- PIK Payment-in-kind
- Includes hybrid securities with characteristics of
  - (a) both equity and debt that trade with and pay interest income.
  - (b) Includes preferred stocks and hybrid

- securities with characteristics of both equity and debt that pay dividends on a periodic basis.
- (H) Non-income producing - Issuer is in default.
  - (I) Non-income producing security.  
A portion of this security is on loan as of 1-31-16, and is a component of the fund's
  - (L) leverage under the Liquidity Agreement. The value of securities on loan amounted to \$31,548,353. Term loans are variable rate obligations. The coupon rate
  - (M) shown represents the rate at period end.  
Variable rate obligation. The coupon rate
  - (P) shown represents the rate at period end.  
Perpetual bonds have no stated maturity date.
  - (Q) Date shown as maturity date is next call date.
  - (S) These securities are exempt from registration under Rule

144A of the Securities Act of 1933. Such securities may be resold, normally to qualified institutional buyers, in transactions exempt from registration. Rule 144A securities amounted to \$72,782,596 or 42.7% of the fund's net assets as of 1-31-16. All or a portion of this security is pledged as collateral pursuant to the (Z) Liquidity Agreement. Total collateral value at 1-31-16 was \$110,357,650. At 1-31-16, the aggregate cost of investment securities for federal income tax purposes was \$262,797,435. Net unrealized depreciation aggregated \$5,030,422, of which \$6,598,426 related to appreciated investment securities and \$11,628,848 related to depreciated

investment  
securities.

The fund had the following country composition as a percentage of total investments on 1-31-16:

United States	87.7%
France	2.6%
United Kingdom	1.7%
Netherlands	1.6%
Luxembourg	1.4%
Other countries	5.0%
<b>Total</b>	<b>100.0%</b>

## Notes to Fund's investments (unaudited)

**Security valuation.** Investments are stated at value as of the close of regular trading on the New York Stock Exchange (NYSE), normally at 4:00 p.m., Eastern Time. In order to value the securities, the fund uses the following valuation techniques: Debt obligations are valued based on the evaluated prices provided by an independent pricing vendor or from broker-dealers. Independent pricing vendors utilize matrix pricing which takes into account factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data, as well as broker supplied prices. Equity securities held by the fund are valued at the last sale price or official closing price on the exchange or principal market where the security was acquired or most likely will be sold. In the event there were no sales during the day or closing prices are not available, the securities are valued using the last available bid price. Swaps and unlisted options are valued using evaluated prices obtained from an independent pricing vendor. Securities that trade only in the over-the-counter (OTC) market are valued using bid prices. Other portfolio securities and assets, for which reliable market quotations are not readily available, are valued at fair value as determined in good faith by the fund's Pricing Committee following procedures established by the Board of Trustees. The frequency with which these fair valuation procedures are used cannot be predicted and fair value of securities may differ significantly from the value that would have been used had a ready market for such securities existed.

The fund uses a three-tier hierarchy to prioritize the pricing assumptions, referred to as inputs, used in valuation techniques to measure fair value. Level 1 includes securities valued using quoted prices in active markets for identical securities. Level 2 includes securities valued using other significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these inputs are received from independent pricing vendors and brokers and are based on an evaluation of the inputs described. Level 3 includes securities valued using significant unobservable inputs when market prices are not readily available or reliable, including the fund's own assumptions in determining the fair value of investments. Factors used in determining value may include market or issuer specific events or trends, changes in interest rates and credit quality. The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Changes in valuation techniques and related inputs may result in transfers into or out of an assigned level within the disclosure hierarchy.

The following is a summary of the values by input classification of the fund's investments as of January 31, 2016, by major security category or type:

	<b>Total value at 1-31-16</b>	<b>Level 1 quoted price</b>	<b>Level 2 significant observable inputs</b>	<b>Level 3 significant unobservable inputs</b>
Corporate bonds	\$143,312,588		\$143,312,588	
Convertible bonds	205,000		205,000	
Term loans	902,958		902,958	
Capital preferred securities	3,335,736		3,335,736	
U.S. Government and Agency obligations	53,461,150		53,461,150

Common stocks	2,777,233	\$2,777,233		
Preferred securities	2,195,836	1,655,406	540,430	
Escrow certificates	123			\$123
Short-term investments	695,000		695,000	
<b>Total investments in securities</b>	<b>\$257,767,013</b>	<b>\$4,432,639</b>	<b>\$253,334,251</b>	<b>\$123</b>

**Other financial instruments:**

Interest rate swaps (\$365,314 ) (\$365,314 )

**Repurchase agreements.** The fund may enter into repurchase agreements. When the fund enters into a repurchase agreement, it receives collateral that is held in a segregated account by the fund's custodian. The collateral amount is marked-to-market and monitored on a daily basis to ensure that the collateral held is in an amount not less than the principal amount of the repurchase agreement plus any accrued interest. Collateral received by the fund for repurchase agreements is disclosed in the Fund's investments as part of the caption related to the repurchase agreement.

