GENESEE & WYOMING INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. PRINCIPLES OF CONSOLIDATION AND BASIS OF PRESENTATION:

The interim consolidated financial statements presented herein include the accounts of Genesee & Wyoming Inc. and its subsidiaries (the Company). All references to currency amounts included in this Quarterly Report on Form 10-Q, including the financial statements, are in U.S. dollars unless specifically noted otherwise. All significant intercompany transactions and accounts have been eliminated in consolidation. These interim consolidated financial statements have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) and, accordingly, do not contain all disclosures which would be required in a full set of financial statements in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). In the opinion of management, the unaudited financial statements for the three and nine months ended September 30, 2007 and 2006, are presented on a basis consistent with the audited financial statements and contain all adjustments, consisting of normal recurring adjustments except as otherwise noted in notes to the financial statements, necessary for a fair presentation. The results of operations for interim periods are not necessarily indicative of results of operations for the full year. The consolidated balance sheet data for 2006 was derived from the audited financial statements in the Company's 2006 Annual Report on Form 10-K but does not include all disclosures required by U.S. GAAP.

The interim consolidated financial statements should be read in conjunction with the audited financial statements and notes thereto for the year ended December 31, 2006, included in the Company's 2006 Annual Report on Form 10-K. Certain prior period balances have been reclassified to conform to the 2007 presentation.

2. CHANGES IN OPERATIONS:

Mexico

In October 2005, the Company's wholly-owned subsidiary, Ferrocarriles Chiapas-Mayab, S.A. de C.V. (FCCM), was struck by Hurricane Stan which destroyed or damaged approximately 70 bridges and washed out segments of track in the State of Chiapas between the town of Tonalá and the Guatemalan border, rendering approximately 175 miles of rail line inoperable.

On June 25, 2007, FCCM formally notified the Secretaria de Comunicaciones y Transporte (SCT) of its intent to cease its rail operations and to resign its 30-year concession from the Mexican government. The decision to cease FCCM's operations was made on June 22, 2007, and was due to the continued uncertain timing of the Chiapas reconstruction by the Mexican government. Without reconstruction of the hurricane-damaged line, FCCM is not a viable business. During the third quarter of 2007, the Company ceased its Mexican rail operations and initiated formal liquidation proceedings of FCCM's operations. There were no remaining employees of FCCM as of September 30, 2007. The SCT has contested the resignation of the concession and has seized substantially all of FCCM's operating assets in response to the resignation. The Company believes the SCT's actions are unlawful and is pursuing appropriate legal remedies to recover its operating assets. As a result of these recent actions, the Company recorded a pre-tax loss in the third quarter of 2007 of \$18.5 million, including non-cash charges of \$14.4 million. This is in addition to the Company's non-cash charge of \$33.1 million recorded in the three months ended September 30, 2006, reflecting the write-down of non-current assets and related effects. Results from the Company's Mexican operations for the three and nine months ended September 30, 2007 and 2006, are now included in results from discontinued operations. See Note 9 for additional information regarding the Company's discontinued operations.

As a result of the changing economic circumstances of the Company's Mexican operations as compared to its other businesses, the Company presented its Mexican business as a separate segment in accordance with Statement of Financial Accounting Standards (SFAS) No. 131,

Disclosures about Segments of an Enterprise and Related Information, beginning July 1, 2006. Since the Company's results from its Mexican operations are now included in results from discontinued operations, the Company no longer presents separate segments within its continuing operations.

Australia

Edgar Filing: GENESEE & WYOMING INC - Form 10-Q

Effective June 1, 2006, the Company and its 50% partner, Wesfarmers Limited (Wesfarmers), completed the sale of the Western Australia operations and certain other assets of Australian Railroad Group Pty Ltd (ARG) to Queensland Rail and Babcock & Brown Limited (ARG Sale) generating a net gain of \$218.8 million during the nine months ended September 30, 2006. Simultaneous with the ARG Sale, the Company purchased Wesfarmers' 50% ownership of the remaining ARG operations, which are principally located

Table of Contents

in South Australia, for \$15.1 million (GWA Purchase) (collectively, Australian Transactions). This business, which is based in Adelaide, South Australia, was renamed Genesee & Wyoming Australia Pty Ltd (GWA) and is a 100% owned subsidiary. The GWA Purchase was accounted for under the purchase method of accounting. However, because the Company previously held a 50% share of these assets through the Company's ownership interest in ARG, it applied a step-method to the allocation of value among the assets and liabilities of GWA. Because the \$15.1 million purchase price for Wesfarmers' 50% share was lower than 50% of the book value ARG had historically recorded on these assets, the Company recorded a non-cash loss of \$16.2 million (\$11.3 million, net of tax), representing the Company's 50% share of the impairment loss recorded by ARG, which was included in equity loss of unconsolidated international affiliates in the consolidated statement of operations during the second quarter of 2006. GWA commenced operations on June 1, 2006. Accordingly, the Company has included 100% of the value of GWA's net assets (\$30.1 million) in its consolidated balance sheet since June 1, 2006. The Company completed its allocation of purchase price for this acquisition during the second quarter of 2007 without material adjustment to its preliminary allocation.

South America

As previously disclosed, the Company indirectly has a 12.52% equity interest in Ferrovial Oriental S.A. (Oriental) through its interest in Genesee & Wyoming Chile S.A. (GWC), an unconsolidated affiliate. In addition, the Company holds a 10.37% indirect equity interest in Oriental through other companies.

During 2006, due to heightened political and economic unrest and uncertainties in Bolivia, GWC advised its creditors that it was ceasing its efforts to restructure its \$12.0 million non-recourse debt obligation. Also in 2006, the Bolivian government issued a Presidential decree ordering the nationalization of Bolivia's oil and gas industry. The government further announced in 2006 that it intends to nationalize, take a partial ownership stake in or restructure the operations of other local companies, including Oriental.

Accordingly, the Company determined that its indirect investments in Oriental had suffered an other-than-temporary decline in value. Based on the Company's assessment of fair value, the Company's \$8.9 million investment was written down by \$5.9 million with a corresponding charge to earnings in the second quarter of 2006.

As of June 1, 2006, the Company discontinued equity accounting for the remaining \$3.0 million investment in Oriental. Since then, the Company has accounted for this investment under the cost method. Historically, Oriental's results of operations have not had a material impact on the Company's results of operations. The Company will continue to monitor the political situation in Bolivia.

United States

Chattahoochee Bay Railroad, Inc.: On August 25, 2006, the Company's newly formed subsidiary, the Chattahoochee Bay Railroad, Inc. (CHAT), acquired the assets of the Chattahoochee & Gulf Railroad Co., Inc. and the H&S Railroad Company, Inc. for \$6.1 million in cash. The purchase price was allocated between property and equipment (\$5.1 million) and intangible assets (\$1.0 million). The rail assets acquired by CHAT are contiguous to and connect the Company's Bay Line Railroad and the Company's Chattahoochee Industrial Railroad.

Commonwealth Railway, Inc.: On August 25, 2006, the Company exercised an option to purchase 12.5 miles of previously leased rail line from Norfolk Southern Corp. (NS) for \$3.6 million, of which, approximately \$2.1 million is expected to be funded by the Commonwealth of Virginia. The 12.5 mile rail line runs through Portsmouth, Chesapeake, and Suffolk, VA. The Company's subsidiary, the Commonwealth Railway (CWRY), will own and continue to operate the line upon the final execution of the contract with the Commonwealth of Virginia. In July 2007, the Company completed a \$13.2 million improvement project (including \$6.6 million in government grants) to meet the projected capacity needs of a customer's new container terminal in Portsmouth.

Results of Operations

When comparing the Company's results of operations from one reporting period to another, you should consider that it has historically experienced fluctuations in revenues and expenses due to one-time freight moves, weather-related impacts such as hurricanes or droughts, customer plant expansions and shut-downs, sales of land and equipment, accidents and derailments. In periods when these events occur, results of operations are not easily comparable to other periods. Also, the Company has completed and entered into a number of transactions recently that have changed and will change its results of operations. Because of variations in the structure, timing, and size of these transactions, the Company's operating results in any reporting period may not be directly comparable to its operating results in other reporting periods.

Table of Contents

Certain of the Company's railroads have commodity shipments which are sensitive to general economic conditions in the countries in which it operates, including paper products in Canada and lumber and forest products in the United States. However, shipments of other commodities are less affected by economic conditions and are more closely affected by other factors, such as inventory levels maintained at a customer power plant (coal), winter weather (salt) and seasonal rainfall (South Australia grain).

Pro Forma Financial Results

The following table summarizes the Company's unaudited pro forma operating results for the nine months ended September 30, 2006, as if the Australian Transactions had occurred as of January 1, 2006 (dollars in thousands, except per share amounts):

	Nine Months Ended
	September 30,
	2006
Operating revenues	\$ 363,106
Income from continuing operations	\$ 40,934
Net income	\$ 3,752
Basic earnings per common share from continuing operations	\$ 1.09
Diluted earnings per common share from continuing operations	\$ 0.96

The unaudited pro forma operating results include the Australian Transactions, adjusted, net of tax, for the net gain of \$218.8 million from the ARG Sale, certain closing costs incurred from the ARG Sale and interest expense savings from the pay down of the debt from proceeds received from the ARG Sale.

The pro forma financial information does not purport to be indicative of the results that actually would have been obtained had the Australian Transactions been completed as of the assumed date and for the period presented and are not intended to be a projection of future results or trends.

For the three months ended September 30, 2007 and 2006, a total of 1,166,634 and 721,184 shares, respectively, and for the nine months ended September 30, 2007 and 2006, a total of 1,166,634 and 721,184 shares, respectively, of Class A Common Stock issuable under the assumed exercises of stock options computed based on the treasury stock method were not included in the calculation of diluted earnings per common share, as the effect of including these shares would have been anti-dilutive.

Stock Repurchase

The Company announced on February 13, 2007 and August 1, 2007, that its Board of Directors authorized the repurchase of up to 2,000,000 shares and 4,000,000 shares, respectively, of the Company's Class A Common Stock, which was in addition to 538,500 shares available for repurchase under a previous authorization. The repurchases may occur from time to time in the open market, including under 10b5-1 plans, or in privately negotiated transactions. During the nine months ended September 30, 2007, the Company repurchased 6,387,430 shares of the Company's Class A Common Stock available for repurchase under the repurchase plan. The shares were repurchased at an average cost of \$26.75 per share. At September 30, 2007, authorization remained for the repurchase of up to 151,070 shares.

4. DERIVATIVE FINANCIAL INSTRUMENTS:

In 2004, we entered into an interest rate swap agreement and swapped our variable LIBOR interest rate on long-term debt for a fixed interest rate. At December 31, 2006, the notional amount under the agreement was \$21.4 million and represented a liability with a fair value of less than

\$0.1 million. The swap expired in September 2007.

