Digitalization (%)	96.5	95.9	0.6 p.p.

1/ EBITDA = operating income + depreciation

2/ Includes ADSL clients

Highlights of the Period

ADSL - is offered under the brand name **SPEEDY** and reached 423,548 clients in September 2003, increasing 10.5% in relation to the 2Q03, when there were 383,167 clients. In relation to the 306,539 clients in September 2002, the growth is 38.2%.

The EBITDA margin accumulated until September 2003 was 46.5% and reached 48.2% in the 3Q03, the highest values registered within the year, confirming a growth trend. It is worth noting that the revenues increased in both periods. The reductions of 5.1 p.p. and 5.3 p.p. respectively are mainly explained by the increases in the interconnection expenses, which were caused by the increased long distance and fixed-to-mobile traffic. It is worth mentioning that the average margin presented by the Company is higher than the margin shown by the Long Distance services. The increase in certain direct taxes and outsourcing expenses also contributed to these effects. The EBITDA in absolute terms reached R\$ 4,000.0 million in the 9M03.

Net operating revenues until September 2003 reached R\$8,608.6 million. Compared with the R\$7,338.0 million recorded in the same period of last year, it shows an R\$1,270.6 million or a 17.3% raise. This results from the average tariff increase based on the IPCA since June 2003 and mainly by the introduction of the domestic and international long distance services in mid 2002, as well as business communications, due to the growth in the SPEEDY service. Net revenues for the 3Q03 compared to the 3Q02 grew R\$565.7 million, or 21.9%, due to the same reasons.

Domestic and International Long Distance The number of minutes of Domestic Long Distance grew 13.5% when comparing the 9M03 to the numbers for the 9M02 and remains stable (-0.8%) when the 3Q03 is compared to the 2Q03. International Long Distance showed a growth of 6.9% in the 3Q03 compared to the 2Q03. The growth in the monthly long distance traffic per average line in service kept the positive trend, confirming the success of the campaign Super 15 that followed the authorization of Anatel to operate these services on July 29, 2002 and May 07, 2002, respectively, after the anticipation of the universalization targets. In March 2003, mainly focusing on the corporate segment, the Company started to deploy the Long Distance service for calls outgoing from other states of Brazil, as part of its strategy. Telesp should thus consolidate its solid position in these business lines, maintaining its participation in these markets relatively stable.

The Capex (contracted) accumulated as of September 2003 was R\$850 million. These numbers are in line with the requirements of the Company.

The total indebtedness of the Company as of September 30, 2003 was R\$2,795.9 million and once adding R\$295.0 million related to temporary losses in derivative operations, it raises to R\$3,090.9 million. The net debt of the Company of R\$2,241.0 million resulted from subtracting R\$849.9 million of cash and cash equivalent.

Highlights about revenues

Gross Operating Revenues for the 9M03 reached R\$11,818.5 million, an R\$1,880.8 million or 18.9% increase compared to the same period of the previous year. In the 3Q03, it reached R\$4,346.0 million and when compared with the same period of last year, showed a growth of R\$827.2 million, or 23.5%. As of September 30, 2003, the Company did not register any client with an outstanding bill that surpassed the 1% of the total accounts receivable.

The changes are explained as follows:

Monthly Rental Charge: totaled R\$3,115.3 million in the 9M03, representing an increase of R\$321.3 million, or 11.5% compared to the 9M02, due to the IPCA-based tariff increase since June 2003, partially offset by the 1.1% reduction in the average number of lines in service. When comparing the 3Q03 with the 3Q02, there was an increase of R\$156.4 million, or 15.7%, for the same reasons.

Installation Charge: amounted to R\$81.6 million in September 2003, a decrease of R\$1.3 million or 1.5% when compared to the same period of last year, due to the lower number of new added clients in 2003. When comparing the 3Q03 with the 3Q02, there was a decrease of R\$2.3 million, or 7.1%, due to the same reasons.

