intangible assets, net (Continued)

(a) Acquisition of IP network customer portfolio from Telefônica Data in December 2002. This was stated as Deferred Assets until 2007.

Edgar Filing: TELESP HOLDING CO - Form 6-K

(b) The negative goodwill on the acquisition of shares of Companhia AIX de Participações, recorded at the parent company, was allocated to Deferred Income in the consolidated financial statements, as defined in article 26 of CVM Instruction No. 247/96. Amortization was completed in 2008 based on estimated future profits.

(c) Goodwill on the spin-off of Figueira, which was merged into the Company following the merger of Telefônica Data Brasil Holding S.A. (TDBH) in 2006.

(d) Goodwill on the acquisition of control over Santo Genovese Participações Ltda. (controlling shareholder of Atrium Telecomunicações Ltda.), on December 24, 2004, has been amortized on the straight-line basis over 10 years, based on expected future profits.

(e) Goodwill on the acquisition of TTP (see Note 2.b) is based on expected future profits and is made up of total acquisition cost, R\$913,747, less the book value of the investment at the time, R\$53,544. In 2008, a price adjustment of R\$11,895 brought goodwill down to R\$848,308.

<u>Changes in intangible assets - Consolidated</u>	2008

Price adjustment of TTP	(11,895)
Amortization	(452,535)
Balance in 2008	1,852,434

14. Deferred assets

In accordance with Provisional Executive Act No. 449/08, deferred assets cease to exist with all the items being valued and reclassified as Intangible Assets. Deferred expenses of subsidiaries AIX Participações and ACT Participações were written off to retained earnings on the opening balance for the year ended December 31, 2008, and the 2007 comparative amounts were R\$8,460.

(a) Refers to the Company's organizational restructuring program realized in 2008.

20. Reserves for contingencies, net

The Company, as an entity and also as the successor to the merged companies, and its subsidiaries are involved in labor, tax and civil lawsuits filed with different courts. The Company's management, based on the opinion of its legal counsel, recognized reserves for those cases in which an unfavorable outcome is considered probable. The table below shows the breakdown of reserves by nature and activities during 2008:

41

20. Reserves for contingencies, net (Continued)

20.2. Tax contingencies and reserves

Risk - Consolidated	Amount involved	
	2008	2007
	<hr/>	<hr/>
Probable	167,956	232,152
Possible	2,864,127	2,706,417
	<hr/>	<hr/>
Total	3,032,083	2,938,569
	<hr/>	<hr/>

The principal tax contingencies according to the risk, are as follows:

- Claims by the National Institute of Social Security (INSS) referring to:

a) Several legal proceedings for the collection of *Seguro de Acidente de Trabalho* (Workers Accident Insurance Compensation, or SAT) and joint liability for social security contributions alleged not to have been paid by its subcontractors of approximately R\$330,850. In view of a decision handed down by the Federal Supreme Court recognizing the statute barring period of five years, the Company's management decided to reverse in 2008 the

provision recognized for the amounts covered by the barring period. However due the likelihood of a possible loss, a provision of R\$ 98,285 for part of the total amount was maintained.

b) Discussion relating to certain amounts paid under the Company's collective labor agreements, as a result of inflationary adjustments arising out of Planos Bresser and Verão , in the amount of approximately R\$145,751 In view of a decision handed down by the Federal Supreme Court recognizing the statute barring period of five years, the Company's management decided to reverse the provision recognized for the amounts covered by the barring period. However due the likelihood of a possible loss, a provision of R\$ 2,915 for part of the total amount was maintained.

c) Notification demanding social security contributions, SAT and amounts for third parties (National Institute for Agrarian Reform and Colonization (INCRA) and Brazilian Mini and Small Business Support Agency (SEBRAE)) for the payment of various salary amounts for the period from January 1999 to December 2000, in the amount of approximately of R\$62,137. These lawsuits are in the 1st lower court and at the last administrative level, respectively. No provision was made for the balance, for which the likelihood of loss is deemed possible.

20.2. Tax contingencies and reserves (Continued)

d) Notification demanding social security contributions for joint liability in 1993, in the amount of approximately R\$202,836, considered as a possible risk until December 2008, when the Company obtained a favorable decision on this suit, which was then closed.

e) Legal proceedings imposed fines amounting to R\$161,982 for distribution of dividends when the Company was allegedly in debt to INSS. No provision was made for the balance, for which the likelihood of loss is deemed possible. This matter is at the 2nd administrative level.

- Claims by the Finance Secretary of the State of São Paulo referring to:

f) Assessments on 2001, related to ICMS (State VAT) allegedly due on international long-distance calls for the period from November, 1996 to December, 1999 amounting to R\$452,139. One suit is at the last administrative stage and two suits are the first judicial stage. Considering the risk of a possible loss, no provisions were recognized.

g) Infraction notice related to the use of credits in the period from January to April 2002, in the amount of R\$34,001, for which the risk is considered possible. The claim is at the 2nd administrative level. Considering the risk level, no provision was made.

h) Infraction notice related to the non-reversal of ICMS credits in proportion to sales and exempt and non-taxed services in the period from January 1999 to June 2000 and from July 2000 to December 2003, in addition to an ICMS credit unduly used in March 1999. The total amount involved is R\$127,900. The risk is considered possible by legal counsel. The claims are at the 2nd and first administrative level, respectively. Considering the risk level, no provision was made.

i) Infraction notice issued by the São Paulo State Tax Department related to nonpayment of ICMS, from January 2001 to December 2005, on amounts received for equipment lease (modem), totaling R\$158,587. The suit is at the second administrative level. Considering the risk of a possible loss, no provisions were recognized.

20.2. Tax contingencies and reserves (Continued)

j) Infraction notices related to nonpayment of ICMS in the period from August 2004 to December 2005, for non-inclusion of revenues from rendering of several supplemental services and value added, in the amount of R\$286,673, upon determination of the tax basis. Related risk is assessed as possible by legal counsel. The claim is at the 2nd administrative level. Considering the risk level, no provision was made.

k) Infraction notice drawn up by the São Paulo State Finance Office on June 14, 2007, referring to co-billing operations from May to December 2004, due to: (i) non presentation of the totality of the files provided for in Administrative Ruling CAT No. 49/03; (ii) untimely compliance with notices referring to filing of electronic files; (iii) lack of or irregular recording on the Shipment records; and (iv) unpaid of tax concerning to a portion of the communication services rendered. The amount involved is R\$8,324, already considering payment of the notice item one in the terms of Law No. 6374/89 and of Decree No. 51960/07 (PPI), related to non-payment of taxes. Part of the infractions results from the not filed information by other operating companies. The likelihood of loss is assessed as possible. The claim is at the 1st administrative level. Considering the risk involved, the Company did not record a provision.

- Litigation at the Federal and Municipal Levels:

l) FINSOCIAL, currently COFINS, was a tax on gross operating revenues, originally established at a rate of 0.5% and gradually and subsequently raised to 2.0% . Such rate increases were judicially challenged with success by several companies, which led to the creation of taxable credits, caused by higher payments, which were offset by CTBC (company merged into the Company in November 1999) against current payments of related taxes, the COFINS. Claiming that those offsets made by CTBC were improper, the Federal Government made an assessment in the amount of R\$19,837. In October 2008, the Company obtained a final favorable decision on one of the suits, totaling R\$14,799. The other suits, in the amount of R\$5,038, are still on trial and await a decision by the second and last administrative stage. Despite the likelihood of a possible loss, a provision of R\$ 5,038 for the total amount was maintained.

20. Reserves for contingencies, net (Continued)**20.2. Tax contingencies and reserves** (Continued)

m) The City of São Paulo assessed the Company, alleging differences in the payment of the municipal tax on services (ISS), by the imputation of fines of 20% not paid by the Company, in the amount of R\$29,567. The claim is at the 2nd court level. The risk is considered possible. Considering the risk level, no provision was made.

n) On December 15, 2005, ANATEL edited Abridgment nº 01 (subsequently changed to Abridgment nº 07), where it confirmed its opinion not to exclude interconnection expenses from FUST basis, modifying its previous position. The Abridgment has retroactive application, since January, 2001. Thus, through ABRAFIX □ Brazilian Fixed Telecommunication Companies Association, on January 9, 2006, the Company petitioned a Security Mandate in order to assure the possibility of excluding interconnection expenses from FUST basis and/or not to be subject to the retrospective payment of differences identified as a result of adopting the noncumulative system by operation of Anatel Abridgement No. 7/2005. The total amount involved is R\$332,344. Out of this amount, R\$184,050 refers to differences identified as a result of adopting the noncumulative system during the retrospective period (2001 to 2005) and R\$148,294 refers to differences identified for the period 2006 to date, which is being deposited with the court on a monthly basis. Despite the likelihood of a possible loss, a provision has been recognized only for the court deposits. The suit is at the second judicial stage.

There are other contingencies that have also been accrued, for which the involved amount is R\$61,718; which the risk is considered probable by management.

20.3 Civil contingencies and reserves

Risk - Consolidated	Amount involved	
	2008	2007

20. Reserves for contingencies, net (Continued)

20.3 Civil contingencies and reserves (Continued)

The principal civil contingencies according to the risk, are as follows:

- Community Telephone Plan - PCT. These contingencies are related to civil contingencies in that the Company is involved in public class action lawsuits related to the Community Telephone Plan (PCT), claiming the possible right for indemnity for purchasers of the expansion plans who did not receive shares for their financial investment, in the municipalities of Diadema, São Caetano do Sul, São Bernardo do Campo and Ribeirão Pires involving a total amount of approximately R\$343,974. Since June, 2008 the risks involved are considered remote by the lawyers responsible for this case. The claim is in the 2nd court.
- There is a collective claim by ASTEL - Sistel Participants Association in São Paulo State, against the Company Suit brought by members of the Sistel Association in the State of São Paulo questioning the changes in the health care plan for the Company's retirees (PAMA). The suit is at the initial stage and there has been no judgment of dismissal. The Company's management, based on its legal counsel opinion, considers this proceeding as possible risk, with an estimated amount of R\$322,325. According to the risk, no provision was recorded.
- Enforcement proceedings brought by WCR against Telesp. On June 9, 2000, WCR do Brasil Serviços Ltda. proposed enforcement proceedings following ordinary procedural steps against the Company, claiming the collection of the alleged difference between the amounts calculated by Telesp regarding the use of the "0900 Service" and the amounts transferred to that company. The duly updated proceeding amount is R\$76,234. On October 1, 2004 the decision handed down by the 13th Civil Court of the central jurisdiction of São Paulo was published, by which the proceeding was deemed valid. On December 14, 2004, an appeal against the decision was filed, which was distributed to the 26th Panel of Judges of São Paulo. On May 26, 2006, the appeal against the decision was judged partially valid, and the content was maintained. The process is in a higher court. Since the risk level was considered as probable, provision was made.