Table of Contents

On February 13, 2006, the Company entered into two foreign currency forward contracts with a total notional amount of \$190 million to hedge a portion of its investment in 50% of the equity of ARG. The contracts, which expired in May 2006, were extended to June 1, 2006, and protected the hedged portion of the Company's net investment from exposure to large fluctuations in the U.S. Dollar/Australian Dollar exchange rate. At expiration, excluding the effects of fluctuations in the exchange rate on the Company's net investment, the Company recorded a loss of \$4.3 million from these contracts, which was included in the net gain on the ARG Sale in the second quarter of 2006.

The Company previously disclosed in its financial statements for the year ended December 31, 2006, that it expected to contribute \$0.6 million to its pension plans in 2007. As of September 30, 2007, contributions of \$0.4 million have been made to fund the Company's pension plans. The Company anticipates contributing the remaining \$0.2 million to fund its pension plans in the fourth quarter of 2007.

During the three months ended June 30, 2007, the Company froze the pension benefits of substantially all remaining eligible employees (Frozen Participants). As a result, the Company recorded a \$0.1 million curtailment gain. Effective with the curtailment, new employees will not be eligible to participate in the plan. Future earnings of Frozen Participants will not be considered in the computation of benefits.

6. INCOME TAXES:

The Company's effective income tax rate in the three months ended September 30, 2007, was 15.0% compared with 28.0% in the three months ended September 30, 2006. The Company's effective income tax rate for the nine months ended September 30, 2007, was 23.6% compared with 39.0% in the nine months ended September 30, 2006. The decrease in 2007 was primarily attributable to incremental U.S. foreign tax credits of \$5.8 million associated with the ARG Sale in 2006. The determination of the amount of the U.S. foreign tax credits was dependent upon the payment of the foreign tax and an election made concurrent with the filing of the 2006 U.S. tax return, which occurred in June and September 2007, respectively. In the three months ended September 30, 2007, the Company recorded \$2.6 million of additional prior year U.S. taxes relative to the ARG Sale. The Company assessed the effect of the \$2.6 million additional taxes on the consolidated financial statements taken as a whole and determined that the effect was not material to any period.

Edgar Filing: GENESEE & WYOMING INC - Form 10-Q

As disclosed in Note 2, the Company has ceased its Mexican rail operations and initiated formal liquidation proceedings of FCCM's operations. As a result, the Company recorded a net U.S. tax benefit of \$11.6 million within its loss from discontinued operations for the three months ended September 30, 2007. The Company also has a related capital loss carryforward which can be used to reduce the impact of future capital gains. The tax benefit associated with this carryforward of approximately \$8.0 million is fully offset by a valuation allowance. The Company's capital loss carryforward expires in 2012.

On January 1, 2007, the Company adopted Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109 (FIN 48). FIN 48 prescribes a recognition threshold and measurement attributes for the financial statement recognition and measurement of a tax position taken or expected to be taken in

Table of Contents

a tax return. After considering the Company's preexisting reserves for uncertain tax positions, the adoption of FIN 48 did not result in any material adjustments to the Company's results of operations or financial position.

At September 30, 2007, the Company's liability for uncertain tax positions was \$1.1 million, \$0.7 million of which would reduce its effective tax rate if recognized.

The Company recognizes interest and penalties related to uncertain tax positions in its provision for income taxes. As of September 30, 2007, the Company had \$0.2 million of accrued interest related to such uncertain tax positions.

As of September 30, 2007, the following tax years remain open to examination by the major taxing jurisdictions to which the Company or its subsidiaries are subject:

Jurisdiction	Open Tax Year(s)
United States	2003 - 2006
Australia	2006
Canada	2003 - 2006
Mexico	2001 - 2006

7. COMMITMENTS AND CONTINGENCIES:***Litigation******Mexico***

On June 25, 2007, FCCM formally notified the SCT of its intent to cease its rail operations and to resign its 30-year concession from the Mexican government. In response to this notification, on July 24, 2007, the SCT issued an official letter informing FCCM that the SCT did not accept the resignation of the concession. On August 8, 2007, the SCT issued another official letter to initiate a proceeding to impose sanctions on FCCM. The proposed sanctions are based, in part, on allegations that FCCM has violated the Railroad Service Law in Mexico and the terms of its concession. On August 30, 2007, FCCM filed a brief with the SCT that challenged the proposed sanctions and introduced evidence supporting FCCM's right to resign its concession. On September 21, 2007, FCCM also filed a proceeding in the Tax and Administrative Federal Court in Mexico seeking an annulment of the SCT's July 24, 2007 official letter and recognition of FCCM's right to resign its concession. The SCT has also seized substantially all of FCCM's operating assets in response to FCCM's resignation of the concession. On September 19, 2007, FCCM filed a proceeding in the Second District Court in Merida (District Court) challenging the SCT's seizure of its operating assets as unconstitutional. The District Court admitted the proceeding on October 11, 2007, and issued a provisional ruling upholding the seizure, pending a full review of the constitutional grounds for the seizure and the legality of the SCT's actions. The Company believes the SCT's actions were unlawful and will continue to pursue appropriate legal remedies to support FCCM's resignation of the concession and to recover FCCM's operating assets.

Canada

In February 2002, Mr. Paquin, an individual living adjacent to the Outremont rail yard, filed a motion for authorization of class certification in the Quebec Superior Court in Canada in connection with a claim against two of the Company's subsidiaries, Genesee Rail-One Inc. (now Genesee & Wyoming Canada Inc.) and Quebec-Gatineau Railway Inc., as well as Canadian Pacific Railways (CP) (collectively, the Parties). Mr. Paquin alleged that the noise emanating from the Outremont rail yard causes significant nuisance problems to the residents living near the rail yard. The rail yard is owned by CP, part of which is leased and operated by Quebec-Gatineau Railway Inc. The plaintiff described the proposed class as comprised of all owners and tenants of dwellings who have lived within a defined section of the Outremont neighborhood in Montreal, which is adjacent to the rail yard. Mr. Paquin requested the issuance of an injunction in order to limit the hours when the rail yard may operate. The plaintiff did not allege any specific monetary claim with respect to the damages of other members of the class, but sought to recover for his trouble and inconvenience as well as for potential devaluation of the value of his property.

Following a May 2007 settlement conference, the Parties agreed on the terms of a settlement agreement whereby all outstanding claims under the class action will be dropped. The settlement agreement remains subject to

Table of Contents

review and approval by the class members and the Quebec Superior Court. The Company does not expect Genesee & Wyoming Canada Inc. or Quebec-Gatineau Railway Inc. to make any material financial contribution in connection with the proposed settlement.

Bolivia

As previously disclosed, the Company indirectly has a 12.52% equity interest in Oriental through its interest in GWC, an unconsolidated affiliate. GWC is an obligor of non-recourse debt of \$12.0 million, which debt is secured by a lien on GWC's 12.52% indirect equity interest in Oriental held through GWC's subsidiary, Inversiones Ferroviarias Bolivianas Ltda. This non-recourse debt became due and payable on November 2, 2003. In 2006, certain creditors of GWC commenced court proceedings to (i) collect on their share of the debt and (ii) exercise their rights pursuant to the lien. In addition, the Company holds a 10.37% indirect equity interest in Oriental through other companies. The Company does not expect the commencement of court proceedings to have any impact on this remaining 10.37% interest. The Company does not expect these proceedings to have a material effect on its financial statements.

Other

In addition to the lawsuits set forth above, from time to time the Company is a defendant in certain lawsuits resulting from its operations. Management believes that the Company has adequate provisions in the financial statements for any expected liabilities that may result from disposition of pending lawsuits. Nevertheless, litigation is subject to inherent uncertainties and unfavorable rulings could occur. Were an unfavorable ruling to occur, there exists the possibility of a material adverse impact to the Company's results of operations, financial position or liquidity as of and for the period in which the ruling occurs.

Guarantees

On June 8, 2007, the Company entered into an assignment agreement with International Finance Corporation (IFC) and Nederlandse Financierings Maatschappij voor Ontwikkelingslanden N.V. (FMO), pursuant to which, among other things, IFC and FMO demanded payment of, and the Company paid, approximately \$7.0 million due under the guarantee agreement related to its Mexican subsidiary, GW Servicios S.A. (Servicios). See Note 9 for additional information regarding this guarantee.

The Company also guarantees an obligation of one of its Canadian rail lines under a lease agreement entered into on July 28, 1997. The maximum amount of the obligation subject to this guarantee is \$2.0 million.

Table of Contents**8. COMPREHENSIVE INCOME (LOSS):**

Comprehensive income (loss) is the total of net income (loss) and all other non-owner changes in equity. The following table sets forth the Company's comprehensive income (loss), net of tax, for the three and nine months ended September 30, 2007 and 2006 (dollars in thousands):

	Three Months Ended September 30,	
	2007	2006
Net income (loss)	\$ 16,166	\$ (12,106)
Other comprehensive income (loss), net of tax:

Changes in pension and other postretirement benefit, net of tax provision of \$64	119	
Comprehensive income, net of tax	\$ 62,232	\$ 99,098

Accumulated other comprehensive income, net of tax, included in the consolidated balance sheets as of September 30, 2007 and December 31, 2006 (dollars in thousands):

	Foreign Currency Translation Adjustment	Defined Benefit Plans	Net Unrealized Losses on Cash Flow Hedges	Accumulated Other Comprehensive Income
Balances, December 31, 2006	\$ 5,137	\$ (683)	\$ (43)	\$ 4,411
Current period change	20,841	119	43	21,003
Balances, September 30, 2007	\$ 25,978	\$ (564)	\$ 43	\$ 25,414

The change in the foreign currency translation adjustment for the nine months ended September 30, 2007, relates primarily to the Company's operations with a functional currency in Australian and Canadian dollars and the loss from the cumulative foreign currency translation into U.S. dollars of the original Mexico investment and FCCM's reported earnings since 1999.

9. DISCONTINUED OPERATIONS:

As disclosed in Note 2, the Company has ceased its Mexican rail operations and initiated formal liquidation proceedings of FCCM's operations. There were no remaining employees of FCCM as of September 30, 2007. The SCT has contested the resignation of the concession and has seized substantially all of FCCM's operating assets in response to the resignation. As a result of these actions, the Company recorded a pre-tax loss in the third quarter of 2007 of \$18.5 million, including non-cash charges of \$14.4 million. The non-cash charges included \$8.9 million related to the write-down of FCCM's operating assets and a \$5.5 million loss from the cumulative foreign

Table of Contents

currency translation into U.S. dollars of the original investment and FCCM's reported earnings since 1999. This pre-tax loss was partially offset by a U.S. tax benefit of \$11.6 million, primarily related to a worthless stock and bad debt deductions to be claimed in the United States.

