**Earnings Release for the Six Months Ended September 30, 2006**

---

Consolidated financial results of NTT DoCoMo, Inc. (the Company) and its subsidiaries (collectively we or DoCoMo) for the six months ended September 30, 2006 (April 1, 2006 to September 30, 2006), are summarized as follows.

**<< Highlights of Financial Results >>**

For the six months ended September 30, 2006, operating revenues were ¥2,383.4 billion (up 0.4% compared to the same period of the prior year), operating income was ¥516.9 billion (down 7.4% compared to the same period of the prior year), income before income taxes was ¥520.3 billion (down 17.8% compared to the same period of the prior year) and net income was ¥309.8 billion (down 19.6% compared to the same period of the prior year).

Earnings per share were ¥7,005.67 and EBITDA margin\* was 36.9%, down 1.3 point compared to the same period of the prior year, and ROCE\* was 10.7%, down 0.8 point compared to the same period of the prior year.

Operating revenues, operating income, income before income taxes and net income for the fiscal year ending March 31, 2007, are forecasted to be ¥4,799.0 billion (up 0.7% year-on-year), ¥810.0 billion (down 2.7% year-on-year), ¥815.0 billion (down 14.4% year-on-year) and ¥488.0 billion (down 20.1% year-on-year), respectively.

---

Notes:

1. Consolidated financial statements in this release are unaudited.
2. Amounts in this release are rounded off, excluding non-consolidated financial statements, where amounts are truncated.
3. With regard to the assumptions and other related matters concerning the forecasts of consolidated financial results for the fiscal year ending March 31, 2007, please refer to page 10-12.

\* EBITDA and EBITDA margin, as we use them, are different from EBITDA as used in Item 10(e) of Regulation S-K and may not be comparable to similarly titled measures used by other companies. For an explanation of our definition of EBITDA, see the reconciliations to the most directly comparable financial measures calculated and presented in accordance with GAAP on page 42. See page 42 for the definition of ROCE.

**Table of Contents**<< Comment by Masao Nakamura, President and CEO >>

In the first six months of the fiscal year ending March 31, 2007, we have worked continuously to strengthen our overall service offerings, for example, by enriching our handset lineup, improving FOMA's network coverage to a level superior to mova's, and reinforcing our music related service through the launch of Music Channel service in the run-up to the introduction of Mobile Number Portability. The favorable results delivered by these actions are visible in such metrics as the significantly improved cellular churn rate.

We secured gains in operating revenues, which grew to ¥2,383.4 billion due to an increase in our core cellular services revenues, while operating income for the first six months decreased from the same period of last fiscal year to ¥516.9 billion. For the full year operating income, we will strive to achieve our target, which remains unchanged from our initial guidance at ¥810.0 billion. Also, we revised our projected capital expenditures to ¥916.0 billion, up ¥11.0 billion from our initial guidance, to further reinforce the quality of our FOMA network.

In the second half, we plan to introduce over 20 new models in total to respond to the diverse needs of customers, including the release of the latest 903i series phones featuring significantly upgraded music, game and Osaifu Keitai\* functions in the fall, and the subsequent introduction of HSDPA-compatible models and one-segment broadcast phones. At the same time, we will work to accelerate the uptake of DCMX credit payment service and enhance the convenience of i-mode service leveraging the new search function commenced on October 5, 2006, in an effort to expand new revenue sources.

While the competitive environment is expected to become increasingly fierce, we aim to build up our competitiveness by responding swiftly to the changes in the market from a customer-centric viewpoint, and thereby maximize our corporate value.

\* *Osaifu-Keitai* refers to mobile phones equipped with a contact less IC card, as well as the useful function and services enabled by the IC card. With this function, a mobile phone can be utilized as electronic money, a credit card, an electronic ticket, a membership card and an airline ticket, among other things.

<<Operating Results and Financial Position >>

## &lt;Results of operations&gt;

	(UNAUDITED)		Billions of yen		Year ended March 31, 2006

Minority interests in consolidated subsidiaries	(0.0)	0.0	(0.0)		(0.1)
Net income	¥ 309.8	¥ 385.3	¥ (75.5)	(19.6)%	¥ 610.5

**Table of Contents****1. Business Overview**

(1) Operating revenues totaled ¥2,383.4 billion (up 0.4% compared to the same period of the prior year).

Cellular (FOMA+mova) services revenues increased to ¥2,112.4 billion (up 1.3% compared to the same period of the prior year). Despite some negative effects from our strategic billing arrangements introduced in the past, revenues grew due to acquisition of new subscribers and continued improvement in our churn rate through our customer-oriented operations.

Voice revenues from FOMA services increased to ¥844.2 billion (up 66.7% compared to the same period of the prior year) and packet communications revenues from FOMA services increased to ¥447.2 billion (up 72.9% compared to the same period of the prior year) owing to a significant increase in the number of FOMA services subscribers to 29.1 million (up 73.5% compared to the same period of the prior year). The increase in the number of FOMA subscribers resulted from factors such as the release of new handsets including as the FOMA 902iS/702iS series, further improvements in our network quality and an increase in the number of billing plans that can be combined with pake-hodai, a flat-rate packet billing plan for unlimited i-mode usage.

Equipment sales revenues decreased to ¥209.1 billion (down 6.0% compared to the same period of the prior year). While the number of handset sold increased due to steady migration of subscribers from mova services to FOMA services, the amount accounted for as sales revenue per handset decreased.

<Breakdown of operating revenues>

	(UNAUDITED)		Billions of yen (UNAUDITED)	
	Six months ended	Six months ended	Increase	
	September 30, 2006	September 30, 2005	(Decrease)	
Wireless services	¥2,174.2	¥2,151.0	¥23.3	1.1%
Cellular (FOMA+mova) services revenues (i)	2,112.4	2,085.6	26.8	1.3
- Voice revenues (ii)	1,504.9	1,539.2	(34.3)	(2.2)
Including: FOMA services	844.2	506.6	337.6	66.7
- Packet communications revenues	607.5	546.4	61.1	11.2
Including: FOMA services	447.2	258.7	188.5	72.9
PHS services revenues	13.0	23.2	(10.2)	(43.9)
Other revenues	48.8	42.2	6.6	15.6
Equipment sales	209.1	222.5	(13.3)	(6.0)
Total operating revenues	¥2,383.4	¥2,373.5	¥ 9.9	0.4%

Notes:

(i) Cellular (FOMA+mova) services revenues for the six months ended September 30, 2006 reflect the impact of including the portion of Nikagetsu Kurikoshi (2-months carry over) allowances that are projected to expire.

(ii) Voice revenues include data communications revenues through circuit switching system.

## Edgar Filing: NTT DOCOMO INC - Form 6-K

(2) Operating expenses were ¥1,866.5 billion (up 2.8% compared to the same period of the prior year).

Personnel expenses were ¥124.5 billion (up 1.5% compared to the same period of the prior year). The number of employees as of September 30, 2006 was 22,165.

Non-personnel expenses increased to ¥1,179.0 billion (up 3.8% compared to the same period of the prior year) mainly due to an increase in expenses related to our service enhancement, such as upgrade of FOMA network and point loyalty programs, as well as an increase in cost of equipment sold.

Depreciation and amortization increased by 2.4% to ¥347.7 billion compared to the same period of the prior year due to an increase in capital expenditures for expansion and quality improvement of FOMA network.

**Table of Contents**

&lt;Breakdown of operating expenses&gt;

	(UNAUDITED)		Billions of yen (UNAUDITED)	
	Six months ended		Six months ended	
	September 30, 2006	September 30, 2005		Increase (Decrease)
Personnel expenses	¥ 124.5	¥ 122.7	¥ 1.8	1.5%
Non-personnel expenses	1,179.0	1,135.5	43.5	3.8
Depreciation and amortization	347.7	339.5	8.2	2.4
Loss on disposal of property, plant and equipment and intangible assets	18.1	11.8	6.3	53.1
Communication network charges	178.9	186.9	(8.0)	(4.3)
Taxes and public dues	18.3	18.6	(0.3)	(1.6)
<b>Total operating expenses</b>	<b>¥ 1,866.5</b>	<b>¥ 1,815.1</b>	<b>¥ 51.4</b>	<b>2.8%</b>

-  
Notes:

For the period starting from April 1, 2006, the amount of impairment loss related to PHS assets, which was separately stated in the past, is included in Depreciation and amortization. As the result thereof, certain reclassifications are made to the operating results for the six months ended September 30, 2005.

- (3) Operating income decreased to ¥516.9 billion (down 7.4% compared to the same period of the prior year). In addition, due principally to the effect of a gain we recognized on the sale of Hutchison 3G UK Holdings Limited shares (¥62.0 billion) in the same period of the prior year, income before income taxes decreased to ¥520.3 billion (down 17.8% compared to the same period of the prior year).
- (4) Net income was ¥309.8 billion (down 19.6% compared to the same period of the prior year).

**2. Segment Information**

- (1) Mobile phone business

Operating revenues were ¥2,349.7 billion and operating income was ¥527.2 billion.

The aggregate number of cellular (FOMA+mova) services subscribers increased to 52.10 million as of September 30, 2006 (up 1.9% compared to the same period of the prior year).

Voice ARPU, packet ARPU, and aggregate ARPU of cellular (FOMA+mova) services for the six months ended September 30, 2006 were ¥4,830 (down 6.2% compared to the same period of the prior year), ¥1,980 (up 7.0% compared to the same period of the prior year), and ¥6,810 (down 2.7% compared to the same period of the prior year), respectively.

## Edgar Filing: NTT DOCOMO INC - Form 6-K

Churn rate for cellular (FOMA+mova) services for the three months and six months ended September 30, 2006 were 0.60% (an improvement of 0.21 point compared to the same period of the prior year) and 0.62% (an improvement of 0.19 point compared to the same period of the prior year), respectively.

