#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### (Unaudited)

#### Note 1

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial reporting and with applicable quarterly reporting regulations of the Securities and Exchange Commission. They do not include all of the information and notes required by accounting principles generally accepted in the United States of America for complete financial statements. Therefore, these consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the C&F Financial Corporation Annual Report on Form 10-K for the year ended December 31, 2005.

In the opinion of C&F Financial Corporation s management, all adjustments, consisting only of normal recurring accruals, necessary to present fairly the financial position as of September 30, 2006, the results of operations for the three and nine months ended September 30, 2006 and 2005 and cash flows for the nine months ended September 30, 2006 and 2005 have been made. The results of operations for the interim periods are not necessarily indicative of the results to be expected for the full year.

The consolidated financial statements include the accounts of C&F Financial Corporation (the Corporation ) and its subsidiary, Citizens and Farmers Bank (the Bank ), with all significant intercompany transactions and accounts being eliminated in consolidation.

**Share-Based Compensation:** Effective January 1, 2006, the Corporation adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 123(R), *Share-Based Payment*, which requires that the Corporation recognize expense related to the fair value of share-based compensation awards in net income.

Prior to January 1, 2006, the Corporation accounted for its three share-based compensation plans under the recognition and measurement principles of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations. Accordingly, stock compensation expense was not recognized in net income, as all options granted under these plans had an exercise price equal to the fair market value of the underlying common stock on the date of grant. However, notes to prior financial statements included pro forma disclosures of the effect on net income and earnings per share as if the Corporation had applied the fair value recognition provisions of SFAS No. 123, *Accounting for Stock-Based Compensation*, to share-based compensation.

6

The following table presents the proforma disclosures for the quarter and nine months ended September 30, 2005.

(in 000 s, except per share amounts)	Sept	Ionths Ended ember 30, 2005	Nine Months End September 30, 2005		
Net income, as reported	\$	3,413	\$	9,028	
Total stock-based compensation expense determined under fair value based method					
for all awards, net of related tax effects		(106)		(1,040)	
Pro forma net income	\$	3,307	\$	7,988	
Earnings per share:					
Basic as reported	\$	1.05	\$	2.61	
Basic pro forma	\$	1.02	\$	2.31	
Diluted as reported	\$	1.01	\$	2.52	
Diluted pro forma	\$	.98	\$	2.23	

The Corporation has elected to follow the modified prospective transition method allowed by SFAS 123(R). Under the modified prospective transition method, compensation expense is recognized prospectively for all unvested options outstanding at January 1, 2006 and for all awards modified or granted after that date. On December 20, 2005, the Corporation accelerated the vesting of all unvested stock options outstanding under the Corporation s three share-based compensation plans. The board of directors accelerated the vesting of these options in order to eliminate the Corporation s recognition of compensation expense associated with these options under the SFAS 123(R) modified prospective transition method. Because there were no unvested options outstanding at January 1, 2006, no share-based compensation expense has been recognized in 2006 for options granted prior to January 1, 2006. Compensation expense for the quarter and nine months ended September 30, 2006 included \$34,000 (\$22,000 after tax) and \$57,000 (\$37,000 after tax) for options granted during 2006. As of September 30, 2006, there was \$80,000 of total unrecognized compensation expense related to nonvested stock options that will be recognized over the remaining requisite service period.

Stock option plan activity for the nine months ended September  $30,\,2006$  is summarized below:

			Remaining Contractual Life	Une Ii N	alue of xercised n-The Ioney ptions
	Shares	Exercise Price*	(in years)*	(ir	1 000 s)
Options outstanding, January 1, 2006	564,067	\$ 30.65			
Granted	13,500	39.60			
Exercised	(22,500)	16.52			
Options outstanding at September 30, 2006	555,067	\$ 31.44	6.9	\$	5,138
Options exercisable at September 30, 2006	541,567	\$ 31.24	6.8	\$	5,126

<sup>\*</sup> Weighted average

The total intrinsic value of in-the-money options exercised during the first nine months of 2006 was \$509,000. Cash received from option exercises during the first nine months of 2006 was \$371,000. The Corporation has a policy of issuing new shares to satisfy the exercise of stock options.

7

In November 2005, Financial Accounting Standards Board (FASB) Staff Position (FSP) No. FAS 123(R)-3, *Transition Election Related to Accounting for the Tax Effects of Share-Based Payment Awards*, was issued. This FSP provides an elective alternative simplified method for calculating the pool of excess tax benefits available to absorb tax deficiencies recognized subsequent to the adoption of SFAS No. 123(R). Companies may take up to one year from the effective date of the FSP or date of adoption of SFAS 123(R) to evaluate the available transition alternatives and make a one-time election as to which method to adopt. The Corporation is currently in the process of evaluating the alternative methods.

