The New America High Income Fund, Inc.

Note 1 to Schedule of Investments September 30, 2018 (Unaudited)

(1) Significant Accounting and Other Policies

The New America High Income Fund, Inc. (the Fund) was organized as a corporation in the state of Maryland on November 19, 1987 and is registered with the Securities and Exchange Commission as a diversified, closed-end investment company under the Investment Company Act of 1940. The Fund commenced operations on February 26, 1988. The investment objective of the Fund is to provide high current income while seeking to preserve stockholders—capital through investment in a professionally managed, diversified portfolio of—high yield—fixed-income securities.

The Fund invests primarily in fixed maturity corporate debt securities that are rated less than investment grade. Risk of loss upon default by the issuer is significantly greater with respect to such securities compared to investment grade securities because these securities are generally unsecured and are often subordinated to other creditors of the issuer and because these issuers usually have high levels of indebtedness and are more sensitive to adverse economic conditions, such as a recession, than are investment grade issuers. In some cases, the collection of principal and timely receipt of interest is dependent upon the issuer attaining improved operating results, selling assets or obtaining additional financing.

The Fund may focus its investments in certain industries, subjecting it to greater risk than a Fund that is more diversified. See the schedule of investments for information on individual securities as well as industry diversification and credit quality ratings.

The Fund s financial statements have been prepared in conformity with accounting principles generally accepted in the United States for investment companies that require the management of the Fund to, among other things, make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

The following is a summary of significant accounting policies consistently followed by the Fund, which are in conformity with those generally accepted in the investment company industry.

(a) Valuation of Investments Except as otherwise described below, the Fund's investments are valued based on evaluated bid prices provided by an independent pricing service. Independent pricing services provide prices based primarily on quotations from dealers and brokers, market transactions, data accessed from quotations services, offering sheets obtained from dealers and various relationships among similar securities. Investments whose primary market is on an exchange are valued at the last sale price on the day of valuation. Short-term investments with original maturities of 60 days or less are stated at amortized cost, which approximates the fair value of such investments. Following procedures approved by the Board of Directors, investments for which market prices are not yet provided by an independent pricing service (primarily newly issued fixed-income corporate bonds and notes) shall be valued at the most recently quoted bid price provided by a principal market maker for the security. Other investments, for which market quotations are not readily available are valued in good faith at fair value using methods approved by the Board of Directors. Fair value measurement is further discussed in section (e) of this footnote.

(b) Foreign Currency Investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions.

The Fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations

The New America High Income Fund, Inc.

| Note 1 to So | chedule of | f Investments |
|--------------|------------|---------------|
| September | 30, 2018 | (Unaudited) |

arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss from investments.

Reported net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transaction, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund s books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the fair values of assets and liabilities, other than investments in securities at fiscal period end, resulting from changes in exchange rates.

- (c) Foreign Currency Forward Exchange Contracts The Fund may enter into foreign currency forward exchange contracts to hedge against foreign currency exchange rate risks on its non-U.S. dollar denominated investment securities. When entering into a forward currency contract, the Fund agrees to receive or deliver a fixed quantity of foreign currency for an agreed upon price on an agreed future date. The Fund s net equity therein, representing unrealized gain or loss on the contracts as measured by the difference between the forward foreign exchange rates at the dates of entry into the contracts and the forward rates at the reporting date, is included in the statement of assets and liabilities. Realized and unrealized gains and losses are included in the statement of operations. These instruments involve market risk, credit risk or both kinds of risks, in excess of the amount recognized in the statement of assets and liabilities. Risks arise from the possible inability of counterparties to meet the terms of their contracts and from movement in currency and securities values and interest rates.
- (d) Securities Transactions and Net Investment Income Securities transactions are recorded on trade date. Realized gains or losses on sales of securities are calculated on the identified cost basis. Interest income is accrued on a daily basis. Discount on short-term investments is amortized to investment income. Premiums or discounts on corporate debt securities are amortized based on the interest method for financial reporting purposes. All income on original issue discount and step interest bonds is accrued based on the effective interest method. The Fund does not amortize market premiums or discounts for tax purposes. Dividend payments received in the form of additional securities are recorded on the ex-dividend date in an amount equal to the value of the security on such date.
- (e) Fair Value Measurement The Fund applies ASC 820 Fair Value Measurements and Disclosures . This standard establishes the definition of fair value, sets out a framework for measuring fair value and requires additional disclosures about fair value measurements.

