Notes to Unaudited Condensed Consolidated Financial Statements

1) Nature of Operations and Summary of Significant Accounting Policies
General

Glacier Bancorp, Inc. (the Company) is a Montana corporation headquartered in Kalispell, Montana. The Company is a regional multi-bank holding company that provides a full range of banking services to individual and corporate customers in Montana, Idaho, Wyoming, Colorado, Utah and Washington through its bank subsidiaries (collectively referred to hereafter as the Banks). The bank subsidiaries are subject to competition from other financial service providers. The bank subsidiaries are also subject to the regulations of certain government agencies and undergo periodic examinations by those regulatory authorities.

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting of normal recurring adjustments) necessary for a fair presentation of the Company's financial condition as of September 30, 2011, stockholders equity and comprehensive income for the nine months ended September 30, 2011, the results of operations for the three and nine month periods ended September 30, 2011 and 2010, and cash flows for the nine months ended September 30, 2011 and 2010. The condensed consolidated statement of financial condition and statement of stockholders' equity and comprehensive income of the Company as of and for the year ended December 31, 2010 have been derived from the audited consolidated statements of the Company as of that date.

The accompanying condensed consolidated financial statements do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2010. Operating results for the three and nine months ended September 30, 2011 are not necessarily indicative of the results anticipated for the year ending December 31, 2011. Certain reclassifications have been made to the 2010 financial statements to conform to the 2011 presentation.

Material estimates that are particularly susceptible to significant change include: 1) the determination of the allowance for loan and lease losses (ALLL or allowance), 2) the valuations related to investments and real estate acquired in connection with foreclosures or in satisfaction of loans, and 3) the evaluation of goodwill impairment. In connection with the determination of the ALLL and other real estate valuation estimates, management obtains independent appraisals (new or updated) for significant items. Estimates relating to investments are obtained from independent parties. Estimates relating to the evaluation of goodwill impairment are determined based on independent party valuations and internal calculations using significant independent party inputs.

Principles of Consolidation

As of September 30, 2011, the Company is the parent holding company (Parent) for eleven independent wholly-owned community bank subsidiaries: Glacier Bank (Glacier), First Security Bank of Missoula (First Security), Western Security Bank (Western), Valley Bank of Helena (Valley), Big Sky Western Bank (Big Sky), and First Bank of Montana (First Bank-MT), all located in Montana; Mountain West Bank (Mountain West) and Citizens Community Bank (Citizens) located in Idaho; 1st Bank (1st Bank) and First Bank of Wyoming, formerly First National Bank & Trust, (First Bank-WY) located in Wyoming; and Bank of the San Juans (San Juans) located in Colorado. Effective June 30, 2011, First Bank-WY changed from a national bank charter to a Wyoming bank charter. All significant inter-company transactions have been eliminated in consolidation.

Table of Contents

In 2010, the Company formed a wholly-owned subsidiary, GBCI Other Real Estate (GORE), to isolate certain bank foreclosed properties for legal protection and administrative purposes. The foreclosed properties were sold to GORE from bank subsidiaries at fair market value and properties remaining are currently held for sale.

The Company owns seven trust subsidiaries, Glacier Capital Trust II (Glacier Trust II), Glacier Capital Trust III (Glacier Trust III), Glacier Capital Trust IV (Glacier Trust IV), Citizens (ID) Statutory Trust I (Citizens Trust I), Bank of the San Juans Bancorporation Trust I (San Juans Trust I), First Company Statutory Trust 2001 (First Co Trust 01) and First Company Statutory Trust 2003 (First Co Trust 03) for the purpose of issuing trust preferred securities. The trust subsidiaries are not consolidated into the Company s financial statements.