- Suits for additional shares. These refer to suits involving the Company and addressing the right to receive additional shares calculated pursuant to the regulation issued by the Telecommunications Ministry with regard to network expansion plans after 1996. These suits are at various stages: first stage, Supreme Court and Federal Superior Court of Appeals. Considering the risk of a probable loss, a provision of R\$18,039 was made.
- As of December 31, 2008, the Company has a provision of R\$64,835 for fines relating to Several Administrative Proceedings filed by ANATEL against Telesp, considered by the legal advisors as a probable risk of loss.
- Contingencies, especially assessed as possible risks, involve matters relating to several legal suits, mainly: unacknowledged title to telephone lines, indemnity for material and personal damages, among others, for approximately R\$130,291.

22. Shareholders' equity (Continued)

a) Capital (Continued)

Capital increases do not necessarily have to observe the proportion between the numbers of shares of each type. However, the number of preferred shares, nonvoting or with restricted voting, must not exceed 2/3 of the total shares issued.

Preferred shares are nonvoting, but have priority in the reimbursement of capital and are entitled to dividends 10% higher than those paid on common shares, as per article 7 of the Company's bylaws and clause II, paragraph 1, article 17, of Law No. 6,404/76.

b) Capital reserves

Share premium

This reserve represents the amount exceeding book value of the shares arising from the issuance or capitalization on the date of issue.

Donations and subsidies for investment

These represent amounts in assets donated by subscribers for the expansion of the telecommunications services plant until 2007. After 2008, these donations will be classified as deferred revenues under liabilities.

Treasury shares

These correspond to the Company's treasury stock which resulted from merger with TDBH occurred in 2006, part of which refer to exercise of withdrawing rights and the remaining to the share auctions carried out by the Company. The average cost of acquisition was R\$44.77. At December 31, 2008, the market value of treasury stock was R\$16,258 (R\$18,164 at December 31, 2007).

c) Income reserves

Legal reserve

According to article 193 of Law No. 6,404/76, the Company chose not to set up the legal reserve, as such balance added to the capital reserve balance exceeded capital by 30%.

22. Shareholders' equity (Continued)

f) Interest on shareholders' equity

As proposed by Management, in 2008 and 2007, interest on shareholders' equity was credited to shareholders in accordance with article 9 of Law No. 9,249/95, net of withholding tax, as follows:

	2008	2007
Gross interest on shareholders' equity	<u>616,000</u>	<u>642,000</u>
Common shares	192,495	200,619
Preferred shares	423,505	441,381

Withholding income tax	(92,400)	(96,300)
	<hr/>	<hr/>
Interest on shareholders' equity, net of income tax included in dividends	523,600	545,700
	<hr/>	<hr/>

Tax-exempt shareholders received interest on shareholders' equity in full, not subject to withholding tax.

g) Payment of dividends and interest on shareholders' equity

On March 26, 2008, the Ordinary Shareholders' Meeting approved dividend distribution in the amount of R\$350,938 as defined in the allocation of net income for 2007 proposed by management. These dividends were credited to holders of common and preferred shares included in the Company's records by the end of March 26, 2008, and have been paid as of June 23, 2008.

On May 20, 2008, the Board of Directors approved the payment of interim dividends in the amount of R\$485,000 based on the financial statements for March 31, 2008, and interest on shareholders' equity for fiscal year 2008 in the amount of R\$200,000, or R\$ 170,000 net of withholding taxes, to holders of common and preferred shares included in the Company's records by the end of May 20, 2008. These dividends have been paid as of June 23, 2008.

On November 24, 2008, the Board of Directors approved the distribution of interim dividends in the amount of R\$1,090,000, based on retained earnings shown on the balance sheet as of September 30, 2008, to holders of common and preferred shares included in the Company's records by the end of November 24, 2008. These dividends have been paid as of December 10, 2008.

30. Income and social contribution taxes

The Company recognizes income tax and social contribution monthly on the accrual basis and pays the taxes on an estimated basis, in accordance with the trial balance for suspension or reduction. The taxes calculated on income until the month of the financial statements are recorded in liabilities or assets, as applicable.

Reconciliation of reported income tax expense and combined statutory tax rates

Reconciliation of the reported tax charges and the amounts calculated by applying 34% (income tax of 25% and social contribution tax of 9%) in 2008 and 2007 is shown in the table below:

	<u>Company</u>		<u>Consolidated</u>	
	<u>2008</u>	<u>2007</u>	<u>2008</u>	<u>2007</u>
Income before taxes	2,808,665	2,659,082	2,885,664	2,698,446
<u>Income tax and social contribution taxes</u>				
Income tax and Social contribution tax expense	(954,946)	(904,088)	(981,126)	(917,471)
Permanent differences				
Equity pick-up	(40,139)	1,235	2,809	(729)
Unclaimed interest on shareholders' equity	(8,919)	(31,310)	(8,919)	(31,310)
Reversal of subsidiaries' tax credits	-	-	(39,020)	-
Subsidiaries' temporary differences	-	-	(35,379)	-
Nondeductible expenses, gifts, incentives and dividends received	(24,578)	(35,171)	(43,961)	(59,397)
Other				
Incentives (cultural, food and transportation)	23,888	31,421	23,903	31,421
Total (income tax + social contribution tax)	(1,004,694)	(937,913)	(1,081,693)	(977,486)

The components of deferred income and social contribution tax assets and liabilities on temporary differences are shown in Notes 7 and 17 respectively.

Total current income and social contribution taxes consolidated payable at December 31, 2008 amounts to R\$1,071,609 (R\$924,196 as of December 31, 2007).

31. Transactions with related parties (Continued)

Other intercompany receivables in current and non-current assets comprise credits from Telefónica Internacional S.A., Telefônica Serviços Empresariais do Brasil Ltda., Telefônica Del Peru and other group companies, corresponding to services rendered, advisory fees, expenses with salaries and other expenses paid by the Company to be refunded by the related companies.

Trade accounts payable include services provided primarily by Atento Brasil S.A., Vivo S.A., TIWS Brasil, Terra Networks Brasil S.A., Telefônica Pesquisa e Desenvolvimento do Brasil Ltda., and for international long-distance services provided principally by Telefónica de España S.A. We also highlight the rendering of administrative services in the accounting, financial, human resources, property, logistics and IT areas payable to Telefônica Serviços Empresariais do Brasil Ltda.

Other intercompany payables in current and non-current liabilities are comprised mainly of management and technical services payable to Telefónica Internacional S.A., software development and maintenance services payable to Telefônica Pesquisa e Desenvolvimento do Brasil Ltda., and reimbursements payable to Telefônica Serviços Empresariais do Brasil Ltda.

Revenue from telecommunications services comprises mainly billings to Vivo S.A., Terra Networks Brasil S.A. and Atento Brasil S.A.

Other operating revenues are basically from network infrastructure leased to Vivo S.A. and Atento Brasil S.A.

Cost of services provided refers mainly to interconnection and traffic services (mobile terminal) expenses, provided by Vivo S.A. and subsidiaries, call center management services provided by Atento Brasil S.A.

Selling expenses refer mainly to marketing services by Atento Brasil S.A. and commissions paid to cellular telephone operators with Vivo S.A.

General and administrative expenses refer to administrative management services provided by Telefônica Serviços Empresariais do Brasil Ltda., and management and technical services payable to Telefónica Internacional S.A.

Management fees

Compensation paid by the Company to its Management and Statutory Officers was approximately R\$11,248 (R\$20,900 in 2007). Of this amount, R\$8,737 (R\$14,200 in 2007) refers to salaries and fringe benefits, and R\$2,511 (R\$6,700 in 2007) to bonuses.

32. Post-retirement benefit plans

Telesp individually sponsors a defined benefit retirement plan (PBS Telesp Plan), administered by Visão Prev, which covers approximately 0.54% of the Company's employees. In addition to the supplemental pension benefit, a multiemployer plan (PBS-A) and health care plan (PAMA) are provided to retired employees and their dependents (administered by Fundação Sistel), at shared costs. Contributions to the PBS Telesp Plan are determined based on actuarial valuations prepared by independent actuaries, in accordance with the rules in force in Brazil. The funding procedure is the capitalization method and the sponsor's contribution is 10.52% of payroll of employees covered by the plan, of which 9.02% is allocated to fund the PBS Telesp Plan and 1.5% to the PAMA Plan.

For other Telesp employees, there is an individual defined contribution plan - Visão Telesp Benefit Plan. The Visão Telesp Plan is funded by contributions made by the participants (employees) and by the sponsor which are credited to participants' individual accounts. Telesp is responsible for bearing all plans administrative and maintenance expenses, including participant's death and disability risks. The Company's contributions to the Visão Telesp Plan are equal to those of the employees, varying from 2% to 9% of the contribution salary, based on the percentage chosen by the participant.

Additionally, the Company supplements the retirement benefits of certain employees of the former CTB - Companhia Telefônica Brasileira.

During 2008, the Company made contributions to the PBS Telesp Plan in the amount of R\$28 (R\$47 in 2007) and to Plano Visão Telesp in the amount of R\$20,297 (R\$26,457 in 2007).

A. Telecom sponsors two private pension plans for defined contribution; namely, one similar to that of Telesp, denominated Visão Assist Benefits Plan, which is granted to approximately 30% of its employees and another, denominated Visão A. Telecom Benefits Plan, whose basic and additional contributions by sponsor correspond to 30% of basic and additional contribution by participants. The contributions of A. Telecom to these plans totaled R\$313 (R\$637 in 2007).

Telefonica Data S.A. individually sponsors a defined contribution plan similar to that of the Company, the Visão Telefônica Empresas Benefit Plan. Total contributions to this plan amounted to R\$646 (R\$881 in 2007).

32. Post-retirement benefit plans (Continued)

The actuarial valuation of the plans was made in December 2008 and 2007 based on the record of plan members as of August 2008 and 2007, respectively, and the financial information as of October 31, 2008 was updated to December 31, 2008 and August 2007, respectively, and the projected unit credit method was adopted. Actuarial gains or losses for each year were immediately recognized in each of the periods. The plans assets relate to October 31, 2008 and December, 31 2007. For multiemployer plans (PAMA and PSB-A), apportionment of the plan

assets was made based on the sponsoring entity's actuarial liabilities in relation to the plans' total actuarial liabilities.

