PART I - FINANCIAL INFORMATION, CONTINUED:

UNITED STATES ANTIMONY CORPORATION AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. BASIS OF PRESENTATION:

The unaudited consolidated financial statements have been prepared by United States Antimony Corporation ("USAC" or "the Company") in accordance with accounting principles generally accepted in the United States of America for interim financial information, as well as the instructions to Form 10-QSB. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of the Company's management, all adjustments (consisting of only normal recurring accruals) considered necessary for a fair presentation of the interim financial statements have been included. Operating results for the six-month period ended June 30, 2002 are not necessarily indicative of the results that may be expected for the full year ending December 31, 2002. Certain consolidated financial statement amounts for the three and six-month periods ended June 30, 2001, have been reclassified to conform to the 2002 presentation. These reclassifications had no effect on the net loss or accumulated deficit as previously reported.

For further information refer to the financial statements and footnotes thereto in the Company's Annual Report on Form 10-KSB for the year ended December 31, 2001.

2. LOSS PER COMMON SHARE

The Company accounts for its income (loss) per common share according to the Statement of Financial Accounting Standards No. 128 "Earnings Per Share" ("SFAS No. 128"). Under the provisions of SFAS No. 128, primary and fully diluted earnings per share are replaced with basic and diluted earnings per share. Basic earnings per share is arrived at by dividing net income (loss) available to common stockholders by the weighted average number of common shares outstanding, and does not include the impact of any potentially dilutive common stock equivalents. Common stock equivalents, including warrants to purchase the Company's common stock and common stock issuable upon the conversion of debentures are excluded from the calculations when their effect is antidilutive.

3. COMMITMENTS AND CONTINGENCIES:

Until 1989, the Company mined, milled and leached gold and silver in the Yankee Fork Mining District in Custer County, Idaho. In 1994, the U.S. Forest Service, under the provisions of the Comprehensive Environmental Response Liability Act of 1980 ("CERCLA"), designated the cyanide leach plant as a contaminated site requiring cleanup of the cyanide solution. The Company has been reclaiming the property and, as of December 31, 2001, the cyanide solution cleanup was

Edgar Filing: UNITED STATES ANTIMONY CORP - Form 10QSB

complete, the mill removed, and a majority of the cyanide leach residue disposed of. In 1996, the Idaho Department of Environmental Quality requested that the Company sign a consent decree related to completing the reclamation and remediation at the Preachers Cove mill, which the Company signed in December 1996.

In November of 2001, the Environmental Protection Agency ("EPA") listed two by-products of the Company's antimony oxide manufacturing process as hazardous wastes. Antimony slag and antimony bag house filters are now subject to comprehensive management and treatment standards under subtitle C of the Resource Conservation and Recovery Act ("RCRA"), and emergency notification requirements for releases to the environment under CERCLA. During 2001, the Company adjusted its reclamation accrual at its antimony processing site based on an estimate of costs associated with disposing the Company's current antimony slag inventory according to EPA universal treatment standards. While it is reasonably probable that additional future costs will result from the EPA's listings, the additional costs are not estimable at December 31, 2001 and June 30, 2002, and accordingly have not been accrued for.

4

UNITED STATES ANTIMONY CORPORATION AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED), CONTINUED:

3. COMMITMENTS AND CONTINGENCIES, CONTINUED:

The Company's management believes that USAC is currently in substantial compliance with environmental regulatory requirements and that its accrued environmental reclamation costs are representative of management's estimate of costs required to fulfill its reclamation obligations. Such costs are accrued at the time the expenditure becomes probable and the costs can reasonably be estimated. The Company recognizes, however, that in some cases future environmental expenditures cannot be reliably determined due to the uncertainty of specific remediation methods, conflicts between regulating agencies relating to remediation methods and environmental law interpretations, and changes in environmental laws and regulations. Any changes to the Company's reclamation plans as a result of these factors could have an adverse affect on the Company's operations. The range of possible losses in excess of the amounts accrued cannot be reasonably estimated at this time.

During 2001, the Company issued a number of shares in transactions that may not qualify for exemption from the Securities Act registration requirements and may be in violation of Section 5 of the Securities Act of 1933. As a result the Company may be subject to liabilities associated with the rescission rights of the purchasers of these shares and fines and penalties from securities regulators. At June 30, 2002 and December 31, 2001, the Company had not recorded any liability associated with the issuance of these shares, as management believes the likelihood of a claim, and the ultimate economic outcome if a claim is asserted, cannot be ascertained at this time.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

General

This report contains both historical and prospective statements concerning the Company and its operations. Prospective statements (known as "forward-looking statements") may or may not prove true with the passage of time because of future risks and uncertainties. The Company cannot predict what factors might cause actual results to differ materially from those indicated by prospective statements.

