**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934**
For the quarterly period ended September 30, 2012
OR
**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934**

For transition period from _____ to _____

Commission File Number 0 -10537

OLD SECOND BANCORP, INC.

(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction
of incorporation or organization)

36-3143493
(I.R.S. Employer Identification Number)

37 South River Street, Aurora, Illinois 60507

(Address of principal executive offices) (Zip Code)

(630) 892-0202

(Registrant's telephone number, including area code)

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Act). (check one):

Large accelerated filer Accelerated filer Non-accelerated filer (do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2).

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date: As of November 9, 2012, the Registrant had outstanding 14,084,328 shares of common stock, \$1.00 par value per share.

Notes to Consolidated Financial Statements

(Table amounts in thousands, except per share data, unaudited)

Note 1 Summary of Significant Accounting Policies

The accounting policies followed in the preparation of the interim financial statements are consistent with those used in the preparation of the annual financial information. The interim financial statements reflect all normal and recurring adjustments, which are necessary, in the opinion of management, for a fair statement of results for the interim period presented. Results for the period ended September 30, 2012, are not necessarily indicative of the results that may be expected for the year ending December 31, 2012. These interim financial statements should be read in conjunction with the audited financial statements and notes included in Old Second Bancorp, Inc.'s (the Company) annual report on Form 10-K for the year ended December 31, 2011. Unless otherwise indicated, amounts in the tables contained in the notes are in thousands. Certain items in prior periods have been reclassified to conform to the current presentation.

The Company's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States (GAAP) and follow general practices within the banking industry. Application of these principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates, assumptions, and judgments are based on information available as of the date of the financial statements. Future changes in information may affect these estimates, assumptions, and judgments, which, in turn, may affect amounts reported in the financial statements.

The Company uses the accrual basis of accounting for financial reporting purposes. Certain reclassifications were made to prior year amounts to conform to the current year presentation.

All significant accounting policies are presented in Note 1 to the consolidated financial statements included in the Company's annual report on Form 10-K for the year ended December 31, 2011. These policies, along with the disclosures presented in the other financial statement notes and in this discussion, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined.

In May 2011, the FASB issued ASU No. 2011-04 Fair Value Measurement (Topic 820) - Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. ASU 2011-04 changes the wording used to describe many of the requirements in GAAP for measuring fair value and for disclosing information about fair value measurements. Consequently, the amendments in this update result in common fair value measurement and disclosure requirements in GAAP and International Financial Reporting Standards. ASU 2011-04 is effective prospectively during interim and annual periods beginning on or after December 15, 2011. The Company has assessed and implemented ASU 2011-04 in its fair value disclosures and found no material impact.

In June 2011, the FASB issued ASU No. 2011-05 Comprehensive Income (Topic 220) - Presentation of Comprehensive Income. ASU 2011-05 requires that all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. Retrospective application of the standard is required. In December 2011, the FASB issued Accounting Standards Update (ASU) No. 2011-12: Comprehensive Income (Topic 220) Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in ASU No. 2011-05, to defer the effective date for the part of ASU No. 2011-05 that would require adjustments of items out of accumulated other income to be presented on the components of both net income and other comprehensive income in financial statements. The Company has included the consolidated statements of

Table of Contents

comprehensive income. There was no impact on the consolidated statements of operations or balance sheets based on the adoption of this standard.

In April 2011, the FASB issued ASU No. 2011-03 Transfers and Servicing (Topic 860) - Reconsideration of Effective Control for Repurchase Agreement. ASU 2011-03 removed from the assessment of effective control the criterion relating to the transferor's ability to repurchase or redeem financial assets on substantially the agreed terms, even in the event of default by the transferee. ASU 2011-03 was effective for the first interim or annual period beginning on or after December 15, 2011. The guidance should be applied prospectively to transactions or modifications of existing transactions that occurred on or after the effective date. Early adoption was not permitted. ASU 2011-03 did not have an impact on the Company's financial condition, results of operations, or liquidity.

Note 2 Securities

Investment Portfolio Management

Our investment portfolio serves the liquidity and income needs of the Company. While the portfolio serves as an important component of the overall liquidity management at the Bank, portions of the portfolio will also serve as income producing assets. The size of the portfolio reflects liquidity needs, loan demand and interest income objectives.

Portfolio size and composition may be adjusted from time to time. While a significant portion of the portfolio consists of readily marketable securities to address liquidity, other parts of the portfolio may reflect funds invested pending future loan demand or to maximize interest income without undue interest rate risk.

Investments are comprised of debt securities and non-marketable equity investments. All debt securities are classified as available-for-sale and may be sold under our management and asset/liability management strategies. Securities available-for-sale are carried at fair value. Unrealized gains and losses on securities available-for-sale are reported as a separate component of equity. This balance sheet component changes as interest rates and market conditions change. Unrealized gains and losses are not included in the calculation of regulatory capital.

Non-marketable equity investments include Federal Home Loan Bank of Chicago (FHLBC) stock and Federal Reserve Bank of Chicago (FRB) stock. FHLBC stock was recorded at a value of \$7.0 million at September 30, 2012, a decrease of \$2.3 million from December 31, 2011. Our FHLBC stock is necessary to maintain our continued access to FHLBC advances. In late 2011, management at the Bank evaluated the October 17, 2011, FHLBC Capital Plan and determined the best overall course for the Bank was to accept the stock conversion as of January 1, 2012. Subsequently, during the first nine months of 2012 management redeemed excess FHLBC stock held by the Bank reducing the value of FHLBC stock held by the Bank to \$7.0 million. FRB stock was recorded at \$4.8 million at September 30, 2012, which was unchanged from December 31, 2011.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Table of Contents

The following table summarizes the amortized cost and fair value of the available-for-sale securities at September 30, 2012 and December 31, 2011 and the corresponding amounts of gross unrealized gains and losses recognized in accumulated other comprehensive loss:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Recognition of other-than-temporary impairment for these securities was not necessary in the nine months ended September 30, 2012, or the year ended December 31, 2011. The changes in fair values related primarily to interest rate fluctuations and were generally not related to credit quality deterioration. Further as shown below, the amount of deferrals and defaults in the pooled collateralized debt obligations (CDO) decreased in the period from December 31, 2011, to September 30, 2012.

Uncertainty in the financial markets in the periods presented has resulted in reduced liquidity for certain investments, particularly the CDO. In the case of the CDO fair value measurement, management included a risk premium adjustment as of September 30, 2012, to reflect an estimated yield that a market participant would demand because of uncertainty in cash flows, based on incomplete and sporadic levels of market activity. Accordingly, management continues to designate these securities as Level 3 securities as described in Note 12 of this quarterly report as of September 30, 2012. Management does not have the intent to sell the above securities and it is more likely than not the Company will not sell the securities before recovery of its cost basis.

Below is additional information as it relates to the CDO, Trapeza 2007-13A, which is secured by a pool of trust preferred securities issued by trusts sponsored by multiple financial institutions.

	1,208,282	1,369,058
Net deferred loan fees and costs	7	(73)
	\$ 1,208,289	\$ 1,368,985

It is the policy of the Company to review each prospective credit in order to determine whether an adequate level of security or collateral was obtained prior to making a loan. The type of collateral, when required, varies from liquid assets to real estate. The Company's access to collateral, in the event of borrower default, is assured through adherence to state lending laws, the Company's lending standards and credit monitoring procedures. The Bank generally makes loans solely within its market area. There are no significant concentrations of loans where the customers' ability to honor loan terms is dependent upon a single economic sector, although the real estate related categories listed above represent 91.6% and 91.5% of the portfolio at September 30, 2012, and December 31, 2011, respectively. The Company remains committed to overseeing and managing its loan portfolio to reduce its real estate credit concentrations in accordance with the requirements of the Stipulation and Consent to the Issuance of a Consent Order (the Consent Order) with the Bank and the Office of the Comptroller of the Currency (OCC). Regulatory and capital matters, including the Consent Order, are discussed in more detail in Note 11 of the consolidated financial statements included in this report.

Nonaccrual loans and loans past due 90 days still on accrual include both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified impaired loans.

The Bank had no commitments to any borrower whose loans were classified as impaired at September 30, 2012.

Credit Quality Indicators:

The Company categorizes loans into credit risk categories based on current financial information, overall debt service coverage, comparison against industry averages, historical payment experience, and current economic trends. Each loan and loan relationship is examined. This analysis includes loans with outstanding loans or commitments greater than \$50,000 and excludes homogeneous loans such as home equity lines of credit and residential mortgages. Loans with a classified risk rating are reviewed quarterly regardless of size or loan type. The Company uses the following definitions for classified risk ratings:

Table of Contents

Special Mention. Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan at some future date.

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Credits that are not covered by the definitions above are pass credits, which are not considered to be adversely rated. Loans listed as not rated have outstanding loans or commitments less than \$50,000 or are included in groups of homogeneous loans.

Troubled debt restructurings (TDRs) are loans for which the contractual terms have been modified and both of these conditions exist: (1) there is a concession to the borrower and (2) the borrower is experiencing financial difficulties. Loans are restructured on a case-by-case basis during the loan collection process with modifications generally initiated at the request of the borrower. These modifications may include reduction in interest rates, extension of term, deferrals of principal, and other modifications. The Bank does participate in the U.S. Department of the Treasury s (the Treasury) Home Affordable Modification Program (HAMP) which gives qualifying homeowners an opportunity to refinance into more affordable monthly payments.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

The specific allocation of the allowance for loan losses on a TDR is determined by either discounting the modified cash flows at the original effective rate of the loan before modification or is based on the underlying collateral value less costs to sell, if repayment of the loan is collateral-dependent. If the

Table of Contents

resulting amount is less than the recorded book value, the Bank either establishes a valuation allowance (i.e. specific reserve) as a component of the allowance for loan losses or charges off the impaired balance if it determines that such amount is a confirmed loss. This method is used consistently for all segments of the portfolio. The allowance for loan losses also includes an allowance based on a loss migration analysis for each loan category for loans that are not individually evaluated for specific impairment. All loans charged-off, including TDR charged-off, are factored into this calculation by portfolio segment.

TDRs outstanding by class are summarized as follows:

	As of September 30, 2012			
	TDR Modifications Accruing interest		TDR Modifications Nonaccrual	
	# of contracts	Recorded investment	# of contracts	Recorded investment

	\$ 5,685	\$ 3,996	\$ 14,659	\$ 13,148

Table of Contents**Note 6 Deposits**

Major classifications of deposits were as follows:

	September 30, 2012	December 31, 2011
Noninterest bearing demand	\$ 381,111	\$ 361,963
Savings	211,452	196,870
NOW accounts	265,215	275,957
Money market accounts	321,614	288,508
Certificates of deposit of less than \$100,000	323,464	390,530
Certificates of deposit of \$100,000 or more	194,078	226,953
	\$ 1,696,934	\$ 1,740,781

Note 7 Borrowings

The following table is a summary of borrowings as of September 30, 2012, and December 31, 2011. Junior subordinated debentures are discussed in detail in Note 8:

	September 30, 2012	December 31, 2011
Securities sold under repurchase agreements	\$ 1,738	\$ 901
Junior subordinated debentures	58,378	58,378
Subordinated debt	45,000	45,000
Notes payable and other borrowings	500	500
	\$ 105,616	\$ 104,779

The Company enters into sales of securities under agreements to repurchase (repurchase agreements) which generally mature within 1 to 90 days from the transaction date. These repurchase agreements are treated as financings and were secured by mortgage-backed securities with a carrying amount of \$20.9 and \$3.7 million at September 30, 2012, and December 31, 2011, respectively. The securities sold under agreements to repurchase consisted of U.S. government agencies and mortgage-backed securities during the subject reporting periods.

The Company's borrowings at the FHLBC require the Bank to be a member and invest in the stock of the FHLBC and are generally limited to the lesser of 35% of total assets or 60% of the book value of certain mortgage loans. The Bank owned FHLBC stock of \$7.0 million at September 30, 2012, and had total funding availability of \$65.5 million with no outstanding advances. At December 31, 2011, there were no outstanding advances on the FHLBC stock of \$9.3 million and funding availability was \$48.4 million. The Company has also established borrowing capacity at the FRB that was not used at either September 30, 2012, or December 31, 2011. The Company currently has \$64.3 million of borrowing capacity at the FRB at the current secondary rate of 1.25%.

One of the Company's most significant borrowing relationships continues to be the \$45.5 million credit facility with Bank of America. That credit facility, which began in January 2008, was originally comprised of a \$30.5 million senior debt facility, which included a \$30.0 million

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

revolving line that matured on March 31, 2010, and \$500,000 in term debt (together, the Senior Debt), as well as \$45.0 million of subordinated debt (the Subordinated Debt). The Subordinated Debt and the term debt portions of the Senior Debt mature on March 31, 2018. The interest rate on the Senior Debt resets quarterly and at the Company's option, based on the Lender's prime rate or three-month LIBOR plus 90 basis points. The interest rate on the Subordinated Debt resets quarterly, and is equal to three-month LIBOR plus 150 basis points. The Company had no principal outstanding balance on the Bank of America senior line of credit when it matured, but did have \$500,000 in principal outstanding in term debt and \$45.0 million in principal outstanding in Subordinated Debt at the end of both December 31, 2011, and September 30, 2012. The term

Table of Contents

debt is secured by all of the outstanding capital stock of the Bank. The Company has made all required interest payments on the outstanding principal amounts on a timely basis.