Actuarial liabilities recorded by the Company as of December 31, 2008 and 2007 is as follows:

Plan	2008	2007

The Company and its subsidiaries made a valuation of their financial assets and liabilities in relation to market values based on available information and appropriate valuation methodologies. However the interpretation of market information as well as the selection of methodologies requires considerable judgment and reasonable estimates in order to produce adequate realizable values. As a result the estimates presented do not necessarily indicate the amounts which might be realized in the current market. The use of different market approaches and/or methodologies for the estimates may have a significant effect on the estimated realizable values.

Interests in other companies

The Company has direct and indirect interests in other companies resulting from the privatization process. These investments, measured at market value, consider the latest quotation available in December 2008 and 2007.

The table below shows the composition of investments in other companies at market value as of December 31, 2008 and 2007:

% Partic.	Consolidated	
	2008	2007 (*)

Portugal Telecom	1.21	210,431	248,299

34. Financial instruments (Continued)

Risk management policy

The Company is exposed to several market risks as a result of its commercial operations, debts obtained to finance its activities and debt-related financial instruments.

The principal market risk factors that affect the Company's business are detailed below:

a) Exchange rate risk

This risk arises from the possibility that the Company may incur losses due to exchange rate fluctuations which would increase the balances of loans financing and purchase commitments denominated in foreign currency and the related financial expenses. In order to minimize the risk of financial liabilities in foreign currency, the Company enters into hedge contracts (swaps) with financial institutions.

The Company's indebtedness and the result of loan financing and purchase commitment liabilities denominated in foreign currency are significantly affected by the foreign exchange rate risk. As of December 31 2008, 13.68%

(28.50% on December 31, 2007) of the debt was denominated in foreign currency (U.S. dollar and yen); the debt was covered by asset positions on currency hedge transactions (swaps for CDI).

b) Interest rate risk

This risk arises from the possibility that the Company may incur losses due to internal and external interest rate fluctuations affecting the Company's results (debentures and JBIC) and the short positions of derivatives at floating interest rates to cover the risks of foreign currency-denominated debts.

The debt to the BNDES is indexed to the TJLP (Long-Term Interest Rate determined on a quarterly basis by the National Monetary Council), which has been stable since July 2007 (6.25% per annum).

In order to minimize its exposure to the local variable interest rate (CDI), the Company invests its excess cash, amounting to R\$1,709,013 (R\$348,648 at December 31, 2007), substantially in short-term investments (Bank Deposit Certificates) based on the CDI rate variation. The book values of these instruments approximate market values, since they may be redeemed in the short term.

75

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

34. Financial instruments (Continued)

Risk management policy (Continued)

b) Interest rate risk (Continued)

As of December 31, 2008 the Company also contracted CDI + 0.35% of CDI percentage swap with identical flows of those of debentures (note 16).

c) Debt acceleration risk

As of December 31, 2008, the Company's loan and financing agreements contain restrictive clauses (covenants), typically applicable to such agreements, relating to cash generation, debt ratios and other restrictions. The Company has complied with these restrictive clauses in full, and such covenants do not restrict its ability to conduct its ordinary course of business.

d) Credit risk

This risk arises from the possibility that the Company may incur losses due to the difficulty in receiving amounts billed to its customers. The credit risk on accounts receivable is dispersed. The Company constantly monitors the level of accounts receivable and limits the risk of past-due accounts, interrupting access to telephone lines in case the customer does not pay the related bills in 30 days. Exceptions are made for telecommunication services that must be maintained for security or national defense reasons.

As of December 31, 2008, the Company's customer portfolio had no subscribers whose receivables were individually higher than 1% of the total accounts receivable from services.

The Company is also subject to credit risk related to temporary cash investments and receivables from swap transactions. The Company reduces this exposure by dispersing it among first line financial institutions.

76

(A free translation of the original report issued in Portuguese)

34. Financial instruments (Continued)

Derivatives

Risk management policy

All the Company's derivative instruments have the objective of providing hedge against the risk of variation in foreign exchange and external and internal interest rates arising from financial debts, according to the company's risk management policy. As such, any changes in risk factors generate an opposite effect on the hedged end. There are no derivative instruments for speculative purposes and liabilities in foreign exchange are hedged.

The Company has internal controls over its derivative instruments, which, according to management, are adequate to control the risks associated with each market strategy. The Company's results derived from its derivative financial instruments indicate that the risks have been adequately managed.

Fair value of derivative financial instruments

The discounted cash flow method was used to determine the market value of loans, financing, debentures and derivative instruments (currency and interest rate swap) considering expected settlement of liabilities or realization of assets at the market rates prevailing at balance sheet date.

Fair values are calculated by projecting future operating flows, using BM&F Bovespa curves, and discounting to present value through market DI rates for swaps, as informed by BM&F Bovespa.

The market values of currency coupon swaps vs. CDI were obtained through market currency rates in force at the balance sheet date and projected market rates were obtained from currency coupon curves. The coupon for positions indexed to foreign currencies was determined using the 360-calendar-day straight-line convention; the coupon for positions indexed to CDI was determined using the 252-workday exponential convention.

The consolidated derivative financial instruments shown below are registered with CETIP.

All of them are classified as swaps and do not require margin deposits.

34. Financial instruments (Continued)

The operations were entered into considering market rates indexed to the CDI (short position), from 100% to 105% of CDI, while the long position is based on the same rates applicable to obligations.

Edgar Filing: TELESP HOLDING CO - Form 6-K

a) Swaps of foreign currency x CDI (derivative fair value of the R\$511,059) □ swap operations with several maturities until 2014, with the objective of hedging foreign exchange and interest rate changes in loan operations in foreign currency with these characteristics (debt fair value of R\$ 511,050).

b) Swap CDI + 0.35% x CDI percentage swap (derivative fair value of R\$1,524,371) □ contracted swap operations maturing until 2010 with identical flow as that of debentures (Note 16), to cover the risk of fixed spread (0.35%) (fair value of debentures, excluding premium of R\$1,524,371).

The aging list of swap contracts as of December 31, 2008 is as follows:

Swap contracts	Maturity				Amount payable/ receivable 31/12/2008
	2009	2010	2011	2012 and on	
<u>Foreign Currency x CDI</u>	81,001	(5,636)	(5,052)	(11,230)	59,082
BANCO DO BRASIL	69,666	-	-	-	69,666

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

34. Financial instruments (Continued)

For the year ended December 31, 2008, derivative operations generated a net consolidated gain of R\$153,448 (Note 29). At December 31, 2008, 100.00% of the Company's foreign currency denominated debt was covered by asset positions on currency hedge transactions (swaps for CDI), which generated a net consolidated gain of R\$152,671. The Company also has operations involving swap \square CDI + spread vs. %CDI, in the principal amount of R\$1,500,000, to cover fixed debentures spread, which generated gains of R\$28. Swap operations \square CDI vs. pre, in the principal amount of R\$50,000, settled in 2008, generated a net consolidated gain of R\$749 during the year.

At December 31, 2008, the balance of R\$95,753 is recorded as assets and R\$37,348 as liabilities, recognizing the position of derivatives as of that date.

Gains and losses for the year ended December 31, 2008, grouped by contracts, were posted to profit and loss accounts (Note 29), as required by CVM Instruction No. 475/08.

Sensitivity analysis of the company's risk variables

CVM Instruction requires listed companies to disclose, in addition to the provisions of item 59 of CPC Technical Pronouncement No 14 - Financial Instruments: Recognition, Measurement and Disclosure, a table showing the sensitivity analysis of each type of market risk inherent in financial instruments considered relevant by management and to which the company is exposed at the closing date of each reporting period, including all operations involving derivative financial instruments.

In compliance with the foregoing, all the operations involving derivative financial instruments were evaluated considering a probable scenario and two scenarios that may adversely impact the Company.

Under the probable scenario, the projected realization of derivative financial instruments considered the future market curves (currency and interest) of BM&F Bovespa upon maturity of each operation. In this context, the probable scenario does not produce impacts on the fair value of financial instruments reported in the financial statements. The two unfavorable scenarios considered 25% and 50% decreases, respectively, for the risk variables upon maturity of the financial instruments.

80

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

34. Financial instruments (Continued)

Considering that the Company has derivative instruments only to cover its financial debt, the changes in scenarios offset by changes the related hedged items, thus indicating that the effects are practically null. For these operations, the Company reported the fair value of the hedged item (debt) and of the hedge derivative financial instrument on separate rows in the sensitivity analysis table in order to provide information on the Company's net exposure for each of the three mentioned scenarios, as shown below:

Sensitivity analysis \square Net exposure

Operation	Risk	Probable	25% Decrease	50% Decrease
------------------	-------------	-----------------	-------------------------	-------------------------

Hedge (long position)	Derivatives (risk of USD decrease)	35,434	45,773	56,826
USD-denominated debt	Debts (risk of USD increase)	(35,425)	(45,765)	(56,819)
	Net Exposure	9	8	7
Hedge (long position)	Derivatives (risk of JPY decrease)	390,826	489,295	588,078

CDI)				
	Net Exposure	(1,977,027)	(1,981,004)	(1,982,792)
Effect on changes in fair value		-	(3,977)	(5,767)

81

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Notes to the financial statements (Continued)

December 31, 2008 and 2007

(In thousands of reais)

(A free translation of the original report issued in Portuguese)

34. Financial instruments (Continued)

Assumptions for analysis of sensitivity

Risk variable	Scenario I	Scenario II	Scenario III
USD	2.337	2.921	3.506
JPY	0.0258	0.032	0.039
EUR	3.2524	4.066	4.879
CDI	13.62%	17.03%	20.43%

The net exposure in CDI shown in the sensitivity analysis does not reflect the Company's total exposure to the internal interest rate, considering that, as previously mentioned, the Company uses short-term investments based on the CDI rate variation as a partial "natural hedge" (R\$1,709,013 at December 31, 2008).

In order to derive the net exposure, all derivatives were considered at fair value, as well as their associated debts (hedged items).

While the fair values shown in the table above are based on the status of the portfolio as of December 31, 2008, they do not reflect an estimated realization in view of the market dynamics, always monitored by the Company. The use of different assumptions may significantly impact estimates.

35. Additional information

On October 27, 2008 was published in the São Paulo's Official Municipal Gazette, the decree nº 47,817 regulating the Law nº 14,023/05 which foresees obligation to bury all aerial cabling in the city of São Paulo, requiring public service concessionaries in the city to comply with the law. The Company is analyzing the effects of the referred regulation to study its impacts.

