IMPERIAL INDUSTRIES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited)

(1)

Interim Financial Statements

The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments, consisting solely of normal recurring adjustments, considered necessary for a fair presentation have been included. Operating results for the three months ended March 31, 2005 are not necessarily indicative of the results that may be expected for the year ended December 31, 2005. The significant accounting principles used in the preparation of these unaudited interim consolidated financial statements are the same as those used in the preparation of the annual audited consolidated financial statements. These statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2004.

(2)

Description of Business and Summary of Significant Accounting Policies

The Company and its subsidiaries are primarily involved in the manufacture and sale of exterior and interior finish wall coatings and mortar products for the construction industry, as well as the sale of building materials from other manufacturers. Sales of the Company's products as well as other manufacturers' products, are made to customers located primarily in Florida and other parts of the Southeastern United States through distributors and Company-owned distribution facilities.

a)

Basis of Presentation

The consolidated financial statements herein contain the accounts of Imperial Industries, Inc. and its wholly-owned subsidiaries, Acrocrete, Inc., Premix-Marbletite Manufacturing Co., and Just-Rite Supply, Inc. (collectively, the Company). All material intercompany accounts and transactions have been eliminated in consolidation. For the three-month periods ended March 31, 2005 and 2004, the Company has determined that it continues to operate in a single operating segment.

b)

Concentration of Credit Risk

Concentration of credit risk with respect to trade accounts receivable is limited due to the large number of entities comprising the Company's customer base. Trade accounts receivable represent amounts due from building materials dealers, contractors and sub-contractors, located principally in the Southeastern United States who have purchased products on an unsecured open account basis.

The Company places its cash with commercial banks. At March 31, 2005, the Company had cash balances with banks in excess of Federal Deposit Insurance Corporation insured limits. However, management believes the credit risk related to these deposits is minimal.

c)

Inventories

Inventories are stated at the lower of cost or market (net realizable value), on a first-in, first-out basis. Finished goods include the cost of raw materials, freight in, direct labor and overhead.

d)

Property, plant and equipment

Property, plant and equipment is stated at cost, less accumulated depreciation. Depreciation is computed on the straight-line basis over the estimated useful lives of the depreciable assets. Expenditures for maintenance and repairs are charged to expense as incurred, while expenditures which extend the useful life of assets are capitalized. Differences between the proceeds received on the sale of property, plant and equipment and the carrying value of the assets on the date of sale is credited to or charged against net income, as applicable.

IMPERIAL INDUSTRIES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

-continued-

(2)

Description of Business and Summary of Significant Accounting Policies (continued)

e)

Income Taxes

The Company utilizes the liability method for determining its income taxes. Under this method, deferred tax assets and liabilities are recognized for the expected future tax consequences of events that have been recognized in the consolidated financial statements or income tax returns. Deferred tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the years in which temporary differences are expected to be realized or settled; valuation allowances are provided against tax assets that are not likely to be realized.

f)

Earnings per share

Basic earnings per share is computed by dividing net income by the weighted-average number of shares of common stock outstanding each period. Diluted earnings per share is computed by dividing net income by the weighted-average number of shares of common stock and common stock equivalents outstanding during each period. Earnings per share for the prior year has been adjusted and restated to reflect a one-for-four reverse common stock split effective March 23, 2005.

g)

Cash and cash equivalents

The Company has defined cash and cash equivalents as those highly liquid investments with original maturities of three months or less, and are stated at cost. Included in cash and cash equivalents at March 31, 2005 and December 31, 2004 are short-term time deposits of \$125,000 and \$124,000, respectively.

h)

Restricted cash

At March 31, 2005 and December 31, 2004, the Company has \$1,133,000 and \$1,075,000, respectively, of customer payments that are required to be remitted to the Company's commercial lender upon their bank clearance under the terms of the Company's line of credit. Such amounts, when remitted to the lender, will reduce the outstanding balance

on the line of credit.

i)

Revenue recognition policy

Revenue from sales transactions, net of discounts and allowances, is recorded upon customers acknowledgement of transfer of title of inventory, generally when delivered.

j)

Purchase rebates

The Company has an arrangement with a buying group organization providing for inventory purchase rebates (vendor rebates) based principally upon achievement of certain volume purchasing levels during the year. The Company accrues the estimated receipt of vendor rebates as part of its cost of sales for products sold based on progress towards earning the vendor rebates taking into consideration cumulative purchases throughout the year. Substantially all vendor rebate receivables are collected within three months following fiscal year-end. Management believes the Company will continue to receive vendor rebates from the buying group for the remainder of 2005 and thereafter. However, the size of such rebates will be dependent on maintaining existing purchasing levels. There can be no assurance that this will continue or that the buying group will continue to provide a comparable amount of vendor rebates in the future on the products purchased by the Company. For the three months ended March 31, 2005, the Company recorded vendor rebates of \$82,000, which was recorded as a vendor rebate receivable and included in other current assets.

k)

Stock-based compensation

The Company measures compensation expense related to the grant of stock options and stock-based awards to employees using the intrinsic value method, under which compensation expense, if any, is generally based on the difference between the exercise price of an option, or the amount paid for an award, and the market price or fair value of the underlying common stock at the date of the award.

IMPERIAL INDUSTRIES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

-continued-

(2)

Description of Business and Summary of Significant Accounting Policies (continued)

k)

Stock-based compensation (continued)

Because the Company's policy is to grant employee stock options at an exercise price equal to the fair value of the Company's stock at the date of grant, the Company has not recognized compensation expense for its employee stock options.