The following abbreviated organizational chart illustrates the Company s various relationships as of September 30, 2011:

Variable Interest Entities

Edgar Filing: GLACIER BANCORP INC - Form 10-Q

A variable interest entity (VIE) exists 1) when either the entity s total equity investment at risk is not sufficient to permit the entity to finance its activities without additional subordinated financial support from other parties, or 2) the entity has equity investors that cannot make significant decisions about the entity s operations or that do not absorb their proportionate share of the expected losses or receive the expected returns of the entity. In addition, a VIE must be consolidated by the Company if it is deemed to be the primary beneficiary of the VIE, which is the party involved with the VIE that will absorb a majority of the expected losses, receive a majority of the expected residual returns, or both. The VIEs are regularly monitored to determine if any reconsideration events have occurred that could cause its primary beneficiary status to change.

Table of Contents

The Company has equity investments in Certified Development Entities (CDE) which have received allocations of new markets tax credits (NMTC). The Company also has equity investments in low-income housing tax credit (LIHTC) partnerships. The CDEs and the LIHTC partnerships are VIEs. The underlying activities of the VIEs are community development projects designed primarily to promote community welfare, such as economic rehabilitation and development of low-income areas by providing housing, services, or jobs for residents. The maximum exposure to loss in the VIEs is the amount of equity invested and credit extended by the Company. However, the Company has credit protection in the form of indemnification agreements, guarantees, and collateral arrangements. The Company has evaluated the variable interests held by the Company in each CDE (NMTC) and LIHTC partnership investment and determined that the Company continues to be the primary beneficiary of such VIEs. As the primary beneficiary of these VIEs, the entities' assets, liabilities, and results of operations are included in the Company's consolidated financial statements. The following table summarizes the carrying amounts of the entities' assets and liabilities included in the Company's consolidated financial statements at September 30, 2011 and December 31, 2010:

(Dollars in thousands)	September 30, 2011		December 31, 2010	
	CDE (NMTC)	LIHTC	CDE (NMTC)	LIHTC
Assets				
Loans receivable	\$ 30,634		29,239	
Premises and equipment, net		15,015		9,637
Accrued interest receivable	112		112	
Other assets	1,365	127	1,369	102
Total assets	\$ 32,111	15,142	30,720	9,739
Liabilities				
Other borrowed funds	\$ 4,629	3,306	4,629	1,617
Accrued interest payable	4	2	2	9
Other liabilities	56	334	81	289
Total liabilities	\$ 4,689	3,642	4,712	1,915

Amounts presented in the table above are adjusted for intercompany eliminations. All assets presented can be used only to settle obligations of the consolidated VIEs and all liabilities presented consist of liabilities for which creditors and other beneficial interest holders therein have no recourse to the general credit of the Company.

Impact of Recent Authoritative Accounting Guidance

The Accounting Standards Codification™ (ASC) is the Financial Accounting Standards Board's (FASB) officially recognized source of authoritative U.S. generally accepted accounting principles (GAAP) applicable to all public and non-public non-governmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under the authority of the federal securities laws are also sources of authoritative GAAP for SEC registrants. All other accounting literature is considered non-authoritative.

In September 2011, FASB issued amendments to FASB ASC Topic 350, *Intangibles - Goodwill and Other*. The amendments provide an entity the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more-likely-than-not that the fair value of a reporting unit is less than its carrying amount. If the entity concludes it is more-likely-than-not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. The amendments are effective prospectively during interim and annual periods beginning after December 15, 2011 and early adoption is permitted. The Company is currently evaluating the impact of the adoption of this amendment, but does not expect it to have a material effect on the Company's financial position or results of operations.

Table of Contents

In June 2011, FASB issued amendments to FASB ASC Topic 220, *Comprehensive Income*. The amendments provide an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement or in two separate but consecutive statements. The amendments are effective retrospectively during interim and annual periods beginning after December 15, 2011. The Company is currently evaluating the impact of the adoption of this amendment, but does not expect it to have a material effect on the Company's financial position or results of operations.