The credit facility agreement contains usual and customary provisions regarding acceleration of the senior debt upon the occurrence of an event of default by the Company under the agreement, as described therein. The agreement also contains certain customary representations and warranties as well as financial covenants. At September 30, 2012, the Company continued to be out of compliance with two of the financial covenants. The agreement provides that upon an event of default as the result of the Company's failure to comply with a financial covenant, the lender may (i) terminate all commitments to extend further credit, (ii) increase the interest rate on the revolving line and the term debt by 200 basis points, (iii) declare the Senior Debt immediately due and payable and (iv) exercise all of its rights and remedies at law, in equity and/or pursuant to any or all collateral documents, including foreclosing on the collateral. The total outstanding principal amount of the Senior Debt is the \$500,000 in term debt. Because the Subordinated Debt is treated as Tier 2 capital for regulatory capital purposes, the agreement does not provide the lender with any rights of acceleration or other remedies with regard to the Subordinated Debt upon an event of default caused by the Company's failure to comply with a financial covenant. In November 2009, the lender provided notice to the Company that it was invoking the default rate. This action by the lender resulted in nominal additional interest expense as it only applies to the \$500,000 of outstanding term debt.

Note 8 Junior Subordinated Debentures

The Company completed the sale of \$27.5 million of cumulative trust preferred securities by its unconsolidated subsidiary, Old Second Capital Trust I, in June 2003. An additional \$4.1 million of cumulative trust preferred securities was sold in July 2003. The costs associated with the issuance of the cumulative trust preferred securities are being amortized over 30 years. The trust preferred securities may remain outstanding for a 30-year term but, subject to regulatory approval, can be called in whole or in part by the Company. The stated call period commenced on June 30, 2008 and can be exercised by the Company from time to time thereafter. When not in deferral, cash distributions on the securities are payable quarterly at an annual rate of 7.80%. The Company issued a new \$32.6 million subordinated debenture to the trust in return for the aggregate net proceeds of this trust preferred offering. The interest rate and payment frequency on the debenture are equivalent to the cash distribution basis on the trust preferred securities.

The Company issued an additional \$25.0 million of cumulative trust preferred securities through a private placement completed by an additional unconsolidated subsidiary, Old Second Capital Trust II, in April 2007. Although nominal in amount, the costs associated with that issuance are being amortized over 30 years. These trust preferred securities also mature in 30 years, but subject to the aforementioned regulatory approval, can be called in whole or in part on a quarterly basis commencing June 15, 2017. The quarterly cash distributions on the securities are fixed at 6.77% through June 15, 2017 and float at 150 basis points over three-month LIBOR thereafter. The Company issued a new \$25.8 million subordinated debenture to the trust in return for the aggregate net proceeds of this trust preferred offering. The interest rate and payment frequency on the debenture are equivalent to the cash distribution basis on the trust preferred securities.

Under the terms of the subordinated debentures issued to each of Old Second Capital Trust I and II, the Company is allowed to defer payments of interest for 20 consecutive quarterly periods without default or penalty, but interest will continue to accrue. Also during the deferral period, the Company generally may not pay cash dividends on or repurchase its common stock or preferred stock, including the Series B Fixed Rate Cumulative Perpetual Preferred Stock (the Series B Preferred Stock) as discussed in Note 15. In August of 2010, the Company elected to defer regularly scheduled interest payments on the \$58.4 million of junior subordinated debentures. Because of the deferral on the subordinated debentures, the trusts will defer regularly scheduled dividends on the trust preferred securities. Both of the debentures issued by the Company are recorded on the Consolidated Balance Sheets as junior subordinated debentures and the related interest expense for each issuance is included in the Consolidated Statements of Operations. The total accumulated unpaid interest on the junior subordinated debentures including compounded interest from July 1, 2010, on the deferred payments totaled \$10.5 million at September 30, 2012.

Table of Contents**Note 9 Long-Term Incentive Plan**

The Long-Term Incentive Plan (the Incentive Plan) authorizes the issuance of up to 1,908,332 shares of the Company s common stock, including the granting of qualified stock options, non-qualified stock options, restricted stock, restricted stock units, and stock appreciation rights. Total shares issuable under the plan were 10,925 at September 30, 2012. Stock based awards may be granted to selected directors and officers or employees at the discretion of the board of directors. There were no stock options granted in the first nine months of 2012 or 2011. All outstanding stock options were granted for a term of ten years.

Generally, restricted stock and restricted stock units vest three years from the grant date, but the Company s Board of Directors has discretionary authority to change some terms including the amount of time until vest date. Awards under the Incentive Plan become fully vested upon a merger or change in control of the Company.

Total compensation cost that has been charged against income for those plans was \$67,000 in the third quarter of 2012 and \$220,000 in the first nine months of 2012.

There were no stock options exercised during the third quarter of 2012 or 2011. The Company did not grant any options of the Company s common stock during either of those periods. There was no unrecognized compensation cost related to nonvested stock options granted under the Incentive Plan in the first nine months of 2012. Total unrecognized compensation cost related to nonvested stock options granted under the Incentive Plan was \$2,000 in the first nine months of 2011, and was recognized over a weighted-average period of 0.33 years.

A summary of stock option activity in the Incentive Plan is as follows:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (years)	Aggregate Intrinsic Value
Beginning outstanding at January 1, 2012	500,000	\$ 27.34		
Canceled	(28,500)	25.54		
Ending outstanding at September 30, 2012	471,500	\$ 27.45	2.87	\$ -
Exercisable at end of period	471,500	\$ 27.45	2.87	\$ -
Beginning outstanding at January 1, 2011	614,832	\$ 25.81		
Canceled	(21,500)	27.73		
Ending outstanding at September 30, 2011	593,332	\$ 25.74	3.32	\$ -
Exercisable at end of period	589,332	\$ 25.87	3.30	\$ -

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Under the Incentive Plan, restricted stock was granted beginning in 2005 and the grant of restricted units began in February 2009. Both of these restricted awards have voting and dividend rights and are subject to forfeiture until certain restrictions have lapsed including employment for a specific period. There were no restricted awards issued during the third quarter of 2012 and 60,000 restricted awards issued for the nine months ending September 30, 2012. There were 15,000 restricted awards issued during the third quarter of 2011 and 156,000 restricted awards issued for the nine months ending September 30, 2011. Compensation expense is recognized over the vesting period of the restricted award based on the market value of the award at issue date.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Table of Contents

A summary of changes in the Company's nonvested shares of restricted share rights is as follows:

	September 30, 2012		September 30, 2011	
	Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value
Nonvested at January 1	426,192	\$ 4.15	464,298	\$ 6.76
Granted	60,000	1.25	156,320	1.06
Vested	(144,976)	7.14	(98,770)	10.71
Forfeited	(13,296)	3.28	(95,656)	5.04
Nonvested at September 30	327,920	\$ 2.33	426,192	\$ 4.15

Total unrecognized compensation cost of restricted awards was \$161,000 as of September 30, 2012, which is expected to be recognized over a weighted-average period of 0.93 years. Total unrecognized compensation cost of restricted awards was \$636,000 as of September 30, 2011, which was expected to be recognized over a weighted-average period of 1.02 years.

Note 10 Loss Per Share

The earnings (loss) per share both basic and diluted are included below as of September 30 (in thousands except for share data):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Basic earnings (loss) per share:

Note 11 Regulatory & Capital Matters

On May 16, 2011, the Bank, the wholly-owned banking subsidiary of the Company, entered into the Consent Order with the OCC. Pursuant to the Consent Order, the Bank has agreed to take certain actions and operate in compliance with the Consent Order's provisions during its terms.

Table of Contents

Under the terms of the Consent Order, the Bank is required to, among other things: (i) adopt and adhere to a three-year written strategic plan that establishes objectives for the Bank's overall risk profile, earnings performance, growth, balance sheet mix, off-balance sheet activities, liability structure, capital adequacy, reduction in nonperforming assets and product development; (ii) adopt and maintain a capital plan; (iii) by September 30, 2011, achieve and thereafter maintain a total risk-based capital ratio of at least 11.25% and a Tier 1 capital ratio of at least 8.75%; (iv) seek approval of the OCC prior to paying any dividends on its capital stock; (v) develop a program to reduce the Bank's credit risk; (vi) obtain or update appraisals on certain loans secured by real estate; (vii) implement processes to ensure that real estate valuations conform to applicable standards; (viii) take certain actions related to credit and collateral exceptions; (ix) reaffirm the Bank's liquidity risk management program; and (x) appoint a compliance committee of the Bank's Board of Directors to help ensure the Bank's compliance with the Consent Order. The Bank is also required to submit certain reports to the OCC with respect to the foregoing requirements.

Both capital ratio objectives in the OCC agreement have been exceeded since June 30, 2011. At September 30, 2012, the Bank's leverage ratio was 9.66%, an increase of 32 basis points from December 31, 2011, and 91 basis points above the objective of 8.75%. The Bank's total capital ratio was 14.06%, up 109 basis points from December 31, 2011, and 281 basis points above the objective of 11.25%.

On July 22, 2011, the Company entered into a Written Agreement with the FRB (the "Written Agreement"). Pursuant to the Written Agreement, the Company has agreed to take certain actions and operate in compliance with the Written Agreement's provisions during its term.

Under the terms of the Written Agreement, the Company is required to, among other things: (i) serve as a source of strength to the Bank, including ensuring that the Bank complies with the Consent Order; (ii) refrain from declaring or paying any dividend, or taking dividends or other payments representing a reduction in the Bank's capital, each without the prior written consent of the FRB and the Director of the Division of Banking Supervision and Regulation of the Board of Governors of the Federal Reserve System (the "Director"); (iii) refrain, along with its nonbank subsidiaries, from making any distributions on subordinated debentures or trust preferred securities without the prior written consent of the FRB and the Director; (iv) refrain, along with its nonbank subsidiaries, from incurring, increasing or guaranteeing any debt, and from purchasing or redeeming any shares of its capital stock, each without the prior written consent of the FRB; (v) provide the FRB with a written plan to maintain sufficient capital at the Company on a consolidated basis; (vi) provide the FRB with a projection of the Company's planned sources and uses of cash; (vii) comply with certain regulatory notice provisions pertaining to the appointment of any new director or senior executive officer, or the changing of responsibilities of any senior executive officer; and (viii) comply with certain regulatory restrictions on indemnification and severance payments. The Company is also required to submit certain reports to the FRB with respect to the foregoing requirements.

Bank holding companies are required to maintain minimum levels of capital in accordance with Federal Reserve Capital guidelines. The general bank and holding company capital adequacy guidelines are described in the accompanying table, as are the capital ratios of the Company and the Bank, as of September 30, 2012, and December 31, 2011. These ratios are calculated on a consistent basis with the ratios disclosed in the most recent filings with the regulatory agencies.

Earlier this year, the federal bank regulatory agencies issued joint proposed rules that would implement an international capital accord called Basel III, developed by the Basel Committee on Banking Supervision, a committee of central banks and bank supervisors. The proposed rules would apply to all depository organizations in the United States and most of their parent companies and would increase minimum capital ratios, add a new minimum common equity ratio, add a new capital conservation buffer, and would change the risk-weightings of certain assets for the purposes of calculating certain capital ratios. The proposed changes, if implemented, would be phased in from 2013 through 2019. The comment period on the proposed rules expired on October 22, 2012. Various banking associations and industry groups are providing comments on the proposed rules to the regulators and it is unclear when the final rules will be adopted and what changes, if any, may be made to the proposed rules. Management is currently assessing

Table of Contents

the effect of the proposed rules on the Company and the Bank's capital position and will continue to monitor developments with respect to the proposed rules.

At September 30, 2012, the Company, on a consolidated basis, exceeded the minimum thresholds to be considered adequately capitalized under current regulatory defined capital ratios. The Company and the Bank are subject to regulatory capital requirements administered by federal banking agencies. Generally, if adequately capitalized, regulatory approval is not required to accept brokered deposits. However, the Bank is limited in the amount of brokered deposits that it can hold pursuant to the Consent Order.

Capital levels and industry defined regulatory minimum required levels:

	Actual		Minimum Required for Capital Adequacy Purposes		Minimum Required to be Well Capitalized 1	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
September 30, 2012						
Total capital to risk weighted assets						
Consolidated	\$ 187,106	12.90%	\$ 116,035	8.00%	N/A	N/A
Old Second Bank	203,569	14.06	115,829	8.00	144,786	10.00
Tier 1 capital to risk weighted assets						
Consolidated	93,556	6.45	58,019	4.00	N/A	N/A
Old Second Bank	185,204	12.79	57,922	4.00	86,882	6.00
Tier 1 capital to average assets						
Consolidated	93,556	4.88	76,685	4.00	N/A	N/A
Old Second Bank	185,204	9.66	76,689	4.00	95,861	5.00
December 31, 2011						
Total capital to risk weighted assets						
Consolidated	\$ 191,439	12.38%	\$ 123,709	8.00%	N/A	N/A
Old Second Bank	200,716	12.97	123,803	8.00	154,754	10.00
Tier 1 capital to risk weighted assets						
Consolidated	95,986	6.21	61,827	4.00	N/A	N/A
Old Second Bank	180,981	11.70	61,874	4.00	92,811	6.00
Tier 1 capital to average assets						
Consolidated	95,986	4.98	77,097	4.00	N/A	N/A
Old Second Bank	180,981	9.34	77,508	4.00	96,885	5.00

1 The Bank exceeded the general minimum regulatory requirements to be considered well capitalized and is in full compliance with heightened capital ratios that it agreed to maintain with the OCC contained within the Consent Order. However, as a result of continuing to be under the Consent Order, the Bank is formally considered adequately capitalized.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

The Company's credit facility with Bank of America includes \$45.0 million in Subordinated Debt. That debt obligation continues to qualify as Tier 2 regulatory capital. In addition, the trust preferred securities continue to qualify as Tier 1 regulatory capital, and the Company treats the maximum amount of this security type allowable under regulatory guidelines as Tier 1 capital. As of September 30, 2012, trust preferred proceeds of \$24.4 million qualified as Tier 1 regulatory capital and \$32.2 million qualified as Tier 2 regulatory capital. As of December 31, 2011, trust preferred proceeds of \$25.9 million qualified as Tier 1 regulatory capital and \$30.7 million qualified as Tier 2 regulatory capital.

