Quarterly Report On Form 10-QSB
For The Quarterly Period Ended October 31, 2007

FORWARD-LOOKING STATEMENTS

This Form 10-QSB for the quarterly period ended October 31, 2007 contains forward-looking statements that involve risks and uncertainties. Forward-looking statements in this document include, among others, statements regarding our capital needs, business plans and expectations. Such forward-looking statements involve assumptions, risks and uncertainties regarding, among others, the success of our business plan, availability of funds, government regulations, operating costs, our ability to achieve significant revenues, our business model and products and other factors. Any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as "may", "will", "should", "expect", "plan", "intend", "anticipate", "believe", "estimate", "predict", "potential" or "continue", the negative of such terms or other comparable terminology. In evaluating these statements, you should consider various factors, including the assumptions, risks and uncertainties set forth in reports and other documents we have filed with or furnished to the SEC, including, without limitation, our Form 10-KSB for the period ended July 31, 2007, as amended. These factors or any of them may cause our actual results to differ materially from any forward-looking statement made in this document. While these forward-looking statements, and any assumptions upon which they are based, are made in good faith and reflect our current judgment regarding future events, our actual results will likely vary, sometimes materially, from any estimates, predictions, projections, assumptions or other future performance suggested herein. The forward-looking statements in this document are made as of the date of this document and we do not intend or undertake to update any of the forward-looking statements to conform these statements to actual results, except as required by applicable law, including the securities laws of the United States.

EXPLANATORY NOTE

This Form 10-QSB/A Amendment No. 1 of Uranium Energy Corp. (the "Company") amends the Company's Form 10-QSB for the period ended October 31, 2007 filed with the Securities and Exchange Commission ("SEC") on December 12, 2007. This Form 10-QSB/A is being filed to include the Company's restated interim financial statements for the period ended October 31, 2007, and to disclose Management's Consideration of the Restatement and the resulting conclusions regarding internal controls over financial reporting.

At each reporting period we performed an impairment analysis of any capitalized acquisition costs of our mineral properties. As none of our properties contained proven and probable reserves that were independently quantified and valued, management assessed that future cash flows could not be determined and, accordingly, we wrote down the carrying value of the capitalized acquisition costs of our mineral properties as of the end of each reporting period. The capitalized costs of mineral rights and properties were acquisition costs that were accounted for as tangible assets pursuant to EITF 04-02, *Whether Mineral Rights are Tangible or Intangible Assets*. The capitalized costs of databases were acquisition costs that were accounted for as intangible assets. The allocation to tangible assets as a result of the acquisition included economic value beyond the acquired assets proven and probable reserves. In carrying out our subsequent impairment tests, we did not consider data beyond proven and probable reserves and did not consider the information and data used in determining the initial capitalization of acquisition costs. Pursuant to EITF 04-03, *Mining Assets: Impairment and Business Combinations*, we have reconsidered our impairment analysis and have now included the cash flows associated with value beyond proven and probable reserves in estimating future cash flows (both undiscounted and discounted) used for determining whether mining assets were impaired under SFAS 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. We have re-evaluated the impairment analysis performed at each respective period using all historical information including value beyond proven and probable reserves and have determined the capitalized costs of mineral properties should not have been written off.

Additionally, in reviewing the database related transactions we identified the following errors: (i) cash and stock based expenditures which were initially capitalized with other acquisition costs were not capital in nature and should have been charged to mineral property expenditures, (ii) cash and stock based proceeds from the sale of a portion of one of our database acquisitions was initially recorded as a reduction of capitalized costs and should have been recognized as an asset sale transaction, and (iii) depreciation was not recorded on capitalized database acquisitions. Accordingly, the financial statements have been restated to correct for the errors outlined above.

For the convenience of the reader, this Form 10-QSB/A Amendment No. 1 sets forth the entire Form 10-QSB, as amended by the Company's Form 10-QSB/A, which was originally prepared and filed with the SEC but reflects amendments only to those items affected by the matters described above. It does not update other disclosures presented in the originally filed Form 10-QSB, as amended. Accordingly, this Form 10-QSB/A Amendment No. 1 does not reflect any events subsequent to the date of the originally filed Form 10-QSB (other than the amendments set out in the Form 10-QSB/A). The amendments described above are reflected in certain Part I disclosures within Item 1, Financial Statements, Item 2, Management's Discussion and Analysis, and Item 3, Controls and Procedures.

URANIUM ENERGY CORP.

(An Exploration Stage Company)

NOTES TO THE FINANCIAL STATEMENTS

October 31, 2007 (Unaudited)

NOTE 1: NATURE OF OPERATIONS

Uranium Energy Corp. (the "Company") was incorporated on May 16, 2003 in the State of Nevada. Since November 1, 2004, the Company has acquired mineral leases and entered into joint venture agreements, directly and under options, for the purposes of exploring for economic deposits of uranium in the States of Arizona, Colorado, New Mexico, Texas, Utah, and Wyoming. To October 31, 2007, interests in approximately 51,206 net acres of mineral properties have been staked or leased by the Company, including 3,291 net acres (6,717 gross acres) leased by Cibola Resources LLC of which the Company holds a 49% interest.

These financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America.

The Company commenced operations on May 16, 2003 and has not realized any significant revenues since inception. As at October 31, 2007, the Company has working capital of \$4,920,696 and an accumulated deficit of \$24,931,121 (as restated, see Note 13). Existing cash resources are currently not expected to provide sufficient funds through the upcoming year, the capital expenditures required to achieve planned principal operations may be substantial. The continuation of the Company as a going concern is dependent upon the ability of the Company to obtain necessary financing to continue operations. The Company is in the exploration stage of its mineral property development and to date has not yet established any proven mineral reserves on its existing properties. The continued operations of the Company and the recoverability of the carrying value of its assets is ultimately dependent upon the ability of the Company to achieve profitable operations. To date, the Company has completed private placements and received funding through the exercise of stock options and share purchase warrants for net proceeds of \$24,935,196 from the issuance of shares of the Company's common stock.

Unaudited Interim Financial Statements

The accompanying unaudited interim financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-QSB of Regulation S-B. They do not include all information and footnotes required by United States generally accepted accounting principles for complete financial statements. However, except as disclosed herein, there have been no material changes in the information disclosed in the notes to the financial statements for the seven months ended July 31, 2007 included in the Company's Annual Report on Form 10-KSB filed with the Securities and Exchange Commission. The interim unaudited financial statements should be read in conjunction with those financial statements included in the Form 10-KSB. In the opinion of management, all adjustments considered necessary for a fair presentation, consisting solely of normal recurring adjustments, have been made. Operating results for the three months ended October 31, 2007 are not necessarily indicative of the results that may be expected for the year ending July 31, 2008.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization

The Company was incorporated on May 16, 2003 in the State of Nevada.

Basis of Presentation

These financial statements are presented in United States dollars and have been prepared in accordance with accounting principles generally accepted in the United States of America.

Cash and Cash Equivalents

The Company considers all highly liquid instruments with an original maturity of three months or less at the time of issuance to be cash equivalents.

Use of Estimates

The preparation of financial statements in conformity with United States generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities at the date of the financial statements and revenues and expenses during the period reported. By their nature, these estimates are subject to measurement uncertainty and the effect on the financial statements of changes in such estimates in future periods could be significant. Significant areas requiring management's estimates and assumptions are determining the fair value of transactions involving common stock, valuation and impairment losses on mineral property acquisitions, valuation of stock-based compensation, and valuation of available-for-sale securities. Other areas requiring estimates include allocations of expenditures to resource property interests and depreciation of property and equipment. Actual results could differ from those estimates.

Mineral Property Costs

The Company is primarily engaged in the acquisition, exploration and development of mineral properties.

Mineral property acquisition costs are initially capitalized as tangible assets when purchased. At the end of each fiscal quarter end, the Company assesses the carrying costs for impairment. If proven and probable reserves are established for a property and it has been determined that a mineral property can be economically developed, costs will be amortized using the units-of-production method over the estimated life of the probable reserve.

Mineral property exploration costs are expensed as incurred.

Estimated future removal and site restoration costs, when determinable are provided over the life of proven reserves on a units-of-production basis. Costs, which include production equipment removal and environmental remediation, are estimated each period by management based on current regulations, actual expenses incurred, and technology and industry standards. Any charge is included in exploration expense or the provision for depletion and depreciation during the period and the actual restoration expenditures are charged to the accumulated provision amounts as incurred.

As of the date of these financial statements, the Company has not established any proven or probable reserves on its mineral properties and incurred only acquisition and exploration costs.

Databases

Costs related to internally developed databases are expensed as incurred. Costs of acquired mineral property databases are capitalized upon acquisition. Mineral property data bases are tested for impairment whenever events or changes indicate the carrying value amount may not be recoverable. An impairment loss is recognized if it is determined that the carrying amount is not recoverable and exceeds fair value. Mineral property databases are amortized over five

years using the straight-line method.

Restoration and Remediation Costs (Asset Retirement Obligations)

Various federal and state mining laws and regulations require the Company to reclaim the surface areas and restore underground water quality for its mine projects to the pre-existing mine area average quality after the completion of mining. In August 2001, the FASB issued Statement of Financial Accounting Standards ("SFAS") No. 143, "Accounting for Asset Retirement Obligations," which established a uniform methodology for accounting for estimated reclamation and abandonment costs.

Future reclamation and remediation costs are accrued based on management's best estimate at the end of each period of the costs expected to be incurred at each project. Such estimates are determined by the Company's engineering studies calculating the cost of future surface and groundwater activities.

Impairment of Long-Lived Assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Recoverability of these assets is measured by comparison of its carrying amount to future undiscounted cash flows the assets are expected to generate.