Edgar Filing: UNITED STATES ANTIMONY CORP - Form 10QSB

Results of Operations

For the three-month period ended June 30, 2002 compared to the three-month period ended June 30, 2001

On May 29, 2002, the Company, was assigned all rights, title and interest in any and all common stock of Bear River Zeolite Company ("Bear River Zeolite" or "BRZ") owned by George Desborough and Nick Raymond, holders of 25% of BRZ's outstanding shares of common stock. The assignment brought the Company's ownership in Bear River Zeolite to 100%. In connection with the assignment, the Company agreed to pay Mr. Desborough and Mr. Raymond a royalty on zeolite sales ranging from 1-3% based on per-ton zeolite sale prices. As additional consideration for the assignment, USAC also agreed to issue Mr. Desborough and Mr. Raymond a total of 50,000 restricted common stock purchase warrants exercisable at \$0.40 for a period of 3 years within 30 days of the signing of the agreement, providing common stock is authorized. At June 30, 2002, the Company didn't have authorized shares of common stock available to affect the warrant issue, and the warrants had not yet been issued.

On June 1, 2002, BRZ sold a production royalty to Delaware Royalty Corporation ("Delaware"), a company controlled by Al Dugan, a major shareholder that may be regarded as an affiliate. The sale granted Delaware a 2% royalty on all zeolite ore extracted and sold from BRZ's Webster Farm zeolite property. As consideration for the royalty the Company received \$150,000. The royalty is due at the end of each quarter and is calculated on the gross sales proceeds from zeolite shipped and sold during the preceding quarter.

5

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION, CONTINUED:

The Company's operations resulted in net income of \$72,809 for the three-month period ended June 30, 2002, compared with a net loss of \$283,083 for the three-month period ended June 30, 2001. Net income during the second quarter of 2002 compared to the net loss during the similar quarter of 2001 is primarily due to the sale of a royalty in the Company's zeolite operations and decreased general and administrative expenses during the second quarter of 2002.

Total revenues from antimony product sales for the second quarter of 2002 were \$975,283 compared with \$1,076,909 during the comparable quarter of 2001, a decrease of \$101,626. During the three-month period ended June 30, 2002, 36.62% of the Company's revenues from antimony product sales were from sales to one customer and 10.8% were from sales to a second individual customer. Sales of antimony products during the second quarter of 2002 consisted of 1,188,019 pounds at an average sale price of \$0.82 per pound. During the second quarter of 2001 sales of antimony products consisted of 1,184,110 pounds at an average sale price of \$0.91 per pound. The decrease in sale prices of antimony products from the second quarter of 2001 to the second quarter of 2002 is the result of a corresponding decrease in antimony metal prices.

Sales of zeolite products during the second quarter of 2002 were \$44,593 compared to sales of \$2,655 during the second quarter of 2001. Gross profit from antimony and zeolite sales during the second three-month period of 2002 was \$103,486 compared with gross profit of \$139,242 during the second three-month period of 2001.

During the second quarter of 2002, the Company incurred expenses totaling \$50,396 associated with sales, development and general and administrative

Edgar Filing: UNITED STATES ANTIMONY CORP - Form 10QSB

expenses of its wholly owned subsidiary, Bear River Zeolite, compared to \$119,425 of expenses in the comparable quarter of 2001. The decrease in BRZ expenses was principally due to the start-up costs incurred during the second quarter of 2001 that were not incurred during 2002.

General and administrative expenses were \$67,522 during the second quarter of 2002, compared to \$159,421 during the second quarter of 2001. The decrease in general and administrative expenses during the second quarter of 2002 compared to the same quarter of 2001 was partially due to the absence of legal and accounting expenses associated with the preparation of a registration statement during the second quarter of 2001.

Sales expenses were \$17,533 during the second quarter of 2002 compared with \$34,342 in the second quarter of 2001, the decrease was principally due to the allocation of a portion of USAC's sales and labor costs to BRZ.

Interest expense was \$19,921 during the second quarter of 2002, compared to interest expense of \$41,714 incurred during the second quarter of 2001; the decrease in interest expense was due to the conversion of outstanding debentures during the fourth quarter of 2001.

Accounts receivable factoring expense was \$26,001 during the second quarter of 2002 compared to \$23,911 of factoring expense incurred during the second quarter of 2001. The decrease was primarily due to an increase in accounts receivable factored during the second quarter of 2002 compared to 2001.

Interest income decreased from \$1,488 during the second quarter of 2001 to \$696 during the second quarter of 2002. The decrease was due to a corresponding decrease in interest bearing reclamation bonds.

