- Loan portfolio quality continues showing a good trend. Loan deterioration during 3Q11 was COP 184 billion, and past due loans as a percentage of total loans were 2.5%. Net provision charges for past due loans and foreclosed assets totaled COP 87 billion for the quarter, and represented 0.7% of gross loans.

3Q11

1. BALANCE SHEET

1.1. Assets

As of September 30, 2011, Bancolombia's assets totaled COP 80,622 billion, which represents an increase of 7% compared to 2Q11 and of 25% compared to 3Q10.

Prepaid expenses and deferred charges increased 179% in 3Q11 versus 3Q10. This increase is explained by the recording of deferred expenses for COP 469 billion in 1Q11, related to the wealth tax that Bancolombia and its subsidiaries will pay from 2011 to 2014. The value recorded in this line will be amortized during the next four years and will be shown mainly as a reduction in the reappraisal and others account, although a portion will be reflected on the administrative expenses and others account. As of September 2011, the prepaid expenses and deferred charges account had COP 347 billion related to this wealth tax.

The property, plant and equipment account increased 10% during 3Q11 and 49% with respect to 3Q10. These variations are mainly explained by the increase in the import of equipment for leasing operations, and also by investments and capitalized expenses related to technology.

1.2. Loan Portfolio

The most relevant aspects regarding the evolution of the loan portfolio during 3Q11 were:

- The dynamic growth of consumer loans in Colombia during 3Q11 and compared to 3Q10. Conversely, consumer loans in USD, which correspond to the operation in El Salvador, remained stable during 3Q11 and increased 1.2% during the past 12 months.

3Q11

- Demand for loans denominated in USD by Colombian companies. The increase in international trade flows played an important role in the growth of loans denominated in USD as companies demanded credit to finance their exporting activities and the working capital needs associated with them. The Colombian government, in an effort to control external debt in dollars that could result in further appreciation of the COP, imposed a withholding tax on the interest paid by Colombian companies on loans granted to them by banks domiciled outside Colombia. This tax motivated companies with loans in USD granted by foreign banks to start taking loans in USD with domestic banks, which was one of the reasons for the growth in Bancolombia's USD denominated loan book.
- Net loans in USD correspond to loans originated in Colombia (USD 3,244 million, 41%), El Salvador (USD 2,359 million, 30%) and other countries (USD 2,229 million, 29%).
- The COP depreciated 9% against the USD during 3Q11. This affected the conversion to COP of loans denominated in USD, and explains approximately 2% of the increase in the balance sheet figures expressed in COP during 3Q11.
- Mortgage loans denominated in COP also showed a positive performance. The increased dynamism of mortgage lending in Colombia is explained by optimism regarding the economy, lower long-term interest rates, as well as by the Colombian government's interest rate subsidy programs, which have produced higher credit demand in this segment. On the other hand, the outstanding mortgage balances denominated in USD from our operation in El Salvador remained stable in 3Q11 and decreased slightly in the past 12 months.
- Financial leases, 90% of which are denominated in COP, increased 7% during the quarter and 23% as compared to 3Q10. Operating leases, net of depreciation, increased 7% during the quarter and 23% during the year.

When analyzing the performance of the loan portfolio according to the categories established by Bancolombia to manage its commercial strategy, it becomes clear that corporate loans were key drivers of the growth of the total loan portfolio during the quarter as they increased 8% with respect to 2Q11. This increase is explained by higher demand for working capital and financing by corporations. On the other hand, retail and SME loans increased 7% in the same period due to higher demand for working capital and financing by SMEs, personal loans and car loans..

Reserves for loan losses increased 5% during 3Q11 and totaled COP 2,654 billion, or 4.6% of total loans at the end of the quarter. For further explanation regarding coverage of the loan portfolio and credit quality trends, please see Section 2.4. "Asset Quality, Provision Charges and Balance Sheet Strength" of this report.

1.3.

Investment Portfolio

As of September 30, 2011, Bancolombia's net investment portfolio totaled COP 11,012 billion, increasing 8% compared to 2Q11 and 20% compared to 3Q10. The investment portfolio is mainly composed of debt investment securities, which represented 92% of Bancolombia's total investments and 13% of assets at the end of 3Q11. Investments denominated in USD totaled USD 1,351 million and represented 24% of the investment portfolio. Additionally, the Bank has COP 1,962 billion in mortgage backed securities, which represent 18% of the investment portfolio. The duration of the debt securities portfolio was 19.7 months with a yield to maturity of 4.79% at the end of 3Q11.

1.4. Goodwill

As of 3Q11, Bancolombia's goodwill totaled COP 719 billion and increased 7% compared to the amount reported in 2Q11. This variation is explained by the depreciation of the Colombian peso in the quarter and the amortization of goodwill reported during the past year (under COL GAAP, goodwill is amortized within a period of 20 years). As of September 30, 2011, Bancolombia's goodwill included USD 348 million related mostly to the acquisition of Banagrícola in 2007 and COP 4 billion related to the acquisition of a participation of Renting Bancolombia by Leasing Bancolombia.