Financial Instruments

The fair values of cash and cash equivalents, restricted cash, other current monetary assets, accounts payable and accrued liabilities were estimated to approximate their carrying values due to the immediate or short-term maturity of these financial instruments. The Company's operations and financing activities are conducted primarily in United States dollars, and as a result the Company is not subject to significant exposure to market risks from changes in foreign currency rates. Management has determined that the Company is not exposed to significant credit risk.

Loss per Common Share

Basic loss per share includes no dilution and is computed by dividing loss attributable to common stockholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution of securities that could share in the earnings (loss) of the Company. The common shares potentially issuable on conversion of outstanding convertible debentures and exercise of stock options were not included in the calculation of weighted average number of shares outstanding because the effect would be anti-dilutive.

Foreign Currency Translation

The functional currency of the Company is United States dollars. In accordance with SFAS No. 52, "Foreign Currency Translation", foreign denominated monetary assets and liabilities are translated to their United States dollar equivalents using foreign exchange rates which prevailed at the balance sheet date. Revenue and expenses are translated at average rates of exchange during the year. Related translation adjustments are reported as a separate component of stockholders' equity, whereas gains or losses resulting from foreign currency transactions are included in results of operations.

Income Taxes

The Company follows the liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax balances. Deferred tax assets and liabilities are measured using enacted or substantially enacted tax rates expected to apply to the taxable income in the years in

which those differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the date of enactment or substantive enactment. As at October 31, 2007 the Company had net operating loss carry forwards; however, due to the uncertainty of realization, the Company has provided a full valuation allowance for the potential deferred tax assets resulting from these losses carry forwards.

Stock-Based Compensation

On January 1, 2006, the Company adopted SFAS No. 123 (revised 2004) (SFAS No. 123R), Share-Based Payment, which addresses the accounting for stock-based payment transactions in which an enterprise receives employee services in exchange for (a) equity instruments of the enterprise or (b) liabilities that are based on the fair value of the enterprise's equity instruments or that may be settled by the issuance of such equity instruments. In January 2005, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin (SAB) No. 107, which provides supplemental implementation guidance for SFAS No. 123R. SFAS No. 123R eliminates the ability to account for stock-based compensation transactions using the intrinsic value method under Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and instead generally requires that such transactions be accounted for using a fair-value-based method. The Company uses the Black-Scholes-Merton ("BSM") option-pricing model to determine the fair-value of stock-based awards under SFAS No. 123R, consistent with that used for pro forma disclosures under SFAS No. 123, Accounting for Stock-Based Compensation. The Company has elected the modified prospective transition method as permitted by SFAS No. 123R and accordingly prior periods have not been restated to reflect the impact of SFAS No. 123R. The modified prospective transition method requires that stock-based compensation expense be recorded for all new and unvested stock options, restricted stock, restricted stock units, and employee stock purchase plan shares that are ultimately expected to vest as the requisite service is rendered beginning on January 1, 2006 the first day of the Company's fiscal year 2006. Stock-based compensation expense for awards granted prior to January 1, 2006 is based on the grant date fair-value as determined under the pro forma provisions of SFAS No. 123. On a quarterly basis, the Company estimates expected forfeitures and updates the valuation accordingly.

Prior to the adoption of SFAS No. 123R, the Company measured compensation expense for its employee stock-based compensation plans using the intrinsic value method prescribed by APB Opinion No. 25. The Company applied the disclosure provisions of SFAS No. 123 as amended by SFAS No. 148, Accounting for Stock-Based Compensation - Transition and Disclosure, as if the fair-value-based method had been applied in measuring compensation expense. Under APB Opinion No. 25, when the exercise price of the Company's employee stock options was equal to the market price of the underlying stock on the date of the grant, no compensation expense was recognized.

Property and Equipment

Property and equipment are recorded at cost and amortized using the straight-line method over estimated useful lives at the following rates:

Computer Equipment	3 years
Exploration Equipment	5 years
Furniture and Fixtures	5 years
Leasehold Improvements	term of lease
Vehicles	5 years

Recent Accounting Pronouncements

In July 2006, FASB issued Interpretation No. 48. This interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS Statement No. 109, "Accounting for Income Taxes" ("FIN 48"). This Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The Company adopted FIN 48 as of January 1, 2007. The adoption of FIN 48 did not have an impact on the Company's financial statements during the current period.

In September 2006, FASB issued SFAS No. 157, "Fair Value Measurements" ("SFAS 157"). The objective of SFAS 157 is to increase consistency and comparability in fair value measurements and to expand disclosures about fair value measurements. SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 applies under other accounting pronouncements that require or permit fair value measurements and does not require any new fair value measurements. The provisions of SFAS 157 are effective for fair value measurements made in fiscal years beginning after November 15, 2007. The Company is currently assessing the impact of SFAS 157 on its financial position and results of operations.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". This Statement permits entities to choose to measure many financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. The Company is currently assessing the impact of SFAS No. 159 on its financial position and results of operations.

NOTE 3: RESTRICTED CASH

Restricted cash included certificates of deposit issued to the Wyoming Department of Environmental Quality, Land Quality Division, in lieu of a surety bond. The certificates of deposit accrue interest at 3.5% and 3.75% per annum, are automatically renewable and are protected by federal insurance up to \$100,000. During the three months ended October 31, 2007, the Company transferred certificates of deposits from the AB Claims project in the total aggregate amount of \$136,458 under the same terms as above for drill hole reclamation bonding of the Burnt Wagon exploration project, Natrona county, Wyoming.

NOTE 4: AVAILABLE-FOR-SALE SECURITIES

Available-for-sale securities consist of shares in a publicly traded company listed on the Toronto and Johannesburg Stock Exchanges. As of October 31, 2007 the Company reported the available-for-sale securities at market value and accordingly, recorded a \$246,143 unrealized gain which has been reported as other comprehensive income, net of income taxes.

NOTE 5: MINERAL EXPLORATION PROPERTIES

Uranium Exploration

Since November 1, 2004, the Company has been acquiring mineral leases for the purpose of exploring for economic deposits of uranium in the states of Arizona, Colorado, New Mexico, Texas, Utah, and Wyoming.

As of October 31, 2007, a total of 58,901 gross acres (51,206 net mineral acres) of mineral properties have been staked or leased pursuant to option agreements by the Company in the States of Arizona, Colorado, New Mexico, Texas, Utah, and Wyoming for the purposes of uranium exploration for a cost of \$4,377,039, plus \$8,207,500 representing the fair value of non-cash compensation, for a cumulative cost of \$12,584,539. The totals include 3,291 net acres (6,717 gross acres leased by Cibola Resources LLC of which the Company holds a 49% interest). These leases are subject to varying royalty interests, some of which are indexed to the sale price of uranium. As of October 31, 2007, total yearly recurring maintenance payments of \$247,035 are required to maintain existing mineral leases.

Goliad Project

On October 11, 2005, the Company entered into a mineral asset option agreement (the "Moore Option") granting the Company the option to acquire certain mineral property leases in the State of Texas for total consideration of \$200,000 and 3,000,000 post-split restricted common shares at a fair value of \$0.33 per share. In consideration for the Moore Option and its partial exercise over the option term, the Company has made cash payments totaling \$200,000 and issued 3,000,000 post-split shares of restricted common stock. Upon completion of the terms of the Moore Option title to the leases were transferred to the Company.

Acquisition costs for the Moore Option total \$8,407,500 as of October 31, 2007 and include the following: (i) cash payments of \$200,000, (ii) 750,000 restricted common shares issued on October 11, 2005 with a fair value of \$250,000, (iii) 500,000 restricted common shares issued on April 10, 2006 with a fair value of \$1,150,000, (iv) 250,000 restricted common shares issued on September 28, 2006 with a fair value of \$462,500, (v) 750,000 restricted common shares issued on October 10, 2006 with a fair value of \$975,000, and (vi) 750,000 restricted common shares issued on April 11, 2007 with a fair value of \$5,370,000. Additionally, the Company has incurred \$253,561 in other mineral right and property acquisition charges on the Goliad project, for a cumulative cost of \$8,661,061 as of October 31, 2007.

Holley Option

On March 28, 2007 the Company entered into a letter option agreement (the "Holley Option") granting the Company the option to acquire certain mineral property leases, which are located in the States of Colorado, New Mexico, and Utah, together with certain historical database records for total consideration of \$1,594,690. Under the terms of the Holley Option, and in order to maintain its option to acquire the assets, the Company is required to make the following option payments totaling \$1,500,000 to the order and direction of the Holley Option holders in the following manner:

- (a) an initial payment of \$25,000 on the execution date (paid);
- (b) a payment of \$100,000 on March 28, 2007 (paid);
- (c) a payment of \$475,000 on or before April 27, 2007 (paid);
- (d) a further payment of \$500,000 on or before April 27, 2008; and
- (e) a final payment of \$400,000 on or before April 27, 2009.

Upon execution of the Holley Option the Company also reimbursed the Holley Option holders with approximately \$95,000 in prior regulatory fees and property payments. In addition, the Company will be required to pay a royalty of 2% or 3% of the gross proceeds received from the sale of any uranium or vanadium produced in relation to any

mineral claim covered under the Holley Option and, at any time during the option period or thereafter, the Company may elect to purchase the royalty interest at a base cost of \$300,000 for each 1% interest it wishes to acquire. Additionally, the Company has incurred \$6,568 in other mineral right and property acquisition charges related to the Holley Option, for a cumulative cost of \$701,329 as of October 31, 2007.

Cibola Resources LLC

On April 27, 2007, with a reference date of April 26, 2007, the Company entered into a joint venture with Neutron Energy Inc. ("NEI"), a Wyoming corporation, in connection with the exploration of a property covering 6,717 acres located in Cibola County, New Mexico (the "Property") for uranium resources. In connection with the joint venture, Cibola Resources LLC ("Cibola"), a limited liability company under the laws of the State of Delaware, was formed to undertake the exploration activities as contemplated by the parties.