The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value-method to account for stock-based employee compensation:

	Three Months Ended March 31	
	2005	2004
Net income, as reported	\$ 831,000	\$ 362,000
Deduct: Total stock-based employee compensation expense determined under fair-value-based method for all awards, net of related tax effects	45,000	
Pro-forma net income	\$ 786,000	\$ 362,000
Income per share:		
Basic as reported	\$ 0.34	\$ 0.16
Basic pro-forma	\$ 0.33	\$ 0.16
Diluted as reported	\$ 0.33	\$ 0.15
Diluted pro-forma	\$ 0.31	\$ 0.15

l)

Accounting estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

m)

Fair Value of Financial Instruments

The carrying amount of the Company's financial instruments, principally notes payable and long-term debt, approximates fair value based on discounted cash flows because the borrowing rates are similar to the current rates offered to the Company.

n)

Assets held for sale

At March 31, 2005, the Company has \$226,000 in assets held for sale consisting primarily of real properties the Company received in connection with the settlement of litigation with a former employee.

o)

Establishment of Contingency Reserves

On an ongoing basis, the Company assesses the potential liabilities related to any lawsuits or claims brought against it. While it is typically very difficult to determine the timing and ultimate outcome of such action, the Company uses its best judgment to determine if it is probable that the Company will incur an expense related to the evaluation and settlement of final adjudication of such matters and whether a reasonable estimation of such probable loss, if any, can be made. In assessing probable losses, the Company takes into consideration estimates of the amount of insurance recoveries, if any. The Company accrues a liability when it believes a loss is probable

IMPERIAL INDUSTRIES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

-continued-

o)

Establishment of Contingency Reserves (continued)

and the amount of loss can be reasonably estimated. Due to the inherent uncertainties related to the eventual outcome of litigation and potential insurance recoveries, it is possible that certain matters may be resolved for amounts materially different from any provisions or disclosures that have been previously made.

p)

Recent Accounting Pronouncements

In December 2004, FASB issued Statement No. 123 (revised), *Share-based Payments*(FAS 123 R). This statement is a revision of FASB Statement No. 123, *Accounting for Stock-Based Compensation*, and supersedes APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and its related implementation guidance. This Statement requires all transaction in which an entity obtains employee services or incurs liabilities in exchange for its equity instruments to be accounted for using a fair value method. For public companies the Statement will be effective as of the beginning of the first interim or annual reporting period that begins after June 15, 2005. This Statement applies to all new awards granted after the effective date and to unvested awards at the effective date. In April 2005, the Securities and Exchange Commission delayed the effective date of FAS 123R to the first annual reporting period that begins after June 15, 2005. Management does not believe that the adoption of the Standard will have a material effect on the Company's financial statements.

On November 24, 2004, the Financial Accounting Standards Board issued Statement No. 151, *Inventory Costs, and amendment of ARB No. 43, Chapter 4* (FAS 151). The standard adopts the IASB view related to inventories that abnormal amounts of idle capacity and spoilage costs should be excluded from the cost of inventory and expensed when incurred. The provisions of FAS 151 are applicable to inventory costs incurred during fiscal years beginning after June 15, 2005. Management does not expect this standard to significantly impact the Company's operations.

(3)

Trade Accounts Receivable

At March 31, 2005, accounts aggregating to \$709,000, or approximately 8.1% of total gross trade accounts receivable, were deemed to be ineligible for borrowing purposes under the Company's borrowing agreement with its commercial lender, compared to \$1,022,000, or approximately 12.0%, of total gross trade receivables outstanding at December 31, 2004 (see Note 5). Management believes the allowance for doubtful accounts at March 31, 2005 of \$858,000 is sufficient to absorb any losses which may arise from uncollectible accounts receivable.

(4)

Inventories

At March 31, 2005 and December 31, 2004 inventories consisted of:

	2005	2004
Raw Materials	\$ 622,000	\$ 589,000
Finished Goods	4,578,000	4,404,000
Packaging materials	256,000	265,000
	\$ 5,456,000	\$ 5,258,000

(5)

Notes Payable

At March 31, 2005 and December 31, 2004, notes payable represent amounts outstanding under a line of credit from a commercial lender to the Company's subsidiaries. The line of credit is collateralized by the subsidiaries' accounts receivable and inventory, bears interest at prime rate plus ½% (6.00% at March 31, 2005). In February 2005, the line of credit was increased from \$8,000,000 to \$9,000,000 and the maturity date was extended from June 19, 2005 to June 1, 2007.

At March 31, 2005, the line of credit limit available for borrowing based on eligible receivables and inventory aggregated approximately \$9,000,000, of which \$5,097,000 was outstanding. The average amounts outstanding for the three month period ended March 31, 2005 and 2004 were \$5,535,000 and \$6,055,000, respectively.

IMPERIAL INDUSTRIES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

-continued-

(6)

Long-Term Debt and Current Installments of Long-Term Debt

Included in long-term debt at March 31, 2005, are five mortgage loans, collateralized by real property, in the aggregate amount of \$1,340,000, less current installments aggregating \$78,000.

Other long-term debt in the aggregate amount of \$2,097,000, less current installments of \$584,000, relates principally to equipment financing. The notes bear interest at various rates ranging from approximately 5.8% to 10.75%.

