4. June 2, 2008 German Press Release - New Chief Financial Officer at SGL Carbon AG

SGL Group increases Graphite Electrode prices

Wiesbaden, May 13, 2008. The SGL Group - The Carbon Company - announces today the following price increase for its Graphite Electrodes effective immediately for all new business:

Europe:

- o Regular-size Graphite Electrodes: 5500 (euro)/MT
- o Extra-size Graphite Electrodes: 5800 (euro)/MT

Americas, Asia (excluding China*), Near Middle East and Africa:

- o Regular-size Graphite Electrodes: 3,89 US-\$/lb (8580US-\$/mt)
- o Extra-size Graphite Electrodes: 4,10 US-\$/lb (9050US-\$/mt)

Regular-sized is defined as: diameter 14" (350 mm) - 24" (600 mm)

Extra-sized is defined as: diameter 26" (650 mm) - 30" (750 mm)

These prices will be applicable for all new orders effective immediately until further notice and for shipments through December 31st, 2009.

This price increase is required due to the unprecedented cost increases for raw materials, especially needle coke, energy and freight for 2009 as well as SGL Group's commitment to invest in its Graphite Electrodes business.

* Pricing in China is the sole responsibility of the joint venture between the SGL Group and Tokai in Shanghai (STS).

About SGL Group - The Carbon Company

The SGL Group is one of the world's leading manufacturers of carbon-based products. It has a comprehensive portfolio ranging from carbon and graphite products to carbon fibers and composites. SGL Group's core competencies are its expertise in high-temperature technology as well as its applications and engineering know-how gained over many years. These competencies enable the Company to make full use of its broad material base. SGL Group's carbon-based materials combine several unique properties such as electrical and thermal conductivity, heat and corrosion resistance as well as high mechanical strength combined with low weight. Due to the paradigm shift in the use of materials as a result of the worldwide shortage of energy and raw materials, there is a growing demand for SGL Group's high-performance materials and products from an increasing number of industries. Carbon and graphite products are used whenever other materials such as steel, aluminum, copper, plastics, wood etc. fail due to their limited properties. Products from the SGL Group are used predominantly in the steel, aluminum, automotive, chemical and glass/ceramics industries. However, manufacturers in the semiconductor, battery, solar/wind energy, environmental protection, aerospace and defense industries as well as in the nuclear energy industry also figure among the Company's customers.

With 38 production sites in Europe, North America and Asia as well as a service network covering more than 100 countries, the SGL Group is a company with a global presence. In 2007, the Company's workforce of around 5,900 generated sales of (euro) 1.4 billion. The Company's head office is located in Wiesbaden/Germany.

Important note:

This press release contains statements on future developments that are based on currently available information and that involve risks and uncertainties that could lead to actual results deviating from these forward-looking statements. The statements on future developments are not to be understood as guarantees. The future developments and events are dependent on a number of factors, they include various risks and unanticipated circumstances and are based on assumptions that may not be correct. These risks and uncertainties include, for example, unforeseeable changes in political, economic and business conditions, particularly in the area of electrosteel production, the competitive situation, interest rate and currency developments, technological developments and other risks and unanticipated circumstances. We see other risks in price developments, unexpected developments relating to acquired and consolidated companies and in the ongoing cost optimization programs. SGL Group does not intend to update these forward-looking statements.

HITCO to Supply Composite Components to Alenia Aeronautica for BOEING 787
"Dreamliner" Program

Los Angeles / Wiesbaden, May 27, 2008. HITCO Carbon Composites, Inc., California/USA, a subsidiary of the SGL Group - The Carbon Company - announced today that it has signed a Long Term Agreement with Alenia Aeronautica, S.p.A., a Finmeccanica Company, to supply the Trailing Edge Components for the Boeing 787 Horizontal Stabilizer.

HITCO will begin delivering flight hardware in the second quarter of 2008. In addition, Alenia has selected HITCO to supply a range of other composite components for the B 787. These components will be delivered directly to Alenia as well as to other Alenia subcontractors. Boeing Commercial Airplanes contracted Alenia as a Tier I supplier to build the aft fuselage and other sections of the B 787 Dreamliner aircraft.

