Part I

Item 1. Business

Morningstar is a leading provider of independent investment research to investors around the world. Since our founding in 1984, our mission has been to create great products that help investors reach their financial goals. We offer an extensive line of data, software, and research products for individual investors, financial advisors, and institutional clients through our Investment Information segment. We also provide asset management services for advisors, institutions, and retirement plan participants through our Investment Management segment. In addition to our U.S.-based products and services, we offer local versions of our products designed for investors in Asia, Australia, Canada, Europe, and South Africa. Morningstar serves approximately 7.4 million individual investors, 270,000 financial advisors, and 4,300 institutional clients. We have operations in 26 countries.

We maintain a series of comprehensive databases on many types of investments, focusing on investment vehicles that are widely used by investors globally. After building these databases, we add value and insight to the data by applying our core skills of research, technology, and design. As of December 31, 2010, we provided extensive data on approximately 380,000 investments, including:

- 21,900 mutual fund share classes in the United States;
- 105,200 mutual funds and similar vehicles in international markets;
- 4,900 exchange-traded funds (ETFs);
- 2,600 closed-end funds;
- 29,500 stocks;
- 11,300 hedge funds;
- 8,200 separate accounts and collective investment trusts;
- 118,900 variable annuity/life subaccounts and policies;
- 51,600 insurance, pension, and life funds;
- 12,800 unit investment trusts;
- 4,400 state-sponsored college savings plan portfolios (commonly known as Section 529 College Savings Plans);
- 84 years of capital markets data capturing performance of several major asset classes;
- Extensive cash flow, ownership, and biographical data on directors and officers;
- Real-time market data on more than 4 million exchange-traded equities, derivatives, commodities, futures, foreign exchanges, precious metals, news, company fundamentals, and analytics; and
- Real-time price quotes for global foreign currencies.

Our business model is based on leveraging our investments in these databases by selling a wide variety of products and services to individual investors, financial advisors, and institutions around the world.

Our data and proprietary analytical tools such as the Morningstar Rating for mutual funds, which rates past performance based on risk- and cost-adjusted returns, and the Morningstar Style Box, which provides a visual summary of a mutual fund's underlying investment style, have become important tools that millions of investors and advisors use in making investment decisions. We've created other tools, such as the Ownership Zone, Sector Delta, and Market Barometer, which allow investors to see how different investments work together to form a portfolio and to track its progress. We developed a popular Portfolio X-Ray tool that helps investors reduce risk and understand the key characteristics of their portfolios based on nine different factors.

We offer a variety of qualitative measures such as Stewardship Grades, which help investors identify companies and funds that have demonstrated a high level of commitment to shareholders and stewardship of investors' capital. We also offer qualitative research and ratings on mutual funds based in Europe, Asia, and Australia; closed-end funds; 529 plans; target-date funds, and stocks.

Since 1998, we've expanded our research efforts on individual stocks and have worked to popularize the concepts of economic moat, a measure of competitive advantage originally developed by Warren Buffett; and margin of safety, which reflects the size of the discount in a stock's price relative to its estimated value. The Morningstar Rating for stocks is based on the stock's current price relative to our analyst-generated fair value estimates, as well as the company's level of business risk and economic moat.

In 2009, we began publishing credit ratings and associated research on corporate debt issuers. We currently provide ratings on more than 720 companies and also provide research and ratings on commercial mortgage-backed securities.

We've also developed in-depth advice on security selection and portfolio building to meet the needs of investors looking for integrated portfolio solutions. We believe many investors rely on these tools because they offer a useful framework for comparing potential investments and making decisions. Our independence and our history of innovation make us a trusted resource for investors.

Growth Strategies

In keeping with our mission, we are pursuing five key growth strategies, which we describe below. We review our growth strategies on a regular basis and refine them to reflect changes in our business.

1. *Enhance our position in each of our key market segments by focusing on our three major Internet-based platforms.*

We believe that individual investors, financial advisors, and institutional clients increasingly want integrated solutions as opposed to using different research tools for different parts of their portfolios. To help meet this need, our strategy is to focus our product offerings on our three major platforms:

- Morningstar.com for individual investors;
- Morningstar Advisor Workstation for financial advisors; and
- Morningstar Direct for institutional professionals.

These products all include integrated research and portfolio tools, allowing investors to use our proprietary information and analysis across multiple security types. With each platform, we believe we can continue expanding our reach with our current audience, as well as extending to reach new market segments.

With Morningstar.com, we're continuing to expand the range of content and market updates on the site, including third-party content. We've also been focusing on mobile development and social networking, as well as expanding data and functionality to increase the site's value to both registered users and Premium members. With Advisor Workstation, we plan to build on our large installed base by expanding our mid- and back-office capabilities, improving the product's interface and design, and integrating real-time data and other functionality. With Morningstar Direct, we're pursuing an aggressive development program to provide data

Edgar Filing: Morningstar, Inc. - Form 10-K

and analysis on securities and investments around the world. We re adding third-party data and content and enhancing our technology to allow the product to function as a purely web-based solution. We also plan to expand into new global markets, enhance our capabilities in portfolio management and accounting, and significantly increase the amount of equity research content and functionality.

2. *Create a premier global investment database.*

Our goal is to continue building or acquiring new databases for additional types of investments, including various types of funds outside the United States and other widely used investment products.

As detailed on page 2, we currently provide extensive data on nearly 380,000 investments globally, including managed investment products, individual securities, capital markets data, real-time stock quotes from nearly all of the world's major stock exchanges, and a live data feed that covers exchange-traded equities, derivatives, commodities, futures, foreign exchanges, precious metals, news, company fundamentals, and analytics.

Our data is the foundation for all of the products and services we offer. We focus on proprietary, value-added data, such as our comprehensive data on current and historical portfolio holdings for mutual funds and variable annuities. Within each database, we continuously update our data to maintain timeliness and expand the depth and breadth of coverage. Our strategy is to continuously expand our databases, focusing on investment products that are widely used by large numbers of investors. In particular, we're focusing on expanding our fundamental equity data. We also strive to establish our databases as the pre-eminent choice for individual investors, financial advisors, and institutional clients around the world, as well as continuing to invest in world-class data quality, processing, and delivery.

Over the past several years, we've developed a series of proprietary indexes based on our investment data. The Morningstar Indexes are rooted in our proprietary research and can be used for precise asset allocation and benchmarking and as tools for portfolio construction and market analysis. We've expanded the range of indexes we offer over the past three years and are working to expand our index business globally.

3. *Continue building thought leadership in independent investment research.*

We believe that our leadership position in independent investment research offers a competitive advantage that would be difficult for competitors to replicate. Our goal is to continue producing investment insights that empower investors and focus our research efforts in four major areas:

- *Extend leadership position in fund research to additional markets outside the United States.* Over the past several years, we have expanded our analyst coverage in fund markets outside of the United States. We've built an integrated team of locally based fund experts to expand our research coverage in additional markets around the world. As of December 31, 2010, we had nearly 100 fund analysts globally, including teams in North America, Europe, Asia, and Australia. We currently produce qualitative analyst research on more than 1,500 funds outside the United States.
- *Continue leveraging our capabilities in stocks.* Our equity research complements our approach to mutual fund analysis, where we focus on analyzing the individual stocks that make up each fund's portfolio. As of December 31, 2010, we provided analyst research on approximately 2,300 companies globally.

Edgar Filing: Morningstar, Inc. - Form 10-K

We're committed to maintaining the broad, high-quality coverage we've become known for as one of the largest providers of independent equity research. We're working to expand distribution of our equity research through a variety of channels, including through financial advisors, buy-side firms, and companies outside of the United States. We believe that investors' increasing awareness of the value of independent research will strengthen our business over the long term. We've also expanded our proprietary stock database, which we view as an important complement to our analyst research.

- *Build business in fixed-income credit research.* We began publishing research and ratings on corporate credit issuers in December 2009 and currently produce research and ratings on more than 720 corporate credit issuers. In 2010, we entered into our first credit research agreement with a major financial services firm to provide credit ratings and research to its 18,000 financial advisors. We view credit ratings as a natural extension of the equity research we've been producing for the past decade. We believe we have a unique viewpoint to offer on company default risk that leverages our cash-flow modeling expertise, proprietary measures like economic moat, and in-depth knowledge of the companies and industries we cover.

We're including this research on our three major software platforms to provide investors with an additional perspective on fixed-income investments. We also plan to monetize the ratings through subscriptions to our institutional equity research clients, who have access to the forecasts, models, and scores underlying the ratings.

We also expanded our fixed-income capabilities with our May 2010 acquisition of Realpoint, a Nationally Recognized Statistical Rating Organization (NRSRO) that specializes in structured finance. Realpoint currently covers commercial mortgage-backed securities and plans to introduce research on residential mortgage-backed securities (RMBS) in 2011. We believe investors are looking for better research and analytics on RMBS and that we're well-positioned to meet this need.

- *Enhance our retirement-income capabilities.* As the baby boom generation approaches retirement, we believe investors will need more information to help them manage income during retirement, including tools focusing on retirement-income planning and long-term savings strategies. During 2010, our Ibbotson Associates subsidiary continued its work on adding longevity protection (through the use of variable annuities) to investors' retirement portfolios. Ibbotson also rolled out a new target-date fund with one of its clients that incorporates annuities and is the first consultant to work on creating this type of product. We also expanded our analyst research on target-date and target-risk portfolios in 2010. We've developed several other retirement income tools and services through Morningstar Advisor Workstation and our Investment Consulting area, and we plan to incorporate additional retirement income tools and services in other products over the next several years.

4. *Become a global leader in fund-of-funds investment management.*

The large number of managed investment products available has made assembling them into well-constructed portfolios a difficult task for many investors. Consequently, fund-of-funds offerings have seen strong growth within the mutual fund, variable annuity, and hedge fund industries. Cerulli Associates estimates that global multimanager assets—including publicly offered funds that invest in other funds as well as investment vehicles managed by multiple subadvisors—totalled approximately \$1.7 trillion in 2010. We believe assembling and evaluating funds of funds is a natural extension of our expertise in understanding managed investment products.

Our fund-of-funds programs combine managed investment vehicles—typically mutual funds—in portfolios designed to help investors meet their financial goals. When we create portfolios made up of other funds, our goal is to simplify the investment process and help investors access portfolios that match their level of risk tolerance, time horizon, and long-term investment objectives. We draw on our extensive experience analyzing funds and combine quantitative research with a qualitative assessment of manager skill and investment style.

In April 2010, we expanded our investment management business by acquiring Old Broad Street Research Ltd, a premier provider of fund research, ratings, and investment consulting services in the United Kingdom. In July 2010, we acquired Seeds Group, a leading provider of investment consulting services and fund research in France.

We had a total of \$107.2 billion in assets under advisement in our Investment Consulting business as of December 31, 2010. Our consulting business focuses on relationships and agreements where we act as a portfolio construction manager or asset allocation program designer for a mutual fund or variable annuity and receive a basis-point fee. We plan to continue building this business by expanding to reach new markets outside of the United States, expanding our capabilities in areas such as alternative investment strategies, developing more ways to incorporate risk protection and insurance, expanding to reach additional client segments, and focusing on performance and client support. In 2011, we plan to focus on unifying our Investment Consulting capabilities and operations to offer our clients the best combination of solutions and capabilities.

We also offer managed retirement account services through our Retirement Advice platform, which includes Morningstar Retirement Manager and Advice by Ibbotson, and had \$19.6 billion in assets under management in our managed retirement accounts as of December 31, 2010. We offer these services for retirement plan participants who choose to delegate management of their portfolios to our managed account programs, which are quantitative systems that select investment options and make retirement planning choices for the participants. We believe retirement plan participants will continue to adopt managed accounts because of the complexity involved in retirement planning. We also plan to focus on unifying our Retirement Advice capabilities and operations in 2011 to offer our clients the best combination of solutions and capabilities.

Morningstar Managed Portfolios is a fee-based discretionary asset management service that includes a series of mutual fund, exchange-traded fund, and stock portfolios tailored to meet specific investment time horizons and risk levels. As of December 31, 2010, we had \$2.7 billion in assets under management invested with Morningstar Managed Portfolios.

5. *Expand our international brand presence, products, and services.*

Our operations outside of the United States generated \$157.1 million in revenue in 2010 compared with \$129.2 million in 2009 and represent an increasing percentage of our consolidated revenue. Our strategy is to expand our non-U.S. operations (either organically or through acquisitions) to meet the increasing demand for wide-ranging, independent investment insight by investors around the globe. Because more than half of the world's investable assets are located outside of the United States, we believe there are significant opportunities for us. Our strategy is to focus our non-U.S. sales efforts on our major products, including Morningstar Advisor Workstation and Morningstar Direct, as well as opportunities such as real-time data, qualitative investment research and ratings, investment indexes, and consulting. We also plan to explore new regions, such as Latin America, Eastern Europe, and the Middle East; continue expanding our databases to be locally and globally comprehensive; introduce new products in markets where we already have operations; and expand our sales and product support infrastructure around the world.

Acquisitions

Historically, the majority of our long-term revenue growth has been driven by organic growth as we've introduced new products and services and expanded our marketing efforts for existing products. However, we have made and expect to continue making selective acquisitions that support our five growth strategies. In reviewing potential acquisitions, we focus on transactions that:

- offer a good strategic fit with our mission of creating great products that help investors reach their financial goals;
- help us build our proprietary investment databases, research capabilities, technical expertise, or customer base faster and more cost effectively than we could if we built them ourselves; and
- offer a good cultural fit with our entrepreneurial spirit and brand leadership.

We paid approximately \$102.3 million for seven acquisitions in 2010, as summarized in the table below.

Acquisition	Description	Date of Acquisition	Purchase Price*
Footnoted business of Financial Fingerprint Inc.	Footnoted is a highly regarded blog for professional money managers, analysts, and sophisticated individual investors. Footnoted Pro, a service for institutional investors, provides insight on actionable items and trends in SEC filings.	February 1, 2010	Not separately disclosed
Aegis Equities Research	A leading provider of independent equity research in Sydney, Australia.	April 1, 2010	\$10.7 million
Old Broad Street Research Ltd.	A premier provider of fund research, ratings, and investment consulting services in the United Kingdom.	April 12, 2010	\$16.8 million
Realpoint, LLC	An NRSRO that specializes in structured finance.	May 3, 2010	\$38.3 million in cash and 199,174 shares of restricted stock (valued at approximately \$10 million as of the date the acquisition was announced in March 2010)
Morningstar Danmark A/S	Acquisition of the 75% ownership interest not previously owned by Morningstar, bringing our ownership to 100%.	July 1, 2010	\$14.6 million
Seeds Group	A leading provider of investment consulting services and fund research in France.	July 1, 2010	Not separately disclosed
Annuity intelligence business of Advanced Sales and Marketing Corporation	A web-based service that leverages a proprietary database of more than 1,000 variable annuities that includes plain-English translations of complex but important information found in prospectuses and other public filings.	November 1, 2010	\$14.1 million

*Total purchase price less cash acquired.

For information about our previous acquisitions, refer to Note 7 of the Notes to our Consolidated Financial Statements.

Business Segments, Products, and Services

We operate our business in two segments:

- Investment Information, which includes all of our data, software, and research products and services. These products are typically sold through subscriptions or license agreements; and
- Investment Management, which includes all of our asset management operations, which operate as registered investment advisors and earn more than half of their revenue from asset-based fees.

The table below shows our revenue by business segment for each of the past three years:

Revenue by Segment (\$000)	2010		2009		2008	
	Amount	%	Amount	%	Amount	%
Investment Information	\$ 444,957	80.1%	\$ 386,642	80.7%	\$ 390,693	77.8%
Investment Management	110,394	19.9	92,354	19.3	111,764	22.2
Consolidated revenue	\$ 555,351	100.0%	\$ 478,996	100.0%	\$ 502,457	100.0%

For information on segment operating income (loss) and total assets, refer to Note 5 of the Notes to our Consolidated Financial Statements.

Investment Information

The largest products in this segment based on revenue are Licensed Data, a set of investment data spanning all of our investment databases, including real-time pricing data, and available through electronic data feeds; Morningstar Advisor Workstation, a web-based investment planning system for independent financial advisors as well as advisors affiliated with larger firms; Morningstar.com, which includes both Premium Memberships and Internet advertising sales; Morningstar Direct, a web-based institutional research platform; and Morningstar Site Builder and Licensed Tools, services that help institutional clients build customized websites or enhance their existing sites with Morningstar's online tools and components.

The Investment Information segment also includes Logical Information Machines, Inc. (LIM), an analytical software service we acquired at the end of 2009 that aggregates financial and energy data from a large number of sources. LIM delivers a

Edgar Filing: Morningstar, Inc. - Form 10-K

comprehensive, real-time solution for research, analysis, and trading for institutional clients and lets clients query these multiple data sets simultaneously. The majority of LIM's clients are in the energy and commodities industries.

Other major products within the Investment Information segment include equity and credit research, fund research, Realpoint's research on commercial mortgage-backed securities, and our Enterprise Data Management business, which helps institutions outsource certain business operations to Morningstar, including creating investment profiles, aggregating account data, performance reporting, and consolidating and managing data feeds from multiple sources.

We also offer a variety of financial communications materials, real-time data and desktop software, investment software for financial advisors and institutions, and investment indexes, as well as several print and online publications.

In 2010, 31.8% of Investment Information segment revenue was from outside of the United States.

Edgar Filing: Morningstar, Inc. - Form 10-K

Most of our products for individual investors target investors who are actively involved in the investing process and want to take charge of their own investment decisions. We also reach individuals who want to learn more about investing and investors who seek out third-party sources to validate the advice they receive from brokers or financial planners.

We sell our advisor-related products both directly to independent financial advisors and through enterprise licenses, which allow financial advisors associated with the licensing enterprise to use our products. Our institutional clients include banks, brokerage firms, insurance companies, mutual fund companies, media outlets, and retirement plan sponsors and providers. We also have data reselling agreements with third-party providers of investment tools and applications, allowing us to increase the distribution of our data with minimal additional cost.

We believe the Investment Information segment has a modest amount of seasonality. We've historically had higher revenue in the second quarter because we hold an investment conference then. Other products in this segment generally have not shown marked seasonality.

Our largest customer in the Investment Information segment made up approximately 2% of segment revenue in 2010.

Licensed Data

Our Licensed Data service gives institutions access to a full range of proprietary investment data spanning numerous investment databases, including real-time pricing data. We offer data packages of proprietary statistics, such as the Morningstar Style Box and Morningstar Rating, and a wide range of other data, including information on investment performance, risk, portfolios, operations data, fees and expenses, cash flows, and ownership. Institutions can use Licensed Data in a variety of investor communications, including websites, print publications, and marketing fact sheets, as well as for internal research and product development. We deliver Licensed Data through electronic data feeds and provide daily updates to clients. Pricing for Licensed Data is based on the number of funds or other securities covered, the amount of information provided for each security, and the level of distribution.

In 2010, we launched a new client-facing data delivery platform and introduced other tools to facilitate clients' access to the most current data. We also reduced our data file delivery times and globalized our Essentials platform by adding qualitative fund ratings and data on European hedge funds.

For Licensed Data, our primary competitors are Bloomberg, Europerformance, FactSet Research Systems, Financial Express, Interactive Data Corporation, Standard & Poor's, and Thomson Reuters.

Licensed Data was our largest product in 2010 and accounted for 17.7%, 19.1%, and 15.6% of our consolidated revenue in 2010, 2009, and 2008, respectively.

Morningstar Advisor Workstation

Morningstar Advisor Workstation, a web-based investment planning system, provides financial advisors with a comprehensive set of tools for conducting their core business including investment research, planning, and presentations. It allows advisors to build and maintain a client portfolio database that can be fully integrated with the firm's back-office technology and resources. Moreover, it helps advisors create customized reports for client portfolios that combine mutual funds, stocks, separate accounts, variable annuity/life subaccounts, ETFs, hedge funds, closed-end funds, 529 plans, offshore funds, and pension and life funds.

Edgar Filing: Morningstar, Inc. - Form 10-K

As of December 31, 2010, about 153,000 advisors in the United States were licensed to use Advisor Workstation, which is available in two versions: Morningstar Office (formerly Advisor Workstation Office Edition) for independent financial advisors and a configurable enterprise version for financial advisors affiliated with larger firms. The enterprise version includes four core modules: Clients & Portfolios, Research, Sales/Hypotheticals, and Planning. We also offer a variety of other applications, including tools for defined contribution plans; Morningstar Retirement Income Strategist, a financial planning application that helps advisors create retirement income plans for their clients; Morningstar Portfolio Builder, which helps advisors quickly produce sound client portfolios; Morningstar Annuity Analyzer, which helps advisors screen and analyze variable annuity contracts and subaccounts; and Morningstar Hypothetical Illustrator, which helps advisors create sales illustrations. These applications can be purchased as stand-alone products or combined as part of a full Workstation license.

Pricing for Morningstar Advisor Workstation varies based on the number of users, as well as the level of functionality offered. We typically charge about \$3,100 per licensed user for a base configuration of Morningstar Advisor Workstation, but pricing varies significantly based on the scope of the license. For clients who purchase more limited tools-only licenses, the price per user is substantially less. We generally charge \$5,700 per user for an annual license for Morningstar Office.

In 2010, we launched Morningstar Advisor Workstation 2.0, a new platform that incorporates significant technology upgrades along with interface and usability improvements. It also incorporates file-sharing capabilities to allow financial advisors to work collaboratively with their peers, either within a group office or across multiple offices. With Morningstar Office, we introduced a new Report Studio that allows advisors to create custom performance reports and launched a rebalancing and trade optimizer.

Major competitors for Morningstar Advisor Workstation and Morningstar Office include Advent Software, ASI, EISI, eMoney Advisor, Junxure, MoneyGuide Pro, Standard & Poor's, SunGard, and Thomson Reuters.

Morningstar Advisor Workstation is our third-largest product based on revenue and made up 12.5%, 13.7%, and 12.8% of our consolidated revenue in 2010, 2009, and 2008, respectively.

Edgar Filing: Morningstar, Inc. - Form 10-K

Morningstar.com

Our largest website for individual investors is Morningstar.com in the United States, which includes both Premium Membership revenue (which made up about two-thirds of Morningstar.com's revenue base in 2010) and Internet advertising sales (which made up the remaining one-third). As of December 31, 2010, the free membership services offered through Morningstar.com had more than 7.3 million registered users worldwide, who have access to comprehensive data on stocks, mutual funds, exchange-traded funds, closed-end funds, 529 plans, commodities, options, bonds, and other investments to help them conduct research and track performance. In addition, Morningstar.com features extensive market data, articles, proprietary portfolio tools, and educational content to help investors of all levels access timely, relevant investment information. Morningstar.com also includes Portfolio X-Ray, which helps investors reduce risk and understand key characteristics of their portfolios, and a variety of other portfolio tools.

We also offer more than 40 regional investing websites customized to the needs of investors worldwide. Many of these sites feature coverage in local languages with tools and commentary tailored to specific markets. We recently launched new sites in Chile, Indonesia, Israel, and the Philippines.

We use our free content as a gateway into paid Premium Membership, which includes access to written analyst reports on more than 1,500 stocks, 1,900 mutual funds, and 350 exchange-traded funds, as well as Analyst Picks and Pans, Stewardship Grades, and Premium Stock and Fund Screeners. We currently offer Premium Membership services in Australia, Canada, China, the United Kingdom, and the United States.

In 2010, we introduced a new Portfolio Monitor report that helps Premium members benchmark their portfolios and track progress toward their goals. We also added earnings conference call transcripts; additional information and ratings on 529 plans; new mobile applications for iPhone, BlackBerry, and Android devices; and a new Premium service for investors in Canada.

Morningstar.com competes with the personal finance websites of AOL Money & Finance, Google Finance, Marketwatch.com, The Motley Fool, MSN Money, Seeking Alpha, TheStreet.com, Yahoo! Finance, and The Wall Street Journal Online.

As of December 31, 2010, we had 138,732 paid Premium subscribers for Morningstar.com in the United States plus an additional 17,000 paid Premium subscribers in Australia, Canada, China, and the United Kingdom. We currently charge \$20.95 for a monthly subscription, \$185 for an annual subscription, \$309 for a two-year subscription, and \$409 for a three-year subscription for Morningstar.com's Premium service in the United States. We also sell advertising space on Morningstar.com.

Morningstar.com (including local versions outside of the United States) is one of our five largest products based on revenue and accounted for 8.9% of our consolidated revenue in 2010, compared with 8.2% in 2009 and 9.1% in 2008.

Morningstar Direct

Morningstar Direct is a web-based institutional research platform that provides advanced research on the complete range of securities in Morningstar's global database. This comprehensive research platform allows research and marketing professionals to conduct advanced performance comparisons and in-depth analyses of a portfolio's underlying investment style. Morningstar Direct includes access to numerous investment universes, including U.S. mutual funds; European and offshore funds; funds based in most major markets around the world; stocks; separate accounts; hedge funds; closed-end funds; exchange-traded funds; global equity ownership data; variable annuity and life portfolios; and market indexes.

In 2010, we made several key enhancements to Morningstar Direct, including automated importing of portfolio and account data; improved reports on U.S. stocks, open-end funds, and closed-end funds; enhanced reports for Presentation Studio and performance attribution; a new global fund manager database; and a new entitlement system for accessing third-party content. We also added new reports on 529 college savings plans, optional access to QuoteSpeed 2.0 for real-time quote data and market monitoring, selected firm-level data for private equities, and additional data points on stocks and funds. We introduced local language versions of Morningstar Direct in France, Japan, and Korea in 2010 and plan to launch additional versions in Germany and Spain in 2011.

For Morningstar Direct, our primary competitors are eVestment Alliance, FactSet Research Systems, Markov Processes International, Strategic Insight, Thomson Reuters, and Zephyr Associates in the United States, and FactSet Research Systems, Financial Express, Markov Processes International, Style Research, and Thomson Reuters in non-U.S. markets.

Morningstar Direct had 4,773 licensed users worldwide as of December 31, 2010.

Pricing for Morningstar Direct is based on the number of licenses purchased. We charge \$17,000 for the first user, \$10,500 for the second user, and \$8,500 for each additional user.