#### Note 2

Diluted net income per share has been calculated on the basis of the weighted average number of shares of common stock and common stock equivalents outstanding for the applicable periods. Potentially-dilutive common stock had no effect on income available to common shareholders.

#### Note 3

During the first nine months of 2006, the Corporation repurchased 13,122 shares of its common stock in open-market transactions at prices from \$37.27 to \$40.00.

On June 1, 2005, the Corporation made an offer to its shareholders to repurchase up to 180,000 shares of its common stock at a price of \$41.00 per share. The initial expiration date of the offer was June 30, 2005. The number of shares tendered by the expiration date far exceeded the 180,000 shares initially authorized. Therefore, the Corporation s Board of Directors extended the expiration date of its offer until July 22, 2005 and increased the number of shares subject to the offer to up to 450,000 shares. The tender offer expired on July 22, 2005 and 427,186 tendered shares of the Corporation s common stock were accepted on July 27, 2005. The total cost of the repurchase, including transaction costs, approximated \$17.6 million.

8

#### Note 4

Securities in an unrealized loss position at September 30, 2006, by duration of the period of unrealized loss, are shown below. No impairment has been recognized on any securities in a loss position based on management s intent and demonstrated ability to hold such securities to scheduled maturity or call dates and management s evaluation that there is no permanent impairment in the value of these securities.

	Less Than 12 Months		12 Months or More			Total		
	Fair	Unrealized	Fair	Unr	ealized	Fair	Unr	ealized
(to 000 a)	<b>V</b> -1	¥	¥7-1			V-l	,	r
(in 000 s)	Value	Loss	Value		LOSS	Value		Loss
U.S. government agencies and corporations	\$	\$	\$ 5,140	\$	103	\$ 5,140	\$	103
Mortgage-backed securities	1,441	17	471		32	1,912		49
Obligations of states and political subdivisions	5,162	34	2,404		38	7,566		72
Subtotal-debt securities	6,603	51	8,015		173	14,618		224
Preferred stock			1,016		182	1,016		182
Total temporarily impaired securities	\$ 6,603	\$ 51	\$ 9,031	\$	355	\$ 15,634	\$	406

The primary cause of the temporary impairments in the Corporation's investment in debt securities was the decline in prices as interest rates have risen. There are 38 securities totaling \$14.62 million in the Corporation's debt securities portfolio considered temporarily impaired at September 30, 2006. Because the Corporation has the intent and demonstrated ability to hold these investments until a recovery of unrealized losses, which may be maturity, the Corporation does not consider these investments to be other-than-temporarily impaired at September 30, 2006. The primary cause of the temporary impairments in the Corporation's investment in preferred stock was one holding in an energy company, which suffered a liquidity crisis as a result of damage to electric and gas facilities by Hurricanes Katrina and Rita. Despite the extent of the damage done, the energy company believes the impact will be relatively short term and that it has sufficient liquidity to meet its current obligations and fund its restoration efforts from its parent company is available cash and existing credit facility. The Corporation has evaluated the prospects of the energy company in relation to the severity and duration of the impairment. Based on that evaluation and the Corporation is intent and demonstrated ability to hold this investment for a reasonable period of time sufficient for a forecasted recovery of unrealized losses, the Corporation does not consider this investment to be other-than-temporarily impaired at September 30, 2006.

Securities in an unrealized loss position at December 31, 2005 are shown below by duration of the period of unrealized loss.

	Less Tha Fair		Months realized	12 Mont Fair		More realized	T Fair	otal Unr	ealized

Amortization of net loss	33	33
Net periodic benefit cost	\$ 537	\$ 408

In December 2005, the Bank made a \$28,000 contribution to the plan. This payment was the maximum tax-deductible contribution for 2005 allowable under the Internal Revenue Code.

### Note 6

The Corporation operates in a decentralized fashion in three principal business segments: Retail Banking, Mortgage Banking and Consumer Finance. Revenues from Retail Banking operations consist primarily of interest earned on loans and investment securities and service charges on deposit accounts. Mortgage Banking operating revenues consist principally of gains on sales of loans in the secondary market, loan origination fee income and interest earned on mortgage loans held for sale. Revenues from Consumer Finance consist primarily of interest and fees earned on automobile loans.

The Corporation s other subsidiaries include:

an investment company that derives revenues from brokerage services,

an insurance company that derives revenues from insurance services, and

# Edgar Filing: C & F FINANCIAL CORP - Form 10-Q

a title company that derives revenues from title insurance services.

The results of these other subsidiaries are not significant to the Corporation as a whole and have been included in Other.