NEI acquired a ten year mining lease (the "Lease") to the Property from La Merced del Pueblo de Cebolleta ("Cebolleta"), a private entity that has the authority over the natural resources of the Property, pursuant to a Mining Lease and Agreement between Cebolleta and NEI effective April 6, 2007 (the "Mining Lease Agreement"), and has contributed the Lease to Cibola. Terms of the Lease provide for:

- (a) initial payments of \$3,000,000 (paid by NEI, of which 49% was reimbursed to NEI by the Company);
- (b) an additional cash payment of \$2,000,000 six months from the effective date of the Lease (\$980,000 paid, being the Company's portion);
- (c) every year after April 6, 2007 until uranium production begins, an advance royalty of \$500,000 (to be deducted from any royalties paid in that same year);
- (d) a recoverable reserve payment of \$1 per pound of recoverable uranium reserves upon the completion of a feasibility study by an independent mining engineering firm, which will be reduced by all prior payments as described in clause (a) through (c) above;
- (e) a production royalty of between 4.50% and 8.0% depending upon the sale price of uranium; and
- (f) the funding of a \$30,000 per year scholarship program.

The Company has reimbursed an aggregate of \$1,470,000 to NEI (49%) of the capital invested to date. As a result, NEI and the Company hold a 51% and 49% interest, respectively, in Cibola and the Company is obligated to pay 49% of all future commitments under the terms of the Lease. Additionally, the Company has paid \$119,137 in exploration costs on behalf of Cibola for a cumulative contribution of \$2,569,137. As an exploration stage company, Cibola has no liabilities as of October 31, 2007 and accordingly, \$2,450,000 in mineral right and property acquisition costs in addition to \$36,750 in database acquisition costs have been capitalized, while other contributions of exploration costs have been charged to mineral property expenditures.

In December 2003, FASB issued FIN 46(R) "Consolidation of Variable Interest Entities" which requires investors to consolidate the financial information of investees in which they are the primary beneficiary. The Company is not the primary beneficiary in Cibola and accordingly, no consolidated financial information is required.

Effective May 29, 2007, the Company committed to spend approximately \$140,000 to acquire a PFN assay tool, and \$120,000 to build a second logging truck which is currently under construction. As of October 31, 2007, a total of \$65,000 has been paid towards these commitments and has been included with vehicles.

NOTE 7: DUE TO RELATED PARTIES AND RELATED PARTY TRANSACTIONS

During the three months ended October 31, 2007, the Company had transactions with certain officers and directors of the Company as follows:

- (a) incurred \$143,698 in management fees; and
- (b) incurred \$25,862 in consulting fees, \$14,794 in general and administrative costs, and \$8,888 in media and website development fees paid to companies controlled by a direct family member of a current officer.

All related party transactions involving provision of services or tangible assets were recorded at the exchange amount, which is the value established and agreed to by the related parties reflecting arms length consideration payable for similar services or transfers.

NOTE 8: CAPITAL STOCK

Share Capital

The Company's capital stock as at October 31, 2007 was 750,000,000 authorized common shares with a par value of \$0.001 per share. On January 9, 2006, a majority of shareholders voted to amend the Company's Articles of Incorporation to increase the authorized capital from 75,000,000 shares of common stock to 750,000,000 shares of common stock. The increase in authorized capital was effective on February 1, 2006.

On February 14, 2006, the Company's Board of Directors, pursuant to minutes of written consent in lieu of a special meeting, authorized and approved a forward stock split on a 1.5 new for one old basis of the Company's total issued and outstanding shares of common stock (the "Forward Stock Split"). The Forward Stock Split was effectuated with a record date of February 28, 2006, upon filing the appropriate documentation. The Forward Stock Split increased the Company's issued and outstanding shares of common stock from 14,968,222 to approximately 22,452,338 shares of common stock. The common stock continued to have a \$0.001 par value after the Forward Stock Split.

2008 Share Transactions

During the three months ended October 31, 2007, 13,900 common share purchase warrants were exercised for total proceeds of \$34,750.

During the three months ended October 31, 2007, 100,000 common stock options were exercised for total proceeds of \$130,000.

Share Purchase Warrants

On June 15, 2007 the Company issued to certain investors an aggregate of 59,998 non-transferable common share purchase warrants to acquire an equivalent number of common shares of the Company pursuant to the investors' respective December 22, 2006 private placement subscription agreements with the Company. These warrants were issued as liquidated damages resulting from the Company's delay in not having a registration statement respecting the investors' securities within the Company declared effective by the SEC within four months from the original date of issuance by the Company of the securities underlying the original subscription agreements. This additional warrant issuance was provided for under the terms of the original subscription agreements whereby 1/100 of an additional warrant was issuable to each such investor for each \$1.00 in aggregate subscription price funds paid by the investor to the Company under the private placement and in respect of each 30 day period (or partial period thereof) of delay of the aforementioned registration statement effectiveness. Each resulting warrant now entitles the holder thereof to purchase an additional share of the Company's restricted common stock under the same terms as the original warrants issued at the closing of the private placement in December of 2006. Under the terms of the subscription agreements, the Company shall use its reasonable best efforts to maintain the effectiveness of the registration statement for a period of not less than nine months from the June 15, 2007 effective date. If the Company fails to maintain the effectiveness of the registration statement for a period of eight months from the initial deadline of April 22, 2007, additional warrants may be issuable. As of October 31, 2007 the maximum number of warrants issuable as liquidated damages through the eight month period expiring December 22, 2007 would be 120,000.

A summary of the Company's common share purchase warrants as of October 31, 2007 and changes during the period is presented below:

	Number of <u>warrants</u>	Weighted average <u>exercise price</u>	Weighted average remaining <u>life (years)</u>
Balance, July 31, 2007	4,009,998	\$2.66	1.70
Issued	-	-	-
Exercised	<u>(13,900)</u>	<u>(2.50)</u>	<u>(0.50)</u>

Balance, June 30, 2007	<u>3,996,098</u>	<u>\$2.66</u>	<u>1.58</u>
------------------------	------------------	---------------	-------------

The aggregate intrinsic value ("AIV") under the provisions of SFAS No. 123R of the 500,000 compensation warrants previously issued to consultants as at October 31, 2007 was estimated at \$1,465,000.

Stock Options

On December 19, 2005 the Board of Directors of the Company ratified, approved and adopted a Stock Option Plan for the Company in the amount of 5,250,000 shares at \$0.333 per share. On April 10, 2006 the Company amended its 2005 Stock Option Plan whereby, subject to adjustment from time to time as provided in Article 11.1, whereby the number of common shares available for issuance under the Plan was increased from 3,500,000 shares to 7,500,000 shares. On October 10, 2006 the Company ratified the 2006 Stock Incentive Plan whereby, subject to adjustment from time to time as provided in Article 18.1, the number of common shares available for issuance under the Plan was increased to 10,000,000 shares.

On March 30, 2007, a total of 415,000 stock options were granted to employees and officers at an exercise price of \$5.70 per share. The term of these options is ten years. The fair value of these options at the date of grant of \$1,962,950 was estimated using the Black-Scholes option pricing model with an expected life of 5 years, a risk free interest rate of 5.26%, a dividend yield of 0%, and an expected volatility of 116%. During the three months ended October 31, 2007, the \$296,611 value of the options earned during the period has been recorded as stock based consulting fees and wages and benefits.

A summary of the Company's stock options as of October 31, 2007 and changes during the period is presented below:

	<u>Number of options</u>	<u>Weighted average exercise price</u>	<u>Weighted average remaining life (years)</u>
Balance, July 31, 2007	3,832,500	\$1.44	8.90
Issued	-	-	-
Exercised	<u>(100,000)</u>	<u>(1.00)</u>	<u>(8.60)</u>
Balance, October 31, 2007	<u>3,732,500</u>	<u>\$1.45</u>	<u>8.56</u>

The AIV under the provisions of SFAS No. 123R of all outstanding options at October 31, 2007 was estimated at \$9,829,108. Additionally, the AIV of options exercised during the three months ended October 31, 2007 was estimated at \$260,000.

Stock Based Compensation

	<u>\$332,586</u>	<u>\$991,384</u>	<u>\$9,751,663</u>

NOTE 9: INCOME TAXES

The Company has adopted FASB No. 109 for reporting purposes. As of October 31, 2007, the Company had net operating loss carry forwards of approximately \$23,579,545 that may be available to reduce future years' taxable income. These carry forwards will begin to expire, if not utilized, commencing in 2023. Future tax benefits which may arise as a result of these losses have not been recognized in these financial statements, as their realization is determined not likely to occur and accordingly, the Company has recorded a valuation allowance for the deferred tax asset relating to these tax loss carry forwards.

The Company reviews its valuation allowance requirements on an annual basis based on projected future operations. When circumstances change and this causes a change in management's judgment about the recoverability of future tax

assets, the impact of the change on the valuation allowance is generally reflected in current income.