(7)

Income Taxes

At March 31, 2005, the net deferred tax asset of approximately \$362,000 consisted primarily of the basis differences attributable to accounts receivable, fixed assets and goodwill.

In the three months ended March 31, 2005, the Company recognized income tax expense of \$495,000, compared to tax expense of \$270,000, for the same period in 2004.

(8)

Capital Stock

a)

Common Stock

At March 31, 2005 and December 31, 2004, the Company had outstanding 2,414,340 and 2,379,350 shares of common stock, \$.01 par value per share, respectively, (Common Stock) adjusted and restated to reflect a one-for-four reverse common stock split effective March 23, 2005. The holders of common stock are entitled to one vote per share on all matters, voting together with the holders of preferred stock, if any. In the event of liquidation, holders of common stock are entitled to share ratably in all the remaining assets of the Company, if any, after satisfaction of the liabilities of the Company and the preferential rights of the holders of any outstanding preferred stock.

In the first quarter of 2005, the Company issued 50,312 shares of common stock in connection with the exercise of stock options. In connection with the exercise of stock options, 3,763 shares of common stock held by optionees were utilized as partial payment of the exercise price of options and were cancelled.

On December 21, 2004 at a Special Meeting of Stockholders, the stockholders authorized the Company's Board of Directors to implement a reverse stock split of its common stock at one of two possible ratios: either (a) one-for-four ratio; or (b) a one-for-five ratio to be determined by the Board in its discretion. On March 8, 2005, the Company's Board of Directors authorized a one-for-four reverse stock split of its common stock which was effective on March 23, 2005. The Company retained the par value of \$.01 per share for all shares of common stock. All references in the financial statements to the number of shares outstanding, per share amounts and stock option data of the Company's common stock have been retroactively restated to reflect the effect of the reverse split for all periods presented. Stockholders' equity reflects the reverse stock split by reclassifying from common stock to additional paid in capital an amount equal to the par value of the reduced shares arising from the reverse split. After the completion of the reverse split, the Company's common stock was approved for listing on the NASDAQ Small Cap Market effective May 2, 2005 under the trading symbol IPII .

As a result of the one-for-four reverse stock split, fractional shares aggregating 11,559 shares were cancelled in consideration of a total cash payment of approximately \$20,000 to stockholders.

b)

Preferred Stock

The authorized preferred stock of the Company consists of 5,000,000 shares, \$.01 par value per share. The preferred stock is issuable in series, each of which may vary, as determined by the Board of Directors, as to the designation and number of shares in such series, the voting power of the holders thereof, the dividend rate, redemption terms and prices, the voluntary and involuntary liquidation preferences, and the conversion rights and sinking fund requirements, if any, of such series. At March 31, 2005 and December 31, 2004, there were no shares of preferred stock outstanding.

IMPERIAL INDUSTRIES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

-continued-

(8)

Capital Stock (continued)

c)

Stock Option Plans

The Company has two stock option plans, the Directors' Stock Option Plan (the Directors Plan) and the 1999 Employee Stock Option Plan (the Employee Plan) (collectively, the 1999 Plans). The 1999 Plans provide for options to be granted at generally no less than the fair market value of the Company's Common Stock at the grant date. Options granted under the 1999 Plans have a term of up to 10 years and are exercisable six months following the grant date subject to vesting requirements that may be imposed on individual grants. The 1999 Plans are administered by the Board's Compensation and Stock Option Committee (the Committee), which is currently comprised of four non-employee directors. The Committee determines who is eligible to participate and the number of shares for which options are to be granted. A total of 225,000 and 100,000 shares are reserved for issuance under the Employee and Directors' Plans, respectively.

During the three months ended March 31, 2005, the Company granted options to 15 employees to purchase 22,500 shares at prices ranging from \$5.60 to \$6.64 per share and options to non-employee Directors to purchase 10,000 shares at \$6.64 per share (the fair market price of such shares at the date of grant). All options granted are exercisable for a five year period under the terms of the Plans. Employees exercised options to purchase 50,312 shares of Common Stock at prices ranging from \$.72 to \$2.88 per share during the first three months of 2005. Accordingly, as of March 31, 2005, options for 73,584 shares remain outstanding at a weighted exercise price of \$3.15 and options for 54,000 shares were available for future grants under the Employee Plan. Options to purchase 65,000 shares are outstanding at a weighted exercise price of \$2.51 and 15,000 shares were available for future grant under the Directors Plan.

(9)

Earnings Per Share

Below is a reconciliation between basic and diluted earnings per common share for the three months ended March 31, 2005 and 2004 (in thousands except per share amounts):

	Three Months Ended March 31,					
	2005			2004		
	Income	Shares	Per Share	Income	Shares	Per Share
Net income	\$ 831,000			\$ 362		
Basic earnings per share	\$ 831,000	2,414	\$ 0.34	\$ 362	2,309	\$ 0.16
Effect of dilutive securities:						
Options	\$	88	\$ 0.01	\$	44	\$ 0.01
Diluted earnings per common share	\$ 831,000	2,502	\$ 0.33	\$ 362	2,353	\$ 0.15

For the three months ended March 31, 2004, 48,750 options were excluded from the diluted earnings per share computations because they were anti-dilutive.