6

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION, CONTINUED:

For the six-month period ended June 30, 2002 compared to the six-month period ended June 30, 2001

The Company's operations resulted in a net loss of \$121,526 for the six-month period ended June 30, 2002, compared with a net loss of \$503,389 for the six-month period ended June 30, 2001. The decrease in net loss from the first six months of 2001 compared to the first six months of 2002 is primarily due to decreased general and administrative expenses during 2002 and the sale of a royalty in the Company's zeolite operations.

Total revenues from antimony product sales for the first six months of 2002 were \$1,626,372 compared with \$2,038,040 for the comparable period of 2001, a decrease of \$411,668. During the six-month period ended June 30, 2002, 38.49% of the Company's revenues from antimony products sales were from sales to one customer and 10.7% were from sales to a second individual customer. Sales of antimony products during the first six months of 2002 consisted of 1,940,068 pounds at an average sale price of \$0.84 per pound. During the first six months of 2001 sales of antimony products consisted of 2,129,434 pounds at an average sale price of \$0.96 per pound. The decrease in sale prices of antimony products from the first six months of 2001 to the first six months of 2002 is the result of a corresponding decrease in antimony metal prices.

Sales of zeolite products during the first six months of 2002 were \$105,907 compared to sales of \$2,655 during the comparable period of 2001. Gross profit from antimony and zeolite sales during the first six-month period of 2002 was \$132,221 compared with gross profit of \$194,391 during the same six-month period of 2001.

Edgar Filing: UNITED STATES ANTIMONY CORP - Form 10QSB

During the first six months of 2002, the Company incurred expenses totaling \$112,681 associated with sales, development and general and administrative expenses of its wholly owned subsidiary, Bear River Zeolite, compared to \$165,668 of expenses during the comparable period of 2001. The decrease in BRZ expenses was principally due to the start-up costs associated with zeolite operations incurred during the first six months of 2001 that were not incurred during 2002.

General and administrative expenses were \$165,418 during the first six months of 2002, compared to \$333,468 during the first six months of 2001. The decrease in general and administrative expenses during the first six months of 2002 compared to the same period of 2001 was partially due to decreased legal and accounting expenses associated with the preparation of a registration statement during 2001 and the allocation of a portion of USAC's general and administrative costs to BRZ.

Sales expenses were \$44,398 during the first six months of 2002 compared with \$72,838 in the first six months of 2001, the decrease was principally due to the allocation of a portion of the Company's sales costs to BRZ.

Interest expense was \$37,373 during the first six months of 2002, compared to interest expense of \$81,600 incurred during the first six months of 2001; the decrease in interest expense was due to the conversion of outstanding debentures during the fourth quarter of 2001.

Accounts receivable factoring expense was \$45,327 during the first six months of 2002 and was comparable to \$47,175 of factoring expense incurred during the first six months of 2001.

Interest income decreased from \$2,969 during the first six months of 2001 to \$1,450 during the first six months of 2002. The decrease was due to a corresponding decrease in interest bearing reclamation bonds.

6

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION, CONTINUED:

Financial Condition and Liquidity

At June 30, 2002, Company assets totaled \$936,144, and there was a stockholders' deficit of \$1,117,340. The stockholders' deficit decreased \$50,544 from December 31, 2001, primarily due to sales of restricted common stock during the first two quarters of 2002. At June 30, 2002, the Company's total current liabilities exceeded its total current assets by \$1,501,127. Due to the Company's operating losses, negative working capital, and stockholders' deficit, the Company's independent accountants included a paragraph in the Company's 2001 financial statements relating to a going concern uncertainty. To continue as a going concern the Company must generate profits from its antimony and zeolite sales and acquire additional capital resources from alternative financing resources. Without financing and profitable operations, the Company may not be able to meet its obligations, fund operations and continue in existence. While management is optimistic that the Company will be able to sustain its operations and meet its financial obligations, there can be no assurance of such.

Cash used by operating activities during the first six months of 2002 was \$71,361, and resulted primarily from the six-month net loss of \$121,526.

Cash used in investing activities during the first six months of 2002 was \$189,917 and was almost entirely related to the construction of capital assets

Edgar Filing: UNITED STATES ANTIMONY CORP - Form 10QSB

at the Bear River Zeolite facility.

Cash provided by financing activities was \$261,278 during the first six months of 2002, and was principally generated by sales of 871,000 shares of unregistered common stock for \$172,070. At June 30, 2002, the Company had no unencumbered authorized common stock available for sale or issue.

During the second quarter of 2002, the Company negotiated an additional borrowing with the First State Bank of Thompson Falls, Montana, through an Assignment of Deposit Account Agreement. The borrowing provides up to \$150,100, is collateralized by the Company's assignment of a \$100,000 certificate of deposit, and matures together with accrued interest on June 10, 2003. Proceeds from the borrowing were used to finance the Company's inventory purchases.
