Washington, D.C. 20549

**FORM 10-Q**

x **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended April 2, 2011

OR

.. **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

Commission file number 1-3344

**Sara Lee Corporation**

(Exact name of registrant as specified in its charter)

Maryland  
(State or other jurisdiction of

incorporation or organization)

3500 Lacey Road, Downers Grove, Illinois 60515

(Address of principal executive offices)

(Zip Code)

(630) 598-6000

(Registrant's telephone number, including area code)

36-2089049  
(I.R.S. Employer

Identification No.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No ..

## Edgar Filing: Sara Lee Corp - Form 10-Q

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of accelerated filer, large accelerated filer, smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

On April 2, 2011, the Registrant had 585,100,721 outstanding shares of common stock \$.01 par value, which is the Registrant's only class of common stock.

**SARA LEE CORPORATION AND SUBSIDIARIES**

**Notes to Consolidated Financial Statements**

1. Basis of Presentation

The consolidated financial statements for the quarter and nine months ended April 2, 2011 have not been audited by an independent registered public accounting firm, but in the opinion of Sara Lee Corporation (corporation or company), these financial statements include all normal and recurring adjustments necessary for a fair presentation of our financial position, operating results, and cash flows. The results of operations for the nine months ended April 2, 2011 are not necessarily indicative of the operating results to be expected for the full fiscal year. The Condensed Consolidated Balance Sheet as of July 3, 2010 has been derived from the corporation's audited financial statements included in our Annual Report on Form 10-K for the year ended July 3, 2010. The businesses comprising the former Fresh Bakery and International Household and Body Care segments are presented as discontinued operations in the corporation's consolidated financial statements. See Note 4 Discontinued Operations for additional information regarding these discontinued operations. Unless stated otherwise, any reference to income statement items in these financial statements refers to results from continuing operations.

The interim consolidated financial statements included herein have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Although the corporation believes the disclosures are adequate to make the information presented not misleading, certain information and footnote disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. These unaudited interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the corporation's Form 10-K for the year ended July 3, 2010 and other financial information filed with the Securities and Exchange Commission.

The corporation's fiscal year ends on the Saturday closest to June 30. Fiscal 2011 ends on July 2, 2011. The third quarter and first nine months of fiscal 2011 ended on April 2, 2011 and the third quarter and first nine months of fiscal 2010 ended on March 27, 2010. Each of the quarters was a thirteen-week period and each of the nine month periods was a thirty-nine week period. Fiscal 2011 is a 52-week year, whereas fiscal 2010 was a 53-week year. Unless otherwise stated, references to years relate to fiscal years.

In January 2011, the corporation announced that its board of directors has agreed in principle to divide the company into two separate, publicly traded companies which is expected to be completed in early calendar 2012. Under this plan, Sara Lee's North American Retail and North American Foodservice businesses (excluding the North American Beverage business) will be spun off, tax-free, into a new public company that will retain the Sara Lee name. The other company will consist of Sara Lee's current International Beverage and International Bakery businesses, as well as the North American beverage business. The separation plan is subject to final approval by the board of directors, other customary approvals and the receipt of an IRS tax ruling.

In conjunction with this planned separation, the board of directors intends to declare a \$3.00 per share dividend on the corporation's common stock, the majority of which will be funded from proceeds from the sale of the North American Fresh Bakery business. This special dividend is expected to be declared and paid in fiscal 2012 before the completion of the spin off.

**Table of Contents**

**Income statement correction** The corporation identified errors related to the gain on disposition of the global body care and European detergents business previously recognized in the second quarter of 2011 as part of the net income from discontinued operations in the Consolidated Statement of Income. As a result of these errors, the total after tax gain on disposition of businesses for the quarter and six months ended January 1, 2011 was overstated by \$49 million, of which \$17 million related to the net assets sold and \$32 million related to the tax provision on the gain. The corporation has concluded that these errors did not materially misstate the second quarter 2011 financial statements. The year-to-date and quarterly amounts reported in the Consolidated Statement of Income for the third quarter of 2011 reflect the correction of the errors as of the end of the second quarter of 2011. The following table summarizes the second quarter 2011 results on an as reported and as adjusted basis:

	Quarter ended Jan. 1, 2011		Six Months ended Jan. 1, 2011	
	As Reported	As Adjusted	As Reported	As Adjusted
Income from continuing operations	\$ 107	\$ 107	\$ 177	\$ 177

Income (loss) from discontinued operations	1.21	1.14	1.38	1.31
Net income	\$ 1.38	\$ 1.30	\$ 1.66	\$ 1.58
<b>Earnings per common share Diluted</b>				
Income from continuing operations	\$ 0.17	\$ 0.17	\$ 0.27	\$ 0.27
Income (loss) from discontinued operations	1.20	1.13	1.38	1.30
Net income	\$ 1.37	\$ 1.30	\$ 1.65	\$ 1.58

**Balance sheet correction** During the first quarter of 2011, the corporation corrected an error in the classification of certain asset and liability balances in the 2010 balance sheet associated with casualty losses from workers' compensation, auto liability and general liability claims by recording a portion of the liability for these losses and the related insurance receivable as long-term. The correction of this error has resulted in a \$15 million reduction to other current assets and a corresponding increase in other noncurrent assets in the 2010 balance sheet. In addition, other accrued liabilities was reduced by \$60 million with a corresponding increase in other liabilities (long-term). The correction of this error had a similar impact on the assets and liabilities of the former North American Fresh Bakery segment, which are now classified as held for sale on the balance sheet for all periods presented. The impact of the error on the assets and liabilities held for sale was \$15 million and \$79 million,

## Edgar Filing: Sara Lee Corp - Form 10-Q

respectively. The corporation has concluded that this error did not materially misstate previously issued financial statements.

As noted in the Summary of Significant Accounting Policies note to the company's 2010 annual report, the majority of the corporation's shipping and handling costs is being recognized in the Selling, general and administrative expenses (SG&A) line of the Consolidated Income Statement. Beginning in 2011, the corporation has begun reporting all shipping and handling costs incurred after a product is considered complete and ready for sale in SG&A. Previously, the North American Foodservice and International Beverage business segments were recognizing a portion of these costs in Cost of sales. The impact of this change is considered to be immaterial to both the consolidated quarterly and annual financial statements.

### 2. Net Income (Loss) Per Share

The computation of net income (loss) per share only includes results attributable to Sara Lee and does not include earnings related to noncontrolling interests. Net income per share - basic is computed by dividing net income (loss) attributable to Sara Lee by the weighted average number of shares of common stock outstanding for the period. Net income per share - diluted reflects the potential dilution that could occur if options or fixed awards to be issued under stock-based compensation awards were converted into common stock. For the quarter and nine months ended April 2, 2011, options to purchase 6.9 million

**Table of Contents**

shares and 11.9 million shares, respectively, of the corporation's common stock had exercise prices that were greater than the average market price of those shares during the respective reporting periods. For the quarter and nine months ended March 27, 2010, options to purchase 21.4 million shares and 21.9 million shares, respectively, of the corporation's common stock had exercise prices that were greater than the average market price of those shares during the respective reporting periods. These shares are excluded from the earnings per share calculation as they are anti-dilutive.

The average shares outstanding declined in the third quarter and first nine months of 2011 as compared to the third quarter and first nine months of 2010 as a result of shares repurchased under the corporation's ongoing share repurchase program. During the first nine months of 2011, the corporation repurchased 80.2 million shares of common stock for \$1.3 billion. The corporation also paid \$13 million as a final settlement on the accelerated share repurchase program (ASR) initiated in 2010. The ASR provided for a final settlement adjustment at termination based on the final volume weighted average stock price. As of April 2, 2011, the corporation was authorized to repurchase approximately \$1.2 billion of common stock under its existing share repurchase program, plus 13.5 million shares of common stock that remain authorized for repurchase under the corporation's prior share repurchase program. The corporation repurchases common stock at times management deems appropriate.

The following is a reconciliation of net income to net income per share—basic and diluted—for the third quarter and first nine months of 2011 and 2010 (per share amounts are rounded and may not add to total):

**Computation of Net Income per Common Share****(In millions, except per share data)**

**3. Segment Information**

The following is a general description of the corporation's four business segments:

## Edgar Filing: Sara Lee Corp - Form 10-Q

North American Retail sells a variety of packaged meat and frozen bakery products to retail customers in North America and includes the corporation's U.S. *Senseo* retail coffee business.

North American Foodservice sells a variety of meat, bakery, and beverage products to foodservice customers in North America.

International Beverage sells coffee and tea products in major markets around the world, including Europe, Australia and Brazil.

International Bakery sells a variety of bakery and dough products to retail and foodservice customers in Europe and Australia.

**Table of Contents**

The results of the operations comprising the corporation's former North American Fresh Bakery segment are now being reported as discontinued operations for all periods presented. See Note 4 - Discontinued Operations for additional information.

The following is a summary of net sales and operating segment income by business segment for the third quarter and first nine months of 2011 and 2010.

(In millions)	Net Sales			
	Third Quarter 2011	Third Quarter 2010	Nine Months 2011	Nine Months 2010

#### 4. Discontinued Operations

In November 2010, the corporation signed an agreement to sell its North American fresh bakery operations to Grupo Bimbo for \$959 million. As of the end of the third quarter of 2011, the corporation has closed or received binding offers for virtually all of its household and body care businesses. Subsequent to the end of the third quarter, the corporation closed on the disposition of a majority of its shoe care business. The corporation has also agreed to sell its non-Indian insecticides business for 154 million. Sara Lee received a deposit of 149 million on the sale of this business. The deposit was recognized as unrestricted cash, with an offsetting liability to the buyer of \$211 million, which will be reported in Other accrued liabilities in the Condensed Consolidated Balance Sheet until the deal closes. The sale of this business is currently under regulatory review.

## Edgar Filing: Sara Lee Corp - Form 10-Q

The businesses that formerly comprised the North American Fresh Bakery and International Household and Body Care segments are classified as discontinued operations and are presented in a separate line in the Consolidated Statements of Income for all periods presented. The assets and liabilities of these businesses to be sold meet the accounting criteria to be classified as held for sale and have been aggregated and reported on separate lines of the Condensed Consolidated Balance Sheets for all periods presented.

**Table of Contents**

In December 2010, the corporation completed the disposition of its global body care and European detergents business and, through the third quarter of 2011, completed the disposition of the majority of its air care business, as well as, its Australia/New Zealand bleach business.

As noted above, on November 9, 2010, the corporation signed an agreement to sell its North American fresh bakery business to Grupo Bimbo for \$959 million. The purchase price is subject to various adjustments, including reduction by up to \$140 million if and to the extent that Grupo Bimbo is required to divest certain amounts of assets in connection with obtaining regulatory approval. The agreement will enable Grupo Bimbo to use the Sara Lee brand in the fresh bakery category throughout the world, except Western Europe, Australia and New Zealand, while the corporation retains the brand for all other categories and geographies. The sale also includes a small portion of business that is currently part of the North American Foodservice segment which is not reflected as discontinued operations as it does not meet the definition of a component pursuant to the accounting rules. The transaction, which is subject to customary closing conditions and regulatory clearances, is anticipated to close before the end of 2011.

The following is a summary of the operating results of the corporation's discontinued operations:

(In millions)	Third Quarter 2011			Third Quarter 2010		
	Net Sales	Pretax Income (Loss)	Net Income (Loss)	Net Sales	Pretax Income (Loss)	Net Income (Loss)
North American Fresh Bakery Businesses	\$ 491	\$ 21	\$ 14	\$ 501	\$ 3	\$ 5
International Household and Body Care Businesses	197	(29)	(24)	525	80	(362)
<b>Total</b>	<b>\$ 688</b>	<b>\$ (8)</b>	<b>\$ (10)</b>	<b>\$ 1,026</b>	<b>\$ 83</b>	<b>\$ (357)</b>

(In millions)	First Nine Months 2011			First Nine Months 2010		
	Net Sales	Pretax Income (Loss)	Net Income (Loss)	Net Sales	Pretax Income (Loss)	Net Income (Loss)
North American Fresh Bakery Businesses	\$ 1,494	\$ 20	\$ 242	\$ 1,541	\$ 26	\$ 19
International Household and Body Care Businesses	970	52	19	1,611	209	(195)
<b>Total</b>	<b>\$ 2,464</b>	<b>\$ 72</b>	<b>\$ 261</b>	<b>\$ 3,152</b>	<b>\$ 235</b>	<b>\$ (176)</b>

The North American fresh bakery tax provision for the first nine months of 2011 includes a \$227 million income tax benefit associated with the excess tax basis related to these assets. This excess tax basis gives rise to a deferred tax asset, which will reverse upon the finalization of the sale of this business.

In the first nine months of 2010, the international household and body care businesses reported tax expense of \$404 million. The net tax expense resulted from the recognition of the following significant tax amounts: (i) a \$416 million tax charge related to the company's third quarter decision to no longer reinvest overseas earnings attributable to overseas cash and the net assets of the household and body care businesses; (ii) a \$53 million net tax benefit related to the reversal of a tax valuation allowance on United Kingdom net operating loss carryforwards as a result of the anticipated gain from the disposition of the household and body care businesses in that country; and (iii) a \$27 million tax benefit related to the anticipated utilization of U.S. capital loss carryforwards available to offset the capital gain resulting from the household and body care business disposition.

#### Gain on the Sale of Discontinued Operations

In February of 2011, the corporation closed on the sale of its Australia/New Zealand bleach business. Using foreign exchange rates on the date of the transaction, the corporation has received cash proceeds of \$51 million and reported an after tax gain of \$29 million.

The global body care and European detergents businesses were sold in December 2010. Using foreign exchange rates on the date of the transaction, the corporation received cash proceeds of \$1.5 billion, and reported an after tax gain on disposition of \$486 million. The corporation entered into a customary transitional services agreement with the purchaser of this business to provide for the orderly separation of

**Table of Contents**

the business and the orderly transition of various functions and processes. The terms of the agreement apply to specific functions or actions including sales, marketing and supply chain functions as well as certain accounting, payroll and tax processing, information technology services, and other services that will be performed for certain periods of time, which in each case is less than six months. The net amount recorded under the transition services agreement, including the service fee charged by the corporation, is a receivable which has been recorded in Other current assets in the Condensed Consolidated Balance Sheet.

A majority of the air care business was sold in July 2010. Using foreign exchange rates on the date of the transaction, the corporation has received cash proceeds of \$410 million to date, which represents a majority of the proceeds to be received, and reported an after tax gain on disposition of \$92 million. When this business was sold, certain operations were retained, primarily in Spain, until production related to non-air care businesses ceases at the facility. Sara Lee will continue to manufacture air care products for the buyer for a period of approximately 8 months, at which point the production facility will be sold to the buyer and the final gain on the sale will be recognized. The corporation entered into a customary transition services agreement with the purchaser of this business to provide for the orderly separation of the business and the orderly transition of various functions and processes which were completed by the end of the second quarter.

(In millions)	Third Quarter 2011			First Nine Months 2011		
	Pretax Gain (Loss) on Sale	Tax (Expense) Benefit	After Tax Gain	Pretax Gain on Sale	Tax (Expense) Benefit	After Tax Gain
Air Care Products	\$	\$	\$	\$ 271	\$ (179)	\$ 92
Global Body Care and European Detergents	(3)	3		866	(380)	486
Australia/New Zealand bleach	46	(17)	29	46	(17)	29
Other Household and Body Care Businesses				1		1
<b>Total</b>	<b>\$ 43</b>	<b>\$ (14)</b>	<b>\$ 29</b>	<b>\$ 1,184</b>	<b>\$ (576)</b>	<b>\$ 608</b>

The tax expense recognized on the sale of household and body care businesses in the first nine months of 2011 includes a \$234 million charge related to the anticipated repatriation of the cash proceeds received on the disposition of these businesses.

The following is a summary of the net assets held for sale as of April 2, 2011 and July 3, 2010, which primarily consists of the net assets of the North American fresh bakery and international household and body care businesses.

(In millions)	April 2, 2011	July 3, 2010
Trade accounts receivable	\$ 167	\$ 188
Inventories	114	221
Other current assets	27	52
<b>Total current assets held for sale</b>	<b>308</b>	<b>461</b>
Property	486	542
Trademarks and other intangibles	306	438
Goodwill	447	784
Other assets	(28)	17
<b>Assets held for sale</b>	<b>\$ 1,519</b>	<b>\$ 2,242</b>
Accounts payable	\$ 115	\$ 121
Accrued expenses and other current liabilities	187	295
Current maturities of long-term debt	16	20
<b>Total current liabilities held for sale</b>	<b>318</b>	<b>436</b>

Edgar Filing: Sara Lee Corp - Form 10-Q

Long-term debt	83	92
Other liabilities	250	316
Liabilities held for sale	\$ 651	\$ 844
Noncontrolling interest	\$ 28	\$ 28

The corporation enters into franchise agreements with independent third party contractors ( Independent Operators ) representing distribution rights to sell and distribute fresh bakery products via direct-store-delivery

**Table of Contents**

to retail outlets in defined sales territories. The corporation does not hold equity interests in any of the Independent Operator entities. The corporation determined that all Independent Operators are variable interest entities (VIE) of which it is the primary beneficiary, primarily as a result of Sara Lee's debt guarantee and other route maintenance obligations. The balance sheet amounts resulting from the consolidation of these VIEs are included in the assets and liabilities held for sale in the table above. The noncontrolling interest associated with these VIEs were \$26 million at April 2, 2011 and \$23 million at July 3, 2010.