(10)

Commitments and Contingencies

a)

Contingencies

The Company's subsidiary Acrocrete, together in four instances with affiliates of Acrocrete and in all other instances with non-affiliated parties, are defendants in 61 lawsuits pending in various Southeastern states, brought by homeowners, homeowner associations, contractors and subcontractors, or their insurance companies, claiming moisture intrusion damage as a result of the use of Exterior Insulation Finish Wall Systems (EIFS), on single and multi-family residences and to a very limited extent, commercial buildings. The Company's insurance carriers are providing a defense and have accepted coverage under a reservation of rights for 52 of these claims and are providing a defense in the remaining 9 cases, for which Acrocrete expects its carriers will accept coverage.

IMPERIAL INDUSTRIES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

-continued-

(10)

Commitments and Contingencies (continued)

a)

Contingencies (continued)

Acrocrete is vigorously defending all of these cases and believes it has meritorious defenses, counter-claims and claims against third parties. Acrocrete is unable to determine the exact extent of its exposure or outcome of this litigation.

In one such claim, Acrocrete is a defendant in a lawsuit styled *Anthony Derck and Mary Derck v. Stalaker Construction, Inc. et al. v. Atrium Aluminum Production and Acrocrete Inc.* in the Circuit Court of the First Judicial Circuit in and for Walton County, Florida, Case No. 99-0423-CA, served on November 7, 2001. The lawsuit involved claims by Plaintiff against Acrocrete for negligent misrepresentation, fraudulent misrepresentation, violation of Florida's Unfair and Deceptive Trade Practices Act and breach of warranty for damages from Acrocrete for moisture damages allegedly caused by Acrocrete EIFS products. Acrocrete was granted summary judgment on all claims other than negligent misrepresentation and fraudulent misrepresentation. The Company's insurance carrier is providing a defense and has accepted coverage under a reservation of rights.

In late January 2005, all defendants except Acrocrete reached a settlement with the plaintiffs in the amount of \$535,000. In late February/early March 2005, the case proceeded to a jury trial with Acrocrete as the lone defendant. The jury found Acrocrete liable to Plaintiffs for compensatory damages in the amount of \$523,200, and for punitive damages in the amount of \$1. The Court has not yet entered judgment against Acrocrete pending resolution of several post-trial motions, including (a) a motion for directed verdict, or, in the alternative, motion for a new trial, which includes a request that the court strike the award of punitive damages; (b) a motion for set-off (to recover a portion of the \$535,000 settlement payment paid by defendants other than Acrocrete to Plaintiffs for their alleged damages); and (c) its motion for attorney's fees against the contractor by virtue of all its claims against Acrocrete being dismissed by the Court. In addition, the Company believes that the Company has several substantive and meritorious issues to be raised on appeal, if necessary. Regardless of the disposition of the post trial motions or any appeal, the Company believes that if any judgment is ultimately entered against it, it would be a fully insured loss, will be paid by the Company's insurance carrier and will not materially adversely affect the Company's business or its results of

operations.

The allegations of defects in EIFS are not restricted to Acrocrete products used in an EIFS application, but rather are an industry-wide issue. The alleged failure of these products to perform has generally been linked to improper application and the failure of adjacent building materials such as window, roof flashing, decking and the lack of caulking.

As insurance markets for moisture intrusion type coverage have all but disappeared, the Company was forced on March 15, 2004 to renew its existing products liability coverage with an exclusion for EIFS exposure. The Company believes that with existing coverage covering all potential claims for goods sold prior to March 15, 2004, any uninsured claims should not have a material adverse effect on the Company's financial position for the immediate future.

In March 2003, Just-Rite instituted litigation against a former employee, employed at the Company's Gulfport, Mississippi distribution facility, and others, due to alleged violations by the employee of his non-compete agreements executed in connection with the acquisition of the business at that location. On September 27, 2004, Just-Rite completed a Settlement of the litigation against the former employee. (See Note 11)

Premix, Acrocrete and Just-Rite are engaged in other legal actions and claims arising in the ordinary course of its business, none of which is believed to be material to the Company.

The Company is aggressively defending all of the lawsuits and claims described above, and while the Company does not believe these claims will have a material adverse effect on the Company's financial position, given the uncertainty and unpredictability of litigation, there can be no assurance of this.

IMPERIAL INDUSTRIES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(10)

Commitments and Contingencies (continued)

b)

Lease Commitments

At March 31, 2005, the Company has certain property, plant and equipment under long-term operating leases. The Company will pay aggregate annual rent of approximately \$805,000 for its current operating leases. The leases expire at various dates ranging from May 31, 2005, to August 31, 2009. Comparable properties at equivalent rentals are available for replacement of these facilities if any leases are not extended. The Company does not expect to incur any material relocation expenses.

(11)

Settlement of Litigation and Acquisition of Assets

On September 27, 2004, the Company's subsidiary, Just-Rite Supply, Inc. (Just-Rite) completed a settlement (Settlement) of its litigation against a former employee and others (Settling Defendants), case styled Just-Rite Supply, Inc. v. Dennis Robertson, Sr. et al, Case No. 1:03 CV214 GuRo in the United States District Court of the Southern District of Mississippi, Southern Division. The former employee was previously employed at Just-Rite's Gulfport, Mississippi distribution facility. Just-Rite alleged violations by the employee of his non-compete agreements related to the acquisition of the business at that location. Under the terms of the Settlement, the former employee and certain of the Settling Defendants entered into new three-year non-compete agreements with Just-Rite. In addition, as part of the Settlement, Just-Rite received four parcels of real properties, including two warehouse buildings currently utilized by Just-Rite's Gulfport, Mississippi distribution facility. Two of these facilities were previously leased from the former employee. The remaining two parcels of real property, valued at approximately \$211,000, were classified as held for sale at March 31, 2005 and December 31, 2004. Just-Rite also received two delivery trucks which were put into immediate service. The assets received had an aggregate value of \$1,376,000. All assets acquired were subject to indebtedness. Further, a promissory note payable with a remaining principal balance and accrued interest of approximately \$144,000 due from Just-Rite associated with the acquisition of the business was cancelled.