Local Service Revenues: registered revenues of R\$2,203.5 million for the 9M03, showing an increase of R\$257.7 million or 13.2% compared to the 9M02, explained by the IPCA-based tariff increase since June 2003 and a 1.8% traffic growth (exceeding pulses). When comparing the 3Q03 with the 3Q02, there was an increase of R\$149.3 million, or 22.1%, due to the same reasons.

Others: reached R\$555.6 million in the 9M03, representing a R\$44.0 million or 8.6% increase when compared with the 9M02, highlighting the revenues from Intelligent line services partially offset by the reduction in the revenues from the digital 2M-ATB (Two Megabits-Area of Basic Tariff) access, assistance to directories consulting and resale of merchandise. When comparing the 3Q03 with the 3Q02, there was an increase of R\$20.4 million, or 11.5%, due to the same reasons.

DLD: reached R\$1,745.9 million in the 9M03, presenting an increase of R\$684.1 million, or 64.4%, compared to the 9M02. When comparing the 3Q03 with the 3Q02, there was an increase of R\$343.6 million, or 82.6%. The increase of revenues was helped by the start of operations of the long distance carrier selection in 2002 and extended to the Personal Mobile Service (SMP) in July 2003. The increase in revenues is explained by the following reasons:

Long distance (intra-state): totaled R\$1,291.7 million in the 9M03, growing R\$296.1 million, or 29.7%, when compared to the 9M02, mainly because of the IPCA-based tariff increase since June 2003. When comparing the 3Q03 with the 3Q02, there was an increase of R\$218.3 million, or 62.4%.

Long distance (inter-state): reached R\$454.2 million in the 9M03, showing an increase of R\$388.0 million, or 586.1% when compared to the 9M02, taking into consideration that this service was first deployed on July, 29th 2002. When comparing the 3Q03 with the 3Q02, there was an increase of R\$125.3 million, or 189.3%.

Inter-network revenues:

Fixed-to-mobile revenues: amounted to R\$2,611.9 million in the 9M03, presenting an increase of R\$491.8 million or 23.2% compared to the 9M02. This was due to both the traffic growth and the tariff adjustment in February, 2003 for VC1/VP1 (average increase of 17.1%), VC2/VP2 (increase of 21.99%), and the introduction on July 29, 2002 of the inter-state, or VC3, which registered a 21.99% tariff increase in February 2003. When comparing the 3Q03 with the 3Q02, there was an increase of R\$106.5 million, or 14.1%, due to the same reasons.

ILD: on April 2002, ANATEL (National Telecommunications Agency) authorized Telefónica to provide international long distance calls with the access code 15, following the anticipation in more than two years of the ANATEL S universalization targets. In that sense, revenues of R\$74.0 million were achieved in the 9M03, against R\$17.7 million registered in the 9M02. When comparing the 3Q03 with the 3Q02, there was an increase of R\$17.1 million or 133.2%, mainly due to the solid position achieved by this operation in the market.

Interconnection Revenues: amounted R\$829.9 million in the 9M03, showing a reduction of R\$113.0 million or 12.0% when compared with the 9M02, mainly due the start of operations of the long distance carrier selection in 2002, which was extended to the Personal Mobile Service (SMP) in July 2003. When comparing the 3Q03 with the 3Q02, there was a reduction of R\$28.3 million, or 9.4% for the same reasons.

Public Telephony: totaled R\$178.8 million in the 9M03, and when compared to the 9M02, it grew R\$41.7 million or 30.4%, mainly due to the IPCA-based tariff increase since June 2003, the increase of revenues from other operators related to the use of inductive cards in São Paulo and the reduction in the payments to other operators. It is worth noting that revenues from the sale of public telephone cards are deferred and accounted for, when the cards are effectively used, according to the change of the accounting procedure applied since December 2002. When comparing the 3Q03 with the 3Q02, there was an increase of R\$23.1 million, or 55.6%, mainly due to the increase in the use of telephone cards and the tariff increases in June 2003.

Business Communication: revenues for the 9M03 reached R\$418.5 million, a R\$97.4 million or 30.3% increase regarding the 9M02. The increase was mainly caused by the growth in the SPEEDY service. When comparing the 3Q03 with the 3Q02, there was an increase of R\$40.9 million, or 36.8%, due to the same reasons. The installation fee revenues are also included in this item.

