

DANA HOLDING CORP
Form 10-Q
July 26, 2012

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, DC 20549

Form 10-Q

**Quarterly Report Pursuant to Section 13 or 15(d) of the
Securities Exchange Act of 1934**

For the quarterly period ended: June 30, 2012

Commission File Number: 1-1063

Dana Holding Corporation

(Exact name of registrant as specified in its charter)

Delaware
(State of incorporation)

26-1531856
(IRS Employer Identification Number)

3939 Technology Drive, Maumee, OH 43537
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: **(419) 887-3000**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: DANA HOLDING CORP - Form 10-Q

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

(Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY

PROCEEDINGS DURING THE PRECEDING FIVE YEARS:

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court. Yes No

APPLICABLE ONLY TO CORPORATE ISSUERS:

There were 147,896,999 shares of the registrant’s common stock outstanding at July 13, 2012.

Notes to Consolidated Financial Statements (Unaudited)

(In millions, except share and per share amounts)

Note 1. Organization and Summary of Significant Accounting Policies

General

Dana Holding Corporation (Dana) is headquartered in Maumee, Ohio and was incorporated in Delaware in 2007. As a leading supplier of driveline products (axles, driveshafts and transmissions), power technologies (sealing and thermal management products) and genuine service parts for vehicle manufacturers, our customer base includes virtually every major vehicle manufacturer in the global light vehicle, medium/heavy vehicle and off-highway markets.

The terms "Dana," "we," "our" and "us," when used in this report, are references to Dana. These references include the subsidiaries of Dana unless otherwise indicated or the context requires otherwise.

Summary of significant accounting policies

Basis of presentation — Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information. These statements are unaudited, but in the opinion of management include all adjustments (consisting only of normal recurring adjustments) necessary for a fair presentation of the results for the interim periods. The results reported in these consolidated financial statements should not necessarily be taken as indicative of results that may be expected for the entire year. The financial information included herein should be read in conjunction with the consolidated financial statements in Item 8 of our 2011 Form 10-K.

Recently adopted accounting pronouncements

In September 2011, the Financial Accounting Standards Board (FASB) issued guidance to provide an option in a company's annual goodwill impairment test to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing all events and circumstances, it is determined that it is not more likely

than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step goodwill impairment test is unnecessary. The guidance also expands the qualitative factors that a company should consider between annual impairment tests. The guidance was effective January 1, 2012. The adoption did not impact our financial condition or results of operations.

In June 2011, the FASB issued guidance to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. The standard eliminates the prior option to present components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendment requires that all nonowner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. We have included a separate statement of comprehensive income herein to comply with the guidance, which was effective January 1, 2012. Adoption of this guidance only impacted the presentation of other comprehensive income and did not impact our financial condition or results of operations.

In May 2011, the FASB issued guidance to improve consistency in application of existing fair value measurement and disclosure requirements. The standard is intended to clarify the application of the requirements, not to establish valuation standards or affect valuation practices outside of financial reporting. The guidance was effective January 1, 2012. Adoption of this guidance did not have a material impact on our financial condition or results of operations.

Recently issued accounting pronouncements

In December 2011, the FASB issued guidance to enhance disclosures about offsetting assets and liabilities. Entities are required to disclose both gross information and net information about both instruments and transactions eligible for offset in the statement of financial position and instruments and transactions subject to an agreement similar to a master netting arrangement. The guidance is effective for interim and annual periods beginning on or after January 1, 2013. We do not expect adoption of this guidance to impact our financial condition or results of operations.

Note 2. Acquisitions and Divestitures

SIFCO — In February 2011, we entered into an agreement with SIFCO, a leading producer of steer axles and forged components in South America. In return for a payment of \$150 to SIFCO, we acquired the distribution rights to SIFCO's commercial vehicle steer axle systems as well as an exclusive long-term supply agreement for key driveline components. Additionally, SIFCO will provide selected assets and assistance to Dana to establish assembly capabilities for these systems. We are now responsible for all customer relationships, including marketing, sales, engineering and assembly. The addition of truck and bus steer axles to our product offering in South America effectively positions us as the leading full-line supplier of commercial vehicle drivelines — including front and rear axles, driveshafts and suspension systems — in South America. This acquisition contributed \$390 to 2011 sales.

Dongfeng Dana Axle — On June 30, 2011, we purchased an additional 46% interest in Dongfeng Dana Axle Co., Ltd. (DDAC), a commercial vehicle axle manufacturer in China, from Dongfeng Motor Co., Ltd. (Dongfeng Motor) and certain of its affiliates for \$124 plus \$6 of transaction costs. Combined with the 4% interest purchased in June 2007, we now own 50% of the registered capital of DDAC. This investment is being accounted for under the equity method.

During the second quarter of 2012, we finalized the valuation of our additional investment in DDAC. Measurement period adjustments included a \$4 reduction of our investment in DDAC as a result of the decrease in fair value of the contingent consideration. In addition, the allocation of the investment fair value to amortizable intangible assets, property, plant and equipment and deferred tax liabilities increased \$13, \$1 and \$4 respectively. The measurement period adjustments reduced the fair value allocated to goodwill by \$14. Equity in earnings of affiliates for the second quarter of 2012 includes \$1 of amortization expense resulting from the measurement period adjustments. The amortization resulting from the measurement period adjustments was deemed not to be material to retrospectively adjust prior periods.

Our additional investment, inclusive of fees and contingent consideration, was recorded at its fair value of \$131, an excess of \$66 over the corresponding DDAC book value. This fair value increase has been allocated as follows: (1) amortizable intangible assets of \$31; (2) property, plant and equipment of \$17; (3) inventories of \$1; (4) goodwill of

\$28; and (5) deferred tax liabilities of \$11. The increase in basis related to property, plant and equipment is being depreciated on a straight-line basis over the remaining useful lives of the assets ranging from 10 to 45 years. The amortizable intangible assets are being amortized on a straight-line basis over the remaining useful lives of the assets ranging from five to 10 years.

Axles India — On June 30, 2011, we acquired the axle drive head and final assembly business of our Axles India Limited (AIL) equity affiliate for \$13. This business is reported in our Commercial Vehicle segment. This transaction is being accounted for as a business combination. The aggregate fair value of the net assets acquired equals the \$13 paid to AIL and has been allocated as follows: accounts receivable of \$1; inventory of \$3; equipment of \$3; amortizable intangible assets of \$11; and accounts payable and other accrued liabilities of \$5. The amortizable intangible assets are being amortized on a straight-line basis over eight years.

Dana Rexroth Transmission Systems — In October 2011, we formed a 50/50 joint venture with Bosch Rexroth to develop and manufacture advanced powersplit drive transmissions for the off-highway market. We contributed \$8 to the venture in 2011 and are accounting for our investment under the equity method.

Divestiture of GETRAG Entities — On September 30, 2011, we completed the divestitures of our 49% equity interest in GETRAG Corporation and our 42% equity interest in GETRAG Dana Holding GmbH (together the GETRAG Entities) for \$136. A \$60 gain was recorded in the third quarter of 2011 in connection with the divestitures and included in other income (expense), net.

Divestiture of Structural Products business — In December 2009, we signed an agreement to sell substantially all of the assets of our Structural Products business to Metalsa S.A. de C.V. (Metalsa), the largest vehicle frame and structures supplier in Mexico. The agreement excluded the facility in Longview, Texas and the employees and manufacturing assets related to a significant customer contract that will continue into the third quarter of 2012. We judged these retained activities to be a significant portion of the Structural Products operating segment and concluded that the divested operations did not comprise a component of an entity. Accordingly, the portion of the Structural Products business sold to Metalsa has not been presented as discontinued operations in the accompanying financial statements.

We had received cash proceeds of \$134 through the end of 2011, excluding amounts related to working capital adjustments and tooling. Approximately \$13 remained as a receivable at the end of 2011 with a corresponding amount held in escrow. Approximately \$11 of the funds held in escrow was to be released to Dana in September 2011; however, the buyer presented claims to the escrow agent seeking indemnification from Dana. The escrow agent is precluded from releasing the funds held in escrow until Dana and the buyer resolve the issues underlying the claims. We are evaluating the claims and do not presently believe that any obligation to indemnify the buyer will be material.

In connection with the sale, leases covering three U.S. facilities were assigned to a U.S. affiliate of Metalsa. Under the terms of the sale agreement, we will guarantee the affiliate's performance under the leases, which run through June 2025, including approximately \$6 of annual payments. In the event of a required payment by Dana as guarantor, we are entitled to pursue full recovery from Metalsa of the amounts paid under the guarantee and to take possession of the leased property.

Other — We are negotiating the divestiture of our axle, differential and brake systems business serving the leisure, all-terrain-vehicle and utility vehicle markets. Sales of the business approximated \$53 and \$59 in 2011 and 2010. Based on the expected sales price, we recorded an asset impairment of \$2 in the first quarter of 2012. The assets of the business approximate \$14, including \$3 of property, plant and equipment, and liabilities approximate \$7. These amounts are not material for reporting as items held for sale separately on the face of the consolidated balance sheet at June 30, 2012.

Note 3. Goodwill and Other Intangible Assets

Goodwill — Our goodwill is assigned to our Off-Highway segment. The changes in the carrying amount of goodwill are due to currency fluctuations.

Components of other intangible assets —

	Weighted Average Useful Life (years)	June 30, 2012			December 31, 2011		
		Gross Carrying Amount	Accumulated Impairment and Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Impairment and Amortization	Net Carrying Amount
<i>Amortizable intangible assets</i>							
Core technology	7	\$92	\$ (63) \$ 29	\$92	\$ (55) \$ 37
Trademarks and trade names	16	4	(1) 3	4	(1) 3
Customer relationships	8	533	(283) 250	545	(250) 295
<i>Non-amortizable intangible assets</i>							
Trademarks and trade names		65		65	65		65
		\$694	\$ (347) \$ 347	\$706	\$ (306) \$ 400

The net carrying amounts of intangible assets, other than goodwill, attributable to each of our operating segments at June 30, 2012 were as follows: Light Vehicle Driveline (LVD) — \$13, Power Technologies — \$31, Commercial Vehicle — \$209 and Off-Highway — \$94.

