ITEM 1. FINANCIAL STATEMENTS

The interim financial statements included herein are unaudited but reflect, in management's opinion, all adjustments, consisting only of normal recurring adjustments, that are necessary for a fair presentation of Registrant's financial position and the results of our operations for the interim periods presented. Because of the nature of our business, the results of operations for the nine months ended September 30, 2008 are not necessarily indicative of the results that may be expected for the full fiscal year. These financial statements should be read in conjunction with our audited financial statements and notes thereto included in our Form 10K-SB statement, filed on March 31, 2008, which can be found in its entirety on the SEC website at www.sec.gov under SEC File Number 333-145264.

BIBB CORPORATION
(A Development Stage Company)
Notes to Financial Statements

1 .. DESCRIPTION OF BUSINESS, HISTORY AND SUMMARY OF SIGNIFICANT POLICIES

Description of business and history – Bibb Corporation, a Nevada corporation, (hereinafter referred to as the “Company” or “Bibb Corp.”) was incorporated in the State of Nevada on July 22, 2002. The company plans to be in the business of multi-media publishing and marketing. The Company operations have been limited to general administrative operations and is considered a development stage company in accordance with Statement of Financial Accounting Standards No. 7.

Management of Company – The company filed its articles of incorporation with the Nevada Secretary of State on July 22, 2002, indicating Dean Patel as the incorporator.

The company filed its annual list of officers and directors with the Nevada Secretary of State on September 10 2002 indicating its President, Secretary, Treasurer and Director is Judson Bibb. He remains in those positions as of this filing.

Going concern – The Company incurred net losses of approximately \$32,763 from the period of July 22, 2002 (Date of Inception) through September 30, 2008 and has not commenced its operations, however, it is still in the development stages, raising substantial doubt about the Company’s ability to continue as a going concern. The Company may seek additional sources of capital through the issuance of debt or equity financing, but there can be no assurance the Company will be successful in accomplishing its objectives.

The ability of the Company to continue as a going concern is dependent on additional sources of capital and the success of the Company’s plan. The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

Year end – The Company’s year end is December 31.

Income taxes – The Company accounts for its income taxes in accordance with Statement of Financial Accounting Standards No. 109, which requires recognition of deferred tax assets and liabilities for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in operations in the period that includes the enactment date.

Management believes the Company will have a net operating loss carryover to be used for future years. Such losses may not be fully deductible due to the significant amounts of non-cash service costs. The Company has established a valuation allowance for the full tax benefit of the operating loss carryovers due to the uncertainty regarding realization.

Current tax laws limit the amount of loss available to be offset against future taxable income when a substantial change in ownership occurs. Therefore, the amount available to offset future taxable income may be limited.

Net loss per common share – The Company computes net loss per share in accordance with SFAS No. 128, Earnings per Share (SFAS 128) and SEC Staff Accounting Bulletin No. 98 (SAB 98). Under the provisions of SFAS 128 and SAB 98, basic net loss per share is computed by dividing the net loss available to common stockholders for the period by the weighted average number of shares of common stock outstanding during the period. The calculation of diluted net loss per share gives effect to common stock equivalents; however, potential common shares are excluded if their effect is anti-dilutive. For the period from July 22, 2002 (Date of Inception) through September 30, 2008, no options and warrants were excluded from the computation of diluted earnings per share because their effect would be anti-dilutive.

Concentration of risk – A significant amount of the Company’s assets and resources are dependent on the financial support (inclusive of free rent) of Judson Bibb. Should he determine to no longer finance the operations of the company, it may be unlikely for the company to continue.

Revenue recognition – The Company has no revenues to date from its operations

1a. DESCRIPTION OF BUSINESS AND SUMMARY OF SIGNIFICANT POLICIES (continued)

Advertising costs –The Company has recorded no advertising costs for the period from January 1, 2006 through September 30, 2008.

Legal Procedures – The Company is not aware of, nor is it involved in any pending legal proceedings.

2. PROPERTY AND EQUIPMENT

As of September 30, 2008, the Company does not own any property and/or equipment.

3. STOCKHOLDER'S EQUITY

The Company has 3,340,000 shares authorized and 3,340,000 issued and outstanding as of March 31, 2008. The issued and outstanding shares were issued as follows:

100,000 common shares were issued to Judson Bibb on August 19, 2002 for the sum of \$100 in cash.