Dividend Restrictions and Deferrals

In addition to the above requirements, banking regulations and capital guidelines generally limit the amount of dividends that may be paid by a Bank without prior regulatory approval. Under these regulations,

Table of Contents

the amount of dividends that may be paid in any calendar year is limited to the current year's profits, combined with the retained profit of the previous two years, subject to the capital requirements described above. As a result of operating losses in prior years, funds were no longer available for the payment of dividends by the Bank to the Company and this restriction continued at September 30, 2012.

As discussed in Note 8, as of September 30, 2012, the Company had \$58.4 million of junior subordinated debentures held by two statutory business trusts that it controls. The Company has the right to defer interest payments, which are approximately \$4.9 million each year, on the debentures for a period of up to 20 consecutive quarters, and elected to begin such a deferral period in August 2010. However, all deferred interest must be paid before the Company may pay dividends on its capital stock. Therefore, the Company will not be able to pay dividends on its common stock until all deferred interest on these debentures has been paid in full. The total amount of such deferred and unpaid interest as of September 30, 2012, was \$10.5 million.

Furthermore, as with the debentures discussed above, the Company is prohibited from paying dividends on its common stock unless it has fully paid all accrued dividends on the Series B Preferred Stock. In August 2010, it also began to defer the payment of dividends on such preferred stock. Therefore, in addition to paying all the accrued and unpaid distributions on the debentures set forth above, the Company must also fully pay the Treasury all accrued and unpaid dividends on the Series B Preferred Stock before it may reinstate the payment of dividends on the common stock. The total amount of deferred Series B Preferred Stock dividends as of September 30, 2012, was \$8.1 million. However, agreements with the OCC and the FRB contain restrictions on dividend payments.

Further detail on the subordinated debentures, the Series B Preferred Stock and the deferral of interest and dividends thereon is described in Notes 8 and 15.

Note 12 Fair Value Option and Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The fair value hierarchy established also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the Company has the ability to access as of the measurement date.

Level 2: Significant observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Company uses the following methods and significant assumptions to estimate fair value:

- Securities available-for-sale are valued primarily by a third party pricing agent and both the market and income valuation approaches are implemented using the following types of inputs:
 - o U.S. treasuries are priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.
 - o Government-sponsored agency debt securities are primarily priced using available market information through processes such as benchmark curves, market valuations of like securities, sector groupings and matrix pricing.

Table of Contents

- Other government-sponsored agency securities, mortgage-backed securities and some of the actively traded real estate mortgage investment conduits and collateralized mortgage obligations are primarily priced using available market information including benchmark yields, prepayment speeds, spreads and volatility of similar securities.
- Other inactive government-sponsored agency securities are primarily priced using consensus pricing and dealer quotes.
- State and political subdivisions are largely grouped by characteristics, i.e., geographical data and source of revenue in trade dissemination systems. Because some securities are not traded daily and due to other grouping limitations, active market quotes are often obtained using benchmarking for like securities and could be valued with Level 3 measurements.
- CDO are collateralized by trust preferred security issuances of other financial institutions. Uncertainty in the financial markets in the periods presented has resulted in reduced liquidity for these investment securities, which continued to affect market pricing in the period presented. To reflect an appropriate fair value measurement, management included a risk premium adjustment to provide an estimate of the yield that a market participant would demand because of uncertainty in cash flows in the discounted cash flow analysis. Management initially made that adjustment to Level 3 valuation at June 30, 2009, because the level of market activity for CDO securities is incomplete and sporadic and information on orderly sale transactions was not generally available.
- Asset-backed securities are priced using a single expected cash flow stream model.
- Marketable equity securities are priced using available market information.
- Residential mortgage loans eligible for sale in the secondary market are carried at fair market value. The fair value of loans held for sale is determined using quoted secondary market prices.
- Lending related commitments to fund certain residential mortgage loans (interest rate locks) to be sold in the secondary market and forward commitments for the future delivery of mortgage loans to third party investors as well as forward commitments for future delivery of mortgage-backed securities are considered derivatives. Fair values are estimated based on observable changes in mortgage interest rates including mortgage-backed securities prices from the date of the commitment and do not typically involve significant judgments by management.
- The fair value of mortgage servicing rights is based on a valuation model that calculates the present value of estimated net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income to derive the resultant value. The Company is able to compare the valuation model inputs, such as the discount rate, prepayment speeds, weighted average delinquency and foreclosure/bankruptcy rates to widely available published industry data for reasonableness.
- Interest rate swap positions, both assets and liabilities, are based on a valuation pricing model using an income approach based upon readily observable market parameters such as interest rate yield curves.
- Both the credit valuation reserve on current interest rate swap positions and on receivables related to unwound customer interest rate swap positions was determined based upon management's estimate of the amount of credit risk exposure, including available collateral protection and/or by utilizing an estimate related to a probability of default as indicated in the Bank credit policy. Such adjustments would result in a Level 3 classification.
- The fair value of impaired loans with specific allocations of the allowance for loan losses is generally based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.
- Nonrecurring adjustments to certain commercial and residential real estate properties classified as OREO are measured at the lower of carrying amount or fair value, less costs to sell. Fair values are generally based on third party appraisals of the property, resulting in a Level 3

classification. In cases where the carrying amount exceeds the fair value, less costs to sell, an impairment loss is recognized.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Table of Contents

Assets and Liabilities Measured at Fair Value on a Recurring Basis:

The tables below present the balance of assets and liabilities at September 30, 2012, and December 31, 2011, respectively, which are measured by the Company at fair value on a recurring basis:

	September 30, 2012			Total

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis:

The Company may be required, from time to time, to measure certain other assets at fair value on a nonrecurring basis in accordance with GAAP. These assets consist of impaired loans and OREO. For assets measured at fair value on a nonrecurring basis at September 30, 2012, and December 31, 2011, respectively, the following tables provide the level of valuation assumptions used to determine each valuation and the carrying value of the related assets:

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

	September 30, 2012			
	Level 1	Level 2	Level 3	Total
Impaired loans ¹	\$ -	\$ -	\$ 35,786	\$ 35,786
Other real estate owned, net ²	-	-	88,093	88,093
Total	\$ -	\$ -	\$ 123,879	\$ 123,879

1 Represents carrying value and related write-downs of loans for which adjustments are substantially based on the appraised value of collateral for collateral-dependent loans. These loans had a carrying amount of \$35.8 million, with a valuation allowance of \$7.6 million, resulting in a decrease of specific allocations within the allowance for loan losses of \$5.4 million for the nine months ending September 30, 2012.

2 OREO, measured at the lower of carrying or fair value less costs to sell, had a net carrying amount of \$88.1 million, which is made up of the outstanding balance of \$117.4 million, net of a valuation allowance of

Table of Contents

\$29.3 million, at September 30, 2012, resulting in a charge to expense of \$12.1 million for the nine months ended September 30, 2012.

	December 31, 2011			Total
	Level 1	Level 2	Level 3	
Impaired loans ¹	\$ -	\$ -	\$ 51,075	\$ 51,075
Other real estate owned, net ²	-	-	93,290	93,290
Total	\$ -	\$ -	\$ 144,365	\$ 144,365

¹ Represents carrying value and related write-downs of loans for which adjustments are substantially based on the appraised value of collateral for collateral-dependent loans. These loans had a carrying amount of \$64.1 million, with a valuation allowance of \$13.0 million, resulting in a decrease of specific allocations within the allowance for loan losses of \$9.9 million for the year ending December 31, 2011.

² OREO is measured at the lower of carrying or fair value less costs to sell and had a net carrying amount of \$93.3 million, which is made up of the outstanding balance of \$116.8 million, net of a valuation allowance of \$23.5 million, at December 31, 2011, resulting in a charge to expense of \$15.1 million for the year ended December 31, 2011.

Note 13 Financial Instruments with Off-Balance Sheet Risk and Derivative Transactions

To meet the financing needs of its customers, the Bank, as a subsidiary of the Company, is a party to various financial instruments with off-balance-sheet risk in the normal course of business. These off-balance-sheet financial instruments include commitments to originate and sell loans as well as financial standby, performance standby and commercial letters of credit. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheet. The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instruments for loan commitments and letters of credit are represented by the dollar amount of those instruments. Management generally uses the same credit policies and collateral requirements in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Interest Rate Swaps

The Company also has interest rate derivative positions to assist with risk management that are not designated as hedging instruments. These derivative positions relate to transactions in which the Bank enters into an interest rate swap with a client while at the same time entering into an offsetting interest rate swap with another financial institution. Due to financial covenant violations relating to nonperforming loans, the Bank had \$5.1 million in investment securities pledged to support interest rate swap activity with two correspondent financial institutions at September 30, 2012. The Bank had \$5.2 million in investment securities pledged to support interest rate swap activity with a correspondent financial institution at December 31, 2011. In connection with each transaction, the Bank agrees to pay interest to the client on a notional amount at a variable interest rate and receive interest from the client on the same notional amount at a fixed interest rate. At the same time, the Bank agrees to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows the client to effectively convert a variable rate loan to a fixed rate loan and is also part of the Company's interest rate risk management strategy. Because the Bank acts as an intermediary for the client, changes in the fair value of the underlying derivative contracts offset each other and do not generally impact the results of operations. Fair value measurements include an assessment of credit risk related to the client's ability to perform on their contract position, however, and valuation estimates related to that

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

exposure are discussed in Note 12 above. At September 30, 2012, the notional amount of non-hedging interest rate swaps was \$114.7 million with a weighted average maturity of 1.48 years. At December 31, 2011, the notional amount of non-hedging interest rate swaps was \$117.8 million with a

Table of Contents

weighted average maturity of 2.24 years. The Bank offsets derivative assets and liabilities that are subject to a master netting arrangement.

The Bank also grants mortgage loan interest rate lock commitments to borrowers, subject to normal loan underwriting standards. The interest rate risk associated with these loan interest rate lock commitments is managed by entering into contracts for future deliveries of loans as well as selling forward mortgage-backed securities contracts. Loan interest rate lock commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Commitments to originate residential mortgage loans held-for-sale and forward commitments to sell residential mortgage loans or forward mortgage backed securities contracts are considered derivative instruments and changes in the fair value are recorded to mortgage banking income. Fair values are estimated based on observable changes in mortgage interest rates including mortgage-backed securities prices from the date of the commitment.

The following table presents derivatives not designated as hedging instruments as of September 30, 2012:

	Notional or Contractual Amount	Asset Derivatives		Liability Derivatives	
		Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Interest rate swap contracts net of credit valuation	\$ 114,693	Other Assets	\$ 2,238	Other Liabilities	\$ 2,299
Commitments ¹	255,438	Other Assets	550	N/A	-
Forward contracts ²	44,500	N/A	-	Other Liabilities	-
Total			\$ 2,788		\$ 2,299

¹ Includes unused loan commitments, interest rate lock commitments, forward rate lock, and mortgage-backed securities commitments.

² Includes forward mortgage backed securities contracts and forward loan contracts.

The following table presents derivatives not designated as hedging instruments as of December 31, 2011:

	Notional or Contractual Amount	Asset Derivatives		Liability Derivatives	
		Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Interest rate swap contracts net of credit valuation	\$ 117,756	Other Assets	\$ 3,072	Other Liabilities	\$ 3,152
Commitments ¹	237,970	Other Assets	107	N/A	-
Forward contracts ²	26,000	N/A	-	Other Liabilities	50
Total			\$ 3,179		\$ 3,202

1 Includes unused loan commitments, interest rate lock commitments and forward rate lock and mortgage-backed securities commitments.

Table of Contents

2 Includes forward mortgage backed securities contracts and forward loan contracts.

The Bank also issues letters of credit, which are conditional commitments that guarantee the performance of a customer to a third party. The credit risk involved and collateral obtained in issuing letters of credit is essentially the same as that involved in extending loan commitments to our customers.

In addition to customer related commitments, the Company is responsible for letters of credit commitments that relate to properties held in OREO. The following table represents the Company's contractual commitments due to letters of credit as of September 30, 2012, and December 31, 2011.