Amortization expense related to amortizable intangible assets —

	Three Months Ended June 30, 2012		Six Months Ended June 30, 2011	
Charged to cost of sales	\$3	\$3	\$6	\$7
Charged to amortization of intangibles	19	21	38	38
Total amortization	\$22	\$24	\$44	\$45

The following table provides the estimated aggregate pre-tax amortization expense related to intangible assets for each of the next five years based on June 30, 2012 exchange rates. Actual amounts may differ from these estimates due to such factors as currency translation, customer turnover, impairments, additional intangible asset acquisitions and other events.

	Remainder of 2012	2013	2014	2015	2016
Amortization expense \$	43	\$ 86	\$ 49	\$ 23	\$ 21

Note 4. Restructuring of Operations

Our restructuring activities primarily include rationalizing our operating footprint by consolidating facilities, positioning operations in lower cost locations and reducing overhead costs. Restructuring expense includes costs associated with current and previously announced actions and is comprised of contractual and noncontractual separation costs and exit costs, including costs associated with lease continuation obligations and certain operating costs of facilities that we are in the process of closing. We classify the incremental depreciation associated with a planned closure as accelerated depreciation/impairment and also include this cost in restructuring expense.

During the second quarter of 2012, we implemented and recognized the costs of specific headcount reduction initiatives, primarily associated with certain of our South American operations. Additionally, as planned, we exited

our Commercial Vehicle facility in Kalamazoo, Michigan and recognized the fair value of the associated lease continuation obligation. Total restructuring expense in the second quarter of 2012 to recognize the costs of these actions as well as costs associated with other previously announced initiatives was \$20 and includes \$7 of severance and related benefits costs, \$12 of exit costs and \$1 of accelerated depreciation/impairment cost.

Restructuring expense of \$6 during the first quarter of 2012 was primarily attributable to costs associated with previously announced initiatives and included \$4 of severance and related benefit costs and \$2 of exit costs.

During the first quarter of 2011, we reached an agreement with the lessor to settle the lease associated with our LVD facility in Yennora, Australia. Under the terms of the agreement, we recognized \$20 of lease termination costs. Additionally, we approved the realignment of several manufacturing operations, including the closure of our LVD manufacturing facility in Marion, Indiana. Including costs associated with previously announced initiatives, we expensed \$30 for restructuring actions during the first quarter of 2011, including \$1 of severance and related benefit costs, \$28 of exit costs and \$1 of accelerated depreciation/impairment cost.

During the second quarter of 2011, we incurred pension settlement costs associated with the previously announced closure of certain of our Canadian operations (see Note 7). Including costs of these actions and previously announced initiatives, we expensed \$11, including \$7 of severance and related benefit costs, \$3 of exit costs and \$1 of accelerated depreciation/impairment cost.

Restructuring charges and related payments and adjustments —

	Employee Termination Benefits	Accelerated Depreciation/ Impairment	Exit Costs	Total
Balance at March 31, 2012	\$ 28	\$ -	\$ 3	\$ 31
Activity during the period:				
Charges to restructuring	8	1	12	21
Adjustments of accruals	(1)			(1)
Non-cash write-off		(1)		(1)
Cash payments	(6)		(2)	(8)
Balance at June 30, 2012	\$ 29	\$ -	\$ 13	\$ 42
Balance at December 31, 2011	\$ 30	\$ -	\$ 3	\$ 33
Activity during the period:				
Charges to restructuring	12	1	14	27
Adjustments of accruals	(1)			(1)
Non-cash write-off		(1)		(1)
Cash payments	(12)		(4)	(16)
Balance at June 30, 2012	\$ 29	\$ -	\$ 13	\$ 42

At June 30, 2012, the accrued employee termination benefits relate to the reduction of approximately 1,200 employees to be completed over the next two years. The exit costs relate primarily to lease continuation obligations. We estimate cash expenditures to approximate \$17 in the second half of 2012 and \$25 thereafter.

Cost to complete — The following table provides project-to-date and estimated future expenses for completion of our pending restructuring initiatives for our business segments.

	Expense Recognized		Future	
	Prior to 2012	2012	Total to Date	Cost to Complete
LVD	\$23	\$ 7	\$ 30	\$ 11
Power Technologies	12	1	13	4
Commercial Vehicle	22	15	37	9
Off-Highway	8		8	2
Structures	2	1	3	5
Corporate	6	2	8	1
Total	\$73	\$ 26	\$ 99	\$ 32

The future cost to complete includes estimated separation costs, primarily those associated with one-time benefit programs, and exit costs, including lease continuation costs, equipment transfers and other costs which are required to be recognized as closures are finalized or as incurred during the closure.

Note 5. Earnings per Share

Reconciliation of the numerators and denominators of the earnings per share calculations —

(In millions)	Three Months		Six Months	
	Ended June 30, 2012	2011	Ended June 30, 2012	2011
Net income available to common stockholders - Numerator basic	\$79	\$61	\$141	\$23
Preferred stock dividend requirements Numerator diluted	7	7	15	
	\$86	\$68	\$156	\$23
Weighted-average number of shares outstanding - Denominator basic	147.9	146.7	147.7	146.0
Employee compensation-related shares, including stock options Conversion of preferred stock Denominator diluted	2.0	3.4	2.3	3.7
	64.7	64.7	64.7	
	214.6	214.8	214.7	149.7

The share count for diluted earnings per share is computed on the basis of the weighted-average number of common shares outstanding plus the effects of dilutive common stock equivalents (CSEs) outstanding during the period. We excluded 1.4 million and 0.5 million CSEs from the calculations of diluted earnings per share for the quarters ended June 30, 2012 and 2011 and 1.0 million and 0.4 million CSEs from the calculations of diluted earnings per share for the six months ended June 30, 2012 and 2011 as the effect of including them would have been anti-dilutive.

We excluded 65.5 million CSEs related to the assumed conversion of the preferred stock for the six months ended June 30, 2011, along with the adjustment for the related dividend requirements, as the effect of the conversion would have been anti-dilutive for the period.

Note 6. Stock Compensation

Our stockholders approved the 2012 Omnibus Incentive Plan (the Plan) at the April 2012 stockholder meeting, replacing the 2008 Omnibus Incentive Plan (the Prior Plan). The Plan authorizes grants of stock awards through April 2022 and provides for the issuance of up to 5.0 million shares of common stock in addition to the 1.9 million remaining shares available under the Prior Plan. Cash-settled awards do not count against the maximum share issuance of the Plan.

Our Board of Directors approved the grant of stock options, stock appreciation rights (SARs), restricted stock units (RSUs) and performance share units (PSUs) shown in the table below during the first half of 2012.

	Granted	Weighted-average Per Share Exercise Price	Grant Date Fair Value
	(In millions)		
Stock options	0.7	\$ 15.99	\$ 7.91
SARs	0.2	\$ 15.85	\$ 7.84
RSUs	0.6		\$ 15.86
PSUs	0.1		\$ 16.00

Stock options and SARs related to 0.5 million shares were exercised and 0.1 million shares were forfeited in the first half of 2012. We received \$1 of cash from the exercise of stock options and we paid \$1 of cash to settle SARs and RSUs during the first half of 2012. We also issued 0.2 million in RSUs based on vesting.

We estimated fair values for options and SARs granted during 2012 using the following key assumptions as part of the Black-Scholes option pricing model. The expected term was estimated using the simplified method because the limited period of time our common stock has been publicly traded provides insufficient historical exercise data. The dividend yield was calculated by dividing the expected annual dividend by the average stock price of our common stock over the prior year. The expected volatility was estimated using a combination of the historical volatility of similar entities and the implied volatility of our exchange-traded options.

	Options		SARs	
Expected term (in years)	6.00		6.00	
Risk-free interest rate	1.24	%	1.24	%
Dividend yield	1.33	%	1.33	%
Expected volatility	59.90	%	59.90	%

We recognized stock compensation expense of \$3 and \$5 during the second quarter of 2012 and 2011 and \$10 and \$8 during the first half of 2012 and 2011. At June 30, 2012, the total unrecognized compensation cost related to the nonvested equity awards granted and expected to vest was \$24. This cost is expected to be recognized over a weighted-average period of 1.9 years.

Note 7. Pension and Postretirement Benefit Plans

We have a number of defined contribution and defined benefit, qualified and nonqualified, pension plans covering eligible employees. Other postretirement benefits (OPEB), including medical and life insurance, are provided for certain employees upon retirement.

Components of net periodic benefit costs —

	Pension				OPEB - Non-U.S.	
	2012		2011		2012	2011
Three Months Ended June 30,	U.S.	Non-U.S.	U.S.	Non-U.S.		
Interest cost	\$22	\$ 3	\$22	\$ 3	\$ 2	\$ 2
Expected return on plan assets	(29)	(1)	(26)	(1)		
Service cost		1		2		
Amortization of net actuarial loss	4		5			
Settlement loss				4		
Net periodic benefit cost	\$(3)	\$ 3	\$1	\$ 8	\$ 2	\$ 2

Six Months Ended June 30,

Interest cost	\$43	\$ 6	\$46	\$ 7	\$ 3	\$ 4
Expected return on plan assets	(56)	(1)	(52)	(2)		
Service cost		2		3		
Amortization of net actuarial loss	7		10			
Settlement loss				5		
Net periodic benefit cost	\$(6)	\$ 7	\$4	\$ 13	\$ 3	\$ 4

In January 2012, we made a voluntary contribution of \$150 to the U.S. pension plans which we presently expect to be incremental to the minimum required contribution.

In January 2012, in accordance with our policy, we changed the amortization period related to deferred losses in accumulated other comprehensive income (AOCI) from the average remaining service period of active participants to the average remaining life expectancy of inactive participants for one of our U.S. plans as a result of almost all of the plan's participants being inactive.

As a result of the closure of several facilities in Canada, we are required to settle the related pension obligations. During the first half of 2011, we settled portions of our Canadian pension benefit obligations by making lump-sum payments or by purchasing non-participating annuity contracts to cover vested benefits. As a result of these actions, we reduced the benefit obligations by \$77 and also reduced the fair value of plan assets by \$77. The related settlement loss of \$5 representing the recognition of a portion of the actuarial loss deferred in AOCI was included in restructuring charges.

Note 8. Stockholders' Equity

Series A and Series B preferred stock — Dividends on our 4.0% Series A Convertible Preferred Stock and 4.0% Series B Convertible Preferred Stock (preferred stock) are accrued monthly and are payable in cash as approved by the Board of Directors. Preferred dividends of \$8 were accrued at June 30, 2012 and December 31, 2011.