215,000 common shares were issued to Judson Bibb on September 5, 2002 for the sum of \$215 in cash.

25,000 common shares were issued to Judson Bibb on October 31, 2002 for the sum of \$25 in cash.

2,000,000 common shares were issued to Judson Bibb on December 20, 2002 for the sum of \$6,000 in cash.

On December 31, 2007, we completed an initial offering of 1,000,000 shares of common stock at a per share price of \$.03. Net proceeds from the offering were \$30,000.

Cash at the end of the December totaled only \$29,264. A mistake by the issuing bank regarding the available funds of a subscriber's check delayed the receipt of \$900 which was compounded by a \$5.00 bank fee. The mistake was rectified and the funds were transferred from escrow into the company operating account on February 4, 2008 raising our total liabilities and equity to \$30,169.

As of September 30, 2008, a total of 3,340,000 shares have been issued to 26 shareholders -- 2,340,000 to our existing stockholder, who is our sole officer and director and 1,000,000 to friends and family. The shares are restricted securities, as that term is defined in Rule 144 of the Rules and Regulations of the SEC promulgated under the Act. Under Rule 144, such shares can be publicly sold, subject to volume restrictions and certain restrictions on the manner of sale, commencing one year after their acquisition.

As of September 30, 2008, our total liabilities and equity were \$20,207.

4. RELATED PARTY TRANSACTIONS

The Company currently uses the home of Judson Bibb, an officer and director of the Company, on a rent-free basis for administrative purposes and in the future will use it for storage purposes as well. There is no written lease agreement or other material terms or arrangements relating to said arrangement.

In 2005, 2006, 2007 and 2008, Judson Bibb made loans to the Company totaling \$6,439, \$4,791, \$4,950 and \$450 respectively. As of September 30, 2008, his total contributions equal \$22,970.

5. STOCK OPTIONS

As of September 30, 2008, the Company does not have any stock options outstanding, nor does it have any written or verbal agreements for the issuance or distribution of stock options at any point in the future.

6. LITIGATION

As of September 30, 2008, the Company is not aware of any current or pending litigation which may affect the Company's operations.

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion of our financial condition and results of operations in conjunction with our financial statements and related notes. The following discussion and other parts of this report contain forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated by such forward-looking statements due to various factors, including, but not limited to, those set forth under "Certain Factors That May Affect Our Future Operating Results" and elsewhere in this report.

We began our development stage in July 2002. Since inception we have focused primarily on research and development activities, organizing our company, finding and negotiating with vendors, raising capital and laying the groundwork to take the company public. Until the closing of our current offering, development expenses were funded by our founder, Judson Bibb.

Our planned principal operations of producing and marketing fully integrated multi-media products have not commenced and, accordingly, we have not derived any revenue from these operations. In fact, we have incurred only losses and we expect to continue to incur losses for, at least, the next year as we create our products.

We have an accumulated deficit of \$32,763 since inception. We have not generated any revenues to date; and we have been issued a "substantial doubt" going concern opinion from our auditors.

Until recently our only assets were the cash contributed by the founder. Thanks to the year-end closing of a \$30,000 offering, our total liabilities and equity now total \$20,207. As the funds were transferred from escrow into the company operating account in February 2008, we now have the funds to begin product development.

Research and writing of the scripts is being completed, that will be followed by development of our videos, printing the manual, publishing our website and creating our initial television commercial.

Therefore, a comparison of our financial information for accounting periods would likely not be meaningful or helpful in making an investment decision regarding our company.

OVERVIEW

Bibb Corporation was founded on the belief that we have a new way for the millions of marginally literate people to acquire and comprehend the complex information required to interact with government, businesses and the law. With the result that not being comfortable reading and understanding text no longer dooms one to dependence on others or withdrawal from legal and business intercourse. Our goal is to assist customers who want and need information that is easy to find, easy to use and easy to understand.

We intend to develop our business as an "information retailer", providing information in a simple, easy-to-use manner through multi-media applications. Our concept is intended to blur the lines between a number of business applications: publisher, video producer and Internet content provider.

Each of our products will be fully integrated combinations of video, audio and print supplemented by Internet information. Our information products are intended to be a solution in which one medium will complement and support the information provided by the other.