	September 30, 2012		December 31, 2011
Commitments to extend credit: borrowers			
Financial standby letters of credit	\$ 3,400	\$	2,837
Performance standby letters of credit	6,522		8,554

Performance standby letters of credit	7,751		10,878
Commercial letters of credit	51		375
Total letters of credit	\$ 11,752	\$	14,640

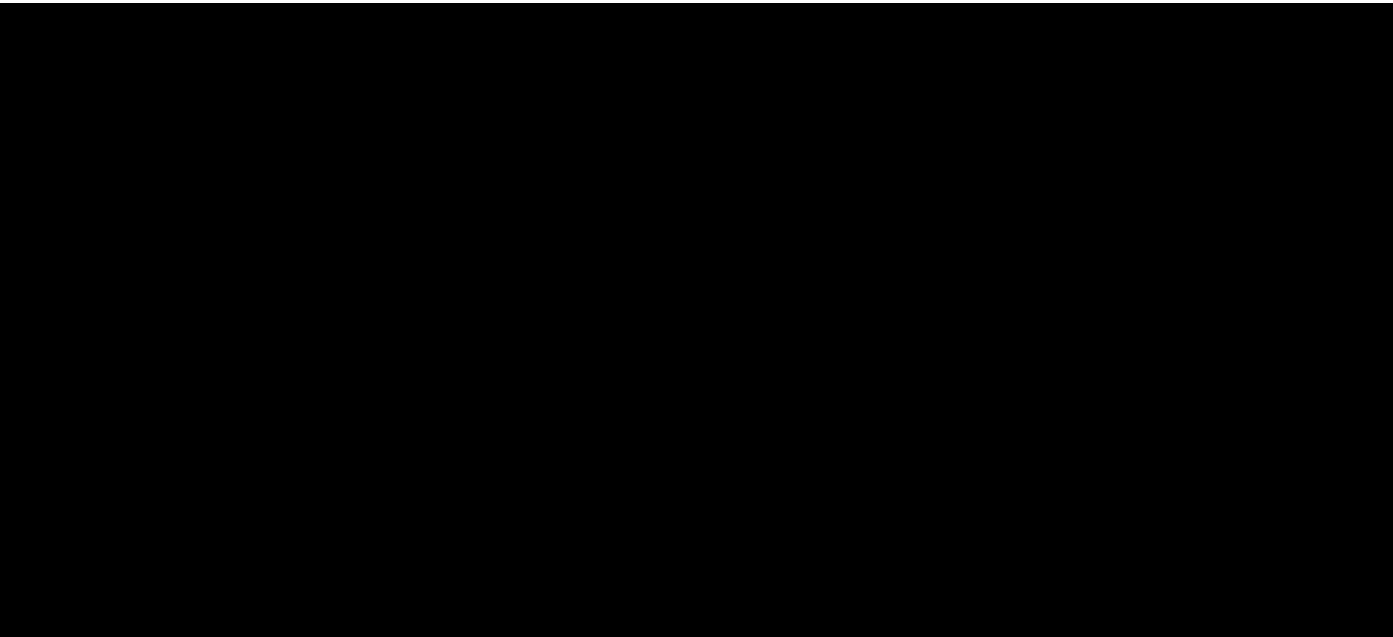

Note 14 Fair Values of Financial Instruments

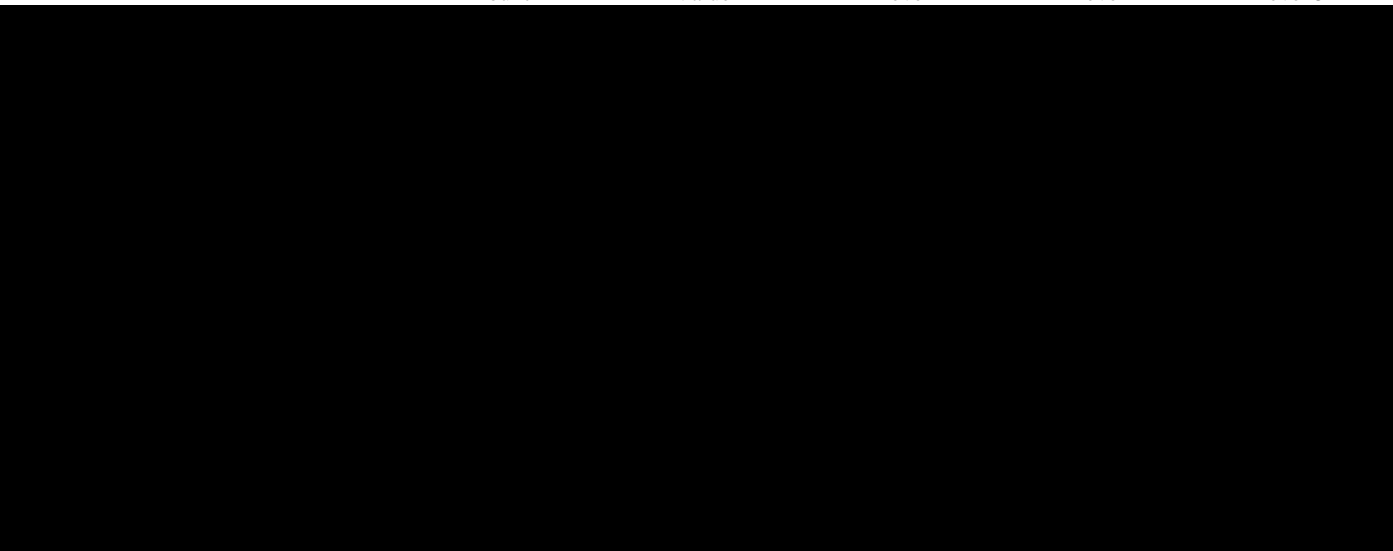

The estimated fair values approximate carrying amount for all items except those described in the following table. Investment security fair values are based upon market prices or dealer quotes, and if no such information is available, on the rate and term of the security. The fair value of the CDO included in investment securities includes a risk premium adjustment to provide an estimate of the amount that a market participant would demand because of uncertainty in cash flows and the methods for determining fair value of securities as discussed in detail in Note 12. The carrying value of FHLB stock approximates fair value as the stock is nonmarketable, and can only be sold to the FHLB or another member institution at par. During the first nine months of 2012, we participated in multiple redemptions with the FHLB and using the redemption values as the carrying value, FHLB stock has been transferred to a Level 2 fair value. Fair values of loans were estimated for portfolios of loans with similar financial characteristics, such as type and fixed or variable interest rate terms. Cash flows were discounted using current rates at which similar loans would be made to borrowers with similar ratings and for similar maturities. The fair value of time deposits is estimated using discounted future cash flows at current rates offered for deposits of similar remaining maturities. The fair values of borrowings were estimated based on interest rates available to the Company for debt with similar terms and remaining maturities. The fair value of off-balance sheet items is not considered material.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Note 15 Preferred Stock

The Series B Preferred Stock was issued as part of the TARP Capital Purchase Program as implemented by the Treasury. The Series B Preferred Stock qualifies as Tier 1 capital and pays cumulative dividends on the liquidation preference amount on a quarterly basis at a rate of 5% per annum for the first five years, and 9% per annum thereafter. Concurrent with issuing the Series B Preferred Stock, the Company issued to the Treasury a ten year warrant to purchase 815,339 shares of the Company's common stock at an exercise price of \$13.43 per share.

Subsequent to the Company's receipt of the \$73.0 million in proceeds from the Treasury in the first quarter of 2009, the proceeds were allocated between the Series B Preferred Stock and warrants that were issued. The warrants were classified as equity, and the allocation was based on their relative fair values in accordance with accounting guidance. The fair value was determined for both the Series B Preferred Stock and the warrants as part of the allocation process in the amounts of \$68.2 million and \$4.8 million, respectively.

As discussed in Note 11, in August 2010 the Company suspended quarterly cash dividends on its outstanding Series B Preferred Stock. Further, as discussed in Note 11, the Company has elected to defer interest payments on certain of its subordinated debentures. During the period in which preferred stock dividends are deferred, such dividends continue to accrue. The terms of the Series B Preferred Stock also prevent the Company from paying cash dividends or generally repurchasing its common stock while Series B Preferred Stock dividends are in arrears. The total amount of such unpaid and deferred Series B Preferred Stock dividends as of September 30, 2012, was \$8.1 million.

Pursuant to the terms of the TARP Capital Purchase Program, the ability of the Company to declare or pay dividends or distributions on, or purchase, redeem or otherwise acquire for consideration, shares of its common stock is subject to restrictions, including a restriction against increasing dividends from the immediately preceding quarter prior to issuance. The redemption, purchase or other acquisition of trust preferred securities of the Company or its affiliates is also restricted. These restrictions will terminate on the earlier of (a) the third anniversary of the date of issuance of the Preferred Stock, (b) the date on which the Series B Preferred Stock has been redeemed in whole or (c) the Treasury has transferred all of the Series B Preferred Stock to third parties.

The TARP Capital Purchase Program also subjects the Company to certain of the executive compensation limitations included in the Emergency Economic Stabilization Act of 2008 (EESA). In connection with the issuance of the Series B Preferred Stock and warrants, the Company's Senior Executive Officers (as defined in the Securities Purchase Agreement, dated January 16, 2009, by and between Old Second Bancorp, Inc. and the Treasury) (i) voluntarily waived any claim against Treasury or the Company for any changes to such officer's compensation or benefits that are required to comply with the TARP Capital Purchase Program as well as EESA and acknowledged that the regulations may require modification of the compensation, bonus, incentive and other benefit plans, arrangements and policies and agreements during the period Treasury owns the Series B Preferred Stock; and (ii) entered into a letter with the Company amending the benefit plans with respect to such Senior Executive Officers, during the period that Treasury owns the Preferred Stock of the Company, as necessary to comply with Section 111(b) of EESA.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

The Company is a financial services company with its main headquarters located in Aurora, Illinois. The Company is the holding company of the Bank, a national banking organization headquartered in Aurora, Illinois and provides commercial and retail banking services, as well as a full complement of trust and wealth management services. The Company has offices located in Cook, Kane, Kendall, DeKalb, DuPage, LaSalle and Will counties in Illinois. The following management's discussion and analysis is presented to provide information concerning our financial condition as of September 30, 2012, as compared to December 31, 2011, and the results of operations for the three-month and nine-month periods ended September 30, 2012 and 2011. This discussion and analysis should be read in conjunction with our consolidated financial statements and the financial and statistical data appearing elsewhere in this report and our 2011 Form 10-K.

The ongoing weakness in the financial sector and economy, particularly as it relates to credit costs associated with real estate in the Company's market areas, continues to directly affect borrowers' ability to repay their loans. This has resulted in a continued elevated, but improving, level of nonperforming loans. Overall economic weakness is reflected in the Company's operating results, and management remains vigilant in analyzing the loan portfolio quality, making an appropriate loan loss provision and making decisions to charge-off loans. The Company recorded a \$6.3 million provision for loan losses and a net loss of \$1.6 million prior to preferred stock dividends and accretion in the first nine months of 2012. This compared to a \$7.5 million provision for loan losses and a net loss of \$3.5 million prior to preferred stock dividends and accretion for the same period in 2011.

Results of Operations

The net income for the third quarter of 2012 was \$120,000, or \$0.08 loss per diluted share, as compared with a \$1.4 million net loss, or \$0.18 loss per diluted share, in the third quarter of 2011. The net loss for the first nine months of 2012 was \$1.6 million or \$0.37 loss per diluted share, as compared to \$3.5 million in net loss, or \$0.49 of loss per diluted share in the first nine months of 2011. The Company recorded a \$6.3 million provision for loan losses in the first nine months of 2012, while the Company did not include any additional provision in the third quarter of 2012. Net loan charge-offs totaled \$18.0 million in the first nine months of 2012, which included \$29,000 of net charge-offs in the third quarter. The provision for loan losses in the first nine months of 2011 was \$7.5 million, which included an addition of \$3.0 million in the third quarter of 2011. Net loan charge-offs totaled \$24.0 million in the first nine months of 2011, which included \$9.2 million of net charge-offs in the third quarter of 2011. The net loss available to common stockholders was \$1.1 million for the third quarter of 2012 and a loss of \$5.3 million for the first nine months of 2012, as compared to net loss available to common shareholders of \$2.6 million and \$7.0 million, respectively, for the same periods in 2011.

Net Interest Income

Net interest and dividend income decreased \$3.5 million, from \$48.9 million in the first nine months of 2011, to \$45.4 million in the first nine months of 2012. Average earning assets decreased \$112.3 million, or 6.1%, to \$1.73 billion from the first nine months of 2011 to the first nine

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

months of 2012, as management continued to emphasize asset quality and funded new loan originations continued to be limited. The \$281.5 million decrease in year to date average loans and loans held-for-sale was primarily due to the ongoing lower funded demand from qualified borrowers in the Bank's market area, charge-off activity, and movement of loan assets to OREO as well as maturities and payments on performing loans. To utilize available liquid funds, management continued to increase securities available-for-sale in the first nine months of 2012 to

Table of Contents

21.7% of total assets up from 15.8% at the end of 2011 and 9.7% at September 30, 2011. At the same time, management reduced deposits that had previously provided funding for those assets by emphasizing relationship banking rather than single service customers. As a result, average interest bearing liabilities decreased \$110.6 million, or 7.0%, from the first nine months of 2011 to the first nine months of 2012. The net interest margin (tax-equivalent basis), expressed as a percentage of average earning assets, decreased slightly from 3.57% in the first nine months of 2011 to 3.52% in the first nine months of 2012. The average tax-equivalent yield on earning assets decreased from 4.70% in the first nine months of 2011 to 4.39%, or 31 basis points in the first nine months of 2012. The 2012 first nine months of earning asset tax equivalent yield received benefit from collection of previously reversed or unrecognized interest on loans that returned to performing status during the period. The first nine months of 2012 earning asset tax equivalent yield would have been 4.27% without this benefit whereas the first nine months of 2011 would have been 4.63%. During the same period, the cost of funds on interest bearing liabilities decreased from 1.39% to 1.09%, or 30 basis points, helping to offset the decrease in yield. The decrease in average earning assets and movement to lower yielding securities with reduction in higher yielding loan volumes in 2012 were the main causes of decreased interest income.

