PORTFOLIO MANAGERS' REPORT

Dear Shareholders:

ING Prime Rate Trust (the "Trust") is a diversified, closed-end management investment company that seeks to provide investors with as high a level of current income as is consistent with the preservation of capital. The Trust seeks to achieve this objective by investing in a professionally managed portfolio comprised primarily of senior loans.

PEFORMANCE SUMMARY

The Trust declared \$0.11 of dividends during the second fiscal quarter and \$0.32 for the nine months ended November 30, 2004. Based on the average month-end net asset value ("NAV") per share of \$7.40, this resulted in an annualized distribution rate of 5.86%⁽¹⁾ for the quarter and 5.74%⁽¹⁾ for the nine months. The Trust's total return for the third fiscal quarter, based on NAV, was 1.73%, versus a total return on the S&P/LSTA Leveraged Loan Index of 1.11% for the same quarter. For the nine months, the total return, based on NAV, was 5.15%, versus 2.08% for the S&P/LSTA Leveraged Loan Index. The total market value return (based on full reinvestment of dividends) for the Trust's common shares during the third fiscal quarter was 5.77% and 1.03% for the nine months ended November 30, 2004.

MARKET OVERVIEW

The non-investment grade loan market closed out the Trust's third fiscal quarter, and the entire year, in robust fashion. In fact, statistically speaking, 2004 was arguably the strongest twelve-month period in recent history. Aggregate new issue volume soared to a record high \$265 billion, up 60% from 2003 (and slightly in excess of the prior record of \$256 billion set in 1998). Importantly, a significant portion of total 2004 new issue volume was generated by merger and acquisition activity, fundamentally the most attractive source of new transaction flow. Furthermore, after peaking at just inside of 8% in 2002, default rates declined to cyclical lows, ending the year at 1.1%, down from 2.3% at the end of 2003 (as measured by Standard & Poor's).

As is consistent with the theme of our last report, the fundamental building blocks of favorable floating rate loan performance remain fully intact. First, while somewhat uneven, the U.S. economy continues to expand at a sufficient pace. Typically a dependable harbinger of future credit and default experience, GDP growth for 2004 clocked in at an estimated 4.5%, a pace conducive to healthy business expansion and capital spending (common sources of new loan activity). Consensus estimates call for still solid, albeit somewhat more moderate, growth for 2005. Second, investor

⁽¹⁾ The distribution rate is calculated by annualizing dividends declared during the period and dividing the resulting annualized dividend by the Trust's average month-end net asset value (in the case of NAV) or the average month-end NYSE Composite closing price (in the case of Market). The distribution rate is based solely on the actual dividends and distributions, which are made at the discretion of management. The distribution rate may or may not include all investment income and ordinarily will not include capital gains or losses, if any.

ING Prime Rate Trust

PORTFOLIO MANAGERS' REPORT (continued)

demand for higher-yielding credit instruments and overall market liquidity remains very strong. Robust demand typically translates into firm asset prices and stable net asset values. Third, but certainly not last in order of significance, The Fed continues to push onward in its attempt to fend off inflationary threats by systematically raising short term interest rates. This aspect is of particular importance to loan fund investors in that, unlike fixed rate bonds (returns for which generally exhibit an inverse relation to changes in interest rates), the loan asset class, by way of its ultra-short duration floating rate profile, has historically delivered increasing dividends as short-term rates rise.

For all the positive developments currently holding influence over the market, we note a short list of factors which could, in the indeterminate future, spoil the party, so to speak. For one, unprecedented demand for floating rate loans has driven average borrowing spreads to historical lows over the last few quarters (the benchmark BB/BB- spread fell below 2.0% by the end of the year). As a result, for the first time in recent memory, there has been a noticeable lag in the time it takes for rising short-term rates to favorably impact loan fund yields. Fortunately, we see this as a temporary condition and one that will self-correct as rates move higher. We also continue to observe an increasing inflow of lower quality loans coming to market. Not unlike other developed capital markets, a period of heavy demand has produced a cohort of loans that are carrying higher debt multiples, looser terms and lower credit ratings. As stated previously, consistent with an investment strategy focused on delivering attractive risk-adjusted returns, we will continue to maintain credit and investment discipline, potentially forfeiting yield in order to do so.

