For example, holding companies in Hong Kong that are also tax residents in Hong Kong (which should have commercial substance and proceed the formal treaty benefit application with in-charge tax bureau) are eligible for a 5% withholding tax on dividends under the Tax Memorandum between China and the Hong Kong Special Administrative Region.

A batch of production equipment of the Group was sold and leased back under the financing arrangement. As the repurchase prices are set at below US\$1.00, which are minimal compared to the expected fair value and the Group is certain that it will exercise the repurchase options, the above financing arrangements were accounted for as collateralized borrowings of the Group.

27. CONVERTIBLE BONDS**(i) Redemption of Zero Coupon Convertible Bonds**

The Company exercised its right to redeem the US\$200.0 million zero coupon convertible bonds due 2018, the US\$86.8 million zero coupon convertible bonds due 2018, the US\$95.0 million zero coupon convertible bonds due 2018 and the US\$22.2 million zero coupon convertible bonds due 2018 (the “Bonds”) on March 10, 2017 being the option redemption date when all of the Bonds would be redeemed in cash at 100% of the Bonds’ principal amount. Defined Benefit Plan

Trattamento di Fine Rapporto (“TFR”, termination payments) relates to the amounts that employees in Italy are entitled to receive when they leave the Group and is calculated based on the period of employment and the taxable earnings of each employee. Under certain conditions, the entitlement may be partially advanced to an employee during the employee’s working life.

The Group operates defined benefit pension plans in Italy under broadly similar regulatory frameworks, which is an unfunded plan where the Group meets the benefit payment obligation as it falls due. This plan is final salary pension plan, which provides benefits to members in the form of a guaranteed level of pension payable for life. The level of benefits provided depends on members’ length of service and their salary in the final years leading up to retirement. The TFR in payment are generally updated in line with the retail price index.

33. FAIR VALUE OF FINANCIAL INSTRUMENTS

The Group considers that the carrying amounts of financial assets and financial liabilities recognized in the condensed consolidated financial statements approximate their fair values.

Valuation techniques and assumptions applied for the purposes of measuring fair value

The fair values of financial assets and financial liabilities are determined as follows:

the fair value of financial instruments based on quoted market prices in active markets, valuation techniques that use observable market-based inputs or unobservable inputs that are corroborated by market data. Pricing information the Group obtains from third parties is internally validated for reasonableness prior to use in the condensed consolidated financial statements. When observable market prices are not readily available, the Group generally estimates the fair value using valuation techniques that rely on alternate market data or inputs that are generally less readily observable from objective sources and are estimated based on pertinent information available at the time of the applicable reporting periods. In certain cases, fair values are not subject to precise quantification or verification and may fluctuate as economic and market factors vary and the Group's evaluation of those factors changes.

Fair value measurements recognized in the consolidated statement of financial position

The following tables provide an analysis of financial instruments that are measured at fair value on a recurring basis subsequent to initial recognition, grouped into Levels 1 to 3 based on the degree to which the fair value is observable. There is no transfer within different levels of the fair value hierarchy in the period ended June 30, 2017.

Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active market for identical assets or liabilities;

Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);

Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Board of Directors (the "Board") of Semiconductor Manufacturing International Corporation (the "Company" or "SMIC") would like to announce the unaudited interim results of operations of the Company and its subsidiaries (hereinafter collectively referred to as the "Group") for the six months ended June 30, 2017, and would like to express its gratitude to the shareholders and its staff for their support for the Group.

SALES

Sales increased by 16.6% from US\$1,324.5 million for the six months ended June 30, 2016 to US\$1,544.3 million for the six months ended June 30, 2017, primarily due to an increase in wafer shipments during this period. The number of wafer shipments increased by 17.0% from 1,803,170 8-inch wafer equivalents for the six months ended June 30, 2016 to 2,109,919 8-inch wafer equivalents for the six months ended June 30, 2017.

COST OF SALES AND GROSS PROFIT

Cost of sales increased by 18.5% from US\$953.0 million for the six months ended June 30, 2016 to US\$1,129.3 million for the six months ended June 30, 2017, primarily due to an increase in wafer shipment during this period and lower fab utilization.

The Group had a gross profit of US\$415.0 million for the six months ended June 30, 2017 compared to a gross profit of US\$371.6 million for the six months ended June 30, 2016, representing an increase of 11.7%. Gross margin decreased to 26.9% for the six months ended June 30, 2017 from 28.1% for the six months ended June 30, 2016. The decrease in gross margin was primarily due to lower fab utilization.

PROFIT FOR THE PERIOD FROM OPERATIONS

Profit from operations decreased from US\$181.6 million for the six months ended June 30, 2016 to US\$99.0 million for the six months ended June 30, 2017 primarily due to an increase of advanced technology research and development activities in the first half of 2017.