TELECOMUNICAÇÕES DE SÃO PAULO S.A. - TELESP

Management report
December 31, 2008 and 2007
(In thousands of reais)

Dear Shareholders,

Fulfilling legal and statutory requirements, Telecomunicações de São Paulo S.A. - Telesp's management submits hereby for your analysis the Management Report as well as the standalone and consolidated financial statements of the Company, with the corresponding reports of independent auditors and from the Supervisory Board, for the year ended December 31, 2008.

1. Board of directors' message

In 2008, the Company completed 10 years of large-scale operations in Brazil after its privatization. This period was marked by several achievements by the Company as well as its commitment to operations in Brazil. The Company has made significant investments for the expansion and modernization of networks, which aggregated R\$26 billion in the period.

Such investments led to the end of the waiting periods for the purchase of residential telephones lines. Due to significant growth, the Company managed to have approximately 12 million telephone lines in service at the end of 2008, thus doubling this number since beginning of its operation.

The number of public telephone lines in São Paulo state cities significantly increased from 180 thousand in 1998 to 250 thousand in 2008, corresponding to density of 6.2 public telephones ("orelhões") per group of one thousand

inhabitants. In the São Paulo state we have installed approximately 2.0 thousand telephones for users with hearing deficiency.

As a result of the efforts to offer telephone services to all inhabitants, the telephone density in the São Paulo state reached 28.7 wire telephone lines per 100 inhabitants in 2008.

As such, the Company was the first fixed-line telephone operator to meet Anatel's targets in 2001 in connection with offering telephone services to all inhabitants, as from which moment the Company has focused its operations on technological convergence, innovation and investments profitability.

The most important result from the investments that have been made was the economic and social impact arising from easy access to telephone services allowed by Company operations, which helped social inclusion of poor populations, allowing them to have access to telephone and Internet services, which are fundamental for personal and family development in the Information Technology era.

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Management report (Continued)

December 31, 2008 and 2007

(In thousands of reais)

1. Board of directors □ message (Continued)

Competitiveness, convergence and innovation are elements every time more present in the market, in view of this, the Company has been giving continuity to its expansion process through special and bold plans.

In this respect, the Company has made available Alternative Plans, such as the Economy Telephone Line, Control Telephone Line and the Minute Based Telephone Plans, which provided users with alternatives more suitable to their profiles in order to have access to fixed-line telephony.

Following the motto of always being ahead in the offer of innovative products and better meeting the community's telecommunication needs, the Company has endeavored since 2001 to expand the broadband and dialed Internet access services, with a network prepared to offer speed of 1Mbps to a significant percentage of customers. With this, the Company reached at the end of 2008, 2,555,376 Speedy service customers, up 23.6% as compared to prior year, thus consolidating the Company's qualification as provider of integrated telecommunication services.

In 2008, the Company increased Direct to Home TV (DHT) offer, through Telefônica Digital TV, and strengthened its strategic alliance with TVA. Such factors, together with the improvement in TV program grid contents, led to a consolidated pay TV offer which, in turn, led the Company to have a swift increase in the number of customers, reaching 472 thousand customers at the end of 2008, and thus becoming a key operator in the pay TV market.

In this manner, the Company presented innovative service offers, becoming a provider of Digital Household solutions. Among the services offered, we highlight the *Duos* and *Trios*, which are integrated packages of pay TV, broadband and local service products as well as high-speed fiber optic broadband services, which allow access to convergent personalized services, and the TecTotal, an equipment installation, maintenance and technical support service.

Fiber to the Home offer, pioneerily launched in 2008 by the Company, is made available in packages with speed of 8 and 30Mbps of broadband, pay TV, high quality voice services and local calls without limit, thus contributing to expand the Digital Household concept. The service was initially offered in the Jardins district in São Paulo, being currently offered in the districts of Vila Madalena, Pinheiros, Perdizes and in the City of Santos, Campinas, São Bernardo do Campo and São Caetano, to 370 thousand households in the state.

(In thousands of reais)

1. Board of directors □ message (Continued)

In the corporate segment, the Company provides workstation infrastructure solutions, offering packages to large companies; namely the *Posto de Trabalho Informáticos* solution, as well as to small and medium sized companies, involving telephone, data and network as well as equipment management services.

Digital services, encompassing intelligent facilities such as call identification, call waiting, call transfer, mailbox and three-party conference calls, among others, in 2008 have already reached 14 million installed digital services.

Such activities follow the Company's target of improving people's lives, facilitating business development and contributing to the progress of communities in which it operates, thus providing innovative services based on Information and Communication Technologies. The Company permanently seeks to be an innovative, competitive, open, committed and reliable company. In view of this, it destined R\$1.5 billion from its investments in 2008 to broadband and new services.

The investments made by the Company, its subsidiaries and affiliates for network modernization, expansion, quality improvement and maintenance aggregated R\$2,342.5 million in 2008, which evidences its long-term commitment and trust in Brazil's future.

The Company is also committed to adding value for shareholders. In 2008, dividends and interest on shareholders' equity were stated in the total amount of R\$4.71 per common share and R\$5.18 per preferred share, for this financial year. Such amounts reflect the Company's solid economic and financial situation.

In 2008, the Company destined to Federal, State and Municipal governments a total of R\$7.2 billion in taxes, charges and compulsory contributions. The amount of R\$137.5 million was destined to FUST and R\$70.6 million to FUNTTEL.

Company indebtedness may be considered low in relation to its size, corresponding to EBITDA margin of 0.57 for 2008. The Company's indebtedness is 13.68% in foreign currency, but 100% covered by foreign exchange hedge.

The Company directly employs 6 thousand people and more than 43 thousand indirectly.

Management report (Continued)

December 31, 2008 and 2007

(In thousands of reais)

1. Board of directors □ message (Continued)

Also aware of its social and environmental responsibility, and to coordinate the attempts of its companies in this respect, the Telefônica Group, to which the Company belongs, created Fundação Telefônica in March 1999. Among its several initiatives, we highlight the EducaRede program, which maintain, among other activities, an open and free of charge portal for public school students and teachers, the *Pró Menino* program, which protects Children and Youth Rights, especially child labor, and the volunteering program, which seeks to involve the Company's personnel in activities that favor NGOs working with poor communities.

Supplementing the information disclosed herein, we publish annually our Corporate Responsibility Report. That for 2008 will be available in the coming months in the Company's portal on Internet (www.telefonica.com.br). This

report, which describes in further details our management strategies related to corporate social responsibility, follows the strictest international standards for the preparation of sustainability reports.

2. Economic context

During the year of 2008 the international scenario was marked by an economic slowdown. The American economy, affected by the increase in default, mainly in the real estate market, presented decrease in its Gross Domestic Product (GDP) in the third 2008 quarter. This economic slowdown was also felt in other developed countries. Different economies in the Euro zone presented two consecutive falls in their GDPs, which confirms economic recession. The effect of this retraction on different economies was loss in dynamism of world GDP in 2008. According to International Monetary Fund (IMF) estimates, there was a decrease in world GDP growth from 5.0% in 2007 to 3.0% in 2008. Developed economies were particularly affected, thus presenting decrease in average growth rate from 2.6% to 1.5%, as per the same source.

The Brazilian economy was affected by the International economy Slowdown. The main effect was related to external sector. In 2008, the balance of current transactions of Brazil with the rest of the world presented significant changes. The evolution of Brazilian exports along the year reflected, among other factors, lower dynamism in international demand, which affects prices and quantities of exported goods. The balance of trade balance decreased to US\$24.7 billion, down US\$15.3 billion as compared to prior year. Due to such decrease, the balance of current transactions in 2008 was of - US\$28.3 billion as compared to +US\$1.5 in 2007.

84

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Management report (Continued)

December 31, 2008 and 2007

(In thousands of reais)

2. Economic context (Continued)

But the changes were not limited to the checking account. There were also changes in capital and financial accounts. Inflow of direct foreign investments (DFI) continued to be positively surprising, with record volume of US\$45.1 billion accumulated in the year. However, portfolio investments, with long-term bonus and variable income securities, due to higher aversion to risk in the international environment, presented outflows in the last four month period of 2008. In view of this, the balance of the capital and financial account decreased to US\$33.0 billion in 2008, from US\$89.0 billion in 2007. As a result of the combination of the evolution of balances of current transactions and of the capital and financial account, the balance of payments decreased to US\$2.9 billion in 2008, as compared to US\$87.5 billion in 2007.

This deterioration in the balance of payments affected the foreign exchange rate. The appreciation trend of the Brazilian real, since 2003, was interrupted in the last four month period of 2008. The exchange rate at the end of 2008, of R\$/US\$2.34 was higher than that for prior year of R\$/US\$1.77. This represents a devaluation of the Brazilian real of 32.2% .

Differently from prior years, Brazilian currency depreciation in 2008 did not generate higher public sector indebtedness. In 2008 the public debt decreased to 36.0% of GDP, the lowest level since 1998. Among other factors, this is due to the fact that in 2008, the level of international reserves accumulated by Brazil surpassed public sector indebtedness, thus swapping from international debtor to international creditor. This new situation facilitated promotion of sovereign debt securities to investment grade classification by 2 risk rating agencies, namely Standard & Poor's and Fitch Ratings, in April and May 2008, respectively.

On the other hand, devaluation of Brazilian currency had impacts on the evolution of consumer prices. The increase in consumer prices measured by IPCA reached 5.9%, which is still below the target cap pursued by the Central Bank of Brazil of 6.5%, but above its average target of 4.5% . The General Market Price Index (IGP-M) increased 9.8% in 2008, the highest rate since 2004. It is important to highlight however that price indexes for 2008 were particularly affected by the increase in international prices of several commodities, mainly in the first half of the year. Even with the decrease in such prices in the second half of 2008, the average price for this year was 18.6% above the average for 2007, according to the index calculated by the Commodities Research Bureau

(Reuters / Jefferies CRB Index).

85

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Management report (Continued)

December 31, 2008 and 2007

(In thousands of reais)

2. Economic context (Continued)

Considering that the actual inflation rate still exceeds the inflation target, the Central Bank of Brazil adopted monetary policy maintaining interest rates. The base Selic interest rate defined by the Central Bank of Brazil was maintained constant at 11.25% until mid 2008, lowest level ever practiced since the beginning of "Sistema de Metas" and increased to 13.75% until the end of 2008. Even with this increase, the actual interest rate estimated based on the base interest rate and inflation measured by IPCA, both accumulated in the year, reached 6.2% . This is the lowest real interest rate of this decade in this annual comparison.