The Company believes the SCT's actions were unlawful and is pursuing appropriate legal remedies to recover its operating assets. As of September 30, 2007, there was a net liability of \$3.5 million remaining on the Company's balance sheet associated with its Mexican operations.

The Company's Mexican operations described above are presented as discontinued operations and its operations are, therefore, excluded from continuing operations in accordance with SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets (SFAS 144). The operations and cash flows of FCCM are being eliminated from the ongoing operations of the Company and the Company will not have any significant continuing involvement in the operations of FCCM.

The operating results of the Mexican operations classified as discontinued operations in the Consolidated Statement of Operations are as follows (dollars in thousands):

	Three Months Ended		Nine Months Ended	
	September 30,	September 30,	September 30,	September 30,
	2007	2006	2007	2006
Revenues	\$ 1,730	\$ 7,285	\$ 14,305	\$ 21,895
Loss from discontinued operations before income taxes	(18,498)	(35,701)	(24,817)	(36,303)
Tax (benefit) provision	(11,625)	389	(11,323)	879
Discontinued operations, net of tax	\$ (6,873)	\$ (36,090)	\$ (13,494)	\$ (37,182)

For the three months ended September 30, 2007, in connection with the shut down of FCCM's rail operations, the Company recorded \$2.5 million of restructuring and other related charges within loss from discontinued operations. These restructuring and other related charges consisted of \$1.0 million related to early lease termination fees, \$0.7 million for severance and termination benefits in accordance with SFAS No. 112 Employers Accounting for Postemployment Benefits (SFAS 112), and \$0.8 million of other expenses directly related to the liquidation.

For the nine months ended September 30, 2007, in connection with the liquidation of FCCM, the Company recorded \$5.2 million of restructuring and other related charges within loss from discontinued operations. These restructuring and other related charges consisted of \$3.2 million for severance and termination benefits in accordance with SFAS 112, \$1.0 million related to early lease termination fees and \$1.0 million for other expenses directly related to the liquidation.

Table of Contents

Having met the criteria outlined in SFAS No. 144, the assets and liabilities of FCCM and Servicios were classified as discontinued operations on the Company's Consolidated Balance Sheet as of September 30, 2007. The major classes of assets (at estimated fair value less cost to sell) and liabilities classified as discontinued operations in the Consolidated Balance Sheets are as follows (dollars in thousands):

	September 30, 2007
Cash and cash equivalents	\$ 1,258
Accounts receivable, net	2,806
Prepaid expenses and other	800
Property and equipment, net	128
Current assets from discontinued operations	\$ 4,992
Accounts payable	\$ 4,939
Accrued expenses	3,481
Other liabilities	44
Current liabilities of discontinued operations	\$ 8,464

On June 8, 2007, the Company entered into an assignment agreement with IFC and FMO, pursuant to which, among other things, (i) IFC and FMO demanded payment of, and the Company paid, approximately \$7.0 million due under the guarantee agreement related to certain amended loan agreements and promissory notes of the Company's Mexican subsidiaries (collectively, the Loan Agreements) and (ii) the Company purchased and assumed the remaining loan amount outstanding under the Loan Agreements for a price equal to the principal balance plus accrued interest, or approximately \$7.3 million. As a result, the Company recorded a \$0.6 million interest charge due to the recognition of previously deferred financing fees related to the Loan Agreements during the nine months ended September 30, 2007.

Also on June 8, 2007, the Company, IFC and the Company's Mexican subsidiary, Servicios entered into a put option exercise agreement pursuant to which IFC sold its 12.7% equity interest in Servicios to the Company for \$1.0 million, plus an additional \$0.4 million if FCCM is still in business on June 8, 2008. In addition, on June 8, 2007, the Company, IFC, FMO, Servicios and FCCM entered into a release agreement whereby the parties agreed to release and waive all claims and rights held against one another that existed or arose prior to the date thereof. Neither the payment default discussed above, nor the entering into the agreements described above and the consummation of the transactions contemplated therein, resulted in a default under the Company's outstanding debt obligations.

10. RECENTLY ISSUED ACCOUNTING STANDARDS:

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157), which is effective for fiscal years beginning after November 15, 2007, and for interim periods within those years. This statement defines fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. The Company is currently evaluating the provisions of SFAS 157.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of SFAS No. 115 (SFAS 159). SFAS 159 permits, but does not require, entities to choose to measure many financial instruments and certain other items at fair value. The standard provides entities the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. SFAS 159 is effective for fiscal years beginning after November 15, 2007, and interim periods within those years. The Company is currently evaluating the provisions of SFAS 159.

11. SUBSEQUENT EVENTS:

On October 22, 2007, the Company announced that it had entered into an agreement to acquire 87.4% of Maryland Midland Railway, Inc. (Maryland Midland) for cash consideration of approximately \$29.1 million, with adjustments for working capital at the time of closing. Maryland Midland stockholders have approved the acquisition. The acquisition is subject to customary closing conditions, including, without

limitation, receipt of regulatory approvals.

Table of Contents

Headquartered 50 miles northwest of Baltimore, the Maryland Midland operates over 63 miles of track between Glyndon and Highfield, Maryland (near the Pennsylvania border), and between Walkersville and Taneytown, Maryland. Maryland Midland has 30 employees, 10 locomotives and is an interline carrier with CSX.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our consolidated financial statements and related notes included elsewhere in this Quarterly Report on Form 10-Q, and with the consolidated financial statements, related notes and other financial information included in our 2006 Annual Report on Form 10-K.

Forward-Looking Statements

This report and other documents referred to in this report may contain forward-looking statements based on current expectations, estimates and projections about our industry, management's beliefs and assumptions made by management. Words such as anticipates, intends, plans, believes, seeks, estimates, variations of such words and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions, including the following risks applicable to all of our operations: risks related to the acquisition and integration of railroads; difficulties associated with customers, competition, connecting carriers, employees and partners; derailments; adverse weather conditions; unpredictability of fuel costs; changes in environmental and other laws and regulations to which we are subject; general economic and business conditions and additional risks associated with our foreign operations. Therefore, actual results may differ materially from those expressed or forecasted in any such forward-looking statements. Such risks and uncertainties include, in addition to those set forth in this Item 2 and Part II, Item 1A, those noted in our 2006 Annual Report on Form 10-K under Risk Factors. We undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

Overview

We are a leading owner and operator of short line and regional freight railroads in the United States, Australia and Canada and own a minority interest in a railroad in Bolivia. In addition, we provide freight car switching and rail-related services to industrial companies in the United States and Australia.

As previously reported, we commenced the liquidation of our hurricane-damaged operations in Mexico on June 25, 2007, and have no remaining employees in Mexico as of September 30, 2007. Results from our Mexican operations for the three and nine months ended September 30, 2007 and 2006, are now included in results from discontinued operations.

Net income in the three months ended September 30, 2007, was \$16.2 million, compared with a net loss of \$12.1 million in the three months ended September 30, 2006. Our diluted earnings per share (EPS) in the third quarter of 2007 were \$0.42 with 38.5 million shares outstanding, compared with diluted loss per share of \$0.29 with 42.4 million shares outstanding in the third quarter of 2006. Net income in the nine months ended September 30, 2007, was \$41.2 million, compared with net income of \$119.7 million in the nine months ended September 30, 2006. Our diluted EPS in the nine months ended September 30, 2007, were \$1.02 with 40.2 million shares outstanding, compared with diluted EPS of \$2.82 with 42.5 million shares outstanding in the nine months ended September 30, 2006.

Income from continuing operations in the three months ended September 30, 2007, was \$23.0 million, compared with income from continuing operations of \$24.0 million in the three months ended September 30, 2006. Our diluted EPS from continuing operations in the third quarter of 2007 were \$0.60 with 38.5 million shares outstanding, compared with diluted EPS from continuing operations of \$0.56 with 42.4 million shares outstanding in the third quarter of 2006. Income from continuing operations in the third quarter of 2007 included gains from the sale of assets and a net tax benefit associated with the sale of the Western Australia operations of ARG, which increased diluted EPS by \$0.17. Income from continuing operations in the third quarter of 2006 included certain gains and charges, primarily related to the sale of the Western Australia operations of the Australian Railroad Group (ARG), which increased diluted EPS by \$0.14.

Income from continuing operations in the nine months ended September 30, 2007, was \$54.7 million, compared with income from continuing operations of \$156.8 million in the nine months ended September 30, 2006. Our diluted EPS from continuing operations in the nine months ended September 30, 2007, were \$1.36 with 40.2 million shares outstanding, compared with diluted EPS from continuing operations of \$3.69 with 42.5 million shares outstanding in the nine months ended September 30, 2006. Income from continuing operations in the nine months ended September 30, 2007, included gains from the sale of assets and a net tax benefit associated with the sale of the Western Australia operations of ARG, which increased diluted EPS by \$0.16. Income from continuing operations in the nine months ended September 30, 2006, included certain gains and charges, primarily related to the sale of the Western Australia operations of ARG, which increased diluted EPS by \$2.56.

Table of Contents

When we discuss same railroad revenues, we are referring to the change in our revenues period-over-period associated with our existing operations (i.e., excluding the impact of acquisitions). Operating revenues in the three months ended September 30, 2007, were \$131.2 million, compared with \$121.0 million in the three months ended September 30, 2006. The increase in our quarter-over-quarter revenues was due to a \$0.3 million increase from new operations and a same railroad increase in revenues of \$9.9 million.

Operating revenues in the nine months ended September 30, 2007, were \$381.6 million, compared with \$333.0 million in the nine months ended September 30, 2006. The increase in our period-over-period revenues was due to a \$35.1 million increase from new operations, primarily Genesee & Wyoming Australia Pty Ltd (GWA), and a same railroad increase in revenues of \$13.5 million.

Same railroad total revenues increased 8.2% and same railroad freight revenues increased 2.8% in the three months ended September 30, 2007, when compared with the three months ended September 30, 2006. The 2.8% improvement in same railroad freight revenues was primarily due to an increase in average freight revenues per carload of 9.7%, partially offset by a 6.3% decrease in carloads. Same railroad non-freight revenues increased 18.9% in the three months ended September 30, 2007, when compared with the three months ended September 30, 2006, primarily due to our GWA operations. Same railroad total revenues increased 4.1%, while same railroad freight revenues decreased 0.1% in the nine months ended September 30, 2007, when compared with the nine months ended September 30, 2006. The 0.1% decline in same railroad freight revenues was primarily due to a 7.1% decrease in carloads, partially offset by an increase in average freight revenues per carload of 7.6%. Same railroad non-freight revenues increased 14.1% in the nine months ended September 30, 2007, when compared with the nine months ended September 30, 2006, primarily due to our GWA operations.

