ARCADIS OPENS LANDFILL GAS PLANT AND ANNOUNCES ADDITIONAL CAPACITY

ARNHEM, The Netherlands January 28, 2008 ARCADIS (EURONEXT: ARCAD), the international consultancy, design and engineering company, today announced the official opening of the Sao Joao landfill gas installation and power plant by the mayor of Sao Paulo, Gilberto Kassab. The degassing installation - owned by ARCADIS affiliate BIOGAS - extracts methane gas generated by the 80 hectares São João landfill. The methane gas is used as fuel to feed the 24 megawatt power plant which operation was started on January 25th as part of the celebration of the 454 years of the city of São Paulo. In addition, ARCADIS announced the development of a third land fill gas installation near Rio de Janeiro. This installation (Gramacho) is based on the same principle and similar in capacity to São João.

Together, the São João and Bandeirantes landfill methane gas output is used to generate 340 million Kwh of electricity annually, sufficient power for more than 120,000 households. As a result, the equivalent of 12 million tons of CO2 will be saved in the coming years, which according to the Kyoto Treaty, gets the joint venture 12 million carbon credits. Half of these are shared with the Municipality of São Paulo. Of the remaining 6 million carbon credits that are for BIOGAS, a contract for the sale of 5 million of these credits was already signed with the German bank KfW until 2012. Once Gramacho is accredited under the Kyoto protocol, it will generate carbon credits for which BIOGAS can again seek long term contract buyers.

Harrie Noy, CEO of ARCADIS: These innovative projects underline our commitment to contribute to a healthier world climate. As a world leader in environmental consultancy, we assist many municipalities and companies in reducing their carbon footprint, but the scale at which this happens in the land fill gas installations is especially impressive. According to UNFCCC information about 80% of the total of carbon credits issued so far for landfill projects has been derived from the Bandeirantes Project. São João and Gramacho will add soon to further increase these significant contributions.

ARCADIS is an international company providing consultancy, engineering and management services in infrastructure, environment and facilities, to enhance mobility, sustainability and quality of life. ARCADIS develops, designs, implements, maintains and operates projects for companies and governments. With more than 12,000 employees and over \$ 2 billion in gross revenue, the company has an extensive