As part of the Settlement, Just-Rite paid cash consideration of approximately \$45,000, and assumed equipment debt and mortgage indebtedness in the aggregate amount of approximately \$916,000 collateralized by the assets received in the Settlement. In addition, Just-Rite incurred approximately \$97,000 in contingent liabilities which were expected to be satisfied from the liquidation of certain assets of a Settling Defendant which were not transferred to Just-Rite.

Subsequently on January 31, 2005 the assets of the Settling Defendant were sold in foreclosure and Just-Rite was required to pay approximately \$26,000 to eliminate the remaining contingent liability.

The assumed indebtedness for the acquired facilities and trucks required aggregate monthly payments of approximately \$9,700 including interest, with a balloon payment for the remaining principal balance, plus accrued interest due and payable in 2008. In March 2005, Just-Rite completed the refinancing of the assumed mortgage indebtedness associated with the acquired real properties with the existing commercial bank for a five-year period ending 2010. Just-Rite recognized a gain of \$482,000 from the Settlement in 2004 and a decrease in rent payable of approximately \$10,500 per month.

Item 2

Management's Discussion and Analysis of Financial Condition and Results of Operations

General

The Company's business is related primarily to the level of construction activity in the Southeastern United States, particularly the states of Florida, Georgia, Mississippi and Alabama. The majority of the Company's products are sold to contractors, subcontractors and building materials dealers located principally in these states who provide building materials for the construction of residential, commercial and industrial buildings and swimming pools. The level of construction activity is subject to population growth, inventory of available housing units, government growth policies, interest rate levels and construction funding, among other things. Although general construction activity has remained strong in the Southeastern United States during the last several years, the duration of recent economic conditions and the magnitude of their effect on the construction industry are uncertain and cannot be predicted. The four hurricanes that struck Florida and other parts of the Southeastern United States in the third quarter of 2004 caused a significant amount of property damage throughout the State of Florida which caused a temporary reduction in construction activity and demand for Company products in a majority of the Company's trade areas during that quarter. Subsequently, construction repairs and rebuilding of damaged property have had a favorable effect on product demand and sales of Company products.

Special Note Regarding Forward-Looking Statements

This Form 10-Q contains certain forward looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to the financial condition, results of operations and business of the Company, and its subsidiaries, including statements made under Management's Discussion and Analysis of Financial Condition and Results of Operations. These forward looking statements involve certain risks and uncertainties. No assurance can be given that any of such matters will be realized. Factors that may cause actual results to differ materially from those contemplated by such forward looking statements include, among others, many of which are beyond the Company's control, the following: realization of tax benefits; impairment of long-lived assets, including goodwill; the ability to collect account or note receivables when due or within a reasonable period of time after they become due and payable; the increased cost of capital and related fees; the outcome of any current or future litigation; the adequacy or availability of insurance coverage for certain types of future product damage claims; the competitive pressure in the industry; unexpected product shortages, or changes in the terms of purchasing products or raw materials that may not be favorable to the Company, or changes in policies of the Company's vendors that may not be favorable to the Company; general economic and business conditions; unforeseen weather conditions in our market areas that adversely affects the construction industry; the effectiveness of business strategies and development plans; quality of management; business abilities and judgment of personnel; changes in accounting policies and practices in internal controls and requirements, and disclosure controls and procedures and related requirements as may be adopted by regulatory agencies, as well as the Financial Accounting Standards Board, that may adversely affect our costs and operations; availability of qualified personnel; and labor and employee benefit costs.

Further, the Company prepares its consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, which require management to make estimates and assumptions. As with all estimates and assumptions, they are subject to an inherent degree of uncertainty. Management bases these estimates and assumptions on historical results and known trends as well as its forecasts as to how these might change

in the future. Actual results could differ from these estimates and assumptions. A number of the critical accounting policies involve a high degree of judgment and complexity. (See Critical Accounting Policies contained in the Company's 2004 Form 10-K for a description of critical accounting policies.)

These risks are not exhaustive. The Company operates in a continually changing business environment, and new risks emerge from time to time. The Company cannot predict such risks nor can the Company assess the impact, if any, of such risks on its business or the extent to which any risk, or combination of risks may cause actual results to differ from those projected in any forward-looking statements. For example, financial results for any quarter are not necessarily indicative of results to be expected for the full year, due among any number of other factors, the effect weather can have on sales and production volume. Accordingly, investors and all others are cautioned not to place undue reliance on such forward-looking statements.

These forward-looking statements speak only as of the date of this document. The Company does not undertake any obligation to update or revise any of these forward-looking statements to reflect events or circumstance occurring after the date of this document or to reflect the occurrence of unanticipated events. Any forward-looking statements are not guarantees of future performance.