Net interest and dividend income decreased \$1.3 million from \$15.9 million in the third quarter of 2011 to \$14.6 million in the third quarter of 2012. The decrease in average earning assets on a quarterly comparative basis was \$48.7 million, or 2.8%, from September 30, 2011 to September 30, 2012 due in part to continued low demand from qualified borrowers as well as OREO migration activity in the quarter. Average interest bearing liabilities decreased \$66.2 million, or 4.4%, during the same period. The net interest margin (tax-equivalent basis), expressed as a percentage of average earning assets, decreased from 3.63% in the third quarter of 2011 to 3.44% in the third quarter of 2012. The average tax-equivalent yield on earning assets decreased from 4.73% in the third quarter of 2011 to 4.24% in the third quarter of 2012, or 49 basis points. The 2012 third quarter earning asset tax equivalent yield received benefit from collection of previously reversed or unrecognized interest on loans that returned to performing status during the period. The third quarter 2012 earning asset tax equivalent yield would have been 4.10% without this benefit whereas the third quarter of 2011 would have been 4.65%. The cost of interest-bearing liabilities also decreased from 1.35% to 1.02%, or 33 basis points, in the same period. Consistent with the year to date margin trend, the decreased overall average earning assets and the movement to lower yielding securities combined with the repricing of interest bearing assets and liabilities in a lower interest rate environment decreased interest income to a greater degree than it decreased interest expense.

Management, in order to evaluate and measure performance, uses certain non-GAAP performance measures and ratios. This includes tax-equivalent net interest income (including its individual components) and net interest margin (including its individual components) to total average interest-earning assets. Management believes that these measures and ratios provide users of the financial information with a more accurate view of the performance of the interest-earning assets and interest-bearing liabilities and of the Company's operating efficiency for comparison purposes. Other financial holding companies may define or calculate these measures and ratios differently. See the tables and notes below for supplemental data and the corresponding reconciliations to GAAP financial measures for the three and nine-month periods ended September 30, 2012 and 2011.

The following tables set forth certain information relating to the Company's average consolidated balance sheets and reflect the yield on average earning assets and cost of average liabilities for the periods indicated. Dividing the related interest by the average balance of assets or liabilities derives rates. Average balances are derived from daily balances. For purposes of discussion, net interest income and net interest income to total earning assets on the following tables have been adjusted to a non-GAAP tax equivalent (TE) basis using a marginal rate of 35% to more appropriately compare returns on tax-exempt loans and securities to other earning assets.

1 Interest income from loans is shown on a tax equivalent basis as discussed below and includes fees of \$1.4 million and \$1.7 million for the first nine months of 2012 and 2011, respectively. Nonaccrual loans are included in the above stated average balances.

Table of Contents

As indicated previously, net interest income and net interest income to earning assets have been adjusted to a non-GAAP TE basis using a marginal rate of 35% to more appropriately compare returns on tax-exempt loans and securities to other earning assets. The table below provides a reconciliation of each non-GAAP TE measure to the GAAP equivalent for the periods indicated:

	Effect of Tax Equivalent Adjustment Three Months Ended September 30,		Effect of Tax Equivalent Adjustment Nine Months Ended September 30,	
	2012	2011	2012	2011
Interest income (GAAP)	\$ 18,333	\$ 21,045	\$ 57,519	\$ 65,451
Taxable equivalent adjustment - loans	18	27	64	61
Taxable equivalent adjustment - securities	53	62	164	207
Interest income (TE)	18,404	21,134	57,747	65,719
Less: interest expense (GAAP)	3,698	5,123	12,090	16,518
Net interest income (TE)	\$ 14,706	\$ 16,011	\$ 45,657	\$ 49,201
Net interest and income (GAAP)	\$ 14,635	\$ 15,922	\$ 45,429	\$ 48,933
Average interest earning assets	\$ 1,702,675	\$ 1,751,347	\$ 1,730,932	\$ 1,843,264
Net interest income to total interest earning assets	3.42%	3.61%	3.51%	3.54%
Net interest income to total interest earning assets (TE)	3.44%	3.63%	3.52%	3.56%

Provision for Loan Losses

In the first nine months of 2012, the Company recorded a \$6.3 million provision for loan losses, which did not include any provision in the third quarter. In the first nine months of 2011, the provision for loan losses was \$7.5 million, which included \$3.0 million in the third quarter. Provisions for loan losses are made to provide for probable and estimable losses inherent in the loan portfolio. Nonperforming loans decreased to \$105.8 million at September 30, 2012 from \$138.9 million at December 31, 2011, and \$139.3 million at September 30, 2011. Charge-offs, net of recoveries, totaled \$18.0 million and \$24.0 million in the first nine months of 2012 and 2011, respectively. Net charge-offs totaled \$29,000 in the third quarter of 2012 and \$9.2 million in the third quarter of 2011. The distribution of the Company's gross charge-off activity for the periods indicated is detailed in the first table below and the distribution of the Company's remaining nonperforming loans and related specific allocations at September 30, 2012 are included in the following tables.

1 Nonaccrual loans included a total of \$11.3 million in restructured loans. Component balances are \$1.7 million in real estate construction, \$5.6 million in real estate-commercial nonfarm, \$1.3 million is in real estate - residential investor, \$2.7 million is in real estate - owner occupied and \$17,000 in Commercial.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Classified loans (under a definition closely reflecting our regulator's definition – substandard loans and TDR accruing) have decreased \$122.2 million or 46.8% from a year ago and \$99.3 million or 41.7% from December 31, 2011. Classified loans are summarized in the table below:

Table of Contents

	Classified Loans		
	9/30/2012	12/31/2011	9/30/2011
Commercial	\$ 1,748	\$ 2,380	\$ 8,762

Real estate - residential	39,143	61,234	59,235
Consumer	5	13	15
	\$ 138,793	\$ 238,118	\$ 261,005

Commercial Real Estate

Commercial Real Estate Nonfarm (CRE) remained the largest component of nonperforming loans at \$55.6 million, or 52.6% of total nonperforming loans. The dollar volume of nonperforming CRE loans is down from \$64.0 million at December 31, 2011 and \$65.7 million at September 30, 2011. These decreases resulted from loans moving to OREO during these periods, loans paying off and loans upgraded as a result of improved performance. The class components of the CRE segment at September 30, 2012, were as follows (dollars in thousands):

CRE	Nonaccrual Total	90 Days or More Past Due (Accruing)	Restructured Loans (Accruing)	Total Non performing Loans	% Non performing CRE Loans	Specific Allocation
Owner occupied general purpose	\$ 5,901	\$ -	\$ -	\$ 5,901	10.6%	\$ 337
Owner occupied special purpose	12,889	-	-	12,889	23.2%	896
Non-owner occupied general purpose	19,664	1,256	3,724	24,644	44.3%	350
Non-owner occupied special purpose	487	-	-	487	0.9%	-
Retail properties	11,721	-	-	11,721	21.0%	1,413
	\$ 50,662	\$ 1,256	\$ 3,724	\$ 55,642	100.0%	\$ 2,996

Non-owner occupied, general purpose loans include credits that are collateralized by office, warehouse, and industrial properties and represented 24.7% of total CRE loans, and 44.3% of nonperforming CRE loans at the end of the third quarter of 2012. Third quarter 2012 charge-offs in this category were \$121,000, with most of the charge-offs coming from fully allocated credits, and management estimated that \$350,000 of specific allocation was sufficient coverage for the remaining loss exposure at September 30, 2012. However, there can be no guarantee that actual losses in this category, and all other categories discussed in this section, will not exceed the amount specifically reserved for the category.

The owner occupied special purpose category had loans totaling \$167.1 million, representing 28.2% of all CRE loans. With \$12.9 million of these loans nonperforming at September 30, 2012, these loans accounted for 23.2% of total nonperforming CRE. Special purpose owner occupied credits include loans collateralized by property types such as car washes, golf courses, restaurants, and medical office buildings. Charge-offs in the third quarter of 2012 totaled \$90,000 in this loan category and management estimated that the specific allocation of \$896,000 was sufficient coverage for the remaining loss exposure at September 30, 2012.

Portfolio loans secured by retail property, primarily retail strip malls, continue to experience financial stress as vacancies and lower rents needed to secure tenants hampered successful retail mall performance. This class accounted for 8.5% of all CRE loans and 21.0% of all nonperforming CRE loans at September 30, 2012. Third quarter 2012 charge-offs in the retail segment totaled \$137,000. Management estimated that specific allocations of \$1.4 million were sufficient coverage for the remaining loss exposure at September 30, 2012.

Table of Contents

As of September 30, 2012, owner occupied general purpose loans comprised 22.0% of CRE, and 10.6% of nonperforming CRE loans. Charge-offs totaled \$7,000 in the third quarter of 2012, and management estimated that specific allocations of \$337,000 were sufficient coverage for the remaining loss exposure at September 30, 2012.

Non-owner occupied special purpose loans represented 16.6% of the CRE portfolio, and 0.9% of nonperforming CRE loans at the end of the third quarter of 2012. In the third quarter there were no charge-offs recorded and no specific allocation. Management has reviewed all nonperforming loans and concluded no additional inherent losses are apparent which would require a specific reserve at September 30, 2012.

In addition to the specific allocations detailed above, management estimates include a higher risk commercial real estate pool loss factor for certain CRE loans. These loans typically have a deficiency in cash flow coverage from the property securing the credit, but other supporting factors such as liquidity, guarantor capacity, sufficient global cash flow coverage or cooperation from the borrower is evident to support the credit. These deficiencies in cash flow coverage are typically attributable to vacancy that is expected to be temporary or reduced operating income from the owner-occupant due to continued economic stress in our market areas. The pool also includes cases where the property securing the credit has adequate cash flow coverage, but the borrower has other economic stress indicators to warrant heightened risk treatment. Due to a 71.1% decline in the balance of loans in this pool, management estimated a reduction of reserves of \$5.4 million in the first nine months of 2012 compared to December 31, 2011.

Construction and Development

At September 30, 2012, nonperforming construction and development (C & D) loans totaled \$16.0 million, or 15.2% of total nonperforming loans. This is a decrease of \$17.8 million from \$33.8 million at December 31, 2011, and a decrease of \$23.9 million from \$39.9 million at September 30, 2011. Of the \$48.6 million of total C & D loans in the portfolio, 33.0% were nonperforming as of September 30, 2012, as compared to 47.3% at December 31, 2011, and 51.2% at September 30, 2011. Total C & D charge-offs for the third quarter of 2012 were \$909,000, as compared to \$2.0 million in the third quarter 2011. Total C & D had net recoveries for the third quarter of 2012 of \$1.3 million, as compared to net charge-offs of \$1.4 million in the third quarter of 2011. Following all charge-off activity, management estimated that specific allocations of \$1.4 million were sufficient coverage for the remaining loss exposure in this segment at September 30, 2012. The majority of the Bank's C & D loans are located in suburban Chicago markets, predominantly in the far western and southwestern suburbs. The Bank's loan exposure to credits secured by homebuilder inventory is down 51.6% from a year ago.

Management closely monitors the performing loans that have been rated as special mention or substandard but that are still accruing interest. While some additional adverse migration is still possible, management believes that the remaining performing C & D borrowers have demonstrated sufficient operating strength through an extended period of weak construction to avoid classification as an impaired credit at September 30, 2012. As a result, management believes future losses in the construction segment will generally continue to trend downward. In addition to reviewing the operating performance of the borrowers when reviewing allowance estimates, management also continues to update underlying collateral valuation estimates to reflect the aggregate estimated credit exposure.

Residential Real Estate

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Nonperforming 1-4 family owner occupied residential mortgages to consumers totaled \$14.9 million, or 14.1% of the nonperforming loan total as of September 30, 2012. This class totaled \$20.3 million in nonperforming loans at December 31, 2011, compared to \$18.6 million at September 30, 2011. While Kendall, Kane, and Will counties experienced high rates of foreclosure in both 2012 and 2011, the Bank has recently experienced relatively stable or somewhat improved nonperforming totals. The majority of all residential mortgage loans originated today are sold on the secondary market. Of the nonperforming loans in this category, \$5.4 million, or 36.3%, are to homeowners enrolled in the Bank's foreclosure avoidance

Table of Contents

program and were classified as restructured at September 30, 2012. The typical concessions granted in these cases were small and temporary rate reductions and a reduced monthly payment with the expectation that these borrowers will resume normal performance on their obligations when their earnings situation improves. The usual profile of these borrowers includes a decrease in household income resulting from a change or loss of employment. The remaining nonperforming loans in the 1-4 family residential category are in nonaccrual status and most cases are in various stages of foreclosure. Management believes that deterioration in the segment relates primarily to the high rate of unemployment in our market areas offset by some reductions from loans moved to OREO or upgraded as borrowers regain employment. In addition, a significant portion of these nonperforming loans were supported by private mortgage insurance, and, at September 30, 2012, management estimated that a specific allocation of \$811,000 was adequate loss coverage following the \$446,000 of charge-offs that occurred during the quarter and allowing for problems in collecting on private mortgage insurance. At September 30, 2012, there were loans of \$100,000 that were greater than 90 days past due and were still accruing interest in this portfolio segment. Additionally, at September 30, 2012, loans 30 to 89 days past due and still accruing totaled \$449,000 which was an improvement from \$4.0 million at December 31, 2011, and from \$1.1 million at September 30, 2011.