Common stock — Our Board of Directors declared a quarterly cash dividend of five cents per share of common stock in both the first and second quarters of 2012. Aggregate 2012 declared and paid dividends total \$15. Dividends accrue on RSUs granted under our stock compensation program and will be paid in cash or additional units when the underlying units vest.

Changes in equity —

Three Months Ended June 30,	2012			2011		
	Attributable to Parent	Attributable to Non-controlling Interests	Total Equity	Attributable to Parent	Attributable to Non-controlling Interests	Total Equity
Balance, March 31	\$1,853	\$ 105	\$1,958	\$1,712	\$ 102	\$1,814

Note 9. Marketable Securities

	June 30, 2012			December 31, 2011	
	Cost	Unrealized Gains	Fair Value	Cost	Fair Value
U.S. government securities	\$8	\$ -	\$ 8	\$10	\$ 10
Corporate securities	11		11	8	8
Certificates of deposit	12		12	13	13
Other	28	1	29	25	25
Total marketable securities	\$59	\$ 1	\$ 60	\$56	\$ 56

U.S. government securities include bonds issued by government-sponsored agencies and Treasury notes. Corporate securities include both debt and equity securities. Other consists of investments in mutual and index funds. U.S. government securities, corporate debt and certificates of deposit maturing in one year or less, after one year through five years and after five years total \$14, \$12 and \$4 at June 30, 2012.

Proceeds from liquidating available-for-sale marketable securities prior to their scheduled maturities in the three and six months ended June 30 were zero and \$1 in 2012 and \$2 and \$7 in 2011. The related gains and losses realized on this activity were not significant.

Note 10. Financing Agreements

Senior notes — In January 2011, we completed an offering of senior unsecured notes (the Senior Notes) which generated net proceeds of \$733. These proceeds, together with available cash of \$127, were used to repay in full all amounts then outstanding under our Term Facility. The aggregate principal amount of the Senior Notes is \$750, with \$400 at a fixed interest rate of 6.50% maturing in 2019 and \$350 at a fixed rate of 6.75% maturing in 2021. At June 30, 2012, we had \$750 principal amount of Senior Notes outstanding. The weighted-average interest rate on the Senior Notes was 6.62%. Interest on the notes is payable on February 15 and August 15 of each year.

Revolving facility — We maintain a revolving credit agreement from lenders permitting aggregate borrowings of up to \$500. The revolving credit agreement bears interest at a floating rate based on, at our option, the base rate or London Interbank Offered Rate (LIBOR) (each as described in the revolving credit agreement) plus a margin based on the undrawn amounts available under the agreement. Commitment fees are applied based on the average daily unused portion of the available amounts under the facility. If the average daily use is less than 50%, the applicable fee will be 0.50% per annum. If the average daily unused portion of the facility is equal to or greater than 50%, the applicable fee will be 0.625% per annum. Up to \$300 of the facility may be applied to letters of credit, which reduces availability.

We pay a fee for issued and undrawn letters of credit in an amount per annum equal to the applicable LIBOR margin based on a quarterly average availability under the facility and a per annum fronting fee of 0.25%, payable quarterly. There were no borrowings under the facility at June 30, 2012 but we had utilized \$67 for letters of credit. Based on our borrowing base collateral of \$460, we had potential availability at June 30, 2012 under the revolving facility of \$393 after deducting the outstanding letters of credit. The facility expires in February 2016.

European receivables loan facility — Certain of our European subsidiaries participate in an accounts receivable backed credit facility which permits borrowings of up to €75 (\$95 at the June 30, 2012 exchange rate). Availability under the program is subject to the existence of adequate levels of supporting accounts receivable. As of June 30, 2012, we had potential availability of \$95 based on the effective borrowing base. Advances under the program will bear interest based on the LIBOR applicable to the currency in which each advance is denominated or an Alternate Base Rate (as defined). All advances are to be repaid in full by March 2016. We pay a fee on any unused amount of the program, in addition to other customary fees. At June 30, 2012, we had no borrowings under this program.

Debt covenants — At June 30, 2012, we were in compliance with the covenants of our debt agreements. Under the revolving facility and the Senior Notes, we are required to comply with certain incurrence-based covenants customary for facilities of these types.

The incurrence-based covenants in the revolving facility permit us to, among other things, (i) issue foreign subsidiary indebtedness, (ii) incur general secured indebtedness and (iii) incur additional unsecured debt so long as the pro forma minimum fixed charge coverage ratio is at least 1.1:1.0. We may also make dividend payments in respect of our common stock as well as certain investments and acquisitions so long as there is (i) at least \$125 of pro forma excess borrowing availability or (ii) at least \$75 of pro forma excess borrowing availability and the pro forma minimum fixed charge coverage ratio is at least 1.1:1.0. The indenture governing the Senior Notes includes similar incurrence-based covenants that may subject us to additional specified limitations.

Note 11. Fair Value Measurements and Derivatives

In measuring the fair value of our assets and liabilities, we use market data or assumptions that we believe market participants would use in pricing an asset or liability including assumptions about risk when appropriate. Our valuation techniques include a combination of observable and unobservable inputs.

Fair value measurements on a recurring basis — Assets and liabilities that are carried in our balance sheet at fair value are as follows:

	Total	Fair Value Measurements Using		
		Quoted Prices in Active Markets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
June 30, 2012				
Notes receivable - noncurrent asset	\$122	\$-	\$ -	\$ 122
Marketable securities - current asset	60	40	20	
Currency forward contracts - current asset	3		3	
Currency forward contracts - current liability	5		5	
Notes payable	82		82	
Long-term debt, including current portion	930		930	
December 31, 2011				
Notes receivable - noncurrent asset	\$116	\$-	\$ -	\$ 116

Edgar Filing: DANA HOLDING CORP - Form 10-Q

Marketable securities - current asset	56	33	23
Currency forward contracts - current asset	1		1
Currency forward contracts - current liability	16		16
Notes payable	46		46
Long-term debt, including current portion	869		869

Foreign currency derivatives — The total notional amounts of outstanding foreign currency forward contracts as of June 30, 2012 and December 31, 2011 were \$151 and \$213 comprised of currency forward contracts involving the exchange of various currencies.

The following currency forward contracts were outstanding at June 30, 2012 and are primarily associated with forecasted transactions involving the purchases and sales of inventory through the next twelve months:

Functional Currency	Traded Currency	Notional Amount (U.S. Dollar Equivalent)			Maturity
		Cash Flow Hedges	Undesignated	Total	
U.S. dollar	Mexican peso	\$91	\$ -	\$91	Jun-13
Euro	U.S. dollar, Canadian dollar, Hungarian forint, Japanese yen	19		19	Jun-13
British pound	U.S. dollar, Euro	13		13	Jun-13
Swedish krona	Euro	7	4	11	Jun-13
Australian dollar	U.S. dollar	6	1	7	Mar-13
Indian rupee	U.S. dollar, British pound, Euro		10	10	Dec-12
Total forward contracts		\$136	\$ 15	\$151	

Cash flow hedges — With respect to contracts designated as cash flow hedges, changes in fair value during the period in which the contracts remain outstanding are reported in other comprehensive income (OCI) to the extent such contracts remain effective. Changes in fair value of those contracts that are not designated as cash flow hedges are reported in income in the period in which the changes occur. Forward contracts associated with product-related transactions are marked to market in cost of sales while other contracts are marked to market through other income, net. Amounts recorded in OCI are ultimately reclassified to earnings in the same periods in which the underlying transactions affect earnings.

Amounts to be reclassified to earnings — Deferred losses of \$3 at June 30, 2012, which are reported in AOCI, are expected to be reclassified to earnings during the next twelve months. Amounts expected to be reclassified to earnings assume no change in the current hedge relationships or to June 30, 2012 market rates. Deferred losses at December 31, 2011 and March 31, 2012 were \$13 and \$3, of which \$2 and \$4 were reclassified from AOCI to earnings in the first and second quarters of 2012. The remainder of the change in the deferred losses in AOCI is primarily attributable to the fluctuation of the U.S. dollar against the Mexican peso during each of the first two quarters of 2012.

Changes in Level 3 recurring fair value measurements —

	Three Months Ended		Six Months Ended	
	June 30, 2012	2011	June 30, 2012	2011
Notes receivable				

Beginning of period	\$119	\$106	\$116	\$103
Accretion of value (interest income)	3	3	7	6
Other			(1)	
End of period	\$122	\$109	\$122	\$109

Substantially all of the notes receivable balance consists of a callable note, due 2019, obtained in connection with a divestiture in 2004. The fair value of the note is derived using a discounted cash flow technique and capped at the callable value. The discount rate used in the calculation is the current yield of the publically traded debt of the operating subsidiary of the obligor, adjusted by a 250 basis point risk premium. The significant unobservable input used to fair value the note is the risk premium. A significant increase in the risk premium may result in a lower fair value measurement. A significant decrease in the risk premium would not result in a significantly higher fair value measurement due to the callable value cap.

Fair value measurements on a nonrecurring basis — In addition to items that are measured at fair value on a recurring basis, we also have long-lived assets that may be measured at fair value on a nonrecurring basis. These assets include intangible assets and property, plant and equipment which may be written down to fair value as a result of impairment.

Note 12. Commitments and Contingencies

Asbestos personal injury liabilities — We had approximately 25,000 active pending asbestos personal injury liability claims at June 30, 2012, down slightly from the 26,000 claims at December 31, 2011. In addition, approximately 1,000 mostly inactive claims have been settled and are awaiting final documentation and dismissal, with or without payment. We have accrued \$83 for indemnity and defense costs for settled, pending and future claims at June 30, 2012, compared to \$89 at December 31, 2011. We use a fifteen-year time horizon for our estimate of this liability.

At June 30, 2012, we had recorded \$52 as an asset for probable recovery from our insurers for the pending and projected asbestos personal injury liability claims, compared to \$53 recorded at December 31, 2011. The recorded asset represents our assessment of the capacity of our current insurance agreements to provide for the payment of anticipated defense and indemnity costs for pending claims and projected future demands. The recognition of these recoveries is based on our assessment of our right to recover under the respective contracts and on the financial strength of the insurers. We have coverage agreements in place with our insurers confirming substantially all of the related coverage and payments are being received on a timely basis. The financial strength of these insurers is reviewed at least annually with the assistance of a third party. The recorded asset does not represent the limits of our insurance coverage, but rather the amount we would expect to recover if we paid the accrued indemnity and defense costs.