### Cellular (FOMA) services

Reinforcement of network coverage and launch of HSDPA (High-Speed Downlink Packet Access) ahead of the Mobile Number Portability (MNP)

Ahead of the MNP, during October, we have completed FOMA network coverage nationwide for heavy-traffic facilities such as JR stations, educational institutes, and public service areas for automobiles. We have also implemented opinion survey regarding service areas to improve quality of radio reception and been involved in an active PR campaign for our involvement. In August we launched HSDPA services, which provide packet download speed of up to 3.6Mbps, approximately 10 times faster than current FOMA services, first in Metropolitan Tokyo areas and to be expanded gradually in the future.

### Enriched variety of handset lineup

We released various handsets including our high-end model, the FOMA 902iS series, which are equipped with the state-of-the-art functions, our standard model, the FOMA 702iS series, which feature unique designs and the SIMPURE series, which are compatible with international roaming functions. As for terminal compatible with HSDPA services, we released FOMA N902iX HIGH-SPEED handset, capable of both voice and data communication, and FOMA M2501 HIGH-SPEED, a PC card type terminal dedicated to data communication.

---

**Table of Contents**

Providing various security services and music services

For security purpose of our subscribers, we equipped FOMA 902iS series handsets with bio-authentication functions which identify face or voice of a registered person. We also launched a new service which enables our subscribers to lock the IC card functions including Osaifu-Keitai by just calling to our customer service center in case of loss of their handset. Furthermore, we also reinforced our competitiveness in music download services when we launched the Chaku-Uta Full service, which enables downloading of a complete music track and Music Channel service, which provides a longer and high-quality music program downloaded through the HSDPA network.

Corporate marketing

We have been continuously involved in billing-consulting and mobile system solution for our corporate accounts. In response to a demand of our customers, we added two handsets, both of which feature PC-like operability and international roaming function, to our system solution alternatives; hTc Z handset, which is supplied by High Tech Computer Corporation in Taiwan and BlackBerry 8707h, which is supplied by Research In Motion Limited in Canada. We also launched a new service which enables our corporate customers to remotely lock a lost handset and delete its internal data through a website.

Voice ARPU, packet ARPU and aggregate ARPU of cellular (FOMA) services for the six months ended September 30, 2006 were ¥5,290 (down 11.5% compared to the same period of the prior year), ¥2,840 (down 8.1% compared to the same period of the prior year) and ¥8,130 (down 10.4% compared to the same period of the prior year), respectively.

Cellular (mova) services

Due to the continuous migration of the subscribers from mova services to FOMA services, the proportion of mova services subscribers to the aggregate cellular (FOMA+mova) subscribers as of September 30, 2006 decreased to 44.2%.

Voice ARPU, i-mode ARPU and aggregate ARPU of cellular (mova) services for the six months ended September 30, 2006 were ¥4,340 (down 9.8% compared to the same period of the prior year), ¥1,060 (down 22.1% compared to the same period of the prior year) and ¥5,400 (down 12.5% compared to the same period of the prior year), respectively.

i-mode services

Usage promotion

In order to increase usage volume among a wide range of subscribers, we continued to promote our i-channel, push-type information casting service, by setting our handsets i-channel compatible as a default function. In addition, for further convenience of our subscribers, we upgraded our network to enable our subscribers to transmit a decorated i-mode email to those of other network operators including au, TU-KA, and Vodafone (SoftBank).

Global development

## Edgar Filing: NTT DOCOMO INC - Form 6-K

GLOBUL (Cosmo Bulgaria Mobile EAD), a mobile operator in Bulgaria, launched the i-mode services in September 2006. The i-mode services are rolled out in 16 countries and areas including Japan as of September 30, 2006 and the number of i-mode services subscribers of all foreign carriers increased steadily.

**Table of Contents**

## International services

## Addition of handsets compatible with international roaming-out service

To promote usage of our international roaming-out service, we increased the series of compatible handset such as the SIMPURE series.

## Expansion of the service area

We steadily expanded the service area of international roaming-out services for voice calls and SMS to 145 countries and areas; for packet communications to 90 countries and areas; and for videophone calls to 29 countries and areas as of September 30, 2006.

Note:

ARPU: Average monthly revenue per unit

Average monthly revenue per unit, or ARPU, is used to measure average monthly operating revenues attributable to designated services on a per user basis. ARPU is calculated by dividing various revenue items included in operating revenues from our wireless services, such as monthly charges, voice transmission charges and packet transmission charges, from designated services which are incurred consistently each month, by the number of active subscribers to the relevant services. Accordingly, the calculation of ARPU excludes revenues that are not representative of monthly average usage such as activation fees. We believe that our ARPU figures provide useful information to analyze the average usage of our subscribers and the impacts of changes in our billing arrangements. The revenue items included in the numerators of our ARPU figures are based on our U.S. GAAP results of operations. This definition applies to all ARPU figures hereinafter. See page 41 for the details of the calculation methods.

## &lt;Number of subscribers by services&gt;

	Thousand subscribers		Increase	
	September 30, 2006	March 31, 2006	(Decrease)	
Cellular (FOMA) services	29,098	23,463	5,635	24.0%
Cellular (mova) services	23,004	27,680	(4,676)	(16.9)
i-mode services	47,186	46,360	827	1.8

Note:

Number of i-mode subscribers as of September 30, 2006

= Cellular (FOMA) i-mode subscribers (28,199 thousand) + Cellular (mova) i-mode subscribers (18,987 thousand)

Number of i-mode subscribers as of March 31, 2006

= Cellular (FOMA) i-mode subscribers (22,914 thousand) + Cellular (mova) i-mode subscribers (23,446 thousand)

**Table of Contents**

(3) Miscellaneous businesses

Operating revenues were ¥20.5 billion and operating loss was ¥6.3 billion.

Credit business

Promotion of credit platform iD

To spread our mobile credit platform iD, we agreed with other electronic commerce service providers on the establishment of the common infrastructure (common reader/writer and common usage center) where electronic payment becomes available for users of iD, Suica, QUICPay, and Edy.

Launch of DCMX

We launched DCMX mini and DCMX, our credit payment services based on our iD platform, from this fiscal year. The FOMA 902iS series handsets are equipped with the pre-installed i-appli application software for our DCMX. The aggregated number of DCMX and DCMX mini subscribers increased to 810 thousand as of September 30, 2006.

The number of the Osaifu-Keitai service subscribers increased to 16.00 million as of September 30, 2006.

Wireless LAN service

We completed coverage of our wireless LAN service in Tsukuba Express train. The number of our domestic hotspots increased to 1,358 as of September 30, 2006.

Quickcast service

Ahead of the termination of the service on March 31, 2007, we continued to correspond with current subscribers of the service.

Miscellaneous businesses operating revenues	¥ 20.5	¥	17.0	¥ 3.4 20.2%
Miscellaneous businesses operating income (loss)	(6.3)		0.3	(6.5)

**3. Capital Expenditures**

Total capital expenditures were ¥462.8 billion.

## Edgar Filing: NTT DOCOMO INC - Form 6-K

For reinforcement of our competitiveness prior to the introduction of the MNP, we built base stations at a record-high pace, expanded the coverage areas of FOMA services, improved network quality, and reinforced our FOMA network to meet the increase in traffic demand. We also continued our efforts to make capital expenditures more efficient and less costly by saving on equipment purchase costs and improving our design and construction process. Total capital expenditures during the six months ended September 30, 2006 increased by 14.0% compared to the same period of the prior year.

<Breakdown of capital expenditures>

	(UNAUDITED)		Billions of yen (UNAUDITED)		
	Six months ended	Six months ended			
	September 30, 2006	September 30, 2005	Increase (Decrease)

**Table of Contents****4. Cash Flow Conditions**

Net cash provided by operating activities was ¥259.0 billion (down 69.9% compared to the same period of the prior year). The combination of an increase in income tax payment and a decrease in refund of income taxes resulted in increase in cash payment by ¥230.3 billion (we paid ¥81.1 billion for income taxes and received ¥93.1 billion as a refund of income taxes in the same period of the prior year, when deferred tax assets from the impairment of our investment in AT&T Wireless Services, Inc. were realized). The decrease in net cash provided by operating activities is also due to the effect of a bank holiday at the end of September, which deferred our cash reception of ¥222.0 billion including cellular revenues to the following month.

Net cash used in investing activities was ¥530.1 billion (down 11.5% compared to the same period of the prior year). Increase in capital expenditures was more than offset by a decrease in acquisition of long-term investments and a decrease in payment of cash from changes in investments for cash management purposes.

Net cash used in financing activities, including repurchase of our own stock, dividend payment, repayment of outstanding long-term debt, was ¥323.2 billion (down 5.1% compared to the same period of the prior year). Increase in repayment of outstanding long-term debt and dividend payment was more than offset by a decrease in payment for repurchase of our own stock. We spent ¥90.0 billion during the six months ended September 30, 2006 to repurchase our own stock.

Free cash flows were negative ¥271.1 billion. Free cash flows excluding irregular factors and changes in investments for cash management purposes were negative ¥48.4 billion.

Interest coverage ratio	157.2	203.0	(45.8)		

## Edgar Filing: NTT DOCOMO INC - Form 6-K

### Notes:

Free cash flows = Net cash provided by (used in) operating activities + Net cash provided by (used in) investing activities

Irregular factors = the effects of uncollected revenues due to a bank holiday at the end of the fiscal period.

Changes in investments for cash management purposes = Changes by purchases, redemptions and disposal of financial instruments for cash management purposes with original maturities of longer than 3 months.