PORTFOLIO OVERVIEW

The Trust's strong performance during the quarter was attributable to improving loan process across most sectors, enhanced by above-index returns on several sizeable individual holdings and marginally higher utilization of leverage for investment purposes. In addition, there were fewer instances of negative valuation movements on legacy holdings. Cable (9.3% of total assets at quarter-end), printing/publishing (7.8%) and healthcare (6.7%) remained among the top three sector exposures, with minor changes in rankings traceable primarily to refinancing and secondary market activity. Notable variances in other sectors during the quarter included continued reductions in automotive (to 4.5%, from 5.6% at prior quarter-end) and cellular (to 4.4%, from 5.2%), the former a combination of profit taking and defensive credit management, and the latter due largely to the refinancing/recapitalization of several bellwether issuers. The Trust remains well diversified, with average issuer and sector exposure at approximately 0.24% of total assets and 2.62% of total assets, respectively, at the end of the quarter. Organic non-performing assets (i.e., current as to

interest and/or principal at time of purchase) continued to decline, ending the quarter well under 1% of total assets on a trade-date basis.

USE OF LEVERAGE

The Trust utilizes financial leverage to seek to increase the yield to the holders of common shares. As of November 30, 2004, the Trust had \$450 million of "Aaa/AAA⁽²⁾" rated cumulative auction rate preferred shares outstanding, and \$403 million of borrowings outstanding under \$570 million in available credit facilities. Total leverage, as a percentage of total assets (including preferred shares), was 43.46% at period end. The use of leverage for investment purposes increases both investment opportunity and investment risk.

OUTLOOK

In short, the near-term outlook, for the Trust and the market as a whole, is one of little change, but fundamentally positive nonetheless. Although the leveraged loan market remains historically tight, driven by a seemingly unquenchable demand for floating rate paper, an increasingly robust visible pipeline for new loan product will hopefully prove sufficient to satisfy that demand without further degradation in average borrowing spreads and/or customary structural protections. In the absence of some outside shock, default rates should remain low at least over the near-term and loan prices near their current highs. We also look for continued increases in short-term interest rates to offset potential further erosion in borrowing spreads. All in all, the existing backdrop is conducive to favorable performance on the part of a conservatively-managed, adequately diversified portfolio of secured, floating rate loans.

^(a) Performance since inception for the index is 5.31% from January 1, 1997.

^(b) Calculation of total return assumes a hypothetical initial investment at the net asset value (in the case of NAV) or the NYSE Composite closing price (in the case of Market Value) on the last business day before the first day of the stated period, with all dividends and distributions reinvested at the actual reinvestment price.

^(c) On December 27, 1994, the Trust issued to its shareholders transferable rights which entitled the holders to subscribe for 17,958,766 shares of the Trust's common stock at the rate of one share of common stock for each four rights held. On January 27, 1995, the offering expired and was fully subscribed. The Trust issued 17,958,766 shares of its common stock to exercising rights holders at a subscription price of \$8.12. Offering costs of \$4,470,955 were charged against the offering proceeds.

^(d) On October 18, 1996, the Trust issued to its shareholders non-transferable rights which entitled the holders to subscribe for 18,122,963 shares of the Trust's common stock at the rate of one share of common stock for each five rights held. On November 12, 1996, the offering expired and was fully subscribed. The Trust issued 18,122,963 shares of its common stock to exercising rights holders at a subscription price of \$9.09. Offering costs of \$6,972,203 were charged against the offering proceeds.

Senior loans are subject to credit risks and the potential for non-payment of scheduled principal or interest payments, which may result in a reduction of the Trust's NAV.

INDEX DESCRIPTIONS

The Credit Suisse First Boston Leveraged Loan Index is an unmanaged index of below investment grade loans designed to mirror the investable universe of the U.S. dollar-denominated leveraged loan market. An investor cannot invest directly in an index.