During the second quarter of 2011, we reached an agreement with an insurer to settle a long-standing claim pending in the liquidation proceedings of the insurer and recorded the estimated fair value of the recovery. As a result, other income includes a \$6 credit for this recovery of past outlays related to asbestos claims.

Other product liabilities — We had accrued \$1 for non-asbestos product liability costs at June 30, 2012 and December 31, 2011, with no recovery expected from third parties at either date. We estimate these liabilities based on assumptions about the value of the claims and about the likelihood of recoveries against us derived from our historical experience and current information.

Environmental liabilities — Accrued environmental liabilities were \$12 at June 30, 2012 and \$13 at December 31, 2011. We consider the most probable method of remediation, current laws and regulations and existing technology in determining the fair value of our environmental liabilities. Other accounts receivable included a related recoverable from an insurer of \$2 at both dates.

Bankruptcy claims resolution — Dana and forty of its wholly-owned subsidiaries (collectively, the Debtors) reorganized under Chapter 11 of the U.S. Bankruptcy Code (Chapter 11) from March 3, 2006 until emergence on January 31, 2008 (the Effective Date). On the Effective Date, we consummated the Third Amended Joint Plan of Reorganization of Debtors and Debtors in Possession as modified (the Plan) and emerged from Chapter 11. The last of the common shares reserved for holders of allowed unsecured nonpriority claims were distributed during the third quarter of 2011. On February 16, 2012, a final decree was issued and the bankruptcy case was closed.

Other legal matters — We are subject to various pending or threatened legal proceedings arising out of the normal course of business or operations. In view of the inherent difficulty of predicting the outcome of such matters, we cannot state what the eventual outcome of these matters will be. However, based on current knowledge and after consultation with legal counsel, we believe that the liabilities that may result from these proceedings will not have a material adverse effect on our liquidity, financial condition or results of operations.

Note 13. Warranty Obligations

We record a liability for estimated warranty obligations at the dates our products are sold. We record the liability based on our estimate of costs to settle future claims. Adjustments are made as new information becomes available.

Changes in warranty liabilities —

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2012	2011	2012	2011
Balance, beginning of period	\$77	\$85	\$72	\$85
Amounts accrued for current period sales	6	15	15	25
Adjustments of prior accrual estimates	2		3	1
Settlements of warranty claims	(7)	(10)	(13)	(23)
Currency impact	(1)	2		4
Balance, end of period	\$77	\$92	\$77	\$92

We have been notified of an alleged quality issue at a foreign subsidiary of Dana that produced engine coolers for a unit of Sogefi SpA that were used in modules supplied to Volkswagen. Based on the information currently available to us, we do not believe that this matter will result in a material liability to Dana.

Note 14. Income Taxes

We estimate the effective tax rate expected to be applicable for the full fiscal year and use that rate to provide for income taxes in interim reporting periods. We also recognize the tax impact of certain unusual or infrequently occurring items, including changes in judgment about valuation allowances and effects of changes in tax laws or rates, in the interim period in which they occur.

We reported income tax expense of \$27 and \$31 for the quarters ended June 30, 2012 and 2011 and \$64 and \$62 for the respective six month periods. The income tax rate varies from the U.S. federal statutory rate of 35% due to valuation allowances in several countries, nondeductible expenses, different statutory tax rates outside the U.S. and withholding taxes related to repatriations of international earnings to the U.S.

We record interest and penalties related to uncertain tax positions as a component of income tax expense or benefit. Net interest expense for the periods presented herein is not significant.

We provide for U.S. federal income and non-U.S. withholding taxes on the earnings of our non-U.S. operations that are not considered to be permanently reinvested. We analyze and adjust the estimated tax impact of the income and

non-U.S. withholding liabilities based on the amount and source of these earnings. We recognized expense of \$2 and \$1 for the quarters ended June 30, 2012 and 2011 and \$4 and \$1 for the respective six month periods related to future income taxes and non-U.S. withholding taxes on repatriations from operations that are not permanently reinvested.

We have generally not recognized tax benefits on losses generated in several entities, including those in the U.S., where the recent history of operating losses does not allow us to satisfy the “more likely than not” criterion for the recognition of deferred tax assets. Consequently, there is no income tax expense or benefit recognized on the pre-tax income or losses in these jurisdictions as valuation allowances are adjusted to offset the associated tax effects. We believe that it is reasonably possible that valuation allowances of \$52 will be released in the next twelve months.

Note 15. Other Income (Expense), Net

	Three Months Ended		Six Months Ended	
	June 30, 2012	2011	June 30, 2012	2011
Interest income	\$5	\$6	\$11	\$13
Foreign exchange gain (loss)	(1)	1	(10)	(2)
Loss on extinguishment of debt				(53)
Strategic transaction expenses	(1)	(1)	(4)	(3)
Impairment of long-lived assets			(2)	
Other	5	14	10	17
Other income (expense), net	\$8	\$20	\$5	\$(28)

Foreign exchange gains and losses on cross-currency intercompany loan balances that are not considered permanently invested are reported above. Foreign exchange gains and losses on loans that are permanently invested are reported in OCI.

The loss on extinguishment of debt resulted from writing off the original issue discount and previously deferred financing fees in connection with refinancing our long-term debt and modifying our credit facilities in the first quarter of 2011.

As discussed in Note 12 above, a recovery finalized in the second quarter of 2011 of past outlays related to asbestos claims resulted in a \$6 credit to other income (expense), net.

Note 16. Segments

The components that management establishes for purposes of making decisions about an enterprise's operating matters are referred to as "operating segments." We manage our operations globally through five operating segments: two on-highway segments – LVD and Commercial Vehicle – Off-Highway, Power Technologies and Structures.

We report the results of our operating segments and related disclosures about each of our segments on the basis that is used internally for evaluating segment performance and deciding how to allocate resources to those segments. The primary measure of operating results is segment EBITDA. The most significant impact on our ongoing results of

operations as a result of applying fresh start accounting following our emergence from bankruptcy was higher depreciation and amortization. Management believes by using segment EBITDA, a performance measure which excludes depreciation and amortization, the comparability of results is enhanced. In addition, segment EBITDA is an important measure since the financial covenants in our debt agreements are based, in part, on EBITDA. Our segments are charged for corporate and other shared administrative costs.

Segment information —

Three Months Ended June 30,	2012			2011		
	External Sales	Inter- Segment Sales	Segment EBITDA	External Sales	Inter- Segment Sales	Segment EBITDA
LVD	\$735	\$ 44	\$ 76	\$654	\$ 53	\$ 60

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Dollars in millions)

Management's discussion and analysis of financial condition and results of operations should be read in conjunction with the financial statements and accompanying notes in this report.

Forward-Looking Information

Statements in this report (or otherwise made by us or on our behalf) that are not entirely historical constitute “forward-looking” statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are indicated by words such as “anticipates,” “expects,” “believes,” “intends,” “plans,” “estimates,” “projects,” “outlook” and similar expressions. These statements represent the present expectations of Dana Holding Corporation and its consolidated subsidiaries (Dana) based on our current information and assumptions. Forward-looking statements are inherently subject to risks and uncertainties. Our plans, actions and actual results could differ materially from our present expectations due to a number of factors, including those discussed below and elsewhere in this report and in our other filings with the Securities and Exchange Commission (SEC). All forward-looking statements speak only as of the date made and we undertake no obligation to publicly update or revise any forward-looking statement to reflect events or circumstances that may arise after the date of this report.

Management Overview

Dana is headquartered in Maumee, Ohio and was incorporated in Delaware in 2007. We are a global provider of high technology driveline, sealing and thermal-management products for virtually every major vehicle manufacturer in the on-highway and off-highway markets. Our driveline products – axles, driveshafts and transmissions – are delivered through the Light Vehicle Driveline (LVD) and Commercial Vehicle segments of our global On-Highway Driveline Technologies (On-Highway) business unit and through our Off-Highway Driveline Technologies (Off-Highway) business unit. Our third global business unit – Power Products Technologies (Power Technologies) – is the center of excellence for the sealing and thermal technologies that span all customers in our on-highway and off-highway markets. We have a diverse customer base and geographic footprint which minimizes our exposure to individual market and segment declines. At June 30, 2012, we employed approximately 25,500 people, operated in 26 countries and had 95 major manufacturing/distribution, engineering and office facilities around the world.

In the first half of 2012, 49% of our sales came from North American operations and 51% from operations throughout the rest of the world. Our On-Highway business accounted for 64% of our global sales, the Off-Highway business represented 21%, Power Technologies accounted for 14% and Structures was 1%.

Our internet address is www.dana.com. The inclusion of our website address in this report is an inactive textual reference only and is not intended to include or incorporate by reference the information on our website into this report.

Operational and Strategic Initiatives

During the past three years, we have significantly improved our financial condition — reducing debt, raising additional equity, improving the profitability of customer programs and eliminating structural costs. We have also strengthened our leadership team and streamlined our operating segments to focus on our core competencies of driveline technologies, sealing systems and thermal management. As a result, we believe that we are well-positioned to put increasing focus on profitable growth.

While we intend to continue aggressively reducing cost and streamlining our business operations, our future strategy includes several growth initiatives directed at strengthening the competitiveness of our products through innovation and technology, geographic expansion, aftermarket opportunities and selective acquisitions.

Strengthening the competitiveness of our products — We are committed to making investments and diversifying our product offerings to strengthen our competitive position in our core driveline, sealing and thermal technologies. We have prioritized our focus on innovation around these core technologies because of the opportunities to create value for our customers through improved fuel efficiency, emission control, electric and hybrid electric solutions, durability and cost of ownership.

Additional engineering and operational investment is being channeled into reinvigorating our product portfolio and capitalizing on technology advancement opportunities. In 2010, we combined the North American engineering centers of our LVD and Commercial Vehicle segments, allowing us the opportunity to better share technologies among these businesses. In 2011, commitments to new engineering facilities in India and China are more than doubling our engineering presence in the Asia Pacific region with state-of-the-art design and test capabilities that globally support each of our businesses.

