2002/006

27 January 2003

VODAFONE ANNOUNCES STRONG THIRD QUARTER PERFORMANCE

Vodafone Group Plc (Vodafone) announces today key performance indicators for the quarter ended 31 December 2002. The main highlights are:

Increase in customer base to 112.5 million, including over 4 million organic net additions in the quarter

12 month rolling ARPU up in all key European markets

Data revenue at 16.0% of service revenues in the month of December, up from 12.7% in the prior year

Sir Christopher Gent, Chief Executive of Vodafone, commented: These KPI s demonstrate continued strong operational performance with better than expected organic customer growth. This is the third consecutive quarter that has seen an increase in Group organic customer growth and in annual ARPU in some of our key markets. Our progress in data revenues is pleasing ahead of the additional benefits expected from our new data service environments.

Customer Growth

In total, over 4.9 million registered proportionate customers were added in the quarter, including 0.9 million from stake changes. The total base has increased to 112.5 million from 107.5 million.

Net additions in Germany of 922,000 and in Italy of 529,000 were the highest levels since March 2001 and December 2001 respectively. In the UK, net additions were 267,000, reflecting the expected return to net growth following periods of disconnecting non-revenue earning handsets.

Growth in contract customers continued to be strong in controlled markets, even though this quarter is traditionally stronger for prepaid growth, with over 500,000 net contract additions in Germany and over 100,000 in the UK.

Active customers in the Group's controlled businesses remained at 94% of total customers.

Registered Blended ARPU

All key markets in Europe showed an increase this quarter in registered blended ARPU on a 12 month rolling basis. This is the third consecutive quarter to show such an increase in Germany and the UK. The trend in Japan continues to reflect the effect of increasing market penetration levels.

Data as a percentage of service revenues

For the Group's controlled operations, data as a percentage of service revenues increased to 13.9% for the year to December 2002, up from 13.2% for the year to September. Data in the month of December 2002 was 16.0%, up from 12.7% in December 2001.