Lease obligations associated with the VIEs are secured by the vehicles subject to lease and do not represent additional claims on the corporation's general assets. The corporation's maximum exposure for loss associated with the Independent Operator entities is limited to \$50 million of long-term debt of the Independent Operators as of April 2, 2011.

The discontinued operations cash flows are summarized in the table below:

(In millions) Increase / (Decrease)	Nine Months ended Apr. 2, 2011	Nine Months ended Mar. 27, 2010
Cash flow from operating activities	\$ 167	\$ 312
Cash flow from (used in) investing activities	2,145	(41)
Cash flow used in financing activities	(2,312)	(242)
Increase (decrease) in net cash of discontinued operations		29
Cash and cash equivalents at beginning of year		8
Cash and cash equivalents at end of period	\$	\$ 37

The net cash received from investing activities primarily represents the cash proceeds received on the sale of the global body care and European detergents and air care businesses. The cash used in financing operations primarily represents the net transfers of cash with the corporate office. The net assets of the discontinued operations includes only the cash noted above as most of the cash of those businesses has been retained as a corporate asset.

#### 5. Debt Issuances and Redemptions

On September 7, 2010, the corporation completed a tender offer for any and all of its 6 1/4% Notes due September 15, 2011, of which \$1.11 billion aggregate principal amount was outstanding. At the time of expiration of the tender offer, \$653.3 million of the 6 1/4% notes had been validly tendered. On September 8, 2010, the corporation announced that it was redeeming the remaining \$456.7 million of aggregate principal outstanding of the 6 1/4% Notes. This debt was redeemed on October 8, 2010. The corporation recognized a total charge of \$55 million in 2011 associated with the early extinguishment of this debt. This charge is reported on the Debt extinguishment costs line of the Consolidated Income Statement.

In September 2010, the company issued \$400 million 2.75% Notes due in September 2015 and \$400 million 4.1% Notes due in September 2020, the proceeds of which were used to fund a portion of the redemption of the 6 1/4% Notes. The remaining portion of the redemption of the 6 1/4% Notes in the second quarter of 2011 was funded by cash on hand and the net proceeds from commercial paper issuances.

#### 6. Exit, Disposal and Project Accelerate Activities

As part of its ongoing efforts to improve its operational performance and reduce costs, the corporation initiated Project Accelerate (Accelerate) in 2009, which is a series of global initiatives designed to drive significant savings in the next three years. It is anticipated that the overall cost of the initiatives will include severance costs as well as transition costs associated with transferring services to an outside third party. An important component of Accelerate involves outsourcing pieces of the North American and European Finance (transaction processing) and Global Information Services (applications development and maintenance) groups as well as the company's global indirect procurement activities. In addition to cost savings, this business process outsourcing will help the corporation drive standardization, increase efficiency and provide

## Edgar Filing: Sara Lee Corp - Form 10-Q

flexibility. The corporation plans to complete global implementation in 2012.

The company announced a transformation plan in 2005 that involved significant changes in the company's organizational structure, portfolio changes involving the disposition of a significant portion of the corporation's business, and a number of actions to improve operational efficiency. The corporation continues to recognize certain trailing costs related to these transformation actions, including the impact of certain activities that were completed for amounts more favorable than previously estimated.

**Table of Contents**

In January 2011, the corporation announced that its board of directors has agreed in principle to divide the company into two separate, publicly traded companies which is expected to be completed in early calendar 2012. Under this plan, a portion of the company's North American operations will be spun off, tax-free, into a new public company. As the company prepares for the spin off, it will incur certain spin off related costs. Spin off related costs include third party professional fees for consulting and other services that are directly related to the spin off. It also includes the costs of employees solely dedicated to activities directly related to the spin off.

The corporation also incurs exit, disposition and restructuring charges for initiatives to eliminate the stranded overhead associated with the disposition of the international household and body care businesses and other initiatives outside of the scope of the projects noted above.

The nature of the costs incurred under these plans includes the following:

1) Exit Activities, Asset and Business Disposition Actions These amounts primarily relate to:

Employee termination costs

Lease exit costs

Gains or losses on the disposition of assets or asset groupings that do not qualify as discontinued operations

2) Transformation/Accelerate/Spin off Costs recognized in Cost of sales and Selling, general and administrative expenses primarily relate to:

Expenses associated with the installation of new information systems

Costs to retain and relocate employees

Consulting costs

Costs associated with the transition of services to an outside third party vendor as part of a business process outsourcing initiative Transformation/Accelerate/Spin off costs are recognized in Cost of sales or Selling, general and administrative expenses in the Consolidated Statements of Income as they do not qualify for treatment as an exit activity or asset and business disposition under the accounting rules for exit and disposal activities. However, management believes the disclosure of these transformation/Accelerate/spin off related charges provides the reader greater transparency to the total cost of the initiatives.

The following is a summary of the (income) expense associated with new and ongoing actions, which also highlights where the costs are reflected in the Consolidated Statements of Income along with the impact on diluted EPS:

(In millions)	Quarter ended		Nine Months ended	
	Apr. 2, 2011	Mar. 27, 2010	Apr. 2, 2011	Mar. 27, 2010
Selling, general and administrative expenses:				
Accelerate charges	\$ 3	\$ 11	\$ 10	\$ 21
Spin off related costs	10		10	
Net charges for (income from):

The following discussion provides information concerning the exit, disposal and transformation/Accelerate activities for each year where actions were initiated and material reserves exist.

**2011 Actions**

During 2011, the corporation approved certain actions related to exit, disposal, and Accelerate activities and recognized charges of \$72 million related to these actions. Each of these activities is expected to be completed within a 12-month period after being approved and include the following:

Recognized a charge to implement a plan to terminate 411 employees, related to the European beverage and corporate office operations and provide them with severance benefits in accordance with benefit plans previously communicated to the affected employee group or with local employment laws. Of the 411 targeted employees, 388 employees have not yet been terminated, but are expected to be terminated within the next 12 months.

Recognized costs associated with the transition of services to an outside third party vendor as part of a business process outsourcing initiative.

Recognized third party and employee costs associated with the planned spin off of the company's North American operations. The corporation also recognized \$78 million of charges in discontinued operations primarily related to restructuring actions taken to eliminate stranded overhead associated with the household and body care businesses.

The following table summarizes the net charges taken for the exit, disposal, Project Accelerate and other restructuring activities approved during 2011 and the related status as of April 2, 2011. The accrued amounts remaining represent those cash expenditures necessary to satisfy remaining obligations. The majority of the cash payments to satisfy the accrued costs are expected to be paid in the next 12 months. The composition of these charges and the remaining accruals are summarized below. Approximately \$130 million of charges related to continuing operations are expected to be recognized in 2011.

(In millions)	Employee termination and other benefits	IT and other costs	Total
Exit, disposal and other costs recognized during 2011	\$ 52	\$ 20	\$ 72

Edgar Filing: Sara Lee Corp - Form 10-Q

Charges recognized in discontinued operations	56	22	78
Cash payments	(18)	(24)	(42)
Foreign exchange	5		5
Accrued costs as of April 2, 2011	\$ 95	\$ 18	\$ 113

**Table of Contents**2010 Actions

During 2010, the corporation approved certain actions related to exit, disposal, and Accelerate activities and recognized charges of \$117 million related to these actions. Each of these activities is to be completed within a 12-month period after being approved and include the following:

Recognized a charge to implement a plan to terminate 1,130 employees, related to European beverage, European bakery and North American foodservice operations, and provide them with severance benefits in accordance with benefit plans previously communicated to the affected employee group or with local employment laws. Of the 1,130 targeted employees, 204 employees have not yet been terminated, but are expected to be terminated within the next 12 months.

Recognized costs associated with the transition of services to an outside third party vendor as part of a business process outsourcing initiative.

Recognized a \$20 million net loss associated with the disposition of certain bakery manufacturing facilities in Spain. The following table summarizes the significant actions completed during the first nine months of 2011 and the status of the remaining accruals related to the 2010 actions as of April 2, 2011. The accrued amounts remaining represent those cash expenditures necessary to satisfy remaining obligations. The majority of the cash payments to satisfy the accrued costs are expected to be paid in the next 12 months. The corporation does not anticipate any additional material future charges related to the 2010 actions. The composition of these charges and the remaining accruals are summarized below.

(In millions)	Employee termination and other benefits	IT and other costs	Non- cancellable Leases	Total
Accrued costs as of July 3, 2010	\$ 40	\$ 9	\$ 13	\$ 62
Cash payments	(19)	(9)	(6)	(34)
Change in estimate	(6)		3	(3)
Foreign exchange impacts	5			5
Accrued costs as of April 2, 2011	\$ 20	\$	\$ 10	\$ 30

2009 Actions

During 2009, the corporation approved certain actions related to exit, disposal, transformation and Accelerate activities and recognized charges of \$120 million related to these actions. Each of these activities was to be completed within a 12-month period after being approved and include the following:

Implemented a plan to terminate 984 employees, related to the European beverage and bakery operations and the corporate office group in North America, and provide them with severance benefits in accordance with benefit plans previously communicated to the affected employee group or with local employment laws. Of the 984 targeted employees, 7 employees have not yet been terminated, but are expected to be terminated within the next 12 months.

Recognized costs related to the implementation of common information systems across the organization in order to improve operational efficiencies. These costs primarily relate to the amortization of certain capitalized software costs.

## Edgar Filing: Sara Lee Corp - Form 10-Q

Recognized costs associated with the transition of business support services to an outside third party vendor as part of a business process outsourcing initiative.

Significant actions completed during the first nine months of 2011 and the status of the remaining elements of the 2009 actions, along with the remaining accruals, is described below. The accrued amounts remaining represent those cash expenditures necessary to satisfy remaining obligations. The majority of the cash payments to satisfy the accrued costs are expected to be paid in the next 12 months. The corporation does not anticipate any additional material future charges related to the 2009 actions. The composition of these charges and the remaining accruals are summarized in the following table:

(In millions)	Employee termination and other benefits	IT and other costs	Total
Accrued costs as of July 3, 2010	\$ 22	\$ 3	\$ 25
Cash payments	(8)		(8)
Change in estimate	(3)		(3)
Foreign exchange impacts	2		2
Accrued costs as of April 2, 2011	\$ 13	\$ 3	\$ 16

---

**Table of Contents**

In periods prior to 2009, the corporation had approved and completed various actions to exit certain defined business activities and lower its cost structure and these actions have had minimal impact on current year results. As of April 2, 2011, the accrued liabilities remaining in the Condensed Consolidated Balance Sheet related to these completed actions total \$15 million and primarily represent certain severance obligations. These accrued amounts are expected to be satisfied in cash and will be funded from operations.

7. Financial Instruments

**Background Information**

The corporation uses derivative financial instruments, including forward exchange, futures, options and swap contracts, to manage its exposures to foreign exchange, commodity prices and interest rate risks. The use of these derivative financial instruments modifies the exposure of these risks with the intent to reduce the risk or cost to the corporation. The corporation does not use derivatives for trading or speculative purposes and is not a party to leveraged derivatives.

The corporation recognizes all derivative instruments as either assets or liabilities at fair value in the consolidated balance sheet. The corporation uses either hedge accounting or mark-to-market accounting for its derivative instruments. For derivatives that qualify for hedge accounting, the corporation designates these derivatives as fair value, cash flow or net investment hedges by formally documenting the hedge relationships, including identification of the hedging instruments and the hedged items, as well as its risk management objectives and strategies for undertaking the hedge transaction. The process includes linking derivatives that are designated as hedges of specific assets, liabilities, firm commitments or forecasted transactions.

As noted above, the corporation uses derivative financial instruments to manage some of its exposure to commodity prices. A commodity derivative not declared a hedge in accordance with the accounting rules related to derivative instruments and hedging activities is accounted for under mark-to-market accounting with changes in fair value recorded in the Consolidated Statements of Income. The corporation includes these unrealized mark-to-market gains and losses in general corporate expenses until the derivative instrument is settled. At that time, the cumulative gain or loss previously recorded in general corporate expenses for the derivative instrument will be reclassified into the business segment's results.

On the date the derivative is entered into, the corporation designates the derivative as one of the following types of hedging instruments and accounts for the derivative as follows:

**Fair Value Hedge** A hedge of a recognized asset or liability or an unrecognized firm commitment is declared as a fair value hedge which qualifies for hedge accounting. For fair value hedges, both the effective and ineffective portions of the changes in the fair value of the derivative, along with the gain or loss on the hedged item that is attributable to the hedged risk, are recorded in earnings and are reported in the Consolidated Statements of Income on the same line as the hedged item.

**Cash Flow Hedge** A hedge of a forecasted transaction, firm commitment or of the variability of cash flows to be received or paid related to a recognized asset or liability is declared a cash flow hedge. Cash flow hedges qualify for hedge accounting. The effective portion of the change in the fair value of the derivative that is declared as a cash flow hedge is recorded in accumulated other comprehensive income (within common stockholders' equity) and later reclassified to the income statement at the same time the

**Table of Contents**

underlying hedged item impacts the income statement. In addition, both the fair value of changes excluded from the corporation's effectiveness assessments and the ineffective portion of the changes in the fair value of derivatives used as cash flow hedges are reported in Selling, general and administrative expenses in the Consolidated Statements of Income.

At April 2, 2011 the maximum maturity date of any cash flow hedge was approximately two years principally related to a cross currency swap that matures in 2013. The corporation expects to reclassify into earnings during the next twelve months net gains from Accumulated Other Comprehensive Income of approximately \$5 million at the time the underlying hedged transaction is recognized in the Consolidated Statement of Income.

**Net Investment Hedge** A hedge of the exposure of changes in the underlying foreign currency denominated subsidiary net assets is declared as a net investment hedge. Net investment hedges qualify for hedge accounting. Net investment hedges can include either derivative or non-derivative instruments such as non-U.S. dollar financing transactions or non-U.S. dollar assets or liabilities, including intercompany loans. The effective portion of the change in the fair value of net investment hedges is recorded in the cumulative translation adjustment account within common stockholders' equity. At April 2, 2011 and July 3, 2010, the U.S. dollar equivalent of intercompany loans and forward exchange contracts designated as net investment hedges was \$4.0 billion and \$4.5 billion, respectively.

**Mark-to-Market Hedge** A derivative that does not qualify for hedge accounting in one of the categories above is accounted for under mark-to-market accounting and referred to as a mark-to-market hedge. Changes in the fair value of a mark-to-market hedge are recognized in the Consolidated Statements of Income to act as an economic hedge against the changes in the values of another item or transaction. Changes in the fair value of derivatives classified as mark-to-market hedges are reported in earnings in either the Cost of sales or Selling, general and administrative expenses lines of the Consolidated Statements of Income where the change in value of the underlying transaction is recorded.

**Types of Derivative Instruments**

***Interest Rate and Cross Currency Swaps*** To manage interest rate risk, the corporation has entered into interest rate swaps that effectively convert certain fixed-rate debt instruments into floating-rate debt instruments. Interest rate swap agreements that are effective at hedging the fair value of fixed-rate debt agreements are designated and accounted for as fair value hedges. The corporation utilizes interest rate swap derivatives in order to maintain a targeted amount of both fixed-rate and floating-rate long term debt and notes payable. In the first nine months of 2011, the corporation settled \$285 million of interest rate swaps, including a \$50 million forward starting swap. Currently, the corporation has a fixed interest rate on approximately 60% of long-term debt and notes payable issued.

The corporation has issued certain foreign-denominated debt instruments and utilizes cross currency swaps to reduce the variability of functional currency cash flows related to the foreign currency debt. Cross currency swap agreements that are effective at hedging the variability of foreign-denominated cash flows are designated and accounted for as cash flow hedges. As of April 2, 2011 and July 3, 2010, the total notional amount of the corporation's interest rate swaps was \$576 million and \$761 million, respectively and the total notional amount of cross currency swaps was \$798 million and \$704 million, respectively. The notional value of the cross currency swaps is calculated by multiplying the euro value swapped by the exchange rate at the reporting date.

***Currency Forward Exchange, Futures and Option Contracts*** The corporation uses forward exchange and option contracts to reduce the effect of fluctuating foreign currencies on short-term foreign-currency-denominated intercompany transactions, third-party product-sourcing transactions, foreign-denominated investments (including subsidiary net assets) and other known foreign currency exposures. Gains and losses on the derivative instruments are intended to offset losses and gains on the hedged transaction in an effort to reduce the earnings volatility resulting from fluctuating foreign currency exchange rates. Forward currency exchange contracts mature at the anticipated cash requirement date of the hedged transaction, generally within one year to eighteen months. Forward currency exchange contracts which are effective at hedging the fair value of a recognized asset or liability are designated and accounted for as fair value hedges. Forward currency contracts that act as a hedge of changes in the underlying foreign currency denominated subsidiary net assets are accounted for as net investment hedges. All remaining currency forward and options contracts are accounted for as mark-to-market hedges.

---

## Table of Contents

The principal currencies hedged by the corporation include the European euro, British pound, Danish krone, Hungarian forint, U.S. dollar, Swiss franc, Australian dollar and Brazilian real. The net U.S. dollar equivalent of commitments to purchase and sell foreign currencies is \$2.886 billion and \$2.876 billion, respectively as of April 2, 2011 and \$4.211 billion and \$4.066 billion, respectively as of July 3, 2010, using the exchange rates as of the reporting dates. The corporation hedges virtually all foreign exchange risk derived from recorded transactions and firm commitments and only hedges foreign exchange risk related to anticipated transactions where the exposure is potentially significant.