Geographic expansion — Although there are growth opportunities in each region, we have a primary focus in the Asia Pacific region, especially India and China. In addition to new engineering facilities in India and China, during the second quarter of 2011 a new hypoid gear manufacturing facility in India began production and we completed two transactions – increasing the ownership interest in our China-based joint venture with Dongfeng Motor Co., Ltd. (Dongfeng) to 50% and acquiring the axle drive head and final assembly business from our Axles India Limited (AIL) joint venture – which significantly increased our commercial vehicle driveline presence in the region. We have experienced considerable success in the China off-highway and industrial markets and we believe there is considerable opportunity for future growth in these markets. During 2012, we opened a business development office in Moscow, Russia to focus on expanding our business opportunities in this region. In South America, our strategic agreement with SIFCO S.A. (SIFCO) completed in February 2011 makes us the leading full driveline supplier in the South American commercial vehicle market.

Aftermarket opportunities — We have established a global group dedicated to identifying and developing aftermarket growth opportunities that leverage the capabilities within our existing businesses — targeting increased future aftermarket revenues as a percent of consolidated sales.

Selective acquisitions — Our current acquisition focus is to identify “bolt-on” acquisition opportunities like the strategic agreement with SIFCO and the AIL acquisition completed in 2011 that have a strategic fit with our existing businesses, particularly opportunities that would support the other growth initiatives discussed above and enhance the value proposition of our customer product offerings. Any potential acquisition will be evaluated in the same manner we currently consider customer program opportunities — with a disciplined financial approach designed to ensure profitable growth.

Cost management — Although we have taken significant strides to improve our margins, particularly through streamlining and rationalizing our manufacturing activities and rationalizing our administrative support processes, additional opportunities remain. We have ramped up our material cost efforts to ensure that we are rationalizing our supply base and obtaining appropriate competitive pricing. Further, we are putting a major focus on reducing product complexity – something that not only improves our cost, but brings added value to our customers through more efficient assembly processes. With a continued emphasis on process improvements and productivity throughout the organization, we expect cost reductions to continue contributing to future margin improvement.

Acquisitions

SIFCO — In February 2011, we entered into an agreement with SIFCO, a leading producer of steer axles and forged components in South America. In return for a payment of \$150 to SIFCO, we acquired the distribution rights to SIFCO's commercial vehicle steer axle systems as well as an exclusive long-term supply agreement for key driveline components. Additionally, SIFCO will provide selected assets and assistance to Dana to establish assembly capabilities for these systems. We are now responsible for all customer relationships, including marketing, sales, engineering and assembly. The addition of truck and bus steer axles to our product offering in South America effectively positions us as the leading full-line supplier of commercial vehicle drivelines — including front and rear axles, driveshafts and suspension systems — in South America. This acquisition contributed \$390 to 2011 sales.

Dongfeng Dana Axle — In June 2011, we paid \$124 to increase our equity investment in Dongfeng Dana Axle Co., Ltd. (DDAC) from 4% to 50%. Our investment in DDAC is being accounted for on the equity method. DDAC is the primary supplier of truck axles to Dongfeng. DDAC offers a complete range of truck axles in the Chinese market, including drive, steer, tandem, and hub-reduction axles for light-, medium- and heavy-duty trucks, as well as buses.

Axles India — In June 2011, we acquired the axle drive head and final assembly business of our AIL equity affiliate for \$13. This business contributed \$14 to our 2011 sales.

Dana Rexroth Transmission Systems — In October 2011, we formed a 50/50 joint venture with Bosch Rexroth to develop and manufacture advanced powersplit drive transmissions for the off-highway market. We contributed \$8 to the venture and are accounting for our investment under the equity method.

Divestitures

Divestiture of Structural Products business — In 2010, we completed the sale of substantially all of the assets of our Structural Products business to Metalsa S.A. de C.V. (Metalsa), the largest vehicle frame and structures supplier in Mexico. We completed the sale in 2010 for a selling price of \$148. We received cash proceeds of \$118 during 2010 and \$16 in 2011. The remaining proceeds are held in escrow pending resolution of claims presented by Metalsa. The Structural Products business that we retained, which generated sales of \$48 in 2011, is expected to conclude operations in the third quarter of 2012.

Segments

We manage our operations globally through five operating segments. Our LVD, Power Technologies and Structures segments primarily support light vehicle original equipment manufacturers (OEMs) with products for light trucks, SUVs, CUVs, vans and passenger cars. As indicated above, the Structural Products business is expected to cease operations in the third quarter of 2012. The Commercial Vehicle and Off-Highway operating segments support the OEMs of on-highway commercial vehicles (primarily trucks and buses) and off-highway vehicles (primarily wheeled vehicles used in construction and agricultural applications).

Trends in Our Markets

Global Vehicle Production (Full Year)

(Units in thousands)	Dana 2012 Outlook	Actual	2011	2010
North America				
Light Vehicle (Total)	14,000 to 14,500	13,125		11,941
Light Truck (excl. CUV/Minivan)	3,500 to 3,700	3,625		3,520
Medium Truck (Classes 5-7)	170 to 180	167		116
Heavy Truck (Class 8)	270 to 280	255		152
Europe (including E. Europe)				
Light Vehicle	19,000 to 19,500	20,089		19,094
Medium/Heavy Truck	400 to 420	430		325
South America				
Light Vehicle	4,300 to 4,500	4,318		4,173
Medium/Heavy Truck	160 to 180	219		191
Asia-Pacific				
Light Vehicle	41,000 to 42,000	36,803		37,046

Off-Highway – Global (year-over-year)				
Agricultural Equipment	0 to +5%	+15 to +20%		+2 to +5%
Construction Equipment	+5 to +10%	+20 to +25%		+20 to +25%

North America

Light vehicle markets — Gradually improving economic conditions during the past two years and the first half of 2012 have contributed to increased light vehicle sales and production levels in North America. First half 2012 production of around 7.9 million light vehicles is about 21% higher than first half 2011 production of 6.5 million vehicles. Second quarter 2012 light vehicle production levels were about 25% higher than the comparable 2011 period. The higher production occurred predominantly in the passenger car and crossover SUV segments. In the light truck pickup, van and SUV segment where more of our programs are focused, as anticipated, production in both the second quarter and first half of 2012 increased a more modest 4% from production levels in the comparable 2011 periods. The higher 2012 production levels are generally reflective of higher light vehicle unit sales which are about 14% higher in the first half of 2012 than last year's first half. The light truck pickup, van and SUV segment posted higher sales of only 7% over the same period. U.S. days supply of total light vehicles at the end of June 2012 were around 59, which is up from 51 days at December 31, 2011 and 54 days at June 30, 2011. The increase in inventory levels from the end of 2011 is driven by activity in the light truck pickup, van and SUV segment. Inventory levels in this segment increased to around 86 days at the end of June 2012, which is comparable to a year ago, but up considerably from 56 days at the end of 2011. Although first half 2012 sales in this segment declined about 6% from sales in the second half of 2011, vehicle production was up about 8% - contributing to the increased inventory levels.

Mixed news on the economic front continues to create an element of uncertainty over near-term vehicle sales and production. Fuel prices in recent months have remained relatively stable, as has unemployment data. An improved financing environment and signs that the housing sector may have bottomed out are also positive developments. Nevertheless, continued concern in these areas, and adverse economic developments in other parts of the world, contributed to declining levels of consumer confidence in recent months. As such, the current economic environment continues to pose some risk and uncertainty to the sustainability of near-term vehicle production levels. On balance, we are still expecting a modest level of economic strengthening in North America in 2012. Our outlook for full year light vehicle production is unchanged from our April 2012 guidance - with total light vehicle production up about 7 to 10% over 2011 and light truck pickup, van and SUV segment production expected to be comparable with 2011.

Medium/heavy vehicle markets — As with the light vehicle market, medium/heavy truck production has steadily increased over the past two years and into the first half of 2012. Heavy-duty Class 8 truck production of about 75,000 units in this year's second quarter and about 150,000 for the first half of this year is up about 24% and 37% from the same periods of 2011. In the medium-duty Classes 5-7 segment, year-over-year second quarter production was about the same, with first half 2012 production about 11% higher than last year.

With the mixed and uncertain outlook surrounding the global economy, order levels for Class 8 trucks have weakened in recent months causing the near-term outlook for production levels to be down from our previous expectations. We've reduced the range on our full year Class 8 production outlook for 2012 to 270,000 to 280,000 units from our April outlook of 280,000 to 290,000 units. As revised, this market is now expected to be up about 6 to 10% from last year. Our full year outlook for medium-duty Classes 5-7 production is unchanged from April and expected to come in around 170,000 to 180,000 units, an increase of 2 to 8%.

Markets Outside of North America

Light vehicle markets — Europe production levels were tempered in 2011 by softness brought on in part by sovereign debt concerns. A challenging economic environment continues to pose considerable uncertainty. First half 2012 production of light vehicles in Europe was down about 6% from the corresponding period of 2011. We expect the tough economic environment to continue during the second half of 2012, resulting in full year production levels being down from 2011. After increasing the past two years, South American production levels have weakened in 2012, with vehicle production for the first half of 2012 being down about 6% from last year's first half. At present, we expect production levels to improve a bit during the second half of 2012, putting production for the year at a level comparable to that of 2011. Asia Pacific production levels in 2011 were adversely impacted by the effects of natural disasters in Japan and Thailand. Production levels began rebounding in late 2011 and have continued to improve in 2012, with first half 2012 production up about 15% from the first half of last year. We expect year-over-year production to continue rebounding throughout 2012 with full year production coming in around 11 to 14% higher than 2011.

Medium/heavy vehicle markets — Some of the same factors referenced above that affected light vehicle markets outside of North America similarly affected the medium/heavy markets. After being up more than 30% in 2011, following a production increase of about 59% the previous year, Europe medium/heavy truck production in this year's first half is down about 6% from the first half of 2011 – in line with our outlook for the full year. South American production also increased significantly the past two years, up about 15% in 2011 and 45% in 2010. The combination of a pull back in purchases caused by engine emissions changes in Brazil and some overall economic weakness has caused 2012 production levels to decline significantly, with second quarter and first half production being down more than 30% from those same periods in 2011. The second half production rebound that we expected earlier this year has moderated. As such, we've reduced our full year production outlook in South America to levels which are now expected to be down 18 to 27% from 2011 as compared to our April outlook which expected production levels that were 2 to 6% lower than 2011. Asia Pacific production in 2011 declined about 8% as a consequence of the natural disasters disrupting 2011 production, after being up more than 50% the previous year. Like the light vehicle markets in this region, production in 2012 has begun rebounding with this year's first half being up about 9% from the second half of last year. Compared to last year's first half which was relatively strong until the tsunami in Japan, 2012 production is down about 10%. The effects of overall weaker global economic conditions are also impacting this region, and we now see this continuing into the second half. Consequently, we've lowered our full year Asia Pacific production expectations from our April outlook to levels reflecting a 2 to 8% decline from 2011.