Item 2

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Overview

The Company's net sales for the three months ended March 31, 2005 increased approximately 39.2% compared to the first quarter of 2004. Demand for products sold by the Company was greater in the first quarter of 2005 compared to the same period in 2004 primarily due to strength in the new housing and commercial construction markets in the Company's trade area in the Southeastern United States and market share gains in selected territories.

Also, a significant portion of the Company's sales are generated from the areas impacted by the four hurricanes that struck Florida and other parts of the Southeastern United States in the third quarter of 2004. Although the Company suffered no significant damage to its facilities, the disruption in operations caused by the hurricanes resulted in lost sales and lower productivity for that period. Subsequently, hurricane cleanup and recovery efforts have given way to rebuilding in the damaged areas and the Company has realized an increased demand for its products since the third quarter of 2004 which has had a favorable impact on 2005 first quarter sales.

Although management expects the strength in new construction and rebuilding activity to remain solid in the Company's principal markets in 2005 (absent changes in general economic conditions), it is possible certain product shortages within the industry could cause some temporary shortage of raw materials, or other products purchased for resale, which could result in a temporary delay of supply of Company products.

The Company's gross margins were slightly higher in 2005 compared to 2004. The consolidated gross profit margins have continued to be pressured by sharply higher costs for raw materials utilized in certain of its Company manufactured products which began principally in the last half of 2004. The consolidated gross profit margins improved slightly in 2005 as a result of the Company achieving higher selling prices for products distributed from its distribution facilities in excess of vendor price increases in 2005, as compared to the first quarter of 2004. Selling, general and administrative expenses increased in the first three months of 2005 compared to the same period in 2004, due primarily to higher payroll and delivery expenses related to the servicing of the increased sales. Since a substantial portion of the Company's costs are fixed in nature, the significant increase in sales and gross profits in 2005 more than offset the increase in selling, general and administrative expenses and had a favorable impact on operating income. Operating income increased 92.4% for the three months ended March 31, 2005 compared to the first quarter of 2004.

Results of Operations

Three Months Ended March 31, 2005 compared to 2004

Net sales for the three months ended March 31, 2005 increased \$4,669,000, or approximately 39.2% compared to the same period in 2004. The increase in sales and greater demand for Company products is principally due to greater strength in the new housing and commercial construction markets in the Company's trade areas compared to the same periods last year. In addition, the Company believes it has realized an increase in demand for its products in the first quarter of 2005 compared to 2004 attributed in part to the rebuilding needs caused by the storm damages inflicted by four hurricanes in the third quarter of 2004.

Gross profit as a percentage of net sales in the first quarter of 2005 was approximately 31.2% compared to 31.1% for the same period in 2004. The Company realized slightly higher gross profit margins in 2005 compared to 2004 despite suffering raw material cost increases, as well as higher payroll and other manufacturing expenses for the Company's manufactured products produced at its Kennesaw, Georgia facility which had a negative effect on consolidated gross margins in 2005. The 2005 and 2004 first quarter periods reflect generally similar competitive conditions in the Company's markets for the sales of its distributed products, but more intense competitive conditions in the 2005 first quarter period for the sales of the Company manufactured products produced at its Kennesaw, Georgia facility limited the Company's ability to recover raw material cost increases through price increases from certain of its customers and caused downward pressure on gross profit margins. Increased gross profit margins realized from product sales generated from the Company's distribution facilities and the Company's other manufacturing facilities in the first quarter of 2005 offset the negative effect of lower gross profit margins realized from its Kennesaw, Georgia facility.

Item 2

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Three Months Ended March 31, 2005 compared to 2004 (continued)

At March 31, 2005, the Company has made an aggregate investment of approximately \$1,600,000 in its Premix manufacturing facility located in Winter Springs, Florida in an effort to improve gross profit margins by generating production efficiencies to offset raw material cost increases and to help manage rising operating costs while increasing capacity for future growth.

Selling, general and administrative expenses as a percentage of net sales for the first quarter of 2005 was approximately 22.9% compared to 25.1% in the same period in 2004. The percentage decrease was primarily the result of certain fixed costs and overhead being absorbed over higher sales volume. For the three months ended March 31, 2005, selling, general and administrative expenses increased \$800,000 compared to 2004. The increase in expenses was primarily attributable to an increase of \$306,000 in payroll and related costs, a \$127,000 increase in delivery costs necessary to service increased sales, and a \$77,000 increase in insurance expenses. In addition, fees for listing the Company's common stock on the NASDAQ Small Cap Market, in combination with professional fees for consulting services for income taxes, internal controls and legal fees increased an aggregate of \$134,000 in the first quarter of 2005 compared to the same period in 2004. Increases in other operating expenses, primarily those associated with the increased sales, accounted for the balance of the increase in operating expenses in the first quarter of 2005.

As noted earlier, a significant portion of the Company's costs are fixed in nature. Accordingly, operating income is affected materially by fluctuations in net sales. The significant increase in net sales and gross profits in the first quarter of 2005 compared to 2004 had a favorable impact on operating income. As a result of the above factors and the favorable operating leverage gained from the increase in sales, the Company generated operating income of \$1,385,000 in the first three months of 2005 compared to operating income of \$720,000 in the same period last year, an increase of 92.4%.

Interest expense increased \$24,000 in the first quarter of 2005, compared to 2004. The increase in interest expense in the first three months of 2005 was primarily due to a greater amount of interest bearing debt outstanding and higher interest rates in 2005 compared to the same period in 2004.