The notional value of foreign exchange options contracts outstanding was \$1 million as of April 2, 2011 and \$9 million as of July 3, 2010 as determined by the ratio of the change in option value to the change in the underlying hedged item.

*Commodity Futures and Options Contracts* The corporation uses commodity futures and options to hedge a portion of its commodity price risk. The principal commodities hedged by the corporation include hogs, beef, natural gas, diesel fuel, coffee, corn, wheat and other ingredients. The corporation does not use significant levels of commodity financial instruments to hedge commodity prices and primarily relies upon fixed rate supplier contracts to determine commodity pricing. In circumstances where commodity-derivative instruments are used, there is a high correlation between the commodity costs and the derivative instruments. For those instruments where the commodity instrument and underlying hedged item correlate between 80-125%, the corporation accounts for those contracts as cash flow hedges. However, the majority of commodity derivative instruments are accounted for as mark-to-market hedges.

As of April 2, 2011 and July 3, 2010, the total notional amount of commodity futures contracts was \$190 million and \$143 million, respectively, and the total notional amount of option contracts was \$36 million and \$3 million, respectively. The notional amount of commodity futures contracts is determined by the initial cost of the contracts while the notional amount of options contracts is determined by the ratio of the change in option value to the change in the underlying hedged item.

The corporation only enters into futures and options contracts that are traded on established, well-recognized exchanges that offer high liquidity, transparent pricing, daily cash settlement and collateralization through margin requirements.

## Cash Flow Presentation

The settlement of derivative contracts related to the purchase of inventory, commodities or other hedged items that utilize hedge accounting are reported in the Consolidated Statements of Cash Flows as an operating cash flow, while those derivatives that utilize the mark-to-market hedge accounting model are reported in investing activities when those contracts are realized in cash. Fixed to floating rate swaps are reported as a component of interest expense and therefore are reported in cash flow from operating activities similar to how cash interest payments are reported. The portion of the gain or loss on a cross currency swap that offsets the change in the value of interest expense is recognized in cash flow from operations.

## Contingent Features/Concentration of Credit Risk

All of the corporation's derivative instruments are governed by International Swaps and Derivatives Association (i.e. ISDA) master agreements, requiring the corporation to maintain an investment grade credit rating from both Moody's and Standard & Poor's credit rating agencies. If the corporation's debt were to fall below investment grade, it would be in violation of these provisions, and the counterparties to the derivative instruments could request immediate payment or demand immediate collateralization on the derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position on April 2, 2011, is \$278 million for which the corporation has posted no collateral. If the credit-risk-related contingent features underlying these agreements were triggered on April 2, 2011, the corporation would be required to post collateral of, at most, \$278 million with its counterparties.

---

## Table of Contents

A large number of major international financial institutions are counterparties to the corporation's financial instruments including cross currency swaps, interest rate swaps, and currency exchange forwards and swaps. The corporation enters into financial instrument agreements only with counterparties meeting very stringent credit standards (a credit rating of A-/A3 or better), limiting the amount of agreements or contracts it enters into with any one party and, where legally available, executing master netting agreements. These positions are continually monitored. While the corporation may be exposed to credit losses in the event of nonperformance by individual counterparties of the entire group of counterparties, it has not recognized any losses with these counterparties in the past and does not anticipate material losses in the future.

### Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., exit price) in an orderly transaction between market participants at the measurement date. Assets and liabilities measured at fair value must be categorized into one of three different levels depending on the assumptions (i.e., inputs) used in the valuation. Level 1 provides the most reliable measure of fair value while level 3 generally requires significant management judgment. Assets and liabilities are classified in their entirety based on the lowest level of input significant to the fair value measurement. The fair value hierarchy is defined as follows:

**Level 1 – Unadjusted Quoted Prices** – Valuations are based on unadjusted quoted prices in active markets for identical assets or liabilities. An example would be a marketable equity security that is traded on a major stock exchange.

**Level 2 – Pricing Models with Significant Observable Inputs** – Valuations are based on information derived from either an active market quoted price, which may require further adjustment based on the attributes of the asset or liability being measured, or an inactive market transaction. Circumstances when adjustments to market quoted prices may be appropriate include (i) a quoted price for an actively traded equity investment that is adjusted for a contractual trading restriction, or (ii) the fair value derived from a trade of an identical or similar security in an inactive market. An interest rate swap derivative valued based on a LIBOR swap curve is an example of a level 2 asset or liability.

**Level 3 – Pricing Models with Significant Unobservable Inputs** – Valuations are based on internally derived assumptions surrounding the timing and amount of expected cash flows for the financial instrument, which are significant to the overall fair value measurement. These assumptions are unobservable in either an active or inactive market. The inputs reflect management's best estimate of what market participants would use in valuing the asset or liability at the measurement date. A goodwill impairment test that utilizes an internally developed discounted cash flow model is an example of a level 3 asset or liability.

The carrying amounts of cash and equivalents, trade accounts receivables, accounts payable, derivative instruments and notes payable approximate fair values.

The fair values and carrying amounts of long-term debt, including the current portion, at April 2, 2011 were \$2.4 billion and \$2.4 billion, and at July 3, 2010 were \$2.8 billion and \$2.6 billion, respectively. The fair value of the corporation's long-term debt, including the current portion, is estimated using discounted cash flows based on the corporation's current incremental borrowing rates for similar types of borrowing arrangements.

**Table of Contents**

Information on the location and amounts of derivative fair values in the Condensed Consolidated Balance Sheet at April 2, 2011 and July 3, 2010 is as follows:

(In millions)	Assets				Liabilities			
	Other Current Assets		Other Non-Current Assets		Accrued Liabilities - Other		Other

- (a) Effective portion. For net investment derivatives, the gain/loss flows through currency translation.
- (b) Gain (loss) reclassified from AOCI into earnings is reported in interest, for interest rate swaps, in selling, general, and administrative (SG&A) expenses for foreign exchange contracts and in cost of sales for commodity contracts.
- (c) Gain (loss) recognized in earnings is related to the ineffective portion and amounts excluded from the assessment of hedge effectiveness.
- (d) Gain (loss) recognized in earnings is reported in interest expense for foreign exchange contracts and SG&A expenses for commodity contracts.
- (e) The amount of gain (loss) recognized in earnings on the derivative contracts and the related hedged item is reported in interest expense.
- (f) The gain (loss) recognized from OCI into earnings is reported in gain on sale of discontinued operations.

## 8. Pension and Other Postretirement Benefit Plans

The components of the net periodic pension cost and the postretirement medical cost (benefit) for the third quarter and first nine months of 2011 and 2010 are as follows:

(In millions)	Pension		Postretirement Medical and Life Insurance	
	Third Quarter 2011	Third Quarter 2010	Third Quarter 2011	Third Quarter 2010
Service cost	\$ 10	\$ 13	\$	\$
Interest cost	59	59	1	1
Expected return on plan assets	(69)	(60)		
Amortization of:				
Prior service cost (benefit)	1	1	(4)	(2)
Net actuarial loss	10	12	1	

Edgar Filing: Sara Lee Corp - Form 10-Q

Net periodic benefit cost (benefit)	\$ 11	\$ 25	\$ (2)	\$ (1)
-------------------------------------	-------	-------	--------	--------

(In millions)	Pension		Postretirement Medical and Life Insurance	
	Nine Months 2011	Nine Months 2010	Nine Months 2011	Nine Months 2010
Service cost	\$ 30	\$ 36	\$ 1	\$ 1

Expected return on plan assets	(206)	(179)		
Amortization of:				
Prior service cost (benefit)	5	4	(11)	(9)
Net actuarial loss	30	38	1	
Net periodic benefit cost (benefit)	\$ 33	\$ 80	\$ (5)	\$ (4)

---

**Table of Contents**

The net periodic benefit cost of the corporation's defined benefit pension plans in the first nine months of 2011 was \$47 million lower than in 2010 as a result of the following:

An increase in the expected return on plan assets as a result of a larger amount of plan assets as of the beginning of this fiscal year as compared to the prior year due to improved asset returns during 2010 as well as a \$200 million contribution into the U.S. pension plans in the fourth quarter of 2010.

A reduction in service cost and interest cost as a result of freezing the pension benefits under the U.S. salaried pension plans during the third quarter of 2010 as well as a reduction in interest rates.

The amortization of net actuarial losses decreased in 2011 despite an increase in the total amount of unamortized actuarial losses at the end of 2010 as compared to 2009. Amortization of actuarial losses declined as the total amount of unamortized actuarial losses associated with the U.S. plans was reduced due to the freezing of the U.S. salaried pension plans, which also extended the amortization period. This decline in amortization was partially offset by an increase in amortization associated with the non-U.S. plans.

In 2011, the corporation disposed of a majority of the international household and body care businesses but retained a significant portion of the pension and postretirement medical obligations related to those businesses. As the corporation will no longer incur service cost for the participants in those plans after the businesses were sold, this cost component is recognized in discontinued operations, while the remainder of net periodic benefit cost associated with these plans is being recognized in continuing operations.

As discussed in footnote 4, Discontinued Operations, the corporation signed an agreement for the sale of the corporation's North American fresh bakery businesses in the second quarter of 2011 which has triggered a \$5 million curtailment loss to be recognized in discontinued operations. In conjunction with the curtailment, the plan assets and liabilities of this U.S. defined benefit plan were remeasured as of the date of the agreement. Based on the results of the remeasurement, the net funded position of this plan increased by approximately \$30 million, which was recognized as a decrease in noncurrent pension liabilities with an offsetting decrease in the unamortized actuarial loss in AOCI. This improvement in the net funded position primarily related to an improvement in asset returns.

Beginning in the second quarter of 2011, the corporation has classified the North American fresh bakery businesses as discontinued operations and per the sale agreement, the purchaser will assume the pension and postretirement medical obligations related to those businesses. As such, the total net periodic benefit cost associated with the participants in those plans has been included in discontinued operations as these costs will not be retained after these businesses are sold and the related pension and postretirement benefit plan net liabilities have been included in assets and/or liabilities held for sale.

During the first nine months of 2011 and 2010, the corporation contributed \$115 million and \$100 million, respectively, to its defined benefit pension plans. At the present time, the corporation expects to contribute approximately \$120 million of cash to its defined benefit pension plans in 2011. Previously, the company estimated that its 2011 contributions would include approximately \$80 million of additional contributions to the company's Dutch pension plan, subject to reaching an agreement with the Dutch unions to restructure this plan. It is now expected that this contribution will be made in the first half of 2012. The exact amount of cash contributions made to pension plans in any year is dependent upon a number of factors including minimum funding requirements in the jurisdictions in which the corporation operates and arrangements made with trustees of certain foreign plans. As a result, the actual funding in 2011 may differ from the current estimate.

The corporation recognized a \$7 million charge in the prior year to establish the estimated partial withdrawal liability for certain multi-employer pension plans. The charge was recognized in discontinued operations in the Consolidated Statements of Income as it was related to the North American fresh bakery operations.

**Table of Contents**

## 9. Receipt of Contingent Sale Proceeds

The corporation sold its European cut tobacco business in 1999. Under the terms of that agreement, the corporation was to receive an annual cash payment of 95 million euros if tobacco continued to be a legal product in the Netherlands, Germany and Belgium through July 15, 2009. The final payment associated with this contingency of \$133 million, which increased diluted earnings per share for the full year by \$0.19 per share, was received in the first quarter of 2010 and recorded as income on the Contingent sale proceeds line in the Consolidated Statements of Income.

## 10. Income Taxes

The following table sets out the tax expense and the effective tax rate for the corporation from continuing operations:

(In millions)	Third Quarter		Nine Months	
	2011	2010	2011	2010
Continuing operations				
Income before income taxes	\$ 197	\$ 197	\$ 469	\$ 722
Income tax expense (benefit)	60	174	155	217
Effective tax rate	30.5%	88.1%	33.0%	30.0%

Third Quarter and First Nine Months of 2011

In the third quarter of 2011, the corporation recognized tax expense of \$60 million on pretax income from continuing operations of \$197 million, or an effective tax rate of 30.5%. The tax expense and related effective tax rate on continuing operations were impacted by recognizing various discrete tax items, none of which were material individually or in the aggregate.

In the first nine months of 2011, the corporation recognized tax expense of \$155 million on pretax income from continuing operations of \$469 million, or an effective tax rate of 33.0%. The tax expense and related effective tax rate on continuing operations was determined by applying a 35.0% estimated annual effective tax rate to pretax earnings and then recognizing various discrete tax items, none of which were material individually or in the aggregate. The expected repatriation of a portion of 2011 earnings increases the 2011 estimated annual effective tax rate by 3%.

Third Quarter and First Nine Months of 2010

In the third quarter of 2010, the corporation recognized tax expense of \$174 million on pretax income from continuing operations of \$197 million, or an effective tax rate of 88.1%. The tax expense and related effective tax rate on continuing operations were impacted by recognizing \$22 million of discrete tax expense related to the following items:

\$43 million of tax expense related to a Belgian litigation proceeding that is expected to result in additional income tax expense. (See Note 11 Contingencies and Commitments)

\$19 million of tax benefit related to adjustment of taxes previously provided on 2009 earnings of the corporation, of which \$18 million is an adjustment of a tax provision estimate related to a tax credit.

\$9 million of tax benefit related to the settlement of tax audits and expiration of statutes of limitations in France, the Netherlands, Spain, and the United States, of which \$1 million of tax benefit is from the settlement of tax audits, and \$8 million of tax benefit is from the expiration of statutes of limitations.

## Edgar Filing: Sara Lee Corp - Form 10-Q

\$7 million of tax expense related to deferred tax adjustments, of which \$3 million related to a change in the law on the deductibility of benefits reimbursed under the Medicare Part D retiree prescription drug program.

In the first nine months of 2010, the corporation recognized tax expense of \$217 million on pretax income from continuing operations of \$722 million, or an effective tax rate of 30.0%. The tax expense and related effective tax rate on continuing operations was determined by applying a 39.3% estimated annual effective tax rate to pretax earnings and then recognizing \$67 million of discrete tax benefits. The discrete tax items relate to the following:

\$103 million of tax benefit primarily from the settlement of tax audits and expiration of the statutes of limitations in the United Kingdom, Hungary, Spain, the United States, South Africa, France, the Netherlands, and various state and local jurisdictions, of which \$95 million is primarily from the settlement of audits with the tax authorities, and \$8 million is from the expiration of statutes of limitations.

---

**Table of Contents**

\$43 million of tax expense related to a Belgian litigation proceeding that is expected to result in additional income tax expense. (See Note 11 - Contingencies and Commitments)

\$25 million of tax expense to establish a valuation allowance on net operating losses and other deferred tax assets in Belgium.

\$20 million of tax benefit from the release of a valuation allowance on the deferred tax assets of the corporation's Brazilian subsidiaries.

\$19 million of tax benefit primarily related to adjustment of taxes previously provided on 2009 earnings of the corporation, of which \$18 million is an adjustment of a tax provision estimate related to a tax credit.

\$7 million of tax expense related to deferred tax adjustments, of which \$3 million related to a change in the law on the deductibility of benefits reimbursed under the Medicare Part D retiree prescription drug program.

The corporation's 2010 estimated annual effective tax rate increased from 25.7% to 39.3% primarily due to a one-time tax charge of \$118 million related to foreign earnings in that year that were no longer considered to be indefinitely reinvested. This tax charge was in connection with the company's decision, announced February 16, 2010, to no longer reinvest overseas earnings primarily attributable to existing overseas cash and the book value of the household and body care businesses. Herein after, this tax charge may also be referred to as the tax on unremitted earnings. This tax charge increased the estimated annual effective tax rate by approximately 14%. The portion of this tax charge recognized in the first nine months of 2010 was \$102 million, all of which was recognized in the third quarter. Additionally, for the same reasons as noted above, the first nine months of 2010 includes a \$416 million charge in discontinued operations.

The 2010 estimated annual effective tax rate also includes \$18 million of non-recurring tax benefits related to the utilization of United Kingdom net operating losses which lowered the estimated annual effective rate by approximately 2%. The portion of this tax benefit recognized in the first nine months of 2010 is \$16 million, of which \$4 million was recognized in the third quarter.

**Annual Effective Tax Rate**

The determination of the annual effective tax rate is based upon a number of significant estimates and judgments, including the estimated annual pretax income of the corporation in each tax jurisdiction in which it operates and the development of tax planning strategies during the year. In addition, as a global commercial enterprise, the corporation's tax expense can be impacted by changes in tax rates or laws, the finalization of tax audits and reviews, as well as other factors that cannot be predicted with certainty. As such, there can be significant volatility in interim tax provisions.

**Unrecognized Tax Benefits**

Each quarter, the corporation makes a determination of the tax liability needed for unrecognized tax benefits that should be recorded in the financial statements. For tax benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by the taxing authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement.

The year-to-date net increase in the liability for unrecognized tax benefits was \$92 million, resulting in an ending balance of \$459 million as of April 2, 2011. There was an increase in the gross liability for uncertain tax positions of \$153 million, of which \$107 million relates to 2011 increases, \$8 million relates to prior year increases, and \$38 million relates to unfavorable foreign currency exchange translation. This increase was offset by a decrease in the gross liability for uncertain tax positions of \$61 million, of which \$56 million relates to the expiration of statutes of limitation and \$5 million relates to audit settlements.