Operating Expenses Highlights

Operating Expenses accumulated for the 9M03 reached R\$4,608.8 million, an increase of R\$1,057.9 million or 29.8% compared to the 9M02. When comparing the 3Q03 with the 3Q02, there was an increase of R\$431.4 million, or 35.9%, explained as follows:

Personnel expenses totaled R\$452.2 million in the 9M03, growing R\$7.5 million or 1.7% compared to the 9M02, mainly due to the increase of the expenses related to the early retirement program executed to adapt the work force during the first quarter of 2003. The salary increase of 6% which was applied starting on January 2003 and the bonus program for employees (SRE) also contributed to this increase. These effects were partially offset by a reduction in the average headcount of 16.8%. When comparing the 3Q03 with the 3Q02, there was a reduction of R\$8.6 million, or 6.8%, due to the headcount reduction in March 2003.

General and administrative expenses for the 9M03 reached R\$3,616.1 million, representing an increase of R\$866.1 million, or 31.5% compared to the 9M02. When comparing the 3Q03 with the 3Q02, there was an increase of R\$362.0 million, or 36.8%.

Annual disclosure

Quarterly disclosure

The General and Administrative Expenses changes are explained as follows:

- a) *Materials* reached R\$78.9 million showing a R\$5.0 million or 5.9% reduction, when compared to the 9M02, mainly due to a fall in the costs of merchandize sold and materials for public telephone cards, partially offset by the increase in the expenses of material for plant maintenance. In the quarterly comparison (3Q03 vs. 3Q02), there was a reduction of R\$3.4 million, or 13.1%, for the same reasons.
- b) *Outsourcing expenses* increased R\$251.7 million or 22.6% when comparing the 9M03 with the 9M02, largely as the result of the increased expenses in network maintenance, outsourcing of data processing services and telemarketing, partially offset by the reduction of the expenses to produce telephone directories. In the quarterly comparison (3Q03 vs. 3Q02), there was an increase of R\$76.0 million, or 18.2%, for the same reasons.
- c) *Inter-connection expenses* grew R\$612.9 million or 43.5% when comparing the 9M03 with the 9M02 due to the new DLD and ILD services and the begin of the long distance carrier selection in 2002, extended to the Personal Mobile Service (SMP) in July 2003. In the quarterly comparison (3Q03 vs. 3Q02), there was an increase of R\$291.0 million, or 59.2%, for the same reasons.

- d) *Other Expenses* for the 9M03 went up R\$6.5 million, or 4.5%, compared to the 9M02 mainly due to the increase of the provision for pole rental, which had the unitary value increased from November 2002 on, partially counterbalanced by the reduction in infrastructure rental. When comparing the 3Q03 with the 3Q02, there was a reduction of R\$1.6 million, or 3.2%, due to the reduction in the total value of pole rental and rights of usage, partially offset by the increase of expenses related to duct rental.

Taxes showed an increase of R\$51.9 million, or 45.2%, when comparing the 9M03 and the 9M02, chiefly due to the accounting of the expenses related with PIS on Other Revenues, in the amount of R\$22.2 million, which were previously recorded as contingency, and in accordance with the new legislation of PIS, in place since December 2002. Said legislation also increased the rate of the PIS from 0.65% up to 1.65% depending of the type of services rendered. Due to the increase in revenues, there was also an increase in FUST of R\$14.7 million and FUNTTEL of R\$7.4 million. In the quarterly comparison (3Q03 vs. 3Q02), there was an increase of R\$11.7 million, or 28.6%, mainly due to FUST (increase of R\$6.3 million) and FUNTTEL (increase of R\$3.1 million).

Provisions for bad debt presented an increase of R\$55.7 million, or 20.2%, comparing the 9M03 and the 9M02. It corresponds to 3.9% of total net revenues (showing a slight improvement for this indicator). The main reasons are the increase in revenues, as well as the adoption of conservative accounting procedures. Nevertheless, the Company continues focusing its efforts to keep this variable under control, which showed a relatively stable pattern during the last quarters.