Equity ratio = Shareholders' equity / Total assets

Market equity ratio = Market value of total share capital / Total assets

Debt ratio = Interest bearing liabilities / (Shareholders' equity + Interest bearing liabilities)

Debt payout period (years) = Interest bearing liabilities / Cash flows from operating activities \*

\* To annualize, the amounts of Cash flows from operating activities are doubled.

Interest coverage ratio = Cash flows from operating activities / Interest expense\*\*

\*\* Interest expense is cash interest paid, which is disclosed in Supplemental disclosures of cash flow information for consolidated statement of cash flows on page 22.

**Table of Contents**

**5. Profit Distribution**

The Company plans to pay ¥2,000 per share as an interim dividend for the six months ended September 30, 2006.

Note:

The Company plans to begin paying an interim dividend from November 22, 2006.

**Table of Contents**<< Prospects for the Fiscal Year Ending March 31, 2007 >>

Competition in the Japanese cellular phone market is expected to become increasingly fierce in the future, with the introduction of the Mobile Number Portability system on October 24, 2006, and market entry by new entrants, in addition to the increase of cellular phone penetration rates and diversifying user needs.

In view of these market conditions, the trend of churn rate, which had been maintained at low levels in the first half of this fiscal year, and the decrease in the number of handsets sold, we have decided to revise the consolidated results forecasts for our corporate group as below.

Operating revenues forecast has been revised downwards by ¥39.0 billion from the initial guidance to ¥4,799.0 billion, due mainly to a projected decline in equipment sales revenues of ¥33.0 billion. Operating expenses, on the other hand, were revised downwards by a total of ¥39.0 billion, as a result of a ¥23.0 billion decline in revenue-linked expenses owing to reduced handset sales, and various cost-cutting measures, including savings in communication network charges to be achieved through improving the efficiency of circuit utilization. Accordingly, our operating income forecast remains unchanged from the initial guidance of ¥810.0 billion.

Against this backdrop, we will strive even harder to reinforce our core business, and at the same time, work to create new revenue sources by accelerating the uptake of our DCMX credit service and linking our cellular phones with the services provided by related external partners, with the goal to transform cellular phones into convenient multifunctional tools for everyday life and business.

We will also continue our efforts to enhance the efficiency of our operations by reviewing our business process to solidify our managerial foundation, and try to maximize our enterprise value thereby.

	Billions of yen			
	Year ending	Year ended		
		March 31, 2007	March 31, 2006	
	(Forecasts)	(Actual results)	Increase (Decrease)	
Operating revenues	¥ 4,799.0	¥ 4,765.9	¥ 33.1	0.7%
Operating income	810.0	832.6	(22.6)	(2.7)%
Income before income taxes	815.0	952.3	(137.3)	(14.4)%
Net income	488.0	610.5	(122.5)	(20.1)%
Capital expenditures	916.0	887.1	28.9	3.3%
Free cash flows excluding irregular factors and changes in investments for cash management purposes	290.0	510.9	(220.9)	(43.2)%
EBITDA *	1,601.0	1,606.8	(5.8)	(0.4)%
EBITDA margin *	33.4%	33.7%	(0.3pt)	
ROCE *	16.7%	17.2%	(0.5pt)	
ROCE after tax effect *	9.9%	10.1%	(0.2pt)	

\* EBITDA and EBITDA margin, as we use them, are different from EBITDA as used in Item 10(e) of Regulation S-K and may not be comparable to similarly titled measures used by other companies. For an explanation of our definition of Free cash flows excluding irregular factors and changes in investments for cash management purposes, EBITDA, EBITDA margin, ROCE and ROCE after tax effect, see the reconciliations to the most directly comparable financial measures calculated and presented in accordance with GAAP on the page 42.

**Table of Contents**

The financial forecasts for the year ending March 31, 2007, are based on the forecasts of the following operation data.

	March 31, 2007	March 31, 2006			
	(Forecasts)	(Actual results)		Increase (Decrease)	
Number of cellular (FOMA) services subscribers (Thousands)	34,800	<b>23,463</b>	11,337	48.3%	
Number of cellular (mova) services subscribers (Thousands)	18,200	<b>27,680</b>	(9,480)	(34.2)%	
Number of i-mode subscribers (Thousands)	47,900	<b>46,360</b>	1,540	3.3%	
Number of PHS subscribers (Thousands)	390	<b>771</b>	(381)	(49.4)%	
Aggregate ARPU (cellular (FOMA and mova) services)	¥ 6,670	¥ <b>6,910</b>	¥ (240)	(3.5)%	
Voice ARPU	4,700	<b>5,030</b>	(330)	(6.6)%	
Packet ARPU	1,970	<b>1,880</b>	90	4.8%	

Note:

Number of i-mode subscribers includes numbers of cellular (FOMA) and cellular (mova) i-mode subscribers.

\* See page 41 for the details of ARPU calculation methods.

DoCoMo expects to pay a total annual dividend of ¥4,000 per share for the year ending March 31, 2007, consisting of an interim dividend of ¥2,000 per share and a year-end dividend of ¥2,000 per share.

## **Table of Contents**

### **Special Note Regarding Forward-Looking Statements**

This Earnings Release contains forward-looking statements such as forecasts of results of operations, management strategies, objectives and plans, forecasts of operational data such as expected number of subscribers, and expected dividend payments. All forward-looking statements that are not historical facts are based on management's current plans, expectations, assumptions and estimates based on the information currently available. Some of the projected numbers in this report were derived using certain assumptions that are indispensable for making such projections in addition to historical facts. These forward-looking statements are subject to various known and unknown risks, uncertainties and other factors that could cause our actual results to differ materially from those contained in or suggested by any forward-looking statement. Potential risks and uncertainties include, without limitation, the following:

As competition in the market is expected to become more fierce due to changes in the business environment caused by the introduction of Mobile Number Portability and new market entrants, competition from other cellular service providers or other technologies could limit our acquisition of new subscribers, retention of existing subscribers and average revenue per unit (ARPU), or may lead to an increase in our costs and expenses.

The new services and usage patterns introduced by our corporate group may not develop as planned, which could limit our growth.

The introduction or change of various laws or regulations or the application of such laws and regulations to our corporate group may adversely affect our financial condition and results of operations.

Limitations in the amount of frequency spectrum or facilities made available to us could negatively affect our ability to maintain and improve our service quality and level of customer satisfaction.

The W-CDMA technology that we use for our 3G system and/or mobile multimedia services may not be introduced by other overseas operators, which could limit our ability to offer international services to our subscribers.

Our domestic and international investments, alliances and collaborations may not produce the returns or provide the opportunities we expect.

As electronic payment capability and many other new features are built into our cellular phones, and services of parties other than those belonging to our corporate group are provided through our cellular handsets, potential problems resulting from malfunctions, defects, or missing of handsets or imperfection of services provided by such other parties may arise, which could have an adverse effect on our financial condition and results of operations.

Social problems that could be caused by misuse or misunderstanding of our products and services may adversely affect our credibility or corporate image.

Inadequate handling of subscriber information by our corporate group or contractors may adversely affect our credibility or corporate image.

Owners of intellectual property rights that are essential for our business execution may not grant us the right to license or otherwise use such intellectual property rights on acceptable terms or at all, which may limit our ability to offer certain technologies, products and/or services, and we may also be held liable for damage compensation if we infringe the intellectual property rights of others.

## Edgar Filing: NTT DOCOMO INC - Form 6-K

Earthquakes, power shortages, malfunctioning of equipment, and software bugs, computer viruses, cyber attacks, hacking, unauthorized access and other problems could cause systems failures in the networks required for the provision of service, disrupting our ability to offer services to our subscribers and may adversely affect our credibility or corporate image.

Concerns about wireless telecommunications health risks may adversely affect our financial condition and results of operations.

Our parent company, Nippon Telegraph and Telephone Corporation (NTT), could exercise influence that may not be in the interests of our other shareholders.

**Table of Contents**

<< Condition of the Corporate Group >>

NTT DoCoMo, Inc. primarily engages in mobile telecommunications services as a member of the NTT group, with Nippon Telegraph and Telephone Corporation ( NTT ) as the holding company.

The Company, its 97 subsidiaries and 13 affiliates constitute the NTT DoCoMo group ( DoCoMo group ), the largest mobile telecommunications services provider in Japan.

The business segments of the DoCoMo group and the corporate position of each group company are as follows.

[Business Segment Information]

<b>Business</b>	<b>Main service lines</b>
Mobile phone business	Cellular (FOMA) services, cellular (mova) services, packet communications services, international services, satellite mobile communications services, and sales of handsets and equipment for each service
PHS business	PHS services and sales of PHS handsets and equipment
Miscellaneous businesses	Credit business, wireless LAN services, radio paging (Quickcast) service and other miscellaneous businesses

Notes: We have decided to terminate Quickcast services on March 31, 2007, and PHS services around the third quarter of the year ending March 31, 2008.

[Position of Each Group Company]

- (1) The Company engages in Mobile phone, PHS and other businesses in the Kanto-Koshinetsu region of Japan. The Company also provides nationwide services such as satellite mobile communications. The Company is solely responsible for DoCoMo group's overall research and development activities in the area of mobile telecommunications business as well as the development of services and information processing systems. The Company provides the results of such research and development to its eight regional subsidiaries, each of which operates in one of eight regions in Japan ( DoCoMo Regional Subsidiaries ).
- (2) Each of the DoCoMo Regional Subsidiaries engages in Mobile phone (excluding satellite mobile communications services), PHS and other businesses in their respective regions.
- (3) Twenty-nine other subsidiaries of the Company, each of which is entrusted with certain services by the Company and/or DoCoMo Regional Subsidiaries, operate independently to maximize their expertise and efficiency. They are entrusted with part of the services provided by, or give assistance to, the Company and DoCoMo Regional Subsidiaries.
- (4) There are 60 other subsidiaries and 13 affiliates, including, among others, some overseas units established for the purpose of global expansion of the third-generation mobile communications system based on W-CDMA, and joint ventures established to launch new business operations.