Morningstar Direct is one of our five largest products based on revenue and accounted for 6.9%, 6.3%, and 5.0% of our consolidated revenue in 2010, 2009, and 2008, respectively.

Morningstar Site Builder and Licensed Tools

Morningstar Site Builder and Licensed Tools are services that help institutional clients build customized websites or enhance their existing sites with Morningstar's online tools and components. In the United States, we offer Morningstar Site Builder, a set of integrated tools, content, and reports that investment firms can use to build or enhance websites for financial advisors and individual investors. We offer an extensive set of online tools and editorial content that institutional clients can license to use in their websites and software products. Outside of the United States, we offer Licensed Tools, which can be customized with capabilities for regional markets, multiple languages, and local currencies. Site Builder and Licensed Tools can be customized to analyze a set of investments, focus on client-defined data points, or perform calculations required by specific products or services. We also offer licenses for investment research, editorial content, and portfolio analysis tools. Morningstar Site Builder and Licensed Tools can be integrated with a client's existing website and allow users to drill down into the underlying data when researching a potential investment.

In 2010, we added several new tools to the Site Builder suite, including a Sales Support Station, a packaged collection of Site Builder tools created specifically for wholesalers and sales support teams; the Portfolio Planner Advanced tool, which delivers a simple asset allocation and portfolio construction workflow; and a Correlation Analyzer tool, which allows users to search for investments that are either positively or negatively correlated with a given index, investment, or portfolio.

For Licensed Tools outside the United States, we expanded the range of equity tools that we offer to clients, including equity reports, a stock screener, and information on market movers. We also added tools covering market indexes, exchange rates, commodities, and interest rates. We enhanced our tools for investment types including exchange-traded funds, closed-end funds, and hedge funds, including real-time pricing updates for exchange-listed products. Finally, we deployed an international version of Portfolio Planner that allows financial advisors to quickly assess a client's risk profile and match it with either a model portfolio or a self-constructed portfolio.

Competitors for Morningstar Site Builder and Licensed Tools include ASI, Financial Express, Interactive Data Corporation, Standard & Poor's, Thomson Reuters, and Wall Street on Demand.

Pricing for Morningstar Site Builder and Licensed Tools depends on the audience, the level of distribution, and the scope of information and functionality licensed.

Morningstar Principia

Principia is our CD-ROM-based investment research and planning software for financial planners and had 32,681 subscriptions as of December 31, 2010. The modules offered in Principia provide data on mutual funds, ETFs, stocks, separate accounts, variable annuity/life subaccounts, closed-end funds, asset allocation, hypotheticals, presentations and education, and defined contribution plans. Each module is available separately or together and features searching, screening, and ranking tools. Principia allows advisors to create integrated portfolios for clients and offers three-page Portfolio Snapshot reports that provide a comprehensive picture of the client's portfolio. The Snapshot report shows overall style and sector weightings as well as the cumulative exposure to individual stocks. The Snapshot report is among those approved by the National Association of Securities Dealers for financial advisors to distribute and review with their clients.

In 2010, we added batch reporting and client-level report functionality to Principia and further integrated the CAMS (Client Account Manager Service) functionality with other Principia modules. We also increased the percentage of subscribers receiving electronic delivery to 30%, reducing our fulfillment costs and giving clients more timely access to the most recent updates.

Principia prices generally range from approximately \$730 per year for monthly updates on one investment database to \$3,345 per year for monthly updates on the complete package spanning all investment universes, or \$7,535 for all investment universes plus additional modules for asset allocation, defined contribution plans, and portfolio management.

Major competitors for Principia include Standard & Poor's and Thomson Reuters.

LIM

We acquired LIM, a leading provider of data and analytics for the energy, financial, and agriculture sectors, at the end of 2009. LIM is a pioneer in providing market pricing data, securities reference data, historical event data, predictive analytics, and advanced data management solutions that help customers manage large sets of time-series data. LIM collects, unifies, and conducts quality assurance on data from more than 200 data sources in the energy, financial, and agriculture sectors and provides clients with one central source for data intelligence and analysis. Clients can also use LIM's tools to analyze their own proprietary data. LIM's clients include some of the world's largest asset managers, banks, oil companies, power and natural gas trading firms, utilities, risk managers, and agriculture and commodities trading firms.

In 2010, we added a new web-based interface to make it easier for clients to access the most timely data, as well as a tool to facilitate data analysis through Microsoft Excel. Our vision for LIM is to build the leading global energy and commodity information marketplace. Over the next several years, we plan to continue enhancing LIM's platform to leverage its data warehouse and maximize data accessibility. In addition, we believe LIM complements our core data and software businesses and provides a new distribution channel for Morningstar. We plan to continue exploring ways to leverage LIM's data, technology, and delivery capabilities to enhance other Morningstar products.

Edgar Filing: Morningstar, Inc. - Form 10-K

Pricing for LIM is customized by client depending on the number of users, the type of data accessed, the number of data sources used, and the size of the data sets.

Major competitors for LIM include DataGenic, GlobalView, Sungard FAME, Ventex, and ZE Power.

Newsletters and Other Publications

We offer a variety of print and electronic publications about investing. Some of these include *Morningstar Mutual Funds*, a reference publication that features our signature one-page reports on approximately 1,500 mutual funds; *Morningstar FundInvestor*, a monthly newsletter that provides information and insight on 500 of the most popular mutual funds and a list of 150 Analyst Picks; *Morningstar StockInvestor*, a monthly newsletter that focuses on companies with strong competitive positions and stock prices that we believe are low enough to provide investors with a margin of safety; *Morningstar ETFInvestor*, a monthly newsletter with specific investment ideas, recommendations, model portfolios, and data on exchange-traded funds; and the *Ibbotson Stocks, Bonds, Bills, and Inflation Yearbook*, a definitive study of historical capital markets data in the United States. In addition, we offer several other investment newsletters and a series of books about investing and personal finance, which are available directly from us and in bookstores.

In 2011, we plan to develop a newsletter application for the new iPad platform with the goal of attracting new users, especially younger ones, and providing a new source of revenue through application fees, subscription fees, and/or advertising sales. We plan to begin by delivering newsletter content via an iPad application for *Morningstar StockInvestor* and plan to roll out similar capabilities for other newsletters throughout 2011.

Our print publications compete primarily with Agora Publishing, *Forbes*, InvestorPlace Media, The Motley Fool, and Value Line.

Morningstar Equity Research

As of December 31, 2010, we offered independent equity research on approximately 2,300 companies globally. Our approach to stock analysis focuses on long-term fundamentals. Our analysts evaluate companies by assessing each firm's competitive advantage, analyzing the level of business risk, and completing an in-depth projection of future cash flows. For the companies we cover, our analysts prepare a fair value estimate, a Morningstar Rating for stocks, a rating for business risk, and an assessment of the company's economic moat. Economic moat is a concept originally developed by Warren Buffett that describes a company's competitive advantage relative to other companies. For the remaining stocks included in our database, we offer quantitative grades for growth, profitability, and financial health, as well as an explanation of the company's business operations. We currently deliver our equity research to individual investors as part of our Premium Membership service on Morningstar.com, as well as to several other companies who provide our research to their affiliated financial advisors or to individual investors.

We currently provide analyst reports on virtually all of the most widely held stocks in the S&P 500 index, as well as numerous companies included in other major indexes. We had approximately 117 equity and credit analysts around the world as of December 31, 2010, compared with 108 as of December 31, 2009.

In 2010, we rolled out an expanded research format for our institutional clients, including more in-depth analysis of the company's economic moat, scenario analysis, and capital structure, as well as our analysts' specific multi-year forecasts for dozens of operating and financial metrics.

Edgar Filing: Morningstar, Inc. - Form 10-K

We also initiated credit ratings on nearly 600 firms, bringing our total to more than 720, including banks, insurers, and REITs, and rolled out detailed credit analyses for most of these. The research is aimed at institutions and advisors, and includes a monthly credit Best Ideas list, weekly Credit Update, and detailed credit research reports.

Edgar Filing: Morningstar, Inc. - Form 10-K

Our Equity Research services compete with The Applied Finance Group, Credit Suisse HOLT, Renaissance Capital, Standard & Poor's, Value Line, Zacks Investment Research, and several smaller research firms. Competitors for our credit research include Credit Sights, Egan-Jones, Fitch, Gimme Credit, Moody's, and Standard & Poor's.

Pricing for Morningstar Equity and Credit Research varies based on the level of distribution, the number of securities covered, the amount of custom coverage required, and the length of the contract term.

Realpoint

Acquired by Morningstar in May 2010, Realpoint is an NRSRO specializing in structured finance. It offers securities ratings, research, surveillance services, and data to help institutional investors identify risk in commercial mortgage-backed securities (CMBS). Realpoint rates new-issue securities by analyzing the individual loan, loan portfolio, and issuing trust. It publishes comprehensive pre-sale reports that include ratings for each class of the transaction, required subordination levels, detailed underwriting of 100% of the assets in the pool, and an in-depth asset summary for every property in the transaction. Realpoint secured ratings assignments on five of the 16 CMBS transactions that came to market in 2010.

On the surveillance side, Realpoint has one of the industry's largest databases of commercial mortgage-backed securities, including ratings and analysis on more than 10,000 CMBS securities and the loans and properties securing them. Realpoint publishes DealView credit reports on more than 600 CMBS transactions and updates its analysis and forecasts monthly.

In late 2010, Realpoint began the process of building a team of market experts to develop a presence in residential mortgage-backed securities (RMBS) an area with significantly higher underlying collateral than the CMBS market. This team has built the foundation for modeling expected loss for RMBS, and we expect to bring a surveillance product to the RMBS market in 2011.

Realpoint competes with several other firms, including DBRS, Fitch, Moody's, and Standard & Poor's.

Realpoint primarily charges license-based fees for CMBS surveillance ratings and analysis, which are paid for by the user. For new-issue ratings, it charges asset-based fees that are paid by the issuer on the rated balance of the transaction.

Morningstar Indexes

We offer an extensive set of investment indexes that can be used to benchmark the market and create investment products. Our index family includes a series of U.S. equity indexes that track the U.S. market by capitalization, sector, and investment style; a dividend index; a focused stock index capturing performance of wide moat stocks with the most attractive valuations; a series of bond indexes that track the U.S. market by sector and term structure; global bond and equity indexes; commodity indexes; and asset allocation indexes. Investment firms can license the Morningstar Indexes to create investment vehicles, including mutual

Edgar Filing: Morningstar, Inc. - Form 10-K

funds, ETFs, and derivative securities. We charge licensing fees for the Morningstar Indexes, with fees consisting of an annual licensing fee as well as fees linked to assets under management.

We currently license the Morningstar Indexes to several institutions that offer exchange-traded funds or exchange-traded notes based on the indexes, including BlackRock, First Trust, HSBC, Merrill Lynch (a subsidiary of Bank of America), and Scottrade.

In 2010, we introduced new indexes focusing on futures, commodities, sector and industry groups, and master limited partnerships. We believe we are the only index provider that offers indexes spanning all asset categories, which allows us to develop indexes that blend various asset classes.

Key competitors for the Morningstar Indexes include BarCap Bond, Dow Jones, Markit, MSCI, Russell Investments, and Standard & Poor's.

Investment Management Segment

The largest products and services in this segment based on revenue are Investment Consulting, which focuses on investment monitoring and asset allocation for funds of funds, including mutual funds and variable annuities; Retirement Advice, including the Morningstar Retirement Manager and Advice by Ibbotson platforms; and Morningstar Managed Portfolios, a fee-based discretionary asset management service that includes a series of mutual fund, exchange-traded fund, and stock portfolios tailored to meet a range of investment time horizons and risk levels that financial advisors can use for their clients' taxable and tax-deferred accounts.

Our client base in this segment includes banks, brokerage firms, insurance companies, mutual fund companies, and retirement plan sponsors and providers. We currently offer investment management services in the United States, Europe, Asia, and Australia. Our license agreements in the Investment Management segment have an average contract term of approximately three years, although some of our agreements allow for early termination.

About 14.2% of Investment Management segment revenue was from outside the United States in 2010.

Many of our largest customers are insurance companies, including variable annuity providers, followed by mutual fund companies and other asset management firms, retirement plan sponsors and providers, broker-dealers, and banks. We plan to develop additional distribution channels to reach other client types, including foundations and endowments, defined contribution plans, defined benefit plans, and wealth management firms. We also expect to continue expanding our Investment Management business outside the United States.

For Morningstar Managed Portfolios, our target audience consists of home offices of insurance companies, broker-dealers, and registered investment advisors, as well as independent financial advisors.

We market our Investment Management services almost exclusively through our institutional sales team, which includes both strategic account managers and more specialized sales representatives. We employ a consultative sales approach and often tailor customized solutions to meet the needs of larger institutions. We have a regional sales team responsible for expanding relationships for Morningstar Managed Portfolios.

Edgar Filing: Morningstar, Inc. - Form 10-K

We believe our institutional clients value our independence, breadth of information, and customized services; in addition, we believe our research, tools, and advice reach many individual investors through this channel. We also reach approximately 2,100 financial advisors through our Managed Portfolios platform.

The Investment Management segment has not historically shown seasonal business trends; however, business results for this segment are typically more variable because of our emphasis on asset-based fees, which change along with market movements and other factors.

Our largest customer in the Investment Management segment made up approximately 18% of segment revenue in 2010.

Investment Consulting

Our Investment Consulting area provides a broad range of services, many of which emphasize investment monitoring and asset allocation for funds of funds, including mutual funds and variable annuities. We offer Investment Consulting services through Morningstar Associates, LLC, Morningstar Associates Europe, Ltd, Ibbotson Associates, Inc., Ibbotson Advisors, LLC, Ibbotson Associates Australia Limited, Morningstar Denmark, OBSR Advisory Services Limited, and Seeds Finance, SA, which are registered investment advisors and wholly owned subsidiaries of Morningstar, Inc. We plan to combine some of the capabilities offered by these units during 2011 to simplify our product lineup and offer clients the best combination of products and solutions to meet their needs. We emphasize contracts where we are paid a percentage of assets under management for ongoing investment management and consulting, as opposed to one-time relationships where we are paid a flat fee.

Our investment professionals evaluate investment plans, recommend strategies, help set investment policies, develop asset allocation programs, construct portfolios, and monitor ongoing performance. The group focuses on customized solutions that improve the investor experience and help our clients build their businesses. We offer these consulting services to clients in the United States, Asia, Australia, Canada, and Europe, including insurance companies, investment management companies, mutual fund companies, and broker-dealers. We also provide services for retirement plan sponsors and providers, including developing plan lineups, creating investment policy statements, and monitoring investment performance.

Our team of investment consultants draws on both quantitative research tools and qualitative expertise to assess investment programs, provide detailed analysis of performance and portfolio characteristics, and make comprehensive recommendations for improvement. We also offer investment manager search services. Our staff combines the depth of Morningstar's historical fundamental databases with detailed investment knowledge and investment experience to recommend qualified candidates for subadvisory firms, mutual fund managers, variable insurance trust managers, and separate account managers. Our investment monitoring services include analyst reports, customizable board reports, select lists, watch lists, and in-depth attribution analysis.

In early 2010, Morningstar Associates announced an agreement with Pax World Funds to create and manage a series of four asset allocation portfolios featuring investment managers who incorporate environmental, social, and governance issues in their investment process.

Morningstar Associates also launched a strategic relationship with a major online broker to provide asset-allocation services and model portfolios of mutual funds and ETFs for its advisory platform. In addition, Morningstar Associates introduced a new variable-annuity fund-of-funds program with a key client in 2010, representing approximately \$39 billion in assets as of December 31, 2010.

Ibbotson Associates, which we acquired in 2006, has a well-established consulting business that began in 1977. Ibbotson's Investment Consulting unit is a leading authority on asset allocation and draws on its knowledge of capital markets and portfolio building to construct portfolios from the top down, starting at the asset class level. Ibbotson develops customized asset allocation programs for mutual fund firms, banks, broker-dealers, and insurance companies.

Ibbotson provides a range of consulting services, including licensing its asset allocation models, providing consulting services, and acting as a portfolio subadvisor. Ibbotson works with different types of investment options, including mutual funds, variable annuities, and ETFs, and provides both strategic and dynamic asset allocation services. The group offers consulting services and

Edgar Filing: Morningstar, Inc. - Form 10-K

fund-of-funds subadvisory services, as well as tailored model portfolios, fund classification schemes, and questionnaire design.

Edgar Filing: Morningstar, Inc. - Form 10-K

In 2010, Ibbotson Associates launched a lifetime financial advice solution that combines annuities as part of investors' portfolios over time for a new client in Hong Kong; expanded its target-maturity portfolio construction services to additional large-plan sponsors; incorporated an analysis of statistically unlikely (aka "fat tail") events in its risk tolerance questionnaire; further developed global tactical asset allocation methodologies for a select number of clients; and introduced a new alternative investment strategy ETF.

To help retirement plan sponsors meet their fiduciary duties, Ibbotson developed a website specifically for its plan sponsor consulting services. The site helps plan sponsors gather the data and information they need to meet their fiduciary responsibilities.

We expanded our Investment Consulting business outside the United States with two acquisitions in 2010: Old Broad Street Research Ltd. in the United Kingdom and Seeds Group in France. In 2009, we acquired Intech Pty Ltd, a leading provider of multimanager and investment portfolio solutions in Sydney, Australia. We rebranded Intech under the Ibbotson name in February 2010.

Our Investment Consulting business competes primarily with Mercer, Mesirow Financial, Russell Investments, Watson Wyatt, and Wilshire Associates, as well as some smaller firms in the retirement consulting business and various in-house providers of investment advisory services.

Pricing for the consulting services we provide through Morningstar Associates and Ibbotson Associates is based on the scope of work and the level of service required. In the majority of our contracts, we receive asset-based fees, reflecting our work as a portfolio construction manager or subadvisor for a mutual fund or variable annuity.

Investment Consulting was our second-largest product based on revenue in 2010 and accounted for 13.1%, 13.1%, and 15.2% of our consolidated revenue in 2010, 2009, and 2008, respectively.

Retirement Advice

We have two Retirement Advice offerings that help retirement plan participants plan and invest for retirement: Morningstar Retirement Manager (offered by Morningstar Associates) and Advice by Ibbotson (offered by Ibbotson Associates). We plan to combine some of their capabilities during 2011 to simplify our product lineup and offer clients the best combination of products and solutions to meet their needs.

Morningstar Retirement Manager is designed to help retirement plan participants determine how much to invest and which investments are most appropriate for their portfolios. It gives guidance explaining whether participants' suggested plans are on target to meet their retirement goals. As part of this service, we deliver personalized recommendations for a target savings goal, a recommended contribution rate to help achieve that goal, a portfolio mix based on risk tolerance, and specific fund recommendations. Morningstar Retirement Manager includes a managed account service designed for plan participants who choose to delegate management of their portfolios to Morningstar's investment professionals. We offer these services both through retirement plan providers (typically third-party asset management companies that offer proprietary mutual funds) and directly to

Edgar Filing: Morningstar, Inc. - Form 10-K

plan sponsors (employers that offer retirement plans to their employees).

In 2010, we enhanced the Retirement Manager interface to make it easier for participants to enter information. We also expanded Retirement Manager to provide advisory services to individuals who are in retirement and redesigned our personalized retirement strategy report to make it more engaging to participants.

Edgar Filing: Morningstar, Inc. - Form 10-K

As of December 31, 2010, approximately 13.4 million plan participants had access to Morningstar Retirement Manager through approximately 82,000 plan sponsors and 16 plan providers. Pricing for Morningstar Retirement Manager depends on the number of participants, as well as the level of service we provide.

Advice by Ibbotson offers a set of services and proprietary software to give retirement plan participants access to investment education, self-service advice, and managed retirement accounts. We offer these services both through retirement plan providers and directly to plan sponsors. The platform includes installed software advice solutions that can be co-branded by retirement plan sponsors and providers. Advice by Ibbotson combines asset allocation and patented human capital methodologies that help participants determine how to prepare for retirement based on their financial assets as well as their future earnings and savings power. Advice by Ibbotson's customized software can be integrated with existing systems to help investors accumulate wealth, transition into retirement, and manage income during retirement.

In 2010, Ibbotson Associates expanded its target-maturity portfolio construction service with several additional plan sponsors. Ibbotson also integrated its Lifetime Advice Methodology into a new advisory wrap program for advisors and institutions. The program offers fund selection, asset allocation, and product allocation advice (including life insurance, immediate payout annuities, and tax-deferred annuities with guaranteed minimum withdrawal benefits).

In addition, Ibbotson added new capabilities to the Ibbotson Wealth Forecasting Engine and the Advice by Ibbotson program to quantitatively determine the best investment choice among pre-tax deferred accounts, post-tax deferred accounts, and taxable accounts. For example, Ibbotson can now advise an investor to invest in a Roth 401(k) account versus a pre-tax 401(k) account. It also enhanced the Ibbotson Wealth Forecasting Engine to accommodate the local United Kingdom tax code, pension rules, mortality expectations, and regulatory rules.

As of December 31, 2010, approximately 10.1 million plan participants had access to Advice by Ibbotson through approximately 68,000 plan sponsors and seven plan providers. Pricing for Advice by Ibbotson depends on the number of participants, as well as the level of service we provide.

In the retirement advice market, we compete primarily with Financial Engines, Guided Choice, and ProManage.

Morningstar Managed Portfolios

The Morningstar Managed Portfolios program is offered through Morningstar Investment Services, Inc., a registered investment advisor, registered broker-dealer, member of the Financial Industry Regulatory Authority, Inc. (FINRA), and wholly owned subsidiary of Morningstar, Inc.

Morningstar Managed Portfolios is a fee-based discretionary asset management service that includes a series of mutual fund, ETF, and stock portfolios tailored to meet specific investment time horizons and risk levels. This program is only available through financial advisors. Our team of investment professionals uses a disciplined process for asset allocation, fund selection, and portfolio construction. They actively monitor the portfolios and make adjustments as needed. We complement these asset

Edgar Filing: Morningstar, Inc. - Form 10-K

management services with online client-management functions such as risk profiling and access to client statements, transaction capabilities, and performance reports.

We had approximately \$2.7 billion in assets under management with about 2,100 financial advisors using the service as of December 31, 2010. We charge asset-based fees for Morningstar Managed Portfolios. The management fee is based on a tiered schedule that depends on the client's average daily portfolio balance. Fees for our mutual fund and exchange-traded fund portfolios generally range from 30 to 40 basis points. We charge 55 basis points for the Select Stock Baskets, which are a managed account service consisting of individually customized stock portfolios based on Morningstar's proprietary indexes and independent equity research.

In 2010, Morningstar Investment Services introduced a new Strategist Series portfolio designed to track the Morningstar Wide Moat Focus Index. The portfolio invests in the 20 most undervalued wide moat stocks in Morningstar's coverage universe. Morningstar Investment Services also added a Client Review Packet feature, a Roth IRA Conversion Calculator, and re-engineered its client risk-profiling questionnaire and recommendations engine.

For Morningstar Managed Portfolios, our primary competitors are Brinker Capital, Envestnet PMC, FundQuest, SEI Investments, and Symmetry Partners.

Marketing and Sales

We promote our print, software, web-based products and services, and consulting services with a staff of sales and marketing professionals, as well as an in-house public relations team. Our marketing staff includes both product specialists and a corporate marketing group that manages company initiatives. Our sales team includes several strategic account managers who oversee all aspects of our largest institutional client relationships. We also have a sales operations staff, which focuses on tracking and forecasting sales and other tasks to support our sales team. Across our business, we emphasize high levels of product support to help our customers use our products effectively and provide our product managers with feedback from customers. We had approximately 520 sales and marketing professionals on staff as of December 31, 2010.

International Operations

We conduct our business operations outside of the United States, which have been increasing as a percentage of our consolidated revenue, through wholly owned or majority-owned operating subsidiaries doing business in each of the following countries: Australia, Brazil, Canada, Chile, Denmark, France, Germany, India, Italy, Japan, Korea, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, People's Republic of China (both Hong Kong and the mainland), Singapore, South Africa, Spain, Switzerland, Taiwan, Thailand, and the United Kingdom. See Note 5 of the Notes to our Consolidated Financial Statements for additional information concerning revenue from customers and long-lived assets from our business operations outside the United States.

In addition, we hold minority ownership positions in operating companies based in Japan and Sweden. As of December 31, 2010, we owned a minority ownership position (approximately 34% of the outstanding shares) in Morningstar Japan K.K. (MJKK) and our share had a market value of approximately \$38.4 million. MJKK is publicly traded under ticker 4765 on the Osaka Stock Exchange Hercules Market. See Note 8 of the Notes to our Consolidated Financial Statements for information on our investments in unconsolidated entities.

Edgar Filing: Morningstar, Inc. - Form 10-K

To enable these companies to do business in their designated territories, we provide them with the rights to the Morningstar name and logo and with access to certain of our products and technology. Each company is responsible for developing marketing plans tailored to meet the specific needs of investors within its country and working with Morningstar's data collection and development centers to create and maintain databases, develop new products, and enhance existing products.

See Item 1A Risk Factors for a discussion of the risks related to our business operations outside of the United States.

Intellectual Property and Other Proprietary Rights

We treat our brand, product names and logos, software, technology, databases, and other products as proprietary. We try to protect this intellectual property by using trademark, copyright, patent and trade secrets laws; licensing and nondisclosure arrangements; and other security measures. For example, in the normal course of business, we only provide our intellectual property to third parties through standard licensing agreements. We use these agreements to define the extent and duration of any third-party usage rights and provide for our continued ownership in any intellectual property furnished.

Because of the value of our brand name and logo, we have tried to register one or both of them in all of the relevant international classes under the trademark laws of most of the jurisdictions in which we maintain operating companies. As we move into new countries, we consider adding to these registrations. In some jurisdictions, we also register certain product identifiers. We have registered our name and/or logo in numerous countries and the European Union and have applied for registrations in several other countries.