Our operating income in the three months ended September 30, 2007, was \$29.7 million, compared with \$23.1 million in the three months ended September 30, 2006. The operating ratio, defined as total operating expenses divided by total operating revenues, was 77.4% in the third quarter of 2007, compared with an operating ratio of 80.9% in the third quarter of 2006. The operating ratio for the third quarter of 2007 benefited from \$5.5 million of gains from the sale of assets. The operating ratio for the third quarter of 2006 was impacted by charges of \$1.1 million for a litigation settlement.

Our operating income in the nine months ended September 30, 2007, was \$74.4 million, compared with \$62.8 million in the nine months ended September 30, 2006. The operating ratio was 80.5% in the nine months ended September 30, 2007, compared with an operating ratio of 81.0% in the nine months ended September 30, 2006. The operating ratio for the nine months ended September 30, 2007, benefited from \$5.5 million of gains from the sale of assets. The operating ratio for the nine months ended September 30, 2006, was impacted by ARG Sale-related expenses of \$5.8 million, a gain on an insurance settlement of \$1.9 million and charges of \$1.1 million for a litigation settlement.

During the nine months ended September 30, 2007, we generated \$5.6 million in cash from operating activities of continuing operations which included the payment of \$95.6 million in Australian taxes related to the ARG Sale. Also during the nine month period, we repurchased 6,387,430 shares of our Class A Common Stock at an average cost of \$26.75 per share for a total of \$170.9 million. We also purchased \$41.4 million of property and equipment, net of \$15.6 million received from current year government grants and \$4.3 million in cash received from government grants for capital projects completed in 2006. We received \$1.7 million in insurance proceeds for capital projects completed in 2006 and \$8.1 million cash proceeds from the disposition of property and equipment.

Discontinued Operations

During the third quarter of 2007, we ceased our Mexican rail operations and initiated formal liquidation proceedings of Ferrocarriles Chiapas-Mayab, S.A. de C.V. (FCCM). The Secretaria de Comunicaciones y Transporte (SCT) has contested the resignation of the concession and has seized substantially all of FCCM's operating assets in response to the resignation. As a result of this action, we recorded a pre-tax loss in the third quarter of 2007 of \$18.5 million, including non-cash impairment and related effects of \$14.4 million. This pre-tax loss was partially offset by a tax benefit of \$11.6 million.

Loss from discontinued operations, net of tax, was \$6.9 million in the three months ended September 30, 2007, compared with a loss from discontinued operations, net of tax, of \$36.1 million in the three months ended September 30, 2006. The loss from discontinued operations in the three months ended September 30, 2006, included a non-cash charge of \$33.1 million (\$34.1 million after-tax) reflecting the write-down of non-current assets and related effects of FCCM. The loss from discontinued operations reduced diluted EPS by \$0.18 in the third quarter of 2007, compared with an \$0.85 negative impact on diluted EPS in the third quarter of 2006.

Table of Contents

Loss from discontinued operations, net of tax, was \$13.5 million in the nine months ended September 30, 2007, compared with a loss from discontinued operations, net of tax, of \$37.2 million in the nine months ended September 30, 2006. The loss from discontinued operations in the nine months ended September 30, 2006, included a non-cash charge of \$33.1 million (\$34.1 million after-tax) reflecting the write-down of non-current assets and related effects of FCCM. The loss from discontinued operations reduced diluted EPS by \$0.34 in the nine months ended September 30, 2007, compared with an \$0.87 negative impact on diluted EPS in the nine months ended September 30, 2006.

Recent Developments

On October 22, 2007, we announced that we had entered into an agreement to acquire 87.4% of Maryland Midland Railway, Inc. (Maryland Midland) for cash consideration of approximately \$29.1 million, with adjustments for working capital at the time of closing. Maryland Midland stockholders have approved the acquisition. The acquisition is subject to customary closing conditions, including, without limitation, receipt of regulatory approvals.

Headquartered 50 miles northwest of Baltimore, the Maryland Midland operates over 63 miles of track between Glyndon and Highfield, Maryland (near the Pennsylvania border), and between Walkersville and Taneytown, Maryland. Maryland Midland has 30 employees, 10 locomotives and is an interline carrier with CSX.

Changes in Operations

Mexico

In October 2005, FCCM was struck by Hurricane Stan which destroyed or damaged approximately 70 bridges and washed out segments of track in the State of Chiapas between the town of Tonalá and the Guatemalan border, rendering approximately 175 miles of rail line inoperable.

On June 25, 2007, FCCM formally notified the SCT of its intent to cease its rail operations and to resign its 30-year concession from the Mexican government. The decision to cease FCCM's operations was made on June 22, 2007, and was due to the continued uncertain timing of the Chiapas reconstruction by the Mexican government. Without reconstruction of the hurricane-damaged line, FCCM is not a viable business. During the third quarter of 2007, we ceased our rail operations and initiated formal liquidation proceedings of FCCM's operations. There were no remaining employees of FCCM as of September 30, 2007. The SCT has contested the resignation of the concession and has seized substantially all of FCCM's operating assets in response to the resignation. Results of our Mexican operations for the three and nine months ended September 30, 2007 and 2006 are now included in results from discontinued operations.

We believe the SCT's actions were unlawful and we are pursuing appropriate legal remedies to recover FCCM's operating assets. As of September 30, 2007, there was a net liability of \$3.5 million remaining on our balance sheet associated with our Mexican operations.

See Liquidity and Capital Resources - Mexican Financings, for additional information on our obligations with respect to the Mexican operations.

Australia

Effective June 1, 2006, we and our 50% partner, Wesfarmers Limited (Wesfarmers), completed the sale of the Western Australia operations and certain other assets of ARG to Queensland Rail and Babcock & Brown Limited (ARG Sale) generating a net gain of \$218.8 million during the nine months ended September 30, 2006. Simultaneous with the ARG Sale, we purchased Wesfarmers' 50% ownership of the remaining operations of ARG, which are principally located in South Australia, for \$15.1 million (GWA Purchase). The GWA Purchase was accounted for under the purchase method of accounting. However, because we previously held a 50% share of these assets through our ownership interest in ARG, we applied a step-method to the allocation of value among the assets and liabilities of GWA. Because the \$15.1 million purchase price for Wesfarmers' 50% share was lower than 50% of the book value ARG had historically recorded on these assets, we recorded a non-cash loss of \$16.2 million (\$11.3 million, net of tax), representing our 50% share of the impairment loss recorded by ARG, which was included in equity loss of unconsolidated international affiliates in the consolidated statement of operations in the nine months ended September 30, 2006. GWA commenced operations on June 1, 2006. Accordingly, we have included 100% of the value of GWA's net assets (\$30.1 million) in our consolidated balance sheet since June 1, 2006. We completed our allocation of purchase price for this acquisition during the second quarter of 2007 without material adjustment to our preliminary allocation.

South America

Edgar Filing: GENESEE & WYOMING INC - Form 10-Q

As previously disclosed, we indirectly have a 12.52% equity interest in Ferroviana Oriental S.A. (Oriental) through our interest in Genesee & Wyoming Chile S.A. (GWC), an unconsolidated affiliate. In addition, we hold a 10.37% indirect equity interest in Oriental through other companies.

During 2006, due to heightened political and economic unrest and uncertainties in Bolivia, GWC advised its creditors that it was ceasing its efforts to restructure its \$12.0 million non-recourse debt obligation. Also in 2006, the Bolivian government issued a Presidential decree ordering the nationalization of Bolivia's oil and gas industry. The government further announced in 2006 that it intends to nationalize, take a partial ownership stake in or restructure the operations of other local companies, including Oriental.

Table of Contents

Accordingly, we determined that our indirect investment in Oriental had suffered an other-than-temporary decline in value. Based on our assessment of fair value, our \$8.9 million investment was written down by \$5.9 million with a corresponding charge to earnings in the second quarter of 2006.

As of June 1, 2006, we discontinued equity accounting for the remaining \$3.0 million investment in Oriental. Since then, we have accounted for this investment under the cost method. Historically, Oriental's results of operations have not had a material impact on our results of operations. We will continue to monitor the political situation in Bolivia.

United States

Chattahoochee Bay Railroad, Inc.: On August 25, 2006, our newly formed subsidiary, the Chattahoochee Bay Railroad, Inc. (CHAT), acquired the assets of the Chattahoochee & Gulf Railroad Co., Inc. and the H&S Railroad Company, Inc. for \$6.1 million in cash. The purchase price was allocated between property and equipment (\$5.1 million) and intangible assets (\$1.0 million). The rail assets acquired by CHAT are contiguous to and connect our Bay Line Railroad and our Chattahoochee Industrial Railroad.

Commonwealth Railway, Inc.: On August 25, 2006, we exercised an option to purchase 12.5 miles of previously leased rail line from Norfolk Southern Corp. (NS) for \$3.6 million, of which, approximately \$2.1 million is expected to be funded by the Commonwealth of Virginia. The 12.5 mile rail line runs through Portsmouth, Chesapeake and Suffolk, VA. Our subsidiary, the Commonwealth Railway (CWRY), will own and continue to operate the line upon the final execution of the contract with the Commonwealth of Virginia. In July 2007, we completed a \$13.2 million improvement project (including \$6.6 million in government grants) to meet the projected capacity needs of a customer's new container terminal in Portsmouth.

Results of Operations

When comparing our results of operations from one reporting period to another, you should consider that we have historically experienced fluctuations in revenues and expenses due to one-time freight moves, weather related impacts such as hurricanes or droughts, customer plant expansions and shut-downs, sales of land and equipment, accidents and derailments. In periods when these events occur, results of operations are not easily comparable to other periods. Recent transactions (including acquisitions in the United States and Australia and the divestiture of our 50% equity investment in ARG). Because of variations in the structure, timing and size of these transactions our operating results in any reporting period may not be directly comparable to our operating results in other reporting periods.

Certain of our railroads have commodity shipments that are sensitive to general economic conditions in the countries in which we operate, including paper products in Canada and lumber and forest products in the United States. However, shipments of other commodities are less affected by economic conditions and are more closely affected by other factors, such as inventory levels maintained at a customer power plant (coal), winter weather (salt) and seasonal rainfall (South Australian grain).

Table of Contents**Three Months Ended September 30, 2007 Compared with Three Months Ended September 30, 2006****Operating Revenues***Overview*

Operating revenues were \$131.2 million in the three months ended September 30, 2007, compared with \$121.0 million in the three months ended September 30, 2006, an increase of \$10.2 million, or 8.4%. The \$10.2 million increase in operating revenues consisted of \$0.3 million in revenues from new operations and an increase of \$9.9 million, or 8.2%, in revenues from existing operations. New operations consist of current year results of operations from recent acquisitions that did not exist in our consolidated financial results for a comparable period in the prior year. Operating revenues, in the three months ended September 30, 2007, benefited \$3.6 million from the appreciation of the Australian dollar and Canadian dollar relative to the U.S. dollar. The \$9.9 million increase in revenues from existing operations included increases of \$7.6 million in non-freight revenues and \$2.2 million in freight revenues. The following table breaks down our operating revenues into new operations and existing operations for the three months ended September 30, 2007 and 2006 (dollars in thousands):

Total carloads decreased by 13,301 carloads, or 6.1%, due to a decline of 13,735 carloads from existing operations, partially offset by an increase of 434 carloads from new operations.