Off-Highway Markets

Our off-highway business has a large presence outside of North America, with about 70% of its sales coming from Europe and 10% from South America and Asia Pacific combined. We serve several segments of the diverse off-highway market, including construction, agriculture, mining and material handling. Our largest markets are the European and North American construction and agricultural equipment segments — both of which experienced increased demand in 2010 and 2011. Our outlook for these markets for 2012 has demand levels ranging from flat to an increase of 5% in the agriculture segment and an increase of 5 to 10% in the construction segment, which is unchanged from our April outlook.

Sales, Earnings and Cash Flow Outlook

	2012	2011	2010
	Outlook		
Sales	\$7,475 – \$7,575	\$7,592	\$6,109
Adjusted EBITDA *	\$820 – \$840	\$765	\$553
Free Cash Flow **	> \$200***	\$174	\$242

Adjusted EBITDA is a non-GAAP financial measure discussed under Segment EBITDA within the Segment Results of Operations discussion below. See Item 7 of our 2011 Form 10-K for a reconciliation of 2011 and 2010 adjusted EBITDA to net income.

Free cash flow is a non-GAAP financial measure, which we have defined as cash provided by operating activities excluding any bankruptcy claim related payments, less purchases of property, plant and equipment. We believe this measure is useful to investors in evaluating the operational cash flow of the company inclusive of the spending required to maintain the operations. Free cash flow is neither intended to represent nor be an alternative to the measure of net cash provided by operating activities reported under GAAP. Free cash flow may not be comparable to similarly titled measures reported by other companies. See Item 7 of our 2011 Form 10-K for a reconciliation of 2011 and 2010 free cash flow to net cash flows provided by operating activities.

***Exclusive of a special one-time \$150 U.S. pension contribution.

During the past three years, significant focus was placed on right sizing and rationalizing our manufacturing operations, implementing other cost reduction initiatives and ensuring that customer programs were competitively priced. These efforts, along with stronger sales volumes, were the primary drivers of our improved profitability. With our financial position substantially improved, in 2011 we began directing increased attention to the growth initiatives described in the Operational and Strategic Initiatives section above. In this regard, certain acquisitions also contributed to the sales growth we achieved in 2011.

Our full year outlook for 2012 now has sales down slightly or comparable to 2011, which is reduced from our April 2012 outlook which had sales at \$7,800+, up more than 5% from 2011. The reduced outlook is driven in part by expected currency translation effects of weaker international exchange rates in certain of our major markets. Additionally, we've scaled back expected second half 2012 medium/heavy truck production levels in most of our markets, and now expect a third quarter divestiture of the leisure industry component of our off-highway segment. With the reduced sales, our Adjusted EBITDA for the year is now expected to be in the range of \$820 to \$840. However, we expect to maintain Adjusted EBITDA margins at around 11% as we respond quickly to the changing market conditions and benefit from restructuring, cost reduction and pricing actions.

Our cash flow in recent years benefited primarily from increased earnings and lower capital spending, more than offsetting the higher working capital requirements associated with increased sales. With the lower sales levels, we've scaled back our capital spend expectation, and, as such, our full year free cash flow of more than \$200 (before a January 2012 \$150 incremental one-time U.S. pension contribution) is unchanged from our April 2012 outlook. Our current capital spend outlook of \$210 to \$230 is up from capital spending of \$196 in 2011. Increased cash requirements for interest, taxes and pension fund contributions in 2012 are also expected to consume some of the increased free cash flow attributable to higher profits.

Consolidated Results of Operations**Summary Consolidated Results of Operations (Second Quarter, 2012 versus 2011)**

	Three Months Ended		Increase/ (Decrease)
	June 30, 2012	2011	
Net sales	\$1,949	\$1,933	\$ 16
Cost of sales	1,674	1,700	(26)
Gross margin	275	233	42
Selling, general and administrative expenses	110	107	3
Amortization of intangibles	19	21	(2)
Restructuring charges, net	20	11	9
Other income, net	8	20	(12)
Income before interest and income taxes	\$134	\$114	\$ 20
Net income attributable to the parent company	\$86	\$68	\$ 18

Sales — The following table shows changes in our sales by geographic region.

	Three Months Ended		Increase/ (Decrease)	Amount of Change Due To		
	June 30, 2012	2011		Currency Effects	Acquisitions and Divestitures	Organic Change
North America	\$ 958	\$ 835	\$ 123	\$ (7)	\$ -	\$ 130
Europe	550	558	(8)	(70)		62
South America	225	355	(130)	(33)		(97)
Asia Pacific	216	185	31	(12)	8	35
Total	\$ 1,949	\$ 1,933	\$ 16	\$ (122)	\$ 8	\$ 130

Sales for the second quarter of 2012 increased less than 1% compared to 2011. Organic growth — the change in sales attributable primarily to market volume, pricing and mix — generated higher sales of \$130, an increase of 7% over 2011. However, this was largely offset by overall weakening of several international currencies against the U.S. dollar which reduced sales by \$122.

The increase in sales in North America during 2012, adjusted for the effects of currency totaled \$130 — a 16% increase on 2011 sales. The growth was largely due to increased OEM production levels in the light vehicle and medium/heavy truck markets. Light vehicle production levels were 25% higher in the second quarter of 2012 while medium/heavy

truck market production was up about 15%. In the off-highway sector, sales increased 15%, primarily due to stronger 2012 demand levels.

Second quarter sales in Europe were negatively impacted by \$70 from a weaker euro and other currencies as compared to the same period of 2011. Excluding currency effects, our second quarter 2012 sales in Europe were 11% higher than in 2011. A significant portion of our business in Europe is in the off-highway markets where strong demand levels increased sales volumes by around 14%. Our other businesses in Europe experienced a net organic increase of about 8% as new programs and favorable customer mix more than offset the effects of lower light vehicle and medium/heavy vehicle production levels.

In South America, sales have been adversely impacted by the change over in emissions regulations in Brazil which has resulted in significantly lower 2012 production levels. In combination with other economic pressures in South America, this has contributed to lower organic sales of \$97, a decline of 27% from 2011. The organic sales growth of 19% in Asia Pacific is reflective primarily of the improving production levels in the region along with increased sales from new customer programs coming on stream in 2012.

Cost of sales and gross margin — Cost of sales was 85.9% of sales in 2012 versus 87.9% of sales in 2011. Higher overall production levels contributed to improved absorption of fixed costs, while manufacturing costs continue to benefit from completion of certain restructuring initiatives and continued cost reduction efforts. Higher material commodity prices increased costs in 2012; however, this increase was more than offset by material cost recovery from customers and other material cost savings actions. Higher sales levels, material cost recovery and other pricing actions and material cost savings actions combined to improve gross margin to \$275 (14.1% of sales) in 2012 from \$233 (12.1% of sales) in 2011.

Selling, general and administrative expenses (SG&A) — SG&A expenses in 2012 were \$110 (5.6% of sales) as compared to \$107 (5.5% of sales) in 2011. Contributing to the higher cost were inflationary compensation increases and costs to support certain of our growth initiatives.

Restructuring charges — Restructuring charges of \$20 in 2012 included a charge of \$11 to recognize the estimated fair value of the remaining lease obligation associated with our Kalamazoo, Michigan facility which we ceased using in June. We also recognized a cost of \$5 in connection with workforce reduction actions in Brazil. The remaining expenses in 2012 relate principally to previously initiated actions to further consolidate our manufacturing facilities and reduce administrative workforce levels. The restructuring costs in 2011 included pension settlement costs of \$4 associated with certain previously closed Canadian operations along with separation costs and exit costs relating to workforce reduction actions and facility closures.

Other income, net — Other income, net was \$8 in 2012 and \$20 in 2011. Interest income was \$5 in 2012 and \$6 in 2011. An asbestos-related recovery of \$6 from an insurance company going through liquidation proceedings provided additional income in the second quarter of 2011.

Interest expense — Interest expense was \$20 for 2012 and 2011. Average effective interest rates, inclusive of amortization of debt issuance costs, approximated 8.0% in the second quarter of 2012 and 2011.

Income tax expense — Income tax expense was \$27 and \$31 for the second quarters of 2012 and 2011. The effective income tax rates vary from the U.S. federal statutory rate of 35% primarily due to the effects of, and adjustments to, valuation allowances in several countries (including the U.S.), nondeductible expenses, different statutory rates outside the U.S. and withholding taxes as discussed in Note 14 to the consolidated financial statements in Item 1 of Part I.

In the U.S. and certain other countries, our recent history of operating losses does not allow us to satisfy the “more likely than not” criterion for recognition of deferred tax assets. Therefore, there is generally no income tax recognized on the pre-tax income or losses in these jurisdictions as valuation allowance adjustments offset the associated tax

effects.

Equity in earnings of affiliates — Equity investments provided net earnings of \$2 and \$7 in 2012 and 2011. During the second quarter of 2011, our equity interests in certain Getrag investments contributed \$3. These interests were sold in September 2011.

30

Summary Consolidated Results of Operations (Year-to-Date, 2012 versus 2011)

	Six Months Ended		
	June 30, 2012	2011	Increase/ (Decrease)
Net sales	\$3,926	\$3,733	\$ 193
Cost of sales	3,383	3,285	98
Gross margin	543	448	95
Selling, general and administrative expenses	223	206	17
Amortization of intangibles	38	38	
Restructuring charges, net	26	41	(15)
Other income (expense), net	5	(28)	33
Income before interest and income taxes	\$261	\$135	\$ 126
Net income attributable to the parent company	\$156	\$38	\$ 118

Sales — The following table shows changes in our sales by geographic region.

	Six Months Ended		Increase/ (Decrease)	Amount of Change Due To		
	June 30, 2012	2011		Currency Effects	Acquisitions and Divestitures	Organic Change
North America	\$ 1,935	\$ 1,642	\$ 293	\$ (10)	\$ -	\$ 303
Europe	1,102	1,082	20	(94)		114
South America	449	631	(182)	(42)	11	(151)
Asia Pacific	440	378	62	(15)	18	59
Total	\$ 3,926	\$ 3,733	\$ 193	\$ (161)	\$ 29	\$ 325

Sales increased 5% in the first half of 2012 as compared to the same period in 2011. The overall weakening of several international currencies against the U.S. dollar reduced sales by \$161, while the impact of acquisitions added \$29. The organic growth — the change in sales attributable primarily to market volume, pricing and mix — represents an increase of 9% over our 2011 sales.