In a nutshell, we'll offer a simple manual then support it with how-to videos that show and tell how to apply the information step-by-step and support it a second way with a website for updated information and answers to questions.

The video enhances the manual and provides a further level of comfort to the buyers. They feel more secure knowing they will be able to use and understand the manual as well as be able to accomplish what they need to do.

The website delivers added value. The website provides updated information that's been uncovered or released since the manual was printed as well as form letters to copy and paste or adapt. Customers can also review questions others have asked and read the answers to them or ask new questions.

As the video will rely on voice over to deliver the audio portion of the content, foreign language versions will be easy to do. We just strip off the old voice track and lay in a new one then replace the graphics and titles.

We do not intend to change our business activities or combine with or acquire any other company now or in the foreseeable future. If we are unable to complete our business plans and become profitable, we may decide that we cannot continue with our business operations as outlined in our original business plan because of a lack of financial resources and may be forced to seek other potential business opportunities that might be available; however, we have no plans or intentions to do so at this time or at any time in the future.

STRATEGY

One of the five best selling direct response television ads in recent years has been the Video Professor series which teaches computer use by video or interactive CD. It is a shining example of successfully selling information via direct response television.

We intend to follow the same course by using direct response television commercials to market our products. Selling prices will range between \$19.95 and \$24.95. As is the industry norm, we will initially run our direct response commercials in a few local markets. By testing different price points, offers and premiums, we will determine which combination works best and then continue to roll out the commercials in other markets. If the product sales are successful, we intend to follow with Spanish versions.

Our initial goal will be to establish our 'brand name' as a trusted source of reliable, simple and effective information products. We feel direct response television commercials will be an immediate way for us to establish credibility and brand awareness, as well as generate sales.

As game and other visual entertainment sites are popular with the marginally literate, once our brand has been established, sales commence and revenues are generated, we intend to set up a commission sales program for webmasters to increase web sales and drive consumers to our website.

Each medium (print, video and web) will cross promote the entire line of products. The non-password protected section of our website will promote and offer our products for sale online. Each person entering the password protected section will be required to register and establish a password, creating a database for future marketing efforts.

In addition to marketing our products through television and our website, we intend to contact booksellers, video stores and other retailers to negotiate possible inclusion of our products in their offerings. As retail sales for direct response products currently run 10 to 1, (for every television sale, another 10 will be sold at the retail level) our television sales figures will provide significant leverage.

Once we have placement in store shelves, we intend to release other titles that don't push the traditional direct response emotional hot buttons such as: filing taxes, buying or leasing a car, dealing with Medicare or an insurance company, going to small claims court, etc.

RECENT EVENTS

On December 31, 2007, we completed an initial offering of 1,000,000 shares of common stock at a per share price of \$.03. Net proceeds from the offering were \$30,000.

Cash at the end of the December totaled only \$29,264. A mistake by the issuing bank regarding the available funds of a subscriber's check delayed the receipt of \$900 which was compounded by a \$5.00 bank fee. The mistake was rectified and the funds were transferred from escrow into the company operating account on February 4, 2008 raising our total liabilities and equity to \$30,169.

As of February 29, 2008, a total of 3,340,000 shares have been issued to 26 shareholders -- 2,340,000 to our existing stockholder, who is our sole officer and director and 1,000,000 to friends and family. The shares are restricted securities, as that term is defined in Rule 144 of the Rules and Regulations of the SEC promulgated under the Act. Under Rule 144, such shares can be publicly sold, subject to volume restrictions and certain restrictions on the manner of sale, commencing one year after their acquisition.

Finally, as a result of the transfer of funds to the operating account, we have begun product development.

TRENDS

Because of the increasing foreclosures, tightening credit and a looming recession, trends are very positive for the company.

The number of home foreclosures climbed 71 percent in the third quarter of 2008. A total of 765,558 U.S. properties got a default notice, were warned of a pending auction or were foreclosed on in the quarter. For comparison, in all of 2007, 405,000 households lost their home. And that was up 51 percent from the 268,532 homes that were repossessed in 2006.