The Retail Banking segment extends a warehouse line of credit to the Mortgage Banking segment, providing the funds needed to originate mortgage loans. The Retail Banking segment charges the Mortgage Banking segment interest at the daily FHLB advance rate plus 50 basis points. The

12

Retail Banking segment also provides the Consumer Finance segment with a portion of the funds needed to originate loans and charges the Consumer Finance segment interest at LIBOR plus 180 basis points. The Retail Banking segment acquires certain lot and permanent loans, second mortgage loans and home equity lines of credit from the Mortgage Banking segment at prices similar to those paid by third-party investors. These transactions are eliminated to reach consolidated totals. Certain corporate overhead costs incurred by the Retail Banking segment are not allocated to the Mortgage Banking, Consumer Finance and Other segments.

#### Note 7

In February 2006, the FASB issued SFAS No. 155, Accounting for Certain Hybrid Financial Instruments an amendment of FASB Statements No. 133 and 140. SFAS 155 permits fair value measurement of any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation. SFAS 155 also clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS 133. It establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation. SFAS 155 also clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives. Finally, SFAS 155 amends SFAS 140 to eliminate the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. SFAS 155 is effective for all financial instruments acquired or issued after the beginning of an entity s first fiscal year that begins after September 15, 2006. The Corporation does not expect the implementation of SFAS 155 to have a material effect on its financial statements.

In March 2006, the FASB issued SFAS No. 156, Accounting for Servicing of Financial Assets an amendment of FASB Statement No. 140. SFAS 156 requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into certain servicing contracts and requires all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable. SFAS 156 permits an entity to choose between the amortization and fair value methods for subsequent measurements. At initial adoption, SFAS 156 permits a one-time reclassification of available for sale securities to trading securities by entities with recognized servicing rights. SFAS 156 also requires separate presentation of servicing assets and servicing liabilities subsequently measured at fair value in the statement of financial position and additional disclosures for all separately recognized servicing assets and servicing liabilities. SFAS 156 is effective as of the beginning of an entity s first fiscal year that begins after September 15, 2006. The Corporation does not expect the implementation of SFAS 156 to have a material effect on its financial statements.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*. SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements but may change current practice for some entities. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those years. The Corporation does not expect the implementation of SFAS 157 to have a material effect on its financial statements.

In September 2006, the FASB issued SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans an amendment of FASB Statements No. 87, 88, 106, and 132(R). SFAS 158 requires an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income.

13

The funded status of a benefit plan will be measured as the difference between plan assets at fair value and the benefit obligation. For a pension plan, the benefit obligation is the projected benefit obligation. For any other postretirement plan, the benefit obligation is the accumulated postretirement benefit obligation. SFAS 158 also requires an employer to measure the funded status of a plan as of the date of its year-end statement of financial position. SFAS 158 also requires additional disclosure in the notes to financial statements about certain effects on net periodic benefit cost for the next fiscal year that arise from delayed recognition of the gains or losses, prior service costs or credits, and transition asset or obligation. The Corporation is required to initially recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after December 15, 2006, which for the Corporation will be December 31, 2006. The requirement to measure plan assets and benefit obligations as of the date of the employers—fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. The Corporation—s wholly-owned subsidiary, Citizens and Farmers Bank, has a non-contributory, defined benefit pension plan, which will be subject to the provisions of SFAS 158. A valuation of the Bank—s plan will be performed as of October 1, 2006 and the funded status of the plan will be determined in connection with this valuation. If the plan is determined to be underfunded, the Corporation will recognize a pension liability on its balance at December 31, 2006. This liability will be reported as a reduction in the Accumulated Other Comprehensive Income component of shareholders—equity.

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes: An Interpretation of FASB Statement No. 109*, (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an entity s financial statements in accordance with SFAS 109. FIN 48 prescribes a recognition threshold and measurement principles for the financial statement recognition and measurement of tax positions taken or expected to be taken on a tax return. FIN 48 is effective for fiscal years beginning after December 15, 2006. The Corporation does not expect the implementation of FIN 48 to have a material effect on its financial statements.