The overall average freight revenues per carload increased 9.8% to \$406. Average freight revenues per carload from existing operations increased 9.7% to \$405.

The following information discusses the significant changes in freight revenues by commodity group from existing operations.

Pulp and paper revenues decreased by \$0.4 million, or 2.4%. The decrease consisted of \$2.7 million due to a carload decrease of 4,709, or 13.7%, partially offset by \$2.3 million due to a 13.1% increase in average revenues per carload. The carload decrease was primarily due to higher truck competition resulting from Class I rate increases and a weak newsprint market.

Farm and food products revenues increased by \$0.6 million, or 7.5%. The increase consisted of \$3.2 million due to a 37.3% increase in average revenues per carload, partially offset by \$2.6 million due to a carload decrease of 5,179, or 21.7%. The carload decrease was primarily due to GWA's drought affected grain traffic. Because rates for GWA's grain traffic have both a fixed and variable component, the grain traffic decrease resulted in higher average revenues per carload.

Metals revenues decreased by \$0.4 million, or 4.8%. The decrease consisted of \$1.2 million due to a carload decrease of 2,619, or 12.3%, partially offset by \$0.8 million due to an 8.5% increase in average revenues per carload. The decrease in carloads was primarily due to a maintenance shutdown at a steel mill customer.

Minerals and stone revenues increased \$1.0 million, or 13.9%. The increase consisted of \$0.5 million due to a 6.8% increase in average revenues per carload and \$0.5 million due to a carload increase of 2,021, or 6.6%. The increase in carloads was primarily due to higher rock salt traffic in the Northeastern United States.

Other revenues decreased \$0.5 million, or 15.4%. The decrease consisted of \$0.8 million due to a carload decrease of 3,202, or 23.2%, partially offset by \$0.3 million due to a 8.9% increase in average revenues per carload. The carload decrease was primarily the result of the discontinuation of haulage traffic on one of our rail lines.

All remaining commodities combined increased by a net \$1.9 million, or 5.4%.

Non-Freight Revenues

Non-freight revenues were \$48.1 million in the three months ended September 30, 2007, compared with \$40.4 million in the three months ended September 30, 2006, an increase of \$7.7 million, or 19.0%. The \$7.7 million increase in non-freight revenues consisted of \$7.6 million in

non-freight revenues from existing operations and \$0.1 million in non-freight revenues from new operations.

The following information discusses the significant changes in non-freight revenues from existing operations.

Railcar switching revenues increased \$1.7 million, or 9.6%, of which \$1.2 million was from an increase in intra-plant switching, primarily at GWA, and \$0.5 million was due to an increase from intra-terminal switching.

Car hire and rental income increased \$1.3 million, or 23.4%, primarily due to increased locomotive and freight car rental at GWA.

Fuel sales to third parties increased \$1.5 million, or 24.2%, due to increased volumes, primarily as a result of a new customer and the strengthening of the Australian dollar in relation to the U.S. dollar.

Other operating income increased \$2.4 million, or 39.2%, primarily due to \$1.3 million from GWA crewing and other ancillary charges and an increase in all other operating revenues of approximately \$1.1 million.

Operating Expenses*Overview*

Operating expenses were \$101.6 million in the three months ended September 30, 2007, compared with \$97.9 million in the three months ended September 30, 2006, an increase of \$3.6 million, or 3.7%. The increase was attributable to an increase of \$3.4 million from existing operations

and \$0.2 million from new operations.

Table of Contents*Operating Ratios*

Our operating ratio, defined as total operating expenses divided by total operating revenues, improved to 77.4% in the three months ended September 30, 2007, from 80.9% in the three months ended September 30, 2006, primarily as a result of \$5.5 million of gains on the sale of assets in the third quarter of 2007.

The following table sets forth a comparison of our operating expenses for the three months ended September 30, 2007 and 2006 (dollars in thousands):

Total operating expenses	\$ 101,563	77.4%	\$ 97,915	80.9%

Labor and benefits expense was \$41.3 million in the three months ended September 30, 2007, compared with \$37.2 million in the three months ended September 30, 2006, an increase of \$4.1 million, or 11.0%. The increase from existing operations of \$4.1 million was primarily attributable to a \$3.0 million increase as a result of regular wage and benefit rate increases and the impact of approximately 30 new hires, and a \$1.0 million increase due to foreign currency changes.

Purchased services expense was \$11.1 million in the three months ended September 30, 2007, compared with \$10.1 million in the three months ended September 30, 2006, an increase of \$1.0 million, or 9.7%. The increase was primarily attributable to increased track and equipment maintenance.

Diesel fuel sold to third parties was \$6.5 million in the three months ended September 30, 2007, compared with \$5.5 million in the three months ended September 30, 2006, an increase of \$1.0 million, or 18.8%. The increase was primarily attributable to an increase in gallons of fuel sold to third parties at GWA.

Net gain on the sale of assets was \$5.5 million in the three months ended September 30, 2007, compared with \$0.2 million in the three months ended September 30, 2006. The net gain recognized in the three months ended September 30, 2007, included gains resulting from the sale of certain land and track related assets in the Northeast United States.

Other Income (Expense) Items*Gain On Sale of ARG*

We recorded a pre-tax gain of \$10.4 million in the three months ended September 30, 2006, related to the ARG Sale. See Note 2 in the Notes to Consolidated Financial Statements included elsewhere in this report for additional information on the ARG Sale.

Table of Contents*Interest Income*

Interest income was \$1.1 million in the three months ended September 30, 2007, compared with \$3.3 million in the three months ended September 30, 2006, a decrease of \$2.2 million. The decrease in interest income was primarily due to lower cash balances in the third quarter of 2007, due to the payment in the second quarter of 2007 of \$95.6 million for Australian taxes that resulted from the ARG Sale in the second quarter of 2006, and the use of cash to repurchase our Class A Common Stock during the nine months ended September 30, 2007.

Interest Expense

Interest expense was \$3.6 million in the three months ended September 30, 2007, which was consistent with interest expense of \$3.5 in the three months ended September 30, 2006.

Provision for Income Taxes

Our effective income tax rate in the three months ended September 30, 2007, was 15.0% compared with 28.0% in the three months ended September 30, 2006. The decrease in three months ended September 30, 2007 was primarily attributable to incremental U.S. foreign tax credits of \$5.8 million associated with the ARG Sale in 2006. The determination of the amount of U.S. foreign tax credits was dependent upon the payment of the foreign tax and an election made concurrent with the filing of the 2006 U.S. tax return, which occurred in June and September 2007, respectively. In the three months ended September 30, 2007, we recorded \$2.6 million of additional prior year U.S. taxes relative to the ARG Sale. We assessed the effect of the \$2.6 million of additional taxes on the consolidated financial statements taken as a whole and determined that the effect was not material to any period.

For the three months ended September 30, 2007, as a result of ceasing our Mexican rail operations and initiating formal liquidation proceedings, we recorded a net U.S. tax benefit of \$11.6 million within the loss from discontinued operations. We also have a related capital loss carryforward which can be used to reduce the impact of future capital gains. The tax benefit associated with this carryforward of approximately \$8.0 million is fully offset by a valuation allowance. This capital loss carryforward expires in 2012.

Income and Earnings Per Share from Continuing Operations

Income from continuing operations in the three months ended September 30, 2007, was \$23.0 million, compared with income from continuing operations of \$24.0 million in the three months ended September 30, 2006. Our diluted EPS from continuing operations in the third quarter of 2007 were \$0.60 with 38.5 million shares outstanding, compared with diluted EPS from continuing operations of \$0.56 with 42.4 million shares outstanding in the third quarter of 2006. The third quarter of 2007 included gains from the sale of assets and foreign tax credits, which increased diluted EPS from continuing operations by \$0.17. The third quarter of 2006 included certain gains and charges, primarily related to the ARG Sale, which increased diluted EPS from continuing operations by \$0.14. Basic EPS from continuing operations were \$0.68 with 34.0 million shares outstanding in the three months ended September 30, 2007, compared with basic EPS of \$0.64 with 37.7 million shares outstanding in the three months ended September 30, 2006.

Loss and Loss Per Share from Discontinued Operations

During the third quarter of 2007, we ceased our Mexican rail operations and initiated formal liquidation proceedings of FCCM's operations. The SCT has contested the resignation of the concession and has seized substantially all of FCCM's operating assets in response to the resignation. As a result of this action, we recorded a pre-tax loss in the third quarter of 2007 of \$18.5 million, including non-cash charges of \$14.4 million. The non-cash charges included \$8.9 million related to the write-down of FCCM's operating assets and a \$5.5 million loss from the cumulative foreign currency translation into U.S. dollars of the original investment and FCCM's reported earnings since 1999. This pre-tax loss was partially offset by a tax benefit of \$11.6 million primarily related to worthless stock and bad debt deductions to be claimed in the United States.

Our Mexican operations described above are presented as discontinued operations and its operations are, therefore, excluded from continuing operations in accordance with SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets (SFAS 144). The operations and cash flows of FCCM are being eliminated from our ongoing operations and we will not have any significant continuing involvement in the operations of FCCM.

For the three months ended September 30, 2007, in connection with the shut down of FCCM's rail operations, we recorded \$2.5 million of restructuring and other related charges within loss from discontinued operations. These restructuring and other related charges consisted of \$1.0 million related to early lease termination fees, \$0.7 million for severance and termination benefits in accordance with SFAS No. 112, Employers Accounting for Postemployment Benefits (SFAS 112), and \$0.8 million of other expenses directly related to the liquidation.

Table of Contents

Loss from discontinued operations in the three months ended September 30, 2007, was \$6.9 million, compared with a loss from discontinued operations of \$36.1 million in the three months ended September 30, 2006. The loss from discontinued operations in the three months ended September 30, 2006, included a non-cash charge of \$33.1 million (\$34.1 million after-tax) reflecting the write-down of non-current assets and related effects of FCCM. Our diluted loss per share from discontinued operations in the third quarter of 2007 were \$0.18 with 38.5 million shares outstanding, compared with diluted loss per share from discontinued operations of \$0.85 with 42.4 million shares outstanding in the third quarter of 2006. Basic loss per share from discontinued operations was \$0.20 with 34.0 million shares outstanding in the three months ended September 30, 2007, compared with basic loss per share from discontinued operations of \$0.96 with 37.7 million shares outstanding in the three months ended September 30, 2006.