A reconciliation of income tax computed at the federal and state statutory tax rates and the Company's effective tax rate is as follows:

	Three Months Ended <u>October 31, 2007</u>	Three Months Ended <u>October 31, 2006</u>
Federal income tax provision at statutory rate	(35.00)%	(35.00)%
States income tax provision at statutory rates, net of federal income tax effect	<u>(5.48)%</u>	<u>(5.48)%</u>
Total income tax provision	<u>(40.48)%</u>	<u>(40.48)%</u>

The actual income tax provisions differ from the expected amounts calculated by applying the combined federal and state corporate income tax rates to the Company's loss before income taxes. The components of these differences are as follows:

	Three Months Ended <u>October 31, 2007</u>	Three Months Ended <u>October 31, 2006</u>
Loss before income taxes	\$(3,739,579)	\$(2,361,341)
Corporate tax rate	<u>40.48%</u>	<u>40.48%</u>
Expected tax expense (recovery)	(1,513,782)	(955,871)
Increase (decrease) resulting from:		
Permanent differences	99,534	6,027
True-up adjustment	1,755	-
Non-qualified stock options	-	-
Capitalized mineral property acquisition costs	(474,975)	(696,910)
Change in valuation allowance	<u>1,915,246</u>	<u>1,646,754</u>

Edgar Filing: URANIUM ENERGY CORP - Form 10QSB/A

From Operations	27,778	-
Unrecognized gain, other comprehensive income	<u>(27,778)</u>	<u>-</u>
Future income tax provision (recovery)	<u>\$ -</u>	<u>\$ -</u>

The Company's deferred tax assets are as follows:

	<u>October 31, 2007</u>	<u>July 31, 2007</u>
Deferred tax assets		
Mineral property acquisitions	\$5,221,263	\$4,782,209
Exploration costs	1,914,956	1,398,264
Permitting fees and expenditures	138,703	87,655
Stock option expense	587,593	1,195,355
Depreciable property	12,707	7,230
Charitable donations	7,475	7,475
Loss carry forwards	<u>9,596,451</u>	<u>8,588,468</u>
	17,479,149	16,066,656
Valuation allowance	<u>(17,311,756)</u>	<u>(15,871,485)</u>
Net Deferred Tax Assets	167,393	195,171
Deferred tax liability, other comprehensive income	<u>(167,393)</u>	<u>195,171</u>
Net Deferred Income Tax Assets	<u>\$ -</u>	<u>\$ -</u>

As the criteria for recognizing future income tax assets have not been met due to the uncertainty of realization, a valuation allowance of 100% has been recorded for the current and prior year.

The Company's net operating loss carryforwards expire as follows:

July 31, 2023	\$24,132
July 31, 2024	74,499
July 31, 2025	403,227
July 31, 2026	13,037,184
July 31, 2027	7,866,184
July 31, 2028	<u>2,174,179</u>
	<u>\$23,579,545</u>

For U.S. federal income tax purposes a change in ownership under IRC Section 382 may have occurred in a prior year. If an ownership change has occurred, the utilization of these losses against future income would be subject to an annual limitation. The annual limitation would be equal to the value of the Company immediately prior to the change in ownership multiplied by the IRC Section 382 rate in effect during the month of the change.

NOTE 10 COMMITMENTS

On February 1, 2007 the Company entered into a financial consulting agreement for a 12 month term. The Consultant will: i) disseminate the Company's news releases, investor packages, research reports and corporate and industry sector materials; ii) promote investor awareness and manage financial public relations to the investment community; and iii) arrange meetings with industry sector analysts, stock brokers and portfolio managers. The Company will pay the Consultant \$6,500 and 2,500 restricted common shares per month. As of October 31, 2007, issuances of 2,500 shares for each of the months of July through October (inclusive) have been accrued, and accordingly, an expense of \$35,975 has been included in stock-based consulting fees based on the fair value of the 7,500 shares issuable during the period.

On April 6, 2007 the Company entered into a twelve month consulting services agreement at \$10,000 per month. The consultant will provide representation before the executive and legislative branches of the federal government and state governments in addition to providing consulting services on political matters.

On September 6, 2007 the Company entered into an agreement for media distribution services valued at approximately \$270,000. Under the terms of the agreement, the Company paid a retainer of \$100,000, with the balance of the agreement due upon completion of the services. As of October 31, 2007 no services had been provided and accordingly, the \$100,000 retainer is classified as a prepaid expense.

On September 15, 2007 the Company entered into a three month consulting services agreement valued at approximately €84,000 (\$116,633 US). The Consultant will provide advice on public and investor relations related matters. Under the terms of the agreement, the Company paid a retainer of approximately €55,000 (\$76,367 US), and will pay two additional installments of approximately €10,000 (\$13,885 US) each 30 and 60 days from the date of the agreement respectively. Additionally, the Company will pay a service fee of approximately €3,000 (\$4,165 US) per month during the three month term.

On September 25, 2007 the Company entered into an agreement to purchase a database consisting of drilling, mapping

and logging reports covering uranium and associated metals prospects located primarily in New Mexico and Wyoming. Consideration for the asset purchase was \$100,000, consisting of (i) a \$50,000 cash payment upon acceptance (paid); and a final \$50,000 installment prior to January 11, 2008.

The Company is committed to pay its key executives a total of approximately \$450,000 per year for management services.

The Company is currently leasing office premises in New Mexico, Texas, and Wyoming with total monthly payments of \$10,645, with all agreements having a maximum term of no more than three years. Additionally, the Company is renting office space in Vancouver, Canada on a month to month basis at approximately \$2,365 per month.

The aggregate minimum payments over the next five years are as follows:

October 31, 2008	\$804,857
October 31, 2009	144,359
October 31, 2010	<u>16,154</u>
	<u>\$965,370</u>

NOTE 12: SUBSEQUENT EVENTS

(a) On November 1, 2007 the Company entered into an asset purchase agreement for a mineral exploration claim and related database information located in Maricopa County, Arizona. Under the terms of the agreement, the Company will pay total consideration of \$1,200,000 including i) a \$10,000 deposit upon execution (paid), ii) installments of \$95,000 cash on January 10, 2008 and August 15, 2008, and iii) installments totaling \$100,000 on January 10 and August 15 of each year for the period from January 10, 2009 through August 15, 2013. Additionally, the Company has granted

the seller security interest on the acquired assets until the agreement is paid in full.

(b) On November 1, 2007 the Company granted 660,000 common stock options with an exercise price of \$3.80 to certain consultants, directors and employees. The term of the options is ten years.

(c) On November 13, 2007 the Company entered into an agreement to acquire certain mineral property leases located in Cibola County, New Mexico for total consideration of \$400,000. Under the terms of the agreement, the Company paid an initial deposit of \$100,000 upon closing with the remaining balance due in three installments of \$100,000 due on March 31, 2008, December 31, 2008, and December 31, 2009. At the Company's option, the final two installments may be paid in stock, based on the average trading price of the Company's common stock over the 10 days immediately preceding the due date.

(d) On November 27, 2007, the Company filed a registration statement on Form S-8 with the SEC to register for resale an aggregate of 5,500,000 shares of the Company's common stock, par value \$0.001 per share, issuable by the Company pursuant to awards to eligible participants under its 2006 Stock Incentive Plan. As a result all 10,000,000 shares of the Company's common stock both issued and available for issuance under the Company's 2006 Stock Incentive Plan have now been registered for resale with the SEC.

NOTE 13: RESTATEMENT

Subsequent to the issuance of the Company's financial statements, the Company's Board of Directors, upon recommendation of management, concluded that the previously issued financial statements for the three months ended October 31, 2007 should not be relied upon due to a re-evaluation of the accounting treatment relating to the Company's mineral rights and properties and databases acquisition costs, in addition to the identification of errors in recording database related transactions.

At each reporting period the Company performed an impairment analysis of any capitalized acquisition costs of its mineral properties. As none of its properties contained proven and probable reserves that were independently quantified and valued, management assessed that future cash flows could not be determined and, accordingly, the Company wrote down the carrying value of the capitalized acquisition costs of its mineral properties as of the end of each reporting period.

The capitalized costs of mineral rights and properties were acquisition costs that were accounted for as tangible assets pursuant to EITF 04-02, Whether Mineral Rights are Tangible or Intangible Assets. The allocation to tangible assets as a result of the acquisition included economic value beyond the acquired assets proven and probable reserves. The capitalized costs of databases were acquisition costs that were accounted for as intangible assets.

In carrying out its subsequent impairment tests, the Company did not consider data beyond proven and probable reserves and did not consider the information and data used in determining the initial capitalization of acquisition costs.

Pursuant to EITF 04-03, *Mining Assets: Impairment and Business Combinations*, the Company has reconsidered its impairment analysis and has now included the cash flows associated with value beyond proven and probable reserves in estimating future cash flows (both undiscounted and discounted) used for determining whether mining assets were impaired under SFAS 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. The Company has re-evaluated the impairment analyses performed at each respective period using all historical information including

value beyond proven and probable reserves and has determined the capitalized costs of mineral properties should not have been written off.

Additionally, in reviewing the database related transactions the Company identified the following errors: (i) cash and stock based expenditures of \$229,077 (\$138,750 during the fiscal year ended December 31, 2006, \$32,500 during the seven months ended July 31, 2007, and \$57,827 during the three months ended October 31, 2007) which were initially capitalized with other acquisition costs were not capital in nature and should have been charged to mineral property expenditures, (ii) cash and stock based proceeds of \$385,040 (\$150,000 cash and \$235,040 stock based) from the sale of a portion of one of the Company's database acquisitions was initially recorded as a reduction of capitalized costs and should have been recognized as an asset sale transaction with a resulting gain of \$363,757, and (iii) depreciation of \$101,920 (\$37,135 during the fiscal year ended December 31, 2006, \$34,578 during the seven months ended July 31, 2007 and \$30,207 during the three months ended October 31, 2007) was not recorded on capitalized database acquisitions. Accordingly, the financial statements have been restated to correct for the errors outlined above.

As a result the financial statements have been restated to reflect certain capitalized acquisition costs and the correction of errors in recording database related transactions as follows:

Item 2. Management's Discussion and Analysis

GENERAL

Uranium Energy Corp. is a corporation organized under the laws of the State of Nevada. After the effective date of our registration statement filed with the Securities and Exchange Commission (December 5, 2005), we commenced trading on the Over-the-Counter Bulletin Board under the symbol "URME:OB". As of September 28, 2007 we commenced trading on the American Stock Exchange under the symbol "UEC".