In September 2006, the Securities and Exchange Commission (SEC) released Staff Accounting Bulletin No. 108 (SAB 108). SAB 108 expresses the SEC staff's views regarding the process of quantifying financial statement misstatements. These interpretations were issued to address diversity in practice and the potential under current practice for the build up of improper amounts on the balance sheet. SAB 108 expresses the SEC staff's view that a registrant s materiality evaluation of an identified unadjusted error should quantify the effects of the error on each financial statement and related financial statement disclosures and that prior year misstatements should be considered in quantifying misstatements in current year financial statements. SAB 108 also states that correcting prior year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior year financial statements. Registrants electing not to restate prior periods should reflect the effects of initially applying the guidance in SAB 108 in their annual financial statements covering the first fiscal year ending after November 15, 2006. The cumulative effect of the initial application should be reported in the carrying amounts of assets and liabilities as of the beginning of that fiscal year and the offsetting adjustment should be made to the opening balance of retained earnings for that year. Registrants should disclose the nature and amount of each individual error being corrected in the cumulative adjustment. The disclosure should also include when and how each error arose and the fact that the errors had previously been considered immaterial. The SEC staff encourages early application of the guidance in SAB 108 for interim periods of the first fiscal year ending after November 15, 2006. The Corporation does not expect the implementation of SAB 108 to have a material effect on its financial statements.

14

#### ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This report contains statements concerning the Corporation s expectations, plans, objectives, future financial performance and other statements that are not historical facts. These statements may constitute forward-looking statements as defined by federal securities laws. These statements may address issues that involve estimates and assumptions made by management and risks and uncertainties. Actual results could differ materially from historical results or those anticipated by such statements. Factors that could have a material adverse effect on the operations and future prospects of the Corporation include, but are not limited to, changes in:

	1)	interest rates;
	2)	general economic conditions;
	3)	the legislative/regulatory climate;
	4)	monetary and fiscal policies of the U.S. Government, including policies of the U.S. Treasury and the Federal Reserve Board;
	5)	the quality or composition of the loan or investment portfolios;
	6)	demand for loan products;
	7)	deposit flows;
	8)	competition;
	9)	demand for financial services in the Corporation s market area;
	10)	technology;
	11)	reliance on third parties for key services; and
These	12) e risks	accounting principles, policies and guidelines. s and uncertainties should be considered in evaluating the forward-looking statements contained herein. We caution readers not to

The following discussion supplements and provides information about the major components of the results of operations, financial condition, liquidity and capital resources of the Corporation. This discussion and analysis should be read in conjunction with the accompanying consolidated financial statements.

place undue reliance on those statements, which speak only as of the date of this report.

### Edgar Filing: C & F FINANCIAL CORP - Form 10-Q

#### CRITICAL ACCOUNTING POLICIES

The preparation of financial statements requires us to make estimates and assumptions. Those accounting policies with the greatest uncertainty and that required our most difficult, subjective or complex judgments affecting the application of these policies, and the likelihood that materially different amounts would be reported under different conditions, or using different assumptions, are described below.

Allowance for Loan Losses: We establish the allowance for loan losses through charges to earnings in the form of a provision for loan losses. Loan losses are charged against the allowance when we believe that the collection of the principal is unlikely. Subsequent recoveries of losses previously charged against the allowance are credited to the allowance. The allowance represents an amount that, in our judgment, will be adequate to absorb any losses on existing loans that may become uncollectible. Our judgment in determining the adequacy of the allowance is based on evaluations of the collectibility of loans while taking into consideration such factors as changes in the nature and volume of the loan

15

portfolio, current economic conditions that may affect a borrower s ability to repay, overall portfolio quality, concentrations of credit risk and specific potential losses. This evaluation is inherently subjective because it requires estimates that are susceptible to significant revision as more information becomes available.

Impairment of Loans: We measure impaired loans based on the present value of expected future cash flows discounted at the effective interest rate of the loan (or, as a practical expedient, at the loan's observable market price) or the fair value of the collateral if the loan is collateral dependent. We consider a loan impaired when it is probable that the Corporation will be unable to collect all interest and principal payments as scheduled in the loan agreement. We do not consider a loan impaired during a period of delay in payment if we expect the ultimate collection of all amounts due. A valuation allowance is maintained to the extent that the measure of the impaired loan is less than the recorded investment. The loans currently designated as impaired are being valued based on collateral. The reserves that we have established are based on appraisals of the collateral and have been adjusted for items such as selling costs and current conditions. We believe these adjustments are reasonable.

**Impairment of Securities:** Impairment of investment securities results in a write-down that must be included in net income when a market value decline below cost is other-than-temporary. We regularly review each investment security for impairment based on criteria that include the extent to which cost exceeds market price, the duration of that market value decline, the financial health of and specific prospects for the issuer and our ability and intention with regard to holding the security to maturity.

Goodwill: Goodwill is no longer subject to amortization over its estimated useful life, but is subject to at least an annual assessment for impairment using a two-step process that begins with an estimation of the fair value of the reporting unit. In assessing the recoverability of the Corporation's goodwill, all of which was recognized in connection with the Bank's acquisition of C&F Finance in September 2002, we must make assumptions in order to determine the fair value of the respective assets. Major assumptions used in determining impairment were increases in future income, sales multiples in determining terminal value and the discount rate applied to future cash flows. As part of the impairment test, we performed a sensitivity analysis by increasing the discount rate, lowering sales multiples and reducing increases in future income. We completed the annual test for impairment during the fourth quarter of 2005 and determined there was no impairment to be recognized in 2005. If the underlying estimates and related assumptions change in the future, we may be required to record impairment charges.