The increase in sales in North America during 2012, adjusted for the effects of currency, totaled \$303 — an 18% increase on 2011 sales. The growth was largely due to increased OEM production levels in the light vehicle and medium/heavy truck markets. Light vehicle production levels were 21% higher in the first half of 2012 while medium/heavy truck market production was up nearly 25%. In the off-highway sector, sales increased 18%, primarily due to stronger 2012 demand levels.

Excluding currency effects, our first half 2012 sales in Europe were 11% higher than in 2011. A significant portion of our business in Europe is in the off-highway markets where strong demand levels increased sales volumes by around 16%. Our other businesses in Europe experienced a net organic increase of about 5% as new programs and favorable customer mix more than offset the effects of lower light vehicle and medium/heavy vehicle production levels.

In South America, sales benefited by \$11 from the strategic agreement with SIFCO completed in February 2011. Exclusive of this and currency effects, 2012 first half sales in South America were down 24% versus 2011, primarily as a result of medium/heavy vehicle production levels being down more than 30% and light vehicle production being 6% lower. The AIL acquisition in the second quarter of 2011 contributed \$18 of the Asia Pacific sales increase. The organic sales growth of 16% in Asia Pacific is reflective primarily of the improving production levels in the region as compared to the first half of 2011 along with increased sales from new customer programs.

Cost of sales and gross margin — Cost of sales was 86.2% of sales in 2012 versus 88.0% of sales in 2011. Higher production levels contributed to improved absorption of fixed costs, while manufacturing costs continue to benefit from completion of certain restructuring initiatives and continued cost reduction efforts. Higher material commodity prices increased costs in 2012; however, this increase was more than offset by material cost recovery from customers and other material cost savings actions. Higher sales levels, material cost recovery and other pricing actions and material cost savings actions combined to improve gross margin to \$543 (13.8% of sales) in 2012 from \$448 (12.0% of sales) in 2011.

Selling, general and administrative expenses (SG&A) — SG&A expenses in 2012 were \$223 (5.7% of sales) as compared to \$206 (5.5% of sales) in 2011. Contributing to the higher cost were inflationary increases in compensation and other benefits costs along with increased expenses to support certain of our growth initiatives.

Restructuring charges — Restructuring charges in both 2012 and 2011 were primarily employee separation costs and exit costs associated with workforce reduction actions and facility closures. In the second quarter of 2012, we ceased use of our Kalamazoo, Michigan facility and recognized a charge of \$11 to accrue the estimated fair value of the remaining lease obligation. In the first quarter of 2011, we entered into an agreement to settle the lease obligation associated with our Yennora, Australia facility. The cost associated with this settlement approximated \$20.

Other income (expense), net — Other income (expense), net was income of \$5 in 2012 and expense of \$28 in 2011. Our 2011 results included a charge of \$53 for the write-off of unamortized original issue discount and deferred financing costs primarily in connection with the repayment of our then existing Term Facility debt. Other income in 2012 included net foreign exchange losses of \$10 and interest income of \$11, while in 2011 net foreign exchange losses were \$2 and interest income was \$13. Also included in 2011 was \$6 from settlement of an asbestos-related claim with an insurance company in liquidation proceedings.

Interest expense — Interest expense was \$41 for 2012 and \$39 for 2011. The higher interest expense in 2012 is primarily due to higher average debt levels and a higher average effective interest rate on outstanding debt. Average effective interest rates, inclusive of amortization of debt issuance costs, approximated 8.2% in the first half of 2012 as compared to 8.0% in the same period in 2011.

Income tax expense — Income tax expense was \$64 and \$62 for first half of 2012 and 2011. The effective income tax rate varies from the U.S. federal statutory rate of 35% primarily due to the effects of, and adjustments to, valuation allowances in several countries (including the U.S.), nondeductible expenses, different statutory rates outside the U.S. and withholding taxes as discussed in Note 14 to the consolidated financial statements in Item 1 of Part I.

In the U.S. and certain other countries, our recent history of operating losses does not allow us to satisfy the “more likely than not” criterion for recognition of deferred tax assets. Therefore, there is generally no income tax recognized on the pre-tax income or losses in these jurisdictions as valuation allowance adjustments offset the associated tax effects.

Equity in earnings of affiliates — Equity investments provided net earnings of \$6 and \$11 in 2012 and 2011. During June 2011, we increased our investment in DDAC to 50%, qualifying it as an equity investment. Our equity interest in DDAC provided equity earnings of \$1 in 2012. Certain equity interests in Getrag investments that contributed \$5 of earnings in 2011 were sold in September 2011.

Segment Results of Operations*Segment Sales*

Three Months Ended June 30,	2012	2011	Increase/ (Decrease)	Amount of Change Due To		
				Currency Effects	Acquisitions and Divestitures	Organic Change

Off-Highway Structures	426	414	12	(42)		54
Total	\$1,949	\$1,933	\$ 16	\$ (122)	\$ 8	\$ 130

Six Months Ended June 30,						
LVD	\$1,462	\$1,327	\$ 135	\$ (32)	\$ -	\$ 167
Power Technologies	530	536	(6)	(21)		15
Commercial Vehicle	1,064	1,058	6	(53)	29	30
Off-Highway Structures	844	787	57	(55)		112
Eliminations and other		1	(1)			(1)
Total	\$3,926	\$3,733	\$ 193	\$ (161)	\$ 29	\$ 325

Our LVD segment serves the light vehicle market. Exclusive of currency effects, LVD sales for the second quarter and first half of 2012 were 16% and 13% higher than in the same periods in 2011. The higher sales were due primarily to increased light vehicle production levels, with certain vehicle platforms in North America providing significantly higher volumes.

Power Technologies serves each of our markets – light vehicle, medium/heavy truck, and off-highway. Second quarter and first half 2012 increases, exclusive of currency effects, was 3%. The organic increase in this segment was adversely impacted by lower medium/heavy truck production levels and by this segment's European market component.

After adjusting for the effects of currency movements, second quarter 2012 sales in our Commercial Vehicle segment were down about 7% from 2011, with sales for the first six months of 2012 up 3% compared to 2011. Our significant medium/heavy truck presence in South America has been adversely impacted by emission changeover regulations in Brazil. Along with other factors, this contributed to lower comparative second quarter production in South America of

more than 30%. In combination with lower production levels in Europe as well, this more than offset higher production levels in North America. For the comparative six-month periods ended June 30, higher North American medium/heavy truck production levels in 2012 more than offset lower production levels elsewhere in the world.

Second quarter and first half sales, net of currency effects, in our Off-Highway segment were up about 13% and 14% from 2011, principally due to stronger 2012 demand in the construction, agriculture and other segments of this market.

We completed the sale of a substantial portion of the Structural Products business in 2010. The continuing sales in 2012 and 2011 relate to the retained Longview, Texas operation where the existing customer program is scheduled to expire in the third quarter of 2012.

* See discussion of non-GAAP financial measures below.

Other includes loss on extinguishment of debt, strategic transaction expenses, stock compensation expense, loss on **sales of assets and foreign exchange costs and benefits. See Note 16 to the consolidated financial statements in Item 1 of Part I for additional details.

Non-GAAP financial measures — The table above refers to adjusted EBITDA, a non-GAAP financial measure which we have defined as earnings before interest, taxes, depreciation, amortization, non-cash equity grant expense, restructuring expense and other nonrecurring items (gain/loss on debt extinguishment or divestitures, impairment, etc.). The most significant impact on Dana's ongoing results of operations as a result of applying fresh start accounting following our emergence from bankruptcy was higher depreciation and amortization. By using adjusted EBITDA, a performance measure which excludes depreciation and amortization, the comparability of results is enhanced. Management also believes that adjusted EBITDA is an important measure since the financial covenants in our debt agreements are based, in part, on adjusted EBITDA. Adjusted EBITDA should not be considered a substitute for income (loss) before income taxes, net income (loss) or other results reported in accordance with GAAP. Adjusted EBITDA may not be comparable to similarly titled measures reported by other companies.

LVD segment EBITDA of \$76 and \$139 in the second quarter and first six months of 2012 is up from \$60 and \$126 in the comparable periods of 2011. EBITDA margins of 10.3% of LVD sales during the second quarter of 2012 were higher than the 9.2% margin experienced in 2011, with six-month EBITDA as a percent of sales of 9.5% in 2012 and

2011. Higher sales volumes, the result of stronger market production levels, increased earnings by about \$16 during the second quarter and \$29 for the six month period ended June 30. Performance in the second quarter of 2012 as compared to the same period in 2011 was favorably impacted by material recovery and pricing adjustments which offset the effects of higher commodity and other costs. As compared to the first six months of 2011, higher commodity and other costs in this year's first six months exceeded the benefits from material recovery and other pricing actions.

In the Power Technologies segment, second quarter and first half 2012 EBITDA of \$37 and \$77 were the same as in 2011 – a return of around 14% of sales in all periods. A warranty charge of \$3 adversely impacted the second quarter of 2011. The benefit from higher current year sales volumes and lower warranty cost in this year's second quarter were offset by adverse currency effects. For the six months ended June 30, 2012, lower warranty cost and the benefit from stronger sales levels were offset by adverse currency effects and higher commodity costs.

Commercial Vehicle segment EBITDA for the second quarter and first six months of 2012 was \$57 and \$118, an increase of \$2 and \$20 over the comparable 2011 periods. Second-quarter EBITDA as a percent of sales in 2012 was 11.1% compared with 9.4% in 2011, while six-month segment EBITDA as a percent of sales in 2012 was 11.1%, up from 9.3% in 2011. Lower overall production volume compared to 2011 reduced this segment's profit in the second quarter by about \$6. Material cost recoveries and other pricing actions of about \$23 more than offset the comparative second quarter adverse effects from lower volume, lower aftermarket sales mix and increased commodity and other costs. For the comparative six-month periods ended June 30, overall stronger production levels in this segment's established markets added about \$4, with material cost recovery and pricing contributing about \$40. Partially offsetting these increases to EBITDA were higher material commodity and other costs.