Please note that throughout this Quarterly Report, and unless otherwise noted, the words "we," "our," "us," the "Company," or "Uranium Energy," refers to Uranium Energy Corp.

CURRENT BUSINESS OPERATIONS

We are a natural resource exploration and development company engaged in the exploration and development of properties that may contain uranium minerals in the United States. Our strategy is to acquire properties that are thought to contain economic quantities of uranium ore and have undergone some degree of uranium exploration but have not yet been mined. As of the date of this Quarterly Report, we have acquired interests in uranium exploration mineral properties totaling 59,541 gross acres (51,846 net mineral acres) of leased or staked mineral properties, consisting of claim blocks located in the States of Arizona, Colorado, New Mexico, Texas, Utah, and Wyoming that have been either leased or staked, which we intend to explore for economic deposits of uranium. The totals include 3,291 net acres (6,717 gross acres leased by Cibola Resources LLC of which the Company holds a 49% interest). These leases are subject to varying royalty interests, some of which are indexed to the sale price of uranium. Many of these properties has been the subject of historical exploration by other mining companies. Their historical results indicate that further exploration for uranium is warranted. Our view that our properties are prospective for mineral exploration is based on either prior exploration conducted by other companies, or management information and work products derived from various reports, maps, radioactive rock samples, exploratory drill logs, state organization reports, consultants, geological study, and other exploratory information.

Our principal mineral properties are the Goliad project in Goliad County, Texas and the Cibola Resources LLC Cebolleta joint venture project in Cibola County, New Mexico.

The acreage and location of our mineral properties is summarized as follows:

	<u>Gross Acres</u>	<u>Net Acres</u>
		(*)
Arizona	2,871.28	2,871.28
Colorado	5,041.04	5,041.04
New Mexico	25,844.02	18,958.82
Texas	6,279.34	5,470.05

Utah	2,226.94	2,226.94
Wyoming	<u>17,278.29</u>	<u>17,278.29</u>
	<u>59,540.91</u>	<u>51,846.43</u>

(*) Certain of our interests in our mineral properties in Texas and New Mexico are less than 100%. Accordingly, we have presented the acreage of our mineral properties on a net acre basis.

During the 2008 fiscal year through the date of this Quarterly Report, we acquired an additional 4,544 gross acres (4,154 net acres) in the States of Arizona, Texas and Wyoming for an aggregate paid consideration of \$1,065,691.

We plan to use our database of exploration data in order to target additional exploration properties for acquisition. For the remainder of the 2008 fiscal year, we plan to acquire further acres of mineral properties consisting of claim blocks located in, but not limited to the states of Arizona, Colorado, New Mexico, Texas, Utah and Wyoming. Our ability to complete these acquisitions will be subject to obtaining sufficient financing and being able to conclude agreements with the property owners on terms that are acceptable to us. These potential acquisition properties have not yet been specifically identified.

Our properties do not have any reserves. We plan to conduct exploration programs on these properties with the objective of ascertaining whether any of our properties contain economic concentrations of uranium that are prospective for mining. As such, we are considered an exploration or exploratory stage company. Since we are an exploration stage company, there is no assurance that a commercially viable mineral deposit exists on any of our properties, and a great deal of further exploration will be required before a final evaluation as to the economic and legal feasibility for our future exploration is determined. We have no known reserves of uranium or any other type of mineral. Since inception, we have not established any proven or probable reserves on our mineral property interests.

MINERALS EXPLORATION PROPERTIES

We are participating in our mineral properties in the States of Arizona, Colorado, New Mexico, Texas, Utah and Wyoming by way of mining claims and mineral leases. Certain properties were staked and claimed by us and registered with the United States Bureau of Land Management ("BLM"). Claim blocks acquired in this manner exist in Arizona, Colorado, New Mexico and Wyoming. We have surface access and complete mineral rights to an unlimited depth below surface. The claims are in effect for an indefinite period provided the claims are kept in good standing with the BLM and the counties. Annual maintenance fees to be paid to the BLM are relatively nominal. We will also be required to remediate the land upon release of the claim - bringing the land back into the state it was originally, prior to the commencement of our exploration activities. These costs are determined by the BLM and bonded accordingly.

In the States of New Mexico, Utah and Texas, we are participating in our mineral properties by way of property lease directly from the owners of the land/mineral rights. These leases give us similar access and privileges as described above, however with some important differences. Although we will have access to the surface, the mineral rights below surface are restricted to uranium and associated fissionable minerals only, with any other minerals and hydro carbons, including, for example, petroleum, retained by the lessor. The lease terms are for five years, and include five-year renewal periods. After the expiration of the second five-year term, the leases will be either held by production or the leases will be terminated. These leases are subject to varying royalty interests, some of which are indexed to the sale price of uranium at the time of production. Royalty payments must be made to the lessor in the event that we extract uranium ore from the properties. All royalties are based on the gross sales revenue less certain charges and fees.

These properties do not have any indicated or inferred minerals or reserves. We plan to conduct exploration programs on these properties with the intent to prove or disprove the existence of economic concentrations of uranium. Since inception, we have not established any proven or probable reserves on our mineral property interests.

Goliad

During the 2008 fiscal year and through the date of this Quarterly report, we continued the initial confirmation drilling at our 100% controlled Goliad project in Goliad County, Texas (the "Goliad Lease"). Our drilling program consists of ongoing drilling in order to confirm and expand the existence of historically drill-indicative resources on the property (as identified by Moore Energy Corporation during the 1980's) and extending historically identified mineralized trends.

As of the date of this Quarterly Report, current drilling is filling in gaps and defining boundaries within the historically delineated ore bodies as originally developed by Moore Energy Corporation in the 1980s based on 190,000 feet of drilling in approximately 450 holes. To date, our drilling has concentrated in the areas of the A and B Sand ore bodies, with a further total of 541 holes drilled, consisting of 177,472 feet.

Holley Option

On March 28, 2007, we entered into an option agreement (the "Holley Option") granting us the option to acquire certain mineral property leases, which are located in the States of Colorado, New Mexico, and Utah, together with certain historical database records for total consideration of \$1,594,690. Under the terms of the Holley Option, and in order to maintain its option to acquire the assets, we are required to make the following option price payments totaling \$1,500,000 to the order and direction of the Holley Option holders in the following manner:

- (a) an initial payment of \$25,000 on the execution date (paid);
- (b) a payment of \$100,000 on March 28, 2007 (paid);
- (c) a payment of \$475,000 on or before April 27, 2007 (paid);
- (d) a further payment of \$500,000 on or before April 27, 2008;
- (e) a final payment of \$400,000 on or before April 27, 2009.

Upon execution of the Holley Option, we also reimbursed the Holley Option holders with approximately \$95,000 in prior regulatory property payments having been made by the same. In addition, we will be required to pay a royalty of 2% or 3% of the gross proceeds received from the sale of any Uranium or Vanadium produced in relation to any mineral claim covered under the Holley Option and, at any time during the option period or thereafter, we may elect to purchase the royalty interest at a base cost of \$300,000 for each 1% royalty interest we wish to acquire.

Cibola Resources LLC

On April 27, 2007, we entered into a joint venture (the "Joint Venture") with Neutron Energy Inc., a Wyoming corporation ("NEI") in connection with exploration of property covering 6,717 acres located in Cibola County, New Mexico (the "Property") for uranium resources. In connection with the Joint Venture, Cibola Resources LLC, a Delaware limited liability company ("Cibola"), was formed for purposes of undertaking exploration activities contemplated by the Joint Venture.

On April 6, 2007, NEI and La Merced del Pueblo de Cebolleta, a private entity that has authority over the natural resources of the Property ("Cebolleta"), entered into a mining lease agreement (the "Mining Lease Agreement"), pursuant to which NEI acquired the mining lease to the Property from Cebolleta (the "Lease") for cash payments of \$3,000,000. As of June 30, 2007, we have reimbursed NEI an aggregate of \$1,470,000. As a result, we have a 49% equity interest in Cibola and NEI has a 51% equity interest in Cibola, respectively. NEI contributed the Lease to Cibola Resources LLC.

Under terms of a Letter Agreement (the "Letter Agreement") between Cebolleta and NEI, further payments to the order and direction of Cebolleta are required as follows:

- (a) \$2,000,000 six months from the effective date of the Letter Agreement (paid \$980,000, being the Company's portion);
- (b) \$500,000 representing an advanced royalty, every 12 months from the effective date of the Letter Agreement until uranium production begins (to be deducted from any royalties paid in that same year);
- (c) \$1.00 per pound upon an independent mining engineering firm's completion of a feasibility study, and all prior payments made to Cebolleta will be credited to the recoverable reserve payment;
- (d) 4.50% to 8.00% production royalty payments depending upon the uranium sale price; and
- (e) \$30,000 per year towards a scholarship fund.

We are required to contribute 49% of the aforementioned payments in order to retain our interest in the Joint Venture. Through the date of this Quarterly Report, the Company has paid \$2,486,750 in acquisition costs and an additional \$119,137 in exploration costs on behalf of Cibola for a cumulative contribution of \$2,569,137.