The following chart summarizes the above.

**Table of Contents**

14

---

**Table of Contents**

**<< Management Policies >>**

**1. Basic Management Policies**

Under the corporate philosophy of creating a new world of communications culture, DoCoMo aims to contribute to the realization of a rich and vigorous society by reinforcing its core business with a focus on popularizing FOMA services, and promoting mobile multimedia services by offering services that are useful for customers' daily lives and businesses. It also seeks to maximize its corporate value in order to be greatly trusted and highly valued by its shareholders and customers.

**2. Medium- and Long-Term Management Strategies**

The competition amongst carriers in the Japanese mobile communications market is expected to intensify even further due to increases in the market penetration rate, diversification of customer needs and the introduction of Mobile Number Portability system on October 24, 2006, and scheduled market entry by new entrants in the future. Under these circumstances, we plan to run our business focusing on the following three goals; (1) strengthening our core business even further, (2) creating new revenue sources, and (3) facilitating cost reduction.

(1) Strengthening our core business even further

We aim to react swiftly and adequately to the diversifying needs of customers, and improve every aspect of our offerings, including our handsets, services, billing plans, service area quality and after-sales support to reinforce our comprehensive strength.

(2) Creating new revenue sources

We will strive to expand our business domains pursuing the three key growth strategies of multimedia, ubiquity and globalization. Specifically, to further expand the use of i-mode and FOMA services, which enable the transmission of large amounts of data at high speeds, we plan to add more handsets tailored to users' needs in our product lineup, and work to develop and provide a wide array of sophisticated non-voice services, including visual communications and music/video/text delivery services.

In August 2006, we launched a new High-Speed Downlink Packet Access (HSDPA) system to provide new services leveraging the higher packet transmission speeds, in an effort to boost the usage of our cellular phones. We will also work to link our services with those offered by our partner companies through an active use of external interface capabilities embedded in cellular handsets, such as contactless IC chips with the goal to create new businesses which generate income independently of traffic income. Furthermore, as the arena of competition in mobile communications business expands to a global scale, we intend to enhance users' convenience and increase our revenue opportunities by offering W-CDMA-based global handsets and further reinforcing the i-mode alliance. Also, in view of global competition, we will widely look into opportunities for revenue growth, including the possibility of making investments in or forming alliances with not only telecommunications carriers, but also enterprises owning promising technologies as well as companies engaged in mobile communications-related peripheral businesses, while taking into consideration the overall synergy effect from such alliances.

(3) Facilitating cost reduction

We will work to improve the efficiency of our operations by further cutting handset procurement and network costs, and making a more efficient allocation of sales commissions.

To keep abreast with and react dynamically to the intensified competition and changes in the market, we plan to advance our cellular services placing customers in the center of our strategies to provide innovative solutions that can contribute to our users' safety and security, as part of our continual efforts to transform cellular phones into convenient tools for everyday life and business.

---

**Table of Contents****3. Basic Policies for Profit Distribution**

Believing that providing adequate returns to shareholders is one of the most important issues in corporate management, the Company plans to pay dividends by taking into account its consolidated results and operating environment based on the principle of stable dividend payments, while striving to strengthen its financial position and secure internal reserves. The Company will also continue to take a flexible approach regarding share repurchases in order to plow back profits to shareholders. The Company intends to keep the repurchased shares as treasury shares and in principle to limit the amount of such treasury shares to approximately 5% of its total issued shares, and will consider retiring any treasury shares held in excess of this limit around the end of the fiscal year or at other appropriate times. During the first six months of the year ending March 31, 2007, based on an authorization by a resolution adopted at the Ordinary General Meetings of Shareholders, the Company repurchased 517,483 shares of its own common stock at an aggregate price of ¥90.0 billion.

In addition, the Company will allocate internal reserves to active research and development efforts, capital expenditures and other investments in response to the rapidly changing market environment. The Company will endeavor to boost its corporate value by introducing new technologies, offering new services and expanding its business domains through alliances with new partners.

**4. Target Management Indicators**

Now that the Japanese mobile telecommunications market has entered a period of stable growth, DoCoMo regards EBITDA margin\* as an important management indicator, from the aspect of profitability, to further enhance its management effectiveness. DoCoMo also considers ROCE\* an important management indicator in terms of efficiency in its invested capital (shareholders' equity + interest bearing liabilities). DoCoMo will make its utmost efforts to achieve an EBITDA margin\* of at least 35% and an ROCE\* of at least 20% as its medium-term targets and attempt to maximize its corporate value.

-

Notes:

$$\text{EBITDA margin}^* = \text{EBITDA}^* / \text{Operating revenues}$$

$$\text{EBITDA}^* = \text{Operating income} + \text{Depreciation and amortization} + \text{Losses on sale or disposal of property, plant and equipment}$$

$$\text{ROCE}^* = \text{Operating income} / (\text{Shareholders' equity} + \text{Interest bearing liabilities})$$

Shareholders' equity and interest bearing liabilities are the average of the amounts as of March 31, 2006 and September 30, 2006

---

\* EBITDA and EBITDA margin, as we use them, are different from EBITDA as used in Item 10(e) of Regulation S-K and may not be comparable to similarly titled measures used by other companies. For an explanation of our definition of EBITDA, see the reconciliations to the most directly comparable financial measures calculated and presented in accordance with GAAP on page 42. See page 42 for the definition of ROCE.

**Table of Contents**

**5. Relationship with the Parent Company**

(1) Trade Name of the Parent Company, etc.

(As of September 30, 2006)

Parent company	Parent company's ownership of voting rights	Securities exchanges where shares issued by the parent company are listed
Nippon Telegraph and Telephone Corporation	62.9%	Tokyo Stock Exchange, Inc. (First Section)
		Osaka Stock Exchange, Co. Ltd. (First Section)
		Nagoya Stock Exchange, Inc. (First Section)
		Fukuoka Stock Exchange
		Sapporo Stock Exchange
		New York Stock Exchange
		London Stock Exchange

(2) Positions of Listed Companies in the Corporate Group Led by the Parent Company

The corporate group led by our parent company, NTT, operates a wide array of telecommunications services, including local, long-distance, international, and mobile and data telecommunications services.

The Company operates independently within the NTT group, mainly in the field of mobile telecommunications. NTT, which currently owns 62.9% of the voting rights of the Company, can influence the managerial decisions of the Company by exercising its directorship rights as majority shareholder, although we conduct our day-to-day operations independently of NTT, based on our own decisions with our own managerial responsibility.

The Company and NTT concluded a contract for basic research and development conducted by NTT. Under the contract, NTT offers services and benefits to the Company concerning basic research and development, and the Company pays compensation to NTT for such services and benefits. The Company and NTT also entered into a contract regarding group management and operations run by NTT. Under the contract, NTT provides services and benefits regarding group management and operations to DoCoMo group, and the Company pays compensation to NTT for such services and benefits.

**Table of Contents**

**6. Corporate Social Responsibility (CSR)**

Due to the wide adoption and advancement of mobile communications services, cellular phones have become indispensable tools for people's daily activities. The rapid growth in its uptake, on the other hand, has also caused some negative social problems, such as unwanted bulk emails and crimes involving the use of cellular handsets. Meanwhile, people's concerns against earthquakes and other natural disasters as well as global environment have heightened in the recent years.

To address these issues, we have worked to improve the reliability of our communications facilities and network and reinforced countermeasures against disasters, strongly aware of our mission to fulfill our corporate social responsibility (CSR). As a part of our measures to tackle social problems resulting from the use of cellular phones, we have continuously worked to prevent unsolicited bulk emails, and responded to the issues addressed in the surveys and research programs conducted by the Mobile Society Research Institute. In addition, we have actively promoted various environmental conservation and social contribution activities on a continual basis, including the collection and recycling of used mobile phone handsets and accessories, saving on paper resources by offering an e-billing service which provides customers' bills through our website or by e-mail message, the DoCoMo Woods' forestation campaign, and encouraging our employees to take part in various community works as volunteers.

At DoCoMo group, we believe that it is our social mission to help shape a safer and more peaceful world. To realize this goal, we set forth DoCoMo Anshin Mission during the fiscal year ended March 31, 2006, under which the whole corporate group implemented various measures and promoted technical innovations in a comprehensive and unified approach.

The concrete actions undertaken under DoCoMo Anshin Mission during the first six months of the fiscal year ending March 31, 2007, include the following:

Provisions against natural disasters

To secure an important communication method when there is a risk of network troubles due to use which exceeds the processing capability of our facilities, we introduced and began the operation of a new system for FOMA service, which separately controls voice and packet communication, allowing users to use the i-mode Disaster Message Board service and i-mode mail more easily in the event of a disaster.

Decided to add a new item of Disaster/Crime Prevention and Medical Service on i-mode menu list through which relevant contents will be made available. When the i-mode Disaster Message Board service is activated, a link to this menu item will be created on the message board, allowing users to find necessary information more easily in emergencies.

Universal design products and services

Released FOMA Raku Raku Phone III, a universal design mobile phone equipped with a one-touch alarm button to notify the user's emergency such as sudden illness to people nearby, and a function to automatically make a call to a pre-registered emergency contact number at the same time, etc.

Released a bone conduction receiver microphone, dubbed Sound Leaf, equipped with the two features of bone conduction and telephone coil (T-coil) as an effective communications tool for the auditory handicapped.

Care and Protection for Children

Held approximately 500 sessions of DoCoMo Keitai Safety School seminars in elementary, junior and senior high schools and local communities nationwide to provide children with tips on safe and proper phone usage manners.