Repurchase agreements are typically governed by the terms and conditions of the Master Repurchase Agreement and/or Global Master Repurchase Agreement (collectively, MRA). Upon an event of default, the non-defaulting party may close out all transactions traded under the MRA and net amounts owed. Absent an event of default, assets and liabilities resulting from repurchase agreements are not offset. In the event of a default by the counterparty, realization of the collateral proceeds could be delayed, during which time the collateral value may decline or the counterparty may have insufficient assets to pay back claims resulting from close-out of the transactions.

**Stripped securities.** Stripped securities are financial instruments structured to separate principal and interest cash flows so that one class receives principal payments from the underlying assets (PO or principal only), while the other class receives the interest cash flows (IO or interest only). Both PO and IO investments represent an interest in the cash flows of an underlying stripped security. If the underlying assets experience greater than anticipated prepayments of principal, the fund may fail to fully recover its initial investment in an IO security. The market value of these securities can be extremely volatile in response to changes in interest rates or prepayments on the underlying securities. In addition, these securities present additional credit risk such that the fund may not receive all or part of its principal or interest payments because the borrower or issuer has defaulted on its obligation.

**Derivative instruments.** The fund may invest in derivatives in order to meet its investment objectives. Derivatives include a variety of different instruments that may be traded in the OTC market, on a regulated exchange or through a clearing facility. The risks in using derivatives vary depending upon the structure of the instruments, including the use of leverage, optionality, the liquidity or lack of liquidity of the contract, the creditworthiness of the counterparty or clearing organization and the volatility of the position. Some derivatives involve risks that are potentially greater than the risks associated with investing directly in the referenced securities or other referenced underlying instrument. Specifically, the fund is exposed to the risk that the counterparty to an OTC derivatives contract will be unable or unwilling to make timely settlement payments or otherwise honor its obligations. OTC derivatives transactions typically can only be closed out with the other party to the transaction.

**Interest rate swaps.** Interest rate swaps represent an agreement between the fund and a counterparty to exchange cash flows based on the difference between two interest rates applied to a notional amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other. The fund settles accrued net interest receivable or payable under the swap contracts at specified, future intervals. Swap agreements are privately negotiated in the OTC market or may be executed on a registered commodities exchange (centrally cleared swaps). Swaps are marked-to-market daily and the change in value is recorded as unrealized appreciation/depreciation of swap contracts. A termination payment by the counterparty or the fund is recorded as realized gain or loss, as well as the net periodic payments received or paid by the fund. The value of the swap will typically impose collateral posting obligations on the party that is considered out-of-the-money on the swap.

During the period ended January 31, 2016, the fund used interest rate swaps to manage against anticipated interest rate changes. The following table summarizes the interest rate swap contracts held as of January 31, 2016:

<b>Counterparty</b>	<b>USD notional amount</b>	<b>Payments made by fund</b>	<b>Payments received by fund</b>	<b>Maturity date</b>	<b>Market value</b>
Morgan Stanley Capital Services	\$22,000,000	Fixed 1.4425%	3 Month LIBOR (a)	Aug 2016	(\$227,417)
Morgan Stanley Capital Services	22,000,000	Fixed 1.0938%	3 Month LIBOR (a)	May 2017	(137,897 )
<b>Total</b>	<b>\$44,000,000</b>				<b>(\$365,314)</b>

(a) At 1-31-16, the 3-month LIBOR rate was 0.6156%

ITEM 2. CONTROLS AND PROCEDURES.

(a) Based upon their evaluation of the registrant's disclosure controls and procedures as conducted within 90 days of the filing date of this Form N-Q, the registrant's principal executive officer and principal accounting officer have concluded that those disclosure controls and procedures provide reasonable assurance that the material information required to be disclosed by the registrant on this report is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

(b) There were no changes in the registrant's internal control over financial reporting that occurred during the registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

ITEM 3. EXHIBITS.

Separate certifications for the registrant's principal executive officer and principal accounting officer, as required by Rule 30a-2(a) under the Investment Company Act of 1940, are attached.