**Defined Benefit Pension Plan:** The Bank maintains a non-contributory, defined benefit pension plan for eligible full-time employees as specified by the plan. Plan assets, which consist primarily of marketable equity securities and corporate and government fixed income securities, are valued using market quotations. The Bank s actuary determines plan obligations and annual pension expense using a number of key assumptions. Key assumptions include the discount rate, the estimated future return on plan assets and the anticipated rate of future salary increases. Changes in these assumptions in the future, if any, may impact pension expense as measured in accordance with SFAS No. 87, *Employers Accounting for Pensions*.

**Accounting for Income Taxes:** Determining the Corporation s effective tax rate requires judgment. In the ordinary course of business, there are transactions and calculations for which the ultimate tax outcomes are uncertain. In addition, the Corporation s tax returns are subject to audit by various tax authorities. Although we believe that the estimates are reasonable, no assurance can be given that the final tax outcome will not be materially different than that which is reflected in the income tax provision and accrual.

16

For further information concerning accounting policies, refer to Note 1 of the Corporation s Consolidated Financial Statements in the Corporation s Annual Report on Form 10-K for the year ended December 31, 2005.

#### **OVERVIEW**

Our primary financial goals are to maximize the Corporation s earnings and to deploy capital in profitable growth initiatives that will enhance shareholder value. We track three primary performance measures in order to assess the level of success in achieving these goals: (i) return on average assets (ROA), (ii) return on average equity (ROE) and (iii) growth in earnings. In addition to these financial performance measures, we track the performance of the Corporation s three principal business activities: retail banking, mortgage banking and consumer finance. We also actively manage our capital through growth, stock repurchases and dividends.

**Financial Performance Measures.** For the Corporation, net income decreased 8.8 percent to \$3.11 million, or 95 cents per share assuming dilution, for the third quarter ended September 30, 2006 compared to \$3.41 million, or \$1.01 per share assuming dilution, for the third quarter of 2005. Net income for the first nine months of 2006 increased 3.7 percent to \$9.36 million, or \$2.86 per share assuming dilution, compared to \$9.03 million, or \$2.52 per share assuming dilution, for the first nine months of 2005. Net income for the first nine months of 2006 included \$728,000, after taxes, attributable to the recovery of past due interest and a reduction in the Corporation s loan loss allowance in connection with the pay-off of previously nonperforming loans of one commercial relationship. Excluding the 22 cents per share after-tax effect of this loan pay-off, the Corporation s earnings were \$8.64 million, or \$2.64 per share assuming dilution, for the first nine months of 2006, which represents a 4.8 percent increase in earnings per share over the same period in 2005. Earnings for the first nine months of 2006 reflected the effect of our growth initiatives and strategic capital management. While expenses associated with our growth initiatives have resulted in a decrease in operating income, excluding the effect of the commercial loan pay-off, for the nine months of September 30, 2006, earnings per share for the nine months increased compared to 2005 as a result of the large share repurchase in mid-2005.

The Corporation s annualized ROE and annualized ROA were 19.15 percent and 1.78 percent, respectively, for the third quarter of 2006 compared with 21.49 percent and 2.01 percent for the third quarter of 2005. The Corporation s annualized ROE and annualized ROA were 19.86 percent and 1.82 percent, respectively, for the first nine months of 2006. Excluding the effect of the commercial loan pay-off, the Corporation s annualized ROE was 18.32 percent for the first nine months of 2006, compared with 17.41 percent for the first nine months of 2005. The annualized ROA, excluding the effect of the commercial loan pay-off, was 1.67 percent for the first nine months of 2006, compared with 1.88 percent for the first nine months of 2005.

The decline in annualized ROE for the third quarter of 2006 resulted from the earnings decline at the Mortgage Banking and Retail Banking segments, which was offset in part by earnings improvement at the Consumer Finance segment. The increase in annualized ROE for the first nine months of 2006, excluding the effect of the commercial loan pay-off, resulted from the accretive effect of the Corporation s share repurchase in July 2005. The decline in annualized ROA for the quarter and nine months ended September 30, 2006 resulted from the decline in earnings, excluding the effect of the commercial loan pay-off, coupled with an increase in average assets, primarily loans held for investment and new facilities.

17

**Principal Business Activities.** An overview of the financial results for each of the Corporation s principal segments is presented below. A more detailed discussion is included in Results of Operations.