"HITCO was selected to produce the Trailing Edge components for the B 787 Horizontal Stabilizer because of its established performance as a Gold Supplier to Boeing - particularly the C 17 and B 767 programs and its approval to

Edgar Filing: SGL CARBON AKTIENGESELLSCHAFT - Form 6-K

Boeing's Process Specification 5578. The factors above along with HITCO's ongoing transformation to a state-of-the-art fully automated production facility utilizing lean manufacturing principles, are making our goal of becoming a Best in Class Tier II carbon composites supplier for the aircraft industry a reality," said Edward G. Carson, HITCO's Chief Operating Officer.

About HITCO Carbon Composites, Inc.

HITCO Carbon Composites, Inc. was founded in 1922 and manufactures advanced composite materials primarily for aerospace and defense applications. HITCO continues to be an innovative leader in the advancement of carbon composite technologies and continues to strategically focus within the SGL Group on new projects for aerospace/aircraft and defense applications.

About Alenia Aeronautica

Alenia Aeronautica, a Finmeccanica Company, is the largest Italian aeronautic player which operates world-wide in the commercial and military aviation, unmanned aerial vehicles and aerostructures. Alenia Aeronautica also coordinates the activities of Alenia Aermacchi and Alenia Aeronavali - wholly owned companies - respectively active in the design and manufacturing of military trainer aircraft and in the overhaul, maintenance and modification of military and civil aircraft.

SGL Group Announces Opening of the Central Technology & Innovation Center in Meitingen

Wiesbaden/Meitingen, May 28, 2008. SGL Group - The Carbon Company - inaugurates its new Technology & Innovation Center (T&I Center) in Meitingen today. With this new opening, the Company's dispersive global research and development activities are combined under one roof in SGL Group's largest site worldwide. The new central R&D Center offers space for up to 150 scientific jobs, out of which 15 new jobs are to be created for experts from external research institutes within joint projects. Total investment cost amounts to over (euro)10 million.

"The new T&I Center in Meitingen underscores SGL Group's commitment to Germany as a technology location and to Meitingen as one production site with the broadest product portfolio. Bundling all research activities, the T&I Center creates corporate synergies and promotes innovation. With this approach, the Group's R&D development achieves an important contribution to fulfilling our growth targets", said Robert J. Koehler, CEO of the SGL Group.

Development of the central research work is aligned towards the Group's strategic positioning, showing advantage of comprehensively combining material, process and application expertise for various businesses. This guarantees close cooperation with the business units. In addition to further development of the existing businesses, T&I also concentrates on identifying and implementing innovative business ideas from idea selection up to maturation to make these ideas prepared for a market launch, which includes pilot system testing and creation of new technology platforms. Cooperation with scientific institutes such as the Technical University of Munich or the University of Augsburg, and

Edgar Filing: SGL CARBON AKTIENGESELLSCHAFT - Form 6-K

close cooperation with industrial partners are both to be further strengthened to achieve this. An essential focus among all these activities is to further enhance the carbon fiber technology and related applications.

Data and facts about T&I Center:

Start of construction: March 19, 2007
Topping out ceremony: October 5, 2007
Inauguration: May 28, 2008
Construction duration: 14 months

New Chief Financial Officer at SGL Carbon AG

Wiesbaden, June 2nd, 2008. The Supervisory Board of SGL Carbon AG today appointed Jurgen Muth (51) as Chief Financial Officer as of July 1, 2008.

Sten Daugaard is leaving the Company upon his own request as of June 30, 2008 to return to his native country Denmark to fulfill family commitments. Supervisory Board and Board of Management regret his departure and thank him for his successful contribution within the last years and wish him all the best.

Jurgen Muth joined end 2005 the SGL Group as Member of the Management Committee Graphite Materials & Systems (GMS) responsible for Controlling and Business Administration.

From 2001 to 2005 Jurgen Muth was CFO with Trevira Holding GmbH in Hattersheim/Main.

For the preceding 5 years, he had been CFO responsible for Finance and Accounting, Human Resources, IT as well as Purchasing and Logistics at DyStar GmbH, Frankfurt am Main. In this role, he was also responsible for establishing the commercial organization of the joint venture founded by Bayer AG and Hoechst AG.

During these 10 years at DyStar and Trevira, Jurgen Muth accumulated substantial experience in the financial and M&A market.

He is married and has two children.