In September 2008, foreclosure filings were reported on 265,968 properties, a 12 percent decrease from the previous month but still a 21 percent increase from September 2007. Much of the 12 percent decrease can be attributed to changes in state laws that have at least temporarily slowed down the pace at which lenders are moving forward with foreclosures. Still, one in every 475 U.S. housing units received a foreclosure filing in September

A longer term view notes that total foreclosure filings soared 97% in December 2007 compared with December of 2006. For the year (2007), total filings - which include default notices, auction sale notices and bank repossessions - grew 75%.

Homeowners who are falling behind on their payments - rose to the highest levels in 23 years in the last three months of 2007. Statistics showed 3.62 percent of mortgages were seriously delinquent nationwide in the fourth quarter last year, up from the year-earlier level of 2.95 percent. More than 1 percent of all U.S. households were in some stage of foreclosure during 2007, up from 0.58 percent the year before.

In 2008, 6.4% of all homeowners missed a mortgage payment. Add the home loans that were past due and the figure reaches nearly 10 percent.

The pace of foreclosures is expected to remain high this year as loans continue to reset to higher payments that many borrowers will be unable to afford. But with home prices falling, many owe more than their house is worth, eliminating the option of conventional refinancing and raising the risk of foreclosure.

According to the most recent home sales report from the September of 2008, the national median home price for all housing types was down 9 percent from the previous year. For all of 2007, average home prices fell by 9%. Falling home prices add to the squeeze on borrowers, many of whom are seeing the value of their home dropping below the amount they owe.

8.8 million mortgage-holders, 17% of the total, have home loans that are greater than the value of the house. If house prices fall by another 10%, almost 14 million mortgages will be upside down in a year's time. And the number of foreclosures should rise accordingly.

The rising volume of calls fielded by the industry alliance sponsored Hope Now means that some homeowners may not be getting the in-depth counseling they need to consider all of their options. Lenders report that some borrowers in trouble have ignored letters and phone calls intended to initiate a discussion about new mortgage terms.

While part of that may be due to borrowers being unable to admit defeat or deal with bad news, a significant part (up to 45%) could be due to marginal reading skills

There is the stigma of not being able to read well. People with poor literacy skills often are ashamed of their problem ..Their market interactions are driven by the need to preserve self-esteem and dignity. Thus, when facing foreclosure, many financially strapped homeowners don't respond to calls or letters from their lenders. An overwhelming majority of respondents in a Freddie Mac survey said they didn't call the company servicing their loan because they didn't think they had any options that could help them avoid losing their home.

In reality, the 45% figure could be low. A major literacy gap occurs along racial lines. White adults scored 50 points higher on prose proficiency on the National Adult Literacy Survey than did black adults (287 vs. 237). In turn, black adults scored 21 points higher than Hispanic respondents (237 vs. 216).

In general, those most in danger of facing foreclosure are the subprime borrowers. According to the New York Times, subprime lending occurs at a higher rate in the black and Hispanic communities. Among subprime borrowers with similar credit ratings, blacks and Hispanics were 30 percent more likely than whites to be charged the highest interest and thus are likely to be in greater danger of foreclosure.

While risk and credit scores may be a primary factor, lower-income households also are charged higher prices because their low general and financial literacy levels make effective product searches difficult and expose them to seller abuse. Low incomes are highly, and increasingly, correlated with low education levels, and these low levels are closely associated with low general and financial literacy levels.

Consumers who have difficulty reading are unlikely to understand the fine legal print in ads and contracts. Those with limited mathematical skills often do not understand percentages that express the key cost and yield indicators,

respectively, for credit and savings products. For example, research shows that only about three-fifths of consumers understand and use the most important index of credit costs, the annual percentage rate or APR, and that non-users tend to have low incomes and education levels.

Lower-income households with low literacy levels are especially vulnerable to seller abuse. Consumers who do not understand percentages may well find it impossible to understand the costs of mortgage, home equity, installment, credit card, payday, and other high-cost loans. Equally, the disclosures required by mortgage transactions are often misunderstood by those with limited financial literacy, and obfuscated by brokers and lenders who have either failed to explain key loan terms and disclosures to borrowers or have actively misrepresented or concealed these terms.. Individuals who do not read well may find it difficult to check whether the oral promises of salespersons were written into contracts. And, those who do not write fluently are limited in their ability to resolve problems by writing to merchants or complaint agencies.