Retail Banking: Third quarter net income for C&F Bank declined slightly to \$1.61 million in 2006 compared to \$1.67 million in 2005. Net income for the first nine months of 2006 increased to \$5.24 million compared to \$4.71 million in 2005. Net income for the first nine months of 2006 included \$728,000, after taxes, recognized in connection with the pay-off of previously nonperforming loans of one commercial relationship. Excluding this amount, the Bank s net income for the first nine months of 2006 was \$4.51 million. Included in earnings for the third quarter and first nine months of 2006 were the effects on operating expenses of the Peninsula and Richmond branch expansions and the operations center relocation, higher operational and administrative personnel costs to support growth, as well as interest expense on trust preferred securities, the proceeds from which were used to partially fund the large share repurchase in mid-2005. Higher expenses were offset in part by an increase in net interest income, which resulted from an increase in both the amount of and yield on earning assets, and an increase in service charges on deposit accounts. The Bank s net interest margin has benefited in the short term as variable-rate loans have repriced as short-term interest rates have increased while deposits have repriced at a more gradual pace. Future earnings of the Retail Banking segment may be impacted by net interest margin compression if the lag in deposit repricing continues to diminish.

Mortgage Banking: Third quarter net income for C&F Mortgage Corporation decreased to \$698,000 in 2006 compared to \$1.15 million in 2005. Net income for the first nine months of 2006 decreased to \$1.76 million compared to \$2.48 million in 2005. These declines reflected continued margin compression and reduced loan volume as demand for residential mortgage loans and refinancings has moderated as interest rates have increased. Gains on loan sales have declined due to increasingly narrow profit margins resulting from competition and ancillary fees have declined due to a decline in loan originations. C&F Mortgage has also experienced a decrease in net interest income resulting from a lower average balance of loans held for sale and net interest margin compression due to the increasing cost of funds. C&F Mortgage s loan origination volume during the third quarter and the first nine months of 2006 declined 25.4 percent and 13.3 percent, respectively, from their 2005 levels. For the third quarter of 2006, the amount of loan originations at C&F Mortgage resulting from refinancings was \$54.6 million compared to \$121.5 million for the third quarter of 2005. Loans originated for new and resale home purchases for these two time periods were \$183.9 million and \$198.2 million, respectively. For the first nine months of 2006, the amount of loan originations at C&F Mortgage resulting from refinancings was \$193.1 million compared to \$288.1 million for the first nine months of 2005. Loans originated for new and resale home purchases for these two nine-month periods were \$522.1 million compared to \$536.3 million. Future earnings of the Mortgage Banking segment may be negatively affected if interest rate trends result in fewer new and resale home sales and loan refinancings.

Consumer Finance: Third quarter net income for C&F Finance Company increased to \$795,000 in 2006 compared to \$555,000 in 2005. Net income for the first nine months of 2006 increased to \$2.31 million compared to \$1.78 million in 2005. The earnings improvements in the third quarter and the first nine months of 2006 resulted from respective 13.1 percent and 15.8 percent increases in average loans outstanding, which more than offset the decline in C&F Finance s net interest margins attributable to increases in the cost of borrowings resulting from rising interest rates, and operating expenses to support growth. Operating results in 2006 benefited from the completion of C&F Finance s conversion to a new loan system, the consolidation and relocation of its operations center to a new location in Richmond, Virginia, and a change in the third-party lender for its secured revolving line of credit with financing terms that provide for a rate reduction from the prior terms and lower administration fees all of which occurred after the first quarter of 2005. We believe that with these improvements we have established a platform with the capacity to support current operations and

18

# Edgar Filing: C & F FINANCIAL CORP - Form 10-Q

#### **Table of Contents**

future growth, which will enhance long-term earnings. In addition to earnings growth during 2006, nonaccrual consumer finance loans as a percentage of total consumer finance loans was less than one percent as of September 30, 2006 compared to 1.64 percent as of December 31, 2005, which reflected C&F Finance s overall effort to reduce nonperforming assets. Future earnings at the Consumer Finance segment will be further impacted by economic conditions including, but not limited to, the employment market, interest rate levels and the resale market for used automobiles.

**Capital Management.** Total assets grew by \$38.82 million to \$710.78 million during the first nine months of 2006. A detailed discussion of the changes in our financial position since December 31, 2005 is included in the section Financial Condition. Dividends for the first nine months of 2006 were 85 cents per share, a 16.4 percent increase over 73 cents per share in the first nine months of 2005. The weighted average number of shares outstanding in the first nine months of 2006 was 3,149,643 compared to 3,454,683 in the first nine months of 2005. This decrease resulted from the repurchase of approximately 427,000 shares of the Corporation s common stock in mid-2005, which was accretive to earnings per share and ROE.