1.5. Funding

As of September 30, 2011, Bancolombia's liabilities totaled COP 72,156 billion and increased 7% compared to 2Q11 and 26% compared to 3Q10. The ratio of net loans to deposits (including borrowings from domestic development banks) was 106% at the end of 3Q11, increasing compared to the figures reported in 2Q11 (104%) and 3Q10 (96%). The growth of the loan portfolio and Bancolombia's ability to obtain funds through long-term bond issuances resulted in the higher ratio of net loans to deposits for the quarter.

Deposits totaled COP 48,472 billion (or 67% of liabilities) at the end of 3Q11 and increased 5% during the quarter and 15% over the last 12 months. CDs represented 40% of deposits in 3Q10, and 37% of deposits in 3Q11. This decrease is in line with the funding strategy executed by the Bank during the past year, which has consisted of taking advantage of the greater liquidity and low interest rates through increasing savings and checking accounts. As a result of this recomposition of the funding mix, demand deposits went from representing 60% of the Bank's total deposits in 3Q10, to representing 63% as of the end of 3Q11.

At the end of 3Q11, Bancolombia had outstanding bonds for USD 2,540 million in international markets and COP 4,766 billion in local markets. The maturities of these bonds range from 2 to 10 years.

1.6. Shareholders' Equity and Regulatory Capital

Shareholders' equity at the end of 3Q11 was COP 8,466 billion, increasing 12% or COP 917 billion with respect to the COP 7,549 billion reported at the end of 3Q10.

Bancolombia's capital adequacy ratio was 397 basis points above the minimum level required by Colombia's regulator, while the basic capital ratio (tier 1) was 9.31% and the tangible capital ratio, which is equal to shareholders' equity minus goodwill and intangible assets divided by tangible assets, was 8.83% at the end of 3Q11.

Interest income increased 7% during the quarter, and interest expense increased 17%. The increase of interest paid on liabilities was led by the interest on bonds outstanding, which increased 28% in 3Q11 due to growth in the amount of bonds outstanding resulting from the issuance that took place in June 2011, and the payment of coupons in dollars at a higher exchange rate.

During 3Q11, income generated by the investment portfolio totaled COP 181 billion, a figure 6% lower than the COP 192 billion for 2Q11 and 18% higher than the COP 153 billion for 3Q10.

2.3. Other Operating Income

Total other operating income was COP 117 billion in 3Q11, 4% lower than in 2Q11, and 6% higher than in 3Q10. Income from foreign exchange gains and derivatives denominated in foreign currencies increased 87% due to the appreciation of the COP against the USD.

Notably, revenues aggregated in the communication, postage, rent and others totaled COP 56 billion in 3Q11, 7% higher as compared to 2Q11 and 28% higher as compared to 3Q10. This line includes commercial discounts and operating leases payments, which have grown as the value of assets rented under operating leasing contract has increased. Finally, income from subsidiaries from the real sector increased 10% during the quarter and 22% over the past year.

During 3Q11, a loss was recorded for the sale of equity investments that Bancolombia had received as collateral for a loan that defaulted. These equity investments increased the recovery of foreclosed assets and the net effect for Bancolombia was net gain for COP 3 billion.

2.4. Asset Quality, Provision Charges and Balance Sheet Strength

The deterioration of the loan portfolio (new past due loans before charge-offs) was COP 184 billion in 3Q11. The new vintages of loans have a low deterioration and contribute to the improvement of the loan portfolio quality.

Past due loans (those overdue more than 30 days) totaled COP 1,439 billion at the end of 3Q11, which represents 2.5% of total gross loans. The PDL ratio decreased from 2.6% in 2Q11 and 3.4% at the end of 3Q10. Loan charge-offs totaled COP 104 billion in 3Q11.

Provision charges (net of recoveries), totaled COP 87 billion in 3Q11. It is remarkable that while gross loan provisions decreased 8% in the last 12 months, recovery of charged-off loans increased 14%.

Bancolombia maintains a strong balance sheet in terms of loan loss reserves. Allowances for loan losses totaled COP 2,654 billion, or 4.6% of total loans at the end of 3Q11, decreasing with respect to the 4.8% presented at the end of 2Q11 and the 5.5% at the end of 3Q10. Additionally, coverage, measured by the ratio of allowances for loans losses (principal) to PDLs (overdue 30 days), was 184% at the end of 3Q11. Likewise, coverage measured by the ratio of allowances for loans losses to loans classified as C, D and E, was 118% at the end of the second quarter of 3Q11.

During 3Q11, operating expenses totaled COP 919 billion, increasing 3% compared to 2Q11 and 22% compared to 3Q10.

Personnel expenses (the sum of salaries and employee benefits, bonus plan payments and compensation) totaled COP 356 billion in 3Q11, increasing 1% as compared to 2Q11 and 13% as compared to 3Q10.

During 3Q11, administrative and other expenses totaled COP 484 billion and increased 8% as compared to 2Q11 and 32% compared to 3Q10. At the same time, advisory fees increased during the quarter, and provisions were made for the improvement of physical facilities.

Depreciation expenses totaled COP 56 billion in 3Q11, increasing 6% as compared to 2Q11 and 13% compared to 3Q10.