Nine Months Ended September 30, 2007 Compared with Nine Months Ended September 30, 2006**Operating Revenues***Overview*

Operating revenues were \$381.6 million in the nine months ended September 30, 2007, compared with \$333.0 million in the nine months ended September 30, 2006, an increase of \$48.6 million, or 14.6%. The \$48.6 million increase in operating revenues consisted of \$35.1 million in revenues from new operations and an increase of \$13.5 million, or 4.1%, in revenues from existing operations. New operations consist of current year results of operations from recent acquisitions that did not exist in our consolidated financial results for a comparable period in the prior year. The \$13.5 million increase in revenues from existing operations included an increase of \$13.7 million in non-freight revenues, partially offset by a decrease of \$0.2 million in freight revenues. Operating revenues in the nine months ended September 30, 2007, benefited \$6.5 million from the appreciation of the Australian dollar and Canadian dollar relative to the U.S. dollar. The following table breaks down our operating revenues into new operations and existing operations for the nine months ended September 30, 2007 and 2006 (dollars in thousands):

Total carloads decreased by 8,381 carloads, or 1.4%, due to a decline of 44,142 carloads, or 7.1%, from existing operations, partially offset by an increase of 35,761 carloads from new operations.

The overall average freight revenues per carload increased 6.0% to \$405. Average freight revenues per carload from existing operations increased 7.6% to \$411.

The following information discusses the significant changes in freight revenues by commodity group from existing operations.

Table of Contents

Pulp and paper revenues decreased by \$0.8 million, or 1.5%. The decrease consisted of \$6.5 million due to a carload decrease of 11,669, or 11.2%, partially offset by \$5.7 million due to a 10.9% increase in average revenues per carload. The carload decrease was primarily due to higher truck competition resulting from Class I rate increases and a weak newsprint market.

Coal, coke and ores revenues decreased by \$2.8 million, or 6.0%. The decrease consisted of \$2.1 million due to a carload decrease of 6,976, or 4.6%, and \$0.7 million due to a 1.5% decrease in average revenues per carload. The carload decrease was primarily due to scheduled maintenance outages at two electricity generating facilities served by us. The maintenance at both plants was completed in mid-May. In addition, we experienced stronger shipments of coal in the first quarter of 2006 to electricity generating facilities to replenish their inventories which had been reduced in 2005 as a result of service interruptions and milder weather. In the first quarter of 2007, volumes were more representative of normal levels.

Lumber and forest products revenues increased by \$0.4 million, or 1.4%. The increase consisted of \$2.6 million due to a 9.6% increase in average revenues per carload, partially offset by \$2.2 million due to a carload decrease of 5,231, or 7.4%.

Farm and food products revenues increased by \$1.8 million, or 9.4%. The increase consisted of \$4.5 million due to a 23.4% increase in average revenues per carload, partially offset by \$2.7 million due to a carload decrease of 6,158, or 11.4%. The carload decrease was primarily due to GWA's drought affected grain traffic. Because rates for GWA's grain traffic have both a fixed and variable component, the grain traffic decrease resulted in higher average revenues per carload.

Petroleum products revenues increased \$1.3 million, or 12.6%. The increase consisted of \$1.0 million due to a 9.2% increase in average revenues per carload and \$0.3 million due to a carload increase of 565, or 3.1%.

Other revenues decreased \$1.0 million, or 11.1%. The decrease consisted of \$1.4 million due to a carload decrease of 6,432, or 15.3%, partially offset by \$0.4 million due to a 5.0% increase in average revenues per carload. The carload decrease was primarily the result of the discontinuation of haulage traffic on one of our rail lines.

All remaining commodities combined increased by a net \$0.9 million, or 1.3%.

Non-Freight Revenues

Non-freight revenues were \$134.6 million in the nine months ended September 30, 2007, compared with \$96.8 million in the nine months ended September 30, 2006, an increase of \$37.8 million, or 39.0%. The \$37.8 million increase in non-freight revenues consisted of \$24.1 million in non-freight revenues from new operations and \$13.7 million in non-freight revenues from existing operations.

The following table compares non-freight revenues for the nine months ended September 30, 2007 and 2006 (dollars in thousands):

The following information discusses the significant changes in non-freight revenues from existing operations.

Railcar switching revenues increased \$5.0 million, or 10.7%, of which \$1.4 million was due to an increase from intra-plant switching due to new customers and rate increases, \$1.9 million was due to an increase from intra-terminal switching, primarily at U.S. ports served by our railroads and \$1.4 million from GWA intra-plant switching.

Car hire and rental income increased \$1.1 million, or 7.4%, primarily due to increased customer demand.

Fuel sales to third parties increased \$1.8 million, or 23.2%, primarily due to increased sales volumes, primarily as a result of a new customer, and the strengthening of the Australian dollar in relation to the U.S. dollar.

Demurrage and storage revenues increased \$1.3 million, or 14.2%, primarily due to increased demurrage from existing customers, mainly due to the weakness of the paper industry in the Northeastern United States.

Other operating income increased \$3.9 million, or 28.0%, primarily due to \$2.0 million from GWA crewing and other ancillary charges and an increase in all other operating revenues of approximately \$1.9 million.

Operating Expenses*Overview*

Operating expenses were \$307.3 million in the nine months ended September 30, 2007, compared with \$270.2 million in the nine months ended September 30, 2006, an increase of \$37.1 million, or 13.7%. The increase was attributable to \$29.4 million from new operations and an increase of \$7.7 million from existing operations.

Operating Ratios

Our operating ratio, defined as total operating expenses divided by total operating revenues, improved to 80.5% in the nine months ended September 30, 2007, from 81.0% in the nine months ended September 30, 2006, primarily as a result of \$5.5 million of gains on the sale of assets in the third quarter of 2007.

Labor and benefits expense was \$123.0 million in the nine months ended September 30, 2007, compared with \$112.7 million in the nine months ended September 30, 2006, an increase of \$10.3 million, or 9.1%. The increase was attributable to \$7.7 million from new operations and an increase of \$2.6 million from existing operations. The increase of \$2.6 million from existing operations was primarily attributable to \$7.0 million due to regular wage and benefit rate increases, and the impact of approximately 30 new hires and \$0.9 million due to foreign currency changes, partially offset by \$6.0 million in bonus and stock option expense related to the ARG Sale in the nine months ended September 30, 2006.

Purchased services expense was \$31.7 million in the nine months ended September 30, 2007, compared with \$23.7 million in the nine months ended September 30, 2006, an increase of \$8.0 million, or 33.8%. The increase was attributable to \$7.0 million from new operations and an increase of \$1.0 million from existing operations. The increase in existing operations was primarily attributable to contract maintenance of way and equipment maintenance services.

Depreciation and amortization expense was \$23.5 million in the nine months ended September 30, 2007, compared with \$20.4 million in the nine months ended September 30, 2006, an increase of \$3.1 million, or 15.2%. The increase was attributable to \$1.2 million from new operations and an increase of \$1.9 million from existing operations. The increase in existing operations was primarily attributable to increased capital expenditures in 2006 and 2007.

Diesel fuel expense was \$31.9 million in the nine months ended September 30, 2007, compared with \$30.3 million in the nine months ended September 30, 2006, an increase of \$1.6 million, or 5.5%. The increase was attributable to \$1.4 million from new operations and an increase of \$0.2 million from existing operations.

Diesel fuel sold to third parties was \$16.7 million in the nine months ended September 30, 2007, compared with \$7.1 million in the nine months ended September 30, 2006, an increase of \$9.6 million. The increase was attributable to an increase in gallons of fuel sold to third parties at GWA as well as the full year impact of our GWA operations.

Casualties and insurance expense was \$12.5 million in the nine months ended September 30, 2007, compared with \$9.4 million in the nine months ended September 30, 2006, an increase of \$3.1 million, or 32.7%. The increase was due to a \$2.4 million increase in existing operations and \$0.7 million from new operations. The increase in existing operations was primarily due to an increase of \$1.6 million in derailment expense and \$0.8 million from a tunnel fire on one of our railroads.

Table of Contents

Materials expense was \$18.3 million in the nine months ended September 30, 2007, compared with \$15.8 million in the nine months ended September 30, 2006, an increase of \$2.5 million, or 15.9%. The increase was primarily attributable to an increase of \$2.2 million from existing operations and \$0.3 million from new operations. The increase in existing operations was primarily due to increased track and bridge repairs to one of our rail lines.

Net gain on sale of assets was \$5.9 million in the nine months ended September 30, 2007, compared with \$0.2 million in the nine months ended September 30, 2006. The gain of \$5.9 million in the nine months ended September 30, 2007, included gains resulting from the sale of certain land and track related assets in the Northeast United States.

Gain on insurance recovery of \$1.9 million in the nine months ended September 30, 2006, was attributable to an insurance receivable for the replacement of a bridge destroyed by fire at one of our railroads.

Other expenses were \$28.5 million in the nine months ended September 30, 2007, compared with \$26.6 million in the nine months ended September 30, 2006, an increase of \$1.9 million. The increase was attributable to \$1.6 million from new operations, primarily GWA, and an increase of \$0.3 million from existing operations.

Other Income (Expense) Items***Gain On Sale of ARG***

We recorded a pre-tax gain of \$218.8 million in the nine months ended September 30, 2006, related to the ARG Sale. See Note 2 in the Notes to Consolidated Financial Statements included elsewhere in this report for additional information on the ARG Sale.

Investment Loss - Bolivia

We recorded an investment loss of \$5.9 million in the nine months ended September 30, 2006, related to our South American equity investment. See Note 2 in the Notes to Consolidated Financial Statements included elsewhere in this report for additional information on our Bolivia investment.

Equity Loss of Unconsolidated International Affiliates

In the nine months ended September 30, 2006, equity loss of unconsolidated international affiliates was \$10.8 million primarily due to our investment in ARG, including a \$16.2 million pre-tax impairment loss, representing our 50% share of the impairment loss recorded by ARG. As previously disclosed, we sold our equity investment in ARG and discontinued equity accounting for our Bolivia investment during the second quarter of 2006.

Interest Income

Interest income was \$7.1 million in the nine months ended September 30, 2007, compared with \$4.5 million in the nine months ended September 30, 2006, an increase of \$2.6 million. The increase in interest income was primarily due to the investment of a portion of the cash proceeds from the ARG Sale.

Interest Expense

Interest expense was \$10.6 million in the nine months ended September 30, 2007, compared with \$12.5 million in the nine months ended September 30, 2006, a decrease of \$1.9 million, or 15.0%, primarily due to the reduction of debt resulting from the use of a portion of the cash proceeds from the ARG Sale.

Provision for Income Taxes

Our effective income tax rate in the nine months ended September 30, 2007, was 23.6% compared with 39.0% in the nine months ended September 30, 2006. The decrease in 2007 was primarily attributable to incremental U.S. foreign tax credits of \$5.8 million associated with the ARG Sale in 2006. The determination of the amount of U.S. foreign tax credits was dependent upon the payment of the foreign tax and an election made concurrent with the filing of the 2006 U.S. tax return, which occurred in June and September 2007, respectively. In the nine months ended September 30, 2007, we recorded \$2.6 million of additional prior year U.S. taxes relative to the ARG Sale. We assessed the effect

Edgar Filing: GENESEE & WYOMING INC - Form 10-Q

of the \$2.6 million of additional taxes on the consolidated financial statements taken as a whole and determined that the effect was not material to any period.