Nonperforming residential investor loans at September 30, 2012 consisted of multi-family (\$8.5 million) and 1-4 family properties (\$4.5 million) for a total of \$13.0 million, or 12.3% of the nonperforming loans total. September 30, 2012 was a decrease from \$15.3 million at December 31, 2011 but an increase from \$9.8 million at September 30, 2011. Following the third quarter charge-off of \$250,000, management estimated that a total specific allocation of \$875,000 would provide sufficient loss reserves at September 30, 2012, for the remaining risk in this category. The multi-family and rental market segment is showing improved credit metrics as higher occupancy rates have driven stronger net operating income.

Other

The remaining nonperforming credits included \$1.1 million in commercial loans, \$3.3 million in consumer home equity and second mortgage loans and \$1.8 million in farmland and agricultural loans. These loan categories have shown stable credit characteristics and losses have been minimal during this economic cycle. At September 30, 2012, management estimated that a total specific allocation of \$514,000 on the commercial portfolio and \$117,000 in farmland and agricultural loans would be sufficient loss coverage for the remaining risk in those nonperforming credits, and that \$864,000 was sufficient loss coverage for the consumer home equity and second mortgage loan segment. These estimated amounts were following charge-offs in the third quarter of 2012 of \$2,000 in commercial loans, and \$534,000 in consumer home equity loans.

Other Troubled Loans

Loans that were classified as performing but 30 to 89 days past due and still accruing interest decreased to \$5.4 million at September 30, 2012, from \$12.1 million at December 31, 2011, and \$10.0 million at September 30, 2011. At September 30, 2012, loans 30 to 89 days past due consisted of \$449,000 in 1-4 family owner occupied mortgages, \$1.8 million in commercial real estate credits, \$975,000 in residential investor credits, \$572,000 in construction and development, \$268,000 in commercial loans, \$25,000 in consumer loans and \$1.4 million in home equity loans. Troubled debt restructurings (TDRs) in accrual status total \$11.5 million, which was a slight decrease from \$11.8 million in TDRs from December 31, 2011 and a decrease from \$13.6 million from September 30, 2011. Accruing TDRs included \$5.4 million in 1-4 family owner occupied mortgages in the foreclosure avoidance program discussed previously, \$2.3 million in restructured residential lot inventory loans to builders, \$61,000 in revolving and junior liens mortgages, and \$3.7 million in non-owner occupied general purpose commercial real estate.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Nonaccrual TDR loans totaled \$11.3 million as of September 30, 2012. These credits, which have not demonstrated a sustained period of financial performance, are primarily due to bankruptcy or continued deterioration in the borrowers' financial situation. Management is pursuing liquidation strategies for many

Table of Contents

of these loans. Management estimated that specific allocation estimates of \$369,000 at September 30, 2012, were sufficient coverage for the remaining loss exposure in this category.

Allowance for Loan and Lease Loss Reserve

The coverage ratio of the allowance for loan losses to nonperforming loans was 38.0% as of September 30, 2012, which reflects a modest increase from 37.4% as of December 31, 2011. A decrease of \$33.1 million, or 23.8%, in nonperforming loans in the nine months along with reductions in both specific reserves and management factor reserves drove the overall coverage ratio change. Management updated the estimated specific allocations in the third quarter after receiving more recent appraisal collateral valuations or information on cash flow trends related to the impaired credits. The estimated general allocations decreased by \$6.3 million from December 31, 2011, as the overall loan balances subject to general factors decreased at September 30, 2012. Management determined the estimated amount to provide in the allowance for loan losses based upon a number of factors, including loan growth or contraction, the quality and composition of the loan portfolio and loan loss experience. The latter item was also weighted more heavily based upon recent loss experience. The C & D portfolio has had diminished adverse migration and the remaining credits are exhibiting more stable credit characteristics. Management estimates adequate reserves have been established for the remaining risk of loss in the C & D portfolio.

Management regularly reviews the performance of the higher risk pool within commercial real estate loans, and adjusts the population and the related loss factors taking into account adverse market trends including collateral valuation as well as its assessments of the credits in that pool. Those assessments capture management's estimate of the potential for adverse migration to an impaired status as well as its estimation of what the potential valuation impact from that migration would be if it were to occur. The amount of assets subject to this pool factor decreased by 71.1% at September 30, 2012 as compared to December 31, 2011. Also, compared to December 31, 2011, management decreased the loss factor assigned to this pool by 0.04% based on risk characteristics of the remaining credits. Management has also observed that many stresses in those credits were generally attributable to cyclical economic events that were showing some signs of stabilization. Those signs included a reduction in loan migration to watch status, as well as a decrease in 30 to 89 day past due loans and some stabilization in values of certain properties.

The above changes in estimates were made by management to be consistent with observable trends within loan portfolio segments and in conjunction with market conditions and credit review administration activities. Several environmental factors are also evaluated on an ongoing basis and are included in the assessment of the adequacy of the allowance for loan losses. When measured as a percentage of loans outstanding, the total allowance for loan losses decreased from 4.2% of total loans as of September 30, 2011, to 3.3% of total loans at September 30, 2012. In management's judgment, an adequate allowance for estimated losses has been established for inherent losses at September 30, 2012; however, there can be no assurance that actual losses will not exceed the estimated amounts in the future.

As discussed above, nonperforming loans include loans in nonaccrual status, troubled debt restructurings, and loans past due ninety days or more and still accruing interest. The comparative nonperforming loan totals and related disclosures as well as other nonperforming assets for the period ended September 30, 2012, and December 31, 2011, were as follows:

	September 30, 2012	December 31, 2011
Nonaccrual loans (including restructured)	\$ 92,722	\$ 126,786
Accruing restructured loans	11,518	11,839
Loans 90 days or more past due and still accruing interest	1,572	318

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Table of Contents

The Bank had no commitments to any borrower whose loans were classified as impaired at September 30, 2012.

Finally, the Bank has added a last step in resolution of selected loan charge off decisions. On selected transactions, the Bank and the customer enter a deficiency note agreement whereby the customer agrees to pay the Bank both an agreed upon principle balance and interest at a negotiated rate. While many of these notes show little or no payment activity, some reflect customer repayment. All notes are carried as off balance sheet assets (original balance of \$3.0 million with current balance of \$2.5 million deficiency at October 8, 2012) and all payments received are reflected as loan recoveries.

Other Real Estate

OREO net of valuation reserve totaled \$88.1 million at September 30, 2012 or a decrease of \$5.2 million from December 31, 2011. Disposition activity and valuation write downs in the third quarter exceeded additions to OREO assets, leading to an overall decrease of \$1.6 million from OREO assets of \$89.7 million at June 30, 2012. In the third quarter of 2012, management successfully converted collateral securing problem loans to properties ready for disposition, spent as needed on development improvements, transacted asset dispositions and recorded valuation adjustments as shown below in thousands. As a result, holdings in the categories of vacant land suitable for farming, lots suitable for development and commercial property declined in the quarter while single family residences and multi-family properties increased during the quarter. Overall, a net gain on sale of \$20,000 was realized in the third quarter 2012.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Beginning balance	\$ 89,671	\$ 82,611	\$ 93,290	\$ 75,613
Property additions	7,594	29,842	26,944	60,355
Development improvements	131	394	646	2,561
Less:				
Property disposals	4,829	9,574	20,517	28,754
Period valuation adjustments	4,474	2,719	12,270	9,221
Other real estate owned	\$ 88,093	\$ 100,554	\$ 88,093	\$ 100,554

The OREO valuation reserve increased to \$29.3 million, which is 24.9% of gross OREO at September 30, 2012. The valuation reserve represented 17.8% of gross OREO at September 30, 2011. In management's judgment, an adequate property valuation allowance has been established; however, there can be no assurance that actual valuation losses will not exceed the estimated amounts in the future.

Net OREO Aging

	0-90 Days	91-180 Days	181 Days to 1 Year	1 Year to 2 Years	2 Years to 3 Years	3 Years +	Total
9/30/2012	\$ 7,249 8.2%	\$ 2,654 3.0%	\$ 21,100 23.9%	\$ 41,990 47.7%	\$ 10,810 12.3%	\$ 4,290 4.9%	\$ 88,093 99.9%

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

11.0% 24.5% 30.7% 25.3% 8.3% 0.2% 100.1%

As part of our OREO management process, we age or track the time that these properties are held for sale. The table above shows that, in total, where 66.2% of our OREO at December 31, 2011, had been held for less than one year, that percentage dropped to 35.1% at September 30, 2012. When properties are tracked as being held for one to three years, the percentage of total OREO in that age class rose to 60.0% at September 30, 2012, up from 33.6% at December 31, 2011. While the amount held for more than three

Table of Contents

years is smaller than other aging categories, a similar trend was found in properties held in OREO for more than three years (4.9% of September 30, 2012, total from 0.2% of December 31, 2011, total).

Noninterest Income

Noninterest income increased \$1.8 million, or 21.6%, to \$10.3 million during the third quarter of 2012 compared to \$8.5 million during the same period in 2011. For the first nine months of 2012, noninterest income increased by \$4.4 million, or 16.2%, to \$31.2 million compared to \$26.8 million for the same period in 2011. Trust income decreased by \$168,000, or 10.1%, and by \$553,000, or 10.7%, for the third quarter and first nine months of 2012, respectively. The Company's reduction in trust revenues, for both the quarter and nine month year over year periods, was largely caused by three key client departures and lower levels of new business development. Service charge income from deposit accounts decreased for both the quarter and first nine months of 2012, primarily due to decreases in volume of overdraft fees and commercial checking service charges. Total mortgage banking income in the third quarter of 2012, including net gain on sales of mortgage loans, secondary market fees, and servicing income, was \$2.7 million, an increase of \$1.4 million from the third quarter of 2011. Mortgage banking income for the first nine months of the year also increased by \$3.9 million, or 93.9%, from the 2011 level, reflecting continued strong demand for mortgage loans through the first nine months of 2012 as interest rates remained at historically low levels.

Realized gains on securities totaled \$513,000 in the third quarter and \$1.3 million in the first nine months of 2012 as the securities portfolio was revised to reduce levels of mortgage backed securities with inherent prepayment risk. Sales of asset-backed securities backed by student loans substantively guaranteed by the U. S. Department of Education were also conducted in the third quarter to reduce concentration level. Gains in 2012 compared to losses of \$63,000 in the third quarter of 2011 and gains of \$588,000 in the first nine months of 2011. Bank owned life insurance (BOLI) income increased \$192,000, or 82.4% and \$116,000, or 10.3% in the third quarter and first nine months of 2012, respectively, over the same periods in 2011. Debit card interchange income increased for both the third quarter and first nine months of 2012 as the volume of consumer card activity continued to increase when compared to 2011. Lease revenue received from OREO properties, which partially offsets OREO expenses included in noninterest expense, decreased \$220,000 in the third quarter of this year when compared to 2011 third quarter but increased \$393,000 in the first nine months of 2012 compared to the same period in 2011. Net gains on disposition of OREO properties decreased by \$277,000, to \$20,000 in the third quarter of 2012, and by \$535,000, to \$398,000 in the first nine months of 2012 as property sales slowed in a still stressed market and price realized upon sale in that market closely approximated our fair value carrying cost. Other noninterest income increased \$455,000, or 40.0%, for the third quarter and by \$213,000, or 5.3%, for the first nine months of 2012 largely due to sale of a lightly used bank premises property in the third quarter.

Noninterest Expense

Noninterest expense was \$24.9 million during the third quarter of 2012, an increase of \$2.0 million, from \$22.8 million in the third quarter of 2011. Noninterest expense totaled \$71.9 million during the first nine months of 2012, an increase of \$173,000, or 0.2%, from \$71.8 million in the first nine months of 2011. The increase in salaries and benefits expense was \$978,000, or 12.2%, and \$1.3 million, or 5.3%, when comparing the third quarter and first nine months of 2012, respectively, to the same periods in 2011. The increase in salaries and benefits expense resulted primarily from an increase in salary expense as we hired loan officers and accrued incentive compensation approved by the Board of Directors for 2012 but not in place for 2011. The 2012 incentive compensation plan covers officers throughout the Company. The number of full time equivalent employees was 479 at the third quarter of 2012 and 2011.

Federal Deposit Insurance Corporation (FDIC) costs decreased \$3,000, or 0.3%, and \$826,000, or 21.3%, for the third quarter and first nine months of 2012, respectively, as compared to the prior year. The methodology for the assessment calculation changed effective with the third

quarter of 2011. The revised assessment approach applies to an adjusted average asset base rather than insured deposits, which

Table of Contents

contributed to the lower Bank assessment. In addition, the reduction in assets inherent in management's balance sheet strategy has also resulted in lower FDIC premiums.

General bank insurance increased \$6,000 and \$42,000 for the third quarter and first nine months of 2012 when compared to the same periods in 2011 reflecting this year's insurance renewal programs. Advertising expense increased by \$89,000, or 28.6%, and \$251,000, or 34.3%, in the third quarter and first nine months of 2012, respectively, when compared to the same periods in 2011. Legal fees decreased \$164,000 and \$692,000 in a quarterly and year to date comparison as a result of a management program to control rates charged by law firms providing services and were primarily related to loan workouts.