Since the costs of foreclosure can eat up 25% or more of the value of a loan, the losses could be enormous if a large fraction of these borrowers walk away which also put pressure on the economy and help push the country into a deeper recession. And if the economy worsens, and more people lose their jobs, that could increase the number of families at risk of losing their homes and increase the need for credit repair.

The reason: tighter lending standards make cash harder to come by. And as the credit squeeze has made it more difficult to obtain property-based lines of credit, American consumers are turning to their credit cards as an alternative.

In 2007, consumer borrowing increased by an annual rate of 3.3 percent. This year it's expected to be even more. A Center for American Progress report found that credit card debt is currently rising at a rate four times higher than earlier in the decade. Approximately a third of all households have credit card debt over \$10,000. Currently, credit card debt on average equals just under 9.3 percent of cardholder's disposable income.

As the economy slows, they're losing jobs and overtime hours and trying to supplement their lower incomes with more spending on credit cards. At the same time, consumers are increasingly finding themselves forced to deal with higher interest rates and other fees as credit card companies respond to the fact that consumer debt is climbing, along with delinquency rates.

The percentage of delinquent credit card accounts -- those 30 days or more overdue -- hit 4.5 percent in the second quarter of 2008. For comparison, from April 2007 to January, the average number of credit and fixed payment accounts that were overdue by one payment or more climbed to 1.01 from 0.97. The bottom line: many are going to need help with credit repair.

During the past year, credit card debt has ballooned rapidly in parts of the nation where the economy is particularly weak, Bank of America executives said credit card delinquencies in California, Florida, Arizona, and Nevada—states with high foreclosure rates—increased five times as fast as in other states, suggesting that consumers struggling with their mortgage debt are also finding their credit card bills hard to pay

It is in these states where Bibb Corporation will do the initial testing of its commercials.

The trends referenced above reflect conditions at the end of October 2008. The Federal Reserve and the US Government in general are doing everything they can to prevent the country from sliding into a deep recession and stem the pace of foreclosures and bankruptcies.

The Bush Administration introduced a "Hope for Homeowners" program in July 2008, but its scope is narrow. The \$700 billion bailout passed by Congress and signed into law by President Bush in October does allow the U.S. Treasury to use some of the funds in support of home mortgage relief, but it does not require financial institutions to modify home loans in exchange for the infusion of taxpayer dollars. Whether or how soon any of these efforts will be successful cannot be determined.

RESULTS OF OPERATIONS

As the company is in the development stage, no products have been produced yet. As a consequence, there were no revenues.

EXPENSES

General and Administrative.

General and administrative expenses consist primarily of legal, accounting and other professional service fees. General and administrative expenses increased to \$10,412 for the six months ended September 30, 2008.

INCOME TAXES

During the six months ended September 30, 2008, the Company recorded a loss from continuing operations of \$10,412. Adding that to the previous losses that have been carried forward, gives the company a total loss carry forward of \$32,763. As the company expects losses for the rest of the year, the tax benefit will probably be used for 2009.

LIQUIDITY AND CAPITAL RESOURCES

On December 31st 2007, we successfully completed the offering of 1,000,000 shares, raising \$30,000 in the process. The \$30,000 was transferred to the company operating account on February 4, 2008.

During the six months ended September 30, 2008, the company had a net cash outflow of \$10, 412. The majority of the costs were for professional fees and bank charges.

We have an accumulated deficit since inception of \$32,763 and our auditors have expressed substantial doubt about our ability to continue as a going concern unless we are able to generate revenues.

We are relying primarily on the monies raised in the offering to pursue the development, setup and marketing of our products and there is no guarantee we will be successful in completing our proposed business plans.

Management believes the Company's funds are sufficient to provide for its short term projected needs for operations. However, the Company may decide to sell additional equity or increase its borrowings in order to fund increased product development or for other purposes.

We have never had any discussions with any possible acquisition candidate, nor have we any intention of doing so.

We do not expect to purchase any real estate and do not own any to sell.

We have no off-sheet balance arrangements or obligations or other interests that could affect finances or operations.