Research and development expenses increased by 85.5% from US\$118.0 million for the six months ended June 30, 2016 to US\$219.0 million for the six months ended June 30, 2017. The increase was mainly due to the increase of advanced technology research and development activities.

General and administrative expenses increased by 53.5% from US\$61.0 million for the six months ended June 30, 2016 to US\$93.6 million for the six months ended June 30, 2017. The increase was primarily due to 1) the general and administrative expense of LFoundry S.r.l (“LFoundry”, our majority-owned subsidiary in Avezzano, Italy which was acquired in July 2016), 2) the start-up cost relating to our new project in Shenzhen, 3) an increase in expense arising from the share-based compensation payment transaction.

Sales and marketing expenses increased by US\$1.9 million from US\$17.9 million for the six months ended June 30, 2016 to US\$19.8 million for the six months ended June 30, 2017.

Other operating incomes were US\$16.4 million and US\$6.9 million for the six months ended June 30, 2017 and 2016, respectively. The increase was mainly due to the increase in government funding received in the first half of 2017.

As a result, the Group’s profit from operations decreased to US\$99.0 million for the six months ended June 30, 2017 from US\$181.6 million for the six months ended June 30, 2016.

PROFIT FOR THE PERIOD

FUNDING SOURCES FOR MATERIAL CAPITAL EXPENDITURE IN THE COMING YEAR

In 2017, the Group plans to spend approximately US\$2.3 billion in capital expenditures for foundry operations which are subject to adjustment based on market conditions. The capital expenditures are mainly for 1) the expansion of capacity in our majority-owned Beijing 300mm fab, Beijing 300mm fab and Shenzhen 200mm fab, 2) our new projects in Shanghai and Shenzhen, 3) a majority-owned joint venture company, which we expect will focus on research and development on 14nm FinFET technology, 4) enhancing our portfolio of comprehensive foundry solutions available to our customers, and 5) research and development equipment, mask shops and intellectual property acquisition.

In addition, the Group budgeted approximately US\$70 million in 2017 as capital expenditures for non-foundry operations. This is mainly for the construction of living quarters for employees as part of the Group's employee retention program.

The Group's actual expenditures may differ from its planned expenditures for a variety of reasons, including changes in its business plan, market conditions, equipment prices, or customer requirements. The Group will monitor the global economy, the semiconductor industry, the demands of its customers, and its cash flow from operations and will adjust its capital expenditures plans as necessary.

The primary sources of capital resources and liquidity include cash generated from operations, bank borrowings and debt or equity issuances and other forms of financing. Future acquisitions, mergers, strategic investments, or other developments also may require additional financing. The amount of capital required to meet the Group's growth and development targets is difficult to predict in the highly cyclical and rapidly changing semiconductor industry.

(“China IC Fund”) into the registered capital of Semiconductor Manufacturing North China (Beijing) Corporation (“SMNC”) in the first half of 2016.

On an annual basis, each independent non-executive Director confirms his/her independence to the Company, and the Company considers these Directors to be independent as such term is defined in the Hong Kong Stock Exchange Listing Rules. There are no relationships among members of the Board, including between the Chairman of the Board and the Chief Executive Officer.

The Board meets at least four times a year at approximately quarterly intervals and on such other occasions as may be required to discuss and vote upon significant issues affecting the Company. The schedule of Board meetings for a given year is planned in the preceding year. The joint company secretaries of the Company (the “Joint Company Secretaries”) assist the Chairman in preparing the agenda for the Board meetings and also assist the Board in complying with applicable laws, rules and regulations. The relevant papers for the Board meetings are dispatched to Board members in accordance with the CG Code. Directors may include matters for discussion in the agenda if the need arises. Upon the conclusion of the Board meeting, minutes are circulated to all Directors for their review and comments prior to their approval of the minutes at the following or subsequent Board meeting. Transactions in which any Directors are considered to have a conflict of interest which the Board has determined to be material are dealt with by physical Board meetings rather than written resolutions and the interested Directors are not counted in the quorum of such Board meetings and abstain from voting on the relevant matters.

All Directors have access to the Joint Company Secretaries, who are responsible for assisting the Board in complying with applicable procedures regarding compliance matters. Every Board member is entitled to have access to documents tabled at the Board meeting or filed into the Company's minutes book. Furthermore, the Board has established the procedures pursuant to which a Director, upon reasonable request, may seek independent professional advice at the Company's expense in order for such Director to discharge his/her duties. The Joint Company Secretaries continuously update all Directors on the latest development of the Hong Kong Stock Exchange Listing Rules and other applicable regulatory requirements to ensure the Company's compliance with and maintenance of good corporate governance practices. Each new Director is provided with training with respect to his/her responsibilities under the Hong Kong Stock Exchange Listing Rules and other regulatory requirements and the Company's corporate governance policies and practices.