Morningstar and the Morningstar logo are registered marks of Morningstar in the United States and in certain other jurisdictions. The table below includes some of the trademarks and service marks that we use:

In addition to trademarks, we currently hold several patents in the United States, United Kingdom, and Canada. We believe these patents represent our commitment to developing innovative products and tools for investors.

License Agreements

In the majority of our licensing agreements, we license our products and/or other intellectual property to our customers for a fee. We generally use our standard agreements, whether in paper or electronic form, and we do not provide our products and services to customers or other users without having an agreement in place.

We maintain licensing agreements with our minority-owned operations. We put these agreements in place so these companies can use our intellectual property, such as our products and trademarks, to develop and market similar products under our name in their operating territories.

In the ordinary course of our business, we obtain and use intellectual property from a wide variety of sources. We license some of this intellectual property from third parties and obtain other portions of it directly from public filings.

Seasonality

We believe our business has a modest amount of seasonality. Some of our smaller products, such as the *Ibbotson Stocks, Bonds, Bills, and Inflation Yearbook* and one of our investment conferences, generate the majority of their revenue in the first or second quarter of the year. Most of our products are sold with subscription or license terms of at least one year, though, and we recognize revenue ratably over the term of each subscription or license agreement. This tends to moderate seasonality in sales patterns for individual products.

We believe market movements generally have more influence on our performance than seasonality. The amount of revenue we earn from asset-based fees depends on the value of assets on which we provide advisory services, and the size of our asset base can increase or decrease along with trends in market performance.

Largest Customer

In 2010, our largest customer accounted for less than 5% of our consolidated revenue.

Competitive Landscape

The economic and financial information industry has been marked by increased consolidation over the past five years, with the strongest players generally gaining market share at the expense of smaller competitors. Some of our major competitors include Thomson Reuters; Standard & Poor's, a division of The McGraw-Hill Companies; Bloomberg; and Yahoo!. These companies have

Edgar Filing: Morningstar, Inc. - Form 10-K

financial resources that are significantly greater than ours. We also have a number of smaller competitors in our two business segments, which we discuss in Business Segments, Products, and Services above.

We believe the most important competitive factors in our industry are brand and reputation, data accuracy and quality, breadth of data coverage, quality of investment analysis and analytics, design, product reliability, and value of the products and services provided.

Research and Development

A key aspect of our growth strategy is to expand our investment research capabilities and enhance our existing products and services. We strive to rapidly adopt new technology that can improve our products and services. We have a flexible technology platform that allows our products to work together across a full range of investment databases, delivery formats, and market segments. As a general practice, we manage our own websites and build our own software rather than relying on outside vendors. This allows us to control our development and better manage costs, enabling us to respond quickly to market changes and to meet customer needs efficiently. As of December 31, 2010, our technology team consisted of approximately 800 programmers and technology and infrastructure professionals.

In 2010, 2009, and 2008 our development expense represented 8.9%, 8.0%, and 8.0%, respectively, of our revenue. We expect that development expense will continue to represent a meaningful percentage of our revenue in the future.

Government Regulation

United States

Edgar Filing: Morningstar, Inc. - Form 10-K

Investment advisory and broker-dealer businesses are subject to extensive regulation in the United States at both the federal and state level, as well as by self-regulatory organizations. Financial services companies are among the nation's most extensively regulated. The SEC is responsible for enforcing the federal securities laws and oversees federally registered investment advisors and broker-dealers.

Edgar Filing: Morningstar, Inc. - Form 10-K

As of December 31, 2010, four of our subsidiaries, Ibbotson Associates, Inc., Ibbotson Associates Advisors, LLC, Morningstar Associates, LLC, and Morningstar Investment Services, Inc. are registered as investment advisors with the SEC under the Investment Advisers Act of 1940, as amended (Advisers Act). As registered investment advisors, these companies are subject to the requirements and regulations of the Advisers Act. Such requirements relate to, among other things, record-keeping, reporting, and standards of care, as well as general anti-fraud prohibitions.

In addition, because these four subsidiaries provide investment advisory services to retirement plans and their participants, they may be acting as fiduciaries under the Employee Retirement Income Security Act of 1974 (ERISA). As fiduciaries under ERISA, they have duties of loyalty and prudence, as well as duties to diversify investments and to follow plan documents to comply with the applicable portions of ERISA.

Morningstar Investment Services is a broker-dealer registered under the Securities Exchange Act of 1934 (Exchange Act) and a member of FINRA. The regulation of broker-dealers has, to a large extent, been delegated by the federal securities laws to self-regulatory organizations, including FINRA. Subject to approval by the SEC, FINRA adopts rules that govern its members. FINRA conducts periodic examinations of the operations of Morningstar Investment Services. Broker-dealers are subject to regulations that cover all aspects of the securities business, including sales, capital structure, record-keeping, and the conduct of directors, officers, and employees. Violation of applicable regulations can result in the revocation of a broker-dealer license, the imposition of censures or fines, and the suspension or expulsion of a firm or its officers or employees. Morningstar Investment Services is subject to certain net capital requirements under the Exchange Act. The net capital requirements, which specify minimum net capital levels for registered broker-dealers, are designed to measure the financial soundness and liquidity of broker-dealers.

Realpoint, LLC, one of our subsidiaries, is an NRSRO specializing in structured finance. As an NRSRO, Realpoint is subject to the requirements and regulations under the Exchange Act. Such requirements relate to, among other things, record-keeping, reporting, governance, and conflicts of interest.

Australia

Our subsidiaries that provide financial information services and advice in Australia, Morningstar Australasia Pty Limited and Ibbotson Associates Australia, must hold an Australian Financial Services License and submit to the jurisdiction of the Australian Securities and Investments Commission (ASIC). This license requires them to, among other things, maintain positive net asset levels and sufficient cash resources to cover three months of expenses and to comply with the audit requirements of the ASIC.

United Kingdom

Morningstar Associates Europe Limited and OBSR Advisory Services Limited are authorized and regulated by the U.K. Financial Services Authority as an investment advisor. As authorized firms, these companies are subject to the requirements and regulations of the Financial Services Authority. Such requirements relate to, among other things, financial reporting and other reporting obligations, record-keeping, and cross-border requirements.

Edgar Filing: Morningstar, Inc. - Form 10-K

Additional legislation and regulations, including those relating to the activities of investment advisors and broker-dealers, changes in rules imposed by the SEC or other U.S. or non-U.S. regulatory authorities and self-regulatory organizations, or changes in the interpretation or enforcement of existing laws and rules may adversely affect our business and profitability. Our businesses may be materially affected not only by regulations applicable to it as an investment advisor or broker-dealer, but also by regulations that apply to companies generally.

Other Regions

We have a variety of other entities (in Japan, Korea, Thailand, and France) that are registered with their respective regulatory bodies; however, the amount of business conducted by these entities related to the registration is relatively small.

Employees

We had approximately 3,225 employees as of December 31, 2010, including approximately 600 data analysts, 65 designers, 320 investment analysts (including consulting and quantitative research analysts), 820 programmers and technology staff, and 520 sales and marketing professionals. Our employees are not represented by any unions, and we have never experienced a walkout or strike.

Executive Officers

As of February 28, 2011, we had 10 executive officers. The table below summarizes information about each of these officers.

Name	Age	Position
Joe Mansueto	54	Chairman, Chief Executive Officer, and Director
Chris Boruff	45	President, Software Division
Peng Chen	39	President, Investment Management Division
Scott Cooley	42	Chief Financial Officer
Bevin Desmond	44	President, International Operations and Global Human Resources
Catherine Gillis Odelbo	48	President, Equity and Credit Research
Elizabeth Kirscher	46	President, Data Division
Don Phillips	48	President, Fund Research and Managing Director
Richard Robbins	48	General Counsel and Corporate Secretary
David W. Williams	50	Managing Director, Design

Joe Mansueto

Joe Mansueto founded Morningstar in 1984. He has served as our chairman since our inception and as our chief executive officer from our inception to 1996 and from 2000 to the present. He holds a bachelor's degree in business administration from The University of Chicago and a master's degree in business administration from The University of Chicago Booth School of Business.

Chris Boruff

Chris Boruff has been president of Morningstar's Software division since January 2009. He is responsible for overseeing strategy, development, and distribution of technology products for individual investors, financial advisors, and institutions, as well as custom solutions for institutions. He joined us in 1996 as product manager for Principia, and from 1997 to 1998, he served as senior product manager of advisor products. From 1999 to 2000, he served as vice president of advisor products, where he was responsible for all marketing related to financial advisors. From 2000 to 2009, he was president of Morningstar's advisor software business. He holds a bachelor's degree in economics and psychology from Northwestern University.

Peng Chen

Peng Chen was named president of Morningstar's global Investment Management division in November 2010. He is responsible for overseeing the company's investment consulting, retirement advice, and investment management operations in North America, Europe, Asia, and Australia, including Morningstar Associates, Ibbotson Associates, Morningstar Investment Services, Old Broad Street Research, and Seeds Group. Prior to Morningstar's acquisition of Ibbotson Associates in 2006, he served as Ibbotson's managing director and chief investment officer. He joined Ibbotson in 1997 and played a key role in the development of its investment consulting and 401(k) advice/managed retirement account services. He served as president of Ibbotson Associates, a registered investment advisor and wholly owned subsidiary of Morningstar, from August 2006 until November 2010. He received a bachelor's degree in industrial management engineering from Harbin Institute of Technology and master's and doctorate degrees in consumer economics from The Ohio State University.

Scott Cooley

Scott Cooley has been our chief financial officer since August 2007. Before joining Morningstar in 1996 as a stock analyst, he was a bank examiner for the Federal Deposit Insurance Corporation (FDIC), where he focused on credit analysis and asset-backed securities. From 1996 until 2003, he was an analyst, editor, and manager for Morningstar.com, *Morningstar Mutual Funds*, and other Morningstar publications. He became CEO of Morningstar Australia and Morningstar New Zealand in 2003 and served as co-CEO of these operations following our acquisition of Aspect Huntley in July 2006. He holds a bachelor's degree in economics and social science and a master's degree in history from Illinois State University.

Bevin Desmond

Bevin Desmond has been president of international operations and global human resources for Morningstar since January 2009. She is responsible for identifying and developing our business in new markets, managing and directing operations, launching new products, and overseeing human resources functions for all of Morningstar's global operations. She joined us in 1993 and was one of three employees who started our international business. From 1998 to 2000, she served as manager of all international ventures. From 2000 to 2009, she was president of Morningstar's international business. She has also served as president of institutional software. She holds a bachelor's degree in psychology from St. Mary's College.

Catherine Gillis Odelbo

Catherine Gillis Odelbo is president of equity and credit research for Morningstar, responsible for Morningstar's equity and credit research, financial communications and publications, and Morningstar Indexes. She joined us in 1988 as a mutual fund analyst and from 1999 to 2000 served as senior vice president of content development for the company, as well as publisher and editor of our stock and closed-end fund research. She was president of our Individual segment from 2000 through 2008 and became president of our equity research business in 2009. She holds a bachelor's degree in American history from The University of Chicago and a master's degree in business administration from The University of Chicago Booth School of Business.

Elizabeth Kirscher

Elizabeth Kirscher is president of Morningstar's Data division, responsible for managing the company's investment databases and related products. She joined us in 1995 as a major accounts manager in our institutional sales area. From 1998 to 1999, she served as international product manager and worked on the launch of Morningstar Japan. From 1999 to 2000, she was director of sales and business development for Morningstar.com and marketed Morningstar.com data and tools to other websites. She holds a bachelor's degree from Vassar College and a master's degree in business administration from the Columbia Business School at Columbia University.

Don Phillips

Don Phillips has been a managing director since 2000 and in 2009 took on additional responsibilities as president of fund research. He is responsible for overseeing our research on mutual funds, exchange-traded funds, and alternative investments. He joined us in 1986 as our first mutual fund analyst. He served as our vice president and publisher from 1991 to 1996, as our president from 1996 to 1998, and as our chief executive officer from 1998 to 2000. He has served on our board of directors since August 1999. He also serves on the board of directors for Morningstar Japan. He holds a bachelor's degree from the University of Texas and a master's degree from The University of Chicago.

Richard Robbins

Richard Robbins has been our general counsel and corporate secretary since August 2005. He is responsible for directing Morningstar's legal department and managing our relationships with outside counsel. From May 1999 until he joined Morningstar, he was a partner at Sidley Austin Brown & Wood LLP (now Sidley Austin LLP), which he joined as an associate in August 1991. He holds bachelor's and master's degrees in computer science and electrical engineering from the Massachusetts Institute of Technology and a juris doctor degree from The University of Chicago Law School.

David W. Williams

David W. Williams has been one of our managing directors since 2000. He is in charge of design and its application to brand identity, products, communications, and the workplace. He joined us in 1993 and has been instrumental in establishing design as one of our recognized core capabilities. He holds a bachelor's degree in industrial design from The Ohio State University and a master's degree in fine arts from the Yale University School of Art.

Company Information

We were incorporated in Illinois on May 16, 1984. Our corporate headquarters are located at 22 West Washington Street, Chicago, Illinois, 60602.

Edgar Filing: Morningstar, Inc. - Form 10-K

We maintain a website at <http://corporate.morningstar.com>. Our Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to any of these documents are available free of charge on this site as soon as reasonably practicable after the reports are filed with or furnished to the SEC. We also post quarterly press releases on our financial results and other documents containing additional information related to our company on this site. We provide this website and the information contained in or connected to it for informational purposes only. That information is not part of this Annual Report on Form 10-K.

1A. Risk Factors

You should carefully consider the risks described below and all of the other information included in this Form 10-K when deciding whether to invest in our common stock or otherwise evaluating our business. If any of the following risks materialize, our business, financial condition, or operating results could suffer. In this case, the trading price of our common stock could decline, and you may lose all or part of your investment.

Failing to maintain and protect our brand, independence, and reputation may harm our business. Our reputation and business may also be harmed by allegations made about possible conflicts of interest.

We believe that independence is at the core of our business, and our reputation is our greatest corporate asset. We offer products and services to our institutional clients, which include banks, brokerage firms, insurance companies, mutual fund companies, media outlets, and retirement plan providers and sponsors. Our institutional clients have generated a significant percentage of our consolidated revenue in recent years. We provide ratings, analyst research, and investment recommendations on mutual funds and other investment products offered and securities issued by our institutional clients. We also provide investment advisory and investment management services. The fact that our institutional clients pay us for certain products and services, as well as the fact that in some cases we make investment recommendations within the framework of client constraints, may create the perception that our ratings, research, and recommendations are not impartial.

This perception may undermine the confidence of our customers and potential customers in our reputation as a provider of independent research. Any such loss of confidence or damage to our reputation could hurt our business.

Any failure to uphold our high ethical standards and ensure that our customers have a consistently positive experience with us (either intentionally or inadvertently) could damage our reputation as an objective, honest, and credible source for investment research and information.

Our reputation may also be harmed by factors outside of our control, such as news reports about our clients or adverse publicity about certain investment products.

Downturns in the financial sector, global financial markets, and global economy may adversely impact our business.

Although market conditions improved in 2009 and 2010, we believe that ongoing economic weakness continues to cause uncertainty and pressure on consumer discretionary spending. The financial crisis of 2007 and 2008 also led to spending cutbacks among asset management firms and other financial services companies, which make up a large percentage of our client base. Some institutional clients also implemented additional review processes for new contracts or began to provide certain services, particularly investment advisory services, in-house rather than hiring external service providers.

Edgar Filing: Morningstar, Inc. - Form 10-K

If financial markets around the world experience negative performance and volatility, demand for our products and services may decline, and our revenue, operating income, and other financial results could suffer. Our business results may also be impacted by negative trends in Internet advertising sales. The financial markets and many businesses operating in the financial services industry are highly volatile and are affected by factors, such as U.S. and foreign economic conditions and general trends in business and finance, which are beyond our control.

Our revenue from asset-based fees may be impacted by market declines as well as the impact of cash outflows.

In 2010, revenue from asset-based fees made up approximately 12% of our consolidated revenue and a greater percentage of our operating income. The amount of revenue we earn from asset-based fees depends on the value of assets on which we provide advisory services, and the size of our asset base can increase or decrease along with trends in market performance. The value of assets under advisement may show substantial declines during periods of significant market volatility. The size of these portfolios can also be affected if net inflows into the portfolios on which we provide investment advisory services drop or if these portfolios experience redemptions. If the level of assets on which we provide investment advisory services goes down, we expect that our fee-based revenue will show a corresponding decline.

Our investment advisory operations may subject us to liability for any losses that result from a breach of our fiduciary duties.

Our investment advisory operations involve fiduciary obligations that require us to act in the best interests of our clients. We may face liabilities for actual or claimed breaches of our fiduciary duties, particularly in areas where we provide retirement advice and managed retirement accounts. We may not be able to prevent clients from taking legal action against us for an actual or claimed breach of a fiduciary duty. Because we provided investment advisory services on more than \$107.2 billion in assets as of December 31, 2010, we could face substantial liabilities if we breach our fiduciary duties.

In addition, we may face other legal liabilities based on the quality and outcome of our investment advisory recommendations, even in the absence of an actual or claimed breach of fiduciary duty.

Changes in laws applicable to our investment advisory operations, compliance failures, or regulatory action could adversely affect our business.

Our investment advisory operations are a growing part of our overall business. Our acquisitions of Ibbotson Associates in 2006 and Intech Pty Ltd in 2009 substantially increased our business in this area. We also expanded our investment advisory operations with our recent acquisitions of Old Broad Street Research Ltd. in the United Kingdom and Seeds Group in France. The securities laws and other laws that govern our activities as a registered investment advisor are complex. The activities of our investment advisory operations are primarily subject to provisions of the Investment Advisers Act of 1940 (the Advisers Act) and the Employee Retirement Income Security Act of 1974 (ERISA). In addition, our investment management business is conducted through a broker-dealer registered under the Securities Exchange Act of 1934 (the Exchange Act) and is subject to the rules of FINRA.

We also provide investment advisory services in other areas around the world, and our operations may be subject to additional regulations in markets outside the United States. It is difficult to predict the future impact of the broad and expanding legislative and regulatory requirements affecting our business. The laws, rules, and regulations applicable to our business may change in the future, and we may not be able to comply with any such changes. If we fail to comply with any applicable law, rule, or regulation, we could be fined, sanctioned, or barred from providing investment advisory services in the future, which could materially adversely affect our business, operating results, or financial condition.

The increasing concentration of data and development work carried out at our offshore facilities may have a negative impact on our business operations, products, and services.

We now have approximately 820 employees working in our data and technology development center in Shenzhen, China, or about one-fourth of our total workforce. Over the past several years, we have moved a significant percentage of our data collection and development operations to this location. Because China has a restrictive government under centralized control, we cannot predict the level of political and regulatory risk that may affect our operations. The concentration of development and data work carried out at this facility also involves operational risks for our network infrastructure. Any difficulties that we face in successfully maintaining our development center in China may harm our business and have a negative impact on the products and services we provide, particularly because of our increasing reliance on this facility.

We have approximately 270 employees who work at our data collection facilities in Mumbai and New Delhi, India, which may also be subject to political and regulatory risk. Like the Shenzhen operation, these facilities also involve operational risks for our network infrastructure.

Failing to differentiate our products and continuously create innovative, proprietary research tools may negatively impact our competitive position and business results.

We attribute much of our company's success over the past 25 years to our ability to develop innovative, proprietary research tools. We cannot guarantee that we will continue to successfully develop new product features and tools that differentiate our product offerings from those of our competitors. If tools similar to Morningstar's proprietary tools become more broadly available through other channels, our competitive position and business results may suffer.

Failing to successfully integrate acquisitions could harm our business.

We've completed numerous acquisitions over the past three years, including seven acquisitions in 2010. We cannot guarantee that we will successfully integrate the employees, product lines, business systems, marketing and branding, or other operations following any acquisition. We expect to continue making acquisitions and establishing investments and joint ventures as part of our long-term business strategy. Acquisitions, investments, and joint ventures involve a number of risks. They can be time-consuming and may divert management's attention from day-to-day operations, particularly if numerous acquisitions are in process at the same time. Financing an acquisition could result in dilution to our shareholders from the issuance of equity securities, reduce our financial flexibility because of reductions in our cash balance, or result in a weaker balance sheet from incurring debt.

Acquisitions might also result in losing key employees. We may fail to successfully complete an acquisition, investment, or joint venture. We may also fail to generate enough revenue or profits from an acquisition to earn a return on the associated purchase price.

Our operations outside of the United States are expanding and involve additional challenges that we may not be able to meet.

Our operations outside of the United States have expanded to \$157.1 million in revenue in 2010 from \$129.2 million in 2009. Several of our recent acquisitions have added to our business operations in Europe, Australia, and other areas outside the United States, and we recently established a business presence in Latin America. There are risks inherent in doing business outside the United States, including challenges in reaching new markets because of established competitors and limited brand recognition; difficulties in staffing, managing, and integrating non-U.S. operations; difficulties in coordinating and sharing information globally; differences in laws and policies from country to country; exposure to varying legal standards, including intellectual property protection laws; potential tax exposure related to transfer pricing and other issues; heightened risk of fraud and noncompliance; and currency exchange rates and exchange controls. These risks could hamper our ability to expand around the world, which may hurt our financial performance and ability to grow.

As our non-U.S. revenue increases as a percentage of consolidated revenue, fluctuations in foreign currencies present a greater potential risk. We don't engage in currency hedging or have any positions in derivative instruments to hedge our currency risk. Our reported revenue could suffer if certain foreign currencies decline relative to the U.S. dollar, although the impact on operating income may be offset by an opposing currency impact on locally based operating expense. In addition, because we use the local currency of our subsidiaries as the functional currency, our financial results are affected by the translation of foreign currencies into U.S. dollars.

A prolonged outage of our database and network facilities could result in reduced revenue and the loss of customers.

The success of our business depends upon our ability to deliver time-sensitive, up-to-date data and information. We rely on our computer equipment, database storage facilities, and other office equipment, which are mainly located in our Chicago headquarters or elsewhere in the Chicago area. Our operations and those of our suppliers and customers are vulnerable to interruption by fire, earthquake, power loss, telecommunications failure, terrorist attacks, wars, Internet failures or disruptions, computer viruses, and other events beyond our control, including disasters affecting Chicago. We maintain off-site back-up facilities for our database and network equipment, but these facilities could be subject to the same interruptions that may affect our headquarters. We're not currently able to immediately switch over all of our systems to a back-up facility. If we experience a significant database or network facility outage, our business may be disrupted until we fully implement our back-up systems. Any losses, service disruption, or damages incurred by us could have a material adverse effect on our business, operating results, or financial condition.

Our business relies heavily on electronic delivery systems and the Internet. Any failures or disruptions could result in reduced revenue and the loss of customers.

Most of our products and services depend heavily on our electronic delivery systems and the Internet. Our ability to deliver information using the Internet may be impaired because of infrastructure failures, service outages at third-party Internet providers, malicious attacks, or increased government regulation. If disruptions, failures, or slowdowns of our electronic delivery systems or the Internet occur, our ability to distribute our products and services effectively and to serve our customers may be impaired.

We could face liability related to our storage of personal information about our users.

Customers routinely input personal investment and financial information, including portfolio holdings and credit card information, on our websites. We also handle personally sensitive information through our Portfolio Management Service, managed retirement accounts, and other areas of our business. We could be subject to liability if we were to inappropriately disclose any user's personal information or if third parties were able to penetrate our network security or otherwise gain access to any user's name, address, portfolio holdings, or credit card information. Any such event could subject us to claims for unauthorized credit card purchases, impersonation or other similar fraud claims, or claims for other misuses of personal information, such as unauthorized marketing or unauthorized access to personal portfolio information.

Certain products and services have historically made up a large percentage of our revenue base. Our business could suffer if sales of these products and services decline.

In 2010, our five largest products based on revenue (Licensed Data, Investment Consulting, Morningstar Advisor Workstation, Morningstar.com, and Morningstar Direct) accounted for approximately 59% of our consolidated revenue. We believe that sales of these products and services will continue to make up a substantial portion of our consolidated revenue for the foreseeable future. If we experience a significant decline in sales of any of these products for any reason, it would have a material adverse impact on our revenue and could harm our business.

We could face liability for the information we publish, including information based on data we obtain from other parties.

We may be subject to claims for securities law violations, defamation (including libel and slander), negligence, or other claims relating to the information we publish, including our research and ratings on corporate credit issuers. For example, investors may take legal action against us if they rely on published information that contains an error, or a company may claim that we have made a defamatory statement about it or its employees. We could also be subject to claims based upon the content that is accessible from our website through links to other websites. We rely on a variety of outside parties as the original sources for the information we use in our published data. These sources include securities exchanges, fund companies, transfer agents, and other data providers. Accordingly, in addition to possible exposure for publishing incorrect information that results directly from our own errors, we could face liability based on inaccurate data provided to us by others.

Defending claims based on the information we publish could be expensive and time-consuming and could adversely impact our business, operating results, and financial condition.

We may be unable to generate adequate returns on our cash and investment balance if we cannot identify attractive investment opportunities.

We held a total of \$365.4 million in cash and investments as of December 31, 2010. Because of generally low prevailing interest rates on high-quality fixed-income securities, the rate of return we can generate with our cash and investment balance is relatively low. We have used portions of our cash and investment balance to finance acquisitions over the past several years. We cannot

Edgar Filing: Morningstar, Inc. - Form 10-K

guarantee that we will be able to find suitable acquisition opportunities in the future. As mentioned above, we may also fail to generate enough revenue or profits from an acquisition to earn a return on the associated purchase price.

Our results could suffer if the mutual fund industry experiences slower growth.

A significant portion of our revenue is generated from products and services related to mutual funds. The mutual fund industry has experienced substantial growth over the past 25 years, but suffered along with the market downturn in 2008 and early 2009. Global mutual fund assets declined to about \$23.7 trillion as of September 30, 2010, down from a peak of \$26.1 trillion in 2007. While mutual fund assets rose in 2010, equity-focused funds have continued to experience net cash outflows, suggesting that investors remain cautious about equity-related assets. A significant portion of our fund research has historically focused on equity-related funds. Continued downturns or volatility in the financial markets, increased investor interest in other investment vehicles, or a lack of investor confidence could reduce investor interest and investment activity in this area. A slower growth rate or downturn in mutual fund assets could decrease demand for our products.