Other operating revenues (expenses) registered a loss of R\$38.6 million in the 9M03 compared to the profit of R\$12.0 million in the 9M02, which represents a negative variation of R\$50.6 million. The main reasons are the net increase (expenses minus provision reversions) related to the labor, civil and tax disputes, losses with operational stock and complement of the Provision for the Plan of Benefits. Such factors were partially offset by the increase in revenues from fines and increase in revenues from shared infrastructure rental.

Depreciation grew R\$20.6 million, or 1.0%, in the 9M03 compared to the 9M02 due to the new installed lines and the subsequent activation of assets and facilities. When comparing the 3Q03 with the 3Q02, there was an increase of R\$19.1 million, or 2.6%, for the same reasons.

Net Financial Revenues / (Expenses): the negative net financial result amounted R\$488.9 million during the period, presenting a reduction of R\$75.1 million compared to the same period of last year, mainly as a result of the reduction of the net indebtedness of the Company. The indebtedness and operating result of the Company are significantly affected by the risk of the exchange rate. On September 30, 2003, 100% of the financial debt was denominated in foreign currency (American dollar, Canadian dollar and yen) and 100% of the indebtedness was covered by active positions in hedge operations (swap to CDI). The swap transactions were executed to cover the total volume of debt related to foreign currency.

Net Financial Revenues	Variation			
	Sep/03	Sep/02	%	R\$ MM
Annual Comparison- R\$ MM				
Results of Financial Operations	149.9	36.8	307.3	113.1
Hedge	(1,110.4)	1,766.3	(162.9)	(2,876.7)
CPMF (Tax on financial transactions)	(56.7)	(41.8)	35.6	(14.9)
Financial Revenues	67.4	68.4	(1.5)	(1.0)
Financial Expenses	(341.9)	(261.5)	30.7	(80.4)
Exchange Variation	802.8	(2,132.2)	(137.7)	2,935.0
Net Financial Revenues	(488.9)	(564.0)	(13.3)	75.1

NON-OPERATING REVENUES (EXPENSES) presented a positive evolution in the amount of R\$15.3 million when comparing the accumulated results till September 2003 and September 2002. This was mainly caused by the positive outcome in the sale and write-off of fixed assets amounting to R\$18,6 million and gains in other revenues in the amount of R\$8,7 million, partially counterbalanced by the inexistence in 2003 of the gains from the recovery of ICMS (sales taxes) that in 2002 reached R\$7,5 million and by the reduction in R\$3,4 million of collected fines in the 9M03 versus 9M02. In the 3Q03 x 3Q02 comparison, the R\$1,3 million reduction is mainly caused by smaller results in the sale of fixed assets and collected fines.

LOANS AND FINANCING: As of September 30, 2003, the Company had R\$2,795.9 million (R\$3,095.4 million as of June 30, 2003) in loans and financing denominated in foreign currency, from which R\$1,826.8 million (R\$2,190.3 million as of June 30, 2003) were obtained at fixed interest rates, and R\$969.1 million (R\$905.1 million as of June 30, 2003) were obtained at variable interest rates (Libor). Even though most of the debt has been contracted at fixed interest rates in foreign currency, the Company contracts hedge operations to tie all the debt to the local currency, with floating interest rates indexed to the CDI. As a result, the financial results of the Company are affected by the variations of that rate. On the other hand, the Company invests the surpluses of cash and cash equivalents (financial applications) of R\$849.9 million (R\$356.7 million as of June 30, 2003) mainly in short-term instruments, based on the variation of the CDI. Book value of those instruments is close to market value, because of the short-term maturity.

RECENT AND IMPORTANT EVENTS

CVM edict # 371 Pension Plan Accounting Procedures: The Company chose to register the liabilities related to pension plans directly in the net equity as of December 31, 2001, net from the corresponding tax effects, according to the Edict CVM # 371 published on December 13, 2000. As of December 31, 2002, the Company chose to immediately register all the actuary gains and losses in the financial statements. In the actuary valuation of those pension plans, the projected unitary credit method was adopted, being the assets of the plans accounted as of November 30, 2002 and November 30, 2001, respectively. For the cases of multi-sponsored plans (PAMA and PBS-A), the valuation of assets was done based on the Company's liabilities for pension plans in relation to the total liabilities of the pension plan. The total value of the registered liability until September 30, 2003 was R\$157.0 million.