New River Project

Effective November 1, 2007, we entered into a binding letter Agreement to Purchase Assets (the "Agreement") with Melvin O. Stairs, Jr. ("Mr. Stairs"), whereby we acquired from Mr. Stairs an undivided 100% legal, beneficial and registered interest in and to a certain mineral exploration claim represented by permit number 08-111678, which is located at T7N R3E, Section 32, in Maricopa County, Arizona (the "Mineral Claim"), together with a certain database containing various material information respecting the subject Mineral Claim (the Mineral Claim and its database, collectively, the "Assets"). As consideration for acquisition of the Assets, we have agreed to make the following payments (each a "Purchase Price Payment") and the following Mineral Claim maintenance payments (each a "Purchase Price Maintenance Payment") to Mr. Stairs in the following manner at the following times after November 1, 2007 (the "Acceptance Date"):

- (a) Purchase Price Payments: pay to the order and direction of Mr. Stairs the following Purchase Price Payments in the aggregate sum of U.S. \$1,200,000 in the following manner and at the following times:
 - i) an initial and non-refundable Purchase Price Payment of U.S. \$10,000 immediately upon the Acceptance Date of the Agreement (paid);
 - ii) further non-refundable Purchase Price Payments of U.S. \$95,000 on or before January 10, 2008 and August 15, 2008; and

iii) further non-refundable Purchase Price Payments of U.S. \$100,000 every six months commencing on or before January 10, 2009 and ending August 15, 2013.

(b) Purchase Price Maintenance Payments: pay, or cause to be paid, all outstanding, existing and future underlying regulatory and governmental fees, payments and assessment work required to keep the Mineral Claim interests comprising the Assets in good standing during the continuance of the Agreement and prior to our satisfaction of the entire Purchase Price consideration and including, without limitation, all permitting costs, transfer fees and any reclamation costs associated in any manner with the Mineral Claim interests comprising the Assets.

Pursuant to the terms of the Agreement, in order to secure the complete and timely payment of our purchase price obligations to Mr. Stairs under the Agreement, we granted a security interest in and to, a lien upon and a right of set-off against our right, title and interest in and to the Assets.

In addition, and pursuant to the terms of the Agreement, at any time prior to the earlier of the payment of the entire Purchase Price by us to Mr. Stairs or the termination of the Agreement for any reason, we have a right of first refusal to acquire all or any portion of any interest in the Agreement or to any mineral property interest which Mr. Stairs may have an interest in at anytime and which Mr. Stairs desires to dispose of (collectively, the "Holding"). If Mr. Stairs receives a *bona fide* offer to purchase from, or where a sale is solicited by Mr. Stairs, then upon settling the proposed terms thereof with a third party for the purchase or sale of the Holding, Mr. Stairs shall offer to sell the Holding to us. The offer to sell to us shall be on the same terms and conditions and of equivalent dollar value as those contained in the offer to the third party; provided, however, that should Mr. Stairs and us fail to agree upon a determination of the equivalent dollar value for any such offer, such equivalent dollar value shall be determined by arbitration under the provisions of the Agreement. We shall be entitled to elect, by notice to Mr. Stairs within 30 calendar days from the date of receipt of the offer to sell, to acquire the Holding, on the same terms and conditions as those set forth in the offer to the third party. If we do not exercise its right to acquire the Holding, Mr. Stairs may, for a period of 60 calendar days following the last date upon which we could have made the election, dispose of the Holding, but only on the same terms and conditions as set forth in that offer.

F-33 Acquisition

On November 13, 2007, we entered into an agreement to acquire certain mineral property leases located in Cibola County, New Mexico for total consideration of \$400,000. Under the terms of the agreement, we paid an initial deposit of \$100,000 upon closing with the remaining balance due in three installments of \$100,000 due on March 31, 2008, December 31, 2008, and December 31, 2009. At our option, the final two installments may be paid in stock, based on the average trading price of our common stock over the 10 days immediately preceding the due date.

RESULTS OF OPERATIONS

Three Months Ended October 31, 2007 Compared to Three Months Ended October 31, 2006

We are an exploration stage company and net production revenues during the three months ended October 31, 2007 and 2006 were \$Nil. Our net loss for the three months ended October 31, 2007 (as restated) was \$3,679,323 compared to a net loss of \$2,280,461 during the three months ended October 31, 2006 (as restated).

Operating expenses incurred during the three months ended October 31, 2007 (as restated) increased to \$3,817,975 from \$2,764,516 over the same period ended October 31, 2006 (as restated). The increase is primarily due to the expansion of current operations and the corresponding change in exploration costs associated with the increased acquisition and development of our uranium properties and related infrastructure. Significant expenditures and changes are outlined as follows:

- Consulting fees increased to \$154,889 during the three months ended October 31, 2007 from \$34,864 during the same period months ended October 31, 2006 due primarily to increased reliance on third party service providers as the Company expands its operations.
- Consulting fees - stock based decreased to \$104,954 during the three months ended October 31, 2007 from \$828,884 during the three months ended October 31, 2006. The current period expense consists of the fair value of option grants earned during the period, whereas the prior period expense consisted of the amortization of significant stock and warrant grants issued to consultants.
- Depreciation and amortization increased to \$69,943 during the three months ended October 31, 2007 (as restated) from \$16,533 during the three months ended October 31, 2006 (as restated) due to significant investments in property and equipment during the current period, the seven month period ended July 31, 2007, and the last half of the 2006 calendar year.
- General and administrative costs increased to \$1,147,994 during the three months ended October 31, 2007 from \$809,797 during the three months ended October 31, 2006 due to the general expansion in operations and personnel in the current period as compared to the prior period.
- Management fees increased to \$143,698 during the three months ended October 31, 2007 from \$82,650 during the three months ended October 31, 2006 due primarily to increases in executive compensation agreements.
- Management fees - stock based decreased to \$Nil during the three months ended October 31, 2007 from \$162,500 during the three months ended October 31, 2006 as the Company did not issue any options or warrants as compensation to management during the current period.
- Mineral property expenditures increased to \$1,848,733 during the three months ended October 31, 2007 (as restated) from \$754,782 during the three months ended October 31, 2006 (as restated) due to the expansion of exploration activities over the prior period, primarily in the Goliad project.
- Professional fees increased to \$120,133 during the three months ended October 31, 2007 from \$74,506 during the three months ended October 31, 2006 due primarily to increases in audit and review costs in addition to increases in counsel fees associated with the growth in the Company's operations.
- Wages and benefits - stock based increased to \$227,632 during the three months ended October 31, 2007 from \$Nil during the three months ended October 31, 2006. The current year expense consists of the fair value of option grants earned during the period.

Interest and other income increased to \$78,396 during the three months ended October 31, 2007, from \$39,418 during the three months ended October 31, 2006, due to higher cash balances maintained throughout the current period. During the three months ended October 31, 2006 (as restated), we recorded a \$363,757 gain on the sale of the Cadena database.

Deferred tax expense increased to \$27,778 during the three months ended October 31, 2007 from \$Nil during the three months ended October 31, 2006. The deferred tax benefit is calculated on the estimated unrealized gain on available-for-sale securities in the current fiscal period which is reflected in other comprehensive income.

Our net loss during the three months ended October 31, 2007 (as restated) was \$3,767,357 or (\$0.10) per share, compared to a net loss of \$2,361,341 or (\$0.08) per share during the three months ended October 31, 2006 (as restated). The weighted average number of shares outstanding was 37,618,731 for the three months ended October 31, 2007 compared to 28,312,718 for the three months ended October 31, 2006.

Transactions with Officers and Directors

Of the \$3,817,975 incurred as operating expenses during the three months ended October 31, 2007 (as restated) an aggregate of \$143,698 was incurred payable to certain officers and directors and recorded as management fees. At October 31, 2007 there were no amounts due and owing to our directors and officers.

LIQUIDITY AND CAPITAL RESOURCES

Our financial statements have been prepared assuming that we will continue as a going concern and, accordingly, do not include adjustments relating to the recoverability and realization of assets and classification of liabilities that might be necessary should we be unable to continue in operation.

At October 31, 2007 the Company had \$4,425,146 in cash. Generally, the Company has financed its operations through the proceeds from the private placement of equity securities and the exercise of stock options and warrants. The Company used \$4,658,307 net cash during the three months ended October 31, 2007.

Operating Activities

Net cash used in operating activities during the three months ended October 31, 2007 (as restated) was \$3,290,543 compared to \$1,437,680 in the corresponding period of 2006 (as restated). Significant operating expenditures during the current period included mineral property expenditures, and general and administrative costs.

Financing Activities

Net cash provided by financing activities during the three months ended October 31, 2007 was \$130,000 compared to \$38,333 in the corresponding period of 2006. During the current period, the Company received net proceeds of \$130,000 from the exercise of options during the period.

Investing Activities

Net cash used in investing activities during the three months ended October 31, 2007 (as restated) was \$1,497,764 compared to \$331,161 in the corresponding period of 2006 (as restated). Significant investing expenditures during the current period included mineral property acquisitions, including the \$980,000 payment related to the Cibola Resources LLC agreement, and purchases of property and equipment.

Stock Options and Warrants

At October 31, 2007 we had 3,732,500 stock options and 3,996,098 share purchase warrants outstanding. The outstanding stock options have a weighted average exercise price of \$1.45 per share and the outstanding warrants have a weighted average exercise price of \$2.66 per share. Accordingly, as of October 31, 2007 the outstanding options and warrants represented a total of 7,728,598 shares issuable for proceeds of approximately \$16,000,000 if these options and warrants were exercised in full. The exercise of these options and warrants is completely at the discretion of the holders. There is no assurance that any of these options or warrants will be exercised.

PLAN OF OPERATION AND FUNDING

Existing working capital is not expected to be adequate to fund our operations over the next twelve months. We have no lines of credit or other bank financing arrangements. Generally, we have financed operations to date through the proceeds of the private placement of equity and debt instruments and the exercise of Stock Options and Warrants. In connection with our business plan, management anticipates additional increases in operating expenses and capital expenditures relating to: (i) uranium exploration operating activities; (ii) possible future reserve definition; (iii)

possible future mining initiatives on current and future properties; and (iv) future possible property acquisitions. We intend to finance these expenses with further issuances of securities, and debt issuances. We expect we will need to raise additional capital to meet long-term operating requirements. Additional issuances of equity or convertible debt securities will result in dilution to our current shareholders. Further, such securities might have rights, preferences or privileges senior to our common stock. Additional financing may not be available upon acceptable terms, or at all. If adequate funds are not available or are not available on acceptable terms, we may not be able to take advantage of prospective new business endeavors or opportunities, which could significantly and materially restrict our business operations.