**Table of Contents**

At this time, the corporation estimates that it is reasonably possible that the liability for unrecognized tax benefits will decrease by up to \$25 million in the next twelve months from a variety of uncertain tax positions as a result of the completion of various worldwide tax audits currently in process and the expiration of statutes of limitations in several jurisdictions.

The corporation's tax returns are routinely audited by federal, state, and foreign tax authorities and these audits are at various stages of completion at any given time. The Internal Revenue Service (IRS) has completed examinations of the company's U.S. income tax returns through 2006. Fiscal years remaining open to examination in the Netherlands include 2003 and forward. Other foreign jurisdictions remain open to audits after 2000. With few exceptions, the company is no longer subject to state and local income tax examinations by tax authorities for years prior to 2005.

#### 11. Contingencies and Commitments

*Aris* This is a consolidation of cases filed by individual complainants with the Republic of the Philippines, Department of Labor and Employment and the National Labor Relations Commission (NLRC) from 1998 through July 1999. The complaint alleges unfair labor practices due to the termination of manufacturing operations in the Philippines by Aris Philippines, Inc. (Aris), a former subsidiary of the corporation. The complaint names the corporation as a party defendant. In 2006, an arbitrator ruled against the corporation and awarded the plaintiffs approximately \$80 million in damages and fees. This ruling was appealed by the corporation and subsequently set aside by the NLRC in December 2006. Both the complainants and the corporation have filed motions for reconsideration. The corporation continues to believe that the plaintiffs' claims are without merit; however, it is reasonably possible that this case will be ruled against the corporation and have a material adverse impact on the corporation's results of operations or cash flows. For further information, see Note 14 to the financial statements, Contingencies and Commitments, in the company's 2010 Annual Report.

*Hanesbrands Inc.* In September 2006, the corporation spun off its branded apparel business into an independent publicly-traded company named Hanesbrands Inc. (HBI). In connection with the spin off, the corporation and HBI entered into a tax sharing agreement that governs the allocation of tax assets and liabilities between the parties. HBI has initiated binding arbitration claiming that it is owed \$72 million from the corporation under the tax sharing agreement. The corporation believes HBI's claims are without merit and is vigorously contesting the matter. It is anticipated that the final decision by the arbitrator will occur in calendar 2011.

*Multi-Employer Pension Plans* The corporation participates in various multi-employer pension plans that provide retirement benefits to certain employees covered by collective bargaining agreements (MEPP). Participating employers in a MEPP are jointly responsible for any plan underfunding. MEPP contributions are established by the applicable collective bargaining agreements; however, the MEPPs may impose increased contribution rates and surcharges based on the funded status of the plan and the provisions of the Pension Protection Act, which requires substantially underfunded MEPPs to implement rehabilitation plans to improve funded status. Factors that could impact funded status of a MEPP include investment performance, changes in the participant demographics, financial stability of contributing employers and changes in actuarial assumptions.

In addition to regular contributions, the corporation could be obligated to pay additional contributions (known as a complete or partial withdrawal liability) if a MEPP has unfunded vested benefits. These withdrawal liabilities, which would be triggered if the corporation ceases to make contributions to a MEPP with respect to one or more collective bargaining units, would equal the corporation's proportionate share of the unfunded vested benefits based on the year in which the liability is triggered. The corporation believes that certain of the MEPPs in which it participates have unfunded vested benefits, and some are significantly underfunded. Withdrawal liability triggers could include the corporation's decision to close a plant or the dissolution of a collective bargaining unit. Due to uncertainty regarding future withdrawal liability triggers, we are unable to determine the amount and timing of the corporation's future withdrawal liability, if any, or whether the corporation's participation in these MEPPs could have any material adverse impact on its financial condition, results of operations or liquidity. Disagreements over potential withdrawal liability may lead to legal disputes.

**Table of Contents**

The corporation's regular scheduled contributions to MEPPs related to its continuing operations totaled approximately \$7 million in 2010, 2009 and 2008, respectively.

*Competition Law* During the past few years, competition authorities in various European countries and the European Commission have initiated investigations into the conduct of consumer products companies. These investigations usually continue for several years and, if violations are found, may result in substantial fines. In connection with these investigations, Sara Lee's household and body care business operating in Europe has received requests for information, made employees available for interviews, and been subjected to unannounced inspections by various competition authorities. Sara Lee has been imposed fines in three instances (a 4.0 million fine imposed by the Italian Cartel Authority in the second quarter of 2011; a 3.7 million fine imposed by the Spanish Competition Authorities in the second quarter of 2010; and a 5.5 million fine imposed by the German cartel authorities in February 2008), but no formal charges have been brought against Sara Lee concerning the substantive conduct that is the subject of these other investigations. Our practice is to comply with all laws and regulations applicable to our business, including the antitrust laws, and to cooperate with relevant regulatory authorities.

Charges for fines that already have been imposed against the corporation have been reflected in the Consolidated Statements of Income in the periods we were notified of the fines or it was probable that a loss was incurred. The total amount currently accrued for competition matters is 28 million, which represents an accrual for fines that have already been assessed and an estimate of additional fines that are probable of being imposed. Based on currently available information, it is reasonably possible the corporation may be subject to additional fines related to several of these investigations. Except for fines previously assessed or accrued by the corporation, we are unable to estimate the impact on our financial statements of additional fines, if any, that may be imposed against the corporation.

*Belgian tax matter* In 1997, the corporation sold a Belgian subsidiary to an unrelated third party. At the time of the sale, the Belgian subsidiary owed a Belgian tax liability of approximately 30 million (resulting from an intercompany restructuring completed before the 1997 sale) and the third party buyer assumed all assets and liabilities of the subsidiary. In 1999, the former Belgian subsidiary, then owned by the third party buyer, declared bankruptcy and did not pay the outstanding Belgian tax liability. In 2001, the Belgian Ministry of Finance launched an investigation into the 1997 sale. In November 2009, the corporation received from the Belgian state prosecutor a notice of intent to indict the third party buyer as well as several of the corporation's international subsidiaries and several current and former directors and officers of such subsidiaries, in connection with the 1997 sale. The notice alleges various tax-related legal violations, some of which carry criminal penalties. The corporation has agreed to a settlement with the Belgian authorities, which is subject to final approval by the Belgian Judiciary, and has deposited 32 million into an escrow account for Belgian taxes, interest and penalties.

*Nestec/Nespresso* In June 2010, Nestec/Nespresso (Nestle) filed a suit against Sara Lee Coffee and Tea France (SLCTF), a subsidiary of the corporation, alleging patent infringement related to Sara Lee's sale and distribution of espresso capsules. In addition, on January 19, 2011, Nestle filed a similar suit against Sara Lee Coffee and Tea in the Netherlands (SLCT) after SLCT began selling espresso capsules in that country. In the lawsuit filed in France, Nestle claims that damages could be as high as 50 million. The corporation believes Nestle's claims are without merit and is vigorously contesting the matter.

12. Subsequent events

On May 5, 2011, the corporation announced that it had entered into an agreement to acquire Aidells, a premium meat business in the U.S., for \$87 million. The acquisition is subject to customary closing conditions and regulatory approvals. In addition, the corporation announced that it is evaluating strategic options for its international bakery and North American refrigerated dough businesses.

**Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Introduction**

The following is management's discussion and analysis of the results of operations for the third quarter and first nine months of 2011 compared with the third quarter and first nine months of 2010 and a discussion of the changes in financial condition and liquidity during the first nine months of 2011. Below is an outline of the analyses included herein:

Business Overview

Summary of Results

Consolidated Results - Third Quarter and First Nine Months of 2011

Operating Results by Business Segment

Financial Condition

Liquidity

Significant Accounting Policies and Critical Estimates

Issued but not yet Effective Accounting Standards

Forward-Looking Information

**Business Overview**

**Our Business**

Sara Lee is a global manufacturer and marketer of high-quality, brand name products for consumers throughout the world focused primarily in the meat and beverage products categories. Our brands include *Ball Park*, *Douwe Egberts*, *Hillshire Farm*, *Jimmy Dean*, *Senseo* and our namesake, *Sara Lee*.

In North America, the company sells a variety of packaged meat products that include hot dogs, corn dogs, breakfast sausages, dinner sausages and deli meats as well as a variety of frozen baked products. These products are sold through the retail channel to supermarkets, warehouse clubs and national chains. The company also sells a variety of meat, bakery and beverage products to foodservice customers in North America. Internationally, the company sells coffee and tea products in Europe, Brazil, Australia and Asia through the retail and foodservice channels as well as a variety of bakery and dough products to retail and foodservice customers in Europe and Australia.

The results of the North American fresh bakery businesses and the international household and body care businesses, which were previously reported as separate business segments, are being reported as discontinued operations. See Note 4 - Discontinued Operations for additional

## Edgar Filing: Sara Lee Corp - Form 10-Q

information. Unless stated otherwise, any reference to income statement items in these financial statements refers to results from continuing operations.

In January 2011, the corporation announced that its board of directors has agreed in principle to divide the company into two separate, publicly traded companies which is expected to be completed in early calendar 2012. Under this plan, Sara Lee's North American Retail and North American Foodservice businesses (excluding the North American Beverage business) will be spun off, tax-free, into a new public company that will retain the Sara Lee name. The other company will consist of Sara Lee's current International Beverage and International Bakery businesses, as well as the North American beverage business. The separation plan is subject to final approval by the board of directors, other customary approvals and the receipt of an IRS tax ruling.

On May 5, 2011, the corporation announced that it had entered into an agreement to acquire Aidells, a premium meat business in the U.S., for \$87 million. The acquisition is subject to customary closing conditions and regulatory approvals. In addition, the corporation announced that it is evaluating strategic options for its international bakery and North American refrigerated dough businesses.

---

## Table of Contents

### Summary of Results

The business highlights include the following:

Net sales for the third quarter of \$2.2 billion were \$143 million higher than the prior year due to pricing actions, an improved sales mix, higher green coffee export sales and the favorable impact of changes in foreign currency exchange rates partially offset by the negative impact of volume declines.

Reported operating income for the third quarter of 2011 was \$213 million, a decrease of \$12 million over the same period of the prior year. The decrease was due to a decline in business segment results for North American Retail and International Beverage, which was caused by a significant increase in commodity costs, including \$28 million of foreign currency hedging losses related to raw material purchases. These declines were partially offset by a \$19 million decrease in general corporate expenses due to a reduction in information systems implementation costs and lower employee benefit costs; and a \$13 million year-over-year improvement in the mark-to-market gains/losses related to unrealized commodity derivatives.

Diluted earnings per share from continuing operations for the quarter increased from \$0.03 to \$0.22 due to the favorable impact of a \$114 million decrease in tax expense as the income from continuing operations before income taxes of \$197 million is unchanged from the prior year.

Total cash flow from operating activities of \$292 million for the first nine months of 2011 showed a decline of \$515 million over the prior year driven by an increase in cash used to fund certain working capital components, primarily inventories and other current assets, a decline in cash generated by discontinued operations and lower operating income from continuing operations. The cash used to fund inventories increased due in part to higher commodity costs. The cash flow from operating activities for discontinued operations declined \$145 million, due in large part to the impact of business dispositions, while adjusted operating income from continuing operations declined \$82 million.

### Challenges and Risks

As an international consumer products company, we face certain risks and challenges that impact our business and financial performance. The risks and challenges described below have impacted our performance and are likely to impact our future results as well.

The food businesses are highly competitive. In many product categories, we compete not only with widely advertised branded products, but also with private label products that are generally sold at lower prices. As a result, from time to time, we may need to reduce the prices for some of our products to respond to competitive pressures. In addition, the previous turmoil in the financial markets has led to general economic weakness, which has negatively impacted our business. The continued economic uncertainty may also result in increased pressure to reduce the prices for some of our products, limit our ability to increase or maintain prices or lead to a continued shift toward private label products. Any reduction in prices or our inability to increase prices could negatively impact profit margins and the overall profitability of our reporting units, which could potentially trigger a goodwill impairment.

Commodity prices directly impact our business because of their effect on the cost of raw materials used to make our products and the cost of inputs to manufacture, package and ship our products. In addition, under some of our contracts, the prices at which we sell our products are tied to increases and decreases in commodity costs. Many of the commodities we use, including coffee, wheat, beef, pork, corn, corn syrup, soybean and corn oils, butter, sugar and fuel, have experienced price volatility due to factors beyond our control. The company's objective is to offset commodity price increases with pricing actions and to offset any operating cost increases with continuous improvement savings. Commodity costs, excluding mark-to-market derivative gains/losses, increased by approximately \$400 million in the first nine months of 2011. This increase in commodity costs was partially offset by approximately \$250 million in pricing actions, resulting in a net unfavorable impact from commodities net of pricing of \$150 million in the first nine months of 2011.

---

## Table of Contents

The company's business results are also heavily influenced by changes in foreign currency exchange rates. For the most recently completed fiscal year, approximately half of the company's net sales and operating segment income were generated outside of the U.S. As a result, changes in foreign currency exchange rates, particularly the European euro, can have a significant impact on the reported results. Changes in foreign currency exchange rates decreased net sales by \$98 million and decreased operating income by \$17 million in the first nine months of 2011.

The company's international operations also provide a significant portion of the company's cash flow from operating activities, which is expected to require the company to continue to repatriate a significant portion of cash generated outside of the U.S. The repatriation of these funds has and is expected to continue to result in a higher effective income tax rate and cash tax payments.

## Non-GAAP Measures

Management measures and reports Sara Lee's financial results in accordance with U.S. generally accepted accounting principles (GAAP). In this report, Sara Lee highlights certain items that have significantly impacted the corporation's financial results and uses several non-GAAP financial measures to help investors understand the financial impact of these significant items. The non-GAAP financial measures used by Sara Lee in this report are adjusted net sales, adjusted operating segment income, and adjusted operating income, which exclude from a financial measure computed in accordance with GAAP the impact of significant items, the receipt of contingent sale proceeds, the impact of acquisitions and dispositions and changes in foreign currency exchange rates. Management believes that these non-GAAP financial measures reflect an additional way of viewing aspects of Sara Lee's business that, when viewed together with Sara Lee's financial results computed in accordance with GAAP, provide a more complete understanding of factors and trends affecting Sara Lee's historical financial performance and projected future operating results, greater transparency of underlying profit trends and greater comparability of results across periods. These non-GAAP financial measures are not intended to be a substitute for the comparable GAAP measures and should be read only in conjunction with our consolidated financial statements prepared in accordance with GAAP.

In addition, investors frequently have requested information from management regarding significant items and the impact of the contingent sale proceeds. Management believes, based on feedback it has received during earnings calls and discussions with investors, that these non-GAAP measures enhance investors' ability to assess Sara Lee's historical and project future financial performance. Management also uses certain of these non-GAAP financial measures, in conjunction with the GAAP financial measures, to understand, manage and evaluate our businesses, in planning for and forecasting financial results for future periods, and as one factor in determining achievement of incentive compensation. Two of the three performance measures under Sara Lee's annual incentive plan are net sales and operating income, which are the reported amounts as adjusted for significant items and possibly other items. Operating income, as adjusted for significant items, also may be used as a component of Sara Lee's long-term incentive plans. Many of the significant items will recur in future periods; however, the amount and frequency of each significant item varies from period to period. See Non-GAAP Measures Definitions at the back of this report for additional information regarding these financial measures.

## Significant Items Affecting Comparability

The reported results for 2011 and 2010 reflect amounts recognized for actions associated with the corporation's ongoing Project Accelerate and other significant amounts that impact comparability. More information on these costs can be found in Note 6 to the Consolidated Financial Statements, Exit, Disposal and Project Accelerate Activities. The nature of these items includes the following:

*Exit Activities, Asset and Business Dispositions* These costs are reported on a separate line of the Consolidated Statements of Income. Exit activities primarily relate to charges taken to recognize severance actions approved by the corporation's management and the exit of leased facilities or other contractual arrangements. Asset and business disposition activities include costs associated with separating businesses targeted for sale, as well as gains and losses associated with the disposition of asset groups that do not qualify for discontinued operations reporting.

## **Table of Contents**

The corporation is currently in the process of divesting the household and body care businesses but there is a significant amount of related overhead that is expected to remain after these businesses have been sold. The corporation has taken action to eliminate the majority of these costs but it is anticipated that approximately \$25 million to \$30 million will remain in our cost structure in 2011. The corporation estimates that the actions to eliminate this stranded overhead will result in charges of approximately \$125 to \$130 million in 2011, of which approximately \$60-65 million will be recognized in continuing operations. The corporation also estimates that an additional \$30 million of charges will be incurred in 2012.

*Project Accelerate Costs* These include costs associated with the transition of services to an outside third party vendor as part of a business process outsourcing initiative. The initiative includes the outsourcing of a portion of the North American and European finance processing functions, information systems application development and maintenance as well as indirect procurement activities. These costs are recognized in the Consolidated Statements of Income in Selling, general and administrative expenses or Cost of sales. Employee termination costs, lease exit costs and gains or losses on the disposition of assets or asset groupings that do not qualify as discontinued operations associated with these initiatives are reported as part of exit activities, asset and business dispositions.

For continuing operations, the incremental savings resulting from Project Accelerate and other restructuring actions were approximately \$60 million in the first nine months of 2011. The corporation anticipates annualized savings in 2011 of approximately \$225-\$235 million related to these actions, of which \$80-\$90 million is incremental to the \$145 million of cumulative Project Accelerate savings in 2010. The company expects Project Accelerate costs in fiscal 2011 to be approximately \$30 to \$35 million.