Competition could reduce our share of the investment research market and hurt our financial performance.

We operate in a highly competitive industry, with many investment research providers competing for business from individual investors, financial advisors, and institutional clients. We compete with many different types of companies that vary in size, product scope, and media focus, including large and well-established distributors of financial information, such as Thomson Reuters; Standard & Poor's, a division of The McGraw-Hill Companies; Bloomberg; and Yahoo!. We compete with a variety of other companies in different areas of our business, which we discuss in greater detail in the Business Segments, Products, and Services section in Item 1 Business.

Many of our competitors have larger customer bases and significantly greater resources than we do. This may allow them to respond more quickly to new technologies and changes in demand for products and services, devote greater resources to developing and promoting their services, and make more attractive offers to potential clients, subscribers, and strategic partners. Industry consolidation may also lead to more intense competition. Increased competition could result in price reductions, reduced margins, or loss of market share, any of which could hurt our business, operating results, or financial condition.

The investment information industry is dominated by a few large players, and industry consolidation has increased in the past several years. If providers of data and investment analysis continue to consolidate, our competitive position may suffer.

Consolidation among our clients may adversely impact our competitive position, our relationships with our clients, and business results.

Industry consolidation in the financial services sector has accelerated over the past several years. We can't predict the impact on our business if one of our clients is acquired. We may lose business following an acquisition of one of our clients if we're not able to continue providing services or expand our business with the combined organization. Any loss of business because of increased consolidation could have a negative effect on our revenue and profitability.

The availability of free or low-cost investment information could lead to lower demand for our products and adversely affect our financial results.

Investment research and information relating to publicly traded companies and mutual funds is widely available for little or no cost from various sources, including the Internet and public libraries. Investors can also access information directly from publicly traded companies and mutual funds. The Interactive Data Electronic Applications (IDEA) database available through the SEC website provides real-time access to SEC filings, including annual, semi-annual, and quarterly reports. Financial information and data is also widely available in XBRL (eXtensible Business Reporting Language), and many brokerage firms provide financial and investment research to their clients. The widespread availability of free or low-cost investment information may make it difficult for us to maintain or increase the prices we charge for our publications and services and could lead to a lower demand for our products. A loss of a significant number of customers would hurt our financial results.

We could be subject to fines, penalties, or other sanctions as a result of an investigation by the New York Attorney General's Office related to some of the services Morningstar Associates, LLC provides.

As we originally disclosed in 2004, the New York Attorney General's Office is conducting an investigation related to some of the products and services offered by Morningstar Associates, LLC. See Item 3 Legal Proceedings for a description of these matters. We cannot predict the scope, timing, or outcome of these matters, which may include the institution of administrative, civil, injunctive, or criminal proceedings, the imposition of fines and penalties, and other remedies and sanctions, any of which could lead to an adverse impact on our stock price, the inability to attract or retain key employees, and the loss of customers. We also cannot predict what impact, if any, these matters may have on our business, operating results, or financial condition. We have not established any reserves relating to these matters.

Our future success depends on our ability to recruit and retain qualified employees.

We experience competition for analysts and other employees from financial institutions and financial services organizations. These organizations generally have greater resources than we do and therefore may be able to offer significantly more attractive compensation packages to potential employees. Competition for these employees is intense, and we may not be able to retain our existing employees or be able to recruit and retain other highly qualified personnel in the future.

Our future success also depends on the continued service of our executive officers, including Joe Mansueto, our chairman, chief executive officer, and controlling shareholder. Joe is heavily involved in our day-to-day operations, business strategy, and overall company direction. The loss of Joe or other executive officers could hurt our business, operating results, or financial condition. We do not have employment agreements, non-compete agreements, or life insurance policies in place with any of our executive officers. They may leave us and work for our competitors or start their own competing businesses.

Failure to protect our intellectual property rights could harm our brand-building efforts and ability to compete effectively.

The steps we have taken to protect our intellectual property may not be adequate to safeguard our proprietary information. Further, effective trademark, copyright, and trade secret protection may not be available in every country in which we offer our services. Our continued ability to market one or more of our products under their current names could be adversely affected in those jurisdictions where another person registers, or has a pre-existing registration on one or more of them. Failure to adequately protect our intellectual property could harm our brand, devalue our proprietary content, and affect our ability to compete in the marketplace.

From time to time, we encounter jurisdictions in which one or more third parties have a pre-existing trademark registration in certain relevant international classes that may prevent us from registering our own marks in those jurisdictions. It is possible that our continued ability to use the Morningstar name or logo, either on a stand-alone basis or in association with certain products or services, could be compromised in those jurisdictions because of these pre-existing registrations. Similarly, from time to time, we encounter situations in certain jurisdictions where one or more third parties are already using the Morningstar name, either as part of a registered corporate name, a registered domain name or otherwise. Our ability to effectively market certain products and/or services in those locations could be adversely affected by these pre-existing usages.

Control by a principal shareholder could adversely affect our other shareholders.

As of December 31, 2010, Joe Mansueto, our chairman and chief executive officer, owned approximately 50% of our outstanding common stock. As a result, he has the ability to control substantially all matters submitted to our shareholders for approval, including the election and removal of directors and any merger, consolidation, or sale of our assets. He also has the ability to control our management and affairs. This concentration of ownership may delay or prevent a change in control; impede a merger, consolidation, takeover, or other business combination involving us; discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us; or result in actions that may be opposed by other shareholders.

Fluctuations in our operating results may negatively impact our stock price.

We believe our business has relatively large fixed costs and low variable costs, which magnify the impact of revenue fluctuations on our operating results. As a result, a decline in our revenue may lead to a larger decline in operating income. A substantial portion of our operating expense is related to personnel costs, marketing programs, office leases, and other infrastructure spending, which generally cannot be adjusted quickly. Our operating expense levels are based on our expectations for future revenue. If actual revenue falls below our expectations, or if our expenses increase before revenues do, our operating results would be materially and adversely affected. In addition, we do not provide earnings guidance or hold one-on-one meetings with institutional investors and research analysts. Because of this policy and limited analyst coverage on our stock, our stock price may be volatile. If our operating results or other operating metrics fail to meet the expectations of outside research analysts and investors, the market price of our common stock may decline.

The future sale of shares of our common stock may negatively impact our stock price.

Edgar Filing: Morningstar, Inc. - Form 10-K

If our shareholders sell substantial amounts of our common stock, the market price of our common stock could fall. A reduction in ownership by Joe Mansueto or any other large shareholder could cause the market price of our common stock to fall. In addition, the average daily trading volume in our stock is relatively low. The lack of trading activity in our stock may lead to greater fluctuations in our stock price. Low trading volume may also make it difficult for shareholders to make transactions in a timely fashion.

Our shareholders may experience dilution in their ownership positions.

In the past, we've granted options to employees as a significant part of their overall compensation package. In 2006, we began granting restricted stock units to our employees and non-employee directors. As of December 31, 2010, our employees and non-employee directors held options to acquire 1,856,425 shares of common stock, all of which were exercisable at a weighted average price of approximately \$17.73 per share. As of December 31, 2010, there were 822,855 restricted stock units outstanding, which have an average remaining vesting period of 33 months. Generally speaking, the company issues a share of stock when a restricted stock unit vests. To the extent that option holders exercise outstanding options to purchase common stock and shares are issued when restricted stock units vest, there will be further dilution. Future grants of stock options or restricted stock units may also result in dilution. We may raise additional funds through future sales of our common stock. Any such financing would result in additional dilution to our shareholders.

Stock option exercises, share repurchases, and other factors may create volatility in our cash flows.

Part of our cash provided by financing activities consists of proceeds from stock option exercises and excess tax benefits related to stock option exercises and vesting of restricted stock units. Excess tax benefits occur at the time a stock option is exercised if the intrinsic value of the option (the difference between the exercise price of the option and the fair value of our stock on the date of exercise) exceeds the fair value of the option at the time of grant. Similarly, excess tax benefits are generated upon vesting of restricted stock units when the market value of our common stock at vesting is greater than the grant price of the restricted stock units. These excess tax benefits reduce the cash we pay for income taxes in the year they are recognized. It is not possible to predict the timing of stock option exercises or the intrinsic value that will be realized. Because of this uncertainty, there may be additional volatility in our cash flows from financing activities.

In addition, our board of directors has authorized a share repurchase program allowing for the repurchase of up to \$100 million of our outstanding common stock. We may repurchase shares from time to time at prevailing market prices on the open market or in private transactions in amounts that management deems appropriate. Changes in the amount of repurchase activity from period to period may also cause volatility in our cash flows.

Item 1B. Unresolved Staff Comments

We do not have any unresolved comments from the Staff of the Securities and Exchange Commission regarding our periodic or current reports under the Exchange Act.

Item 2. Properties

As of December 31, 2010, we lease approximately 323,000 square feet of office space for our U.S. operations, primarily for our office located in Chicago, Illinois. We also lease approximately 385,000 square feet of office space in 23 countries around the world. We believe that our existing and planned office facilities are adequate for our needs and that additional or substitute space is available to accommodate growth and expansion.

Item 3. Legal Proceedings

InvestPic, LLC

In November 2010, InvestPic, LLC filed a complaint in the United States District Court for the District of Delaware against Morningstar, Inc. and several other companies alleging that each defendant infringes U.S. Patent No. 6,349,291, which relates to methods for performing statistical analysis on investment data and displaying the analyzed data in graphical form. InvestPic seeks, among other things, unspecified damages because of defendants' alleged infringing activities and costs. Morningstar is evaluating the lawsuit but cannot predict the outcome of the proceeding.

Egan-Jones Rating Co.

In June 2010, Egan-Jones Rating Co. filed a complaint in the Court of Common Pleas of Montgomery County, Pennsylvania against Realpoint, LLC and Morningstar, Inc. in connection with a December 2007 agreement between Egan-Jones and Realpoint for certain data-sharing and other services. In addition to damages, Egan-Jones filed a petition seeking an injunction to temporarily prevent Morningstar from offering corporate credit ratings through December 31, 2010. In September 2010, the court denied Egan-Jones' request for a preliminary injunction against Morningstar's corporate credit ratings business. Realpoint and Morningstar continue to vigorously contest liability on all of Egan-Jones' claims for damages. We cannot predict the outcome of the proceeding.

Business Logic Holding Corporation

Edgar Filing: Morningstar, Inc. - Form 10-K

In November 2009, Business Logic Holding Corporation filed a complaint in the Circuit Court of Cook County, Illinois against Ibbotson Associates, Inc. and Morningstar, Inc. relating to Ibbotson's prior commercial relationship with Business Logic. Business Logic is alleging that Ibbotson Associates and Morningstar violated Business Logic's rights by using its trade secrets to develop a proprietary web-service software and user interface that connects plan participant data with the Ibbotson Wealth Forecasting Engine. Business Logic seeks, among other things, injunctive relief and unspecified damages. Ibbotson and Morningstar answered the complaint, and Ibbotson asserted a counterclaim against Business Logic alleging trade secret misappropriation and breach of contract, seeking damages and injunctive relief. While Morningstar and Ibbotson Associates are vigorously contesting the claims against them, we cannot predict the outcome of the proceeding.

Morningstar Associates, LLC Subpoena from the New York Attorney General's Office

In December 2004, Morningstar Associates, LLC, a wholly owned subsidiary of Morningstar, Inc., received a subpoena from the New York Attorney General's office seeking information and documents related to an investigation the New York Attorney General's office is conducting. The subpoena asks for documents relating to the investment consulting services the company offers to retirement plan providers, including fund lineup recommendations for retirement plan sponsors. Morningstar Associates has provided the requested information and documents.

In 2005, Morningstar Associates received subpoenas seeking information and documents related to investigations being conducted by the SEC and United States Department of Labor. The subpoenas were similar in scope to the New York Attorney General subpoena. In January 2007 and September 2009, respectively, the SEC and Department of Labor each notified Morningstar Associates that it had ended its investigation, with no enforcement action, fines, or penalties.

In January 2007, Morningstar Associates received a Notice of Proposed Litigation from the New York Attorney General's office. The Notice centers on disclosure relating to an optional service offered to retirement plan sponsors (employers) that select 401(k) plan services from ING, one of Morningstar Associates' clients. The Notice gave Morningstar Associates the opportunity to explain why the New York Attorney General's office should not institute proceedings. Morningstar Associates promptly submitted its explanation and has cooperated fully with the New York Attorney General's office.

We cannot predict the scope, timing, or outcome of this matter, which may include the institution of administrative, civil, injunctive, or criminal proceedings, the imposition of fines and penalties, and other remedies and sanctions, any of which could lead to an adverse impact on our stock price, the inability to attract or retain key employees, and the loss of customers. We also cannot predict what impact, if any, this matter may have on our business, operating results, or financial condition.

In addition to these proceedings, we are involved in legal proceedings and litigation that have arisen in the normal course of our business. Although the outcome of a particular proceeding can never be predicted, we do not believe that the result of any of these other matters will have a material adverse effect on our business, operating results, or financial condition.

Part II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters, and Issuer Purchases of Equity Securities

Our common stock is listed on the Nasdaq Global Select Market under the symbol MORN.

The following table shows the high and low price per share of our common stock for the periods indicated, as reported on the Nasdaq Global Select Market:

	2010		2009	
	High	Low	High	Low
First Quarter	\$ 50.14	\$ 43.01	\$ 38.60	\$ 26.70
Second Quarter	50.91	42.42	45.69	30.37
Third Quarter	46.79	39.61	48.56	35.61
Fourth Quarter	54.09	44.38	54.75	46.00

As of February 18, 2011, the last reported price on the Nasdaq Global Select Market for our common stock was \$59.27 per share and there were approximately 1,466 shareholders of record of our common stock.

In September 2010, our board of directors approved a regular quarterly dividend of 5 cents per share. The first quarterly dividend was payable on January 14, 2011 to shareholders of record on December 31, 2010. As of December 31, 2010, we recorded a liability of \$2,494,000 for dividends payable.

Any determination to pay dividends in the future will be at the discretion of our board of directors and will be dependent upon our results of operations, financial condition, contractual restrictions, restrictions imposed by applicable law, and other factors deemed relevant by the board of directors. Future indebtedness and loan facilities may also prohibit or restrict our ability to pay dividends and make distributions to our shareholders.

See Note 11 in our Notes to our Consolidated Financial Statements for a description of our equity compensation plans.

Issuer Purchases of Equity Securities*

The following table presents information related to repurchases of common stock we made during the three months ended December 31, 2010:

Period:		Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced programs (1)	Approximate dollar value of shares that may yet be purchased under the programs (1)
October 1, 2010	October 31, 2010		\$		\$ 100,000,000
November 1, 2010	November 30, 2010	61,480	49.58	61,480	96,951,978
December 1, 2010	December 31, 2010	14,738	49.88	14,738	96,216,778
Total		76,218	\$ 49.64	76,218	96,216,778

* Subject to applicable law, we may repurchase shares at prevailing market prices directly on the open market or in privately negotiated transactions in amounts that we deem appropriate.

(1) In September 2010, our board of directors approved a share repurchase program that authorizes the purchase of up to \$100 million of our outstanding common stock. The share repurchase program expires on December 31, 2012.

Rule 10b5-1 Sales Plans

Our directors and executive officers may exercise stock options or purchase or sell shares of our common stock in the market from time to time. We encourage them to make these transactions through plans that comply with Exchange Act Rule 10b5-1(c). Morningstar will not receive any proceeds, other than proceeds from the exercise of stock options, related to these transactions. The following table, which we are providing on a voluntary basis, shows the Rule 10b5-1 sales plans entered into by our directors and executive officers that were in effect as of February 1, 2011:

Name and Position	Date of Plan	Plan Termination Date	Number of Shares to be Sold under the Plan	Timing of Sales under the Plan	Number of Shares Sold under the Plan through February 1, 2011	Projected Beneficial Ownership (1)
Chris Boruff President, Software Division	11/12/10	05/01/11	15,000	Shares to be sold under the plan if the stock reaches specified prices	—	132,471
Scott Cooley Chief Financial Officer	11/18/10	12/31/11	5,375	Shares to be sold under the plan if the stock reaches specified prices	—	47,608
Cheryl Francis Director	08/11/09	08/01/11	16,987	Shares to be sold under the plan if the stock reaches specified prices	12,000	25,663
Liz Kirscher President, Data Division	11/23/09	02/28/12	63,750	Shares to be sold under the plan if the stock reaches specified prices	15,000	72,417
Cathy Odelbo President, Equity & Credit Research	08/13/08	12/31/11	100,000	Shares to be sold under the plan if the stock reaches specified prices	—	77,635
Richard Robbins General Counsel and Corporate Secretary	11/18/10	10/31/11	11,078	Shares to be sold under the plan on a specified date and if the stock reaches a specified price	—	21,706
Paul Sturm Director	11/29/10	12/31/11	50,000	Shares to be sold under the plan if the stock reaches specified prices	—	61,871
David Williams Managing Director, Design	09/10/08	02/28/12	20,000	Shares to be sold under the plan if the stock reaches specified prices	—	88,141

During the fourth quarter, Steve Kaplan and Richard Robbins previously disclosed Rule 10b5-1 sales plans expired in accordance with their terms. Cheryl Francis, Liz Kirscher, and David Williams amended their Rule 10b5-1 sales plans. Patrick Reinkemeyer and Tao Huang left the company in December 2010 and January 2011, respectively. Therefore, their Rule 10b5-1 sales plans have been removed from the table.

(1) This column reflects an estimate of the number of shares each identified director and executive officer will beneficially own following the sale of all shares under the Rule 10b5-1 sales plans identified above. This information reflects the beneficial ownership of our common stock on December 31, 2010, and includes shares of our common stock subject to options that were then exercisable or that will have become exercisable by March 1, 2011 and restricted stock units that will vest by March 1, 2011. The estimates do not reflect any changes to beneficial ownership that may have occurred since December 31, 2010. Each

Edgar Filing: Morningstar, Inc. - Form 10-K

director and executive officer identified in the table may amend or terminate his or her Rule 10b5-1 sales plan and may adopt additional Rule 10b5-1 plans in the future.

Item 6. Selected Financial Data

The selected historical financial data shown below should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our Consolidated Financial Statements and related notes included elsewhere in this Annual Report on Form 10-K. We have derived our Consolidated Statements of Income Data and Other Consolidated Financial Data for the years ended December 31, 2010, 2009, and 2008 and Consolidated Balance Sheet Data as of December 31, 2010 and 2009 from our audited Consolidated Financial Statements included in this Annual Report on Form 10-K. The Consolidated Statements of Income Data and Other Consolidated Financial Data for the years ended December 31, 2007 and 2006 and Consolidated Balance Sheet Data as of December 31, 2008, 2007, and 2006 were derived from our audited Consolidated Financial Statements, as restated, that are not included in this Annual Report on Form 10-K.

Consolidated Statements of Income Data (in thousands except per share amounts)	2006	2007	2008	2009	2010
Revenue	\$ 315,175	\$ 435,107	\$ 502,457	\$ 478,996	\$ 555,351

Total equity (1)	262,792	402,415	530,245	665,789	781,425

(1) In 2010, we determined that the cumulative effect of adjustments related to prior periods were material, in aggregate, if recorded in our 2010 Consolidated Financial Statements. These amounts related primarily to our accounting for deferred taxes and, to a lesser extent, to expense adjustments associated with vacant office space and rent for one of our office leases. We evaluated the effects of these errors on our prior periods Consolidated Financial Statements, individually and in the aggregate, in accordance with the materiality guidance provided by the SEC staff, as included in SAB Topics 1M and 1N, and concluded that no prior period is materially misstated. However, in accordance with the provisions of these SAB Topics, we restated our Consolidated Financial Statements for years prior to 2010. See Note 2 in the Notes to our Consolidated Financial Statements for additional information concerning the restated financial information for the years ended December 31, 2009 and 2008. The following table reconciles the amounts as presented in this table of Selected Financial Data with the previously reported amounts:

(in thousands except per share amounts)	2006	2007	2008	2009
Operating expense as reported	\$ 237,648	\$ 317,853	\$ 363,338	\$ 353,676
Adjustments		233	243	647
Operating expense as adjusted	\$ 237,648	\$ 318,086	\$ 363,581	\$ 354,323
Operating income as reported	\$ 77,527	\$ 117,254	\$ 139,119	\$ 125,320
Adjustments		(233)	(243)	(647)
Operating income as adjusted	\$ 77,527	\$ 117,021	\$ 138,876	\$ 124,673
Income before income taxes, equity in net income of unconsolidated entities, and cumulative effect of accounting change as reported	\$ 81,691	\$ 123,483	\$ 143,371	\$ 128,254

- (2) Consolidated revenue excluding acquisitions and the impact of foreign currency translations (organic revenue) is considered a non-GAAP financial measure under the regulations of the Securities and Exchange Commission (SEC). The definition of organic revenue we use may not be the same as similarly titled measures used by other companies. Organic revenue should not be considered an alternative to any measure of performance as promulgated under U.S. generally accepted accounting principles (GAAP).
- (3) Effective January 1, 2006, we adopted SFAS No. 123 (Revised 2004), *Share-Based Payment* (SFAS No. 123(R)). In 2006, we began granting restricted stock units. We measure the fair value of our restricted stock units on the date of grant based on the market price of the underlying common stock as of the close of trading on the day prior to grant. We amortize that value to stock-based compensation expense, net of estimated forfeitures, ratably over the vesting period.

In May 2010, we issued 199,174 shares of restricted stock in conjunction with the acquisition of Realpoint, LLC. The restricted stock vests over five years from the date of grant. This grant resulted in an expense of \$1.2 million in 2010.

The total expense for stock-based compensation is distributed with other employee compensation costs in the appropriate operating expense categories of our Consolidated Statements of Income. Refer to Note 11 of the Notes to our Consolidated Financial Statements for more information on our stock-based compensation.

- (4) Cash used for investing activities consists primarily of cash used for acquisitions; purchases of investments, net of proceeds from the sale of investments; and capital expenditures. The level of investing activities can vary from period to period depending on the level of activity in these three categories. Refer to Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources for more information concerning cash used for investing activities.
- (5) Cash provided by financing activities consists primarily of proceeds from stock-option exercises and excess tax benefits. These cash inflows are offset by cash used to repurchase outstanding common stock through our share repurchase program which we began in the fourth quarter of 2010. Refer to Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources, for more information concerning cash provided by financing activities.
- (6) Free cash flow is considered a non-GAAP financial measure under SEC regulations. We present this measure as supplemental information to help investors better understand trends in our business results over time. Our management team uses free cash flow to evaluate our business. Free cash flow is not equivalent to any measure required to be reported under GAAP, nor should this data be considered an indicator of liquidity. Moreover, the free cash flow definition we use may not be comparable to similarly titled measures reported by other companies.
- (7) We frequently invoice or collect cash in advance of providing services or fulfilling subscriptions for our customers. These amounts are recorded as deferred revenue on our Consolidated Balance Sheets.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The discussion included in this section, as well as other sections of this Annual Report on Form 10-K, contains forward-looking statements as that term is used in the Private Securities Litigation Reform Act of 1995. These statements are based on our current expectations about future events or future financial performance. Forward-looking statements by their nature address matters that are, to different degrees, uncertain, and often contain words such as may, could, expect, intend, plan, seek, anticipate, believe, estimate, predict, potential, or continue. These statements involve known and unknown risks and uncertainties that may cause the events we discuss not to occur or to differ significantly from what we expect. For us, these risks and uncertainties include, among others, general industry conditions and competition, including current global financial uncertainty; the impact of market volatility on revenue from asset-based fees; damage to our reputation resulting from claims made about possible conflicts of interest; liability for any losses that result from an actual or claimed breach of our fiduciary duties; financial services industry consolidation; a prolonged outage of our database and network facilities; challenges faced by our non-U.S. operations; and the availability of free or low-cost investment information.

A more complete description of these risks and uncertainties can be found in Item 1A Risk Factors of this Annual Report on Form 10-K. If any of these risks and uncertainties materialize, our actual future results may vary significantly from what we expected. We do not undertake to update our forward-looking statements as a result of new information or future events.

All dollar and percentage comparisons, which are often accompanied by words such as increase, decrease, grew, declined, was up, was down, was flat, or was similar refer to a comparison with the same period in the prior year unless otherwise stated.

Understanding Our Company

Our mission is to create great products that help investors reach their financial goals. We offer an extensive line of data, software, and research products for individual investors, financial advisors, and institutional clients. We also offer asset management services for advisors, institutions, and retirement plan participants. Many of our products are sold through subscriptions or license agreements. As a result, we typically generate recurring revenue.

Morningstar has two operating segments: Investment Information and Investment Management. The Investment Information segment includes all of our data, software, and research products and services. These products and services are typically sold through subscriptions or license agreements. The Investment Management segment includes our asset management operations, which operate as registered investment advisors and earn more than half of their revenue from asset-based fees. We emphasize a decentralized approach to running our business to empower our managers and to create a culture of responsibility and accountability.

Historically, we have focused primarily on organic growth by introducing new products and services and marketing our existing products. However, we have made and expect to continue to make selective acquisitions that support our five key growth strategies, which are:

Edgar Filing: Morningstar, Inc. - Form 10-K

- Enhance our position in key market segments by focusing on our three major Internet-based platforms;
- Create a premier global investment database;
- Continue building thought leadership in independent investment research;
- Become a global leader in fund-of-funds investment management; and
- Expand our international brand presence, products, and services.

Key Business Characteristics

Revenue

We generate revenue by selling a variety of investment-related products and services. We sell many of our offerings, such as newsletters, Principia software, and Premium service on Morningstar.com, via subscriptions. These subscriptions are mainly offered for a one-year term, although we also offer terms ranging from one month to three years. We also sell advertising on our websites throughout the world. Several of our other products are sold through license agreements, including Morningstar Advisor Workstation, Morningstar Equity Research, Morningstar Direct, Retirement Advice, and Licensed Data. Our license agreements typically range from one to three years.