Telesp acquires the IP Network from Telefônica Empresas: On December 10, 2002, the management of Telecomunicações de São Paulo Telesp announced that its Board of Directors, on session held on December 10, 2002, decided to approve the proposal for the purchase, from Telefônica Empresas, of the business composed by the assets and contracts with customers related to the following services: (i) Switched IP (Internet Protocol): Services and infrastructure that allow the establishment of switched connections of remote users through the dial-up network; (ii) Speedy Link: Service rendered to Internet Service Providers (ISPs), that allows them to offer to their clients the use of the broad band access to internet named Speedy. Furthermore, the Company wants to clarify that: (a) The present transaction is interesting to the Company since it enables the optimization of its operations, increases of synergies, in network development and speed in the commercial response to the market, as well as the establishment of business strategies; (b) The value of the purchase of the aforementioned services, their respective assets and contracts with clients was determined to be R\$ 143,910,000.00 (one hundred forty three million, nine hundred ten thousand reais), according to the valuation made by an independent company, KMPG Corporate Finance S/C Ltda.; (c) Telesp requested the proper authorization from Anatel in order to deploy the Multimedia Communication Service (SCM), thus allowing the Company the direct exploitation of the services related to the assets/businesses to be acquired.

Modification of the Company's bylaws: the Extraordinary General Shareholders Meeting, held on December 30, 2002 approved the modification of the heading of the article 7 and the 1st paragraph of article 27, and the removal of article 26 of the Company's bylaws, in order to

adapt them to Law # 10303/01. Such modification refers to the fact that the preferred shares will have a secured priority in the reimbursement of capital, without premium, and will receive a dividend, in an amount that is 10% (ten per cent) higher than the one granted to each common share. This dividend substitutes the minimum dividend, non accumulative, of 6% (six per cent) per year of the value resulting by dividing the subscribed capital by the total number of shares of the Company, previously stated in the heading of article 7.

Declaration of Interest on the Company's Net Worth and Complementary Dividends - Fiscal Year 2002: The Interests on the Company's Net Worth and dividends approved at the Extraordinary General Shareholders Meeting held on March 27, 2003 in the amounts of R\$497,486,300 net from income tax and R\$102,512,875, respectively, started to be paid on April 23, 2003.

(*) 10% higher than the dividend granted to each common share, in accordance with article 7 of the Company's bylaws.

On August 14, 2003, according to the minutes of the 15th Extraordinary General Shareholders Meeting, the cancellation of 803,447,229 Treasury shares was approved, of which 721,629,917 were common shares and 81,817,382 were preferred shares, all without par value and in book-entry form. It produced no reduction in the share capital of the Company, since such cancellation was charged to the Capital Reserves.

SUBSEQUEN EVENT

On October 03, 2003, the Company notified the shareholders about the declaration of interim dividends related to the fiscal year 2003. The Board of Directors discussed, on its session held on October 02, 2003, *ad referendum* of the General Shareholders Meeting, the proposal of the Executive Management for the declaration of interim dividends in an amount of R\$1,803.0 million, based on the accumulated earnings of the balance sheet as of June 30, 2003 and according to article 28 of the Company's bylaws and articles 204 and 205 of Law # 6,404/76. Common and preferred shareholders registered in the Company's shareholder book by the end of the day on October 02, 2003 were able to receive such dividends. The payment was started on October 20, 2003. It was also decided that the declared dividends would be charged to the value of the minimum mandatory dividends related to the fiscal year 2003.