*Spin off related costs* As noted previously, the corporation announced that its board of directors has agreed in principle to divide the company into two separate, publicly traded companies. Spin off related costs include third party professional fees for consulting and other services that are directly related to the spin off. It also includes the costs of employees solely dedicated to activities directly related to the spin off.

*Other Significant Items* The reported results are also impacted by other items that affect comparability. These items include, but are not limited to, impairment charges, pension partial withdrawal liability charges, debt extinguishment costs, curtailment gains (losses) and certain discrete tax matters, which include charges related to the tax on unremitted earnings, audit settlements/reserve adjustments, valuation allowance adjustments and various other tax matters.

**Table of Contents****Consolidated Results Third Quarter of 2011 Compared with Third Quarter of 2010**

The following table summarizes net sales and operating income for the third quarter of 2011 and 2010 and certain items that affected the comparability of these amounts:

Total Corporation Performance (In millions)	Quarter ended			Percent Change
	Apr. 2, 2011	Mar. 27, 2010	Change	
Net sales	\$ 2,220	\$ 2,077	\$ 143	6.9%
Less: Increase / (decrease) in net sales from:				
Changes in foreign currency exchange rates	\$	\$ (8)	\$ 8	
Acquisition	13		13	
Adjusted net sales	\$ 2,207	\$ 2,085	\$ 122	5.8%
Operating income	\$ 213	\$ 225	\$ (12)	(6.0)%
Less: Increase / (decrease) in operating income from:				
Changes in foreign currency exchange rates	\$	\$ (2)	\$ 2	
Project Accelerate charges	(6)	(36)	30	
Spin off related costs	(10)		(10)	
International stranded overhead severance	(2)		(2)	
Pension curtailment gain		21	(21)	
Mexican tax indemnification		(15)	15	
Acquisition	1		1	
Adjusted operating income	\$ 230	\$ 257	\$ (27)	(10.5)%

*Net Sales*

Net sales increased by \$143 million or 6.9%. The strengthening of foreign currencies, particularly the Brazilian real and Australian dollar, increased reported net sales by \$8 million, or 0.5%. Adjusted net sales increased by \$122 million or 5.8% due to the impact of pricing actions taken to offset higher commodity costs, a favorable shift in sales mix and higher green coffee export sales, partially offset by the negative impact of a 3.3% decline in unit volumes.

The following table summarizes the components of the percentage change in net sales as compared to the prior year:

*Third Quarter 2011*

Net Sales Changes	Unit Volumes	+	Mix	+	Price	+	Other	+	Acquisitions/ (Divestitures)	+	Foreign Exchange	=	Net Sales Change
Total Continuing Business	(3.3)%		1.3%		6.1%		1.7%		0.6%		0.5%		6.9%

All volume data being reported excludes the impact of commodity hog volumes as the corporation has exited nearly all of its commodity hog contracts.

*Operating Income*

## Edgar Filing: Sara Lee Corp - Form 10-Q

Operating income decreased by \$12 million, or 6.0%. The year-over-year net impact of the changes in foreign currency exchange rates, Project Accelerate charges, and the other factors identified in the preceding table increased operating income by \$15 million. Adjusted operating income decreased \$27 million or 10.5% due to a decline in adjusted operating results for the international business segments, primarily International Beverage, partially offset by the favorable impact of a \$12 million decline in general corporate expenses and a \$13 million year-over-year improvement in the mark-to-market gains/losses related to unrealized commodity derivatives. The individual components that impacted operating income are discussed in more detail below.

**Table of Contents***Gross Margin*

Gross margin dollars in the third quarter of 2011 decreased \$45 million over the prior year due to higher commodity costs and lower unit volumes partially offset by pricing actions, savings from continuous improvement programs, and an improved sales mix. The gross margin percent decreased from 37.6% in the third quarter of 2010 to 33.1% in the third quarter of 2011 primarily due to the impact of higher commodity costs.

*Selling, General and Administrative Expenses*

(In millions)	Quarter ended			Percent Change
	Apr. 2, 2011	Mar. 27, 2010	Change	
<b>SG&amp;A expenses in the business segment results:</b>				
Media advertising and promotion	\$ 77	\$ 68	\$ 9	12.4%
Other	395	393	2	0.4
Total business segments	472	461	11	2.2
General corporate expenses	41	60	(19)	(31.9)
Mark-to-market derivative (gains) / losses	(3)	2	(5)	NM
Amortization of identifiable intangibles	8	8		5.5
Total SG&A Expenses	\$ 518	\$ 531	\$ (13)	(2.5)%

Selling, general and administrative (SG&A) expenses decreased by \$13 million, or 2.5%. Measured as a percent of sales, SG&A expenses decreased from 25.6% in 2010 to 23.3% in 2011. Changes in foreign currency exchange rates increased SG&A costs by \$5 million, or 0.9%. The remaining decrease in SG&A expenses was \$18 million, or 3.4%. SG&A expenses in the business segments increased by \$11 million, or 2.2%, due to a \$9 million increase in MAP spending and the impact of the reclassification of certain shipping and handling costs previously included in Cost of sales. General corporate expenses decreased \$19 million versus the prior year due to the impact of headcount reductions and lower employee benefit costs. The year-over-year change in the mark-to-market gains/losses related to unrealized commodity derivatives decreased SG&A expenses by \$5 million.

*Project Accelerate Actions, Impairment Charges, Exit Activities and Other Significant Items*

The reported results for the third quarter of 2011 and 2010 reflect amounts recognized for actions associated with the corporation's ongoing Project Accelerate business improvement and cost reduction program and other exit and disposal actions. The charge related to exit activities, asset and business dispositions was \$5 million in the third quarter of 2011 versus \$25 million in the third quarter of 2010. As discussed in Note 6 to the financial statements, Exit, Disposal and Accelerate Activities, the charges in 2011 and 2010 primarily relate to the planned termination of employees related to both European and North American operations as part of Project Accelerate.

*Net Interest Expense*

Net interest expense for the quarter was \$16 million, a decrease of \$12 million from the prior year due to a \$10 million decrease in interest expense and a \$2 million increase in interest income year-over-year. Interest expense for the quarter is lower than the prior year due to refinancing approximately \$800 million of debt at lower interest rates earlier in the fiscal year. For the year, net interest expense is expected to decline by approximately \$20 million as a result of this debt refinancing.

**Table of Contents***Income Tax Expense*

Note 10 to the Consolidated Financial Statements provides a detailed explanation of the determination of the interim tax provision.

The following table sets out the tax expense and effective tax rate for the corporation's continuing operations:

(In millions)	Third Quarter	
	2011	2010
Continuing operations		
Income before income taxes	\$ 197	\$ 197
Income tax expense	60	174
Effective tax rate	30.5%	88.1%

In the third quarter of 2011, the corporation recognized tax expense of \$60 million on pretax income from continuing operations of \$197 million, or an effective tax rate of 30.5%. The tax expense and related effective tax rate on continuing operations was determined by applying a 35.0% estimated annual effective tax rate to pretax earnings and then recognizing various discrete tax items, none of which were material individually or in the aggregate. The expected repatriation of a portion of 2011 earnings increases the 2011 estimated annual effective rate by 3%.

In the third quarter of 2010, the corporation recognized tax expense of \$174 million on pretax income from continuing operations of \$197 million, or an effective tax rate of 88.1%. The tax expense and related effective tax rate on continuing operations were impacted by recognizing \$22 million of discrete tax expense. See Note 10 to the Consolidated Financial Statements, *Income Taxes*, for additional information regarding the discrete tax items.

The corporation's 2010 estimated annual effective tax rate of 39.3% includes a one-time tax charge of \$118 million related to foreign earnings in that year that were no longer considered to be indefinitely reinvested. This tax charge was in connection with the company's decision in the third quarter of 2010 to no longer reinvest overseas earnings primarily attributable to existing overseas cash and the book value of the household and body care businesses. This tax charge increased the estimated annual effective tax rate by approximately 14%. The portion of this tax charge recognized in the third quarter of 2010 was \$102 million. A similar charge is also included in the results of discontinued operations.

The 2010 estimated annual effective tax rate also includes \$18 million of non-recurring tax benefits related to the utilization of United Kingdom net operating losses which lowered the estimated annual effective rate by approximately 2%. The portion of this tax benefit recognized in the third quarter of 2010 was \$4 million.

*Income from Continuing Operations and Diluted Earnings per Share (EPS)*

Income from continuing operations in the third quarter of 2011 was \$137 million, an increase of \$114 million over the comparable period of the prior year, due to a \$114 million decrease in income tax expense and a \$12 million decrease in net interest expense which offset a \$12 million decrease in operating income.

The net income from continuing operations attributable to Sara Lee, which excludes the results of noncontrolling interests, was \$137 million for the third quarter of 2011 and \$23 million for the third quarter of 2010.

Diluted EPS from continuing operations increased from \$0.03 in the third quarter of 2010 to \$0.22 in the third quarter of 2011. Diluted EPS were favorably impacted by lower average shares outstanding during the third quarter of 2011 than during the third quarter of 2010, as the average shares outstanding declined from 693 million to 609 million. The lower average shares outstanding are due to the corporation's share repurchase program.

**Table of Contents***Discontinued Operations*

The following is a summary of the operating results of the corporation's discontinued operations:

(In millions)	Third quarter 2011			Third quarter 2010		
	Net Sales	Pretax Income (Loss)	Net Income (Loss)	Net Sales	Pretax Income (Loss)	Net Income (Loss)
North American Fresh Bakery Businesses	\$ 491	\$ 21	\$ 14	\$ 501	\$ 3	\$ 5
International Household and Body Care Businesses	197	(29)	(24)	525	80	(362)
<b>Total</b>	<b>\$ 688</b>	<b>\$ (8)</b>	<b>\$ (10)</b>	<b>\$ 1,026</b>	<b>\$ 83</b>	<b>\$ (357)</b>

Net sales reported by discontinued operations were \$688 million in the third quarter of 2011, down 32.9% compared to the \$1,026 million of net sales in the prior year. Net sales related to the fresh bakery operations declined \$10 million as a result of the negative impact of lower unit volumes and a negative shift in sales mix partially offset by pricing actions. The household and body care sales declined \$328 million due to the impact of divestitures subsequent to the start of the third quarter of 2010, which reduced sales by \$348 million.

The increase in the fresh bakery pretax income was due to the positive impact of pricing actions, continuous improvement savings and the impact of the cessation of depreciation. Pretax income for fresh bakery was favorably impacted by approximately \$17 million of lower depreciation and amortization expense versus the prior year related to assets which are now classified as held for sale and as such are no longer subject to depreciation and amortization under the accounting rules. The household and body care pretax income declined by \$109 million due to the \$56 million impact of dispositions and the \$39 million license termination fee as well as \$14 million of exit and business disposition costs incurred in the current year.

The amounts reported in 2011 and 2010 for the fresh bakery businesses represent a full three months of results of operations for these businesses. The amounts reported in 2010 for the household and body care businesses represent a full three months of results of operations for these businesses, while the amounts in 2011 include less than a full three months of results due to the divestiture of the Australia/New Zealand bleach business in February 2011, the global body care and European detergents business in December 2010, the air care business in July 2010 and the Godrej Sara Lee joint venture in May 2010.

Gain on sale of discontinued operations—the corporation recognized a pretax gain of \$43 million and an after gain of \$29 million in the third quarter of 2011, which primarily relates to the disposition of the Australia/New Zealand bleach business in February 2011. Further details regarding these dispositions are included in Note 4 to the Consolidated Financial Statements, Discontinued Operations.

*Net Income and Diluted Earnings per Share (EPS)*

In the third quarter of 2011, the corporation reported net income of \$156 million versus a net loss of \$328 million in the comparable period of the prior year. The \$484 million increase in net income was due to a \$370 million increase in net income from discontinued operations and a \$114 million increase in income related to continuing operations. The year-over-year improvement in the results from discontinued operations was due to a \$438 million reduction in income tax expense related to the income from discontinued operations. The prior year's tax provision included a \$416 million tax charge related to the company's decision to no longer reinvest overseas earnings attributable overseas cash and the net assets of the household and body care businesses. The net income attributable to Sara Lee was \$153 million in the third quarter of 2011 compared to a net loss of \$336 million in the third quarter of 2010.

Diluted EPS increased from a loss of \$0.49 per share in the third quarter of 2010 to income of \$0.25 per share in the third quarter of 2011 due to the improvement in the results related to discontinued operations. Diluted EPS were also favorably impacted by lower average shares outstanding during the third quarter of 2011 than during the third quarter of 2010. The lower average shares are due to the corporation's share repurchase program.

**Table of Contents****Consolidated Results First Nine Months of 2011 Compared with First Nine Months of 2010**

The following table summarizes net sales and operating income for the first nine months of 2011 and 2010 and certain items that affected the comparability of these amounts:

Total Corporation Performance (In millions)	Nine Months ended			Percent Change
	Apr. 2, 2011	Mar. 27, 2010	Change	
Net sales	\$ 6,628	\$ 6,483	\$ 145	2.2%
Less: Increase / (decrease) in net sales from:				
Changes in foreign currency exchange rates	\$	\$ 98	\$ (98)	
Acquisition	16		16	
Adjusted net sales	\$ 6,612	\$ 6,385	\$ 227	3.5%
Operating income	\$ 589	\$ 806	\$ (217)	(27.0)%
Less: Increase / (decrease) in operating income from:				
Contingent sales proceeds	\$	\$ 133	\$ (133)	
Changes in foreign currency exchange rates		17	(17)	
Project Accelerate charges	(19)	(73)	54	
Spin off related costs	(10)		(10)	
International stranded overhead severance	(41)		(41)	
Pension curtailment gain		21	(21)	
Mexican tax indemnification		(15)	15	
Impairment charges		(17)	17	
Acquisition	1		1	
Adjusted operating income	\$ 658	\$ 740	\$ (82)	(11.1)%

*Net Sales*

Net sales increased by \$145 million or 2.2%. The weakening of foreign currencies, particularly the European euro decreased reported net sales by \$98 million, or 1.5%. Adjusted net sales increased by \$227 million or 3.5% due to the impact of pricing actions, a favorable shift in sales mix, and higher green coffee export sales, partially offset by the negative impact of a 3.9% decline in unit volumes.

The following table summarizes the components of the percentage change in net sales as compared to the prior year:

*First Nine Months 2011*

Net Sales Changes	Unit Volumes	+ Mix	+ Price	+ Other	Acquisitions/ + (Divestitures)	+ Foreign Exchange	= Net Sales Change
Total Continuing Business	(3.9)%	2.6%	3.8%	1.0%	0.2%	(1.5)%	2.2%

All volume data being reported excludes the impact of commodity hog volumes as the corporation has exited nearly all of its commodity hog contracts.

*Operating Income*

## Edgar Filing: Sara Lee Corp - Form 10-Q

Operating income decreased by \$217 million, or 27.0%. The year-over-year net impact of the changes in contingent sale proceeds, foreign currency exchange rates, Project Accelerate charges, and the other factors identified in the preceding table decreased operating income by \$135 million. Adjusted operating income decreased \$82 million or 11.1% due in part to the decline in adjusted operating results for the business segments, primarily in the North American Retail and International Beverage business segments partially offset by the favorable impact of a \$23 million improvement in unrealized commodity mark-to-market derivatives versus the prior year and a \$60 million decline in general corporate expenses. The individual components that impacted operating income are discussed in more detail below.

**Table of Contents***Gross Margin*

Gross margin dollars decreased \$161 million over the prior year due to higher commodity costs and lower unit volumes partially offset by pricing actions, savings from continuous improvement programs, and an improved sales mix. The gross margin percent decreased from 36.4% in 2010 to 33.2% in 2011 primarily due to the impact of higher commodity costs.

*Selling, General and Administrative Expenses*

(In millions)	Apr. 2, 2011	Nine Months ended Mar. 27, 2010	Change	Percent Change
<b>SG&amp;A expenses in the business segment results:</b>				
Media advertising and promotion	\$ 246	\$ 222	\$ 24	10.8%
Other	1,200	1,197	3	0.2
<b>Total business segments</b>	<b>1,446</b>	<b>1,419</b>	<b>27</b>	<b>1.9</b>
General corporate expenses	101	174	(73)	(42.2)
Mark-to-market derivative (gains) / losses	(7)	3	(10)	NM
Amortization of identifiable intangibles	24	24		(0.9)
<b>Total SG&amp;A Expenses</b>	<b>\$ 1,564</b>	<b>\$ 1,620</b>	<b>\$ (56)</b>	<b>(3.5)%</b>

Selling, general and administrative (SG&A) expenses decreased by \$56 million, or 3.5%. Measured as a percent of sales, SG&A expenses decreased from 25.0% in 2010 to 23.6% in 2011. Changes in foreign currency exchange rates decreased SG&A costs by \$28 million, or 1.7%. The remaining decrease in SG&A expenses is \$28 million, or 1.8%. SG&A expenses in the business segments increased by \$27 million, or 1.9%, due to a \$24 million increase in MAP spending and the impact of the reclassification of certain shipping and handling costs previously included in Cost of sales. General corporate expenses decreased \$73 million versus the prior year due to a reduction in information technology costs, the impact of headcount reductions, lower employee benefit costs and a gain on the disposition of the corporate airplane. The year-over-year change in the mark-to-market gains/losses related to unrealized commodity derivatives reduced SG&A expenses by \$10 million due to an improvement in derivative energy contracts.