The economic activity benefited from this decrease in nominal and actual interest rates. Credit grants also increased. Credit volume percentage in relation to GDP increased from 34.2% at the end of 2007 to 41.3% at the end of 2008. Also worthy of mention is the increase in consumers trust, with an effect on consumers' trust index estimated by Fecomércio, which presented the highest annual average in this decade (140.4 points). In view of this, retail sales volume, which has presented a rise trend since 2004, increased 9.8% until November 2008, as compared to the same 2007 period. In the work market, the average unemployment rate decreased to 7.9% in 2008, as compared to 9.3% in 2007. Wage costs, in turn, increased 7.3% in actual terms in this same comparison.

Together, these aspects upturned domestic demand. As a result, Brazil's GDP increased significantly, at the rate of 6.3% accumulated in the 12 months until the third quarter of 2008. Household consumption increased even more intensely, reaching 6.7% increase in the same comparison. The telecommunications sector benefitted from this economic growth scenario driven by domestic demand, since the increase in wage costs and credit resulted in increase in consumers' purchase power to acquire telecommunication services. According to the national data disclosed by the Brazilian Institute of Geography and Statistics - IBGE, the Information Services related sectors grew by 8.7% when comparing accumulated data for the 12 months through to the third quarter 2008 and the same 2007 period.

86

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Management report (Continued)

December 31, 2008 and 2007

(In thousands of reais)

3. Regulatory environment

The regulatory environment went through significant changes in 2008. In addition to the implementation of telephone number portability and replacement of telecommunication service universalization targets, the National Telecommunications Agency (Anatel) started a project to review the regulatory framework with publication of the General Plan for Updating Telecommunication Regulations (PGR) and the review of the General Concession Plan (PGO).

Telephone number portability

In September 2008, there was beginning of implementation of fixed-line and mobile telephone number portability, as determined by the General Telephone Number Portability Regulations, approved by Anatel Resolution No. 460.

With introduction of telephone number portability, clients may keep their telephone numbers when changing address or telephone operator, as long as remaining in the same area and modality (fixed or mobile).

In the Company's area of concession, telephone number portability was gradually implemented in 2008 in four numbering areas (National Codes - CN 12, 13, 14 and 17) corresponding to approximately 18% of the total from the terminals plant. This implementation will continue in 2009, to be concluded on March 2 in the São Paulo metropolitan region (CN 11).

Review of regulatory framework

The publication of the General Plan for Updating Telecommunication Regulations (PGR) by Anatel corresponds to the first stage of the review of the regulatory framework planned by Anatel for the next 10 years.

The PGR plan, approved by Resolution No. 516, proposes a schedule with 37 actions to update the sector's regulatory framework. The actions were divided into initiatives to allow implementation within short term (within up to two years), medium term (up to five years) and long term (up to ten years). The PGR plan may be periodically reviewed by Anatel though.

Short-term actions include updating of the General Concession Plan (PGO), which regulates local and long-distance national and international fixed-line telephone concessions. The new PGO plan was published on November 21, 2008, on the Federal Official Gazette, through a Presidential Decree.

87

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Management report (Continued)

December 31, 2008 and 2007

(In thousands of reais)

3. Regulatory environment (Continued)

Review of regulatory framework (Continued)

Among the main changes in the PGO plan we highlight the expansion in the possibility of operation of each Group, as STFC concessionaire, in up to two regions of the PGO plan. Before these changes, each Group could only operate in one region as concessionaire. In addition, the new PGO plan unified the three sectors in which the Company operates as concessionaire (sectors 31, 32 and 34).

Replacement of telecommunication service universalization targets

The decree that changed the General Universalization Targets Plan (PGMU), replaced concessionaires' obligation of installing Telecommunication Service Units (PSTs) by that of taking to the municipalities network infrastructure for broadband connection (*Backhaul*).

With this replacement, all Brazilian municipalities will have until 2010, network infrastructure, which will allow expanding broadband supply to users.

The basic assumption considered in the establishment of new universalization targets was the maintenance of financial balance with the replacement. As such, the costs incurred by concessionaires to implement the new target are equivalent, on financial terms, to the savings that concessionaires had with the installation of the PST units.

For the Company, this obligation corresponds to providing services to 257 municipalities, or equivalent to 3% of the population of its area of concession, considering that it already provides services to the other municipalities.

Under said decree, the network infrastructure shall be made available in 40% of the central areas of the municipalities not served until December 31, 2008; in 80% by December 31, 2009 and in 100% of municipalities by

2010.

Management report (Continued)

December 31, 2008 and 2007

(In thousands of reais)

4. Operating performance

4.1. Competitive environment

In prior years, there was in the Brazilian telecommunications market an increase in competition among companies operating with fixed-line, mobile telephone, pay TV, Internet and data services. This increase in competition resulted from a trend worldwide of offering more complete and integrated services by operators, with the objective of becoming the sole provider of telecommunication services to customers.

In 2008, there was consolidation of this trend in the sector with the increase in the offer of integrated packages, mainly the 3-play package of broadband and pay TV and the 2-play package of voice and mobile broadband services.

In addition, the sector was marked by two structural changes which affected the competitive scenario. The first was the creation of regulation that introduced telephone number portability, thus allowing increased flexibility to consumers. The result from this process for the Company, started in September 2008 and implemented in certain geographic regions, was a slight increase in fixed-lines churn, however without significant impact, mainly due to the still restricted portability coverage. The second was the change in the PGO plan, which allowed acquisition of a fixed-line telephone company by another.

In the voice market, the Company faced competition in all segments. Cable TV operators that already operated in the high and medium income segments, offering voice services integrated with pay TV and broadband services, expanded the offer of packages to the low income segment. This segment was also well explored through the offer of low-cost and/or prepaid telephone lines. Mobile telephone operators, however, had aggressive offer of minute-based telephone plans with competitive prices in relation to those of wire-line telephone.

In the broadband market, in addition to the offer of integrated voice, broadband and pay TV services by cable TV operators, there was the beginning of offer of mobile broadband services through 3G network and high speed fixed-line broadband, allowing download speed of up to 60Mbps.

In the corporate segment, the Company which already operated aggressively in the data market, intensified its operations, particularly in the segment of Small and Medium Companies, expanding offer of voice and broadband packages, initially destined to the residential market and small companies.

Management report (Continued)

December 31, 2008 and 2007

(In thousands of reais)

4. Operating performance (Continued)

4.2 Commercial strategy

This year, the Company noted a slight decrease in its fixed-line terminals plant, in part due to the increase in competition. In order to maintain fixed-line telephone services attractive, the Company made customized offers to different customer segments. For the low income segment, in particular, it offered low-cost prepaid lines, which avoided in part the migration of customers to mobile services and other fixed-line competitors.

The defense by the Company of voice traffic value has been successful through mass offer of minute-based packages, including integrated Speedy and pay TV offers. The inclusion of offer of voice flat fee, which allows unlimited use of local calls in the Telefônica *Duos* and *Trios* packages, resulted in a more aggressive package value proposal.

Further to traditional telephony, the Company continues focusing on expansion of its operations in other markets, especially those with higher growth potential, such as broadband, pay TV, information technology and service segments.

In terms of broadband, Speedy continues being absolute leader, with more than 2.5 million customers, despite the increase in competition in the last period. In addition to the strengthening in value proposal of voice, broadband and pay TV packages, mentioned heretofore, several other actions were carried out during the year in order to maintain such leading position.

A highlight is the commercial launching of high speed broadband. The Company pioneered in offering speeds of up to 30Mbps and differentiated services to high income customers. The Company has also made investments in its network to allow offer of 2Mbps speed to most of its customers.

In 2008, the Company has made significant developments in the pay TV market. This year, the Company consolidated its strategic alliance with TVA started in 2007, expanding and strengthening its commercial offers. In addition, in the DTH Telefônica Digital TV product, the Company improved its value proposal through a more complete program grid, thus reaching more than 470 thousand customers.

Management report (Continued)

December 31, 2008 and 2007

(In thousands of reais)

4. Operating performance (Continued)

4.2 Commercial strategy (Continued)

In relation to service offer, the Company offers TecTotal, it is an installation, maintenance and technical support service for equipment sold in joint initiatives with retail chains. TecTotal strengthened the Company's position as service provider to households through its wholly-owned subsidiary A. Telecom S.A., expanding its operations in the value chain and improving its relationship with customers.

Another important effect was the Company's consolidation as workstation infrastructure provider, offering customized Information Technology structure solutions for customers, against monthly installments paid by users. The Company offers the *Posto de Trabalho* solution to large companies and the *Posto Informático* solution to small and medium companies, in voice, data, Internet access, network and equipment management packages.

There has been intense competition in the corporate segment, with the consolidation of companies in the data market. The Company operates in this segment as provider of complete telecommunication solutions (data, fixed-line and Internet), in order to strengthen its position and increase satisfaction of these demanding customers, offering services every time more integrated to fulfill their needs.

The Company has made important changes in relation to relationship with its customers.

Firstly, the conventional sales and customer service channels were restructured. A highlight was the change in the Company's stores concept, aiming at improving customer services at sale points, allowing not only rendering and acquisition of usual services, but also to try out products and services offered in an agreeable environment, focusing on innovation, modernity, transparency and accessibility. The first stores adapted to the new concept were those in São José do Rio Preto and Praia Grande.

The improvement in quality of services offered was one of the Company's strategic cornerstones in 2008. Several structural changes were performed in call-centers and internal processes with the objective of making customers realize the differentiated quality in all relationships with the Company and thus choose it as their telecommunication services provider.

December 31, 2008 and 2007

(In thousands of reais)

4. Operating performance (Continued)

4.4 Prospects

In 2009, the telecommunications industry will face the challenge of international economic slowdown. We believe that the effects on the sector will be gradual and less intense than on other sectors, which are more dependent on international trade with countries or regions more intensely affected by the crisis, such as the United States and the Euro zone. However, slowdown in the domestic market is expected to be less intense, but with a certain impact on our sector. Additionally, the Company may suffer adverse pressure on expenses with imported equipment owing to the exchange rate.

Competition will continue high in 2009, mainly due to telephone number portability, which will be in force in all the national territory as from the end of the first quarter, as well as the consolidation in the sector. Competitors have continuously improved their products portfolio with differentiated offers, such as high speed broadband. In addition, mobile telephone operators represent an increasing threat, looking for alternative revenue sources both from fixed voice and mobile broadband services.

Considering competition and the economic scenario, the strategy chosen by the Company was to accelerate proactive initiatives in order to lead in market growth, improving its experience with customers and focusing on expanding leadership in broadband services, with convergent proposals.