In our Off-Highway segment, second-quarter 2012 EBITDA of \$56 was up \$5 from the second quarter of 2011, improving EBITDA as a percent of sales to 13.1% in 2012 from 12.3% in 2011. Segment EBITDA of \$105 for the first half of 2012 was up \$13 from 2011, resulting in six-month EBITDA margins of 12.4% in 2012 and 11.7% in 2011. Improving market conditions in this business drove stronger sales volume which increased 2012 segment EBITDA by about \$7 in the second quarter and by about \$19 in the first half, while pricing actions added \$4 and \$5. Partially offsetting these improvements in earnings were reductions associated with currency effects and increased costs.

In the Structures segment, the year-over-year six-month profit improvement is primarily attributable to reduced costs associated with retained pension obligations.

Liquidity

Term Facility and Revolving Facility — In January 2011, we completed an offering of senior unsecured notes (the Senior Notes) which generated net proceeds of \$733. These proceeds, together with available cash of \$127, were used to repay in full all amounts then outstanding under our Term Facility. The aggregate principal amount of the Senior Notes is \$750, with \$400 at a fixed interest rate of 6.50% maturing in 2019 and \$350 at a fixed rate of 6.75% maturing in 2021. In connection with this refinancing, we amended our Revolving Credit and Guaranty Agreement (the Revolving Facility) allowing for the issuance of the Senior Notes.

The Revolving Facility was amended in February 2011 (the New Revolving Facility), extending the maturity to five years and reducing the aggregate principal amount of the facility from \$650 to \$500. With the issuance of the Senior Notes and the New Revolving Facility, we have additional flexibility to make acquisitions and other investments, incur additional indebtedness and pay dividends and distributions as long as certain terms and conditions are met. The maintenance-based financial covenants in our prior agreements were replaced with incurrence-based financial covenants. With these actions, we have reduced our overall debt, secured fixed interest rates over the next seven to nine years and increased our financial flexibility by freeing up debt capacity for growth. See Note 10 to the consolidated financial statements in Item 1 of Part I for additional details.

During March 2011, we replaced our existing European receivables loan agreements and established a new five-year €75 (\$95 at the June 30, 2012 exchange rate) receivables backed credit facility. Availability under the program is subject to the existence of adequate levels of supporting accounts receivable.

Covenants — At June 30, 2012, we were in compliance with the debt covenants under our financing agreements.

Global liquidity — Our global liquidity at June 30, 2012 was as follows:

Cash and cash equivalents	\$881
Less: Deposits supporting obligations	(25)
Available cash	856
Additional cash availability from lines of credit in the U.S. and Europe	488
Marketable securities	60
Total global liquidity	\$1,404

A portion of the non-U.S. cash and cash equivalents is utilized for working capital and other operating purposes. Several countries have local regulatory requirements that significantly restrict the ability of our operations to repatriate this cash. Beyond these restrictions, there are practical limitations on repatriation of cash from certain countries because of the resulting tax withholdings.

Marketable securities are included as a component of global liquidity as these investments can be readily liquidated at our discretion.

The components of our June 30, 2012 consolidated cash balance were as follows:

	U.S.	Non-U.S.	Total
Cash and cash equivalents	\$207	\$ 565	\$772
Cash and cash equivalents held as deposits	2	23	25
Cash and cash equivalents held at less than wholly-owned subsidiaries		84	84
Consolidated cash balance	\$209	\$ 672	\$881

Cash deposits are maintained to provide credit enhancement for certain agreements and are reported as part of cash and cash equivalents. For most of these deposits, the cash may be withdrawn if comparable security is provided in the form of letters of credit. Accordingly, these deposits are not considered to be restricted.

The principal sources of liquidity available for our future cash requirements are expected to be (i) cash flows from operations, (ii) cash and cash equivalents on hand, (iii) proceeds related to our trade receivable securitization and financing programs and (iv) borrowings from the New Revolving Facility. We believe that our overall liquidity and operating cash flow will be sufficient to meet our anticipated cash requirements for capital expenditures, working capital, debt obligations and other commitments during the next twelve months. While uncertainty surrounding the current economic environment could adversely impact our business, based on our current financial position, we believe it is unlikely that any such effects would preclude us from maintaining sufficient liquidity.

At June 30, 2012, there was \$95 of availability, but no borrowings, under our European trade receivable securitization program based on the effective borrowing base. At June 30, 2012, we had no borrowings under the New Revolving Facility but we had utilized \$67 for letters of credit. Based on our borrowing base collateral, we had availability as of that date under the New Revolving Facility of \$393 after deducting the outstanding letters of credit. As a result, we had aggregate additional borrowing availability of \$488 under these credit facilities.

In January 2012, we made a one-time contribution of \$150 to the U.S. pension plans which we expect to be incremental to the estimated minimum required contributions for 2012. Through June 30, 2012, we had contributed an additional \$26 to the U.S. pension plans.

Cash Flow

	Six Months Ended June 30,	
	2012	2011
Cash used for changes in working capital	\$(139)	\$(172)
Other cash provided by operations	130	252
Net cash flows provided by (used in) operating activities	(9)	80
Net cash used in investing activities	(68)	(354)
Net cash provided by (used in) financing activities	36	(134)
Net decrease in cash and cash equivalents	\$(41)	\$(408)

Operating activities — The table above summarizes our consolidated statement of cash flows. Exclusive of working capital, other cash provided by operations was \$130 during the first half of 2012 compared with \$252 during 2011. The year-over-year decrease in other cash provided by operations is attributable primarily to a \$150 incremental, voluntary contribution that was made to our U.S. pension plans in January 2012. Excluding this one-time pension contribution, we would have had other cash provided by operations of \$280, with the increase over the first half of 2011 being due primarily to an increased level of operating earnings partially offset by an increased use of cash for payment of income taxes.

Working capital used cash of \$139 in the first half of 2012 and \$172 in 2011. Higher sales levels in the first half of 2012 as compared to 2011 resulted in increased levels of receivables and inventory. Cash of \$146 was used in 2012 to finance increased receivables and \$300 was used in the first half of 2011. We also used cash of \$97 and \$83 to fund higher inventory levels in the first half of 2012 and 2011. Partially offsetting the cash use for higher receivables and inventory in both the first half of 2012 and 2011 was cash provided by increases in accounts payable and other net liabilities of \$104 in 2012 and \$211 in 2011.

Investing activities — Expenditures for property, plant and equipment in the first half of 2012 and 2011 were \$71. In the first half of 2011, we paid \$150 to enter our strategic agreement with SIFCO, \$124 to increase our ownership in DDAC and \$13 to acquire the axle drive head and final assembly business of Axles India. The sale of the Structural Products business provided \$15 of additional proceeds in 2011 under the earn-out and other provisions of the sale agreement.

Financing activities — We used cash of \$867 in the first half of 2011 to refinance our term debt. In connection with the refinancing, we received proceeds from the issuance of new Senior Notes of \$750 and used \$25 for issuance costs associated with the term debt refinancing and restructuring of other financing arrangements. During the first half of 2012, we increased borrowings primarily in international locations experiencing historically favorable interest rates. Dividends of \$15 were paid to preferred stockholders in 2012 and 2011. Dividend payments to common stockholders

began in 2012 and total \$15 through June 30.

Contractual Obligations

Preferred dividends accrued but not paid were \$8 at both June 30, 2012 and December 31, 2011.

There have been no material changes at June 30, 2012 in our contractual obligations from those reported or estimated in the disclosures in Item 7 of our 2011 Form 10-K.

Contingencies

For a summary of litigation and other contingencies, see Note 12 to the consolidated financial statements in Item 1 of Part I. We believe that any liabilities beyond the amounts already accrued that may result from these contingencies will not have a material adverse effect on our liquidity, financial condition or results of operations.

Critical Accounting Estimates

The preparation of our consolidated financial statements in accordance with GAAP requires us to use estimates and make judgments and assumptions about future events that affect the reported amounts of assets, liabilities, revenue, expenses and the related disclosures. There have been no material changes in the application of our significant accounting policies or critical accounting estimates as discussed in Note 1 to the consolidated financial statements in Item 8 of our 2011 Form 10-K and Item 1 of Part I of this Form 10-Q.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

There have been no material changes to the market risk exposures related to changes in interest rates and commodity and foreign currency exchange risk as discussed in Item 7A of our 2011 Form 10-K.

Item 4. *Controls and Procedures*

Disclosure controls and procedures — We maintain disclosure controls and procedures that are designed to ensure that the information disclosed in the reports we file with the SEC under the Securities Exchange Act of 1934, as amended (Exchange Act), is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), as appropriate, to allow timely decisions regarding required disclosure.

Our management, with participation of our CEO and CFO, has evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Report on Form 10-Q. Our CEO and CFO have concluded that, as of the end of the period covered by this Report on Form 10-Q, our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) were effective.

Changes in internal control over financial reporting — There was no change in our internal control over financial reporting that occurred during our fiscal quarter ended June 30, 2012 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

CEO and CFO certifications — The Certifications of our CEO and CFO that are attached to this report as Exhibits 31.1 and 31.2 include information about our disclosure controls and procedures and internal control over financial reporting. These Certifications should be read in conjunction with the information contained in this Item 4 and in Item 9A of our 2011 Form 10-K for a more complete understanding of the matters covered by the Certifications.

PART II – OTHER INFORMATION

Item 1. *Legal Proceedings*

As discussed in Note 12 to the consolidated financial statements in Item 1 of Part I, we are a party to various pending judicial and administrative proceedings that arose in the ordinary course of business.

After reviewing the currently pending lawsuits and proceedings (including the probable outcomes, reasonably anticipated costs and expenses, availability and limits of our insurance coverage and our established reserves for uninsured liabilities), we believe that the liabilities that may result from these proceedings beyond the amounts already accrued are not reasonably likely to have a material adverse effect on our liquidity, financial condition or results of operations.

Item 1A. *Risk Factors*

There have been no material changes in our risk factors disclosed in Item 1A of our 2011 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table presents information with respect to repurchases of common stock made by us during the quarter ended June 30, 2012. These shares were delivered to us by employees as payment for withholding taxes due upon the distribution of stock awards.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
4/1/12 - 4/30/12	64,578	\$ 14.49	-	-
5/1/12 - 5/31/12	202	\$ 14.36	-	-
6/1/12 - 6/30/12	8	\$ 14.13	-	-

Item 6. Exhibits

The Exhibits listed in the “Exhibit Index” are filed or furnished with this report.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, hereunto duly authorized.