ADDITIONAL NOTES

On June 26, 2003, through Edicts #37,166 and #37,167, the Agência Nacional de Telecomunicações ANATEL approved the tariff adjustment for the Switched Fixed Telephony Service (STFC) according to the criteria established in the Local and Domestic Long Distance Concession Contracts, to be effective starting on June 30, 2003 and for sector 33 (former CETERP) since July 03, 2003. The local basic plan had an average readjustment of 28.75%, incorporating the productivity gain of 1%, while the net tariffs of the long distance basic plan of services had an average readjustment of 24.84%, incorporating the productivity gain of 4%, in accordance with the established on the concession contract. The net values of the other services and features included in the STFC were readjusted by 30.05%, on average. Nevertheless, a legal injunction led to a decision that suspended the effects of Anatel's edicts and ordered to apply the Consumer Price Index IPCA instead of the General Price Index IGP-DI in the calculation formulas contained in the clauses 11.1 and 11.2 of the concession contracts of public telephony services. Said decision has been appealed and is still pending of definitive judgment, when the index to be applied to the readjustment will be announced.

On July 06, 2003, the mobile telephone operating companies started to implement the long distance carrier selection. It enables the client to determine the long distance carrier for each domestic long distance call (VP2 and VP3) or international call, according to the SMP Mobile Personal Service rules. Consequently, the Company started to acknowledge the revenues from said services and, at the same time, started to pay to the mobile telephone operators for the use of their networks.

Tables

Table 1 shows the shareholding structure for Telesp and the historical summary. Table 2 has Telesp Income Statement. Table 3 and the Table 4 show, respectively, the balance sheets and the operating highlights for TELESP. Table 5 shows tariffs rates, depreciation and Capex. Finally, Table 6 shows loans and financing, hedging, inflation and foreign exchange rate figures.

Note: This press release contains forward-looking statements. Statements that are not statements of historical fact, including statements about the beliefs and expectations of the Company management are forward looking statements. Some words are intended to identify these statements, which necessarily involve known and unknown risks and uncertainties. Accordingly, the actual results of operations of the Company may be different from the current Company expectations, and the reader should not place undue reliance on these forward looking statements. Forward-looking statements speak only as of the date they are made and the Company does not undertake any obligation to update them in light of new information or future developments.

Tagline

Telecomunicações de São Paulo S/A - TELESP since November 30, 1999 (due to a corporate restructuring) is the new name of Telesp Participações S/A., a corporation organized under the laws of the Federal Republic of Brazil, formed upon the reorganization of Telecomunicações Brasileiras S.A., in May 22, 1998. TELESP is the principal supplier of fixed line public telecommunications services in the Brazilian state of São Paulo. The Brazilian Government sold its stake in TELESP PARTICIPAÇÕES thus privatizing the Company on July 29, 1998. TELESP's operating concession expires on December 31, 2005, at which point it can be extended for a period of 20 years.

Telecomunicações de São Paulo S/A - TELESP acquired, in December 1999, voting and non voting shares of Centrais Telefônicas de Ribeirão Preto S/A - CETERP. The CETERP cellular operating division was sold afterwards.

In October 10, 2000, the Board of Directors approved the creation of an integral subsidiary to provide package network switched services and afterwards the Company promoted the partial spin-off of this subsidiary which is a listed company.

Edgar Filing: TELESP PARTICIPACOES SA - Form 6-K

TELESP's business, services and tariffs have been regulated by ANATEL (Agência Nacional de Telecomunicações) since June 16, 1997, according to various decrees, decisions, plans and regulatory measures.

TELESP became the first operator to file the corresponding information of the accomplishment of Anatel's targets. ANATEL has already granted the license, to permit Telesp to offer domestic and international long distance services to its customers, and also to extend its business out of its concession area (São Paulo) to the whole country.

The international long distance services started to be deployed on May 7, 2002 while the domestic long distance services were not being rendered in that period due to a legal injunction. For the same reasons, the domestic long distance services started to be deployed on July 29, 2002.

The Board of Directors of ANATEL, on its 240th meeting held on January 29, 2003 granted Telecomunicações de São Paulo, S.A. - Telesp the authorization to exploit the Multimedia Communications Service (SCM) nationwide. The Company may offer voice and data services through points of presence, composed of networks and telecommunication circuits.
