**Trading Update  
SkyePharma Reaffirms Guidance for 2003 Full Year**

LONDON, ENGLAND, July 21, 2003 -- SkyePharma PLC (Nasdaq: SKYE; LSE: SKP) is pleased to provide a trading update at the end of the first six months of 2003. Revenues for the first half are likely to be lower than in the comparable period of the previous year. This primarily arises because of the timing and recognition of milestone payments, still the major source of revenue. Because of the sensitivity of results to revenues, the Company expects to report a net loss for the first half substantially greater than management had expected in April when it advised that there might be a loss for the first half. However the Company remains confident that revenues and profitability for the 2003 full year will still be in line with previous guidance.

Chief Executive Michael Ashton said "We are gratified by a continuing steep increase in royalty income but the majority of our revenues in 2003 will still arise from milestone payments, the timing and magnitude of which are naturally difficult to forecast. I am pleased to announce that we have been able to conclude a number of transactions in the first half, not least the acquisition of rights to DepoCyte from Elan and the relicensing of those rights to MundiPharma announced today. However a number of important new deals that we had expected to close in the first half of the year are now likely to be concluded in the second half, continuing the trend of recent years when the majority of our revenues have been generated in the latter part of the year. Because of this revenue mix, we said in April that we might report a loss for the first half and this has turned out to be the case.

"We continue to expect sustained profitability and growth for the full year and for future years. Over the next few years, a growing proportion of our revenues will come from more predictable and less erratic royalty income and profit share, generated by products such as DepoMorphine ."

**Notes to Editors**

**About SkyePharma**

SkyePharma PLC uses its world-leading drug delivery technology to develop easier-to-use and more effective formulations of drugs. The majority of challenges faced in the formulation and delivery of drugs can be addressed by one of the Company's proprietary technologies in the areas of oral, injectable, inhaled and topical delivery, supported by advanced solubilisation capabilities.