The improvement of experience with customers will be supported by improvement in quality for all segments and improvement in the service culture. For this, priority actions with high impact before customers were defined; to wit, decrease in operating failures, better management of relationship with outsourced companies, call-center reorganization in order to better serve customers and customization of processes and sale channels.

Broadband services will be focused on more segmented offers integrated with other products. A highlight is the proposal of fiber optic products, including a competitive high speed portfolio, new value-added services, such as Wi-Fi modem and support, installation and configuration services (TecTotal), flat fee voice packages and IPTV.

93

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Management report (Continued)

December 31, 2008 and 2007

(In thousands of reais)

4. Operating performance (Continued)

4.4 Prospects (Continued)

The Company also bets on convergent offers, based on a complete portfolio of products and services and the Digital Household/Office concept. This strategy is aligned with the trends in more mature markets in which there is higher integration between fixed voice operations, broadband and pay TV. Through Telefônica Digital TV (satellite TV) and IPTV (fiber optic TV network), with launching forecast for the beginning of 2009, the Company seeks to have a competitive position in relation to such trends.

The convergent offer proposals consider diversification and mass offer of integrated packages (*Duos and Trios*), focus on content (launching of high-definition interactive TV, customized content and video on demand), development of devices for control and connection of Digital Household/Office applications and new customer support services, such as Dr. Speedy, IT technical support, with telephone customer services, remote access and technical visits.

5. Financial performance

5.1 Gross and Net Operating Revenue

In 2008, the Company posted consolidated gross revenue of R\$23,020.8 million, up 8.7% in relation to the same 2007 period. Total net operating revenue totaled R\$15,979.0 million (R\$14,727.6 million in 2007). This performance was due to the increase in revenue from pay TV, Speedy, national long distance, inter-network, *Posto Informático* services, in addition to the tariff increase occurred in July 2008.

5.2 Operating profit before net financial expenses

Operating profit before consolidated net financial expenses was up 2.26%, from R\$3,647.4 million in 2007 to R\$3,729.6 million in 2008. This increase is due to increase in revenue from pay TV and Speedy services, as well as the decrease in personnel expenses and allowance for doubtful accounts. However, there was an increase in expenses with outsourced and interconnection services as well as materials.

94

(In thousands of reais)

5. Financial performance (Continued)**5.3 EBITDA**

Consolidated EBITDA (earnings before net financial expenses, excluding depreciation and amortization charges) reached R\$6,555.7 million, up 4.64% as compared to 2007. EBITDA margin in 2008, in turn, was of 41.0%, thus reflecting the success of the gradual change in Telesp's revenue mix, without significantly affecting the margin. As compared to 2007, the Ebitda margin decreased 1.5 p.p., mainly due to the increase in expenses with outsourced and interconnection services, equipment rent and materials. In addition, there was decrease in other operating revenues as compared to 2007, due to the decrease in recovered expenses and in the reversal of provisions, mainly in connection with tax and civil proceedings. However, we had in the same year, increase in expenses with provisions mainly relating to regulatory and civil proceedings. In 2008, there was a decrease in personnel expenses due to the Organizational Restructuring Program implemented in 2007. Another important event in 2008, was the review of the commercial policy, which focused on improving profile of the customers base and on decreasing future fraud and default levels. As such, the Company is getting ready for increasing its offer of innovative products to better meet customers' needs.

Derivative operations (Note 34)	58.4	(357.2)
Net indebtedness	(3,677.7)	(3,666.4)

At 2008 end, the Company's debt amounted to R\$3,736.1 million (R\$3,309.2 million in 2007) or 37.2% of shareholders' equity (33.4% in 2007). The funds raised from the National Bank for Economic and Social Development are 13.68% denominated in foreign currency and 45.74% in domestic currency.

In the 2007 to 2008 comparison, financial result, excluding interest on shareholders' equity, improved by 25.8% or R\$79.0 million, driven by lower net indebtedness and origination costs.

The Company has permanently endeavored to take applicable measures, due to the current market scenario, in order to hedge its debts against adventitious effects from exchange devaluation.

5.5 Net income

Net income was up 2.41%, from R\$2,363.0 million in 2007 to R\$2,420.0 million in 2008. Net margin was of 15.1% .

5.6 Investments

The Company invested in 2008, R\$2,342.5 million in the program for expansion and modernization of telecommunication services, including investments related to expansion of broadband plant and the provision of new value-added services.

In the year, the Company's investment program sought to reach the highest quality and availability to customer standards, keeping the focus on corporate profitability and competitiveness growth. In order to meet the demand from increasingly demanding customers, new products and services were launched, mainly to meet the Internet business, as regards consolidation of Group leadership in the broadband market, whose plant in service grew 23.6% in the year. Also worthy of mention is that the investments made in key network points led to significant decrease in defects and in maintenance costs, together with the investments in customer service systems, business infrastructure, billing and collection.

The Company is thus getting ready for operating in a highly competitive market, through the supply of products with continuously increased value to customers, within feasible limits in relation to capital invested and the regulatory framework.

We set out below the amount of consolidated investments at December 31, 2008:

	R\$ Million	%

6.2 Corporate reorganization

Pursuant to the press release published on October 21, 2008, the Company's Board of Directors approved the proposed corporate reorganization involving Telefônica Data do Brasil Participações Ltda. (DABR) and Telefônica Televisão Participações S.A. (TTP), wholly-owned subsidiary of the Company, which had interest in capital of Telefônica Sistema de Televisão S.A, A.Telecom S.A. and Telefônica Data S.A.

The operation included the following steps:

a) DABR was merged into Telesp, and as a result, the company and its shares ceased to exist. Telesp shares then owned by DABR and were directly assigned to controlling shareholder SP Telecomunicações Participações Ltda.. Telesp received net assets of DABR, thus resulting in capital increase of R\$281 thousand, without issue of new shares, thus resulting in gain from shares appreciation to all shareholders. DABR net assets comprised goodwill on shares received from Telesp, in the amount of R\$185 million, whose economic base is future profitability. Taking into consideration the provisions of Law No. 9532/1997, goodwill amortization will generate tax benefit for Telesp

of R\$63 million, to be capitalized in favor of the controlling shareholder, in accordance with the provisions of CVM Ruling No. 319/1999, upon realization thereof. The remaining shareholders are assured of right of first refusal in the subscription of the referred to capital increases.

Management report (Continued)

December 31, 2008 and 2007

(In thousands of reais)

6. Shareholding structure (Continued)

6.2 Corporate reorganization (Continued)

b) TTP was merged into Telesp, and as a result, the company and its shares ceased to exist. The Company's investments in TTP were replaced by receipt of net assets, without capital increase or issue of new shares. Goodwill of R\$848 million, arising from the acquisition of this company in 2007, based on expected future profitability, will result in tax benefit for Telesp of R\$288 million, taking into consideration relevant legislation in force.

The process was concluded on November 11, 2008, after being approved by the Extraordinary Shareholders' Meeting. The process did not change the shareholding structure of the controlling Group.

Company management considers that this corporate reorganization meets Telesp's and its shareholders' interests and also allows improvement of synergies, rationalization of corporate management risks, simplification of administrative and shareholding structure, thus reducing costs and also generates tax benefits of R\$351 million, reinforcing cash flow for the Company and, consequently, for its shareholders.

9. Corporate governance

In order to promote good corporate governance, improve quality of information disclosures and reduce investor doubts, the Company has introduced internal rules and policies in order to adopt clear and objective practices. The Company believes that these measures benefitted shareholders, current and future investors as well as the market in general. Among the measures that the Company has implemented, we highlight:

a. Creation and implementation of internal policies:

- Policy on disclosure of significant information and facts in accordance with CVM Ruling No. 358;
- Rule on recording, communication and control of financial and accounting information;
- Rule on prior approval of services to be rendered by the independent auditors;
- Internal code of conduct in relation to securities market related matters;
- Finance Code of Conduct (Code of Ethics);
- Employees' Conduct Code (Conduct Principles); and
- Guidelines on communication of information to market.

b. Creation of Board of Directors committees:

- Service and Customer Service Quality Committee;
- Audit and Control Committee; and
- Nomination, Remuneration and Corporate Governance Committee.

c. Disclosure of an annual Corporate Governance Report, containing information related to the main corporate governance practices adopted by the Company, as well as its shareholding structure, its characteristics, composition and prerogatives of management bodies, duties and responsibilities of officers.

d. Establishment by the Audit and Control Committee of procedures to receive and handle denunciations related to accounting and audit matters (Denunciation Chanel); and

103

(In thousands of reais)

9. Corporate governance (Continued)

e. The overall annual remuneration of officers is approved by shareholders in the general meeting, as provided for by Brazilian corporation law. The definition of the individual compensation of management members is the prerogative of the Board of Directors through its Nomination, Remuneration and Corporate Governance Committee.

The Company's internal rules related to conduct to be followed in order to avoid practices not abiding by good corporate governance as well as conflicts of interests are defined in internal regulations, especially its Internal Code of Conduct on Securities Market related Matters. The Executive Board, Board of Directors members and any other employee with access to confidential information are subject to the restrictions imposed by such regulations. These internal regulations define negotiation blackout periods and establish rules to avoid and/or handle conflicts of interests.

9.1 Investor relations

In order to attain fair appreciation of its shares, the Company adopts practices aiming at clarifying its policies to shareholders, investors and analysts.

The Company maintains an Internet page for shareholders and investors, in Portuguese and English (www.telefonica.com.br/investidores/), in order to provide significant information requested by shareholders, investor and analysts, as well as the RI team, in order to dispel doubts by telephone or through individual meetings, as applicable. The Company also files all communications, significant information and financial statements with the regulatory bodies, to wit Brazilian Securities and Exchange Commission - CVM and the Security Exchange Commission - SEC in the USA.

9.2 Board of directors

The Company's Board of Directors is composed of at least 5 (five) and a maximum of 17 (seventeen) members, with term of office of three years, being reelection thereof allowed. The Board of Directors is only composed of shareholders, one of them being elected by holders of preferred shares, in a separate voting, and the remaining ones are elected by holders of common shares.

104

TELECOMUNICAÇÕES DE SÃO PAULO S.A. - TELESP

Management report (Continued)

December 31, 2008 and 2007

(In thousands of reais)

9. Corporate governance (Continued)

9.2 Board of directors (Continued)

Board of Directors' meetings are held every quarter, and extraordinarily, whenever necessary, when convened by its chairman. Board of Directors resolutions are on a majority voting basis, when the majority of its members are present, the chairman being entitled to an ordinary vote as well as the casting vote in case of voting ties. The chairman has also the prerogative of representing the Board of Directors in convening the General Shareholders' Meeting; chairing the General Meeting, selecting the secretary among those present; convening and chairing the Board meetings; using the casting vote attributed to him by the Company's Charter, in case of tie in Board of Directors resolutions and authorizing acts, in case of urgency, "ad referendum" of the Board of Directors.