**Table of Contents****Notes to Unaudited Consolidated Financial Statements****Basis of Presentation:**

The accompanying unaudited consolidated financial information of NTT DoCoMo, Inc. and its subsidiaries (collectively DoCoMo) has been prepared in accordance with accounting principles generally accepted in the United States of America ( U.S. GAAP ).

**1. Summary of significant accounting and reporting policies:****(1) Adoption of new accounting standards****Inventory Pricing**

Effective April 1, 2006, DoCoMo adopted Statement of Financial Accounting Standards ( SFAS ) No. 151, Inventory Costs -an amendment of Accounting Research Bulletin ( ARB ) No. 43, Chapter 4 issued by the Financial Accounting Standards Board ( FASB ). SFAS No. 151 amends the guidance in ARB No. 43, Chapter 4, Inventory Pricing, to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage). ARB No. 43, Chapter 4 previously stated that such costs might be so abnormal as to require treatment as current period charges. SFAS No. 151 requires that those items be recognized as current-period charges regardless of whether they meet the criterion of so abnormal. In addition, SFAS No. 151 requires that allocation of fixed production overheads to the costs of conversion be based on the normal capacity of the production facilities. The adoption of SFAS No. 151 did not have any impact on DoCoMo's results of operations and financial position.

**Exchanges of Non-monetary Assets**

Effective April 1, 2006, DoCoMo adopted SFAS No. 153, Exchanges of Non-monetary Assets -an amendment of Accounting Principles Board ( APB ) Opinion No. 29 issued by the FASB. The amendment eliminates the exception for non-monetary exchanges of similar productive assets and replaces it with a general exception for exchanges of non-monetary assets that do not have commercial substance. The adoption of SFAS No. 153 did not have any impact on DoCoMo's results of operations and financial position.

**Accounting Changes and Error Corrections**

Effective April 1, 2006, DoCoMo adopted SFAS No. 154, Accounting Changes and Error Corrections -a replacement of APB Opinion No.20 and the FASB statement No.3 issued by the FASB. SFAS No. 154 replaces APB Opinion No. 20 ( APB No. 20 ), Accounting Changes, and SFAS No. 3, Reporting Accounting Changes in Interim Financial Statements, and changes the requirements for the accounting for and reporting of a change in accounting principle. APB No. 20 previously required that most voluntary changes in accounting principle be recognized by including in net income of the period of the change the cumulative effect of changing to the new accounting principle. SFAS No. 154 requires retrospective application to prior periods financial statements of changes in accounting principle. The adoption of SFAS No. 154 did not have any impact on DoCoMo's results of operations and financial position. DoCoMo will continue to apply the requirements of SFAS No. 154 to any future accounting changes and error corrections.

**(2) Significant accounting policies****Use of estimates**

The preparation of DoCoMo's consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities, as well as the reported amounts of revenues and expenses. Actual results could differ from those estimates.

## **Table of Contents**

### **Allowance for doubtful accounts**

The allowance for doubtful accounts is principally computed based on the historical bad debt experience and the estimated uncollectible amount based on the analysis of certain individual accounts, including claims in bankruptcy.

### **Inventories**

Inventories are stated at the lower of cost or market. The cost of equipment sold is determined by the first-in, first-out method.

### **Property, plant and equipment**

Property, plant and equipment is stated at cost and includes capitalized interest expense incurred during construction periods. It is depreciated over the estimated useful lives of respective assets using the declining-balance method with the exception of buildings that are depreciated using the straight-line method.

### **Investments in affiliates**

The equity method of accounting is applied for investments in affiliates where DoCoMo owns an aggregate interest of 20% to 50% and/or is able to exercise significant influence over the affiliate.

DoCoMo evaluates the recoverability of the carrying value of its investments in affiliates, which includes investor level goodwill, when there are indicators that a decline in value below its carrying amount may be other than temporary. In the event of a determination that a decline in value is other than temporary, the amount of the loss is recognized in earnings, and a new cost basis in the investment is established.

### **Marketable securities and other investments**

DoCoMo accounts for its marketable securities in accordance with SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities.

Equity securities, whose fair values are not readily determinable, and restricted stocks are carried at cost. Other than temporary declines in value are charged to earnings. Realized gains and losses are determined using the average cost method and are reflected currently in earnings.

### **Goodwill and other intangible assets**

DoCoMo accounts for goodwill and other intangible assets in accordance with SFAS No. 142, Goodwill and Other Intangible Assets, SFAS No. 86, Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed, and American Institute of Certified Public Accountants (AICPA) Statement of Position 98-1, Accounting for the Costs of Computer Software Developed or Obtained for Internal Use.

### **Impairment of long-lived assets**

In accordance with SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, DoCoMo's long-lived assets other than goodwill, including property, plant and equipment, software and other intangibles, are reviewed for impairment, and if the asset is determined to be impaired, the amount of the loss is recognized.

### **Hedging activities**

DoCoMo accounts for derivative instruments in accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended by SFAS No. 138 and No. 149.

### **Employees' retirement benefit plans**

Pension benefits earned during the year, as well as interest on projected benefit obligations, are accrued currently. Prior service costs and credits resulting from changes in plan benefits are amortized over the average remaining service period of the employees expected to receive benefits.

## **Table of Contents**

### **Revenue recognition**

Base monthly service charges and airtime charges are recognized as revenues as service is provided to the subscribers. DoCoMo's monthly billing plans for cellular (FOMA and mova) services generally include a certain amount of allowances (free minutes and/or packets), and the used amount of the allowances is subtracted from total usage in calculating the airtime revenue from a subscriber for the month. Prior to November 2003, the total amount of the base monthly charges was recognized as revenues in the month they were charged as the subscribers could not carry over the unused allowances to the following months. In November 2003, DoCoMo introduced a billing arrangement, called Nikagetsu Kurikoshi (two-month carry over), in which the unused allowances are automatically carried over up to the following two months. In addition, DoCoMo introduced an arrangement which enables the unused allowances offered in and after December 2004 that have been carried over for two months to be automatically used to cover the airtime and/or packet fees exceeding the allowances of the other lines in the Family Discount group, a discount billing arrangement for families with between two and ten DoCoMo subscriptions. Until the year ended March 31, 2006, DoCoMo had deferred revenues based on the portion of all unused allowances at the end of the period. The deferred revenues are recognized as revenues as the subscribers make calls or data communications, similar to the way airtime revenues are recognized, or as the allowance expires. As DoCoMo developed sufficient empirical evidence to reasonably estimate the portion of allowance that will be forfeited as unused, DoCoMo started to recognize the revenue attributable to such forfeited allowances ratably as the remaining allowances are utilized, effective April 1, 2006. The effect of this accounting change was not material for DoCoMo's results of operations and financial position.

Certain commissions paid to purchasers (primarily agent resellers) are recognized as a reduction of revenue upon delivery of the equipment to the purchasers (primarily agent resellers) in accordance with Emerging Issues Task Force Issue No. 01-09, Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products) .

Non-recurring upfront fees such as activation fees are deferred and recognized as revenues over the estimated average period of the customer relationship for each service. The related direct costs are deferred only to the extent of the upfront fee amount and are amortized over the same period.

### **Income taxes**

Income taxes are accounted for under the asset and liability method in accordance with SFAS No.109 Accounting for Income Taxes .

### **(2) Reclassifications**

Certain reclassifications have been made to the prior periods' consolidated financial statements to conform to the presentation used for the six months ended September 30, 2006.

**Table of Contents****Other notes to unaudited consolidated financial statements:****1. Business segments:**

## **Table of Contents**

### **Accounting Basis for the Non-Consolidated Financial Statements**

#### **Basis of Presentation:**

The accompanying unaudited non-consolidated financial statements of NTT DoCoMo, Inc. ( the Company ) have been prepared in accordance with accounting principles generally accepted in Japan.

#### 1. Depreciation and amortization of non-current assets

##### (1) Property, plant and equipment

Depreciation of property, plant and equipment is computed by the declining balance method with the exception of buildings, which are depreciated on a straight-line basis.

##### (2) Intangible assets

Intangible assets are amortized on a straight-line basis.

Internal-use software is amortized over the estimated useful lives (5 years or less) on a straight-line basis.

#### 2. Valuation of certain assets

##### (1) Securities

Investments in subsidiaries and affiliates are stated at cost, which is determined by the moving average method.

Available-for-sale securities whose fair value is readily determinable are stated at fair value as of the end of the semi-annual period. The holding gains and losses, net of applicable deferred tax assets/liabilities, are not reflected in earnings, but directly reported as a separate component of net assets. The cost of securities sold is determined by the moving-average method with the exception of the cost of debt securities sold, which are determined by the first-in, first-out method.

Available-for-sale securities whose fair value is not readily determinable are stated at moving-average cost.

##### (2) Derivative instruments

Derivative instruments are stated at fair value as of the end of the semi-annual period.

##### (3) Inventories

Inventories are stated at cost. The cost of terminal equipment to be sold is determined by the first-in, first-out method. The cost of other inventories is determined by the specific identification method.

#### 3. Accounting for allowances

##### (1) Allowance for doubtful accounts

## Edgar Filing: NTT DOCOMO INC - Form 6-K

The Company provides for doubtful accounts principally in an amount computed based on the historical bad debt ratio during a certain reference period and the estimated uncollectible amount based on the analysis of certain individual accounts, including claims in bankruptcy.

### (2) Liability for employees' retirement benefits

In order to provide for employees' retirement benefits, the Company accrues the liability as of the end of semi-annual period in an amount calculated based on the estimated projected benefit obligation and plan assets at the end of the fiscal year.

Actuarial losses (gains) are recognized as incurred at the end of the fiscal year.

Prior service cost is amortized on a straight-line basis over the average remaining service periods of employees at the time of occurrence.