Edgar Filing: ING PRIME RATE TRUST - Form N-30B-2

The S&P/LSTA Leveraged Loan Index ("LLI") is an unmanaged total return index that captures accrued interest, repayments, and market value changes. It represents a broad cross section of leveraged loans syndicated in the United States, including dollar-denominated loans to overseas issuers. Standard & Poor's and the Loan Syndications & Trading Association ("LSTA") conceived the LLI to establish a performance benchmark for the syndicated leveraged loan industry. An investor cannot invest directly in an index.

^(A) Yield is calculated by dividing the Trust's net investment income per share for the most recent thirty days by the net asset value (in the case of NAV) or the NYSE Composite closing price (in the case of market) at quarter-end. Yield calculations do not include any commissions or sales charges, and are compounded for six months and annualized for a twelve-month period to derive the Trust's yield consistent with the SEC standardized yield formula for investment companies.

^(B) The distribution rate is calculated by annualizing each monthly dividend, then averaging the annualized dividends declared for each month during the quarter and dividing the resulting average annualized dividend amount by the Trust's average net asset value (in the case of NAV) or the NYSE Composite closing price (in the case of Market) at the end of the period.

Principal Risk Factor(s): This closed-end Fund may invest in below investment grade senior loans. Investment in the Fund involves the risk that borrowers may default on obligations, or that lenders may have difficulty liquidating the collateral securing the loans or enforcing their rights under the terms of the senior loans. Senior loans are subject to credit risks and the potential for non-payment of scheduled principal or interest payments, which may result in a reduction of the Fund's NAV. The use of leverage for investment purposes increases both investment opportunity and investment risk. In the event of a general market decline in the value of assets such as those in which the Fund invests, the effect of that decline will be magnified in the Fund because of the additional assets purchased with the proceeds of the leverage.

Interest Rate Risk: Changes in market interest rates will affect the yield on the Fund's Common Shares. If market interest rates fall, the yield on the Fund's Common Shares will also fall. In addition, changes in market interest rates may cause the Fund's NAV to experience moderate volatility because of the lag between changes in market rates and the resetting of the floating rates on assets in the Fund's portfolio. To the extent that market interest rate changes are reflected as a change in the market spreads for loans of the type and quality in which the Fund invests, the value of the Fund's portfolio may decrease in response to an increase in such spreads. Finally, substantial increases in interest rates may cause an increase in loan defaults as borrowers may lack the resources to meet higher debt service requirements.

(1) Total investment return calculations are attributable to common shares.

(2) Total investment return measures the change in the market value of your investment assuming reinvestment of dividends and capital gain distributions, if any, in accordance with the provisions of the Trust's dividend reinvestment plan.

(3) Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of each period and a sale at net asset value at the end of each period and assumes reinvestment of dividends and capital gain distributions in accordance with the provisions of the dividend reinvestment plan. This calculation differs from total investment return because it excludes the effects of changes in the market values of the Trust's shares.

(4) Asset coverage represents the total assets available for settlement of Preferred Stockholder's interest and notes payables in relation to the Preferred Shareholder interest and notes payable balance outstanding. The Preferred Shares were first offered November 2, 2000.

(5) Ratios do not reflect the effect of dividend payments to Preferred Shareholders; income ratios reflect income earned on assets attributable to the Preferred Shares.

(6) Annualized for periods less than one year.

(7) Calculated on total expenses before impact on earnings credits.

ING Prime Rate Trust

NOTES TO FINANCIAL STATEMENTS as of November 30, 2004 (Unaudited)

NOTE 1 - ORGANIZATION

ING Prime Rate Trust (the "Trust"), a Massachusetts business trust, is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as a diversified, closed-end, management investment company. The Trust invests primarily in senior loans which are exempt from registration under the Securities Act of 1933, as amended (the "33 Act"), but which contain certain restrictions on resale and cannot be sold publicly. These loans bear interest (unless otherwise noted) at rates that float periodically at a margin above the Prime Rate of a U.S. bank specified in the credit agreement, the London Inter-Bank Offered Rate ("LIBOR"), the certificate of deposit rate, or in some cases another base lending rate.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of the significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The policies are in conformity with accounting principals generally accepted in the United States of America for investment companies.