OREO expense increased \$1.2 million in the third quarter and \$1.4 million in the first nine months of 2012 compared to the same periods in 2011. The increase for both the quarterly and year to date periods was primarily due to increases in valuation expense of \$1.8 million and \$2.9 million, respectively. This increase was partially offset by decreased expenses incurred in administering OREO property taxes and insurance, which had decreases of \$671,000 and \$2.0 million for the third quarter and first nine months of 2012, respectively, due to some relief in property tax levies. Other noninterest expense increased \$165,000, or 5.5%, from \$3.0 million in the third quarter of 2011 to \$3.2 million in the same period of 2012. Other expense decreased \$390,000, or 4.1%, from \$9.6 million in the first nine months of 2011 to \$9.2 million in the same period of 2012.

Income Taxes

The Company did not record an income tax benefit for the first nine months of 2012, despite a \$1.6 million pre-tax loss during that period, due to the establishment of a valuation allowance against the Company's deferred tax assets which was first established as of December 31, 2010. Under generally accepted accounting principles, income tax benefits and the related tax assets are only allowed to be recognized if they will more likely than not be fully realized. As a result, at September 30, 2012, the net amount of the Company's deferred tax assets related to operations has been reduced to zero. The Company's effective tax rate for the first nine months ending September 30, 2012, and 2011 was 0%.

The determination of the realizability of the deferred tax assets is highly subjective and dependent upon judgment concerning management's evaluation of both positive and negative evidence, including forecasts of future income, available tax planning strategies, and assessments of the current and future economic and business conditions. Management considered both positive and negative evidence regarding the ultimate realizability of the deferred tax assets, which is largely dependent upon the ability to derive benefits based upon future taxable income. Management determined that realization of the deferred tax asset was not more likely than not as required by accounting principles and established a valuation allowance at December 31, 2010, to reflect this judgment. A deferred tax asset related to accumulated other comprehensive loss resulting from the net unrealized loss on available-for-sale securities decreased to \$1.8 million at September 30, 2012, from \$2.6 million at December 31, 2011. An increase in rates will generally cause a decrease in the fair value of individual securities and results in changes in unrealized loss on available-for-sale securities, while a decrease in rates generally causes an increase in fair value at a point in time. In addition to the impact of rate changes upon pricing, uncertainty in the financial markets can cause reduced liquidity for certain investments and those changes are discussed in detail in Note 2 to the consolidated financial statements. Management has both the ability and intent to retain an investment in available-for-sale securities. In each future accounting period, the Company's management will reevaluate whether the current conditions in conjunction with positive and negative evidence support a change in the valuation allowance against its deferred tax assets. Any such subsequent reduction in the estimated valuation allowance would lower the amount of income tax expense recognized in the Company's consolidated statements of operations in future periods.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

On September 12, 2012, the Company and the Bank, as rights agent, entered into the Amended and Restated Rights Plan and Tax Benefits Preservation Plan (the Rights Plan). The Rights Plan amends the Rights Agreement, dated September 17, 2002. The purpose of the Rights Plan is to protect the Company's deferred tax asset against an unsolicited ownership change, which could significantly limit the Company's

Table of Contents

ability to utilize its deferred tax assets. For a description of the Rights Plan, please refer to the Company's Form 8-A, filed September 13, 2002.

Financial Condition

Total assets decreased \$38.0 million, or 2.0%, from December 31, 2011, to close at \$1.90 billion as of September 30, 2012. Loans decreased by \$160.7 million, or 11.7%, as management continued to emphasize capital management and credit quality, and overall demand from qualified borrowers remained weak. At the same time, loan charge-off activity reduced balances and collateral that previously secured loans moved to OREO. OREO decreased \$5.2 million, or 5.6% at September 30, 2012. Available-for-sale securities increased by \$104.8 million for the first nine months ended September 30, 2012.

The core deposit intangible asset related to the Heritage Bank acquisition in February 2008 was \$8.9 million at acquisition as compared to \$3.8 million as of September 30, 2012. Management performed an annual review of the core deposit intangible assets as of November 30, 2011. Based upon that review and ongoing quarterly monitoring, management determined there was no impairment of other intangible assets as of September 30, 2012. No assurance can be given that future impairment tests will not result in a charge to earnings.

Loans

Total loans were \$1.21 billion as of September 30, 2012, a decrease of \$160.7 million from \$1.37 billion as of December 31, 2011. The decrease was primarily attributable to the continued declining demand from qualified borrowers, but also included loan charge-offs, net of recoveries, of \$18.0 million in the first nine months of 2012. See the Provision for Loan Loss and Other Troubled Loans sections in the Management Discussion and Analysis of Financial Condition for additional detail on the Allowance for Loan Losses for the period of December 31, 2011, through September 30, 2012. The largest changes by loan type included decreases in commercial real estate, real estate construction and residential real estate loans of \$82.8 million, \$22.8 million and \$40.4 million, or 11.8%, 32.0% and 8.5%, respectively.

The quality of the loan portfolio is in large part a reflection of the economic health of the communities in which the Company operates, and the local economy has been affected by the overall decline in economic conditions that has been experienced nationwide. The adverse economic conditions continue to affect our business regions in particular and financial markets generally. Real estate related activity, including valuations and transactions, continues to experience distress. Because the Company is located in a growth corridor with significant open space and undeveloped real estate, real estate lending (including commercial, residential, and construction) has been and continues to be a sizeable portion of the portfolio. These categories comprised 91.6% of the portfolio as of September 30, 2012, compared to 91.5% of the portfolio as of December 31, 2011. The Company continues to oversee and manage its loan portfolio to avoid unnecessarily high credit concentrations in accordance with interagency guidance on risk management. Consistent with that commitment and management's response to the Consent Order with the OCC, management updated its asset diversification plan and policy and anticipates that the percentage of real estate lending to the overall portfolio should reflect these plans and policies. Management had previously reorganized the lending function by targeted business units and has placed increased emphasis upon commercial and industrial lending in particular. This action included strategic additions and changes to staff as well as a prior realignment of resources. Commercial loans decreased \$16.7 million, or 17.0%, while consumer loans decreased only \$622,000, or 16.4%, respectively, from December 31, 2011, to September 30, 2012. Almost all of these decreases were attributable to decreased demand from qualified borrowers.

Securities

Securities available-for-sale totaled \$412.3 million as of September 30, 2012, an increase of \$104.8 million, or 34.1%, from \$307.6 million as of December 31, 2011. Management utilized otherwise available liquid funds to accomplish this increase. The largest category increases were in collateralized mortgage-

Table of Contents

backed and asset-backed securities. Collateralized mortgage-backed and asset-backed securities increased \$71.3 million and \$106.7 million, respectively, during the first nine months of 2012.

The Company's portfolio of mortgage-backed securities with single-family residential collateral has been reduced. Management expects that the historically low interest rate environment may prompt increased repayment activity on these securities.

Purchase activity in 2012 has involved variable rate bonds backed by student loans that were at least 97% guaranteed by the U. S. Department of Education. At April 30, 2012, 15.1% of the portfolio was in these types of securities. This percentage rose to 20.7% at May 31, 2012, 34.3% at June 30, 2012 but dropped to 30.9% at September 30, 2012.

Other 2012 purchases include mortgage-backed securities and collateralized mortgage obligations backed by multi-family residential loans. Management anticipates lower prepayment risk with the specific securities purchased.

The net unrealized losses, net of deferred tax benefit, in the portfolio decreased by \$1.1 million from \$3.7 million as of December 31, 2011, to \$2.6 million as of September 30, 2012. Additional information related to securities available-for-sale is found in Note 2.

Deposits and Borrowings

Total deposits decreased \$43.8 million, or 2.5%, during the nine months ended September 30, 2012, to close at \$1.70 billion. The deposit segments that increased in this period were noninterest bearing demand, savings, and money markets, which increased by \$19.1 million, \$14.6 million and \$33.1 million, or 5.3%, 7.4% and 11.5%, respectively. At the same time, NOW accounts decreased by \$10.7 million, or 3.9%. Time deposits decreased \$99.9 million or 16.2% due to management's pricing strategy discouraging customers with a single service relationship at the Bank. Market interest rates decreased generally and the average cost of interest bearing deposits decreased from 1.13% in the first nine months of 2011, to 0.76%, or 37 basis points, in the same period of 2012. Similarly, the average total cost of interest bearing liabilities decreased 30 basis points from 1.39% in the first nine months of 2011 to 1.09% in the first nine months of 2012.

One of the Company's most significant borrowing relationships continued to be the \$45.5 million credit facility with Bank of America. That credit facility began in January 2008 and was originally composed of a \$30.5 million senior debt facility and \$500,000 in term debt (collectively the Senior Debt), as well as \$45.0 million of subordinated debt (the Subordinated Debt). The Subordinated Debt and the term debt portion of the Senior Debt mature on March 31, 2018. The interest rate on the Senior Debt facility resets quarterly, and is based on, at the Company's option, either the lender's prime rate or three-month LIBOR plus 90 basis points. The interest rate on the Subordinated Debt resets quarterly, and is equal to three-month LIBOR plus 150 basis points. The Company had no principal outstanding balance on the senior line of credit when it matured, but did have \$500,000 in principal outstanding in term debt and \$45.0 million in principal outstanding in Subordinated Debt at the end of both December 31, 2011 and September 30, 2012. The term debt is secured by all of the outstanding capital stock of the Bank. The Company has made all required interest payments on the outstanding principal amounts on a timely basis.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

The credit facility agreement contains usual and customary provisions regarding acceleration of the Senior Debt upon the occurrence of an event of default by the Company under the agreement, as described therein. The agreement also contains certain customary representations and warranties and financial and negative covenants. At September 30, 2012, the Company continued to be out of compliance with two of the financial covenants contained within the credit agreement. The agreement provides that upon an event of default as the result of the Company's failure to comply with a financial covenant relating to the Senior Debt the lender may (i) terminate all commitments to extend further credit, (ii) increase the interest rate on the revolving line of the term debt by 200 basis points, (iii) declare the Senior Debt immediately due and payable and (iv) exercise all of its rights and remedies at law, in equity and/or pursuant to any or all

Table of Contents

collateral documents, including foreclosing on the collateral. The total outstanding principal amount of the Senior Debt is the \$500,000 in term debt. Because the Subordinated Debt is treated as Tier 2 capital for regulatory capital purposes, the Agreement does not provide the lender with any rights of acceleration or other remedies with regard to the Subordinated Debt upon an event of default caused by the Company's failure to comply with a financial covenant. In November 2009, the lender provided notice to the Company that it was invoking the default rate. This action by the lender resulted in nominal additional interest expense as it only applies to the \$500,000 of outstanding senior term debt.

The Company increased its securities sold under repurchase agreements \$837,000 from December 31, 2011. These balances increased in response to a modest level of customer requests for pledged security on new deposits.

Capital

As of September 30, 2012, total stockholders' equity was \$70.7 million, which was a decrease of \$3.3 million, or 4.4%, from \$74.0 million as of December 31, 2011. This decrease was primarily attributable to the net loss from operations in the first quarter of 2012. As of September 30, 2012, the Company's regulatory ratios of total capital to risk weighted assets and Tier 1 capital to risk weighted assets increased to 12.90%, and 6.45%, while the Tier 1 leverage decreased to 4.88%, compared to 12.38%, 6.21%, and 4.98%, respectively, at December 31, 2011. The Company, on a consolidated basis, exceeded the minimum ratios to be deemed adequately capitalized under regulatory defined capital ratios at September 30, 2012. The same capital ratios at the Bank were 14.06%, 12.79%, and 9.66%, respectively, at September 30, 2012, compared to 12.97%, 11.70%, and 9.34%, at December 31, 2011. The Bank's ratios exceeded the heightened capital ratios agreed to in the Consent Order.

Earlier this year, the federal bank regulatory agencies recently issued joint proposed rules that would implement an international capital accord called Basel III, developed by the Basel Committee on Banking Supervision, a committee of central banks and bank supervisors. The proposed rules would apply to all depository organizations in the United States and most of their parent companies and would increase minimum capital ratios, add a new minimum common equity ratio, add a new capital conservation buffer, and would change the risk weightings of certain assets for the purposes of calculating certain capital ratios. The proposed changes, if implemented, would be phased in from 2013 through 2019. The comment period on the proposed rules expired on October 22, 2012. Management is currently assessing the effect of the proposed rules on the Company and the Bank's capital position and will continue to monitor developments with respect to the proposed rules. Various banking associations and industry groups have provided comments on the proposed rules to the regulators and it is unclear when the final rules will be adopted and what changes, if any, may be made to the proposed rules.

In July 2011, the Company also entered into a Written Agreement with the FRB designed to maintain the financial soundness of the Company. Key provisions of the Written Agreement include restrictions on the Company's payment of dividends on its capital stock, restrictions on its taking of dividends or other payments from the Bank that reduce the Bank's capital, restrictions on subordinated debenture and trust preferred security distributions, restrictions on incurring additional debt or repurchasing stock, capital planning provisions, requirements to submit cash flow projections to the FRB, requirements to comply with certain notice provisions pertaining to changes in directors or senior management, requirements to comply with regulatory restrictions on indemnification and severance payments, and requirements to submit certain reports to the FRB. The Written Agreement also calls for the Company to serve as a source of strength for the Bank, including ensuring that the Bank complies with the Consent Order.