Going Concern

We commenced operations on May 16, 2003, and have not realized any significant revenues since inception. As at October 31, 2007 (as restated), we have working capital of \$4,920,696 and an accumulated deficit of \$24,931,121. Existing cash resources are currently not expected to provide sufficient funds through the upcoming year, the capital expenditures required to achieve planned principal operations may be substantial. The continuation of the Company as a going concern is dependent upon the ability of the Company to obtain necessary financing to continue operations. We are in the exploration stage of our mineral property development and to date have not yet established any known mineral reserves on any of our existing properties. Our continued operations and the recoverability of the carrying value of our assets is ultimately dependent upon our ability to achieve profitable operations. To date we have completed private placements and exercised stock options for net proceeds of \$24,935,196 from the issuance of shares of the our common stock.

MATERIAL COMMITMENTS

Epoch Financial Consulting Agreement

On February 1, 2007, we entered into a financial consulting agreement with Epoch Financial Group, Inc. ("Epoch") for a twelve month term (the "Epoch Financial Consulting Agreement"). In accordance with the terms and provisions of the Epoch Financial Consulting Agreement: (i) Epoch will disseminate our news releases, investor packages, research reports and corporate and industry sector materials; ii) Epoch will promote investor awareness to the investment community; (iii) Epoch will arrange meetings with industry sector analysts, stock brokers and portfolio managers; and (iv) we will pay Epoch a monthly fee of \$6,500 and issue to Epoch an aggregate of 2,500 restricted common shares per month. See "Part II. Other Information. Item 2. Changes in Securities and Use of Proceeds."

Holley Option

On March 28, 2007, we entered into the Holley Option granting us the option to acquire certain mineral property leases, which are located in the States of Colorado, New Mexico, and Utah, together with certain historical database records for total consideration of \$1,594,690. Under the terms of the Holley Option, and in order to maintain our option to acquire the assets, we are required to make the following option price payments totaling \$1,500,000 to the order and direction of the Holley Option holders in the following manner:

- (a) an initial payment of \$25,000 on the execution date (paid);
- (b) a payment of \$100,000 on March 28, 2007 (paid);
- (c) a payment of \$475,000 on or before April 27, 2007 (paid);
- (d) a further payment of \$500,000 on or before April 27, 2008;
- (e) a final payment of \$400,000 on or before April 27, 2009.

Upon execution of the Holley Option, we also reimbursed the Holley Option holders approximately \$95,000 for prior regulatory property payments having been made to the New Mexico Bureau of Land Management. In addition, we will be required to pay a royalty of 2% or 3% of the gross proceeds received from the sale of any Uranium or Vanadium produced in relation to any mineral claim covered under the Holley Option and, at any time during the option period or thereafter, we may elect to purchase the royalty interest at a base cost of \$300,000 for each 1% royalty interest it wishes to acquire.

Consulting Agreement

.On April 6, 2007 the Company entered into a twelve month consulting services agreement valued at \$10,000 per month. The consultant will provide representation before the executive and legislative branches of the federal government and state governments in addition to providing consulting services on political matters.

Cibola Resources LLC

On April 27, 2007, we entered into a joint venture (the "Joint Venture") with Neutron Energy Inc., a Wyoming corporation ("NEI") in connection with exploration of property covering 6,717 acres located in Cibola County, New Mexico (the "Property") for uranium resources. In connection with the Joint Venture, Cibola Resources LLC, a Delaware limited liability company ("Cibola"), was formed for purposes of undertaking exploration activities contemplated by the Joint Venture.

On April 6, 2007, NEI and La Merced del Pueblo de Cebolleta, a private entity that has authority over the natural resources of the Property ("Cebolleta"), entered into a mining lease agreement (the "Mining Lease Agreement"), pursuant to which NEI acquired the mining lease to the Property from Cebolleta (the "Lease") for cash payments of \$3,000,000. As of June 30, 2007, we have reimbursed NEI an aggregate of \$1,470,000. As a result, we have a 49% equity interest in Cibola and NEI has a 51% equity interest in Cibola, respectively. NEI contributed the Lease to Cibola Resources LLC.

Under terms of a Letter Agreement (the "Letter Agreement") between Cebolleta and NEI, further payments to the order and direction of Cebolleta are required as follows:

- (a) \$2,000,000 six months from the effective date of the Letter Agreement (paid \$980,000, being the Company's portion);
- (b) \$500,000 representing an advanced royalty, every 12 months from the effective date of the Letter Agreement until uranium production begins (to be deducted from any royalties paid in that same year);
- (c) \$1.00 per pound upon an independent mining engineering firm's completion of a feasibility study, and all prior payments made to Cebolleta will be credited to the recoverable reserve payment;
- (d) 4.50% to 8.00% production royalty payments depending upon the uranium sale price; and
- (e) \$30,000 per year towards a scholarship fund.

We are required to contribute 49% of the aforementioned payments in order to retain our interest in the Joint Venture. Through the date of this Quarterly Report, the Company has paid \$2,486,750 in acquisition costs and an additional \$119,137 in exploration costs on behalf of Cibola for a cumulative contribution of \$2,569,137.

Consulting Agreements

On September 15, 2007 we entered into a three month consulting services agreement valued at approximately €84,000 (\$116,633 US). The Consultant will provide advice on public and investor relations related matters. Under the terms of the agreement, we paid a retainer of approximately €55,000 (\$76,367 US), and will pay two additional installments of approximately €10,000 (\$13,885 US) each 30 and 60 days from the date of the agreement respectively. Additionally, we will pay a service fee of approximately €3,000 (\$4,165 US) per month during the three month term.

On September 6, 2007 we entered into an agreement for media distribution services valued at approximately \$270,000. Under the terms of the agreement, we paid a retainer of \$100,000, with the balance of the agreement due upon completion of the services.

Database Acquisition

On September 25, 2007 we entered into an agreement to purchase a database consisting of drilling, mapping and logging reports covering uranium and associated metals prospects located primarily in New Mexico and Wyoming. Consideration for the asset purchase was \$100,000, consisting of (i) a \$50,000 cash payment upon acceptance (paid); and a final \$50,000 installment prior to January 11, 2008.

New River Project Acquisition

On November 1, 2007 we entered into a binding letter Agreement to Purchase Assets with Melvin O. Stairs, Jr. ("Mr. Stairs"), for a mineral exploration claim and related database information located in Maricopa County, Arizona. Under the terms of the agreement, the Company will pay total consideration of \$1,200,000 including i) a \$10,000 deposit upon execution (paid), ii) installments of \$95,000 cash on January 10, 2008 and August 15, 2008, and iii) installments totaling \$100,000 on January 10 and August 15 of each year for the period from January 10, 2009 through August 15, 2013. Additionally, the Company has granted the seller security interest on the acquired assets until the agreement is paid in full.

F-33 Acquisition

On November 13, 2007, we entered into an agreement to acquire certain mineral property leases located in Cibola County, New Mexico for total consideration of \$400,000. Under the terms of the agreement, we paid an initial deposit of \$100,000 upon closing with the remaining balance due in three installments of \$100,000 due on March 31, 2008, December 31, 2008, and December 31, 2009. At our option, the final two installments may be paid in stock, based on the average trading price of our common stock over the 10 days immediately preceding the due date.

Management Fees

We are committed to pay our key executives a total of approximately \$450,000 per year for management services.

Office Leases

We are currently leasing office premises in New Mexico, Texas, and Wyoming for monthly payments totaling \$10,645. All office lease agreements having a maximum term of no more than three years.

Purchase of Significant Equipment

Effective May 29, 2007, we committed to spend approximately \$140,000 to acquire a PFN assay tool and \$120,000 to build a second logging truck which is currently under construction. As of the date of this Quarterly Report a total of \$65,000 has been paid towards these commitments and has been included with vehicles.

OFF-BALANCE SHEET ARRANGEMENTS

As of the date of this Quarterly Report, we do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors. The term "off-balance sheet arrangement" generally means any transaction, agreement or other contractual arrangement to which an entity unconsolidated with us is a party, under which we have: (i) any obligation arising under a guaranteed contract, derivative instrument or variable interest; or (ii) a retained or contingent interest in assets transferred to such entity or similar arrangement that serves as credit, liquidity or market risk support for such assets.

CRITICAL ACCOUNTING POLICIES

Use of Estimates

The preparation of financial statements in conformity with United States generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities at the date of the financial statements and revenues and expenses during the period reported. By their nature, these estimates are subject to measurement uncertainty and the effect on the financial statements of changes in such estimates in future periods could be significant. Significant areas requiring management's estimates and assumptions are determining the fair value of transactions involving common stock, valuation and impairment losses on mineral property acquisitions, valuation of stock-based compensation, and valuation of available-for-sale securities. Other areas requiring estimates include allocations of expenditures to resource property interests and depreciation of property and equipment. Actual results could differ from those estimates.

Mineral Property Costs

The Company is primarily engaged in the acquisition, exploration and development of mineral properties.

Mineral property acquisition costs are initially capitalized as tangible assets when purchased. At the end of each fiscal quarter end, the Company assesses the carrying costs for impairment. If proven and probable reserves are established for a property and it has been determined that a mineral property can be economically developed, costs will be amortized using the units-of-production method over the estimated life of the probable reserve.

Mineral property exploration costs are expensed as incurred.