A. Senior Loan and Other Security Valuation. Senior loans held by the Trust are normally valued at the mean of the means of one or more bid and ask quotations obtained from an independent pricing service or other sources determined by the Board of Trustees to be independent and believed to be reliable. Loans for which reliable market value quotations are not readily available may be valued with reference to another loan or a group of loans for which reliable quotations are readily available and whose characteristics are comparable to the loan being valued. Under this approach, the comparable loan or loans serve as a proxy for changes in value of the loan being valued.

The Trust has engaged an independent pricing service to provide readily available, reliable market value quotations from dealers in loans and, when such quotations are not readily available, to calculate values under the proxy procedure described above. As of November 30, 2004, 98.5% of total investments were valued based on these procedures. It is expected that most of the loans held by the Trust will continue to be valued with reference to quotations from the independent pricing service or with reference to the proxy procedure described above.

Prices from a pricing source may not be available for all loans and ING Investments, LLC (the "Investment Manager") or ING Investment Management Co. (formerly, Aeltus Investment Management, Inc.) ("ING IM" the "Sub-Adviser"), may believe that the price for a loan derived from market quotations or the proxy procedure described above is not reliable or accurate. Among other reasons, this may be the result of information about a particular loan or borrower known to the Investment Manager or the Sub-Adviser that the Investment Manager or the Sub-Adviser believes may not be known to the pricing service or reflected in a price quote. In this event, the loan is valued at fair value as determined in good faith under procedures established by the Trust's Board of Trustees and in accordance with the provisions of the 1940 Act. Under these procedures, fair value is determined by the Investment Manager and monitored by the Trust's Board of Trustees through its Valuation and Proxy Voting Committee. In fair valuing a loan, consideration is given to several factors, which may include, among others, the following: (i) the characteristics of and fundamental analytical data relating to the loan, including the cost, size, current interest rate, period until the next interest rate reset, maturity and base lending rate of the loan, the terms and conditions of the loan and any related agreements, and the position of the loan in the borrower's debt structure; (ii) the nature, adequacy and value of the collateral, including the Trust's rights, remedies and interests with respect to the collateral; (iii) the creditworthiness of the borrower and the cash flow coverage of outstanding principal and interest, based on an evaluation of its financial condition, financial statements and information about the borrower's business, cash flows, capital structure and future prospects;

ING Prime Rate Trust

NOTES TO FINANCIAL STATEMENTS as of November 30, 2004 (Unaudited) (continued)

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

(iv) information relating to the market for the loan, including price quotations for, and trading in, the loan and interests in similar loans; (v) the reputation and financial condition of the agent for the loan and any intermediate participants in the loan; (vi) the borrower's management; and (vii) the general economic and market conditions affecting the fair value of the loan. Securities for which the primary market is a national securities exchange are valued at the last reported sale price. Securities reported by NASDAQ will be valued at the NASDAQ official closing price. Securities traded in the over-the-counter market and listed securities for which no sale was reported on a valuation date are valued at the mean between the last reported bid and ask price on such exchange. Securities other than senior loans for which reliable market value quotations are not readily available and all other assets will be valued at their respective fair values as determined in good faith by, and under procedures established by, the Board of Trustees of the Trust. Investments in securities maturing in less than 60 days from the date of valuation are valued at amortized cost, which, when combined with accrued interest approximates market value.

B. Federal Income Taxes. It is the Trust's policy to comply with subchapter M of the Internal Revenue Code and related excise tax provisions applicable to regulated investment companies and to distribute substantially all of its net investment income and net realized capital gains to its shareholders. Therefore, no federal income tax provision is required. No capital gain distributions will be made by the Trust until any capital loss carryforwards have been fully utilized or expire.