Miscellaneous income, net of expenses, increased \$53,000 in the first three months of 2005, compared to the first quarter of 2004. The increase in miscellaneous income in 2005 is attributed primarily to the Company's recognizing greater income from late charge fees generated from the Company's past due receivables in 2005 compared to the same period in 2004.

For the three months ended March 31, 2005, the Company recognized income tax expense of \$495,000 compared to income tax expense of \$270,000 for the same period in 2004.

After giving effect to the above factors, the Company had net income of \$831,000, or \$0.33 per fully diluted share, for the first quarter of 2005, compared to net income of \$362,000, or \$.15 per fully diluted share, for the same quarter in 2004.

Liquidity and Capital Resources

At March 31, 2005, the Company had working capital of approximately \$4,865,000 compared to working capital of \$4,439,000 at December 31, 2004, due primarily to the increase in accounts receivable and inventory associated with greater sales in the first three months of 2005, which was funded in large part by the increase in net income.

As of March 31, 2005, the Company had cash and cash equivalents of \$912,000. Additionally, the Company had customer payments in the amount of \$1,133,000 that are required to be remitted to the Company's commercial lender upon their bank clearance under the terms of the Company's line of credit. Upon remittance of such amount, the outstanding balance of the line of credit will be reduced by such amount.

Item 2

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Sources and Uses of Cash

The Company's operations generated approximately \$1,251,000 of net cash from operations in the three months ended March 31, 2005, compared to \$574,000 for the same period in 2004. The increase in cash flow in the first quarter of 2005 was primarily attributable to net income of \$831,000 in the first quarter of 2005 compared to a net income of \$362,000 for the same period in 2004. The greater amount of net income, in combination with increases in non-cash charges, accounts payable and accrued expenses, when aggregated, more than offset increases in accounts receivable and inventory associated with increased sales.

During the first quarter of 2005, the net expenditures for investing activities were \$501,000 compared to proceeds of \$161,000 in the same period in 2004. The increase in expenditures in 2005 compared to 2004 were primarily the result of expenditures for the Company's manufacturing plant modernization project located at Winter Springs, Florida and increase in restricted cash.

In the first three months of 2005, the Company used net cash of approximately \$984,000 from its financing activities, compared to using \$761,000 in 2004. In 2005, the Company issued long-term debt in the aggregate amount of \$25,000 for the purchase of additional delivery equipment, as compared to issuing long-term debt of \$248,000 primarily for the purchase of delivery equipment in 2004. Payments of long-term debt aggregated \$179,000 and \$82,000 in 2005 and 2004, respectively. In 2005, the Company reduced notes payable \$860,000, compared to \$527,000 in the previous year.

Future Commitments and Funding Sources

At March 31, 2005, the Company's contractual cash obligations, with initial or remaining terms in excess of one year, remained generally unchanged compared to December 31, 2004. (See Notes 6 and 10 in the accompanying consolidated financial statements for additional information regarding our debt and commitments.)

The Company's principal source of short-term liquidity is existing cash on hand and the availability under a line of credit with a commercial lender. Premix, Acrocrete and Just-Rite borrow on the line of credit, based upon and collateralized by, their eligible accounts receivable and inventory. Generally, accounts not collected within 120 days are not eligible accounts receivable under the Company's borrowing agreement with its commercial lender. At March 31, 2005, \$5,097,000 had been borrowed against the line of credit. Based on eligible receivables and inventory, the Company had, under its line of credit, total borrowing capacity, (including the amount outstanding of \$5,097,000) of

approximately \$9,000,000 at March 31, 2005.

Trade accounts receivable represent amounts due primarily from subcontractors, contractors and building materials dealers located principally in Florida, Georgia, Mississippi and Alabama who have purchased products on an unsecured open account basis and through Company owned warehouse distribution facilities. As of March 31, 2005, the Company owned and operated ten distribution facilities. Accounts receivable, net of allowance, at March 31, 2005 was \$8,009,000 compared to \$7,541,000 at December 31, 2004. The increase in receivables of \$468,000, or approximately 6.2%, was primarily related to increased sales in 2005, particularly sales for the month of March 2005 as compared with December 2004. Inventories and accounts payable increased \$198,000 and \$431,000, respectively, at March 31, 2005 compared to 2004 due to the increased level of business.

As a result of the consummation of the December 31, 1998 merger with its wholly-owned subsidiary, the Company agreed to pay \$733,000 in cash to its former preferred stockholders. At March 31, 2005, the Company had paid \$481,000 of such cash amount. Amounts payable to such stockholders at March 31, 2005 result from their non-compliance with the conditions for payment. Also, the Company has paid the holders of the Subordinated Debentures, which were issued in connection with the 1998 merger, an aggregate of \$812,000. Amounts payable to stockholders at March 31, 2005 on the Company's consolidated balance sheet includes \$209,000 payable to former debenture holders who have not yet tendered their Subordinated Debentures as required by the terms of such instrument.

The Company presently is focusing its efforts on enhancing customer service, increasing operating productivity through reducing costs and expenses and improving working capital. The Company expects to incur various capital expenditures aggregating approximately \$400,000 during the next twelve months to upgrade and maintain its equipment and delivery fleet to support its existing distribution facilities and improve customer service.