Estimated future removal and site restoration costs, when determinable are provided over the life of proven reserves on a units-of-production basis. Costs, which include production equipment removal and environmental remediation, are estimated each period by management based on current regulations, actual expenses incurred, and technology and industry standards. Any charge is included in exploration expense or the provision for depletion and depreciation during the period and the actual restoration expenditures are charged to the accumulated provision amounts as incurred.

As of the date of these financial statements, the Company has not established any proven or probable reserves on its mineral properties and incurred only acquisition and exploration costs.

Databases

Costs related to internally developed databases are expensed as incurred. Costs of acquired mineral property databases are capitalized upon acquisition. Mineral property data bases are tested for impairment whenever events or changes indicate the carrying value amount may not be recoverable. An impairment loss is recognized if it is determined that the carrying amount is not recoverable and exceeds fair value. Mineral property databases are amortized over five

years using the straight-line method.

Restoration and Remediation Costs (Asset Retirement Obligations)

Various federal and state mining laws and regulations require the Company to reclaim the surface areas and restore underground water quality for its mine projects to the pre-existing mine area average quality after the completion of mining. In August 2001, the FASB issued Statement of Financial Accounting Standards ("SFAS") No. 143, "Accounting for Asset Retirement Obligations," which established a uniform methodology for accounting for estimated reclamation and abandonment costs.

In March 2005, the FASB issued Interpretation 47 ("FIN 47"), "Accounting for Conditional Asset Retirement Obligations"--an interpretation of FASB No. 143. FIN 47 clarifies that the term "conditional asset retirement obligation" as used in SFAS No. 143 refers to a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. The obligation to perform the asset retirement activity is unconditional even though uncertainty exists about the timing and/or method of settlement. FIN 47 requires a liability to be recognized for the fair value of a conditional asset retirement obligation if the fair value of the liability can be reasonably estimated.

Future reclamation and remediation costs are accrued based on management's best estimate at the end of each period of the costs expected to be incurred at each project. Such estimates would be determined by the Company's engineering studies calculating the cost of future surface and groundwater activities.

Impairment of Long-Lived Assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Recoverability of these assets is measured by comparison of its carrying amount to future undiscounted cash flows the assets are expected to generate.

Recent Accounting Pronouncements

In July 2006, FASB issued Interpretation No. 48. This interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS Statement No. 109, "Accounting for Income Taxes" ("FIN 48"). This Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The Company adopted FIN 48 as of January 1, 2007. The adoption of FIN 48 did not have an impact on the Company's financial statements during the current period.

In September 2006, FASB issued SFAS No. 157, "Fair Value Measurements" ("SFAS 157"). The objective of SFAS 157 is to increase consistency and comparability in fair value measurements and to expand disclosures about fair value measurements. SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 applies under other accounting pronouncements that require or permit fair value measurements and does not require any new fair value measurements. The provisions of SFAS 157 are effective for fair value measurements made in fiscal years beginning after November 15, 2007. The Company is currently assessing the impact of SFAS 157 on its financial position and results of operations.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". This Statement permits entities to choose to measure many financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings.

SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. The Company is currently assessing the impact of SFAS No. 159 on its financial position and results of operations.

Item 3. Controls and Procedures

Management's Consideration of the Restatement

Prior to filing this Amended Report, our management, with the participation of the Chief Executive Officer and Chief Financial Officer, reconsidered their conclusions regarding the effectiveness of disclosure controls and procedures and our internal controls over financial reporting as at October 31, 2007 in light of and giving consideration to the facts and circumstances of the restatement.

In assessing whether our disclosure controls and procedures and our internal controls over financial reporting were effective as of October 31, 2007 management considered the impact of the restatement to our interim financial statements for the three months ended October 31, 2007 as outlined in Note 13, as well as our control environment.

Management has concluded that the re-evaluation of the impairment analysis performed at the end of each respective period and the correction for errors in recording database related transactions represents a material weakness in our internal control over financial reporting as of October 31, 2007. Accordingly, our management has concluded that our disclosure controls and procedures and internal controls over financial reporting were not effective as of October 31, 2007.

We have had in place, since fiscal 2007, an effective asset impairment control to, among other things, detect, value and record indications of impairment that could result in the carrying value of an asset not being recoverable. Additionally, since fiscal 2007, we have had in place effective capital asset transaction controls to, among other things, detect, value and record capital asset acquisitions, disposals and depreciation. Between the filing of the Original Quarterly Report and the Amended Report, we made improvements to our controls to detect, value and record indications of impairment on long-lived assets as well as controls relating to our capital asset transactions. As a component of our improvements, management has instituted a policy in order to mitigate such future occurrences, whereby we will seek third party independent professional advice when faced with complex accounting issues or where interpretation of policies or regulations is required or warranted.

Financial Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures. Based upon the results of that evaluation as well as the consideration of the restatement, our Chief Executive Officer and Chief Financial Officer have concluded that, as at October 31, 2007 our disclosure controls and procedures were not effective to provide reasonable assurance that the information required to be disclosed by us in reports we file is recorded, processed, summarized and reported within the appropriate time periods and forms.

Management believes that it has remediated the deficiency in our disclosure controls and procedures related to the detection, valuation and recording of impairments in our long-lived assets as well as our controls and procedures relating to our capital asset transactions.

Internal Control Over Financial Reporting

Our management, under the supervision of our Audit Committee and our Chief Executive Officer and Chief Financial Officer, are responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our controls include policies and procedures that:

- Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and our receipts and expenditures are made only in accordance with authorizations of management and our directors; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the annual financial statements or interim financial statements.

As noted above, management has concluded that a deficiency existed with respect to the detection, valuation and recording of impairments in our long-lived assets in period ended October 31, 2007 and that this deficiency constituted a material weakness in our internal controls as at October 31, 2007. Additionally, management has concluded that a deficiency existed with respect to the detection, valuation and recording of capital asset transactions in period ended October 31, 2007 and that this deficiency constituted a material weakness in our internal controls as at October 31, 2007. As a result of these material weakness, management has concluded that our disclosure controls and procedures and internal controls over financial reporting were not effective as of October 31, 2007.

We have had in place, since fiscal 2007, an effective asset impairment control to, among other things, detect, value and record indications of impairment that could result in the carrying value of an asset not being recoverable. Additionally, since fiscal 2007, we have had in place effective capital asset transaction controls to, among other things, detect, value and record capital asset acquisitions, disposals and depreciation. Between the filing of the Original Quarterly Report and the Amended Report, we made improvements to our controls to detect, value and record the impairment of our long-lived assets as well as controls relating to our capital asset transactions.

Limitations of Controls and Procedures

Our management, including our Chief Executive Officer and Chief Financial Officer, believe that any disclosure controls and procedures or internal controls over financial reporting, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, they cannot provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by unauthorized override of the control. The design of any systems of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Accordingly, because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.

Audit Committee Report

The Board of Directors has established an audit committee. The members of the audit committee are Mr. Erik Essiger, Mr. Ivan Obolensky and Mr. Vincent Della Volpe. The three members of the audit committee are "independent" within the meaning of Rule 10A-3 under the Exchange Act. The audit committee was reorganized in July 2007 and operates under a written charter adopted by our Board of Directors.

The audit committee has reviewed and discussed with management our unaudited financial statements as of and for the three month period ended October 31, 2007. The audit committee has also discussed with Ernst & Young LLP the matters required to be discussed by Statement on Auditing Standards No. 61, Communication with Audit Committees, as amended, by the Auditing Standards Board of the American Institute of Certified Public Accountants. The audit committee has received and reviewed the written disclosures and the letter from Ernst & Young LLP required by Independence Standards Board Standard No. 1, Independence Discussions with Audit Committees, as amended, and has discussed with Ernst & Young LLP their independence.

Based on the reviews and discussions referred to above, the audit committee has recommended to the Board of Directors that the unaudited financial statements referred to above be included in our Quarterly Report on Form 10-QSB for the three month period ended October 31, 2007 filed with the Securities and Exchange Commission.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Management is not aware of any legal proceedings contemplated by any governmental authority or any other party involving us or our properties. As of the date of this Quarterly Report, no director, officer or affiliate is (i) a party adverse to us in any legal proceeding, or (ii) has an adverse interest to us in any legal proceedings. Management is not aware of any other legal proceedings pending or that have been threatened against us or our properties.

Item 2. Changes in Securities and Use of Proceeds

Epoch Financial Group, Inc.

On February 1, 2007 the Company entered into the Epoch Financial Consulting Agreement. In accordance with the terms and provisions of the Epoch Financial Consulting Agreement, on November 6, 2007 we issued 10,000 shares of our restricted common stock.

Share Purchase Warrants

During the three months ended October 31, 2007 and through the date of this Quarterly Report, we issued an aggregate of 13,900 shares of our common stock pursuant to the exercise of 13,900 stock purchase warrants for net proceeds of \$34,750.

Stock Options

On November 27, 2007, the Company filed a registration statement on Form S-8 with the SEC to register for resale an aggregate of 5,500,000 shares of the Company's common stock, par value \$0.001 per share, issuable by the Company

pursuant to awards to eligible participants under its 2006 Stock Incentive Plan. As a result all 10,000,000 shares of the Company's common stock both issued and available for issuance under the Company's 2006 Stock Incentive Plan have now been registered for resale with the SEC.

During the three months ended October 31, 2007 and through the date of this Quarterly Report, we issued an aggregate of 100,000 restricted shares of our common stock pursuant to the exercise of 100,000 stock options for net proceeds of \$130,000.

During the three months ended October 31, 2007 and through the date of this Quarterly Report, we granted an aggregate amount of 660,000 stock options to certain officers, directors, employees and consultants having an exercise price of \$3.80 per share and a 10 year expiry period.