### (3) Reserve for point loyalty programs

The costs of awards under the point loyalty programs called DoCoMo Point Service and DoCoMo Premium Club that are reasonably estimated to be redeemed by the customers in the future based on historical data are accounted for as reserve for point loyalty programs.

**Table of Contents**

(4) Provision for loss on PHS business

In order to provide for the loss resulting from PHS business, the Company reserves necessary provision for the estimated future loss.

4. Foreign currency translation

Foreign currency monetary assets and liabilities are translated into Japanese yen at the current spot rate at the end of the semi-annual period and the resulting translation gains or losses are included in net income.

5. Leases

Finance leases other than those deemed to transfer ownership of properties to lessees are not capitalized and are accounted for in a similar manner as operating leases.

6. Hedge accounting

(1) Hedge accounting

Japanese GAAP provides for two general accounting methods for hedging financial instruments. One method is to recognize the changes in fair value of a hedging instrument in net income in the period of the change as gain or loss together with the offsetting loss or gain on the hedged item attributable to the risk being hedged. The other method is to defer the gain or loss over the period of the hedging contract together with offsetting loss or gain deferral of the hedged items. The Company has adopted the latter accounting method.

However, when an interest rate swap contract meets certain conditions, the net amount to be paid or received under the contract is added to or deducted from the interest on the hedged items.

In addition, when any of foreign currency swap contracts meet certain conditions, they are accounted for in the following manner:

- (a) The difference between the Japanese yen nominal amounts of the foreign currency swap contract translated using the spot rate at the transaction date of the hedged item and the spot rate at the date of inception of the contract, if any, is recognized in the non-consolidated statement of income in the period which includes the inception date of the contract; and
- (b) The discount or premium on the contract (for instance, the difference between the Japanese yen amounts of the contract translated using the contracted forward rate and the spot rate at the date of inception of the contract) is recognized over the term of the contract.

(2) Hedging instruments and hedged items

Hedging instruments:

Interest rate swap contracts  
Foreign currency swap contracts

Hedged items:

Corporatebonds  
Bonds in foreign currency

(3) Hedging policy

The Company uses financial instruments to hedge risks such as market fluctuation risks in accordance with its internal policies and procedures.

## Edgar Filing: NTT DOCOMO INC - Form 6-K

### (4) Assessment method of hedge effectiveness

The Company periodically evaluates hedge effectiveness by comparing cumulative changes in cash flows from hedged items or changes in fair value of hedged items, and the corresponding changes in the hedging instruments. However, the Company automatically assumes that the hedge will be highly effective at achieving offsetting changes in cash flows or in fair value for any transaction where important terms and conditions are identical between hedging instruments and hedged items.

### 7. Consumption tax

Consumption tax is separately accounted for by excluding it from each transaction amount.

## **Table of Contents**

### **Change in Accounting Policy**

(Accounting standard for directors' bonus)

Effective from the six months ended September 30, 2006, the Company adopted Accounting Standard for Directors' Bonus (Accounting Standards Board of Japan (ASBJ) Statement No.4 issued by the ASBJ on November 29, 2005).

The adoption of this standard had no impact on the Company's results of operations for the six months ended September 30, 2006.

(Accounting standard for presentation of net assets in the balance sheet)

Effective from the six months ended September 30, 2006, the Company adopted Accounting Standard for Presentations of Net Assets in the Balance Sheet (ASBJ Statement No.5 issued by the ASBJ on December 9, 2005) and Guidance on Accounting Standard for Presentation of Net Assets in the Balance Sheet (ASBJ Guidance No.8 issued by the ASBJ on December 9, 2005).

The amount of what is previously presented as Shareholders' Equity was ¥2,548,597 million as of September 30, 2006.

Due to the amendment of the Interim Financial Statements Regulations, the Company prepares the presentation of net assets in the balance sheet as of September 30, 2006, based on the amended Interim Financial Statements Regulations.

(Accounting standard for treasury shares and appropriation of legal reserve)

Effective from the six months ended September 30, 2006, the Company adopted revised Accounting Standard for Treasury Shares and Appropriation of Legal Reserve (ASBJ revised Statement No.1 issued by the ASBJ on August 11, 2006) and Guidance on Accounting Standard for Treasury Shares and Appropriation of Legal Reserve (ASBJ revised Guidance No.2 issued by the ASBJ on August 11, 2006).

### **Additional Information**

The Company had recorded a reserve for its directors' and corporate auditors' retirement benefits as of the end of the fiscal year based on our internal regulations. However, it was approved in the shareholders' meeting held on June 20, 2006 to abolish the retirement benefits payment system and to award the accumulated retirement benefits to qualified directors and corporate auditors. The Company reversed the remaining balance of the reserve for the directors' and corporate auditors' retirement benefits and classified the unpaid portion of accumulated retirement benefits as other long-term liabilities.

**Table of Contents****Notes to Non-consolidated Balance Sheets:**

1. Non-current assets for telecommunication businesses include those used in supplementary businesses, because these amounts are not significant.
2. Accumulated depreciation of property, plant and equipment

	September 30, 2006	Millions of yen September 30, 2005	March 31, 2006
Accumulated depreciation	1,689,120	1,527,151	1,603,315

3. Due to the effect of a bank holiday which fell on the end of this semi-annual period, a portion of cash transfer to and among the Company and its eight regional subsidiaries, as well as settlement of access charges between the Company and other network operators, was processed on October 2, 2006. As a result, accounts receivable (trade) decreased by ¥111,806 million, accounts payable (trade) increased by ¥21,587 million, deposits received decreased by ¥121,081 million, and cash and bank deposits decreased by 211,300 million as of September 30, 2006.
4. Accounts payable, other, as of September 30, 2006, and September 30, 2005 includes consumption tax payable, net, of ¥7,698 million and ¥6,339 million, respectively.
5. Guarantee  
The Company provides a counter indemnity of a performance guarantee up to HK\$24,099 thousand (¥364 million) guaranteeing performance by Hutchison Telephone Company Limited, an affiliate of the Company, with respect to certain contracts or obligations owed to its governmental authorities in relation to its business. The Company had HK\$308 thousand (¥4 million), HK\$919 thousand and HK\$488 thousand indemnity outstanding as of September 30, 2006 and 2005, and March 31, 2006, respectively.

**Table of Contents**

**Notes to Non-consolidated Statements of Income:**

1. Depreciation and amortization expense included in operating expenses:

	Six months ended	Millions of yen Six months ended	Year ended
	September 30, 2006	September 30, 2005	March 31, 2006
Property, plant and equipment	102,975	108,665	239,334
Intangible assets	86,212	76,667	166,473

2. Major components of non-operating revenues:

	Six months ended	Millions of yen Six months ended	Year ended
	September 30, 2006	September 30, 2005	March 31, 2006
Dividends received	249,593	120,731	156,431
Interest income	*	3,260	4,265

\* The amount of interest income during six months ended September 30, 2006 was immaterial.

3. Major components of non-operating expenses:

	Six months ended	Millions of yen Six months ended	Year ended
	September 30, 2006	September 30, 2005	March 31, 2006
Loss on write-off of inventories	6,928	*	22,418
Interest expenses (including bond interest)	2,816	4,008	7,792

\* The amount of loss on write-off of inventory during six months ended September 30, 2005 was immaterial.

4. Income taxes

Current and deferred income taxes for this semi-annual period were calculated considering addition and reversal of accelerated depreciation reserve which are expected to implement at the end of the fiscal year ending March 31, 2007.

**Table of Contents**

**Notes to Non-consolidated Statement of Changes in Net Assets:**

The class and number of the treasury stock (six months ended September 30, 2006)

<b>Class of treasury stock</b>	<b>Common stock</b>
Number of shares as of March 31, 2006	2,335,772 shares
Number of shares increased during the six months ended September 30, 2006	517,484 shares
Number of shares decreased during the six months ended September 30, 2006	
Number of shares as of September 30, 2006	2,853,257 shares

-

Note: Increase in the number of shares was due to share repurchase in the market and repurchase of fractional shares. Less than one unit shares are rounded off.

**Marketable Securities:**

For the six months ended September 30, 2006 and 2005, and for the year ended March 31, 2006, there were no subsidiaries and affiliates shares directly owned by the Company that had readily determinable fair value.

\* International service-related revenues have been included in the ARPU data calculation from the fiscal year ended March 31, 2006, due to its growing contribution to total revenues.

[Notes associated with the above-mentioned change]

## Edgar Filing: NTT DOCOMO INC - Form 6-K

International service-related ARPU included in the results for FY2005 and the full-year forecasts and the first quarter, the second quarter and the first six months results of FY2006 are as below:

	FY2005	FY2006	First Quarter	Second Quarter	FY2006
	(Ended Mar. 31, 2006) Full-year results	First Six Months (Apr.-Sep. 2006) Results	(Apr.-Jun. 2006) Results	(Jul.-Sep. 2006) Results	(Ending Mar. 31, 2007) Full-year forecasts [Revised]
Aggregate ARPU (FOMA+mova)	40 yen	50 yen	50 yen	50 yen	60 yen
Aggregate ARPU (FOMA)	70 yen	70 yen	70 yen	80 yen	80 yen
Aggregate ARPU (mova)	30 yen	20 yen	20 yen	20 yen	20 yen

\* Please refer to the attached sheet (P.41) for an explanation of the methods used to calculate ARPU, and the number of active subscribers used in calculating ARPU, MOU and Churn Rate.