For the nine months ended September 30, 2007, as a result of ceasing our Mexican rail operations and initiating formal liquidation proceedings, we recorded a net U.S. tax benefit of \$11.3 million within the loss from discontinued operations. We also have a related capital loss carryforward which can be used to reduce the impact of future capital gains. The tax benefit associated with this carryforward of approximately \$8.0 million is fully offset by a valuation allowance. This capital loss carryforward expires in 2012.

Table of Contents***Income and Earnings Per Share from Continuing Operations***

Income from continuing operations in the nine months ended September 30, 2007, was \$54.7 million, compared with income from continuing operations of \$156.8 million in the nine months ended September 30, 2006. Our diluted EPS from continuing operations in the nine months ended September 30, 2007, were \$1.36 with 40.2 million shares outstanding, compared with diluted EPS from continuing operations of \$3.69, with 42.5 million shares outstanding in the nine months ended September 30, 2006. The nine months ended September 30, 2007, also included gains from the sale of assets and foreign tax credits, which increased diluted EPS by \$0.16. The nine months ended September 30, 2006, also included certain gains and charges, primarily related to the ARG Sale, which increased diluted EPS by \$2.56. Basic EPS from continuing operations were \$1.53 with 35.7 million shares outstanding in the nine months ended September 30, 2007, compared with basic EPS from continuing operations of \$4.17 with 37.6 million shares outstanding in the nine months ended September 30, 2006.

Loss and Loss Per Share from Discontinued Operations

During the third quarter of 2007, we ceased our Mexican rail operations and initiated formal liquidation proceedings of FCCM's operations. The SCT has contested the resignation of the concession and has seized substantially all of FCCM's operating assets in response to the resignation. As a result of this action, we recorded a pre-tax loss in the third quarter of 2007 of \$18.5 million, including non-cash charges of \$14.4 million. The non-cash charges included \$8.9 million primarily related to the write-down of FCCM's operating assets and a \$5.5 million loss from the cumulative foreign currency translation into U.S. dollars of the original investment and FCCM's reported earnings since 1999. This pre-tax loss was partially offset by a tax benefit of \$11.6 million primarily related to worthless stock and bad debt deductions to be claimed in the United States.

Our Mexican operations described above are presented as discontinued operations and its operations are, therefore, excluded from continuing operations in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS 144). The operations and cash flows of FCCM are being eliminated from our ongoing operations and we will not have any significant continuing involvement in the operations of FCCM.

For the nine months ended September 30, 2007, in connection with the liquidation of FCCM, we recorded \$5.2 million of restructuring and other related charges within loss from discontinued operations. These restructuring and other related charges consisted of \$3.2 million for severance and termination benefits in accordance with SFAS 112, \$1.0 million related to early lease termination fees and \$1.0 million for other expenses directly related to the liquidation. We also recorded a charge to interest expense during the nine months ended September 30, 2007, of \$0.6 million due to the recognition of previously deferred financing fees.

Loss from discontinued operations in the nine months ended September 30, 2007, was \$13.5 million, compared with a loss from discontinued operations of \$37.2 million in the nine months ended September 30, 2006. The loss from discontinued operations in the nine months ended September 30, 2006, included a non-cash charge of \$33.1 million (\$34.1 million after-tax) reflecting the write-down of non-current assets and related effects of FCCM. Our diluted loss per share from discontinued operations in the nine months ended September 30, 2007, were \$0.34 with 40.2 million shares outstanding, compared with diluted loss per share from discontinued operations of \$0.87 with 42.4 million shares outstanding in the nine months ended September 30, 2006. Basic loss per share from discontinued operations were \$0.38 with 35.7 million shares outstanding in the nine months ended September 30, 2007, compared with basic loss per share from discontinued operations of \$0.99 with 37.6 million shares outstanding in the nine months ended September 30, 2006.

Liquidity and Capital Resources

During the nine months ended September 30, 2007, we generated \$5.6 million in cash from operating activities from continuing operations, compared with \$64.0 million during the nine months ended September 30, 2006. The decrease in 2007 from 2006 was primarily due to the June 2007 payment of \$95.6 million for Australian taxes related to the ARG Sale, partially offset by the sourcing of cash from working capital.

During the nine months ended September 30, 2007, our cash flows used in investing activities from continuing operations were \$31.6 million, compared with cash provided by investing activities of \$255.8 million during the nine months ended September 30, 2006. For the nine months ended September 30, 2007, primary drivers of cash used in investing activities from continuing operations were \$41.4 million of cash used for capital expenditures, net of \$15.6 million received from current year government grants, and \$4.3

Table of Contents

million in cash received from government grants for capital projects completed in 2006, partially offset by \$1.7 million in insurance proceeds for capital projects completed in 2006 and \$8.1 million in cash proceeds from the disposition of property and equipment. For the nine months ended September 30, 2006, primary drivers of the cash flows provided by investing activities were \$306.7 million in proceeds received from the ARG Sale and \$0.3 million in cash proceeds from the disposition of property and equipment, partially offset by \$30.3 million of net cash used for capital expenditures and \$21.2 million in cash paid for acquisitions.

During the nine months ended September 30, 2007 and 2006, our cash flows used in financing activities from continuing operations were \$143.6 million and \$90.2 million, respectively. For the nine months ended September 30, 2007, the primary use of cash for financing activities was treasury stock repurchases totaling \$171.0 million, partially offset by a net increase in outstanding debt of \$23.5 million, \$3.0 million for stock purchases by employees and \$0.8 million from the excess income tax benefit from share-based payment arrangements. For the nine months ended September 30, 2006, primary uses of cash for financing activities were a net decrease in outstanding debt of \$89.7 million and treasury stock repurchases of \$11.2 million, partially offset by \$6.3 million for stock purchases by employees and \$4.4 million from the excess income tax benefit from share-based payment arrangements.

At September 30, 2007, we had long-term debt, including current portion, totaling \$261.0 million, which comprised 38.4% of our total capitalization. At December 31, 2006, we had long-term debt, including current portion, totaling \$245.7 million, which comprised 32.1% of our total capitalization. The net increase in long-term debt, including current portion in 2007, was primarily due to borrowings of \$25.0 million under our \$225.0 million revolving loan during the third quarter of 2007 in conjunction with the share repurchase program, partially offset by the assignment agreement we entered into with IFC and FMO as described below under Mexican Financings.

2007 Budgeted Capital Expenditures

We have budgeted \$58.0 million, net of government grants, in capital expenditures in 2007, which consists of track and equipment improvements of \$42.0 million, business development projects of \$7.0 million and equipment lease buyouts of \$9.0 million. As of September 30, 2007, we have incurred \$41.4 million, net of \$19.9 million received under related government grants, of the \$58.0 million in budgeted capital expenditures for 2007. Of the \$19.9 million of cash received under government grants, \$4.3 million related to our prior year capital budget. We have historically relied primarily on cash generated from operations to fund working capital and capital expenditures relating to ongoing operations, while relying on borrowed funds and stock issuances to finance acquisitions and investments in unconsolidated affiliates. We believe that our cash flow from operations, together with amounts available under our credit facilities, will enable us to meet our liquidity and capital expenditure requirements relating to ongoing operations for at least the duration of the credit facilities.

U.S. Credit Facilities

As of September 30, 2007, our \$225.0 million revolving loan, which matures in 2010, consisted of \$25.0 million of outstanding debt, letter of credit guarantees of \$0.1 million and \$199.9 million of unused borrowing capacity. The \$199.9 million unused borrowing capacity is available for general corporate purposes including acquisitions. Our credit facilities require us to comply with certain financial covenants all of which we were in compliance with as of September 30, 2007. See Note 9 of our Annual Report on Form 10-K for the year ended December 31, 2006, for additional information regarding our credit facilities.

Mexican Financings

As previously disclosed, our Mexican subsidiaries, Servicios and FCCM, were parties to certain amended loan agreements and promissory notes (collectively, the Loan Agreements) and related documents, and we were a party to certain related documents, with the IFC and FMO. The Loan Agreements and related documents set forth the terms of Servicios' existing loans from IFC and FMO, as well as our support obligations related to Servicios' obligations under the Loan Agreements. Servicios' obligations under the Loan Agreements were secured by essentially all of the assets of Servicios and FCCM, and a pledge of the shares of Servicios and FCCM held by us. Pursuant to a guarantee agreement related to the Loan Agreements, we guaranteed \$8.9 million of Servicios' debt payment obligations under the Loan Agreements, of which we previously paid approximately \$1.9 million on Servicios' behalf in 2006. IFC also received an equity interest in Servicios of 12.7% in connection with the Loan Agreements. Pursuant to an existing put option agreement among us, IFC and Servicios dated as of December 5, 2000, as amended as of March 15, 2005, IFC had the right to sell to us its 12.7% equity interest in Servicios, and on March 3, 2006, IFC notified us of its intention to exercise this put option.

Table of Contents

On June 8, 2007, we entered into an assignment agreement with IFC and FMO, pursuant to which, among other things, (i) IFC and FMO demanded payment of, and we paid, approximately \$7.0 million due under the guarantee agreement related to the Loan Agreements and (ii) we purchased and assumed the remaining loan amount outstanding under the Loan Agreements for a price equal to the principal balance plus accrued interest, or approximately \$7.3 million. As a result, we recorded a \$0.6 million interest charge due to the recognition of previously deferred financing fees related to the Loan Agreements during the second quarter of 2007. Also on June 8, 2007, we, IFC and Servicios entered into a put option exercise agreement pursuant to which IFC sold its 12.7% equity interest in Servicios to us for \$1.0 million, plus an additional \$0.4 million if FCCM is still in business on June 8, 2008. In addition, on June 8, 2007, we, IFC, FMO, Servicios and FCCM entered into a release agreement whereby the parties agreed to release and waive all claims and rights held against one another that existed or arose prior to the date thereof.

Neither the payment default discussed above, nor the entering into the agreements described above and the consummation of the transactions contemplated therein, resulted in a default under our outstanding debt obligations.