9.3 Company executive board

The Executive Board is the body representing the Company as claimant or defendant, being responsible for carrying out all necessary and proper corporate business management acts. Executive Board members are elected by the Board of Directors for a maximum term of office of 3 years, being reelection allowed.

Under the Company's charter, the Executive Board shall be composed of at least 3 (three) and a maximum of 15 (fifteen) members, whether shareholders or not, resident in Brazil, who shall be elected by the Board of Directors. The Executive Board is currently composed of 04 (four) members, elected for the following positions: Chairman, General Fixed Line Director, Finance and Investor Relations Director and General Secretary.

9.4 Finance code of conduct (Code of Ethics)

On April 18, 2005, the Board of Directors approved a code of ethics regulating conduct by those in trustful finance positions of the Company and its subsidiaries, in relation to registration and control of financial and accounting information as well as access to privileged and confidential information.

9. Corporate governance (Continued)

9.5 Employees' Conduct Code (Conduct Principles)

The Telefônica Group approved in December 2006 its new code of ethics, valid for all of its operations around the world. The document includes general principles in connection with honesty and trust, respect to law, integrity and respect to human rights and further includes specific principles in order to ensure trust from the strategic public.

This document was approved by the Company's Board of Directors in April 2007 also the Company has implemented a series of initiatives to ensure that all employees are aware of these principles and apply them in their day-to-day duties. In this respect, an on-line course was developed to be taught to all employees. In 2008, 3,296 employees took this course.

9.6 Supervisory board

The Company maintains a permanent Supervisory Board. Supervisory Board members are elected by the General Shareholders' Meeting for a term of office of 1 year, being reelection allowed. Abiding by corporation law, preferred shares are voting shares to elect one effective and one alternate Supervisory Board member in separate voting, not considering preferred shares of the controlling shareholder.

Under a legal provision, Supervisory Board members remuneration, together with refund of travel and lodging expenses necessary for carrying out their duties, shall be established by the General Shareholders' Meeting electing them and may not be lower, for each member in office, than 10% (ten percent) the average amount attributed to each Board of Directors member, not inclusive of benefits of any nature, entertainment allowance and profit sharing.

The Company's Supervisory Board is currently composed of 3 effective members and 3 alternate ones.

9.7 Audit and control committee

The Audit and Control Committee was created in December 2002, as an ancillary body linked to the Board of Directors, having own regulations approved by that body.

(In thousands of reais)

9. Corporate governance (Continued)

9.7 Audit and control committee (Continued)

Its members are selected from time to time among Board members not belonging to the Company's Executive Board; having term of office coinciding with that of Board of Directors members.

Without prejudice of any other function attributed to the Board of Directors, the Audit and Control Committee is responsible for informing and/or submitting recommendations to the Board, in relation to the following matters:

- Appointment of the independent auditors, establishing the conditions to engage them, the scope of their services and, if the case, revocation or extension of the contract;
- Analysis of Company accounts, ensuring compliance with legal requirements and proper application of generally accepted accounting principles;
- Results from each internal and independent audit, as well as Management measures in relation to audit recommendations;
- Adequacy and integrity of internal control systems;
- Compliance with independent audit contract, so that the opinion on annual accounts and the main contents of the report of independent auditors be clearly and accurately written; and
- Receipt from the internal auditors of information about prevailing significant control deficiencies and financial conditions.

9.8 Independent auditors

Abiding by CVM Ruling No. 381, dated January 14, 2003 and Circular Letter CVM/SNC/SEP No. 01/2007, dated February 14, 2007, the Company and its subsidiaries inform that the Company's policy towards its independent auditors in relation to rendering of services not related to external auditors is based on the auditor's independence principles. These principles prescribe that auditors shall not audit their own work, shall not carry out Company management duties, shall not render legal services to client or any other services considered prohibited by rules in force, as such maintaining independence of work carried out by audit service providers.

In 2008, we did not hire services other than independent audit from our independent auditor, Ernst & Young Auditores Independentes SS.

10. Human Resources

Acknowledging the importance of its employees to face its main strategic and operating challenges, the Company has intensified its employee development and training program. The Company has the objective of being the best IT and Telecom company where to work and believes that employees are key to its success. For this, it established with its professionals commitments based on the following five elements:

- Communication: The Company is committed to providing direct and actual information to all employees;
- Development: all job openings are disclosed internally and only offered in the market after resorting to all possibilities of filling them internally;
- Remuneration: the remuneration system is transparent and meritocratic;
- Acknowledgment: the Company promotes achievements and performance of its professionals;
- Leadership: the Company invests in the development of leaders, forming executives who are closer to their teams and who pursue challenging targets.

With the application of these commitments, employees' satisfaction reached 74% at the end of 2008.

10.1 Interaction

Employees receive daily by email the "Bom Dia, Telefônica!" newsletter, with the main news about the Company, with articles on significant matters.

The news published in the "Bom Dia, Telefônica!" newsletter is filed on a hot site containing the contents published, pictures, videos and links to other hot sites of interest to employees.

Further to this newsletter, the Company has an electronic communication to executives, namely the "Executivo em Dia", as well as the "Televip", a monthly printed publication sent to employees' homes.

In the second 2007 half, the Company started the Talk to President program, in which groups of 15 employees have the opportunity of having breakfast with the Company's president to discuss the new Company challenges. In 2008, 250 employees participated in the 16 such events that were carried out.

10. Corporate governance (Continued)

10.1 Interaction (Continued)

Since 2006, the Company has promoted the +Telefônica program, in which employees may participate in Company management activities, through implementation of projects influencing the Company's financial result. In 2008, 75 projects were awarded prizes, thus generating results aggregating R\$335 million, between revenue increase and reduction of expenses. At year end a new program edition was launched, this time with the objective of promoting implementation of initiatives focusing on improving customer satisfaction.

10.2 Remuneration

The Company adopts salary structure and remuneration policies compatible with market best practices, with the objective of attracting and retaining talents in a very competitive segment and acknowledging individual performance of professionals, based on targets and results attained. The Total Remuneration concept has the objective of paying nominal salary equivalent to the average salary paid in the market by companies adopting aggressive remuneration policies. The variable remuneration programs and a vast list of benefits complete the total remuneration package with which the Company acknowledges employees' performance and motivates them for new challenges.

- In 2008, more than 1,058 Company employees were promoted;
- 420 employees were included in the Salary Review process with average salary raise of 7%; and
- There was 11% voluntary salary raise (based on merit and performance) to more than 862 employees.

10.3 Development programs

Strongly investing in employee qualification and development programs, the Company obtained the following results in 2008:

- 65 professionals attending sponsored MBA courses;
- Participation of 11,997 professionals in 115,939 in-class training hours;
- Participation of more than 1,777 professionals in e-learning programs, totaling 7,264 training hours; and
- Investments of R\$8.3 million in employee development and qualification.

10.4 Benefits

In 2008, the Company invested R\$56.7 million in employee benefits.

- R\$27.2 million in PLAMTEL, one of the best health care plans in the market. PLAMTEL offers not only health care provided for by legislation as well as other specialized health-related services;
- R\$31.6 million in meal and food benefits;
- Private pension plan to its employees, in which the Company's contribution match equals that of employees.
- Trio □ Employees promotion, integrated Telefônica products with special discount to employees, Telephone + Broadband Speedy + Digital TV;
- Life insurance to employees of R\$1.8 million;
- R\$1.4 million invested in child care allowance, in which 564 employees, among fathers and mothers, are currently benefitted;
- R\$1.4 million in transportation voucher investments;
- Covenants with entities linked to the telecommunications segment and the Company, such as the Charitable Association for Telecommunication Employees (ABET), Credit Cooperative of Telefônica Group Employees (Coopertel) and Telesp Club.

11. Social responsibility

The Telefônica Group believes that corporate social responsibility is a manner of managing its business, taking into consideration the public with which it interrelates. The Group believes that it will be able of ensuring its sustainability by generating positive impact from its activity, in terms of economic, technological and social development and conquering trust from its stakeholders. For the Telefônica Group, attaining economic and financial objectives and results is as important as the manner in which these are attained.

Corporate responsibility management takes into consideration the following:

- Approach focused on the public;
- Business commitment: the main Company responsibility is to "do well what has to be done", i.e. carry out its business activity as well as possible;
- Responsibility for sustainable development: it is not only to contribute funds to social activities, but also with something else in optimizing the manner in which the operations are carried out, seeking lasting relationships with stakeholders.

Among the corporate social responsibility projects carried out by the Company in 2008, we highlight the following:

- Interactive Generations: the program has the objective of promoting responsible use of Information and Communication Technologies by children and adolescents. For this, it has initiatives related to safety, awareness, education as well as commercial actions. The first of these was the performance of a survey, coordinated by the Navarra University, with public and private schools in the São Paulo state in order to allow children and adolescents to understand these technologies and make parents and teachers aware of

the need of putting all of this into practice. At the end of the survey, the results from the schools participating in all Latin America were consolidated in a single document, to be published in Brazil in the first 2009 half.

- **Responsible Purchases:** project applied to Telefônica Group operations all over the world, with the development of initiatives aiming at progressively implementing corporate responsibility practices in the value chain. In 2008, a process considering social and environmental criteria for evaluation of suppliers that, in a preliminary evaluation, were considered to involve higher risk. The basic requirements considered by Telefônica Group are not to allow minors or forced work, not to accept risky work conditions, not to allow sub-human labor conditions and require compliance with environmental legislation.

(In thousands of reais)

11. Social responsibility (Continued)

Besides using responsible initiatives in its day-to-day activities, the Telefônica Group also invests in projects to promote social development and sponsors cultural initiatives with the objective of allowing access to all to artistic activities.

11.1 Social investment

Created with the objective of coordinating Telefônica Group's social investments, Fundação Telefônica (www.fundacaotelefonica.org.br) embraced the mission of contributing to the future development of the regions in which Telefônica Group operates. It was created in March 1999 in Brazil and has sought ever since to promote social development through education, preferably through the application of telecommunication and information technologies as well as defense of rights of children and adolescents.