For some of our other institutional services, mainly Investment Consulting, we generally base our fees on the scope of work and the level of service we provide and calculate them as a percentage of assets under advisement. We also earn fees relating to Morningstar Managed Portfolios and the managed retirement accounts offered through Morningstar Retirement Manager and Advice by Ibbotson that we calculate as a percentage of assets under management. Overall, revenue tied to asset-based fees accounted for about 12% of our consolidated revenue in 2010.

Deferred Revenue

We frequently invoice our clients and collect cash in advance of providing services or fulfilling subscriptions for our customers. As a result, we use some of this cash to fund our operations and invest in new product development. The businesses we acquired over the past several years have similar business models, and as a result, we acquired their deferred revenue. Deferred revenue is the largest liability on our Consolidated Balance Sheets and totaled \$146.3 million as of December 31, 2010 and \$127.1 million as of December 31, 2009. We expect to recognize this deferred revenue in future periods as we fulfill the service obligations under our subscription, license, and service agreements.

Significant Operating Leverage

Our business requires significant investments to create and maintain proprietary databases and content. We strive to leverage these costs by selling a wide variety of products and services to multiple investor segments, through multiple media, and in many geographical markets. In general, our businesses have high fixed costs, and we expect our revenue to increase or decrease more quickly than our expenses. We believe that while the fixed costs of the investments in our business are relatively high, the variable cost of adding customers is considerably lower, particularly as a significant portion of our products and services focus on Internet-based platforms and assets under management. At times, we will make investments in building our databases and content that will hurt our short-term operating results. During other periods, our profitability will improve because we are able to increase revenue without increasing our cost base at the same rate. When revenue decreases, however, the significant operating leverage in our business may reduce our profitability.

Operating Expense

We classify our operating expense into separate categories for cost of goods sold, development, sales and marketing, general and administrative, and depreciation and amortization, as described below. We include stock-based compensation expense, as appropriate, in each of these categories.

- *Cost of goods sold.* This category includes compensation expense for employees who produce the products and services we deliver to our customers. For example, this category covers production teams and analysts who write investment research reports. Cost of goods sold also includes other expense such as postage, printing, and CD-ROM replication, as well as shareholder servicing fees for Morningstar Managed Portfolios.

Edgar Filing: Morningstar, Inc. - Form 10-K

- *Development.* This category includes compensation expense for programmers, designers, and other employees who develop new products and enhance existing products. In some cases, we capitalize the compensation costs associated with certain development projects. This reduces the expense that we would otherwise report in this category. We amortize these capitalized costs over the estimated economic life of the software, which is generally three years, and include this expense in depreciation and amortization.

- *Sales and marketing.* This category includes compensation expense for our sales teams, product managers, and other marketing professionals. We also include the cost of advertising, direct mail campaigns, and other marketing programs to promote our products.

- *General and administrative.* This category consists mainly of compensation expense for each segment's management team, as well as human resources, finance, and support employees for each segment. The category also includes compensation expense for senior management and other corporate costs, including corporate systems, finance and accounting, legal, and facilities expense.

• *Depreciation and amortization.* Our capital expenditures consist of computers, leasehold improvements, and capitalized product development costs related to certain software development projects. We depreciate property and equipment primarily using the straight-line method based on the useful life of the asset, which ranges from three to seven years. We amortize leasehold improvements over the lease term or their useful lives, whichever is shorter. We amortize capitalized product development costs over their estimated economic life, which is generally three years. We also include amortization related to intangible assets, which is mainly driven by acquisitions, in this category. We amortize intangible assets using the straight-line method over their estimated economic useful lives, which range from one to 25 years.

International Operations

We have majority-owned operations in 24 countries outside of the United States and include these in our consolidated financial statements. We account for our minority-owned investments in Japan and Sweden using the equity method.

How We Evaluate Our Business

When our analysts evaluate a stock, they focus on assessing the company's estimated intrinsic value—the value of the company's future cash flows, discounted to their worth in today's dollars. Our approach to evaluating our own business works the same way.

Our goal is to increase the intrinsic value of our business over time, which we believe is the best way to create value for our shareholders. We do not make public financial forecasts for our business because we want to avoid creating any incentives for our management team to make speculative statements about our financial results that could influence the stock price, or to take actions that help us meet short-term forecasts but may not be in the long-term interest of building shareholder value.

We provide three specific measures that can help investors generate their own assessment of how our intrinsic value has changed over time:

- Revenue (including organic revenue);
- Operating income (loss); and
- Free cash flow, which we define as cash provided by or used for operating activities less capital expenditures.

Organic revenue is considered a non-GAAP financial measure under Securities and Exchange Commission (SEC) regulations. We define organic revenue as consolidated revenue excluding acquisitions and foreign currency translations. We present organic revenue because we believe it helps investors better compare our period-to-period results, and our management team uses this measure to evaluate the performance of our business.

Edgar Filing: Morningstar, Inc. - Form 10-K

Free cash flow is also considered a non-GAAP financial measure. We present this measure as supplemental information to help investors better understand trends in our business results over time. Our management team uses free cash flow to evaluate our business. Free cash flow is not equivalent to any measure required under U.S. generally accepted accounting principles (GAAP) and should not be considered an indicator of liquidity. Moreover, the free cash flow definition we use may not be comparable to similarly titled measures reported by other companies.

To evaluate how successful we've been in maintaining existing business for products and services that have renewable revenue, we calculate a retention rate. We use two different methods for calculating retention. For subscription-based products (including our print newsletters, Morningstar.com Premium Membership service, and Principia software), we track the number of subscriptions retained during the year. For products sold through contracts and licenses, we use the contract value method, which is based on tracking the dollar value of renewals compared with the total dollar value of contracts up for renewal during the period. We include changes in the contract value in the renewal amount, unless the change specifically results from adding a new product that we can identify. We also include variable-fee contracts in this calculation and use the previous quarter's actual revenue as the base rate for calculating the renewal percentage. The retention rate excludes setup and customization fees, migrations to other Morningstar products, and contract renewals that were pending as of January 31, 2011.

The Year 2010 in Review

Industry Overview

We monitor developments in the economic and financial information industry on an ongoing basis. We use these insights to help inform our company strategy, product development plans, and marketing initiatives.

Following a strong market rebound in 2009, the U.S. market gained 16.8% in 2010, as measured by Morningstar's U.S. Market Index, a broad market index. Most global markets also had positive returns for the year. Morningstar's Global Ex-U.S. Index rose 12.6%.

Total U.S. mutual fund assets rose to \$11.8 trillion as of December 31, 2010, compared with \$11.1 trillion as of December 31, 2009, based on data from the Investment Company Institute (ICI). Although aggregate cash flows to mutual funds were strong for the year, investors continued to heavily favor fixed-income funds rather than equity funds. U.S. stock funds had negative net cash flows for the year, although less so than in 2009. Global mutual fund assets showed a similar trend, with total assets increasing but asset flows favoring fixed-income funds.

The number of mutual funds in the United States continued to contract slightly to about 7,600 in 2010 (excluding multiple share classes) from 7,700 in 2009, based on data from the ICI. The number of global mutual funds increased to about 69,000 as of September 30, 2010, compared with 66,000 as of September 30, 2009, based on ICI data.

We estimate that hedge funds included in Morningstar's database had about \$3 billion in net inflows through November 30, 2010, compared with \$51 billion in net outflows for the same period in 2009.

ETFs continued to increase in popularity relative to traditional mutual funds. The U.S. ETF industry closed out 2010 with nearly \$1 trillion in assets under management based on Morningstar's data, up from about \$780 billion at the end of 2009.

Based on data from Nielsen/Net Ratings, aggregate page views and the time spent per visit for financial and investment sites in 2010 both declined by about 20% compared with 2009, while the number of unique visitors was down about 10%. We believe these trends reflect individual investors' lower level of interest in financial- and investment-related content in the wake of the market downturn. Metrics such as pages viewed per visit and time spent per visit also declined for Morningstar.com in 2010.

Despite these trends, we believe online advertising spending by financial services companies rose sharply in 2010 after reductions in 2008 and 2009. Magna, a division of Interpublic Group, estimates that global online advertising revenue rose about 7% across all industries in 2010, following a 3% decline in 2009.

In the wake of the global financial crisis, regulators continued to implement new rules for financial services companies. One of the significant developments in Asia last year was the introduction of new regulations and requirements to enforce additional risk disclosures on investment products. Regulators introduced new documents such as the Key Facts Statements in Hong Kong and Product Highlights Sheets in Singapore in 2010 to enhance product transparency and to set an overall disclosure standard for investment product documents. We've continue to enhance our database and products to help our clients meet these new regulations.

In Australia, there are numerous regulatory reviews underway related to industry-wide standards for the superannuation industry, as well as fiduciary standards and compensation structures for financial advisors. While we expect these reviews to put pressure on pricing for product providers and result in further consolidation, we believe the superannuation guarantee rates will support continued asset growth. We believe these trends, along with an emphasis on independent research, continue to make Australia an attractive market for Morningstar and other third-party research providers.

In the European Union, Undertakings for Collective Investments in Transferable Securities (UCITS) is a set of EU Directives designed to enable funds to operate across the EU based upon authorization from one state regulator. UCITS IV, approved by the European Parliament in January 2009 and coming into effect in July 2011, is largely designed to reduce inefficiencies that exist within the current UCITS III framework. The directive includes several key sections, including requirements for a new Key Investor Information Document (KIID), an easy-to-read annual factsheet that replaces the Simplified Prospectus.

Every UCITS fund that is promoted to retail investors will have to produce a KID and issue an updated copy within the first 25 business days of each calendar year. We've developed prototype documents for the KID and expect to begin providing this service in 2011.

We're also monitoring the EU Transparency Directive. One of the key features of this piece of legislation concerns the disclosure of significant holdings of and by companies. This Directive has contributed to our expansion of the global ownership database, with additional coverage in Germany, France, and the United Kingdom. We are reviewing the newly published EU Commission report on the Directive and potential revisions to the major shareholder obligations.

The United Kingdom's Retail Distribution Review (RDR), which emphasizes increased regulation of advisory fees, higher professional standards for financial advisors, and an emphasis on whole of market investment solutions, is scheduled to come into effect at the end of 2012. Because advisors will be obligated to give clients a choice of all investment vehicles (including funds, ETFs, and other products) and demonstrate that they consider different investment options without bias, we believe it may increase the business need for investment information on multiple investment types, which we offer through products such as Morningstar Direct and Morningstar Advisor Workstation.

In the United States, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act into law in July 2010. The Act creates a number of new regulatory, supervisory, and advisory bodies and touches on the regulation of virtually every aspect of U.S. financial markets and activities. The Act also left numerous matters to be addressed through rulemaking and other regulatory action, giving the regulators significant discretion in many areas. As a result, the final shape and effect of the legislation are continuing to emerge.

Aside from corporate governance and disclosure requirements that apply to all public companies generally, we believe the portion of the Act that is the most relevant to Morningstar is subtitle C of Title IX, which contains changes to the regulatory framework for credit rating agencies.

This section subjects Nationally Recognized Statistical Rating Organizations (NRSROs), including Realpoint, the subsidiary we acquired in May 2010, to greater oversight by the SEC. Among other things, it requires the SEC to remove the current exemption in Regulation FD for credit rating agencies, allows investors to bring private rights of action against credit rating agencies for failing to conduct a reasonable investigation of the facts or to obtain analysis from an independent source, and repeals Rule 436(g) under the Securities Act of 1933, which exempted credit rating agencies from being considered experts subject to liability for ratings included in registration statements. However, the SEC issued a no-action letter regarding the repeal of Rule 436(g) and extended the letter indefinitely.

Aside from subtitle C and the general corporate governance and disclosure requirements, we believe the majority of the Dodd-Frank Act and related regulations will not have a direct effect on Morningstar. However, we continue to monitor the potential impact of these regulations on our clients. For example, the SEC recently recommended that regulators adopt rules requiring that broker-dealers be subject to a fiduciary standard, which would impose additional requirements on commission-based advisors.

Overall, we believe the uncertainty in the financial services sector continued easing throughout 2010. With the exception of continued weakness in consumer discretionary spending, business trends steadily improved during the year. As discussed in more detail in the Consolidated Operating Income section below, during 2010 we continued phasing in some of the benefits and other

compensation-related expenses we previously reduced.

Performance Summary

The list below summarizes the key accomplishments and challenges that our management team has highlighted related to our 2010 performance:

Accomplishments

- We made solid progress building a base for our credit research business and now offer credit ratings and reports on more than 720 corporate credit issuers. We acquired Realpoint, a Nationally Recognized Statistical Rating Organization that specializes in commercial mortgage-backed securities.
- We expanded our analyst research and investment consulting work on exchange-traded funds, closed-end funds, alternative investments, 529 plans, and target-date funds all areas that have seen strong investor interest.

Edgar Filing: Morningstar, Inc. - Form 10-K

- We continued to expand our equity research business, doubling our client base in just one year.
- We continued building out our global operations, establishing a presence in Brazil, Chile, Mexico, and Luxembourg. We also expanded our international investment research and consulting businesses by acquiring Aegis, Seeds Group, and OBSR.
- Morningstar Direct had a record year with more than 1,200 new licenses added globally.
- Both renewal rates for contract-based products and services and retention rates for subscription products rose substantially compared with 2009, reflecting improved business conditions and healthier sales trends across most of our product lines.
- Morningstar's board of directors approved a 5 cent per share initial quarterly dividend and a \$100 million share repurchase program, allowing us to return a portion of our cash balance to shareholders.

Challenges

- Operating expense rose faster than revenue in 2010, leading to a 4.2 percentage point decline in our operating margin, in part because we restored some incentive compensation and benefits after reducing them in 2009.
- We have more work to do in fully integrating some of our acquisitions and rebranding many of these businesses under the Morningstar umbrella.
- While advertising sales on Morningstar.com rebounded strongly U.S. Premium Membership subscriptions were 8% lower year over year as individual investors have been slow to return to the stock market and remain cautious about discretionary spending.

Restatement of Previous Periods Financial Information

In 2010, we determined that the cumulative effect of adjustments related to prior periods were material, in aggregate, if recorded in our 2010 Consolidated Financial Statements. These amounts related primarily to our accounting for deferred taxes and, to a lesser extent, to expense adjustments associated with vacant office space and rent for one of our office leases. We evaluated the effects of these errors on our prior periods' Consolidated Financial Statements, individually and in the aggregate, in accordance with the

Edgar Filing: Morningstar, Inc. - Form 10-K

materiality guidance provided by the SEC staff, as included in SAB Topics 1M and 1N, and concluded that no prior period is materially misstated. However, in accordance with the provisions of these SAB Topics, we restated our Consolidated Financial Statements, as of and for the years ended December 31, 2009 and 2008. Please see Note 2 in the Notes to our Consolidated Financial Statements for additional information concerning the restated financial information.

Consolidated Results

(\$000)	2010		2009		2008		2010 Change	2009 Change

Edgar Filing: Morningstar, Inc. - Form 10-K

As noted in *How We Evaluate Our Business*, we define free cash flow as cash provided by or used for operating activities less capital expenditures. Please refer to the discussion on page 49 for more detail.

Because we've made several acquisitions in recent years, comparing our financial results from year to year is complex. To make it easier for investors to compare our results in different periods, we provide information on both revenue from acquisitions and organic revenue, which reflects our underlying business excluding revenue from acquisitions and the impact of foreign currency translations. We include an acquired operation as part of our revenue from acquisitions for 12 months after we complete the acquisition. After that, we include it as part of our organic revenue.

Consolidated organic revenue (revenue excluding acquisitions and the impact of foreign currency translations) is considered a non-GAAP financial measure. The definition of organic revenue we use may not be the same as similarly titled measures used by other companies. Organic revenue should not be considered an alternative to any measure of performance as promulgated under GAAP.

The table below shows the periods in which we included each acquired operation in revenue from acquisitions:

Consolidated Revenue

In 2010, our consolidated revenue increased 15.9% to \$555.4 million. We had \$47.9 million in incremental revenue from acquisitions during the year, mainly reflecting additional revenue from Logical Information Machines, Inc. (LIM), Realpoint LLC (Realpoint), Old Broad Street Research Ltd. (OBSR), and Intech Pty Limited (Intech). Acquisitions contributed about 10 percentage points to our consolidated revenue growth.

Excluding acquisitions and the impact of foreign currency translations, consolidated revenue increased by about \$24.1 million, or 5.0%, in 2010. Higher revenue from Morningstar.com advertising sales, Morningstar Direct, and Licensed Data were the main drivers behind the revenue increase. These positive factors as well as smaller contributions from advisor software and our Investment Management products helped offset the loss of revenue associated with the Global Analyst Research Settlement (GARS), which ended in July 2009. We had equity research revenue of \$12.5 million related to GARS in 2009 that did not recur in 2010.

In 2009, our consolidated revenue decreased 4.7% to \$479.0 million. We had about \$29.6 million in incremental revenue from acquisitions during the year, mainly reflecting additional revenue from Tenfore Systems Limited (Tenfore, now referred to as Real-Time Data) as well as 10-K Wizard Technology, LLC (10-K Wizard), the equity research and data business from C.P.M.S. (CPMS), Intech (now referred to as Ibbotson Australia), Fundamental Data Limited (Fundamental Data), and others. However, this was more than offset by lower organic revenue, largely reflecting a drop in revenue from Investment Consulting as well as lower Equity Research revenue related to GARS in the second half of 2009. Investment Consulting revenue declined because two clients did not renew their contracts, one in October 2008 and the other in May 2009.

Edgar Filing: Morningstar, Inc. - Form 10-K

The tables below reconcile consolidated revenue with organic revenue (revenue excluding acquisitions and the impact of foreign currency translations):

2010 vs. 2009 (\$000)		2010		2009	Change
Consolidated revenue	\$	555,351	\$	478,996	15.9%
Revenue from acquisitions		(47,850)			NMF
Favorable impact of foreign currency translations		(4,362)			NMF
Organic revenue	\$	503,139	\$	478,996	5.0%
2009 vs. 2008 (\$000)		2009		2008	Change
Consolidated revenue	\$	478,996	\$	502,457	(4.7)%
Revenue from acquisitions		(29,590)			NMF
Unfavorable impact of foreign currency translations		8,987			NMF
Organic revenue	\$	458,393	\$	502,457	(8.8)%
2008 vs. 2007 (\$000)		2008		2007	Change
Consolidated revenue	\$	502,457	\$	435,107	15.5%
Revenue from acquisitions		(27,125)			NMF
Favorable impact of foreign currency translations		(1,850)			NMF
Organic revenue	\$	473,482	\$	435,107	8.8%

While organic revenue and acquisitions had the most significant impact on revenue in 2010, we also enjoyed a benefit from foreign currency translations, primarily in the first half of the year. The Australian dollar and the Canadian dollar were the primary contributors to the currency benefit, partially offset by the Euro and, to a lesser extent, the British pound. In contrast, currency translations reduced revenue by nearly \$9.0 million in 2009.

Organic revenue growth improved each quarter in 2010.

International Revenue

Revenue from international operations increased as a percentage of total revenue in 2010 and 2009. Our non-U.S. revenue increased to 28.3% of consolidated revenue in 2010, compared with 27.0% in 2009 and 24.2% in 2008. Several of our recent acquisitions have operations outside the United States. The majority of our international revenue is from Europe, Australia, and Canada. Acquisitions contributed \$17.0 million to international revenue in 2010 and \$23.4 million in 2009.

Foreign currency translations increased revenue by approximately \$4.4 million in 2010, reversing the trend from 2009, when foreign currency translations had a negative impact of \$9.0 million. Excluding acquisitions and the impact of foreign currency translations, our non-U.S. revenue rose 5.2% in 2010 and declined 5.5% in 2009.

International organic revenue (international revenue excluding acquisitions and the impact of foreign currency translations) is considered a non-GAAP financial measure. The definition of international organic revenue we use may not be the same as similarly titled measures used by other companies. International organic revenue should not be considered an alternative to any measure of performance as promulgated under GAAP.

Edgar Filing: Morningstar, Inc. - Form 10-K

The tables below present a reconciliation from international revenue to international organic revenue (international revenue excluding acquisitions and the impact of foreign currency translations):

2010 vs. 2009 (\$000)	2010		2009		Change
International revenue	\$	157,136	\$	129,160	21.7%
Revenue from acquisitions		(16,953)			NMF
Favorable impact of foreign currency translations		(4,362)			NMF
International organic revenue	\$	135,821	\$	129,160	5.2%
2009 vs. 2008 (\$000)	2009		2008		Change
International revenue	\$	129,160	\$	121,436	6.4%
Revenue from acquisitions		(23,371)			NMF
Unfavorable impact of foreign currency translations		8,987			NMF
International organic revenue	\$	114,776	\$	121,436	(5.5)%
2008 vs. 2007 (\$000)	2008		2007		Change
International revenue	\$	121,436	\$	89,680	35.4%
Revenue from acquisitions		(19,426)			NMF
Favorable impact of foreign currency translations		(1,850)			NMF
International organic revenue	\$	100,160	\$	89,680	11.7%

Largest Products Based on Revenue

Our five largest products based on revenue Licensed Data, Investment Consulting, Morningstar Advisor Workstation, Morningstar.com, and Morningstar Direct made up about 59% of consolidated revenue in 2010. While the percentage of revenue made up by our top five products has remained relatively consistent over the past three years, the relative size of products within the top five has changed each year. Licensed Data became our largest product in 2008 and has remained in that position in 2010 and 2009, partly because of incremental revenue from acquisitions.

Beginning in 2010, we included revenue from Ibbotson's plan sponsor advice service as Retirement Advice revenue. Previously, we included this revenue in Investment Consulting. In 2010 and 2009, as a part of the changes to our organizational structure with a focus on our global product lines, we no longer include Morningstar Site Builder as part of Morningstar Advisor Workstation. Site Builder consists of a set of integrated tools, content, and reports that investment firms can seamlessly add to their existing advisor websites. In addition, we're continuing to globalize the Premium subscriptions and advertising revenue generated by Morningstar.com websites, which operate in a variety of markets. As a result, we now include advertising revenue for all non-U.S. sites as part of Morningstar.com and have reclassified prior-year product revenue for consistency with current-year presentation.

Edgar Filing: Morningstar, Inc. - Form 10-K

These reclassifications did not have any impact on the order of our top five products in 2009 or 2008.

Top Five Products (Segment) 2010	Revenue (\$000)	% of Consolidated Revenue
Licensed Data (Investment Information)	\$ 98,186	17.7%
Investment Consulting (Investment Management)	72,798	13.1%
Morningstar Advisor Workstation (Investment Information)	69,321	12.5%
Morningstar.com (Investment Information)	49,673	8.9%
Morningstar Direct (Investment Information)	38,069	6.9%

Top Five Products (Segment) 2009	Revenue (\$000)	% of Consolidated Revenue
Licensed Data (Investment Information)	\$ 91,524	19.1%
Morningstar Advisor Workstation (Investment Information)	65,673	13.7%
Investment Consulting (Investment Management)	62,531	13.1%
Morningstar.com (Investment Information)	39,454	8.2%
Morningstar Direct (Investment Information)	29,968	6.3%

Top Five Products (Segment) 2008	Revenue (\$000)	% of Consolidated Revenue
Licensed Data (Investment Information)	\$ 78,329	15.6%
Investment Consulting (Investment Management)	76,150	15.2%
Morningstar Advisor Workstation (Investment Information)	64,222	12.8%
Morningstar.com (Investment Information)	45,684	9.1%
Principia (Investment Information)	27,791	5.5%

Retention and Renewal Rates

As discussed in *How We Evaluate Our Business*, we calculate retention and renewal rates to help measure how successful we've been in maintaining existing business for products and services that have renewable revenue. The following graph illustrates these two metrics over the past five years:

For contract-based products and services (such as Licensed Data, Investment Consulting, Morningstar Direct, and Morningstar Advisor Workstation), we estimate that our weighted average renewal rate was between 90% and 95% and increased about 13 percentage points from 2009. The 2009 renewal rate was depressed partly because of the end of the Global Analyst Research Settlement period. Excluding this factor, the 2010 renewal rate rose about 6 percentage points. This improvement reflects higher renewal rates for many product lines, including Licensed Data, Investment Consulting, institutional software, and advisor software. The figure for contract-based products includes the effect of price changes and changes to the contract value upon renewal, as well as changes in the value of variable-fee contracts.

In 2010, we estimate that our retention rate for subscription-based products, such as Principia, Morningstar.com Premium Membership service, and print and online newsletters, was on the higher end of the range between 65% and 70%, up from 55% to 60% in 2009. The change mainly reflects improved retention rates for individual software and Principia.

Consolidated Operating Expense

(\$000)	2010	2009	2008
Operating expense	\$ 434,292	\$ 354,323	\$ 363,581
% change	22.6%	(2.5)%	14.3%
% of revenue	78.2%	74.0%	72.4%
Change	4.2pp	1.6pp	(0.7)pp

2010 vs. 2009

Edgar Filing: Morningstar, Inc. - Form 10-K

In 2010, our consolidated operating expense increased \$80.0 million, or 22.6%. We completed seven acquisitions in 2010 and six in 2009. Because of the timing of these acquisitions, our results include operating expense that did not exist in the same periods last year. Incremental operating expense from acquired businesses represented more than half of the operating expense increase. In 2010, we restored some compensation and employee benefits after reducing them in 2009, contributing to the operating expense increase.

Higher salary expense represented slightly more than one-third of the total operating expense increase, reflecting higher headcount from acquisitions and filling open positions, as well as salary increases made in July 2010. We had approximately 3,225 employees worldwide as of December 31, 2010, a 23.8% increase from 2,605 as of December 31, 2009. We added about 125 employees through acquisitions over the 12 months ending December 31, 2010. The remainder of the increase in headcount mainly reflects continued hiring for our development centers in China and India.

Higher incentive compensation and employee benefit costs represented approximately 40% of the overall operating expense increase in 2010. In early 2010, we began phasing in some of the benefits and other compensation-related expense we reduced in 2009. As a result, bonus expense increased \$16.3 million, or 77.6%, in 2010. Sales commissions increased \$7.8 million in 2010, reflecting improved sales activity compared with 2009 as well as a change to one of our commission plans. Matching contributions to our 401(k) plan in the United States increased \$3.5 million in 2010 because we partially reinstated this employee benefit in 2010. In addition, healthcare benefit costs rose \$2.8 million in 2010. Operating expense in 2010 also included \$2.0 million related to a previously announced separation agreement between Morningstar and the former head of Morningstar Associates.