USE OF PROCEEDS

The net proceeds from the offering were \$25,000. We expect to disburse these proceeds in the priority set forth below, during the first 12 months:

| | |
|----------------------------|----------|
| Total Proceeds | \$30,000 |
| Less Offering Expenses | 5,000 |
| Net Proceeds to Us: | \$25,000 |
| Layout and printing | 8,400 |
| Video production | 1,600 |
| Video duplication | 2,350 |
| TV commercial production | 1,350 |
| TV airtime | 5,000 |
| Website design and hosting | 1,450 |
| Legal, accounting, etc. | 3,450 |
| Working Capital | 1,400 |
| Total Use of Net Proceeds | \$25,000 |

COSTS AND TIME TO COMPLETE PRODUCT DEVELOPMENT

In order to become fully operational and profitable, we will need to achieve each of the milestones outlined below:

The following milestones have been completed:

1. Research the information
2. Start writing the manual, the video script and the website pages.
3. Consult with a lawyer regarding disclaimers and other legal protections.

Within 6 months of the completion of this offering, we expect to:

1. Complete the writing
2. Create the illustrations, cover art and photos
3. Produce the DVD
4. Layout the manual and create a galley
5. Show DVD and manual galley to focus groups.

Budget for this quarter is estimated to be \$5,690

Within 9 months of completion of this offering, we expect to:

1. Make revisions to DVD and manual
2. Proof DVD and manual
3. Create DVD duplication master and create DVDs
4. Print manual
5. Produce television commercial
6. Complete website

Budget for this quarter is estimated to be \$11,491

Within 12 months we expect to:

1. Begin testing commercial
2. Analyze results
3. Tweak commercial
4. Continue testing

Budget for this quarter is estimated to be \$4,900

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

As sales have not begun yet, Bibb Corporation has no customer credit risk. We had no debt outstanding and no derivative instruments at September 30, 2008

We do not currently have any market risk sensitive instruments held for trading purposes or otherwise, therefore, we do not have exposure to interest rate risk, foreign currency exchange rate risk, commodity price risk, and other relevant market risks.

ITEM 4: CONTROLS AND PROCEDURES

OBJECTIVES:

Management is responsible for planning and performing internal audits of the company. Our objectives are to improve processes and controls.

Our specific areas of focus include:

- The effectiveness of internal control processes and systems.
- Compliance with laws, regulations and policies and procedures.
- The effectiveness and efficiency of management systems for achieving objectives while considering business risks.
 - The reliability and security of computer operations.

Bibb Corporation's disclosure controls and procedures aim to:

- ensure timely collection and evaluation of information potentially subject to disclosure,
- capture information that is relevant to the need to disclose developments and risks,
- evolve with the business and

- produce 34 Act reports that are timely, accurate and reliable.

LIMITATIONS ON THE EFFECTIVENESS OF CONTROLS:

The Company's management does not expect that its Disclosure Controls or its 'internal controls and procedures for financial reporting' ("Internal Controls") will prevent all error and all fraud. A control system, no matter how well conceived and managed, can provide only reasonable assurance that the objectives of the control system are met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake.

Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

CONCLUSIONS:

Based upon the Controls Evaluation, the President has concluded that, subject to the limitations noted above, the Disclosure Controls are effective to timely alert management to material information relating to the Company during the period when its periodic reports are being prepared.

In accordance with SEC requirements, the President notes that, since the date of the Controls Evaluation to the date of this Quarterly Report, there have been no significant changes in Internal Controls or in other factors that could significantly affect Internal Controls, including any corrective actions with regard to significant deficiencies and material weaknesses.

Within the 90 days prior to the filing date of this report, the Company carried out an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures pursuant to Exchange Act Rule 13a-14. This evaluation was done under the supervision and with the participation of the Company's principal executive officer (who is also the principal financial officer). Based upon that evaluation, he believes that the Company's disclosure controls and procedures are effective in gathering, analyzing and disclosing information needed to ensure that the information required to be disclosed by the Company in its periodic reports is recorded, summarized and processed timely. The principal executive officer is directly involved in the day-to-day operations of the Company.

PART 2 - OTHER INFORMATION

ITEM 6: EXHIBITS

(a) Documents filed as part of this report:

(1) Exhibits

The list of exhibits contained in the accompanying Index to Exhibits is incorporated herein.

(b) See (a)(2) above.

(c) There are no financial statements required by Regulation S-X (17 CFR 210) which are or will be excluded from the annual report to shareholders by Rule 14a-3(b).

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

BIBB CORPORATION