Fundação Telefônica works in the following four fronts:

a. Pró-Menino Program

This program involves initiatives in the following four lines, linked to social development as well as protection of rights of children and adolescents:

i. **Combat against minors' work:** the objective is to contribute to the eradication of minors' work, assuring children's full education rights. The program involves investments from Telefônica Group in 13 Latin America countries for more than 50 thousand children in the region. In Brazil, the Fundação Telefônica has supported, since 2007, projects against urban minors' work. Currently it sponsors 38 projects, which directly benefit approximately 8,800 children and adolescents.

ii. **Infringing Youngsters:** the objective is to improve quality of the services to help infringing youngsters, following social and educational rules.

Through the Municipal Councils for the Rights of Children and Adolescents, Fundação Telefônica has already technically and financially contributed to projects in 28 Brazilian cities. More than 4,400 adolescents and their families were benefited by this initiative.

(In thousands of reais)

11. Social responsibility (Continued)

11.1 Social investment (Continued)

iii. Network helping children and adolescents: it funds projects for the implementation of social and electronic information networks among Municipal Councils for the Rights of Children and Adolescents and the entities for the assistance of this public in the municipalities. Funding is through the Municipal Funds for the Rights of Children and Adolescents.

In November 2008, Fundação Telefônica launched the *Redeca* system, an information system that allows integration of information on the assistance to children in the same municipality. The tool was developed in tandem with the Foundation and other São Paulo state municipalities and is made available, free of charge, in all the Brazilian territory. The Foundation currently supports five projects in the São Paulo state, in the cities of Araçatuba, Bebedouro, Diadema, São Carlos and Várzea Paulista. Historically, Fundação Telefônica has already supported 17 cities in the construction of these networks.

iv. Pró-Menino Portal (www.promenino.org.br): created in November 2003, this portal is an important information channel for professionals working with protection of rights of children and adolescents, including the public composing the school community. Its objective is that of empowering professionals of the area, following the directives from the Statute of Children and Adolescents (ECA). The portal carries out the annual competition denominated *Concurso Causos do ECA*, together with the Children's Rights News Agency (ANDI) and EducaRede. This initiative aims at disseminating and granting awards to true histories showing that ECA is a life transformation tool. In the fourth such competition carried out in 2008, there were 952 participants, up 43% in relation to prior year.

b. EducaRede Program

With the objective of improving public education quality, through digital inclusion, this Program has as main tool an open and free of charge portal (www.educarede.org.br), mainly created to elementary and secondary school students and teachers. Developed by Fundação Telefônica, together with the Center of Studies and Surveys on Education, Culture and Communitarian Actions (CENPEC), Carlos Alberto Vanzolini Foundation and Terra portal, the EducaRede program is a tool supplementing classes, which allows use of new technologies in the pedagogical process.

b. EducaRede Program (Continued)

Launched in March 2002, the EducaRede portal is among the most consolidated national educational portals. It has 1.1 million page visits on average. Out of total users, 80% are from public schools. The portal has interactive and direct participation environments, which provide support to teachers. Fundação Telefônica has already invested more than R\$11 million in the EducaRede program.

c. Forum

Activities aiming at generating knowledge and ideas related to key matters for the Company, such as the Information Society matter and the impact from Information and Communication Technologies. In Brazil, one of the initiatives developed is the Telephone Memory Center, with the objective of preserving telecommunications history and making it available to the population. Part of the educational activities carried out are described on the site www.museudotelefone.org.br

d. Telefônica Volunteers Program

This program is coordinated by Fundação Telefônica and the Human Resources and Communication areas of the Company and was developed to support volunteer employees or those wishing to participate in actions of this nature. The initiative started in 2005, as a pilot project and in 2006 it was extended to all Group companies (Telesp, Terra, TGestiona and A. Telecom). The program involves initiatives in the following five lines:

i. Child Incentive Campaign: Campaign to promote monetary donations by employees to the Municipal Funds for the Rights of Children and Adolescents, with possibility of deduction in the Income Tax Return (donations by individuals may offset up to 6% of tax due). The funds collected are distributed to organizations accredited with Municipal Councils. In 2008, R\$70,000 were collected.

(In thousands of reais)

11. Social responsibility (Continued)

11.1 Social investment (Continued)

d. Telefônica Volunteers Program (Continued)

ii. Campaigns: Donation of coats, toys and blood, among others. These campaigns take place at certain times of the year and may also take place in certain emergencies, alike that to help flood victims in Santa Catarina, with monetary donations by Telefônica employees.

iii. Information Workshops: Workshops that address matters such as Corporate Social Responsibility, Third Sector and Volunteerism. The proposal is to provide information on practical and conceptual matters to promote employees' volunteer initiatives, whether within the Company or not.

iv. Projects Competition: Support to proposals for institutional strengthening of organizations in which Group volunteers already work. Employees participate in an internal process in order to submit their proposals. The selected ones receive financial support for implementation purposes.

v. Volunteers Day: On October 3, 2008, more than 1,500 employees from the Telefônica Group participated in the Telefônica's Volunteers Day celebration held in São Paulo, Campinas, Ribeirão Preto, Rio de Janeiro and Porto Alegre. The event was held in Brazil for the first time in 2006, and was then held in 2007 in Spain and other 12 Latin American countries in which Telefônica Group operates. Volunteers donating a day's work go to the selected institutions and carry out activities, such as refurbishment, construction, recreational, gardening and landscaping activities, as well as book and toy libraries structuring.

In São Paulo the benefitted organization in 2008 was the Tabor Community Educational Center, in São Mateus district, in the East zone of the city. The entity assists 1,000 children and adolescents living in the region and offers supplementary educational activities.

11. Social responsibility (Continued)**11.2 Sponsorships**

Through its sponsorships, the Telefônica Group mainly seeks to allow access to all the population to cultural activities as well as promote social use of Information and Communication technologies (TIC). In 2008, the main such initiatives were:

a. Campus Party Brazil

Carried out in Spain since 1997, the major Internet event in the world took place for the first time outside Europe, in São Paulo, in the period from February 11 to 17, 2008. In the seven days of the event, the Campus Party Brazil received more than 90 thousand visitors. In addition, 3,000 participants camped in the area and shared experiences related to the digital world. One of the major attractions in the event was the innovative broadband Internet access speed provided by the Company of 5,5 Gb. The success of the first Brazilian event made the Company sponsor the event again in the period from January 19 to 25, 2009, in the Imigrantes Exhibition Center, in São Paulo. The capacity made available to participants was of 10 GB.

b. Telefônica Trio Tons

A series of free presentations in countryside cities, with the participation of national singer trios. In 2008, the event took place in Bauru, Jundiaí, Santo André, Sorocaba and São José do Rio Preto, with the participation of artists such as Daniela Mercury, Frejat, Nando Reis, Paralamas do Sucesso, Tony Garrido and Vanessa da Mata, with average audience per show of 30 thousand people.

c. Telefônica Open Jazz

With the objective of allowing access to all to jazz, two free of charge shows took place in São Paulo, with Macy Gray and Herbie Hancock, in June, and Chaka Khan and Brandford Marsalis, in November. Each presentation gathered around 30 thousand people.

11. Social responsibility (Continued)**11.2 Sponsorships** (Continued)

d. Bachiana Chamber Orchestra

Free orchestra shows in countryside cities of São Paulo in order to promote classical music among the population. In 2008, there were five shows, with total audience of 15 thousand people.

e. Football Museum

Inaugurated in the Pacaembu Stadium, on September 29, 2008, the museum has the mission of disclosing and preserving football as a Brazilian cultural manifestation, in collaboration with large companies, including the Company, which gives its name to the Sciences Room.

12. Environment

In 2007, there was a change in Telefônica Group's commitment to environment and sustainability, with the establishment of the Strategic Environmental Plan 2008-2012, focusing on the following main aspects:

- Climate changes: improve energetic efficiency of operating processes and improve telecommunication services in order to reduce CO2 emissions.
- Environmental management: establish an homogeneous and integrated operating management model, also involving the supply chain.
- Residue management: promote management through international covenants and agreements.
- Responsible network development: ensure that network expansion, maintenance and modernization follow environmental criteria also taking into consideration Company insights in relation to fixed and mobile installations.
- Telecommunications and sustainable development: improve telecommunication services allowing electricity savings by the population, atmospheric and acoustic control or natural catastrophe prevention.

118

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Management report (Continued)
December 31, 2008 and 2007
(In thousands of reais)

12. Environment (Continued)

Due to the global importance of climate changes and the strategic role that Information and Communication Technologies (TICs) may have and, consequently, the Company, the Group developed the Climate Changes Strategic Plan to reduce greenhouse gases.

The Strategic Plan encompasses from internal initiatives focusing on energetic efficiency to better use of Company services as part of the solution to climate changes. The project comprises the following initiatives:

- Measurement: The Telefônica Group developed a methodology for controlling energetic and greenhouse gas indicators to monitor them and thus propose quantifiable medium and long-term objectives. For this, an internal work procedure was developed in 2007 with the objective of establishing the methodology for quantifying greenhouse gas emissions. This allowed, at the beginning of 2008, the realization for the first time of a global greenhouse gas inventory based on standards known as GHG Protocol, IPCC and Standard ISO 14064-1. According to this work, the Company emitted 58.9 thousand tons of CO2 in 2007, equivalent to 3.8 kilos per customer access (access is construed to be wire telephone lines in service, broadband, data and Internet access and pay TV).
- Reduction of internal emissions: Among the energetic efficiency initiatives that have been developed by the Company, we highlight:

- i. Works to use external air, thus reducing electricity consumption by air conditioning system
- ii. Transformers removal works
- iii. Automated telephone switch center power factor adjustment

- iv. Installation of temperature meters
- v. Automated building lighting system
- vi. Energy metering system adjustments.

119

TELECOMUNICAÇÕES DE SÃO PAULO S.A. □ TELESP

Management report (Continued)
December 31, 2008 and 2007
(In thousands of reais)

12. Environment (Continued)

The implementation of energetic efficiency initiatives has made average electricity consumption by equivalent terminal to decrease from 4.35 KWh in 2000 to 2.47 KWh in 2008. With these initiatives, the Company was considered in 2008 a Leading Company and was granted the I Época Climate Change Award. This award, granted by Época magazine (Globo printing house) had technical support from PricewaterhouseCoopers and highlighted initiatives from 20 companies that have environmental policies to reduced the emission of gases worsening the greenhouse effect.

13. Acknowledgment

Company management would like to thank hereby shareholders, customers, suppliers, financial institutions and other entities involved in its activities, for their support and trust, and particularly its employees, for their dedication and commitment, which allowed the Company to attain the results presented heretofore.