C. Security Transactions and Revenue Recognition. Revolver and delayed draw loans are booked on a settlement date basis. Security transactions and senior loans are accounted for on trade date (date the order to buy or sell is executed). Realized gains or losses are reported on the basis of identified cost of securities sold. Dividend income is recognized on the ex-dividend date. Interest income is recorded on an accrual basis at the then-current interest rate of the loan. The accrual of interest on loans is discontinued when, in the opinion of management, there is an indication that the borrower may be unable to meet payments as they become due. Upon such discontinuance, all unpaid accrued interest is reversed. Cash collections on non-accrual senior loans are generally applied as a reduction to the recorded investment of the loan. Senior loans are generally returned to accrual status only after all past due amounts have been received. For all loans acquired prior to March 1, 2001, arrangement fees received, which represent non-refundable fees associated with the acquisition of loans, were deferred and recognized over the shorter of 2.5 years or the actual terms of the loan. For all loans, except revolving credit facilities, acquired subsequent to February 28, 2001, fees received are treated as discounts and are accreted whereas premiums are amortized. Fees associated with revolving credit facilities acquired subsequent to February 28, 2001 are deferred and recognized over the shorter of four years or the actual term of the loan.

D. Distributions to Common Shareholders. The Trust declares dividends monthly for net investment income. Distributions from capital gains, if any, are declared and paid annually. The Trust may make additional distributions to comply with the distribution requirements of the Internal Revenue Code. The character and amounts of income and gains to be distributed are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States of America for investment companies. Dividends paid by the Trust from net investment income and distributions of net realized short-term capital gains are, for federal income tax purposes, taxable as ordinary income to shareholders. The Trust records distributions to its shareholders on the ex-dividend date.

ING Prime Rate Trust

NOTES TO FINANCIAL STATEMENTS as of November 30, 2004 (Unaudited) (continued)

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

E. Dividend Reinvestments. Pursuant to the Trust's Shareholder Investment Program (formerly known as the Automatic Dividend Reinvestment Plan), DST Systems, Inc., the Plan Agent, purchases, from time to time, shares of beneficial interest of the Trust on the open market to satisfy dividend reinvestments. Such shares are purchased on the open market only when the closing sale or bid price plus commission is less than the net asset value per share of the Trust's common shares on the valuation date. If the market price plus commissions is equal to or exceeds the net asset value, new shares are issued by the Trust at the greater of (i) net asset value or (ii) the market price of the shares during the pricing period, minus a discount of 5%.

F. Use of Estimates. Management of the Trust has made certain estimates and assumptions relating to the reporting of assets, liabilities, revenues, expenses and contingencies to prepare these financial statements in conformity with generally accepted accounting principles in the United States of America for investment companies. Actual results could differ from these estimates.

G. Share Offerings. Beginning in the year ended February 28, 1999, the Trust began issuing shares under various shelf registration statements, whereby the net proceeds received by the Trust from share sales may not be less than the greater of (i) the NAV per share or (ii) 94% of the average daily market price over the relevant pricing period.

NOTE 3 - INVESTMENTS

For the nine months ended November 30, 2004, the cost of purchases and the proceeds from principal repayment and sales of investments, excluding short-term notes, totaled \$1,540,974,560 and \$1,321,811,733, respectively. At November 30, 2004, the Trust held senior loans valued at \$1,905,728,393 representing 98.2% of its total investments. The market value of these assets is established as set forth in Note 2.

The senior loans acquired by the Trust typically take the form of a direct lending relationship with the borrower, and are typically acquired through an assignment of another lender's interest in a loan. The lead lender in a typical corporate loan syndicate administers the loan and monitors the collateral securing the loan.

Common and preferred shares, and stock purchase warrants held in the portfolio were acquired in conjunction with loans held by the Trust. Certain of these stocks and warrants are restricted and may not be publicly sold without registration under the '33 Act, or without an exemption under the '33 Act. In some cases, these restrictions expire after a designated period of time after issuance of the shares or warrants.