Intangible amortization expense increased \$5.9 million compared with 2009, reflecting additional amortization expense from recent acquisitions.

While operating expense generally increased in 2010, we recorded \$9.5 million of operating expense in 2009 related to adjusting the treatment of some incentive stock options and penalties related to the timing of deposits for taxes withheld on stock-option exercises that did not recur in 2010. In addition, the recorded expense related to increasing liabilities for vacant office declined by \$2.2 million compared with the amount recorded in 2009.

Operating expense as a percentage of revenue increased 4.2 percentage points in 2010, as the 22.6% increase in operating expense outpaced the 15.9% increase in revenue.

2009 vs. 2008

Our consolidated operating expense decreased \$9.3 million, or 2.5%, in 2009 compared with 2008. To better align operating expense with revenue in a challenging business environment, we took a number of steps to reduce costs beginning in 2008, with the largest cutbacks effective January 1, 2009. We changed our bonus plan in 2009 to reduce bonus expense, our single largest discretionary cost. As a result, bonus expense was down about \$28.9 million in 2009. The significant reduction in bonus expense also reflects a slowdown in our financial performance in 2009 compared with 2008.

We also suspended matching contributions to our 401(k) program in the United States, which reduced operating expense by about \$6.6 million. In addition, we reduced discretionary spending on travel, advertising, and marketing. Travel costs were about \$4.5 million lower in 2009. Advertising and marketing costs declined by \$4.3 million in 2009. In addition, we discontinued three publications previously published, which contributed to lower marketing expense in 2009.

Edgar Filing: Morningstar, Inc. - Form 10-K

The positive impact of these cost reductions was partially offset by incremental costs from acquisitions. We completed six acquisitions in 2009 and six in 2008. Because of the timing of these acquisitions, our 2009 results include operating expense that did not exist in 2008. Headcount and salary expense increased year over year, partly because of incremental employees added through acquisitions. We had approximately 2,605 employees worldwide as of December 31, 2009, a 9.7% increase from 2,375 employees as of December 31, 2008. We added approximately 170 employees through acquisitions over the 12 months ending December 31, 2009. The remainder of the increase in headcount reflects continued hiring for our development center in China.

The cost reductions we implemented in 2009 were offset by a total of \$9.5 million of operating expense for two separate matters. First, we recorded a \$6.1 million operating expense related to adjusting the tax treatment of certain stock options that were originally considered incentive stock options (ISOs). In 1998, 1999, and 2000, we granted ISOs to many employees. Upon exercise, ISOs typically have a favorable tax treatment for the employee relative to the tax treatment for non-qualified stock options (NQSOs). In 2009, we determined that certain ISOs granted to one former and two current executives should have been treated as NQSOs for the executives and our income tax purposes. As a result, Morningstar paid these individuals a total of \$4.9 million to compensate for the difference in tax treatment. We also recorded \$1.2 million, primarily for potential penalties related to this matter. This \$6.1 million expense is included in our operating expense as a general and administrative expense.

Edgar Filing: Morningstar, Inc. - Form 10-K

Second, we recorded an operating expense of \$3.4 million for penalties related to the timing of deposits for taxes withheld on stock-option exercises. The expense impacted each of our operating expense categories, with approximately half recorded as general and administrative expense. For some companies, including Morningstar, it is common practice for taxes withheld on stock-based compensation to be paid with the company's regularly scheduled payroll deposit. This approach, however, does not technically comply with Internal Revenue Service (IRS) guidelines concerning deposits of taxes withheld in connection with stock-based compensation, which generally require that if a company's cumulative deposit liability for all compensation exceeds \$100,000, the tax withholding must be deposited by the following business day. Transactions related to stock-based compensation frequently cause companies to exceed this threshold outside of their regularly scheduled payroll cycles, thus triggering the accelerated deposit rules. The subject of tax deposit penalties was part of an IRS audit that began in 2009 and concluded in early 2010. We have concluded the matter with the IRS and have increased the frequency of deposits for taxes withheld on stock-option exercises.

Operating expense in 2009 also included additional rent expense of \$3.2 million to increase a liability related to vacant office space, primarily for the former Ibbotson headquarters. We increased the liability because we anticipated receiving lower sublease income and expected it would take more time than previously estimated to identify a tenant.

Despite significant reductions to bonus expense, operating expense as a percentage of revenue increased 1.6 percentage points in 2009, mainly driven by the \$9.5 million of incremental operating expense described above and other expense increases.

Cost of Goods Sold

(\$000)	2010		2009		2008	
Cost of goods sold	\$	157,068	\$	128,616	\$	130,085
% change		22.1%		(1.1)%		14.3%
% of revenue		28.3%		26.9%		25.9%
Change		1.4pp		1.0pp		(0.2)pp
Gross profit	\$	398,283	\$	350,380	\$	372,372
% change		13.7%		(5.9)%		15.9%
Gross margin		71.7%		73.1%		74.1%
Change		(1.4)pp		(1.0)pp		0.2pp

Cost of goods sold is our largest category of operating expense, accounting for more than one-third of our total operating expense over the past three years. Our business relies heavily on human capital, and cost of goods sold includes the compensation expense for employees who produce our products and services.

Cost of goods sold rose \$28.5 million in 2010 after declining \$1.5 million in 2009. Approximately 60% of the increase in 2010 was related to recent acquisitions. Higher salaries, bonus expense, and other compensation-related expense also contributed to the increase. The majority of the decline in 2009 was driven by lower bonus expense and lower fulfillment expense, partially offset by incremental costs from acquisitions.

Edgar Filing: Morningstar, Inc. - Form 10-K

Gross margin declined by about 1.4 and 1.0 percentage points in 2010 and 2009, respectively.

Development Expense

(\$000)		2010		2009		2008
Development expense	\$	49,244	\$	38,378	\$	40,340
% change		28.3%		(4.9)%		14.9%
% of revenue		8.9%		8.0%		8.0%
Change		0.9pp				(0.1)pp

Development expense increased \$10.8 million in 2010 after declining \$1.9 million in 2009. The increase in 2010 is mainly because of higher salaries, bonus, and compensation-related expense for our development teams. Development expense from recent acquisitions also contributed to the increase, but to a lesser extent. We had approximately 760 employees included in development expense as of December 31, 2010 compared with 540 as of December 31, 2009. In 2010, we capitalized approximately \$0.8 million of operating expense for software development, partially offsetting the increase. The majority of the decline in 2009 was driven by lower bonus expense, partially offset by incremental costs from acquisitions.

Edgar Filing: Morningstar, Inc. - Form 10-K

As a percentage of revenue, development cost was up slightly from the same periods in 2009 and 2008.

Sales and Marketing Expense

(\$000)		2010		2009		2008
Sales and marketing expense	\$	95,473	\$	71,772	\$	81,651
% change		33.0%		(12.1)%		18.6%
% of revenue		17.2%		15.0%		16.3%
Change		2.2pp		(1.3)pp		0.5pp

Sales and marketing expense increased \$23.7 million in 2010, after declining \$9.9 million in 2009. Higher sales commission expense, which rose \$7.8 million in 2010, was the largest factor behind the increase. Commission expense rose partly because of improved sales activity. In addition, we recognized more expense in 2010 because of a change in our U.S. sales commission structure. Under this new commission plan, we record the entire commission expense in the quarter in which it is incurred. Under the previous commission structure, we recognized the commission expense over the term of the customer contract. Other costs in this category, including salaries and bonuses, and, to a lesser extent, advertising, marketing, and travel, also increased.

Approximately one-fourth of the increase in sales and marketing expense was related to recent acquisitions.

Sales and marketing expense decreased \$9.9 million in 2009. Lower bonus expense and advertising and marketing were the two largest factors driving this change, with each contributing about 40% of the decline. We reduced advertising and marketing from higher levels in 2008 because of the challenging business environment. In 2009, we also discontinued three of the publications we previously published in the first quarter of each year *Morningstar Funds 500*, *Morningstar Stocks 500*, and *Morningstar ETFs 150* and therefore didn't incur costs to promote these publications. Reduced spending on travel, training, and conferences also contributed to the decrease, but to a lesser extent.

As a percentage of revenue, sales and marketing expense increased about 2.2 percentage points in 2010, following a slight decrease in 2009.

General and Administrative Expense

(\$000)		2010		2009		2008
General and administrative expense	\$	92,843	\$	83,596	\$	85,509
% change		11.1%		(2.2)%		8.1%
% of revenue		16.7%		17.5%		17.0%
Change		(0.8)pp		0.5pp		(1.2)pp

Edgar Filing: Morningstar, Inc. - Form 10-K

General and administrative (G&A) expense increased \$9.2 million in 2010 following a decline of \$1.9 million in 2009. Bonus expense, salaries, and other compensation-related expense contributed to the increase in 2010, as did incremental expense related to acquisitions. G&A expense in 2010 also includes \$2.0 million related to a previously announced separation agreement between Morningstar and the former head of Morningstar Associates.

While most G&A expense rose in 2010, certain G&A expense recorded in 2009 did not recur in 2010, including the \$6.1 million of operating expense related to adjusting the tax treatment of certain stock options as well as \$1.8 million of operating expense recorded to G&A expense for the deposit penalty. Expenses related to liabilities for vacant office space were \$2.2 million lower in 2010.

In 2009, G&A expense decreased \$1.9 million. Most of the decline reflects lower bonus expense. Decreases in travel, training, and conferences also contributed to lower expense in this area, but to a lesser extent. These cost reductions were partially offset by the operating expense related to the two matters mentioned above, which contributed \$7.9 million to general and administrative expense in 2009.

As a percentage of revenue, G&A expense decreased 0.8 percentage points in 2010 and increased 0.5 percentage points in 2009.

Depreciation and Amortization Expense

(\$000)		2010		2009		2008
Depreciation expense	\$	14,814	\$	12,998	\$	9,348
Amortization expense		24,850		18,963		16,648
Total depreciation and amortization expense	\$	39,664	\$	31,961	\$	25,996
% change		24.1%		22.9%		22.3%
% of revenue		7.1%		6.7%		5.2%
Change		0.4pp		1.5pp		0.3pp

Depreciation expense rose \$1.8 million in 2010 and \$3.7 million in 2009. The increase in 2010 reflects incremental expense from acquisitions and accelerated depreciation expense related to our existing office space in China, in advance of moving into new office space. The increase in 2009 was primarily from higher depreciation expense associated with our new corporate headquarters in Chicago. Amortization expense increased \$5.9 million in 2010 and \$2.3 million in 2009, reflecting amortization of intangible assets related to acquisitions.

As a percentage of revenue, depreciation and amortization expense increased 0.4 percentage points in 2010.

We expect that amortization of intangible assets will be an ongoing cost for the remaining life of the assets. Based on acquisitions completed through December 31, 2010, we estimate that aggregate amortization expense for intangible assets will be \$25.7 million in 2011. Our estimates of future amortization expense for intangible assets may be affected by changes to the preliminary purchase price allocations associated with our 2010 acquisitions.

Stock-Based Compensation Expense

Stock-based compensation expense mainly relates to grants of restricted stock units (RSUs) and, beginning in 2010, includes expense related to restricted stock.

(\$000)		2010		2009		2008
Restricted stock units	\$	12,545	\$	10,591	\$	7,571
Restricted stock		1,248				
Stock options				1,002		3,710
Total stock-based compensation expense	\$	13,793	\$	11,593	\$	11,281

Restricted Stock Units: Our stock-based compensation expense related to RSUs has increased over the past three years, reflecting annual grants. We began granting RSUs in May 2006 and have made additional grants each year since then. We recognize the expense related to RSUs over the vesting period, which is generally four years. We estimate forfeitures for these awards and typically adjust the estimated forfeitures to actual forfeiture experience in the second quarter, which is when most of our larger equity grants typically vest. We have not recorded any significant changes to stock-based compensation related to these adjustments.

Restricted Stock: Beginning in 2010, we began recording expense related to restricted stock issued with the acquisition of Realpoint. In May 2010, we issued 199,174 shares that will vest over five years from the date of grant. This grant resulted in an expense of approximately \$1.2 million in 2010. We amortize this value to stock-based compensation expense ratably over the vesting period. We have assumed that all of the restricted stock will ultimately vest, and therefore haven't incorporated a forfeiture rate in this portion of our stock-based compensation expense.

Stock options: Stock-based compensation expense related to stock options has declined over the past three years, as stock options granted in previous years were fully vested as of January 1, 2010.

Edgar Filing: Morningstar, Inc. - Form 10-K

Stock-based compensation expense is included in each of our operating expense categories, as shown below:

(\$000)		2010		2009		2008
Cost of goods sold	\$	3,473	\$	2,666	\$	2,058
Development		1,840		1,570		1,402
Sales and marketing		1,786		1,587		1,449
General and administrative		6,694		5,770		6,372
Stock-based compensation expense	\$	13,793	\$	11,593	\$	11,281
% change		19.0%		2.8%		2.8%
% of revenue		2.5%		2.4%		2.2%
Change		0.1pp		0.2pp		(0.3)pp

Based on grants made through December 31, 2010, we anticipate that total stock-based compensation expense will be \$13.5 million in 2011. This amount is subject to change based on additional equity grants or changes in our estimated forfeiture rate related to these grants.

Bonus Expense

(\$000)		2010		2009		2008
Bonus expense	\$	37,322	\$	21,019	\$	49,912
% change		77.6%		(57.9)%		(4.0)%
% of revenue		6.7%		4.4%		9.9%
Change		2.3pp		(5.5)pp		(2.1)pp

Bonus expense, which we include in each of our operating expense categories, increased \$16.3 million in 2010 after declining \$28.9 million in 2009. We reduced our bonus expense in 2009 as part of our efforts to better align our cost structure with revenue in the challenging business environment. In 2010, we reinstated a portion of the bonus expense that was previously reduced. Bonus expense for newly acquired operations also contributed to the increase, but to a lesser extent.

Overall, bonus expense as a percentage of revenue increased about 2.3 percentage points in 2010 and represents about 6.7% of revenue. In 2009, bonus expense declined to 4.4% of revenue, compared with 9.9% in 2008. The significant reduction in bonus expense also reflects a slowdown in our financial performance in 2009 compared with 2008. Prior to 2009, bonus expense represented approximately 10% to 12% of revenue.

The amount of bonus expense is not a fixed cost. Instead, the size of the bonus pool varies each year based on a number of items, including changes in full-year operating income relative to the previous year and other factors. We review and update our estimates and the bonus pool size quarterly. We record bonus expense throughout the year and pay out annual bonuses to employees in the first quarter of the following year.

Consolidated Operating Income

Edgar Filing: Morningstar, Inc. - Form 10-K

(\$000)		2010		2009		2008
Operating income	\$	121,059	\$	124,673	\$	138,876
% change		(2.9)%		(10.2)%		18.7%
Operating margin		21.8%		26.0%		27.6%
Change		(4.2)pp		(1.6)pp		0.7pp

Consolidated operating income fell \$3.6 million in 2010. While revenue increased \$76.4 million, our cost base rose more, leading to lower operating income. The decline in operating income reflects higher incentive compensation, including higher bonus expense and sales commissions, modest compensation increases during the second half of 2010, and reinstating some of the employee benefits and other expenses we reduced in 2009. In 2010, costs rose across all of our operating expense categories, with the exception of a \$9.5 million operating expense recorded in 2009 that did not recur in 2010.

With operating expense increasing more than revenue, our operating margin was 4.2 percentage points lower in 2010. The margin decline mainly reflects higher compensation, bonuses, sales commissions, and employee benefits as a percentage of revenue. The loss of revenue from GARS also had a negative effect on margins. Acquisitions represented approximately 2 percentage points of the margin decline for the year.

Consolidated operating income decreased \$14.2 million in 2009, as the \$23.5 million decline in revenue was partially offset by a \$9.3 million reduction in operating expense. We took a number of steps to reduce our cost structure in 2009 mainly by reducing employee benefit costs and bonus expense. We reduced our single largest discretionary cost, bonus expense, by \$28.9 million, with changes to the bonus plan in 2009. We also suspended matching contributions to our 401(k) program in the United States, which accounted for about \$6.6 million of expense in 2008.

While we reduced operating expense in several areas with these cost-savings initiatives, we also recorded a total of \$9.5 million of unanticipated expense for two separate matters, including \$6.1 million of operating expense related to adjusting the tax treatment of incentive stock options granted in previous years and \$3.4 million of operating expense for penalties related to the timing of deposits for taxes withheld on stock-option exercises.

Because operating expense declined at a slower pace than revenue, the 2009 operating margin was down about 1.6 percentage points from 2008. The \$9.5 million of operating expense described above represented about 2 percentage points of the margin decline.

Consolidated Free Cash Flow

We define free cash flow as cash provided by or used for operating activities less capital expenditures. We present free cash flow solely as supplemental disclosure to help investors better understand how much cash is available after we spend money to operate our business. Our management team uses free cash flow to evaluate our business. Free cash flow is not a measure of performance set forth under GAAP. Also, the free cash flow definition we use may not be comparable to similarly titled measures used by other companies.

We generated positive free cash flow in 2010, 2009, and 2008 as our cash provided by operating activities has consistently exceeded our level of capital expenditures, as shown below:

(\$000)	2010	2009	2008	2010 Change	2009 Change
Cash provided by operating activities	\$ 123,416	\$ 101,256	\$ 149,339	21.9%	(32.2)%
Capital expenditures	(14,771)	(12,372)	(48,519)	19.4%	(74.5)%
Free cash flow	\$ 108,645	\$ 88,884	\$ 100,820	22.2%	(11.8)%

Free cash flow increased \$19.8 million in 2010 after declining \$11.9 million in 2009. Cash provided by operating activities and capital expenditures followed similar trends, increasing in 2010 after declining in 2009.

Cash provided by operating activities: Cash provided by operating activities increased \$22.2 million in 2010, mainly because cash paid in 2010 for bonuses was lower than in 2009. We made bonus payments of \$21.4 million in the first quarter of 2010, compared with \$58.9 million in the first quarter of 2009. The positive cash flow impact of a lower bonus payment was partially offset by \$4.9 million in payments we made to one former and two current executives related to adjusting the tax treatment of certain stock options originally considered incentive stock options (ISOs). We recorded the operating expense related to this matter in the fourth quarter of 2009.

Cash provided by operating activities decreased \$48.1 million in 2009 compared with 2008. The decline in cash provided by operating activities reflects a lower cash benefit from accrued compensation as well as an increase of \$9.6 million for bonus payments. We made bonus payments of \$58.9 million in the first quarter of 2009, compared with \$49.3 million in the first quarter of 2008. Bonuses paid in the first quarter of 2009 included \$10.0 million in payments deferred from 2007. We revised our bonus program in January 2009 and no longer defer payment of a portion of bonuses recorded in the prior year. In addition, cash provided by operating activities in 2008 included a \$18.9 million benefit from deferred rent, primarily for tenant improvement allowances related to the construction of our new corporate headquarters. This benefit did not recur in 2009. Excess tax benefits declined \$17.9 million in 2009 because of a reduction in the number of options exercised and lower average stock prices on the exercise dates.

Edgar Filing: Morningstar, Inc. - Form 10-K

To provide investors with additional insight into our financial results, we provide a comparison between the change in consolidated net income and the change in cash provided by operating activities:

(\$000)	2010	2009	2008	2010 Change	2009 Change
Consolidated net income	\$ 86,457	\$ 81,997	\$ 90,026	\$ 4,460	\$ (8,029)
Adjustments to reconcile consolidated net income to net cash flows from operating activities:					
Holding gain upon acquisition of additional ownership of equity method investments	(4,564)	(352)		(4,212)	(352)
Deferred income tax (benefit) expense	211	(2,207)	11,901	2,418	(14,108)
Excess tax benefits from stock-option exercises and vesting of restricted stock units	(7,507)	(8,693)	(26,638)	1,186	17,945
Depreciation and amortization expense	39,664	31,961	25,996	7,703	5,965
Stock-based compensation expense	13,793	11,593	11,281	2,200	312
All other non-cash items included in net income	(1,099)	702	(352)	(1,801)	1,054
Changes in operating assets and liabilities, net of effects of acquisitions:					
Cash paid for bonuses	(21,360)	(58,867)	(49,253)	37,507	(9,614)
Cash paid for income taxes	(37,624)	(38,009)	(19,782)	385	(18,227)
Accounts receivable	(23,652)	12,364	(658)	(36,016)	13,022
Deferred revenue	5,752	(8,704)	(1,595)	14,456	(7,109)
Income taxes current	42,193	49,685	41,860	(7,492)	7,825
Accrued compensation	33,526	32,138	46,920	1,388	(14,782)
Deferred rent	1,364	5,679	18,906	(4,315)	(13,227)
Other assets	(2,341)	2,521	1,573	(4,862)	948
Accounts payable and accrued liabilities	(759)	(9,476)	691	8,717	(10,167)
All other	(638)	(1,076)	(1,537)	438	461
Cash provided by operating activities	\$ 123,416	\$ 101,256	\$ 149,339	\$ 22,160	\$ (48,083)

In 2010, cash provided by operating activities increased more than consolidated net income. The \$37.5 million decrease in bonuses paid in 2010 compared with 2009 was the primary driver behind the difference between net income and cash provided by operations.

In 2009, cash provided by operating activities declined more than consolidated net income. Deferred rent of \$18.9 million, primarily for tenant improvement allowances received in connection with the build-out of our new headquarters in Chicago, benefited cash flow in 2008. The tenant improvement allowance received in 2008 is being amortized as a reduction in office lease expense over the lease term and will be deducted from net income to arrive at cash provided by operating activities. The \$18.2 million increase in tax payments, the \$9.6 million increase in bonuses paid in 2009, and a lower cash flow benefit from accrued compensation, primarily reflecting the reduction in the 2009 bonus expense, also contributed to the difference between net income and cash from operations.

FASB ASC 718, *Compensation - Stock Compensation*, requires that we classify excess tax benefits as a financing activity, which contributes to the difference between net income and cash from operations. In 2010, 2009, and 2008 we classified \$7.5 million, \$8.7 million, and \$26.6 million of excess tax benefits, respectively, as financing activities. We describe these excess tax benefits in the Liquidity and Capital Resources section.

Edgar Filing: Morningstar, Inc. - Form 10-K

Capital expenditures: We spent \$14.8 million for capital expenditures in 2010, primarily for computer hardware and leasehold improvements. A significant portion of the capital expenditures in 2010 are for new office space in Shenzhen, China. This new office facility was substantially completed in early 2011. In 2009, capital expenditures were \$12.4 million, a decrease of \$36.1 million from 2008 mainly because of the timing of payments related to our new corporate headquarters in Chicago.

Investment Information Segment

The Investment Information segment includes all of our data, software, and research products and services, which are typically sold through subscriptions or license agreements.

The largest products in this segment based on revenue are Morningstar Licensed Data, Morningstar Advisor Workstation, Morningstar.com, Morningstar Direct, Morningstar Site Builder and Licensed Tools, and Morningstar Principia. Licensed Data is a set of investment data spanning all of our investment databases and available through electronic data feeds. Advisor Workstation is a web-based investment planning system for advisors. Advisor Workstation is available in two editions: Morningstar Office for independent financial advisors and an enterprise edition for financial advisors affiliated with larger firms. Morningstar.com includes both Premium Memberships and Internet advertising sales. Morningstar Direct is a web-based institutional research platform. Site Builder and Licensed Tools are services that help institutional clients build customized websites or enhance their existing sites with Morningstar's online tools and components. Principia is our CD-ROM-based investment research and planning software for advisors.

The Investment Information segment also includes Morningstar Equity Research, which we distribute through several channels. From June 2004 through July 2009, our equity research was distributed through six major investment banks to meet the requirements for independent research under the Global Analyst Research Settlement (GARS). The period covered by GARS ended in July 2009. Although the banks covered by GARS are no longer required to provide independent research to their clients, we entered into equity research contracts with two of the banks that were clients under GARS. We also sell equity research to several other companies that purchase our research for their own use or provide our research to their affiliated financial advisors or to individual investors. In addition, we're continuing to provide broad equity coverage to individual investors, financial advisors, and institutions through a variety of other channels. In 2010, we replaced approximately one-third of the lost annual GARS revenue with other equity research business.

Edgar Filing: Morningstar, Inc. - Form 10-K

In December 2009, we began publishing research and ratings on corporate credit issuers. We entered into our first credit research agreement with a major financial services firm to provide credit ratings and research to its 18,000 financial advisors beginning in the third quarter of 2010. The firm's internal credit research team also has access to Morningstar Select, our institutional credit research platform. Although the revenue impact in 2010 was not significant, we believe this credit research agreement gives us an important foothold in this new area.

We also offer a variety of financial communications and newsletters, other investment software, and investment indexes.

This segment represented approximately 80% of our consolidated revenue in 2010, 2009, and 2008, respectively.

Revenue

Revenue from our Investment Information segment increased \$58.3 million, or 15.1%, to \$445.0 million in 2010. Acquisitions contributed \$40.4 million of revenue in 2010 primarily from LIM, Realpoint, OBSR, and CPMS. Revenue from acquisitions represents approximately 10 percentage points of the revenue increase in 2010. Excluding acquisitions, higher revenue in our software, data, and investment research products and services more than offset the loss of \$12.5 million of revenue from GARS, which expired at the end of July 2009. Organic revenue for our software product lines was up approximately \$18.2 million, driven by Morningstar.com, Morningstar Direct, and to a lesser extent from Advisor Workstation and Site Builder and Licensed Tools.