On November 4, 2005, the Corporation s board of directors approved the repurchase of up to five percent of the Corporation s common stock (approximately 156,783 shares) over the twelve months ending November 3, 2006. We have purchased 13,222 shares under this authorization.

Interest income and expense are affected by fluctuations in interest rates, by changes in the volume of earning assets and interest-bearing liabilities, and by the interaction of rate and volume factors. The following tables show the direct causes of the changes in the components of net interest income on a taxable-equivalent basis from the third quarter of 2005 to the third quarter of 2006 and from the first nine months of 2005 to the first nine months of 2006. Rate/volume variances, the third element in the calculation, are not shown separately in the table, but are allocated to the rate and volume variances in proportion to the relationship of the absolute dollar amounts of the change in each. Loans include both nonaccrual loans and loans held for sale.

Total interest expense	3,440 1,403 4,931

Net interest income, on a taxable equivalent basis, for the third quarter of 2006 was \$10.25 million compared to \$9.87 million for the third quarter of 2005. Net interest income, on a taxable equivalent basis, for the first nine months of 2006 was \$30.99 million compared to \$28.36 million for the first nine months of 2005. The net interest margin was 6.44 percent for the third quarter of 2006 compared to 6.31 percent for the third quarter of 2005. The net interest margin of 6.56 percent for the nine months ended September 30, 2006 included \$870,000 of nonaccrued and default interest attributable to the repayment of previously nonperforming loans of one commercial relationship. Excluding the effect of the commercial loan pay-off, the net interest margin was 6.42 percent for the first nine months of 2006 compared to 6.43 percent for the same period in 2005. The moderation of the increase in net interest income during the third quarter of 2006 reflected the diminishing lag in deposit repricing. Increases of 96 basis points and 106 basis points in the yield on interest-earning assets for the three and nine months ended September 30, 2006, respectively, were significantly offset by increases of 95 basis points and 101 basis points, respectively, in the rate on interest-bearing liabilities.

# Edgar Filing: C & F FINANCIAL CORP - Form 10-Q

Average loans held for investment increased \$52.94 million and \$65.86 million in the third quarter and the first nine months of 2006, respectively, compared to the same periods in 2005. The Retail Banking segment s average loan portfolio increased \$38.71 million in the third quarter of 2006 and \$49.79 million in the first nine months of 2006 compared to the same periods in 2005. These increases were mainly attributable to higher loan production in the Virginia Peninsula market and residential construction loan growth. The Consumer Finance segment s average loan portfolio increased \$14.23 million in the third quarter of 2006 and \$16.07 million in the first nine months of 2006 compared to the same periods in 2005. These increases were mainly attributable to overall growth at existing

21

locations. Average loans held for sale at the Mortgage Banking segment decreased \$34.82 million in the third quarter of 2006 and \$19.06 million in the first nine months of 2006. Mortgage interest rate trends over the last twelve months have resulted in declines of 25.4 percent and 13.3 percent in loan origination volume during the third quarter and first nine months of 2006, respectively. The yield on loans held for investment and loans held for sale increased as a result of a general increase in interest rates since mid-2004.

Average securities available for sale decreased \$2.73 million and \$2.75 million for the third quarter and the first nine months of 2006, respectively, compared to the same periods in 2005. In addition, their average yield declined 26 basis points and 22 basis points for the third quarter and the first nine months of 2006, respectively. The decline in the average balance resulted from the utilization of proceeds from maturities and calls to partially fund the increase in loan demand. The yield decreases reflected the impact of the flat yield curve on long-term interest rates.

Average interest earning deposits at other banks, primarily the FHLB, decreased \$4.21 million and \$6.31 million for the third quarter and the first nine months of 2006, respectively, compared to the same periods in 2005. Fluctuations in the average balance of these low-yielding deposits occurred in response to loan demand. The average yield on interest-earning deposits at other banks increased 177 basis points and 211 basis points for the third quarter and first nine months of 2006, respectively. The higher yields reflected increases in short-term interest rates, which began in mid-2004.

Although average interest-bearing deposits increased \$19.53 million and \$30.73 million for the third quarter and the first nine months of 2006, respectively, the increase in interest on deposits was influenced to a greater extent by the increase in deposit rates. The average cost of deposits increased 79 basis points for the third quarter of 2006 and 82 basis points for the first nine months of 2006 due to the increase in short-term interest rates, coupled with the repricing of maturing deposits at higher interest rates.