Impact of Foreign Currencies on Operating Revenues

In the nine months ended September 30, 2007, foreign currency translation had a positive impact on our consolidated operating revenues primarily due to the strengthening of the Australian dollar. The following table presents the effect of translating our nine months of 2007 reported operating revenues at the average foreign currency exchange rates in effect for the first nine months of 2006 (dollars in thousands):

	Nine Months Ended		
	September 30, 2007		
	As Reported	Currency Translation Impact	Revenues Excluding Currency Impact
U.S. Operating Revenues	\$ 271,474	\$	\$ 271,474
Australia Operating Revenues	65,908	(5,593)	60,315
Canada Operating Revenues	44,243	(908)	43,335
 Total Operating Revenues	 \$ 381,625	 \$ (6,501)	 \$ 375,124

Off-Balance Sheet Arrangements

An off-balance sheet arrangement includes any contractual obligation, agreement or transaction involving an unconsolidated entity under which we 1) have made guarantees, 2) have a retained or contingent interest in transferred assets, or a similar arrangement, that serves as credit, liquidity or market risk support to that entity for such assets, 3) have an obligation under certain derivative instruments or 4) have any obligation arising out of a material variable interest in such an entity that provides financing, liquidity, market risk or credit risk support to us, or that engages in leasing or hedging services with us.

Our off-balance sheet arrangements consist of operating lease obligations and guarantee arrangements. For additional information on our operating lease obligations and guarantee arrangements see Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources - Contractual Obligations and Commercial Commitments in our 2006 Annual Report on Form 10-K. We have no other types of off-balance sheet arrangements that we believe may have a material current or future adverse effect on our consolidated financial statements.

Recently Issued Accounting Standards

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, (SFAS 157), which is effective for fiscal years beginning after November 15, 2007, and for interim periods within those years. This statement defines fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. We are currently evaluating the provisions of SFAS 157.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of SFAS No. 115 (SFAS 159). SFAS 159 permits, but does not require, entities to choose to measure many financial instruments

Edgar Filing: GENESEE & WYOMING INC - Form 10-Q

and certain other items at fair value. The standard provides entities the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions.

Table of Contents

SFAS 159 is effective for fiscal years beginning after November 15, 2007, and interim periods within those years. We are currently evaluating the provisions of SFAS 159.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In 2004, we entered into an interest rate swap agreement and swapped our variable LIBOR interest rate on long-term debt for a fixed interest rate. At December 31, 2006, the notional amount under the agreement was \$21.4 million and represented a liability with a fair value of less than \$0.1 million. The swap expired in September 2007.

On February 13, 2006, we entered into two foreign currency forward contracts with a total notional amount of \$190 million to hedge a portion of our investment in 50% of the equity of ARG. The contracts, which expired in May 2006, were extended to June 1, 2006, and protected the hedged portion of our net investment from exposure to large fluctuations in the U.S. Dollar/Australian Dollar exchange rate. At expiration, excluding the effects of fluctuations in the exchange rate on our net investment, we recorded a loss of \$4.3 million from these contracts, which was included in the net gain on the ARG Sale in the second quarter of 2006.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of September 30, 2007. Based upon that evaluation and subject to the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that, as of September 30, 2007, the design and operation of our disclosure controls and procedures provided reasonable assurance that the disclosure controls and procedures are effective.

Internal Control Over Financial Reporting During the period covered by this Quarterly Report on Form 10-Q, there have been no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

On June 25, 2007, FCCM formally notified the SCT of its intent to cease its rail operations and to resign its 30-year concession from the Mexican government. In response to this notification, on July 24, 2007, the SCT issued an official letter informing FCCM that the SCT did not accept the resignation of the concession. On August 8, 2007, the SCT issued another official letter to initiate a proceeding to impose sanctions on FCCM. The proposed sanctions are based, in part, on allegations that FCCM has violated the Railroad Service Law in Mexico and the terms of its concession. On August 30, 2007, FCCM filed a brief with the SCT that challenged the proposed sanctions and introduced evidence supporting FCCM's right to resign its concession. On September 21, 2007, FCCM also filed a proceeding in the Tax and Administrative Federal Court in Mexico seeking an annulment of the SCT's July 24, 2007 official letter and recognition of FCCM's right to resign its concession. The SCT has also seized substantially all of FCCM's operating assets in response to FCCM's resignation of the concession. On September 19, 2007, FCCM filed a proceeding in the Second District Court in Merida (District Court) challenging the SCT's seizure of its operating assets as unconstitutional. The District Court admitted the proceeding on October 11, 2007, and issued a provisional ruling upholding the seizure, pending a full review of the constitutional grounds for the seizure and the legality of the SCT's actions. We believe the SCT's actions were unlawful and will continue to pursue appropriate legal remedies to support FCCM's resignation of the concession and to recover FCCM's operating assets.

Canada

In February 2002, Mr. Paquin, an individual living adjacent to the Outremont rail yard, filed a motion for authorization of class certification in the Quebec Superior Court in Canada in connection with a claim against two of the Company's subsidiaries, Genesee Rail-One Inc. (now Genesee & Wyoming Canada Inc.) and Quebec-Gatineau Railway Inc., as well as Canadian Pacific Railways (CP) (collectively, the Parties). Mr. Paquin alleged that the noise emanating from the Outremont rail yard causes significant nuisance problems to the residents living near the rail yard. The rail yard is owned by CP, part of which is leased and operated by Quebec-Gatineau Railway Inc. The plaintiff described the proposed class as comprised of all owners and tenants of dwellings who have lived within a defined section of the Outremont neighborhood in Montreal, which is adjacent to the rail yard. Mr. Paquin requested the issuance of an injunction in order to limit the hours when the rail yard may operate. The plaintiff did not allege any specific monetary claim with respect to the damages of other members of the class, but sought to recover for his trouble and inconvenience as well as for potential devaluation of the value of his property.

Following a May 2007 settlement conference, the Parties agreed on the terms of a settlement agreement whereby all outstanding claims under the class action will be dropped. The settlement agreement remains subject to review and approval by the class members and the Quebec Superior Court. We do not expect Genesee & Wyoming Canada Inc. or Quebec-Gatineau Railway to make any material financial contribution in connection with the proposed settlement.

Bolivia

As previously disclosed, we indirectly have a 12.52% equity interest in Oriental through its interest in GWC. GWC is an obligor of non-recourse debt of \$12.0 million, which debt is secured by a lien on GWC's 12.52% indirect equity interest in Oriental held through GWC's subsidiary, Inversiones Ferroviarias Bolivianas Ltda. This non-recourse debt became due and payable on November 2, 2003. In 2006, certain creditors of GWC commenced court proceedings to (i) collect on their share of the debt and (ii) exercise their rights pursuant to the lien. In addition, we hold a 10.37% indirect interest in Oriental through other companies. We do not expect the commencement of court proceedings to have any impact on this remaining 10.37% interest. We do not expect these proceedings to have a material effect on our financial statements.

Table of Contents*Other*

In addition to the lawsuits set forth above, from time to time we are a defendant in certain lawsuits resulting from our operations. Management believes that we have adequate provisions in the financial statements for any expected liabilities that may result from disposition of pending lawsuits. Nevertheless, litigation is subject to inherent uncertainties and unfavorable rulings could occur. Were an unfavorable ruling to occur, there exists the possibility of a material adverse impact to our results of operations, financial position or liquidity as of and for the period in which the ruling occurs.

ITEM 1A. RISK FACTORS

Set forth below are updates to certain risk factors that were previously disclosed in our 2006 Annual Report on Form 10-K, as well as an additional risk factor that arose during the three months ended September 30, 2007. For further explanation of the additional factors affecting our business, please refer to the Risk Factors section in Item 1A of our 2006 Annual Report on Form 10-K.

We are subject to significant governmental regulation of our railroad operations. The failure to comply with governmental regulations could have a material adverse effect on our operating results, financial condition and liquidity.

We are subject to governmental regulation with respect to our railroad operations and a variety of health, safety, security, labor, environmental and other matters by a significant number of federal, state and local regulatory authorities. In the U.S., these agencies include the Surface Transportation Board (STB), the Department of Transportation (DOT), the Federal Railroad Administration (FRA) of the DOT, other federal agencies (including the Department of Homeland Security) and state departments of transportation. In Australia, we are subject to both Commonwealth and state regulations. In Canada, we are subject to regulation by the Canada Transportation Agency, Transport Canada and the regulatory departments of the provincial governments of Quebec and Ontario. In Mexico, we are subject to regulation by the SCT. Our failure to comply with applicable laws and regulations could have a material adverse effect on our operating results, financial condition and liquidity.

Changes to the regulatory environment, if adopted, could have a significant impact our railroad operations.

There are various legislative actions being considered in the United States that modify or increase regulatory oversight of the rail industry. The majority of the actions under consideration are directed at Class I railroads; however, specific initiatives introduced in Congress in 2007 associated with competition, safety, security and labor regulations could significantly affect our operations and the cost of compliance with the proposed rules and regulations could be significant. In addition, proposed regulations may require us to obtain and maintain various licenses, permits and other authorizations, and we may not be able to do so. Federal, state and local regulatory authorities may change the regulatory framework without providing us with any recourse for the adverse effects that the changes may have on our operations. As a result, changes to the regulatory environment could have a material adverse effect on our operating results, financial condition and liquidity.

The expiration of the short line tax credit on January 1, 2008, could materially adversely affect our effective tax rate.

On October 22, 2004, the American Jobs Creation Act (P.L. 108-357) was signed into law. The Act provides a tax credit for Class II and Class III railroads against their federal income tax based on qualified railroad track maintenance expenditures (the Short Line Tax Credit). Qualified expenditures include amounts incurred for maintaining track, including roadbed, bridges, and related track structures owned or leased by a Class II or III railroad. The credit is equal to 50% of the qualified expenditures, subject to an annual limitation of \$3,500 multiplied by the number of miles of railroad track owned or leased by the Class II or Class III railroad as of the end of their tax year. The Short Line Tax Credit is applicable to tax years beginning after December 31, 2004, and before January 1, 2008, which includes calendar years 2005, 2006 and 2007. Although legislation to extend the Short Line Tax Credit was introduced in early 2007, there is no guarantee that the legislation will be approved. The Short Line Tax Credit lowers our effective tax rate on continuing operations by up to 10%. If the Short Line Tax Credit is not extended and expires, the loss of the credit could have a material adverse effect on our effective tax rate and our reported earnings per share.

Issuer Purchases of Equity Securities

On November 2, 2004, we announced that our Board of Directors authorized the repurchase of up to 1,000,000 shares of our Class A Common Stock. On February 13, 2007, we announced that our Board of Directors authorized the repurchase of up to 2,000,000 additional shares of our Class A Common Stock. On August 1, 2007, our Board of Directors authorized the repurchase of up to an additional 4,000,000 shares of our Class A Common Stock. The repurchases of stock may occur from time to time in the open market, including under 10b5-1 plans, or in privately negotiated transactions. Subsequent to September 30, 2007, we have fully exhausted our existing authorizations to repurchase shares.

During the three months ended September 30, 2007, we repurchased 3,934,900 shares of our Class A Common Stock at an average cost of \$26.94 per share. As of September 30, 2007, we had repurchased 6,848,930 shares of our common stock under the previously announced plans.