In 2009, revenue for our Investment Information segment declined \$4.1 million. Acquisitions contributed \$25.9 million to segment revenue in 2009, partially offsetting the \$30.0 million revenue decline experienced across a number of our product lines, including the loss of \$9.4 million of GARS revenue in 2009. Revenue from our investment research products was down \$17.2 million, or 24.1%. Approximately \$9.4 million of the decrease resulted from the end of GARS and an additional \$3.2 million of the decrease reflects lower revenue from investment newsletters. Organic revenue for software product lines was down about \$5.1 million, or 2.2%, driven by a \$6.4 million decline in the U.S. version of Morningstar.com and a \$0.3 million revenue decline in advisor software. These declines were partly offset by a \$2.4 million revenue increase for institutional software and data-related products and services.

Edgar Filing: Morningstar, Inc. - Form 10-K

Revenue for Morningstar.com, which includes Internet advertising sales and Premium Membership subscriptions, was the primary driver of the segment revenue increase in 2010. In 2010, positive trends in Internet advertising sales were partially offset by continued decline in Premium Membership revenue in the United States. Internet advertising increased 76.2% in 2010, after declining 36.9% in 2009. Subscriptions for the U.S. version of the Morningstar.com Premium service declined to 138,732 as of December 31, 2010 compared with 150,473 as of December 31, 2009, and 177,518 as of December 31, 2008. The shortfall in revenue was due to a weak trial pipeline but we believe our retention efforts stemmed the rate of decline in subscriptions in 2010. In addition, we moderately increased subscription prices for U.S. Premium Membership in both January 2010 and 2009, which partly offset the revenue decline associated with lower subscription levels.

Morningstar Direct made positive contributions to segment revenue in both 2010 and 2009. The number of licenses for Morningstar Direct increased to 4,773 worldwide as of December 31, 2010, compared with 3,524 as of December 31, 2009 and 2,961 as of December 31, 2008, with strong growth in the U.S. and internationally. The growth in licenses reflects additional licenses for both new and existing clients, as well as client migrations to Morningstar Direct from Institutional Workstation.

Advisor software revenue represented approximately 25.9% of the increase in segment revenue in 2010 as higher revenue from Advisor Workstation and Site Builder and Licensed Tools offset the decline in Principia revenue. In comparison, advisor software revenue was down in 2009 because lower Principia revenue more than offset the increase in Advisor Workstation and other products. Principia revenue declined 6.6% in 2010 and 14.3% in 2009. The decline partly reflects clients migrating from Principia to Advisor Workstation.

The number of U.S. licenses for Morningstar Advisor Workstation increased slightly to 153,170 as of December 31, 2010 from 148,392 as of December 31, 2009 and 151,874 as of December 31, 2008. Principia subscriptions totaled 32,681 as of December 31, 2010, down from 35,844 as of December 31, 2009 and 43,019 as of December 31, 2008.

Licensed Data made positive contributions to segment revenue in both 2010 and 2009, reflecting strong renewal rates and new client contracts. The Licensed Data service gives institutions access to a full range of proprietary investment data spanning numerous investment databases, including real-time pricing data. The data packages we offer include proprietary statistics, such as the Morningstar Style Box and Morningstar Rating, and a wide range of other data, including information on investment performance, risk, portfolios, operations data, fees and expenses, cash flows, and ownership.

Investment research revenue declined in 2010 as well as in 2009. As mentioned above, the period covered by GARS expired at the end of July 2009. Our post-settlement equity research revenue in 2010 replaced approximately one-third of the annual GARS revenue. GARS revenue was \$12.5 million in 2009, compared with \$21.9 million in 2008. We entered into new equity research contracts with two of the banks that were clients under GARS. In addition, we re continuing to provide broad equity coverage to individual investors, financial advisors, and institutions through a variety of other channels.

Revenue from our other investment research products was essentially flat in 2010 after declining in 2009. In 2010, higher revenue from conferences and corporate credit ratings research helped offset the continuing decline in revenue from newsletters and books. In the first quarter of 2009, we discontinued three of the print publications we previously published in the first quarter of each year: *Morningstar Funds 500*, *Morningstar Stocks 500*, and *Morningstar ETFs 150*. Lower advertising revenue from publications sold in Australia and lower revenue from the annual Morningstar Investment Conference held in the second quarter also contributed to the decline in 2009.

Operating Income

In 2010, operating income for the Investment Information segment decreased \$10.7 million, or 7.7%, as operating expense increased more than revenue.

Operating expense was up \$69.0 million in 2010, with additional costs from acquisitions contributing approximately 45% of the increase. Higher salaries (reflecting expanded headcount) and incentive compensation (including bonus and sales commission expense) also contributed to the increase. Bonus expense increased \$10.9 million in 2010, including incremental bonus expense from recent acquisitions. An increase in employee benefits expense, including employee healthcare benefits and the partial reinstatement of matching contributions to our 401(k) plan in the United States, also contributed to the increase, but to a lesser extent.

Operating margin for the Investment Information segment declined 7.1 percentage points in 2010. Approximately 6.4 percentage points of the margin decline reflects higher compensation-related expense as a percentage of revenue. Acquisitions had a slightly negative impact on the margin.

In 2009, operating income for the Investment Information segment was \$138.4 million, a slight decrease compared with 2008, as the \$4.1 million decline in revenue was partially offset by lower operating expense.

Operating expense decreased \$3.8 million in 2009 as cost reductions for bonuses, other compensation expense, and advertising and marketing were partially offset by additional operating expense from acquisitions. Bonus expense declined \$11.0 million in 2009. Most of this reduction reflects the changes we made to our bonus program for 2009 as part of our efforts to better align our cost structure with revenue. The reduction in bonus expense also reflects a slowdown in our financial performance in 2009 compared with 2008. Other compensation-related expense was down, primarily because we suspended matching contributions to our 401(k) plan in the United States, reducing operating expense by \$4.3 million in 2009.

Sales and marketing costs decreased \$8.3 million in 2009. Most of the decline reflects lower spending on advertising and marketing (primarily direct mail expense) and lower travel costs, which we pared back because of the challenging business environment. As mentioned above, we discontinued three of the publications we previously published in the first quarter of each year, and therefore didn't incur costs to promote these publications in 2009.

Investment Management Segment

The Investment Management segment includes all of our asset management operations, which operate as registered investment advisors and earn more than half of their revenue from asset-based fees.

The key products and services in this segment based on revenue are Investment Consulting, which focuses on investment monitoring and asset allocation for funds of funds, including mutual funds and variable annuities; Retirement Advice, including the Morningstar Retirement Manager and Advice by Ibbotson platforms; and Morningstar Managed Portfolios, a fee-based discretionary asset management service that includes a series of mutual fund, exchange-traded fund, and stock portfolios tailored to meet a range of investment time horizons, risk levels, and investment strategies that financial advisors can use for their clients taxable and tax-deferred accounts.

In the majority of our contracts that include variable asset-based fees, we bill clients quarterly in arrears based on average assets for the quarter. The method of calculation varies by client; some contracts include provisions for calculating average assets based on daily data, while others use weekly or monthly data. Other contracts may include provisions for monthly billing or billing based on assets as of the last day of the billing period rather than on average assets.

Our Investment Consulting business has multiple fee structures, which vary by client. In general, we seek to receive asset-based fees for any work we perform that involves investment management or acting as a subadvisor to investment portfolios. For any individual contract, we may receive flat fees, variable asset-based fees, or a combination of the two. Some of our contracts include

Edgar Filing: Morningstar, Inc. - Form 10-K

minimum fee levels that provide us with a flat payment up to a specified asset level, above which we also receive variable asset-based fees.

In our Retirement Advice business, our contracts may include fixed fees for advice and guidance, one-time setup fees, technology licensing fees, asset-based fees for managed retirement accounts, or a combination of these fee structures.

We do not disclose a fee range for our Investment Consulting and Retirement Advice businesses because our fee structures are customized by client. In addition, we believe disclosing a fee range would be detrimental to our competitive position. We disclose changes in the nature of the underlying services we provide or their associated fee structures (for example, a change from flat fees to asset-based fees) in our periodic filings to the extent that they are material to our financial results.

For Morningstar Managed Portfolios, we charge asset-based fees, which are based on a tiered schedule that depends on the client's average daily account balance. Fees for our mutual fund and ETF portfolios generally range from 30 to 40 basis points. We charge 55 basis points for our customized stock portfolios.

This segment represented approximately 20% of our consolidated revenue in 2010, 2009, and 2008, respectively.

Revenue

Investment Management segment revenue increased \$18.0 million, or 19.5%, in 2010. Acquisitions contributed \$7.5 million of revenue in 2010, primarily from the Intech and OBSR acquisitions. Excluding acquisitions, revenue increased across all product categories in 2010.

Retirement Advice was the main driver of the revenue increase in 2010. We primarily earn license-based fees for the advice and guidance services we provide through our Retirement Advice platform. Revenue for these services increased in 2010 primarily from Advice by Ibbotson, after declining in 2009 because of several smaller client non-renewals. Investment Consulting and Managed Portfolios also contributed to the revenue increase in 2010, but to a lesser extent. Higher revenue from Investment Consulting in 2010 was partially offset by a client non-renewal that occurred in the fourth quarter of 2009.

The revenue increase in 2010 represented a positive change from trends in 2009. In 2009, Investment Management revenue was down 17.4%, driven by two Investment Consulting non-renewals. In 2009, Investment Consulting, which was a leading contributor to revenue growth in previous years, accounted for about three-fourths of the segment's revenue decline. One client did not renew its contract when it expired in the fourth quarter of 2008 and another client did not renew its contract in May 2009. Combined, these contracts represented about \$17 million of revenue in 2008. Acquisitions contributed \$3.7 million to segment revenue in 2009, partially mitigating the revenue decline.

Edgar Filing: Morningstar, Inc. - Form 10-K

We had approximately \$67.7 million in revenue from asset-based fees in 2010, an increase of approximately 21% compared with \$56.0 million in 2009. In 2008, revenue from asset-based fees was \$66.6 million. Revenue from asset-based fees made up approximately 12% of consolidated revenue in both 2010 and 2009, down slightly from 13% in 2008. Within the Investment Management segment, revenue from asset-based fees made up approximately 60% of segment revenue over the past three years.

Total assets under advisement and management were \$132.9 billion as of December 31, 2010, an increase from \$82.6 billion as of December 31, 2009 and \$78.8 billion as of December 31, 2008. About \$39.0 billion of the total assets as of December 31, 2010 reflects a new fund-of-funds program that began in May 2010 for an existing Morningstar Associates client. Previously, Morningstar created model portfolios for the same client, so the increase in assets represents incremental growth for an existing revenue stream. Excluding assets from the new fund-of-funds program, total assets under advisement and management increased, mainly reflecting positive market performance. Total assets under advisement also include approximately \$3.4 billion from the Intech acquisition in July 2009.

Edgar Filing: Morningstar, Inc. - Form 10-K

The asset totals as of the end of each year don't fully reflect the change in average asset levels during the year. The asset-based fees we earn are primarily based on average asset levels during each quarter. Average assets under advisement and management (calculated based on available quarterly or monthly data) were approximately \$102.3 billion in 2010, up about 35% from \$78.6 billion in 2009. In 2009, average asset levels declined from substantially higher levels in 2008. Average assets under advisement and management were \$103.9 billion in 2008.

Assets under Advisement for Investment Consulting

Assets under advisement for Investment Consulting (\$ billions)	As of December 31			
	2010	2009	2008	
Ibbotson Associates	\$ 46.4	\$ 39.9	\$ 36.6	
Morningstar Associates	60.8	21.5	21.5	
Total	\$ 107.2	\$ 61.4	\$ 66.2	

We provided Investment Consulting advisory services on approximately \$107.2 billion in assets as of December 31, 2010, compared with approximately \$61.4 billion as of December 31, 2009 and approximately \$66.2 billion as of December 31, 2008. The asset totals include relationships for which we receive basis-point fees, including consulting arrangements and other agreements where we act as a portfolio construction manager for a mutual fund or variable annuity. We also provide Investment Consulting services for some assets under management for which we receive a flat fee; we do not include these assets in the total reported above. Excluding changes related to new contracts and cancellations, changes in the value of assets under advisement can come from two primary sources: gains or losses related to overall trends in market performance, and net inflows or outflows caused when investors add to or redeem shares from these portfolios. As mentioned above, assets under advisement as of December 31, 2010 includes approximately \$39 billion related to a new fund-of-funds program that began in May 2010 for an existing Morningstar Associates client. Excluding assets from the new fund-of-funds program, assets under advisement for Investment Consulting increased slightly over 2009, mainly reflecting positive market performance partially offset by a client non-renewal that occurred in the fourth quarter of 2009.

Total assets under advisement for Investment Consulting as of December 31, 2009 declined approximately 7.3% compared with December 31, 2008, as assets under advisement from Morningstar Associates declined 27.4%, which was partially offset by assets under advisement from Ibbotson Associates, which increased about 9.0%. The majority of the asset decline in 2009 reflects the loss of one of the contracts discussed above, partially offset by positive market performance, and, to a lesser extent, from net inflows and new client wins in assets under advisement.

We cannot separately quantify cash inflows and outflows for these portfolios because we do not have custody of the assets in the majority of our investment management business. The information we receive from our clients does not separately identify the impact of cash inflows and outflows on asset balances for each period. We also cannot precisely quantify the impact of market appreciation or depreciation because the majority of our clients have discretionary authority to implement their own portfolio allocations.

Assets under Management for Managed Retirement Accounts

Assets under management for managed retirement accounts (\$ billions)	As of December 31		
	2010	2009	2008

Edgar Filing: Morningstar, Inc. - Form 10-K

Advice by Ibbotson	\$	17.6	\$	14.2	\$	10.0
Morningstar Retirement Manager		2.0		1.5		1.0
Total	\$	19.6	\$	15.7	\$	11.0

Assets under management for Retirement Advice increased to \$19.6 billion as of December 31, 2010, compared with \$15.7 billion as of December 31, 2009 and \$11.0 billion as of December 31, 2008.

We cannot separately quantify the factors affecting assets under management for our managed retirement accounts. These factors primarily consist of employer and employee contributions, plan administrative fees, market movements, and participant loans and hardship withdrawals. We cannot quantify the impact of these other factors because the information we receive from the plan providers does not separately identify these transactions or the changes in balances due to market movement.

Edgar Filing: Morningstar, Inc. - Form 10-K

The tables below show the breakdown of retirement plan participants who had access to the services offered through Morningstar Retirement Manager and Advice by Ibbotson, as well as the number of plan sponsors and plan providers that provide this access.

	As of December 31		
	2010	2009	2008
Plan Participants (millions)			
Advice by Ibbotson	10.1	9.5	8.9
Morningstar Retirement Manager	13.4	11.2	8.3
Total	23.5	20.7	17.2
Plan Sponsors (approximate)	2010	2009	2008
Advice by Ibbotson	68,000	68,000	68,000
Morningstar Retirement Manager	82,000	83,000	72,000
Total	150,000	151,000	140,000
Plan Providers	2010	2009	2008
Advice by Ibbotson	7	7	7
Morningstar Retirement Manager	16	16	17
Total	23	23	24

Morningstar Managed Portfolios

Morningstar Managed Portfolios also contributed to the segment's revenue increase in 2010, although to a lesser extent than Retirement Advice. The higher revenue mainly reflects higher average asset levels during 2010 compared with 2009. Assets under management for Morningstar Managed Portfolios were \$2.7 billion as of December 31, 2010 compared with \$2.1 billion as of December 31, 2009 and \$1.6 billion as of December 31, 2008, reflecting positive equity market returns and net inflows.

Operating Income

In 2010, operating income for the Investment Management segment increased \$3.9 million, or 7.4%, as revenue increased more than operating expense. In contrast, 2009 operating income declined \$7.5 million, or 12.4%, as reductions in operating expense were not sufficient enough to outweigh the revenue decline.

In 2010, operating expense in this segment rose \$14.1 million, or 35.8%, after declining \$11.9 million, or 23.2%, in 2009. Approximately 40% of the segment's operating expense increase reflects recent acquisitions. Higher salaries and incentive compensation, including bonuses and sales commissions, contributed approximately two-thirds of the overall operating expense increase in this segment. Bonus expense rose \$4.2 million in 2010. Sales commissions and employee benefits, including employee healthcare benefits and matching contributions to our 401(k) plan in the United States, also increased, but to a lesser extent. Operating expense in 2010 also includes \$2.0 million related to a separation agreement between Morningstar and the former head of Morningstar Associates. A slight reduction in product implementation fees related to our Advice by Ibbotson service partially offset these increases.

In 2009, the operating expense decrease was primarily because of lower bonus and other compensation-related expense, partially offset by additional operating expense related to the Intech acquisition. Bonus expense declined \$10.4 million in 2009. Most of this

Edgar Filing: Morningstar, Inc. - Form 10-K

reduction reflects the changes we made to our bonus program for 2009 as part of our efforts to better align our cost structure with revenue. The reduction in bonus expense also reflects a slowdown in our financial performance in 2009 compared with 2008. Other compensation-related expense was down, primarily because we suspended matching contributions to our 401(k) plan in the United States, reducing operating expense by \$1.3 million in 2009. A slight reduction in product implementation fees related to our Advice by Ibbotson service also contributed to the decrease.

The segment's operating margin in the segment decreased 5.8 percentage points to 51.5% in 2010. The margin decline mainly reflects higher bonus expense as a percentage of revenue. The \$2.0 million separation payment reduced the margin by approximately 2.0 percentage points. Salaries and employee benefits also contributed to the margin decline, but to a lesser extent. In addition, acquisitions had a negative impact on the margin of approximately 1.6 percentage points.

Operating margin was 57.3% in 2009, an increase of 3.3 percentage points over 2008. Lower bonus expense as a percentage of revenue was the main driver of the margin improvement. The decrease in other compensation-related expense also contributed to the margin improvement, although to a much lesser extent. These factors were offset by incremental costs from the Intech acquisition and higher compensation expense as a percentage of revenue.

Corporate Items

We do not allocate corporate costs to our business segments. The corporate items category also includes amortization expense related to intangible assets recorded when we allocate the purchase price of acquisitions. The table below shows the components of corporate items that impacted our consolidated operating income:

(\$000)		2010		2009		2008
Amortization expense	\$	24,850	\$	18,963	\$	16,648
Depreciation expense		7,244		7,386		3,902
Corporate unallocated		31,403		40,296		39,629
Corporate items	\$	63,497	\$	66,645	\$	60,179
% change		(4.7%)		10.7%		13.4%

Amortization of intangible assets increased \$5.9 million in 2010 and \$2.4 million in 2009, mainly reflecting incremental amortization expense related to acquisitions completed in 2010 and 2009. We paid \$281.9 million for acquisitions during the past three years. As of December 31, 2010 and December 31, 2009, respectively, we had \$169.0 million and \$135.5 million of net intangible assets. We amortize these intangible assets over their estimated lives, ranging from one to 25 years. Based on acquisitions completed through December 31, 2010, we estimate that aggregate amortization expense for intangible assets will be approximately \$25.7 million in 2011. Some of the purchase price allocations are preliminary, and the values assigned to intangible assets and the associated amortization expense may change in future periods.

After increasing \$3.5 million in 2009, depreciation expense for corporate departments did not change significantly in 2010 from 2009. We relocated to our new corporate headquarters in the fourth quarter of 2008, resulting in higher depreciation expense in the subsequent years.

In 2010, corporate unallocated expense decreased \$8.9 million, as some expenses recorded in 2009 did not recur in 2010. Corporate unallocated expense in 2009 includes \$9.5 million of expense related to adjusting the tax treatment of certain stock options and deposit penalties. In 2010, expense related to liabilities for vacant office space declined \$2.2 million. In addition, in 2010 we capitalized approximately \$0.8 million of operating expense for software development. These factors, which favorably impact the year-over-year comparison, were partially offset by incremental expense from acquisitions, higher compensation and bonus expense, and higher professional fees.

Corporate unallocated increased \$0.7 million in 2009 as certain expenses recorded in 2009 more than offset the expense reductions implemented in 2009. The increases included the \$6.1 million of operating expense related to adjusting the tax treatment of certain stock options originally considered incentive stock options, as well as an operating expense for the deposit penalty of \$3.4 million. This category also includes a \$3.2 million expense to increase lease vacancy reserves, primarily for the former Ibbotson headquarters.

Equity in Net Income of Unconsolidated Entities, Non-Operating Income, and Income Tax Expense

Equity in Net Income of Unconsolidated Entities

(\$000)		2010		2009		2008
Equity in net income of unconsolidated entities	\$	1,422	\$	1,165	\$	1,321

Equity in net income of unconsolidated entities includes our portion of the net income (loss) of Morningstar Japan K.K. (MJKK) and Morningstar Sweden AB. In the first six months of 2010, this category also included our portion of the net income (loss) of Morningstar Denmark. In 2009 and 2008, this category also included our portion of the net income (loss) of Morningstar Denmark and Morningstar Korea. Equity in net income of unconsolidated entities is primarily from our position in MJKK.

Edgar Filing: Morningstar, Inc. - Form 10-K

In 2010, we acquired an additional 75% ownership interest in Morningstar Denmark, increasing our ownership percentage to 100%. As a result, we no longer account for our investment in Morningstar Denmark using the equity method. In July 2010, we began consolidating the assets, liabilities, and results of operations of Morningstar Denmark in our Consolidated Financial Statements.

In 2009, we acquired an additional 40% ownership interest in Morningstar Korea, increasing our ownership percentage to 80%. As a result, we no longer account for our investment in Morningstar Korea using the equity method. In September 2009, we began consolidating the assets, liabilities, and results of operations of Morningstar Korea in our Consolidated Financial Statements.

We describe our investments in unconsolidated entities in more detail in Note 8 of the Notes to our Consolidated Financial Statements.

Non-Operating Income

The following table presents the components of net non-operating income:

(\$000)		2010		2009		2008
Interest income, net	\$	2,437	\$	3,016	\$	5,687
Other income (expense), net		4,295		(82)		(1,435)
Non-operating income, net	\$	6,732	\$	2,934	\$	4,252

Interest income, net mainly reflects interest from our investment portfolio. Net interest income decreased \$0.6 million in 2010 and \$2.7 million during 2009. The decrease in both years reflects lower returns on our invested balances during the year.

Other income, net primarily represents foreign currency exchange gains and losses arising from the ordinary course of business related to our U.S. and non-U.S. operations. It also includes royalty income from MJKK and realized gains and losses from our investment portfolio. In 2010, we recorded a holding gain of approximately \$4.6 million. This gain represents the difference between the estimated fair value and the book value of our investment in Morningstar Denmark at the date of acquisition. In 2009, we recorded a holding gain of approximately \$0.4 million when we increased our ownership in Morningstar Korea.

Income Tax Expense

The following table summarizes our effective tax rate:

(\$000)		2010		2009		2008
Income before income taxes and equity in net income of unconsolidated entities	\$	127,791	\$	127,607	\$	143,128

Edgar Filing: Morningstar, Inc. - Form 10-K

Equity in net income of unconsolidated entities		1,422		1,165		1,321
Net (income) loss attributable to noncontrolling interests		(87)		132		(397)
Total	\$	129,126	\$	128,904	\$	144,052
Income tax expense	\$	42,756	\$	46,775	\$	54,423
Effective tax rate		33.1%		36.3%		37.8%

For a reconciliation of the U.S. federal tax rate to our effective income tax rate, refer to Note 15 of the Notes to our Consolidated Financial Statements.

In 2010, our effective tax rate was 33.1%, a decrease of 3.2 percentage points compared with 2009. The lower tax rate in 2010 reflects the positive impact of certain income tax benefits, including the difference between U.S. federal and foreign tax rates, tax credits related to Morningstar's research and development activities, and the use of foreign net operating losses that had previously been subject to a valuation allowance. These items favorably impacted our effective tax rate by approximately 3.7 percentage points in 2010.

Income tax expense in 2010 includes approximately \$1.7 million of non-cash expense related to the \$4.6 million holding gain we recorded in conjunction with the acquisition of Morningstar Denmark. This income tax expense did not have a significant impact on our effective tax rate in 2010.

In 2009, our effective tax rate decreased by 1.5 percentage points compared with 2008 despite several items that increased our effective tax rate. State income taxes represented 2.7 percentage points of our effective tax rate compared with 1.5 percentage points in 2008, due to a favorable impact from reducing accruals for state income taxes in 2008 that did not recur in 2009.

Second, in 2009, we recorded an operating expense of \$3.4 million for penalties related to the timing of deposits for taxes withheld on stock-option exercises. This penalty is not deductible for income tax purposes and increased our effective tax rate by 1.1 percentage points.

The \$6.1 million of operating expense related to adjusting the tax treatment of stock options originally considered incentive stock options increased the effective tax rate by 0.8 percentage points, as these operating expenses are subject to deduction limitations for income tax purposes.

The above items, which increased our effective tax rate, were partially offset by three main factors. First, research and development and foreign tax credits, some from previous years, reduced the 2009 effective tax rate by 2.5 percentage points. A reversal of reserves for uncertain tax positions, primarily as a result of a lapse in the statute of limitations, also reduced our effective tax rate by 1.4 percentage points in 2009.

As of December 31, 2010, we had net operating loss (NOL) carryforwards of \$49.0 million related to our non-U.S. operations and have recorded a valuation allowance against all but \$5.6 million of these NOLs. Because of the historical operating losses for certain non-U.S. operations, a valuation allowance is required because we do not believe that we will be able to use all of our non-U.S. NOLs.

Certain positions we have taken or intend to take on our U.S. and non-U.S. tax returns may be reviewed by tax authorities in the jurisdictions in which we operate. As of December 31, 2010, we had approximately \$9.1 million of gross unrecognized tax benefits, of which \$8.5 million, if recognized, would reduce our effective income tax rate and decrease our income tax expense by \$6.9 million. It is not possible to estimate the impact of current audits on previously recorded unrecognized tax benefits.

We anticipate that our effective income tax rate may continue to fluctuate related to the creation or reversal of valuation allowances for our non-U.S. operations as well as to changes in unrecognized tax benefits.

Liquidity and Capital Resources

We believe our available cash balances and investments, along with cash generated from operations, will be sufficient to meet our operating and cash needs for the foreseeable future. We invest our cash reserves in cash equivalents and investments, consisting primarily of fixed-income securities. We maintain a conservative investment policy for our investments, emphasizing principal preservation, and invest a portion of these assets in municipal securities with high-quality stand-alone credit ratings. Investments in our portfolio have a maximum maturity of two years; the weighted average maturity is approximately one year.