The three levels of the fair value hierarchy under ASC 820 are described below:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.

Level 2 Observable inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

The New America High Income Fund, Inc.

| Note 1 | to Sche | dule of | f Investment | S |
|--------|----------|---------|--------------|---|
| Septen | nber 30, | 2018 (| Unaudited) | |

Level 3 Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Fund s own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety, is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

A description of the valuation techniques applied to the Fund s major asset and liability categories is as follows.

Debt securities (corporate, convertible & bank debt). The fair value of debt securities is provided by independent pricing services using quotations from dealers and brokers, market transactions, data from quotations services, offering sheets and various relationships between securities. While most corporate bonds are categorized in level 2 of the fair value hierarchy, there may be instances where less observable inputs necessitate a level 3 categorization.

Equity securities (preferred and common stock). Equity securities for which the primary market is on an exchange will be valued at the last sale price on the day of valuation and are categorized in level 1 of the fair value hierarchy. Other equity securities traded in inactive markets or valued by independent pricing services using methods similar to debt securities are categorized in level 2. The fair value of equity securities in which observable inputs are unavailable are categorized in level 3.

Short-term investments. Short-term investments are valued using amortized cost, which approximates fair value. To the extent the inputs are observable and timely the values would be categorized in level 2 of the fair value hierarchy.

Forwards are valued at the unrealized gain or loss on the contract as measured by the difference between the forward exchange rates at the date of entry into the contract and the forward rates at the reporting date. Forwards are categorized in level 2 of the fair value hierarchy.

The following is a summary of the inputs used as of September 30, 2018 in valuing the Fund s investments:

| | Level 1 Quoted Prices (000 s) | Level 2 Significant Observable Inputs (000 s) | Level 3 Significant Unobservable Inputs (000 s) | e | Total Value | |

^{*} Debt Securities Type of debt and industries are shown on the Schedule of Investments.

The Fund owned one Level 3 security at September 30, 2018. It is identified on the Schedule of Investments with a footnote (i) and has a value of \$644,000. The value was determined by the Valuation Committee of the Fund s investment advisor, T. Rowe Price, under procedures approved by the Board of Directors. The techniques used to arrive at this valuation take into account the occurrence of company specific or industry events, liquidity, broker coverage and other market factors.

The following is a reconciliation of Fund investments using Level 3 inputs for the period:

| | Value (000 s) |
|--|------------------|
| Balance, December 31, 2017 | \$ 1,136 |
| Net purchases/(sales) | (473) |
| Change in unrealized appreciation (depreciation) | 7 |
| Realized gain (loss) | (26) |
| Balance, September 30, 2018 | \$ 644 |

Level 1 and Level 2 assets are evaluated on a quarterly basis for changes in listings or delistings on national exchanges.

Transfers between levels are recognized at the value at the end of the reporting period. During the nine months ended September 30, 2018, the Fund recognized transfers between Levels 1 and 2 totaling \$191,000.

| Item 2. |
|---|
| (a) The registrant s President and Treasurer has concluded that the registrant s disclosure controls and procedures (as defined in rule 30a-3(c) under the Investment Company Act of 1940 (the Act)) are effective, based on her evaluation of these disclosure controls and procedures required by Rule 30a-3(b) as of a date within 90 days of the filing date of this report. |
| (b) There were no changes in the registrant s internal control over financial reporting (as defined in rule 30a-3(d) under the Act) that occurred during the registrant s last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the registrant s internal control over financial reporting. |
| Item 3. |
| Certifications as required by Rule 30a-2(a) under the Act are attached hereto. |
