

Edgar Filing: BP PLC - Form 6-K

BP first announced the intention of separating its olefins and derivatives business from its petrochemicals portfolio in April 2004 with an initial public offering (IPO) as one, possible, disposal option. In the interim, it received a number of approaches from companies considering a trade sale leading to this decision instead of the IPO.

Browne said that the decision to sell Innovene in its entirety removed any uncertainty around market conditions at the time of an IPO, as well as would-be investors' concerns about BP's remaining stake and future intentions.

"Consistent with existing BP practice, we remain committed to returning excess free cash flow, including the net proceeds of this sale, to shareholders," he added.

"This is a transformational acquisition elevating INEOS to the world's fourth largest independent petrochemicals company," said Jim Ratcliffe, INEOS Chief Executive. "INEOS and Innovene share a BP heritage of high quality people, assets and technology and are highly complementary businesses."

Innovene is the 100 per cent BP-owned group created in April 2005. It has 8,000 staff, manufacturing facilities in seven countries in North America and Europe; \$18 billion revenues in 2004; \$13 billion of gross assets; \$9.9 billion of net assets; pre-tax profits (Jan-Jun 2005) of \$0.7 billion; 18 million tonnes of annual petrochemicals capacity and 412,000 barrels per day of crude oil refining capacity.

Innovene's chief executive is Ralph Alexander and its chief financial officer is Mark Tomkins. Innovene manufactures olefins and related products which are the raw materials for plastics, packaging and textiles industries; and operates two refineries in Europe.

BP was jointly advised by Goldman Sachs and Morgan Stanley on the IPO and sale.

Notes to editors:

BP announced the separation of its olefins and derivatives business in April 2004. It then added two refineries (Grangemouth, UK, and Lavera, France) to the business in November 2004, and created the 100% BP-owned Innovene subsidiary in April 2005.

BP is the world's second largest integrated oil and gas company, operating in more than 100 countries with over 100,000 staff and turnover of \$285 billion. INEOS is a leading global manufacturer of speciality petrochemicals and comprises 10 business units each with a major chemical company heritage. Its production network spans 46 manufacturing facilities in 14 countries.