Item 2

Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

Future Commitments and Funding Sources (continued)

The Company expects to finance approximately \$200,000 of these expenditures from various lenders with the balance funded by cash derived from operations. In April 2005 the Company purchased a distribution facility in Jacksonville, Florida for \$475,000, of which approximately \$368,000 was financed through a mortgage loan with a commercial bank. The Company previously leased the facility from the seller. In addition, the Company has begun to evaluate a new computer and data processing system for inventory, sales management, financial control and planning to better support management decision making in an effort to keep certain costs to a minimum and more effectively service its customers. The estimated capital expenditures for this project cannot yet be determined.

In 2004 the Company undertook a major capital project to expand and enhance the Premix manufacturing capabilities at its Winter Springs, Florida facility to more effectively serve its customer base, to gain production efficiencies and provide the capacity and opportunity to broaden its manufactured product lines and enter new markets. The installation of the equipment for the modernization project was completed in the second quarter of 2005, and aggregated approximately \$1,600,000 in capital expenditures, of which \$1,130,000 was financed with a commercial bank.

Effective May 1, 2005, the Company entered into a lease agreement for a new distribution facility in St. Augustine, Florida. The Company expects its initial investment, principally working capital, will aggregate approximately \$275,000 and will primarily be financed under the Company's line of credit. Delivery and warehouse equipment is expected to total approximately \$135,000 and be funded under financing arrangements with a commercial lender. In addition, the Company is investigating the opening of additional distribution facilities to increase market share and generate internal growth.

Beginning March 15, 2004, the Company was forced to renew its product liability coverage with an exclusion for EIFS exposure. Based on past experience for these types of claims, the Company does not expect any of these types of uninsured claims that may be alleged in the future to have a material effect on the Company's financial position within the immediate future. Due to the uncertainty and unpredictability of litigation there can be no assurances as to when or if any future uninsured claims may be filed, and if they were, that they will not be material. In addition, while the Company does not believe the outstanding insured EIFS claims against Acrocrete will have a material effect on the Company's financial position, there can be no assurance of this because of the inherent uncertainty of litigation. See

Note 10 (a) of the Consolidated Financial Statements .

The Company believes its cash on hand and the maintenance of its borrowing arrangement with its commercial lender will provide sufficient cash to meet current obligations for its operations and support the cash requirements of its capital expenditure programs in 2005.

The ability of the Company to maintain and improve its long-term liquidity is primarily dependent on the Company's ability to successfully maintain profitable operations and resolve litigation on terms favorable to the Company.

Item 3

Quantitative and Qualitative disclosures About Market Risks

The Company's business is subject to certain risks, including, but not limited to, differing economic conditions, competition, loss of significant customers, customers inability to make required payments, changes in political climate, differing tax structures, changes in accounting rules and requirements, and other governmental regulations and restrictions. The Company's future results could be materially and adversely impacted by changes in these or other factors. (See also Risk Factors in the Company's filings with the Securities and Exchange Commission (including its Form 10-K) for a description of some, but not all, risks, uncertainties and contingencies.)

Residential and Commercial Construction Activity

The Company's sales depend heavily on the strength of residential and commercial construction activity in the Southeastern United States. The strength of these markets depends on many factors beyond the Company's control. Some of these factors include interest rates, employment levels, availability of credit, prices and availability of raw materials and products purchased for resale, as well as consumer confidence. Downturns in the market that the Company serves or in the economy could have a material adverse effect on the Company's operating results and

Item 3

Quantitative and Qualitative disclosures About Market Risks (continued)

Residential and Commercial Construction Activity (continued)

financial condition. Reduced levels of construction activity may result in intense price competition among building materials suppliers, which may adversely affect the Company's gross margins and operating results.

The Company's first quarter revenues and, to a lesser extent, the Company's fourth quarter revenues are typically adversely affected by winter construction cycles and weather patterns in colder climates as the level of activity in the new construction and home improvement markets decreases. Weather conditions such as heavy rain or snow, will generally preclude customers from installing the Company's products on job sites. Because much of the Company's overhead and expense remains relatively fixed throughout the year, the Company's profits and operating results generally also tend to be lower and less favorable during the first and fourth quarters. However, in view of the recent strength in construction demand for Company products it is not possible to predict if historical construction trends and sales patterns will persist in 2005.

Exposure to Interest Rates

The Company had four variable rate mortgages totaling \$630,000 at March 31, 2005. The mortgages bear interest at prime plus 1% and are due in March 2009. In addition, the Company's \$9,000,000 line of credit from a commercial lender bears an interest rate of prime plus ½%. A significant increase in the prime rate could have a material adverse effect on the Company's operating results and financial condition. In addition, future increases in interest rates could have an adverse effect on residential and commercial construction activity and demand for the sale of Company products.

Item 4

Controls and Procedures

a. Evaluation of disclosure controls and procedures

The Company has established disclosure controls and procedures to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to the officer who certifies the Company's financial

reports, as well as to other members of senior management and the Board of Directors.

The Company's management, under the supervision of the Company's Chief Executive Officer (CEO)/Chief Financial Officer (CFO), has evaluated the effectiveness of the Company's disclosure controls and procedures as defined in Securities and Exchange Commission (SEC) Rule 13a-15(e) as of the end of the period covered by this report. Management has concluded that the Company's disclosure controls and procedures are effective to ensure that information the Company is required to disclose in reports that it files or submits under the Securities Exchange Act is communicated to management, to allow timely decisions regarding required disclosure and is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

b. Changes in internal controls

There were no significant changes in the Company's internal controls or in other factors that could significantly affect the Company's internal controls subsequent to the evaluation date.