- (1) Source for other cellular telecommunications operators: Data announced by Telecommunications Carriers Association
- (2) Data are calculated including Communication Module Service subscribers.
- (3) Data are calculated excluding Communication Module Services-related revenues and Communication Module Services subscribers.
- (4) Inclusive of circuit-switched data communications
- (5) MOU (Minutes of Usage): Average communication time per one month per one user
- (6) Sum of FOMA handsets and mova handsets
- (7) The number of i-menu Sites charged per view are added to the existing number of i-menu Sites charged with fixed monthly fee.
- (8) Not inclusive of data communication time via @FreeD service
- (9) Percentage of data traffic to total outbound call time
- (10) Included in total cellular subscribers
- (11) Included in FOMA subscribers
- (12) Included in mova subscribers

**Table of Contents**

(APPENDIX 2)

ARPU Calculation Methods

***I. ARPU (Average monthly Revenue Per Unit)\*<sup>1</sup>***

**i) ARPU (FOMA + mova)**

Aggregate ARPU (FOMA+mova)=Voice ARPU (FOMA+mova) + Packet ARPU (FOMA+mova)

Voice ARPU (FOMA+mova) : Voice ARPU (FOMA+mova) Related Revenues (monthly charges, voice transmission charges) / No. of active cellular phone subscribers (FOMA+mova)  
 Packet ARPU (FOMA+mova) : {Packet ARPU (FOMA) Related Revenues (monthly charges, packet transmission charges)+ i-mode ARPU (mova) Related Revenues (monthly charges, packet transmission charges)} / No. of active cellular phone subscribers (FOMA+mova)

i-mode ARPU (FOMA+mova) <sup>\*2</sup> : i-mode ARPU (FOMA+mova) Related Revenues (monthly charges, packet transmission charges) / No. of active cellular phone subscribers (FOMA+mova)

ARPU generated purely from i-mode (FOMA+mova) <sup>\*3</sup> : i-mode ARPU (FOMA+mova) Related Revenues (monthly charges, packet transmission charges) / No. of active i-mode subscribers (FOMA+mova)

**ii) ARPU (FOMA)**

Aggregate ARPU (FOMA)=Voice ARPU (FOMA) + Packet ARPU (FOMA)

Voice ARPU (FOMA) : Voice ARPU (FOMA) Related Revenues (monthly charges, voice transmission charges) / No. of active cellular phone subscribers (FOMA)

Packet ARPU (FOMA) : Packet ARPU (FOMA) Related Revenues (monthly charges, packet transmission charges) / No. of active cellular phone subscribers (FOMA)

i-mode ARPU <sup>\*2</sup> (FOMA) : i-mode ARPU (FOMA) Related Revenues (monthly charges, packet transmission charges) / No. of active cellular phone subscribers (FOMA)

ARPU generated purely from i-mode (FOMA) <sup>\*3</sup> : i-mode ARPU (FOMA) Related Revenues (monthly charges, packet transmission charges) / No. of active i-mode subscribers (FOMA)

**iii) ARPU (mova)**

Aggregate ARPU (mova)=Voice ARPU (mova) + i-mode ARPU (mova)

Voice ARPU (mova) : Voice ARPU (mova) Related Revenues (monthly charges, voice transmission charges) / No. of active cellular phone subscribers (mova)

i-mode ARPU (mova) <sup>\*2</sup> : i-mode ARPU (mova) Related Revenues (monthly charges, packet transmission charges) / No. of active cellular phone subscribers (mova)

ARPU generated purely from i-mode (mova) <sup>\*3</sup> : i-mode ARPU (mova) Related Revenues (monthly charges, packet transmission charges) / No. of active i-mode subscribers (mova)

iv) **ARPU (PHS)**

ARPU (PHS) : ARPU (PHS) Related Revenues (monthly charges, voice transmission charges) / No. of active PHS subscribers

**2. Active Subscribers Calculation Methods**

No. of active subscribers used in ARPU/MOU/Churn Rate calculations are sum of No. of active subscribers\*4 for each month.

- \*1 Communication Module service subscribers and the revenues thereof are not included in the ARPU and MOU calculations.
- \*2 The denominator used in calculating i-mode ARPU (FOMA+mova, FOMA, mova) is the aggregate number of cellular subscribers to each service (FOMA+mova, FOMA, mova, respectively), regardless of whether i-mode service is activated or not.
- \*3 ARPU generated purely from i-mode (FOMA+mova, FOMA, mova) is calculated using only the number of active i-mode subscribers as a denominator.
- \*4 active subscribers = (No. of subscribers at the end of previous month + No. of subscribers at the end of current month) / 2

**Table of Contents**

(APPENDIX 3)

**Reconciliations of the Disclosed Non-GAAP Financial Measures to  
the Most Directly Comparable GAAP Financial Measures**

The reconciliations for the year ending March 31, 2007 (forecasts) are provided to the extent available without unreasonable efforts.

**1. EBITDA and EBITDA margin**

	Billions of yen			
	Year ending March 31, 2007 (Forecasts)	Year ended March 31, 2006	Six months ended September 30, 2006	Six months ended September 30, 2005
a. EBITDA	¥ 1,601.0	¥ 1,606.8	¥ 878.8	¥ 905.5
Depreciation and amortization	(746.0)	(738.1)	(347.7)	(339.5)
Losses on sale or disposal of property, plant and equipment	(45.0)	(36.0)	(14.2)	(7.6)
Operating income	810.0	832.6	516.9	558.4
Other income (expense)	5.0	119.7	3.4	74.7
Income taxes	(327.0)	(341.4)	(210.5)	(246.7)
Equity in net income (losses) of affiliates		(0.4)	0.1	(1.1)
Minority interests in earnings of consolidated subsidiaries		(0.1)	(0.0)	0.0
b. Net income	488.0	610.5	309.8	385.3
c. Total operating revenues	4,799.0	4,765.9	2,383.4	2,373.5
EBITDA margin (=a/c)	33.4%	33.7%	36.9%	38.2%
Net income margin (=b/c)	10.2%	12.8%	13.0%	16.2%

Note: EBITDA and EBITDA margin, as we use them, are different from EBITDA as used in Item 10(e) of regulation S-K and may not be comparable to similarly titled measures used by other companies.

**2. ROCE after tax effect**

	Billions of yen			
	Year ending March 31, 2007 (Forecasts)	Year ended March 31, 2006	Six months ended September 30, 2006	Six months ended September 30, 2005
a. Operating income	¥ 810.0	¥ 832.6	¥ 516.9	¥ 558.4
b. Operating income after tax effect {=a*(1-effective tax rate)} (effective tax rate:40.9%)	478.7	492.1	305.5	330.0
c. Capital employed	4,857.7	4,850.4	4,837.5	4,868.2

## Edgar Filing: NTT DOCOMO INC - Form 6-K

ROCE before tax effect (=a/c)	16.7%	17.2%	<b>10.7%</b>	11.5%
ROCE after tax effect (=b/c)	9.9%	10.1%	<b>6.3%</b>	6.8%

Note: Capital employed = Two period ends average of (Shareholders' equity + Interest bearing liabilities)

Interest bearing liabilities = Current portion of long-term debt + short-term borrowings + Long-term debt

### 3. Free cash flows excluding irregular factors and changes in investments for cash management purpose

	Billions of yen			
	Year ending March 31, 2007 (Forecasts)	Year ended March 31, 2006	Six months ended September 30, 2006	Six months ended September 30, 2005
Free cash flows excluding irregular factors and changes in investments for cash management purpose	¥ 290.0	¥ 510.9	¥ (48.4)	¥ 360.2
Irregular factors (1)	(220.0)		(222.0)	
Changes of investments for cash management purpose (2)		149.0	(0.7)	(100.0)
Free cash flows	70.0	659.9	(271.1)	260.2
Net cash used in investing activities	(943.0)	(951.1)	(530.1)	(598.7)
Net cash provided by operating activities	1,013.0	1,610.9	259.0	858.9

Note: (1) Irregular factors represent the effects of uncollected revenues due to a bank holiday at the end of the fiscal period.

(2) Changes in investments for cash management purpose were derived from purchases, redemption at maturity and disposals of financial instruments held for cash management purpose with original maturities of longer than three months. Net cash used in investing activities for the six months ended September 30, 2006 and 2005 and the year ended March 31, 2006 includes changes in investments for cash management purpose. However, the effect of changes in investments for cash management purpose is not taken into account when we forecasted net cash used in investing activities for the year ending March 31, 2007 due to the difficulties in forecasting such effect.

### 4. Market equity ratio

	Billions of yen			
	Year ending March 31, 2007 (Forecasts)	Year ended March 31, 2006	Six months ended September 30, 2006	Six months ended September 30, 2005
a. Shareholders' equity		¥ 4,052.0	¥ 4,176.1	¥ 3,948.2
b. Market value of total share capital		8,144.9	8,519.4	9,837.4
c. Total assets		6,365.3	6,050.3	6,120.3
Equity ratio (=a/c)		63.7%	<b>69.0%</b>	64.5%
Market equity ratio (=b/c)		128.0%	<b>140.8%</b>	160.7%

Note: Market equity ratio is not forecasted because it is difficult to estimate the market value of total share capital in the future.

The

forecasts

presented

herein

are

forward-looking

statements

within

the

meaning

of

Section

27A

of

the

U.S.

Securities

Act

of

1933

and

Section

21E

of

the

U.S.

Securities

Act

of

1934.