Average borrowings increased \$20.21 million for the first nine months of 2006 compared to the same period in 2005 due to a new line of credit and the issuance of trust preferred capital securities in the third quarter of 2005 to fund the Corporation s repurchase of 427,186 shares of its common stock in mid-2005. The increase in interest on borrowings was influenced to a greater extent by the increase in cost of borrowings, which increased 165 basis points and 147 basis points for the third quarter and the first nine months of 2006, respectively, compared to the same periods in 2005. The majority of the Corporation s borrowings are indexed to short-term interest rates and reprice as short-term interest rates change.

The net interest margin has benefited in the short term as prime-based loans have repriced as the prime rate has changed. However, we expect that the favorable impact of the deposit repricing lag will neutralize in the longer term and the cost of borrowings will continue to increase as short-term interest rates rise.

# Edgar Filing: C & F FINANCIAL CORP - Form 10-Q

Total noninterest income \$3,129 \$ 16,769 \$ 226 \$ 693 \$ 20,817

Total noninterest income declined approximately 12.1 percent to \$7.19 million for the third quarter of 2006 and 3.7 percent to \$20.06 million for the first nine months of 2006. Total noninterest income decreased for the three and nine months ended September 30, 2006 at the Mortgage Banking

23

segment because of (1) lower gains on sales of loans as a result of increasingly narrow profit margins due to competition, (2) lower demand for loans and (3) lower ancillary fees as a result of a decline in loan originations. Total noninterest income increased at the Retail Banking and Consumer Finance segments for the three and nine months ended September 30, 2006 because of (1) higher service charges and fees on deposit accounts at the Retail Banking segment resulting from deposit account growth, coupled with the expansion of our overdraft protection services and (2) higher service charges and fees at the Consumer Finance segment resulting from fees generated from loan processing and collection.

Total noninterest expense increased 1.3 percent to \$11.43 million for the third quarter of 2006 compared to the third quarter of 2005 and 6.2 percent to \$33.20 million for the first nine months of 2006 compared to the first nine months of 2005. The Retail Banking and the Consumer Finance segments reported increases in total noninterest expense for the three and nine months ended September 30, 2006 that were primarily attributable to higher personnel and operating expenses to support growth and technology enhancements at both segments. Noninterest expense of the Retail Banking segment included costs associated with our new Hampton and Kiln Creek retail banking branches on the Virginia Peninsula, both of which opened in 2006, our new operations center, which opened in late 2005, and staffing and training personnel for our two new retail banking branches undergoing renovation in the Richmond area. Total noninterest expense declined for the three and nine months ended September 30, 2006 at the Mortgage Banking segment because of lower personnel costs due to lower origination volume in 2006.

#### **Income Taxes**

Income tax expense for the third quarter of 2006 totaled \$1.44 million, an effective tax rate of 31.6 percent, compared with \$1.49 million, or 30.4 percent, for the third quarter of 2005. Income tax expense for the first nine months of 2006 totaled \$4.25 million, an effective tax rate of 31.2 percent, compared with \$4.02 million, or 30.8 percent, for the first nine months of 2005.

#### ASSET QUALITY

#### **Allowance for Loan Losses**

The allowance for loan losses represents an amount that, in our judgment, will be adequate to absorb any losses on existing loans that may become uncollectible. The provision for loan losses increases the allowance, and loans charged off, net of recoveries, reduces the allowance. The following tables summarize the allowance activity for periods indicated:

		Three Months Ended September 30, 200 Retail and					
(in 000 s)	Mortgage Banking		nsumer nance	Total			
Allowance, beginning of period	\$ 4,403	\$	9,187	\$ 13,590

There was a \$380,000 decline in 2006 in the allowance for loan losses at the combined Retail Banking and Mortgage Banking segments compared to December 31, 2005. The Bank s nonperforming and accruing loans past due 90 days or more at December 31, 2005 consisted primarily of one commercial relationship to which we had allocated \$865,000 of the allowance for loan losses. In May

26

2006, the borrower sold the real estate collateral for these loans and the loans were repaid in full from the sale proceeds. The decline in the allowance for loan losses resulting from the resolution of this nonperforming loan relationship was offset in part by the allocation of additional amounts in the loan loss allowance to loans downgraded during 2006 and increased allocations for certain loans based on risks associated with industry concentrations. We believe that the current level of the allowance for loan losses of the combined Retail and Mortgage Banking segments is adequate to absorb any losses on existing loans that may become uncollectible.

The decline in the provision for loan losses during the third quarter of 2006 in the Consumer Finance segment, consisting solely of C&F Finance Company, resulted from lower charge-offs, which reflected the improvement in asset quality as described below. The increase in the provision for loan losses during the first nine months of 2006 in the Consumer Finance segment occurred as a result of loan growth and higher charge-offs in the first half of 2006. We believe that the current level of the allowance for loan losses of the Consumer Finance segment is adequate to absorb any losses on existing loans that may become uncollectible.