NOTES TO FINANCIAL STATEMENTS as of November 30, 2004 (Unaudited) (continued)

NOTE 4 - MANAGEMENT AND ADMINISTRATION AGREEMENTS

The Trust has entered into an Investment Management Agreement with the Investment Manager, a wholly-owned subsidiary of ING Fund Services, LLC (the "Administrator"), to provide advisory and management services. The Investment Management Agreement compensates the Investment Manager with a fee, computed daily and payable monthly, at an annual rate of 0.80% of the Trust's Managed Assets. For purposes of this Agreement, "Managed Assets" shall mean the Trust's average daily gross asset value, minus the sum of the Trust's accrued and unpaid dividends on any outstanding preferred shares and accrued liabilities (other than liabilities for the principal amount of any borrowings incurred, commercial paper or notes issued by the Trust and the liquidation preference of any outstanding preferred shares).

The Investment Manager entered into a Sub-Advisory Agreement with ING IM, a wholly-owned subsidiary of ING Groep N.V., effective August 19, 2003. Subject to such policies as the Board or the Investment Manager may determine, ING IM manages the Trust's assets in accordance with the Trust's investment objectives, policies, and limitations.

The Trust has also entered into an Administration Agreement with the Administrator to provide administrative services and also to furnish facilities. The Administrator is compensated with a fee, computed daily and payable monthly, at an annual rate of 0.25% of the Trust's average daily Managed Assets.

NOTE 5 - TRANSACTIONS WITH AFFILIATES AND RELATED PARTIES

At November 30, 2004, the Trust had the following amounts recorded in payables to affiliates on the accompanying Statement of Assets and Liabilities:

Accrued Investment Management Fees	Accrued Administrative Fees	Total
\$ 1,244,084	\$ 388,776	\$ 1,632,860

The Trust has adopted a Retirement Policy covering all independent trustees of the Trust who will have served as a independent trustee for at least five years at the time of retirement. Benefits under this plan are based on an annual rate as defined in the plan agreement.

NOTE 6 - COMMITMENTS

The Trust has entered into both a \$90 million 364-day revolving credit agreement which matures on August 25, 2005 and a \$480 million 364-day revolving securitization facility which matures on July 11, 2005, collateralized by assets of the Trust. Borrowing rates under these agreements are based on a fixed spread over LIBOR, the federal funds rate, or a commercial paper-based rate. Prepaid arrangement fees for these facilities are amortized over the term of the agreements. The amount of borrowings outstanding at November 30, 2004, was \$403 million. Weighted average interest rate on outstanding borrowings was 2.49%, excluding fees related to the unused portion of the facilities, and other fees. The amount of borrowings represented 20.53% of total assets at November 30, 2004. Average borrowings for the nine months ended November 30, 2004 were \$398,387,273 and the average annualized interest rate was 2.39% excluding other fees related to the unused portion of the facilities, and other fees.

NOTE 7 - RIGHTS AND OTHER OFFERINGS

As of November 30, 2004, outstanding share offerings pursuant to shelf registrations were as follows:

Registration Date	Shares Registered	Shares Remaining
9/15/98	25,000,000	13,727,319
3/04/99	5,000,000	3,241,645

On November 2, 2000, the Trust issued 3,600 shares each of Series M, Series W and Series F Auction Rate Cumulative Preferred Shares, \$.01 Par Value, \$25,000 liquidation preference, for a total issuance of \$270 million. Also, on November 16, 2000, the Trust issued 3,600 shares of Series T and Series Th Auction Rate Cumulative Preferred Shares, \$.01 Par Value, \$25,000, liquidation preference, for a total issuance of \$180 million. Costs associated with the offering of approximately \$5,438,664 were charged against the proceeds received. The Trust used the net proceeds of the offering to partially pay down the then existing indebtedness and to purchase additional senior loans. Preferred Shares pay dividends based on a rate set at auctions, normally held every 7 days. In most instances dividends are also payable every 7 days, on the first

business day following the end of the rate period.