As announced and implemented in the third quarter of 2010, the Company elected to defer regularly scheduled interest payments on \$58.4 million of junior subordinated debentures related to the trust preferred securities issued by its two statutory trust subsidiaries, Old Second Capital Trust I and Old Second Capital Trust II (collectively the Trust Preferred Securities). Because of the deferral on the subordinated debentures, the trusts will defer regularly scheduled dividends on their Trust Preferred Securities. The total

Table of Contents

accumulated interest on the Trust Preferred Securities including compounded interest from July 1, 2010, on the deferred payments totaled \$10.5 million at September 30, 2012.

Under the terms of the junior subordinated debentures, the Company is allowed to defer payments of interest for 20 quarterly periods on the Trust Preferred Securities without default or penalty, but such amounts will continue to accrue. Also during the deferral period, the Company generally may not pay cash dividends on or repurchase its common stock or preferred stock, including the Series B Preferred Stock. Under the terms of the Series B Preferred Stock, the Company is required to pay dividends on a quarterly basis at a rate of 5% per year for the first five years, after which the dividend rate automatically increases to 9%. Dividend payments on the Series B Preferred Stock may be deferred without default, but the dividend is cumulative and therefore will continue to accrue and, if the Company fails to pay dividends for an aggregate of six quarters, whether or not consecutive, the holder will have the right to appoint representatives to the Company's board of directors. The Company has suspended quarterly cash dividends on its Series B Preferred Stock, issued to the Treasury in connection with the Company's participation in the TARP Capital Purchase Program as well as suspending dividends on its outstanding common stock. The dividend payments on the Series E Preferred Stock have been deferred since November 15, 2010, and while in deferral these dividends are compounded quarterly. The accumulated Series B Preferred Stock dividends declared and accrued totaled \$8.1 million at September 30, 2012, and are reflected as a reduction to capital even though not paid. In January 2012, the Treasury appointed an observer to the Company's board of directors. The observer concluded responsibilities under the appointment with the October 2012 Board meeting. We expect a new director appointed by the Treasury to join the board after approval is formally received from our other regulatory agencies.

The terms of the Series B Preferred Stock also prevent the Company from paying cash dividends on or repurchasing its common stock while TARP Preferred Stock dividends are in arrears. Pursuant to the terms of our regulatory agreements, the Company must seek regulatory approval prior to resuming payments on its subordinated debt and Series B Preferred Stock.

In addition to the above regulatory ratios, the non-GAAP tangible common equity to tangible assets and the Tier 1 common equity to risk-weighted assets also decreased to (0.25)% and (0.17)%, respectively, at September 30, 2012, as compared to (0.08)% and (0.05)%, respectively, at December 31, 2011. Management also discloses these non-GAAP ratios to be consistent with industry practice and the table below provides an enumeration of the components of each those non-GAAP equity ratios disclosed above to the most comparable GAAP equivalent.

In addition, management believes the presentation of other financial measures such as core earnings, which excludes taxes, provisions for loan losses, income and expenses associated with other real estate owned, and other nonrecurring items as detailed immediately below, provides useful supplemental information that is helpful in understanding our financial results. Management considers this information

Table of Contents

useful since certain items such as provisions for loan losses and OREO activities in the current credit cycle are well above historic levels. These disclosures should not be viewed as substitutes for the results determined to be in accordance with GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other companies (in thousands).

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Liquidity and Market Risk

Liquidity is the Company's ability to fund operations, to meet depositor withdrawals, to provide for customer's credit needs, and to meet maturing obligations and existing commitments. The liquidity of the Company principally depends on cash flows from net operating activities, including pledging requirements, investment in and maturity of assets, changes in balances of deposits and borrowings, and its ability to borrow funds. The Company monitors and tests borrowing capacity as part of its liquidity management process. Additionally, the \$73.0 million cash proceeds from the Treasury discussed above is a source of liquidity that became available to the Company in January 2009.

Net cash inflows from operating activities were \$28.7 million during the first nine months of 2012, compared with net cash inflows of \$20.7 million in the same period in 2011. Proceeds from sales of loans held-for-sale, net of funds used to originate loans held-for-sale, continued to be a source of inflow for both of the first nine months of 2012 and 2011. Interest received, net of interest paid, combined with changes in other assets and liabilities were a source of inflow for the first nine months of 2012 compared to a source of outflow for the first nine months of 2011. Management of investing and financing activities, as well as market conditions, determines the level and the stability of net interest cash flows. Management's policy is to mitigate the impact of changes in market interest rates to the extent possible, as part of the balance sheet management process.

Net cash inflows from investing activities were \$35.7 million in the first nine months of 2012, compared to \$169.0 million in the same period in 2011. In 2012, securities transactions accounted for net outflows of \$102.2 million, and net principal received on loans accounted for net inflows of \$115.7 million. Proceeds from sales of OREO accounted for \$20.9 million and \$29.7 million in investing cash inflows for the first nine months of 2012 and 2011, respectively. Investing cash outflows for investment in OREO were \$646,000 in the first nine months of 2012 as compared to \$2.6 million in the same period in 2011.

Net cash outflows from financing activities in the first nine months of 2012 and 2011 were \$43.1 million and \$179.8 million, respectively. Net deposit outflows in the first nine months of 2012 were \$43.8 million compared to net deposit outflows of \$180.5 million in the first nine months of 2011. Changes in securities sold under repurchase agreements accounted for \$837,000 and \$613,000 in net inflows, respectively, in the first nine months of 2012 and 2011.

Beginning in late 2010, the Bank entered into an advantageous program to place customer funds with correspondent institutions. Placing these funds at the correspondent institutions provided benefits both to the Bank and to the Bank's customers. The correspondent programs provided customers with a beneficial interest rate on their deposit as well as a share of a fee paid to the Bank. The Bank retained a share of the fee and was able to continue important public entity and business relationships at a time when the Bank's profitability and reputation were under heightened stress.

Over the course of 2011, balances in these programs were \$54.8 million, \$129.3 million, \$145.4 million, and \$110.9 million at March 31, June 30, September 30, and December 31, respectively. Balance changes over this time reflect both customer activity and use of this program by the Bank for balance sheet deleveraging while maintaining strong liquidity in a historically low rate environment. At June 30, 2012, and September 30, 2012, the recorded balances under this program were \$92.9 million and \$101.8 million, respectively, again reflecting customer

activity and Bank balance sheet deleveraging programs.

Under the terms of the Consent Order (discussed in Note 11 of the Notes to Consolidated Financial Statements), the Bank has agreed to reaffirm its liquidity risk management program. Management has a well defined liquidity management program reflecting sound liquidity risk supervision through the Company's Asset and Liability Committee (ALCO) process and Board review. Important elements of the program cover base operating liquidity, a liquid asset cushion, contingency funding strategies to address liquidity

Table of Contents

shortfalls in emergency situations and periodic stress testing. This program also covers liquidity management for the Company.

Interest Rate Risk

As part of its normal operations, the Company is subject to interest-rate risk on the assets it invests in (primarily loans and securities) and the liabilities it funds with (primarily customer deposits and borrowed funds), as well as its ability to manage such risk. Fluctuations in interest rates may result in changes in the fair market values of the Company's financial instruments, cash flows, and net interest income. Like most financial institutions, the Company has an exposure to changes in both short-term and long-term interest rates.

The Company manages various market risks in its normal course of operations, including credit, liquidity risk, and interest-rate risk. Other types of market risk, such as foreign currency exchange risk and commodity price risk, do not arise in the normal course of the Company's business activities and operations. In addition, since the Company does not hold a trading portfolio, it is not exposed to significant market risk from trading activities. The Company's interest rate risk exposures from September 30, 2012, and December 31, 2011, are outlined in the table below.

Like most financial institutions, the Company's net income can be significantly influenced by a variety of external factors, including: overall economic conditions, policies and actions of regulatory authorities, the amounts of and rates at which assets and liabilities reprice, variances in prepayment of loans and securities other than those that are assumed, early withdrawal of deposits, exercise of call options on borrowings or securities, competition, a general rise or decline in interest rates, changes in the slope of the yield-curve, changes in historical relationships between indices (such as LIBOR and prime), and balance sheet growth or contraction. The Company's ALCO seeks to manage interest rate risk under a variety of rate environments by structuring the Company's balance sheet and off-balance sheet positions, which includes interest rate swap derivatives as discussed in Note 13 of the financial statements included in this quarterly report. The risk is monitored and managed within approved policy limits.

The Company utilizes simulation analysis to quantify the impact of various rate scenarios on net interest income. Specific cash flows, repricing characteristics, and embedded options of the assets and liabilities held by the Company are incorporated into the simulation model. Earnings at risk is calculated by comparing the net interest income of a stable interest rate environment to the net interest income of a different interest rate environment in order to determine the percentage change. Due to the significant declines in interest rates that have occurred during the first nine months of 2012, management sees no value in interest rate scenarios that represent declines of 0.5% or more. Consequently, for 2012 periods, net interest income sensitivity is currently only calculated for interest rate increases. Compared to December 31, 2011, the Company had slightly less earnings gains if interest rates should rise. This was largely due to minor balance sheet changes that occurred during the quarter, along with model assumption changes to reflect the Company's belief that rates on non-maturity deposits might be more responsive to increases in market interest rates. Federal Funds rates and the Bank's prime rate were stable throughout the third quarter of 2012, at 0.25% and 3.25%, respectively.

The following table summarizes the effect on annual income before income taxes based upon an immediate increase or decrease in interest rates of 0.5%, 1%, and 2% and no change in the slope of the yield curve. The -2%, -1% and -0.5% sections of the table do not show model changes for those magnitudes of decrease due to the low interest rate environment over the relevant time periods.

The amounts and assumptions used in the simulation model should not be viewed as indicative of expected actual results. Actual results will differ from simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and management strategies. The above results do not take into account any management action to mitigate potential risk.

Item 4. Controls and Procedures**Evaluation of Disclosure Controls and Procedures**

The Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) promulgated under the Securities and Exchange Act of 1934, as amended, as of September 30, 2012. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that as of September 30, 2012, the Company's internal controls were effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Securities and Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified.

There were no changes in the Company's internal control over financial reporting during the quarter ended September 30, 2012, that have materially affected, or are reasonably likely to affect, the Company's internal control over financial reporting.

Forward-looking Statements

This document (including information incorporated by reference) contains, and future oral and written statements of the Company and its management may contain, forward-looking statements, within the meaning of such term in the Private Securities Litigation Reform Act of 1995, with respect to the financial condition, results of operations, plans, objectives, future performance and business of the Company. Forward-looking statements, which may be based upon beliefs, expectations and assumptions of the Company's management and on information currently available to management, are generally identifiable by the use of words such as believe, expect, anticipate, plan, intend, estimate, will, would, could, should or other similar expressions. Additionally, all statements in this document, including forward-looking statements,

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

speak only as of the date they are made, and the Company undertakes no obligation to update any statement in light of new information or future events.

The Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. The factors, which could have a material adverse effect on the operations and future prospects of the Company and its subsidiaries, are detailed in the "Risk Factors" section included under Item 1A. of Part I of the Company's Form 10-K. In addition to the risk factors described in that section, there are other factors, including rules jointly proposed by the federal bank agencies to implement Basel III that may impact any public company, including ours, and which could have a material adverse effect on the operations and future prospects of the Company and its subsidiaries. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

401(k) Litigation

On February 17, 2011, a former employee filed a class action complaint in the U.S. District Court for the Northern District of Illinois on behalf of participants and beneficiaries of the Old Second Bancorp, Inc. Employees' 401(k) Savings Plan and Trust alleging that the Company, the Bank, the Employee Benefits Committee of the Company and certain of the Company's officers and employees violated certain disclosure requirements and fiduciary duties established under ERISA. The court subsequently granted plaintiff's motion to certify a class. The complaint seeks equitable and unquantified monetary relief. The Company believes that it, its affiliates, and its officers and employees have acted, and continue to act, in compliance with ERISA law with respect to these matters, and, with assistance from outside counsel, the Company will evaluate any additional steps to be taken to successfully conclude this dispute.

As of September 30, 2012, the parties have engaged in two mediations in an effort to settle the case; however, those mediations did not result in settlement of the case. The parties are currently deciding whether to engage in a third mediation. If mediation is not successful, the parties will conclude discovery and try the case. In addition, the Company and its co-defendants also filed a motion to dismiss the second amended complaint as a matter of law. On November 2, 2012, the court issued an opinion denying the motion to dismiss. The Company, along with its co-defendants, will now prepare and file an answer and affirmative defenses to the second amended complaint.

The Company has insurance for the claim. If there is liability to plaintiffs, the amount of the liability could exceed the amount of the Company's insurance coverage. While plaintiffs have not yet identified a damages expert to formally quantify their claim, plaintiffs' counsel has advised the Company that plaintiffs believe their damages could exceed the amount of the Company's insurance by a substantial amount.

Other Matters

In addition to the matter described above, the Company and its subsidiaries, from time to time, are involved in collection suits in the ordinary course of business against its debtors and are defendants in legal actions arising from normal business activities. Management, after consultation with legal counsel, believes that the ultimate liabilities, if any, resulting from these actions will not have a material adverse effect on the financial position of the Bank or on the consolidated financial position of the Company.

Item 1.A. Risk Factors

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

There have been no material changes from the risk factors set forth in Part I, Item 1.A. Risk Factors, of the Company's Form 10-K for the year ended December 31, 2011. Please refer to that section of the Company's Form 10-K for disclosures regarding the risks and uncertainties related to the Company's business.