We intend to use our cash, cash equivalents, and investments for general corporate purposes, including working capital and funding future growth. To date we have not needed to access any significant commercial credit and have not attempted to borrow or establish any lines of credit. Over the past three years, we invested \$281.9 million for acquisitions, less cash acquired, with internally generated funds.

We expect to make a recurring quarterly dividend payment. We paid our first dividend in January 2011 to shareholders of record as of December 31, 2010. This dividend was 5 cents per share for a total cash payment of \$2.5 million. In September 2010, our board of directors also approved a share repurchase program that authorizes a repurchase of up to \$100 million of our outstanding common stock. Through December 31, 2010, we paid \$3.8 million to repurchase shares of our common stock under this program. From time to time we may repurchase shares at prevailing market prices on the open market or in private transactions in amounts that we deem appropriate.

Cash, Cash Equivalents, and Investments

As of December 31, 2010, we had cash, cash equivalents, and investments of \$365.4 million, an increase of \$22.9 million compared with December 31, 2009. This increase mainly reflects cash provided by operating activities and proceeds received from employee stock-option exercises, partially offset by payments for acquisitions and capital expenditures.

We used a portion of our cash and investments balances in the first quarter of 2011 to make annual bonus payments of approximately \$38 million. In 2011, we expect to pay approximately \$4.2 million to two former executives as part of previously announced separation agreements.

Cash Provided by Operating Activities

Our main source of capital is cash generated from operating activities. We typically pay bonuses in the first quarter of the year. As a result, cash flow from operations in the first quarter tends to be lower compared with subsequent quarters.

In 2010, cash provided by operating activities was \$123.4 million, an increase of \$22.2 million over 2009. The increase primarily reflects lower bonus payments in 2010. We paid \$21.4 million in annual bonus payments in the first quarter of 2010, compared with \$58.9 million in 2009. The bonuses paid in 2009 included approximately \$48.9 million of bonus expense recorded in 2008 and approximately \$10.0 million of bonus payments deferred from 2007. In accordance with bonus program revisions adopted in January 2009, we no longer defer payment of a portion of the bonus from prior years.

Edgar Filing: Morningstar, Inc. - Form 10-K

In addition, in 2010, we paid \$4.9 million to one former and two current executives to adjust the tax treatment of certain stock options originally considered incentive stock options.

In 2009, cash provided by operating activities was \$101.3 million, driven by \$115.0 million of net income (adjusted for non-cash items) partially offset by \$13.7 million of changes in our net operating assets and liabilities, mainly driven by bonus payments. We paid \$58.9 million for bonuses in 2009, including \$10.0 million in deferred payments from 2007. The cash flow impact of these payments was partially offset by the cash flow benefit from accrued compensation for the 2009 bonuses.

In 2008, cash provided by operating activities was \$149.3 million, driven by \$112.2 million of net income (adjusted for non-cash items) and \$37.1 million of changes in our net operating assets and liabilities. Changes in our operating assets and liabilities benefited from a \$18.9 million increase in deferred rent related to tenant improvement allowances received in connection with the build-out of our new headquarters, a \$46.9 million increase in accrued compensation, and a \$41.9 million increase in income taxes payable. Bonus payments of approximately \$49.3 million and tax payments of \$19.8 million offset these cash flow benefits.

Cash Used for Investing Activities

Cash used for investing activities consists primarily of cash used for acquisitions, purchases of investments less proceeds from the maturity or sale of investments, and cash used for capital expenditures. The level of investing activities can vary from period to period depending on the level of activity in these three categories. Cash used for investing activities was \$87.9 million in 2010, \$174.7 million in 2009, and \$179.1 million in 2008.

Cash used for acquisitions in 2010, net of cash acquired, was \$102.3 million. We completed seven acquisitions in 2010. The majority of the cash used for acquisitions was related to our purchase of Realpoint, OBSR, Morningstar Denmark, and the annuity intelligence business of Advanced Sales and Marketing Corp. In comparison, cash used for acquisitions, net of acquired cash, was \$74.2 million in 2009. We completed six acquisitions in 2009 and increased our investment in Morningstar Korea. The majority of the cash used for acquisitions was related to our purchase of LIM and our acquisition of the equity research and data business CPMS. In 2008, cash used for acquisitions, net of cash acquired, was \$105.4 million, with the majority of this used for our acquisition of the Hemscott data, media, and investor relations website businesses and Tenfore Systems Limited.

In 2010, proceeds from the maturity and sale of investments exceeded the purchases of investments by \$28.6 million. In contrast, purchases of investments, net of proceeds from the maturity and sale of investments, were \$83.9 million and \$24.9 million in 2009 and 2008, respectively. In 2010, we transferred funds from our investment portfolio to cash and cash equivalents to pay for acquisitions made in 2010. As of December 31, 2010 and 2009, we had investments, consisting primarily of fixed-income securities, of \$185.2 million and \$212.1 million, respectively. As of December 31, 2010, our investments represented approximately 51% of our total cash, cash equivalents, and investments, down 11 percentage points compared with December 31, 2009.

Edgar Filing: Morningstar, Inc. - Form 10-K

Capital expenditures were \$14.8 million, \$12.4 million, and \$48.5 million in 2010, 2009, and 2008, respectively. The 2010 capital expenditures include spending for our new office space in Shenzhen, China. Capital expenditures peaked in 2008 when we paid for the build-out of our new headquarters in Chicago. Some of the cash outlay for this investment continued into 2009. Capital expenditures in 2009 also include investment for a couple of our office locations in Europe. Tenant improvement allowances of \$16.3 million, which are included in cash provided by operating activities, reduced the total amount of cash we paid for the headquarters build-out in 2008. We expect to make capital expenditures of approximately \$14 million to \$17 million in 2011, primarily for leasehold improvements at new and existing office locations. A portion of this includes remaining payments for our new development center in China.

Cash Provided by Financing Activities

Cash provided by financing activities consists primarily of proceeds from stock-option exercises and excess tax benefits related to stock-option exercises and vesting of restricted stock units. These cash inflows are offset by cash used to repurchase outstanding common stock through our share repurchase program.

Excess tax benefits occur at the time a stock option is exercised when the intrinsic value of the option (the difference between the fair value of our stock on the date of exercise and the exercise price of the option) is greater than the fair value of the option at the time of grant. Similarly, the vesting of restricted stock units generates excess tax benefits when the market value of our common stock on the vesting date exceeds the grant price of the restricted stock units. These excess tax benefits reduce the cash we pay for income taxes in the year they are recognized. It is not possible to predict the timing of stock-option exercises or the intrinsic value that will be achieved at the time options are exercised or upon vesting of restricted stock units. As a result, we expect cash flow from financing activities to vary over time. Note 11 in the Notes to our Consolidated Financial Statements includes additional information concerning stock options and restricted stock units outstanding as of December 31, 2010.

In 2010, cash provided by financing activities was \$12.5 million. Proceeds from stock-option exercises totaled \$9.2 million, while excess tax benefits related to stock-option exercises and vesting of restricted stock units totaled \$7.5 million. Partially offsetting these inflows was \$3.8 million of cash used to repurchase outstanding common stock through our share repurchase program. In 2010, cash provided by financing activities decreased by \$12.8 million, driven by a decrease in proceeds from stock-option exercises, a decline in excess tax benefits, and (to a lesser extent) cash used to repurchase common shares.

In 2009, cash provided by financing activities was \$25.3 million. Proceeds from stock-option exercises totaled \$16.4 million and excess tax benefits related to stock option exercises and vesting of restricted stock units totaled \$8.7 million. In 2009, cash provided by financing activities decreased by \$25.4 million, or 50.1%, compared with 2008, driven mostly by a \$17.9 million decline in excess tax benefits, and to a lesser extent by a \$7.0 million decline in proceeds from stock-option exercises. The decrease mainly reflects a lower average stock price at the time the stock options were exercised and a decrease in the number of options exercised.

Employees exercised approximately 0.8 million, 1.4 million, and 2.4 million stock options in 2010, 2009, and 2008, respectively. The total intrinsic value of options exercised during 2010, 2009, and 2008 was \$31.4 million, \$37.4 million, and \$113.6 million, respectively.

Acquisitions

We invested a total of \$281.9 million, less cash acquired, related to acquisitions over the past three years. We describe these acquisitions, including purchase price and product offerings, in Note 7 of the Notes to our Consolidated Financial Statements.

Subsequent Events

See Note 18 in the Notes to our Consolidated Financial Statements for information on events subsequent to December 31, 2010.

Application of Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based on our Consolidated Financial Statements, which have been prepared in accordance with GAAP. We discuss our significant accounting policies in Note 3 of the Notes to our Consolidated Financial Statements. The preparation of financial statements in accordance with GAAP requires our management team to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, expense, and related disclosures included in our Consolidated Financial Statements.

We evaluate our estimates on an ongoing basis. We base our estimates on historical experience and various other assumptions that we believe are reasonable. Based on these assumptions and estimates, we make judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Our actual results could vary from these estimates and assumptions. If actual amounts are different from previous estimates, we include revisions in our results of operations for the period in which the actual amounts become known.

We believe the following critical accounting policies reflect the significant judgments and estimates used in the preparation of our Consolidated Financial Statements:

Revenue Recognition

Much of our revenue comes from the sale of subscriptions or licenses for print publications, software, and Internet-based products and services. We recognize this revenue in equal amounts over the term of the subscription or license, which generally ranges from one to three years. We also provide analysis, consulting, retirement advice, and other services. We recognize this revenue when the service is provided or during the service obligation period defined in the contract.

We make significant judgments related to revenue recognition, including whether fees are fixed or determinable and whether the collection of payment is probable. For contracts that combine multiple products and services, we make judgments regarding the value of each element in the arrangement based on selling prices of the items when sold separately. Delivery of our products and services is a prerequisite to the recognition of revenue. If arrangements include an acceptance provision, we begin recognizing revenue upon the receipt of customer acceptance.

We make judgments at the beginning of an arrangement regarding whether or not collection is probable. Probability of collection is assessed on a case-by-case basis. We typically sell to institutional customers with whom we have a history of successful collections.

Deferred revenue is the amount invoiced or collected in advance for subscriptions, licenses, or services that has not yet been recognized as revenue. As of December 31, 2010, our deferred revenue was \$146.3 million. We expect to recognize this deferred revenue in future periods as we fulfill our service obligations. The amount of deferred revenue may increase or decrease primarily based on the mix of contracted products and services and the volume of new and renewal subscriptions. The timing of future revenue recognition may change depending on the terms of the license agreements and the timing of fulfilling our service obligations. We believe that the estimate related to revenue recognition is a critical accounting estimate, and to the extent that there are material differences between our determination of deferred revenue and actual results, our financial condition or results of operations may be affected.

Purchase Price Allocation

Over the past several years, we have acquired several companies that complement our business operations. Over the past three years, the total cash paid for acquisitions, less cash acquired, was \$281.9 million. As of December 31, 2010, we have recorded \$317.7 million of goodwill arising from acquisitions. As of December 31, 2010, we allocated \$251.7 million of gross value to intangible assets, primarily for customer-related assets, technology-based assets, and intellectual property. The estimated useful lives of the intangible assets range from one to 25 years.

Management judgment is required in allocating the purchase price to the acquired assets and liabilities. For each acquisition, we allocate the purchase price to the assets acquired, liabilities assumed, and goodwill in accordance with ASC 805, *Business*

Edgar Filing: Morningstar, Inc. - Form 10-K

Combinations. Once it has been determined that recognition of an asset or liability in a business combination is appropriate, the asset or liability generally is measured at fair value in accordance with the principles of ASC 820, *Fair Value Measurements and Disclosures*. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The determination of the fair values of intangible assets requires significant management judgment in each of the following areas:

- Identify the acquired intangible assets: For each acquisition, we identify the intangible assets acquired. These intangible assets generally consist of customer relationships, trademarks and tradenames, technology-related intangibles including internally developed software and databases, and non-compete agreements.
- Estimate the fair value of these intangible assets: We consider various approaches to value the intangible assets. These valuation approaches include the cost approach, which measures the value of an asset based on the cost to reproduce it or replace it with another asset of like utility; the market approach, which values the asset through an analysis of sales and offerings of comparable assets; and the income approach, which measures the value of an asset based by measuring the present worth of the economic benefits it is expected to produce.
- Estimate the remaining useful life of the assets: For each intangible asset, we use judgment and assumptions to establish the remaining useful life of the asset. For example, for customer relationships, we determine the estimated useful life with reference to observed customer attrition rates. For technology-related assets such as databases, we make judgments about the demand for current data and historical metrics in establishing the remaining useful life. For internally developed software, we estimate an obsolescence factor associated with the software.
- Assess the appropriate method for recording amortization expense over the intangible asset's useful life: We use judgment to determine the rate at which the amortization expense should be recognized. In accordance with ASC 350, *Intangibles Goodwill and Other*, the method of amortization should reflect the pattern in which the economic benefits of the intangible asset are consumed or otherwise used up. If that pattern cannot be reliably determined, a straight-line amortization method should be used. Based on this guidance, we amortize intangible assets over their expected useful life using a straight-line amortization method.

We believe that the accounting estimates related to purchase price allocations are critical accounting estimates because the assumptions impact the amounts and classifications of assets and liabilities presented in our Consolidated Balance Sheets, the amount of amortization and depreciation expense, if any, recorded in our Consolidated Statements of Income, and the impairment testing performed in subsequent periods.

Goodwill

Goodwill recorded on our Consolidated Balance Sheet as of December 31, 2010 was \$317.7 million. In accordance with ASC 350, *Intangibles Goodwill and Other*, we do not amortize goodwill. Instead, it is subject to an impairment test annually, or whenever indicators of impairment exist, based on a discounted cash-flow model. An impairment would occur if the carrying amount of a reporting unit, including goodwill, exceeded the fair value of that reporting unit. Our reporting units are components of our reportable segments and constitute businesses for which discrete financial information, which is regularly reviewed by management, is available. We performed annual impairment reviews in the fourth quarter of 2010, 2009, and 2008 and did not record any impairment losses in these years, reflecting our assessment that our estimates of fair value substantially exceeded the carrying value of our reporting units.

The process of evaluating the potential impairment of goodwill is subjective and requires significant judgment. In estimating the fair value of the reporting units, we make estimates and judgments about the future cash flows of the reporting unit. These estimates include assumptions about future market growth and trends, forecasted revenue and costs, capital investments, appropriate discount rates, and other variables that can significantly affect the value of the reporting unit.

Although our cash flow forecasts are based on assumptions that are consistent with plans and estimates we use to manage the underlying business, there is significant judgment in determining the cash flows attributable to these businesses over a long-term horizon. We update these assumptions and cash flow estimates at least annually.

We believe that the accounting estimate related to goodwill impairment is a critical accounting estimate because the assumptions used are highly susceptible to changes in the operating results and cash flows of the reporting units included in our segments. If actual results differ from our estimates, future tests may indicate an impairment of goodwill. This would result in a non-cash charge, adversely affecting our results of operations.

Impairment of Long-Lived Assets

Our Consolidated Balance Sheet as of December 31, 2010 includes \$62.1 million of property, equipment, and capitalized software, net of accumulated depreciation, and \$169.0 million of intangible assets, net of accumulated amortization. In accordance with FASB ASC 360-10-35, *Subsequent Measurement Impairment or Disposal of Long-Lived Assets*, we review our property, equipment, capitalized software, and intangible assets for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Such events or changes may include deterioration in the business climate for a specific product or service. If the total of projected future undiscounted cash flows is less than the carrying amount of an asset, we may need to record an impairment loss based on the excess of the carrying amount over the fair value of the assets.

Estimates of future cash flows and the estimated useful lives associated with these assets are critical to the assessment of recoverability and fair values. They are susceptible to change from period to period because of the requirement to make assumptions about future cash flows generated over extended periods of time. Changes in these estimates could result in a determination of asset impairment, which would result in a reduction to the carrying value and could adversely affect our operating results in the related period.

Stock-Based Compensation

We include stock-based compensation expense in each of our operating expense categories. Our stock-based compensation expense primarily reflects grants of restricted stock units and restricted stock.

Under FASB ASC 718, *Compensation Stock Compensation*, stock-based compensation expense is measured at the grant date based on the fair value of the award, and the cost is recognized as expense ratably over the award's vesting period. We measure the fair value of our restricted stock units on the date of grant based on the market price of the underlying common stock as of the close of trading on the day prior to grant. We estimate expected forfeitures of stock-based awards at the grant date and recognize compensation cost only for those awards expected to vest. We ultimately adjust this forfeiture assumption to the actual forfeiture rate. Therefore, changes in the forfeiture assumptions do not impact the total amount of expense ultimately recognized over the vesting period. Instead, different forfeiture assumptions would only impact the timing of expense recognition over the vesting period.

Because our largest annual equity grants typically have vesting dates in the second quarter of the year, we adjust the stock-based compensation expense at that time to reflect those awards that ultimately vested. In addition, we update our estimate of the forfeiture rate that will be applied to awards not yet vested. In 2010 and 2009, we recorded approximately \$0.2 million of additional stock-based compensation expense related to these changes in estimates.

We believe that the estimates related to stock-based compensation expense are critical accounting estimates because the assumptions used could significantly impact the timing and amount of stock-based compensation expense recorded in our Consolidated Financial Statements.

Income Taxes

Our effective tax rate is based on the mix of income and losses in our U.S. and non-U.S. operations, statutory tax rates, and tax-planning opportunities available to us in the various jurisdictions in which we operate. Significant judgment is required to evaluate our tax positions.

Tax law requires us to include items in our tax return at different times from when these items are reflected in our Consolidated Statements of Income. As a result, the effective tax rate reflected in our Consolidated Financial Statements is different from the tax rate reported on our tax return (our cash tax rate). Some of these differences, such as expenses that are not deductible in our tax return, are permanent. Other differences, such as depreciation expense, reverse over time. These timing differences create deferred tax assets and liabilities. We determine our deferred tax assets and liabilities based on temporary differences between the financial reporting and the tax basis of assets and liabilities. The excess tax benefits associated with stock-option exercises and vesting of restricted stock units also create a difference between our cash tax rate and the effective tax rate in our Consolidated Income Statement.

As of December 31, 2010, we had gross deferred tax assets of \$37.6 million and gross deferred tax liabilities of \$43.3 million. The deferred tax assets include \$13.0 million of deferred tax assets related to \$49.0 million of net operating losses (NOLs) of our non-U.S. operations. Because of the historical operating losses of certain of the non-U.S. operations that generated these NOLs, we have recorded a valuation allowance against all but approximately \$5.6 million of the NOLs, reflecting the likelihood that the benefit of the NOLs will not be realized. In assessing the realizability of our deferred tax

assets, we consider whether it is more likely than not that some portion or all of the deferred tax assets will not be realized.

In assessing the need for a valuation allowance, we consider both positive and negative evidence, including tax-planning strategies, projected future taxable income, and recent financial performance. If we determine a lesser allowance is required at some point in the future, we would record a reduction to our tax expense and valuation allowance. These adjustments would be made in the same period we determined the change in the valuation allowance was needed. This would cause our income tax expense, effective tax rate, and net income to fluctuate.

We assess uncertain tax positions in accordance with FASB ASC 740, *Income Taxes*. We use judgment to identify, recognize, and measure the amounts to be recorded in the financial statements related to tax positions taken or expected to be taken in a tax return. We recognize liabilities to represent our potential future obligations to taxing authorities for the benefits taken in our tax returns. We adjust these liabilities, including any impact of the related interest and penalties, in light of changing facts and circumstances such as the progress of a tax audit. A number of years may elapse before a particular matter for which we have established a reserve is audited and finally resolved. The number of years with open tax audits varies depending on the tax jurisdiction.

We use judgment to classify unrecognized tax benefits as either current or noncurrent liabilities in our Consolidated Balance Sheets. Settlement of any particular issue would usually require the use of cash. We generally classify liabilities associated with unrecognized tax benefits as noncurrent liabilities. It typically takes several years between our initial tax return filing and the final resolution of any uncertain tax positions with the tax authority. We recognize favorable resolutions of tax matters for which we have previously established reserves as a reduction to our income tax expense when the amounts involved become known.

Assessing the future tax consequences of events that have been recognized in our Consolidated Financial Statements or tax returns requires judgment. Variations in the actual outcome of these future tax consequences could materially impact our financial position, results of operations, or cash flows.

Contingencies

We are subject to various claims and contingencies related to legal proceedings and investigations, which we describe in Note 16 of the Notes to our Consolidated Financial Statements. These legal proceedings involve inherent uncertainties including, but not limited to, court rulings, negotiations between affected parties, and government actions. Assessing the probability of loss for such contingencies and determining how to accrue the appropriate liabilities requires judgment. If actual results differ from our assessments, our financial position, results of operations, or cash flows would be impacted.

Recently Issued Accounting Pronouncements

In October 2009, the FASB issued ASU No. 2009-13, *Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements*. ASU 2009-13 supersedes EITF Issue 00-21, *Revenue Arrangements with Multiple Deliverables*. ASU 2009-13 establishes the accounting and reporting guidance for arrangements when a vendor performs multiple revenue-generating

Edgar Filing: Morningstar, Inc. - Form 10-K

activities, addresses how to separate deliverables, and specifies how to measure and allocate arrangement consideration. Vendors often provide multiple products or services to customers. Because products and services are often provided at different points in time or over different time periods within the same contractual arrangement, this guidance enables vendors to account for products or services separately rather than as a combined unit. For Morningstar, ASU 2009-13 is effective prospectively for revenue arrangements entered into or materially modified beginning on January 1, 2011.

Also in October 2009, the FASB issued ASU No. 2009-14, *Software (Topic 985): Certain Revenue Arrangements That Include Software Elements*. This update affects vendors that sell or lease tangible products in an arrangement that contains software that is more than incidental to the tangible product as a whole. ASU No. 2009-14 does not affect software revenue arrangements that do not include tangible products and also does not affect software revenue arrangements that include services if the software is essential to the functionality of those services. We adopted ASU No. 2009-14 effective January 1, 2011 and do not anticipate any impact on our Consolidated Financial Statements.

Edgar Filing: Morningstar, Inc. - Form 10-K

In January 2010, the FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820) Improving Disclosures about Fair Value Measurements*. ASU No. 2010-06 requires entities to disclose information in the Level 3 rollforward about purchases, sales, issuances, and settlements on a gross basis. We adopted the requirement to separately disclose purchases, sales, issuances, and settlements in the Level 3 rollforward effective January 2011 and do not anticipate any impact on our Consolidated Financial Statements.

In December 2010, the FASB issued ASU No. 2010-28, *Intangibles - Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts*. ASU 2010-28 modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For these reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In making this determination, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist. The qualitative factors are consistent with the existing guidance. For Morningstar, ASU No. 2010-28 is effective on January 1, 2011.

In December 2010, the FASB issued ASU No. 2010-29, *Business Combinations (Topic 805): Disclosure of Supplementary Pro Forma Information for Business Combinations*. ASU No. 2010-29 specifies that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. ASU No. 2010-29 also expands the supplemental pro forma disclosures under Topic 805 to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. For Morningstar, ASU No. 2010-29 is effective prospectively for business combinations occurring on or after January 1, 2011.

Contractual Obligations

The table below shows our known contractual obligations as of December 31, 2010 and the expected timing of cash payments related to these contractual obligations:

(\$000)	2011	2012	2013	2014	2015	Thereafter	Total
Minimum commitments on non-cancelable operating lease obligations (1)	\$ 19,398	\$ 16,391	\$ 14,279	\$ 14,723	\$ 14,296	\$ 74,458	\$ 153,545
Unrecognized tax benefits (2)	654						654
Remaining payments related to Shenzhen office build-out	1,694						1,694
Total	\$ 21,746	\$ 16,391	\$ 14,279	\$ 14,723	\$ 14,296	\$ 74,458	\$ 155,893

(1) The non-cancelable operating lease obligations are mainly for lease commitments for office space.

(2) Represents unrecognized tax benefits (including penalties and interest, less the impact of any associated tax benefits) recorded in accordance with FASB ASC 740, *Income Taxes*. The amount included in the table represents amounts for which the statutes of limitations are expected to lapse during 2011. The table excludes \$8.2 million of unrecognized tax benefits, included as a long-term liability in our Consolidated Balance Sheet as of December 31, 2010, for which we cannot make a reasonably reliable estimate of the period of payment.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Our investment portfolio is actively managed and may suffer losses from fluctuating interest rates, market prices, or adverse security selection. Our investment portfolio is mainly invested in high-quality fixed-income securities. We do not have any direct exposure to sub-prime mortgages. As of December 31, 2010, our cash, cash equivalents, and investments balance was \$365.4 million. Based on our estimates, a 100 basis-point change in interest rates would have increased or decreased the fair value of our investment portfolio by approximately \$0.8 million.

As our non-U.S. revenue increases as a percentage of our consolidated revenue, fluctuations in foreign currencies present a greater potential risk. To date, we have not engaged in currency hedging, and we do not currently have any positions in derivative instruments to hedge our currency risk. Our results could suffer if certain foreign currencies decline relative to the U.S. dollar. In addition, because we use the local currency of our subsidiaries as the functional currency, we are affected by the translation of foreign currencies into U.S. dollars.

Item 8. Financial Statements and Supplementary Data

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

Morningstar, Inc.

We have audited the accompanying consolidated balance sheets of Morningstar, Inc. and subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of income, equity and comprehensive income (loss), and cash flows for each of the three years in the period ended December 31, 2010. Our audits also included the financial statement schedule presented in Item 15(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Morningstar, Inc. and subsidiaries as of December 31, 2010 and 2009, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Morningstar, Inc.'s and subsidiaries internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2011, expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

Morningstar, Inc.

We have audited Morningstar, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Morningstar, Inc. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Morningstar, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Morningstar, Inc. and subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of income, equity and comprehensive income (loss), and cash flows for each of the three years in the period ended December 31, 2010 of Morningstar, Inc. and subsidiaries and our report dated February 28, 2011 expressed an unqualified opinion

thereon.