NOTE 8 - CUSTODIAL AGREEMENT

State Street Bank and Trust Company ("SSB") serves as the Trust's custodian and recordkeeper. Custody fees paid to SSB are reduced by earnings credits based on the cash balances held by SSB for the Trust. There were no earnings credits for the nine months ended November 30, 2004.

NOTE 9 - SUBORDINATED LOANS AND UNSECURED LOANS

The Trust may invest in subordinated loans and in unsecured loans. The primary risk arising from investing in subordinated loans or in unsecured loans is the potential loss in the event of default by the issuer of the loans. The Trust may acquire a subordinated loan only if, at the time of acquisition, it acquires or holds a senior loan from the same borrower. The Trust will acquire unsecured loans only where the Investment Manager believes, at the time of acquisition, that the Trust would have the right to payment upon default that is not subordinate to any other creditor. The Trust may invest up to 5% of its total assets, measured at the time of investment, in subordinated loans and unsecured loans. As of November 30, 2004, the Trust held 0.48% of its total assets in subordinated loans and unsecured loans.

ING Prime Rate Trust

NOTES TO FINANCIAL STATEMENTS as of November 30, 2004 (Unaudited) (continued)

NOTE 10 - FEDERAL INCOME TAXES

Federal excise tax of \$117,314 was paid by the Fund and subsequently reimbursed by the investment advisor. The amount of distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States of America for investment companies. These book/tax differences may be either temporary or permanent. Permanent differences are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences are not reclassified. Key differences include the treatment of short-term capital gains and wash sale deferrals. Distributions in excess of net investment income and/or net realized capital gains for tax purposes are reported as distributions of paid-in capital.

Dividends paid by the Trust from net investment income and distributions of net realized short-term capital gains are, for federal income tax purposes, taxable as ordinary income to shareholders.

The tax composition of dividends and distributions to shareholders was as follows:

Nine Months Ended November 30, 2004		Year Ended February 29, 2004	
Ordinary Income		Ordinary Income	
\$	49,219,341	\$	62,849,228

The tax-basis components of distributable earnings and the expiration dates of the capital loss carryforwards which may be used to offset future realized capital gains for federal income tax purposes as of February 29, 2004 were as follows:

Undistributed Ordinary Income	Undistributed Long-Term Capital Gains	Unrealized Depreciation	Post-October Capital Losses Deferred	Capital Loss Carryforwards	Expiration Dates
\$ 8,429,077	\$ -	\$ (6,655,665)	\$ (15,388,435)	\$ (12,542,170)	2006

SHAREHOLDER INVESTMENT PROGRAM

The Trust offers a Shareholder Investment Program (the "Program," formerly known as the Dividend Reinvestment and Cash Purchase Plan) which allows holders of the Trust's common shares a simple way to reinvest dividends and capital gains distributions, if any, in additional common shares of the Trust. The Program also offers holders of the Trust's common shares the ability to make optional cash investments in any amount from \$100 to \$100,000 on a monthly basis.

For dividend reinvestment purposes, DST Systems, Inc. will purchase shares of the Trust on the open market when the market price plus estimated commissions is less than the net asset value on the valuation date. The Trust will issue new shares for dividend reinvestment purchases when the market price plus estimated commissions is equal to or exceeds the net asset value on the valuation date. New shares may be issued at the greater of (i) net asset value or (ii) the market price of the shares during the pricing period, minus a discount of 5%.

For optional cash investments, shares will be purchased on the open market by the DST Systems, Inc. when the market price plus estimated commissions is less than the net asset value on the valuation date. New shares will be issued by the Trust for optional cash investments when the market price plus estimated commissions is equal to or exceeds the net asset value on the valuation date. Such shares will be issued at a discount to market, determined by the Trust, between 0% and 5%.

There is no charge to participate in the Program. Participants may elect to discontinue participation in the Program at any time. Participants will share, on a pro rata basis, in the fees or expenses of any shares acquired in the open market.

Participation in the Program is not automatic. If you would like to receive more information about the Program or if you desire to participate, please contact your broker or the Trust's Shareholder Services Department at (800) 992-0180.