*Project Accelerate Actions, Impairment Charges, Exit Activities and Other Significant Items*

The reported results for the first nine months of 2011 and 2010 reflect amounts recognized for actions associated with the corporation's ongoing Project Accelerate business improvement and cost reduction program and other exit and disposal actions. The charge related to exit activities, asset and business dispositions was \$48 million in the first nine months of 2011 versus \$52 million in the first nine months of 2010. As discussed in Note 6 to the financial statements, Exit, Disposal and Accelerate Activities, the charges in 2011 and 2010 primarily relate to the planned termination of employees related to both European and North American operations as part of Project Accelerate and the elimination of stranded overhead.

*Receipt of Contingent Sale Proceeds*

The corporation sold its European cut tobacco business in 1999. Under the terms of that agreement, the corporation received an annual cash payment of 95 million euros. The 2010 annual payment, which represented the final payment to be received, was equivalent to \$133 million based upon the exchange rate on the date of receipt. The amount received in 2010 increased diluted earnings per share by \$0.18 per share in the first nine months and by \$0.19 per share for the full year.

*Net Interest Expense*

Net interest expense in the first nine months of 2011 was \$65 million, which was \$19 million lower than the first nine months of the prior year due to a \$16 million decrease in interest expense and a \$3 million increase in interest income year-over-year. The decline in interest expense in the first nine months was

**Table of Contents**

the result of refinancing approximately \$800 million of debt at lower interest rates earlier in the fiscal year. For the full year, net interest expense is expected to decline by approximately \$20 million as a result of this debt refinancing.

*Debt Extinguishment Costs*

In 2011, the corporation redeemed its \$1.1 billion 6 1/4 % Notes due September 15, 2011 and recognized a \$55 million charge associated with the early extinguishment of this debt. See Note 5 Debt Issuances and Redemptions for additional information.

*Income Tax Expense*

Note 10 to the Consolidated Financial Statements provides a detailed explanation of the determination of the interim tax provision.

The following table sets out the tax expense and effective tax rate for the corporation's continuing operations:

(In millions)	First Nine Months	
	2011	2010
Continuing operations		
Income before income taxes	\$ 469	\$ 722
Income tax expense	155	217
Effective tax rate	33.0%	30.0%

In the first nine months of 2011, the corporation recognized tax expense of \$155 million on pretax income from continuing operations of \$469 million, or an effective tax rate of 33.0%. The tax expense and related effective tax rate on continuing operations was determined by applying a 35.0% estimated annual effective tax rate to pretax earnings and then recognizing various discrete tax items, none of which were material individually or in the aggregate. The expected repatriation of a portion of 2011 earnings increases the 2011 estimated annual effective rate by 3%.

In the first nine months of 2010, the corporation recognized tax expense of \$217 million on pretax income from continuing operations of \$722 million, or an effective tax rate of 30.0%. The tax expense and related effective tax rate on continuing operations was determined by applying a 39.3% estimated annual effective tax rate to pretax earnings and then recognizing \$67 million of discrete tax benefits. See Note 10 to the Consolidated Financial Statements, Income Taxes, for additional information regarding the discrete tax items.

The corporation's 2010 estimated annual effective tax rate of 39.3% includes the impact of a one-time tax charge of \$118 million related to 2010 foreign earnings that are no longer indefinitely reinvested. This tax charge is in connection with the company's third quarter 2010 decision, announced February 16, 2010, to no longer reinvest overseas earnings primarily attributable to existing overseas cash and the book value of the household and body care businesses. This tax charge increased the estimated annual effective tax rate by approximately 14%. The portion of this tax charge recognized in the first nine months of 2010 is \$102 million. A similar charge is also included in discontinued operations. Any future gains that may be recognized on the sale of the household and body care businesses will result in an additional tax charge in discontinued operations on the deemed repatriation of such gains.

The 2010 estimated annual effective tax rate also includes \$18 million of non-recurring tax benefits related to the utilization of United Kingdom net operating losses which lowered the estimated annual effective rate by approximately 2%. The portion of this tax benefit recognized in the first nine months of 2010 is \$16 million.

**Table of Contents***Income from Continuing Operations and Diluted Earnings per Share (EPS)*

Income from continuing operations in the first nine months of 2011 was \$314 million, a decrease of \$191 million over the comparable period of the prior year, due to a \$217 million decrease in operating income, a \$55 million charge for debt extinguishment costs partially offset by a \$62 million decrease in income tax expense and a \$19 million decrease in net interest expense.

The net income from continuing operations attributable to Sara Lee, which excludes the results of noncontrolling interests, was \$314 million for the first nine months of 2011 and \$505 million for the first nine months of 2010.

Diluted EPS from continuing operations decreased from \$0.72 in the first nine months of 2010 to \$0.49 in the first nine months of 2011 due to the decline in income noted above. Diluted EPS were favorably impacted by lower average shares outstanding during the first nine months of 2011 than during the first nine months of 2010, as the average shares outstanding declined from 697 million to 635 million. The lower average shares outstanding are due to the corporation's share repurchase program.

*Discontinued Operations*

The following is a summary of the operating results of the corporation's discontinued operations:

(In millions)	First Nine Months 2011			First Nine Months 2010		
	Net Sales	Pretax Income	Net Income (loss)	Net Sales	Pretax Income	Net Income (Loss)
North American Fresh Bakery Businesses	\$ 1,494	\$ 20	\$ 242	\$ 1,541	\$ 26	\$ 19
International Household and Body Care Businesses	970	52	19	1,611	209	(195)
<b>Total</b>	<b>\$ 2,464</b>	<b>\$ 72</b>	<b>\$ 261</b>	<b>\$ 3,152</b>	<b>\$ 235</b>	<b>\$ (176)</b>

Net sales reported by discontinued operations were \$2.5 billion in the first nine months of 2011, down 21.8% compared to the \$3.2 billion of net sales in the prior year. Net sales related to the fresh bakery operations declined \$47 million as a result of lower unit volumes and the negative impact of pricing actions. The household and body care sales declined \$641 million due to the impact of divestitures subsequent to the beginning of 2010, which reduced sales by \$643 million.

The decline in the fresh bakery pretax income was due to the negative impact of pricing actions and lower unit volumes, partially offset by continuous improvement savings, and the impact of the cessation of depreciation. Pretax income for fresh bakery was favorably impacted by approximately \$30 million of lower depreciation and amortization expense versus the prior year related to assets which are now classified as held for sale and as such are no longer subject to depreciation and amortization under the accounting rules. The household and body care pretax income declined by \$157 million due to a \$102 million impact of dispositions, \$55 million of charges related to exit and business disposition activities and a \$39 million license termination fee.

The North American fresh bakery businesses reported a \$227 million income tax benefit in the first nine months of 2011 associated with the excess tax basis related to these assets. This excess tax basis gives rise to a deferred tax asset, which will reverse upon the finalization of the sale of this business. In the first nine months of 2010, the international household and body care businesses reported tax expense of \$404 million. The net tax expense resulted from the recognition of the following significant tax amounts: (i) a \$416 million tax charge related to the company's third quarter decision to no longer reinvest overseas earnings attributable to overseas cash and the net assets of the household and body care businesses; (ii) a \$53 million net tax benefit related to the reversal of a tax valuation allowance on United Kingdom net operating loss carryforwards as a result of the anticipated gain from the disposition of the household and body care businesses in that country; and (iii) a \$27 million tax benefit related to the anticipated utilization of U.S. capital loss carryforwards available to offset the capital gain resulting from the household and body care business disposition.

**Table of Contents**

The amounts reported in 2011 and 2010 for the fresh bakery businesses represent a full nine months of results of operations for these businesses. The amounts reported in 2010 represent a full nine months of results of operations for the household and body care businesses, while the amounts in 2011 include less than a full nine months of results for these businesses due to the divestiture of the Australia/New Zealand bleach business in February 2011, the global body care and European detergents business in December 2010, the air care business in July 2010 and the Godrej Sara Lee joint venture in May 2010.

**Gain on sale of discontinued operations** As noted above, the corporation completed the dispositions of its global body care and European detergents, air care businesses, and Australia/New Zealand bleach business which had been part of the international household and body care businesses during 2011. It recognized a pretax gain of \$1.2 billion and an after tax gain of \$608 million on the dispositions. Further details regarding these dispositions are also included in Note 4 to the Consolidated Financial Statements, Discontinued Operations.

*Net Income and Diluted Earnings per Share (EPS)*

In the first nine months of 2011, the corporation reported net income of \$1.183 billion versus \$335 million in the comparable period of the prior year. The \$848 million increase in net income was due to a \$1.039 billion increase in net income from discontinued operations partially offset by a \$191 million decrease in income related to continuing operations. The increase in net income from discontinued operations was due to a \$608 million gain on the disposition of businesses in the current year and a \$437 million increase in income from discontinued operations, due in large part to a year-over-year reduction in income tax expense. The decline in income from continuing operations was due in part to the cessation of the contingent sale proceeds (\$133 million in 2010) and a decline in operating segment income. The net income attributable to Sara Lee was \$1.176 billion in the first nine months of 2011 compared to \$319 million in the first nine months of 2010.

Diluted EPS increased from \$0.46 per share in the first nine months of 2010 to \$1.85 per share in the first nine months of 2011. Diluted EPS were favorably impacted by lower average shares outstanding during the first nine months of 2011 than during the first nine months of 2010. The lower average shares are due to the corporation's share repurchase program.

**Table of Contents****Operating Results by Business Segment**

The results of the corporation's household and body care and North American Fresh Bakery businesses, which were previously reported as separate business segments, are being reported as discontinued operations. See Note 4 – Discontinued Operations for additional information.

Net sales by business segment for the third quarter and first nine months of 2011 and 2010 are as follows:

(In millions)	Net Sales			
	Quarter ended		Nine Months ended	
	Apr. 2, 2011	Mar. 27, 2010	Apr. 2, 2011	Mar. 27, 2010
North American Retail	\$ 681	\$ 672	\$ 2,142	\$ 2,076
North American Foodservice	448	427	1,410	1,413
International Beverage	925	799	2,552	2,417
International Bakery	173	186	544	601
Total business segments	2,227	2,084	6,648	6,507
Intersegment sales	(7)	(7)	(20)	(24)
Net sales	\$ 2,220	\$ 2,077	\$ 6,628	\$ 6,483

Income from continuing operations before income taxes for the third quarter and first nine months of 2011 and 2010 are as follows:

(In millions)	Income from Continuing Operations before Income Taxes			
	Quarter ended		Nine Months ended	
	Apr. 2, 2011	Mar. 27, 2010	Apr. 2, 2011	Mar. 27, 2010

**Table of Contents**

The following tables summarize the net sales and operating segment income for each of the business segments for 2011 and 2010 and certain items that affected the comparability of these amounts:

**North American Retail**

(In millions)	Quarter ended				Nine Months ended			
	Apr. 2, 2011	Mar. 27, 2010	Change	Percent Change	Apr. 2, 2011	Mar. 27, 2010	Change	Percent Change
Net Sales	\$ 681	\$ 672	\$ 9	1.2%	\$ 2,142	\$ 2,076	\$ 66	3.1%
Adjusted Net Sales	\$ 681	\$ 672	\$ 9	1.2%	\$ 2,142	\$ 2,076	\$ 66	3.1%
Operating segment income	\$ 85	\$ 101	\$ (16)	(16.1)%	\$ 236	\$ 303	\$ (67)	(22.1)%
Less: Increase/(decrease) in operating segment income from								
Project Accelerate charges	\$ (1)	\$	\$ (1)		\$ (2)	\$ (3)	\$ 1	
Curtaiment gain		7	(7)			7	(7)	
Adjusted operating segment income	\$ 86	\$ 94	\$ (8)	(7.8)%	\$ 238	\$ 299	\$ (61)	(20.3)%
Gross margin %	31.7%	35.0%		(3.3)%	30.9%	34.5%		(3.6)%

**Third quarter**

Net sales increased by \$9 million, or 1.2%. Sales increased as a result of pricing actions and an improved sales mix partially offset by lower unit volumes. Unit volumes decreased 7.0% due to volume declines for frozen bakery products, smoked sausage, hot dogs and deli meats which offset higher volumes for breakfast sandwiches and lunchmeats. Pricing actions, net of trade promotions, increased net sales by 6.1%. The improved sales mix was driven in part by the sale of innovative new products in the breakfast and lunchmeat categories.

Operating segment income decreased by \$16 million, or 16.1%. The net impact of the change in the curtaiment gain and Project Accelerate charges decreased operating segment income by \$8 million. Adjusted operating segment income decreased by \$8 million, or 7.8% versus very strong third quarter results in the prior year. The decrease in operating segment income was due to the significant increase in commodity cost, lower unit volumes and higher costs related to the implementation of new information systems and start up costs related to the new Kansas City meat plant. These declines in operating segment income were partially offset by pricing actions, an improved sales mix, savings from continuous improvement programs and lower MAP spending.

**First Nine Months**

Net sales increased by \$66 million, or 3.1%. Sales increased as a result of pricing actions and an improved sales mix, which offset lower unit volumes. Unit volumes decreased 2.7% due to volume declines for frozen bakery products, hot dogs and smoked sausage partially offset by higher volumes for breakfast sandwiches, breakfast sausages and lunchmeats. Pricing actions, net of trade promotions, increased net sales by 4.5%. The improved sales mix was driven in part by the sale of innovative new products in the breakfast and lunchmeat categories.

Operating segment income decreased by \$67 million, or 22.1%, while adjusted operating segment income decreased by \$61 million, or 20.3%. The decrease in operating segment income was due to a significant increase in commodity costs net of pricing actions, higher costs related to the implementation of new information systems and the new Kansas City meat plant, lower unit volumes and higher MAP spending, partially offset by an improved sales mix and savings from continuous improvement programs.

**Table of Contents****North American Foodservice**

(In millions)	Quarter ended			Percent Change	Nine Months ended			Percent Change
	Apr. 2, 2011	Mar. 27, 2010	Change		Apr. 2, 2011	Mar. 27, 2010	Change

**Third quarter**

Net sales increased by \$21 million, or 5.0%, while adjusted net sales increased by 4.9%. The net sales increase was due to price increases in response to increases in commodity costs and an improved sales mix partially offset by unit volume declines for bakery and beverage products. The pricing actions increased sales by 10.8%. Overall, net unit volumes declined 6.9% due to demand softness resulting from the continued weak economic conditions and the loss of certain contracts. A decline in bakery volumes was due primarily to the loss of a high volume, low margin pizza dough contract. Beverage volumes are down due to declines in roast and ground and coffee concentrates. The decline in coffee concentrates is due to the loss of a high margin liquid coffee concentrate contract, which will have a negative impact on sales and operating segment income for the remainder of the year. Meat volumes increased during the quarter, driven in part by growth in breakfast sausage.

Operating segment income increased by \$7 million, or 31.6%, while adjusted operating segment income increased by \$7 million, or 27.3%. The increase was due to pricing actions, which were able to offset the significant increase in commodity costs, continuous improvement savings and a favorable shift in sales mix partially offset by lower unit volumes, including the loss of the liquid coffee business noted above.

**First Nine Months**

Net sales decreased by \$3 million, or 0.2%, while adjusted net sales decreased by \$4 million, or 0.3%. The net sales decrease was due to unit volume declines for bakery and beverage products partially offset by the impact of price increases in response to an increase in commodity costs and an improved sales mix. The pricing actions increased sales by 6.7%. Overall, net unit volumes declined 14.1% due to demand softness resulting from the continued weak economic conditions and the loss of certain contracts. The decline in bakery volumes was due primarily to the loss of a high volume, low margin pizza dough contract and volume softness in store brand bakery products. Beverage volumes are down due to declines in roast and ground and coffee concentrates. The decline in coffee concentrates is due to the loss of a high margin liquid coffee concentrate contract, which will have a negative impact on sales and operating segment income for the remainder of the year. Meat volumes increased during the period, driven in part by growth in breakfast sausage.

Operating segment income increased by \$12 million, or 11.4%. The net impact of the change in impairment charges, Project Accelerate charges and a curtailment gain increased operating segment income by \$13 million. Adjusted operating segment income decreased by \$1 million, or 1.1%, as the negative impact of higher commodity costs and lower unit volumes, which included the loss of the liquid coffee business noted

above, were effectively offset by pricing actions, a favorable shift in sales mix and continuous improvement savings.

**Third quarter**

Net sales increased by \$126 million, or 15.7%. The impact of foreign currency changes, particularly in the Brazilian real and Australian dollar, increased reported net sales by \$7 million, while acquisitions subsequent to the start of the third quarter of the prior year increased net sales by \$13 million. Adjusted net sales increased by \$106 million, or 13.2%. The increase was due to pricing actions, which included increased trade promotion activity, higher green coffee export sales, an improved sales mix and an increase in unit volumes. Pricing actions increased net sales by 5.9%. Unit volumes increased 1.0% due to volume growth in the retail channel partially offset by a decline in foodservice volumes. Retail unit volumes were higher as a result of volume growth in the Asian region, while volumes in Europe and Brazil remained virtually unchanged. Slight unit volume declines in traditional roast and ground, due in part to competitive pressures from private label and hard discounters as well as weak economic conditions throughout Europe, and coffee concentrates were offset by volume increases in single serve coffee in France and instant coffee. Unit volumes in the foodservice channel decreased due to declines in Europe.