Statements

made

in

this

presentation

with

respect

to

DoCoMo's

plans,

objectives,  
projected  
financials,  
operational  
figures,  
beliefs  
and  
other  
statements  
that  
are  
not  
historical  
facts  
are  
forward-looking  
statements  
about  
the  
future  
performance  
of  
DoCoMo  
which  
are  
based  
on  
management's  
expectations,  
assumptions,  
estimates,  
projections  
and  
beliefs  
in  
light  
of  
information  
currently  
available  
to  
it.  
These  
forward-looking  
statements,  
such  
as  
statements  
regarding  
the

introduction  
of  
new  
products  
and  
services  
or  
termination  
or  
suspension  
of  
existing  
services,  
financial  
and  
operational  
forecasts,  
dividend  
payments,  
the  
growth  
of  
the  
Japanese  
cellular  
market  
and  
the  
ubiquitous  
services  
market,  
the  
growth  
of  
data  
usage,  
the  
growth  
of  
DoCoMo's  
cellular  
phone  
business,  
the  
migration  
of  
users  
to  
DoCoMo's  
3G

services  
and  
associated  
improvements  
in  
3G  
services,  
improvements  
in  
3G  
and  
2G  
coverage  
area,  
the  
potential  
growth  
in  
the  
Japanese  
credit  
card  
business  
and  
DoCoMo's  
credit  
business,  
and  
managements  
goals  
are  
subject  
to  
various  
risks  
and  
uncertainties  
that  
could  
cause  
actual  
results  
to  
be  
materially  
different  
from  
and  
worse  
than

as  
described  
in  
the  
forward-looking  
statements.  
Potential  
risks  
and  
uncertainties  
include,  
without  
limitation,  
as  
competition  
in  
the  
market  
is  
expected  
to  
become  
more  
fierce  
due  
to  
changes  
in  
the  
business  
environment  
caused  
by  
the  
introduction  
of  
mobile  
number  
portability  
and  
new  
market  
entrants,  
competition  
from  
other  
cellular  
service  
providers  
or

other  
technologies  
could  
limit  
our  
acquisition  
of  
new  
subscribers,  
retention  
of  
existing  
subscribers  
and  
average  
revenue  
per  
unit  
(ARPU),  
or  
may  
lead  
to  
an  
increase  
in  
our  
costs  
and  
expenses;  
the  
new  
services  
and  
usage  
patterns  
introduced  
by  
our  
corporate  
group  
may  
not  
develop  
as  
planned,  
which  
could  
limit  
our

growth;  
the  
introduction  
or  
change  
of  
various  
laws  
or  
regulations  
or  
the  
application  
of  
such  
laws  
and  
regulations  
to  
our  
corporate  
group  
may  
adversely  
affect  
our  
financial  
condition  
and  
results  
of  
operations;  
limitations  
in  
the  
amount  
of  
frequency  
spectrum  
or  
facilities  
made  
available  
to  
us  
could  
negatively  
affect  
our  
ability

to  
maintain  
and  
improve  
our  
service  
quality  
and  
level  
of  
customer  
satisfaction;  
the  
W-CDMA  
technology  
that  
we  
use  
for  
our  
3G  
system  
and/or  
mobile  
multimedia  
services  
may  
not  
be  
introduced  
by  
other  
overseas  
operators,  
which  
could  
limit  
our  
ability  
to  
offer  
international  
services  
to  
our  
subscribers;  
our  
domestic  
and  
international

investments,  
alliances  
and  
collaborations  
may  
not  
produce  
the  
returns  
or  
provide  
the  
opportunities  
we  
expect;  
as  
electronic  
payment  
capability  
and  
many  
other  
new  
features  
are  
built  
into  
our  
cellular  
phones,  
and  
services  
of  
parties  
other  
than  
those  
belonging  
to  
our  
corporate  
group  
are  
provided  
through  
our  
cellular  
handsets,  
potential  
problems

resulting  
from  
malfunctions,  
defects,  
or  
missing  
of  
handsets  
or  
imperfection  
of  
services  
provided  
by  
such  
other  
parties  
may  
arise,  
which  
could  
have  
an  
adverse  
effect  
on  
our  
financial  
condition  
and  
results  
of  
operations;  
social  
problems  
that  
could  
be  
caused  
by  
misuse  
or  
misunderstanding  
of  
our  
products  
and  
services  
may  
adversely

affect  
our  
credibility  
or  
corporate  
image;  
inadequate  
handling  
of  
subscriber  
information  
by  
our  
corporate  
group  
or  
contractors  
may  
adversely  
affect  
our  
credibility  
or  
corporate  
image;  
owners  
of  
intellectual  
property  
rights  
that  
are  
essential  
for  
our  
business  
execution  
may  
not  
grant  
us  
the  
right  
to  
license  
or  
otherwise  
use  
such  
intellectual

property  
rights  
on  
acceptable  
terms  
or  
at  
all,  
which  
may  
limit  
our  
ability  
to  
offer  
certain  
technologies,  
products  
and/or  
services,  
and  
we  
may  
also  
be  
held  
liable  
for  
damage  
compensation  
if  
we  
infringe  
the  
intellectual  
property  
rights  
of  
others;  
earthquakes,  
power  
shortages,  
malfunctioning  
of  
equipment,  
and  
software  
bugs,  
computer  
viruses,

cyber  
attacks,  
hacking,  
unauthorized  
access  
and  
other  
problems  
could  
cause  
system  
failures  
in  
the  
networks  
required  
for  
the  
provision  
of  
service,  
disrupting  
our  
ability  
to  
offer  
services  
to  
our  
subscribers  
and  
may  
adversely  
affect  
our  
credibility  
or  
corporate  
image;  
concerns  
about  
wireless  
telecommunications  
health  
risks  
may  
adversely  
affect  
our  
financial

condition  
and  
results  
of  
operations;  
our  
parent,  
NTT,  
could  
exercise  
influence  
that  
may  
not  
be  
in  
the  
interests  
of  
our  
other  
shareholders.

Further  
information  
about  
the  
factors  
that  
could  
affect  
the  
company's  
results  
is  
included  
in

Item  
3.D:  
Risk  
Factors  
of  
its  
annual  
report  
on  
Form  
20-F

FY2006 1H Financial Results Highlights

Operating Income: 516.9 billion yen

(Down 41.5 billion year-on-year)

(Progress to full-year forecast: 63.8%)

Operating Revenues: Up 9.9 billion yen year-on-year

Cellular services revenues grew by 26.8 billion yen

(Inclusive of the impact of including in revenues the portion of Nikagetsu

Kurikoshi

(2-month carry over) allowances that are projected to expire)

Operating Expenses: Up 51.4 billion yen year-on-year

Cost of equipment sold rose 40.8 billion yen, due to the growth in the percentage of FOMA handsets to total handsets sold.

Returning profits to shareholders is considered one of the most important issues in our corporate agenda

Return to Shareholders

-

Dividend per share: 4,000 yen

(Maintain the same dividend level as FY ended Mar. 31, 2006, when it was doubled from the previous fiscal year)

-

Repurchase of own shares:

Study to repurchase up to 1.4 million shares for up to 250 billion yen

(Treasury shares kept in excess of 5% of total issued shares are planned for cancellation

once a year)

FY ending Mar. 31, 2007 (Planned)

MOU (Minutes of usage): Average communication time per one month per one user.

ARPU (Average  
monthly Revenue Per Unit):

Average  
monthly  
revenue  
per  
unit,  
or  
ARPU,  
is  
used  
to  
measure  
average  
monthly  
operating  
revenues  
attributable  
to  
designated  
services  
on  
a  
per  
user  
basis.  
ARPU  
is  
calculated  
by  
dividing  
various  
revenue  
items  
included  
in  
operating  
revenues  
from  
our  
wireless  
services,  
such  
as  
monthly  
charges,  
voice  
transmission  
charges  
and  
packet  
transmission

charges,  
from  
designated  
services  
which  
are  
incurred  
consistently  
each  
month,  
by  
number  
of  
active  
subscribers  
to  
the  
relevant  
services.  
Accordingly,  
the  
calculation  
of  
ARPU  
excludes  
revenues  
that  
are  
not  
representative  
of  
monthly  
average  
usage  
such  
as  
activation  
fees.  
We  
believe  
that  
our  
ARPU  
figures  
provide  
useful  
information  
to  
analyze  
the

average  
usage  
of  
our  
subscribers  
and  
the  
impacts  
of  
changes  
in  
our  
billing  
arrangements.

The  
revenue  
items  
included  
in  
the  
numerators  
of  
our  
ARPU  
figures  
are  
based  
on  
our  
U.S.  
GAAP  
results  
of  
operations.

This  
definition  
applies  
to  
all  
ARPU  
figures  
hereinafter.

Aggregate ARPU(FOMA+mova): Voice ARPU (FOMA+mova) + Packet ARPU (FOMA+mova)

Voice ARPU (FOMA+mova) :

charges)  
/  
No.  
of  
active  
cellular  
phone  
subscribers  
(mova)

Number of active subscribers used in ARPU and MOU calculations are as follows:

Quarterly data: sum of No. of active subscribers in each month \* of the current quarter

Half-year data: sum of No. of active subscribers in each month \* of the current half

Full-year data: sum of No. of active subscribers in each month \* of the current fiscal year

\* No. of active subscribers in each month : (No. of subs at end of previous month+No. of subs at end of current month)/2

The revenues and no. of subscribers of Communication Module Service are not included in the above calculation of ARPU and

Free cash flows

Minority interests in earnings of consolidated subsidiaries

c. Total operating revenues

EBITDA margin (=a/c)

Equity in net losses of affiliates

b. Net income

(2) Changes in investments for cash management purpose were derived from purchases, redemption at maturity and disposals of investments for cash management purpose with original maturities of longer than three months. Net cash used in EBITDA and EBITDA margin, as we use them, are different from EBITDA as used in Item 10(e) of regulation S-K and may include other

companies.

Changes of investments for cash management purpose (2)

Free cash flows excluding changes in investments for cash management purpose

Irregular factors (1)

(1) Irregular factors represent the effects of uncollected revenues due to a bank holiday at the end of the fiscal period.

Note:

Net cash used in investing activities

Net cash provided by operating activities

Net income margin (=b/c)

Depreciation and amortization

Operating income

Other income (expense)

Income taxes

Losses on sale or disposal of property, plant and equipment