Operating segment income decreased by \$39 million, or 22.6%. Changes in foreign currency exchange rates, Project Accelerate charges, stranded overhead severance and acquisitions increased operating segment income by \$6 million. Adjusted operating segment income decreased by \$45 million, or 25.1% due to the negative impact of substantially higher commodity costs, the negative impact of \$28 million of foreign currency hedging losses related to raw material purchases and higher MAP spending, which were only partially offset by price increases and the impact of a favorable shift in sales mix.

**First Nine Months**

Net sales increased by \$135 million, or 5.6%. The impact of foreign currency changes, particularly in the European euro, decreased reported net sales by \$75 million, while acquisitions subsequent to the start of the prior year increased net sales by \$16 million. Adjusted net sales increased by \$194 million, or 8.3%. The increase was due to pricing actions, which included increased trade promotion activity, higher green coffee export sales, an improved sales mix and an increase in unit volumes. Pricing actions increased net sales by 3.3%. Unit volumes increased 0.4% due to unit volume increase in both retail and foodservice channels. Retail volumes in Europe decreased due to volume declines in traditional roast and ground due in part to competitive pressures from private label and hard discounters as well as weak economic conditions throughout Europe,

which was partially offset by increases in single serve coffee volumes in

**Table of Contents**

France and an increase in instants. The volume declines in Europe were partially offset by improved volumes in Brazil and the Asian region. Unit volumes in the foodservice channel increased due to volume growth in Australia as unit volumes in Europe remained virtually unchanged.

Operating segment income decreased by \$135 million, or 28.9%. Changes in foreign currency exchange rates decreased operating segment income by \$17 million, while Project Accelerate charges, stranded overhead severance and acquisitions decreased operating segment income by \$31 million. Adjusted operating segment income decreased by \$87 million, or 18.9% due to the negative impact of \$61 million of foreign currency hedging losses related to raw material purchases, higher commodity costs and higher MAP spending, which were only partially offset by the impact of pricing actions and a favorable shift in sales mix.

**Third quarter**

Net sales decreased by \$13 million, or 6.6%. The impact of foreign currency changes, particularly in the Australian dollar, increased reported net sales by \$1 million. Adjusted net sales decreased \$14 million, or 7.1% due to the negative impact of price reductions in response to competitive pressures, which decreased net sales by 4.1% and lower unit volumes. Net unit volumes decreased 3.1% due to a decline in fresh bread volumes in Spain, as a result of a reduction in branded sales due in part to economic and competitive pressures, as well as a decline in refrigerated dough volumes in Europe and volume declines in Australia.

Operating segment income increased by \$4 million. The net change in Project Accelerate charges and business disposition costs increased operating segment income by \$10 million. Adjusted operating segment income decreased by \$6 million, or 75.7% due to the negative impact of pricing actions, higher commodity costs, lower unit volumes, and an unfavorable sales mix shift to lower margin products partially offset by continuous improvement savings.

**First Nine Months**

Net sales decreased by \$57 million, or 9.4%. The impact of foreign currency changes, particularly in the European euro, decreased reported net sales by \$24 million. Adjusted net sales decreased \$33 million, or 5.7% due to the negative impact of price reductions in response to competitive pressures, which decreased net sales by 3.4% and lower unit volumes. Unit volumes decreased 2.9% due to a decline in

**Table of Contents**

fresh bread volumes in Spain, as a result of a reduction in branded sales due in part to economic and competitive pressures and volume declines in Australia. These volume declines were partially offset by increased refrigerated dough volumes in Europe.

Operating segment income increased by \$12 million. The net change in foreign currency exchange rates, business disposition costs, Project Accelerate charges, and impairment charges increased operating segment income by \$28 million. Adjusted operating segment income decreased by \$16 million, or 51.6% due to the negative impact of pricing actions, lower unit volumes, and an unfavorable sales mix shift to lower margin products partially offset by continuous improvement savings.

**Financial Condition**

The Consolidated Statements of Cash Flows include amounts related to discontinued operations. The discontinued operations had a significant impact on the cash flows from operating activities for the first nine months of 2011 and 2010. See Note 4 [Discontinued Operations](#) for additional information regarding cash flows related to discontinued operations.

*Cash from Operating Activities*

The cash from operating activities generated by continuing and discontinued operations in the first nine months of 2011 and 2010 is summarized in the following table.

(In millions)	Nine Months ended	
	Apr. 2, 2011	Mar. 27, 2010
Cash from Operating Activities:		
Continuing Operations	\$ 125	\$ 495
Discontinued Operations	167	312
Total	\$ 292	\$ 807

The decrease in cash from operating activities of \$515 million over the prior year was due to an increased use of cash related to certain components of working capital, a decline in cash contributed by discontinued operations and a decline in operating income. Improvements in working capital related to accounts receivable, due to better working capital management, were offset by an increase in inventories, due in part to higher commodity costs, and an increase in other current assets related to mark-to-market gains on derivative transactions and amounts due under transition services agreements. The cash contributed by discontinued operations declined by \$145 million due to the impact of the completion of the recent business dispositions. The cash generated from operations was also negatively impacted by the decline in adjusted operating income, which was \$82 million lower than the prior year. Cash from operating activities was positively impacted by a \$25 million reduction in cash paid for restructuring actions and a \$22 million reduction in taxes paid, which was partially offset by a \$15 million increase in cash contributions to the company's defined benefit pension plans.

*Cash used in Investing Activities*

The cash provided by investing activities was \$1.980 billion in the first nine months of 2011, which was \$1.993 billion more than the comparable period of 2010. The increase in cash provided by investment activities was due to the receipt of \$2.182 billion of cash related to the disposition of the household and body care businesses. This increased source of cash was partially offset by a \$133 million reduction in cash received from contingent sale proceeds as the amount received in 2010 represented the final payment to be received. During the current year, the corporation expended \$32 million to acquire a coffee company in Brazil, while in the prior year, the corporation did not make any acquisitions. The cash received from derivative transactions increased by \$11 million in 2011 due primarily to an increase in cash received on the settlement of foreign exchange derivative contracts. Capital expenditures for the purchases of property, equipment, software and other intangibles increased by \$26 million in 2011 from \$226 million in 2010 to \$252 million in 2011 due to continued expenditures for the new Kansas City meat plant.

---

**Table of Contents***Cash used in Financing Activities*

Net cash used in financing activities was \$1.347 billion during the first nine months of 2011, which was \$586 million higher than the prior year period. The year-over-year increase was due to \$1.313 billion of cash expended for share repurchases. The increased use of cash was partially offset by a \$194 million increase in borrowings of debt, net of repayments. In the first nine months of 2011, the corporation had net borrowings of \$163 million of short-term and long-term debt as compared to net repayments of \$31 million during the first nine months of the prior year. The amount of borrowings and repayments in 2011 were impacted by significant debt issuances and redemptions. Further details regarding these transactions are included in Note 5 to the Consolidated Financial Statements, Debt Issuances and Redemptions. The cash dividends paid decreased by \$15 million in 2011 due to the impact of the share repurchases noted above.

**Liquidity***Notes Payable/Cash and Equivalents*

The notes payable balance at April 2, 2011 of \$605 million was \$558 million higher than the amount reported at July 3, 2010. The higher debt levels were used to fund increased working capital and other short term cash needs in the U.S. and Brazil. The corporation had cash and cash equivalents on the balance sheet at April 2, 2011 of \$2.132 billion, which was \$1.177 billion higher than the balance at July 3, 2010, due primarily to the cash proceeds received from the disposition of several household and body care businesses.

*Anticipated Business Dispositions/Use of Proceeds*

Sara Lee has made substantial progress toward divesting its International household and body care businesses. The company closed transactions for the divestiture of the majority of its air care business to Procter & Gamble and the global body care and European detergents business to Unilever for approximately \$2 billion in the first half of 2011. The company has closed on the sale of its Australia/New Zealand bleach business for \$37.9 million on February 7, 2011. The company has also announced the divestitures of the non-Indian insecticides business (\$153.5 million) and the global shoe care business (\$245 million) to SC Johnson. The divestiture of the majority of the shoe care business closed on April 4, 2011. The divestitures of the non-Indian insecticides business is expected to close in the second half of calendar 2011, subject to customary closing conditions and regulatory clearances. Sara Lee received a deposit of \$149 million on the sale of the non-Indian insecticide business. The deposit was recognized as unrestricted cash, with an offsetting liability to the buyer until the deal closes. Sara Lee has now sold or announced the sale of all material parts of the international household and body care operations. The corporation estimates it will incur transaction taxes of approximately 15% and repatriation taxes of approximately 20% of the gross proceeds. In addition, the corporation reaffirms that the tax on repatriating overseas cash and the book value of the household and body care businesses in the third quarter of 2010 will not exceed 25%.

During 2010, Sara Lee announced a revised capital plan that focuses on share repurchase, dividend pay-out and the funded status of the company's pension plans, while maintaining a solid investment grade credit profile.

As part of this capital plan, the company planned to buy back \$2.5 to \$3 billion of shares of its common stock over a three-year period. Sara Lee bought back approximately 36 million shares of common stock through an accelerated share repurchase (ASR) program begun in March 2010 and completed in the first quarter of 2011 at a total cost of \$513 million, of which \$500 million was paid in 2010 and an additional \$13 million was paid in the first quarter of 2011 as a final settlement. The company also repurchased 80.2 million shares of common stock at a cost of \$1.3 billion in the first nine months of 2011, which satisfies its commitment to repurchase a total of \$1.0 to \$1.5 billion of shares during fiscal 2011. As of April 2, 2011, approximately \$1.2 billion remains authorized for share repurchase by the board of directors, in addition to the 13.5 million share authorization remaining under the prior share repurchase program. However, the corporation does not expect to continue with any further share repurchases.

## Table of Contents

Sara Lee indicated its intention to maintain and gradually increase the corporation's dividend. In October 2010, Sara Lee's board of directors announced that it had increased the corporation's dividend from \$0.44 per share to \$0.46 per share on an annualized basis. In addition, the corporation announced on January 28, 2011, its intention to declare a \$3.00 per share special dividend, the majority of which will be funded with the proceeds from the sale of the company's North American fresh bakery business. The special dividend is expected to be declared and paid in fiscal 2012. After the payment of the special dividend in fiscal 2012, the corporation will have returned a total of \$3.5 billion of capital to its shareholders since the revised capital plan was announced.

The company made a \$200 million voluntary cash contribution to the company's pension plans in the fourth quarter of fiscal 2010 as part of its announced capital plan.

### *Credit Facility and Credit Ratings*

The corporation has a \$1.85 billion five-year revolving credit facility available that management considers sufficient to satisfy its operating requirements. This facility expires in December 2011 and the pricing under this facility is based upon the corporation's current credit rating. The corporation currently intends to extend this credit facility beyond its current maturity date. At April 2, 2011, the corporation did not have any borrowings outstanding under the credit facility but it did have approximately \$150 million of letters of credit outstanding under this credit facility. The facility does not mature or terminate upon a credit rating downgrade.

The corporation's credit ratings by Standard & Poor's, Moody's Investors Service and FitchRatings, as of April 2, 2011, were as follows:

	<b>Senior</b>		
	<b>Unsecured</b>	<b>Short-term</b>	<b>Outlook</b>
	<b>Obligations</b>	<b>Borrowings</b>	
Standard & Poor's	BBB	A-2	Stable
Moody's Investors Service	Baa1	P-2	Negative
FitchRatings	BBB	F-2	Stable

In January 2011, Moody's Investor Services placed the company's long-term rating under review for possible downgrade, likely limited to one notch. It also affirmed the company's P-2 rating on short-term borrowings.

Changes in the corporation's credit ratings result in changes in the corporation's borrowing costs. The corporation's current short-term credit rating allows it to participate in a commercial paper market that has a number of potential investors and a higher degree of liquidity. A downgrade of the corporation's short-term credit rating would place the corporation in a commercial paper market that would contain significantly less market liquidity than it currently operates in with a rating of A-2, P-2 or F-2. This would reduce the amount of commercial paper the corporation could issue and raise its commercial paper borrowing cost. To the extent that the corporation's operating requirements were to exceed its ability to issue commercial paper following a downgrade of its short-term credit rating, the corporation has the ability to use available credit facilities to satisfy operating requirements, if necessary.

### *Debt*

The corporation's total long-term debt decreased \$235 million in the first nine months of 2011, from \$2.6 billion at July 3, 2010, to \$2.4 billion at April 2, 2011. During the first nine months of 2011, the corporation repaid \$1.352 billion of debt and borrowed approximately \$1.032 billion of long-term debt. See below for additional information regarding the new borrowings and redemptions.

The corporation's total long-term debt is due to be repaid as follows: nil in the remainder of 2011; \$462 million in 2012; \$520 million in 2013; \$20 million in 2014; \$75 million in 2015; \$404 million in 2016 and \$913 million thereafter. These maturing debt obligations are expected to be satisfied with a combination of new long-term debt issuances, short-term borrowings, cash on hand, and operating cash flows.

On September 7, 2010, the corporation completed a tender offer for any and all of its 6 1/4 % Notes due September 15, 2011, of which \$1.11 billion aggregate principal amount was outstanding. At the time of expiration of the tender offer, \$653.3 million of the 6 1/4% notes had been validly tendered. The

---

## **Table of Contents**

corporation redeemed the remaining \$456.7 million of aggregate principal outstanding of the 6 1/4% Notes on October 8, 2010. The corporation recognized a \$55 million charge associated with the early extinguishment of this debt, which is reported on the Debt extinguishment costs line of the Consolidated Income Statement. For the year, net interest expense is expected to decline approximately \$20 million primarily as a result of the net impact of the debt refinancing.

The company funded a portion of the redemption of the 6 1/4% Notes with the proceeds from the sale of \$400 million 2.75% Notes due in September 2015 and \$400 million 4.1% Notes due in September 2020. The redemption of the remaining portion of the 6 1/4% Notes in the second quarter of 2011 was funded by cash on hand and the net proceeds from commercial paper issuances.

From time to time, the corporation opportunistically may repurchase or retire its outstanding debt through cash purchases and/or exchanges for equity securities, in open market purchases, privately negotiated transactions or otherwise. Such repurchases or exchanges, if any, will depend on prevailing market conditions, the corporation's liquidity requirements, contractual restrictions and other factors. The amounts involved could be material.

Including the impact of swaps that are effective hedges and convert the economic characteristics of the debt, the corporation's long-term debt and notes payable consist of 60.0% fixed-rate debt as of April 2, 2011, as compared with 68.6% as of July 3, 2010. The corporation monitors the interest rate environments in the geographic regions in which it operates and modifies the components of its debt portfolio as necessary to manage interest rate and foreign currency risks.

### *Covenants*

The corporation's debt agreements and credit facility contain customary representations, warranties and events of default, as well as, affirmative, negative and financial covenants with which the corporation is in compliance. One financial covenant includes a requirement to maintain an interest coverage ratio of not less than 2.0 to 1.0. The interest coverage ratio is based on the ratio of EBIT to consolidated net interest expense with consolidated EBIT equal to net income attributable to Sara Lee plus interest expense, income tax expense, and extraordinary or non-recurring non-cash charges and gains. For the 12 months ended April 2, 2011, the corporation's interest coverage ratio was 6.6 to 1.0.

### *Leases*

The corporation has numerous operating leases for manufacturing facilities, warehouses, office space, vehicles, machinery and equipment. Operating lease obligations are scheduled to be paid as follows: \$18 million in the remainder of 2011; \$50 million in 2012; \$37 million in 2013; \$27 million in 2014; \$22 million in 2015; \$17 million in 2016 and \$69 million thereafter. The corporation is contingently liable for certain long-term leases on property operated by others. These leased properties relate to certain businesses that have been sold. The corporation continues to be liable for the remaining terms of the leases on these properties in the event that the owners of the businesses are unable to satisfy the lease liability. The minimum annual rentals under these leases are as follows: \$5 million in the remainder of 2011; \$15 million in 2012; \$11 million in 2013; \$10 million in 2014; \$8 million in 2015; \$1 million in 2016 and \$29 million, thereafter.

### *Future Contractual Obligations and Commitments*

During 2007, the corporation exited a U.S. meat production plant that included a hog slaughtering operation. Certain purchase contracts for the purchase of live hogs at this facility were not exited or transferred after the closure of the facility. Under the terms of this contract, which is open through June 2012, the corporation will continue to purchase these live hogs and therefore, the corporation has entered into a hog sales contract under which these hogs will be sold to another slaughter operator. The corporation's purchase price of these hogs is generally based on the suppliers' production costs, which includes the price of corn products, and the corporation's selling price for these hogs is generally based on USDA posted hog prices. Divergent movements in these indices will result in either gains or losses on these hog transactions. Expected losses from these hog purchase commitments are recognized when we determine the loss is probable of occurring.

---

**Table of Contents**

The corporation has various funding obligations and certain contingent guaranty obligations that are outlined below.

*Pension Plans*

The funded status of the corporation's defined benefit pension plans is defined as the amount by which the projected benefit obligation exceeds the plan assets. The underfunded status of the plans related to continuing operations was approximately \$450 million at the end of 2010 as compared to \$350 million at the end of 2009. Further information on the corporation's pension plans is contained in Note 8 to these Consolidated Financial Statements. The corporation anticipates recognizing total pension expense in continuing operations for its defined benefit plans of approximately \$40 million in 2011.

In the first nine months of 2011, the corporation contributed \$115 million to these defined benefit pension plans and the corporation anticipates that approximately \$120 million of cash contributions will be made for the entire fiscal year. Previously, the company estimated that its 2011 contributions would include approximately \$80 million of additional contributions to the company's Dutch pension plan, subject to reaching an agreement with the Dutch unions to restructure this plan. It is now expected that this contribution will be made in the first half of 2012. The exact amount of cash contributions made to pension plans in any year is dependent upon a number of factors including minimum funding requirements in the jurisdictions in which the company operates and arrangements made with the trustees of certain foreign plans. As a result, actual funding in 2011 may be materially different from the current estimate. The Significant Accounting Policies section and Note 16 - Defined Benefit Pension Plans to the Consolidated Financial Statements, that are included in the corporation's 2010 Annual Report on Form 10-K, provide a more complete description of the measurement date, assumptions, funded status, expected benefit payments and funding policies related to these defined benefit plans.

The corporation participates in various multi-employer pension plans that provide retirement benefits to certain employees covered by collective bargaining agreements (MEPP). Participating employers in a MEPP are jointly responsible for any plan underfunding. MEPP contributions are established by the applicable collective bargaining agreements; however, the MEPPs may impose increased contribution rates and surcharges based on the funded status of the plan and the provisions of the Pension Protection Act, which requires substantially underfunded MEPPs to implement rehabilitation plans to improve funded status. The corporation believes that its contributions to MEPPs may increase by approximately 12% to 15% through 2011 due to increased contribution rates and surcharges MEPPs are expected to impose under the Pension Protection Act. Factors that could impact funded status of a MEPP include investment performance, changes in the participant demographics, financial stability of contributing employers and changes in actuarial assumptions.

In addition to regular contributions, the corporation could be obligated to make additional contributions (known as a complete or partial withdrawal liability) if a MEPP has unfunded vested benefits. These withdrawal liabilities, which would be triggered if the corporation ceases to make contributions to a MEPP with respect to one of more collective bargaining units, would equal the corporation's proportionate share of the unfunded vested benefits based on the year in which liability is triggered. The corporation believes that certain of the MEPPs in which we participate have unfunded vested benefits, and some are significantly underfunded. Withdrawal liability triggers could include the corporation's decision to close a plant or the dissolution of a collective bargaining unit. Due to uncertainty regarding future withdrawal liability triggers, we are unable to determine the amount and timing of the corporation's future withdrawal liability, if any, or whether the corporation's participation in these MEPPs could have any material adverse impact on its financial condition, results of operations or liquidity. Disagreements over potential withdrawal liability may lead to legal disputes.

The corporation's regular scheduled contributions to MEPPs related to its continuing operations totaled approximately \$7 million in 2010, 2009 and 2008.

---

## **Table of Contents**

### *Repatriation of Foreign Earnings and Income Taxes*

The corporation anticipates that it will continue to repatriate a portion of its foreign subsidiaries earnings. The tax expense associated with any return of foreign earnings will be recognized as such earnings are realized. However, the corporation pays the tax liability upon completing the repatriation action. The repatriation of foreign sourced earnings is not the only source of liquidity for the corporation. In addition to cash flow derived from operations, the corporation has access to the commercial paper market, a \$1.85 billion revolving credit facility, and access to public and private debt markets as means to generate liquidity sufficient to meet its U.S. cash flow needs.

The corporation currently estimates that the continuing operation's tax expense for the repatriation of a portion of 2011 and prior year foreign earnings to the U.S. will be approximately \$17 million, with the majority of these taxes expected to be paid during 2011. In addition, the corporation has recognized \$234 million of tax expense in the first nine months of 2011 related to the repatriation of the gain on the sale of the air care and body care businesses. It is anticipated that the majority of the cash taxes related to this repatriation action will be paid after calendar 2011. The corporation anticipates that the deferred tax liability at the end of 2011 will be approximately \$843 million and will primarily relate to repatriation taxes recognized in 2010 and 2011.

### *Project Accelerate/Other Restructuring Liabilities*

The corporation has recognized amounts for Project Accelerate and other restructuring charges. At April 2, 2011, the corporation had recognized cumulative liabilities of approximately \$170 million that relate primarily to future severance and other lease and contractual payments. These amounts will be paid when the obligation becomes due, and the corporation expects a significant portion of these amounts will be paid over the next twelve months.

### *Guarantees*

The corporation is a party to a variety of agreements under which it may be obligated to indemnify a third party with respect to certain matters and it is not possible to predict the maximum potential amount of future payments under certain of these agreements, due to the conditional nature of the corporation's obligations and the unique facts and circumstances involved in each particular agreement. Typically, these obligations arise as a result of contracts entered into by the corporation, under which the corporation agrees to indemnify a third party against losses arising from a breach of representations and covenants related to such matters as title to assets sold, the collectability of receivables, specified environmental matters, lease obligations assumed and certain tax matters. In each of these circumstances, payment by the corporation is conditioned on the other party making a claim pursuant to the procedures specified in the contract. These procedures allow the corporation to challenge the other party's claims. In addition, the corporation's obligations under these agreements may be limited in terms of time and/or amount, and in some cases the corporation may have recourse against third parties for certain payments made by the corporation. Historically, payments made by the corporation under these agreements have not had a material effect on the corporation's business, financial condition or results of operations. The corporation believes that if it were to incur a loss in any of these matters, such loss would not have a material effect on the corporation's business, financial condition or results of operations. However, the corporation has established accruals primarily for tax indemnifications provided to certain buyers of the household and bodycare businesses, which the corporation will monitor over time.

The material guarantees for which the maximum potential amount of future payments can be determined include the corporation's contingent liability on leases on property operated by others which are described above, and the corporation's guarantees of certain third-party debt. These debt guarantees require the corporation to make payments under specific debt arrangements in the event that the third parties default on their debt obligations. The maximum potential amount of future payments that the corporation could be required to make in the event that these third parties default on their debt obligations is approximately \$12 million. At the present time, the corporation does not believe it is probable that any of these third parties will default on the amount subject to guarantee.

In October 2009, the Spanish tax administration upheld the challenge made by its local field examination against tax positions taken by the corporation's Spanish subsidiaries. In November 2009, the corporation filed an appeal against this claim with the Spanish Tax Court. In April 2010, the Spanish Chief Inspector upheld a portion of the claim raised by the Spanish tax authorities, which the corporation will appeal. The corporation believes it is adequately reserved for the claim upheld by the Spanish Chief Inspector. The corporation is currently appealing the Court's decision and has obtained a bank guarantee of \$64 million as security against all allegations.

*Risk Management*

The corporation maintains risk management control systems to monitor the foreign exchange, interest rate and commodity risks, and the corporation's offsetting hedge positions. The corporation utilizes derivative instruments to create offsetting hedge positions and accounts for these instruments under either the hedge accounting model or the mark-to-market accounting model. The corporation utilizes the mark-to-market accounting model for certain of these derivative instruments and the change in fair value of derivatives that are accounted for under the mark-to-market accounting model are reported in earnings each period, which can lead to increased volatility in reported earnings.

As outlined in the corporation's 2010 Annual Report on Form 10-K filed with the Securities and Exchange Commission, the corporation's control systems use analytical techniques including market value, sensitivity analysis and value at risk estimations. The value at risk estimations shown in the table below, which includes risks for the entire corporation, are intended to measure the maximum amount the corporation could lose from adverse market movements in interest rates and foreign exchange rates for a one-day period at a 95% confidence level.

(In millions)	Amounts	Average	Time Interval	Confidence Level
<b>Value at Risk Amounts</b>				
Third quarter 2011				
Interest rates	\$ 25	\$ 25	1 day	95%
Foreign exchange	18	19	1 day	95
Year End 2010				
Interest rates	\$ 11	\$ 12	1 day	95%
Foreign exchange	21	23	1 day	95

Interest rate value at risk increased over 2010 due to a shift toward longer maturities of the overall debt outstanding and the general increase in long term rate volatilities. Increases in foreign exchange value at risk amounts in 2011 were primarily due to increases in the value of euro based net assets.

*Sensitivity Analysis* For commodity derivative instruments held, the corporation utilizes a sensitivity analysis technique to evaluate the effect that changes in the market value of commodities will have on the corporation's commodity derivative instruments. This analysis includes the commodity derivative instruments and, thereby, does not consider the fair value change in the underlying exposure. At the end of the third quarter of 2011 and the end of 2010, the potential change in fair value of commodity derivative instruments, assuming a 10% change in the underlying commodity price, was \$14 million and \$2 million, respectively.

**Non-GAAP Financial Measures Definitions**

The following is an explanation of the non-GAAP financial measures presented in this report. Adjusted net sales excludes from net sales the impact of businesses acquired or divested after the start of the fiscal period and excludes the impact of an additional week in those fiscal years with 53 weeks versus 52 weeks. It also adjusts the previous year's sales for the impact of any changes in foreign currency exchange rates.

Adjusted operating segment income for a specified business segment or discontinued operation excludes from operating segment income the impact of significant items recognized by that portion of the business during the fiscal period and businesses acquired or divested after the start of the

fiscal period. It also adjusts for the impact of an additional week in those fiscal years that include a 53<sup>rd</sup> week. It also adjusts the previous year's operating segment income for the impact of any changes in foreign currency exchange rates. Adjusted operating income excludes from operating income the impact of significant items recognized during the fiscal period, contingent sale proceeds, if any, and businesses acquired or divested after the start of the fiscal period. It also adjusts for the impact of an additional week in those fiscal years that include a 53<sup>rd</sup> week. It also adjusts the previous year's operating segment income for the impact of any changes in foreign currency exchange rates.

### **Significant Accounting Policies and Critical Estimates**

The corporation's significant accounting policies are discussed in the Notes to the Consolidated Financial Statements that are incorporated in the 2010 Annual Report on Form 10-K that is filed with the Securities and Exchange Commission. The accounting policies and estimates that can have a significant impact upon the operating results, financial position and footnote disclosures of the corporation are described in the Financial Review in the corporation's 2010 Annual Report on Form 10-K.

### **Issued but not yet Effective Accounting Standards**

There are no new accounting pronouncements issued, but not yet effective, which are relevant to the operations of the corporation as of the third quarter.

### **Forward-Looking Information**

This document contains certain forward-looking statements, including the anticipated costs and benefits of restructuring, transformation and Project Accelerate actions, access to credit markets and the corporation's credit ratings, the planned extinguishment of debt, the funding of pension plans, potential payments under guarantees and amounts due under future contractual obligations and commitments, projected capital expenditures, cash tax payments, pension settlement amounts and effective tax rates. In addition, from time to time, in oral statements and written reports, the corporation discusses its expectations regarding the corporation's future performance by making forward-looking statements preceded by terms such as expects, projects, anticipates or believes. These forward-looking statements are based on currently available competitive, financial and economic data, as well as management's views and assumptions regarding future events. Such forward-looking statements are inherently uncertain, and investors must recognize that actual results may differ from those expressed or implied in the forward-looking statements. Consequently, the corporation wishes to caution readers not to place undue reliance on any forward-looking statements. Among the factors that could cause Sara Lee's actual results to differ from such forward-looking statements are factors relating to:

Sara Lee's spin-off and separation plans, the special dividend, its regular quarterly dividend and its share repurchase plans, such as (i) unanticipated developments that delay or negatively impact the proposed spin-off and capital plans; (ii) Sara Lee's ability to obtain an IRS tax ruling and any other customary approvals; (iii) Sara Lee's ability to generate the anticipated efficiencies and savings from the proposed spin off; (iv) the impact of the proposed spin off on Sara Lee's relationships with its employees, its major customers and vendors and on Sara Lee's credit ratings and cost of funds; (v) changes in market conditions; (vi) future opportunities that the Board may determine present greater potential value to shareholders than the spin off, special dividend and share purchase plans; (vii) the inability to complete the sale of Sara Lee's North American Fresh Bakery business, a condition to the payment of the special dividend; (viii) disruption to Sara Lee's business operations as a result of the proposed spin off; (ix) future operating or capital needs that require a more significant outlay of cash than currently anticipated; and (x) the ability of the businesses to operate independently following the completion of the proposed spin off;

Sara Lee's relationship with its customers, such as (i) a significant change in Sara Lee's business with any of its major customers, such as Walmart, its largest customer, including changes in how such customers manage their suppliers and the level of inventory these customers maintain; and (ii) credit and other business risks associated with customers operating in a highly competitive retail environment;

---

**Table of Contents**

The consumer marketplace, such as (i) significant competition, including advertising, promotional and price competition; (ii) changes in consumer behavior due to economic conditions, such as a shift in consumer demand toward private label; (iii) fluctuations in the cost of raw materials, Sara Lee's ability to increase or maintain product prices in response to fluctuations in cost and the impact on Sara Lee's profitability; (iv) the impact of various food safety issues and regulations on sales and profitability of Sara Lee products; and (v) inherent risks in the marketplace associated with new product introductions, including uncertainties about trade and consumer acceptance;

Sara Lee's international operations, such as (i) impacts on reported earnings from fluctuations in foreign currency exchange rates, particularly the euro; (ii) Sara Lee's generation of a high percentage of its revenues from businesses outside the United States and costs to remit these foreign earnings into the U.S. to fund Sara Lee's domestic operations, share repurchase plans, dividends, debt service and corporate costs; (iii) difficulties and costs associated with complying with U.S. laws and regulations, such as Foreign Corrupt Practices Act, applicable to entities with overseas operations, and different regulatory structures and unexpected changes in regulatory environments overseas, including without limitation potentially negative consequences from changes in anti-competition and tax laws; and (iv) Sara Lee's ability to continue to source production and conduct manufacturing and selling operations in various countries due to changing business conditions, political environments, import quotas and the financial condition of suppliers;

Previous business decisions, such as (i) Sara Lee's ability to generate margin improvement through cost reduction and efficiency initiatives, including Project Accelerate and the outsourcing of significant portions of our financial transaction processing, global IT, and global indirect procurement activities; (ii) Sara Lee's ability to achieve planned cash flows from capital expenditures and acquisitions and the impact of changing interest rates and the cost of capital on the discounted value of those planned cash flows, which could impact future impairment analyses; (iii) credit ratings issued by the three major credit rating agencies, the impact of Sara Lee's capital plans and targets on such credit ratings and the impact these ratings and changes in these ratings may have on Sara Lee's cost to borrow funds, access to capital/debt markets, and ability to complete the planned share repurchase; (iv) the settlement of a number of ongoing reviews of Sara Lee's income tax filing positions in various jurisdictions and inherent uncertainties related to the interpretation of tax regulations in the jurisdictions in which Sara Lee transacts business; and (v) changes in the expense for and contingent liabilities relating to multi-employer pension plans in which Sara Lee participates.

In addition, Sara Lee's results may also be affected by general factors, such as economic conditions, political developments, interest and inflation rates, accounting standards, taxes and laws and regulations in markets where the corporation competes. Sara Lee undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

**ITEM 4 CONTROLS AND PROCEDURES**

**Disclosure Controls and Procedures**

The corporation maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in reports the corporation files or submits under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the corporation's management, including its Chief Executive Officer and Chief Financial Officer as appropriate, to allow timely decisions regarding required disclosure based on management's interpretation of the definition of disclosure controls and procedures, in Rules 13a-15(e) and 15d-15(e). In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable, rather than absolute, assurance of achieving the desired control objectives, and management necessarily is required to apply its judgment in evaluating the cost/benefit relationship of possible controls and procedures.

Sara Lee's Chief Executive Officer and Chief Financial Officer, with assistance from other members of management, evaluated the effectiveness of Sara Lee's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period

**Table of Contents**

covered by this Quarterly Report on Form 10-Q (the Evaluation Date ) and, based upon such evaluation, have concluded that as of the Evaluation Date, the corporation's disclosure controls and procedures were effective.

**Changes in Internal Control over Financial Reporting**

During the last fiscal quarter there have been no changes in the corporation's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the corporation's internal control over financial reporting.

**PART II****ITEM 1A RISK FACTORS**

There have been no material changes from the risk factors disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended July 3, 2010.

**ITEM 2(c) REPURCHASES OF EQUITY SECURITIES BY THE ISSUER****Issuer Purchases of Equity Securities**

The following table outlines Sara Lee's purchases of shares of its common stock during the third quarter of 2011.

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c)	(d)	
			Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number and Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (1)	
Jan. 2, 2011 to Feb. 2, 2011	9,187,234	17.37	9,187,234	13,459,121	\$ 1.7 billion
Feb. 3, 2011 to Mar. 5, 2011	29,378,789	17.02	29,378,789	13,459,121	\$ 1.2 billion
Mar. 6, 2011 to Apr. 2, 2011				13,459,121	\$ 1.2 billion
Total	38,566,023	17.10	38,566,023	13,459,121	\$ 1.2 billion

- (1) Sara Lee has two continuing stock repurchase programs under which it may repurchase shares of common stock in either open market or private transactions. With respect to the first program, Sara Lee announced on August 4, 2005 that its Board of Directors had increased the number of shares authorized under this program by an additional 100 million shares. As of April 2, 2011, 13.5 million shares remain authorized for repurchase under this program. With respect to the second program, Sara Lee announced on September 25, 2009 that its Board of Directors had authorized a \$1.0 billion share repurchase program and on February 16, 2010 its Board of Directors had increased this repurchase program by \$2.0 billion shares (for a total authorization of \$3.0 billion shares). As of April 2, 2011, \$1.8 billion of shares have been repurchased under this program. There is no expiration date for either program.