In May 2011, FASB issued amendments to FASB ASC Topic 820, *Fair Value Measurement*. The amendments were to achieve common fair value measurement and disclosure requirements in U.S. GAAP and International Financial Reporting Standards. The amendments change the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. The amendments are effective prospectively during interim and annual periods beginning after December 15, 2011. The Company is currently evaluating the impact of the adoption of this amendment, but does not expect it to have a material effect on the Company's financial position or results of operations.

In April 2011, FASB issued amendments to FASB ASC Topic 310, *Receivables*. The amendments provide additional guidance or clarification regarding a creditor's determination of whether a restructuring is a troubled debt restructuring. In evaluating whether a restructuring constitutes a troubled debt restructuring, a creditor must separately conclude that both of the following exist: 1) the restructuring constitutes a concession, and 2) the debtor is experiencing financial difficulties. The amendment provides further guidance as to when the creditor has granted a concession and the debtor is experiencing financial difficulties. The amendments are effective for the first interim or annual period beginning on or after June 15, 2011, and should be applied retrospectively to the beginning of the annual period of adoption. As a result of applying these amendments, an entity may identify receivables that are newly considered impaired. For purposes of measuring impairment of those receivables, an entity should apply the amendments prospectively for the first interim or annual period beginning on or after June 15, 2011. An entity should disclose the information relating to troubled debt restructurings which was deferred in January 2011 by Accounting Standards Update No. 2011-01, Topic 310, *Receivables (Topic 310)*, for interim and annual periods beginning on or after June 15, 2011. The Company has evaluated the impact of the adoption of this amendment and determined there was not a material effect on the Company's financial position or results of operations.

In December 2010, FASB issued amendments to FASB ASC Topic 805, *Business Combinations*. The amendments specify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The amendments also expand the supplemental pro forma disclosures to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The amendments are effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. The Company has evaluated the impact of the adoption of this amendment and determined there was not a material effect on the Company's financial position or results of operations.

Table of Contents

In December 2010, FASB issued amendments to FASB ASC Topic 350, *Intangibles – Goodwill and Other*. The amendments affect all entities that have recognized goodwill and have one or more reporting units whose carrying amount for purposes of performing Step 1 of the goodwill impairment test is zero or negative. The amendments modify Step 1 so that for those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more-likely-than-not that a goodwill impairment exists. In determining whether it is more-likely-than-not that a goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist. The amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2010. The Company has evaluated the impact of the adoption of this amendment and determined there was not a material effect on the Company's financial position or results of operations.

2) Investment Securities, Available-for-Sale

A comparison of the amortized cost and estimated fair value of the Company's investment securities designated as available-for-sale is presented below.

(Dollars in thousands)	Weighted Yield	Amortized Cost	September 30, 2011		Fair Value

Total investment securities	3.00%	\$ 2,394,978	24,182	(23,313)	2,395,847

Included in residential mortgage-backed securities is \$52,912,000 and \$68,051,000 as of September 30, 2011 and December 31, 2010, respectively, of non-guaranteed private label whole loan mortgage-backed securities of which none of the underlying collateral is subprime.

Maturities of securities do not reflect repricing opportunities present in adjustable rate securities, nor do they reflect expected shorter maturities based upon early prepayment of principal. Weighted yields are based on the constant yield method taking into account premium amortization and discount accretion. Weighted yields on tax-exempt investment securities exclude the tax benefit.

The cost of each investment sold is determined by specific identification. Gain on sale of investments consists of the following:

(Dollars in thousands)	Three Months ended September 30,		Nine Months ended September 30,	
	2011	2010	2011	2010
Gross proceeds	\$ 10,708	62,779	18,916	95,102

The Company assesses individual securities in its investment securities portfolio for impairment at least on a quarterly basis, and more frequently when economic or market conditions warrant. An investment is impaired if the fair value of the security is less than its carrying value at the financial statement date. If impairment is determined to be other-than-temporary, an impairment loss is recognized by reducing the amortized cost for the credit loss portion of the impairment with a corresponding charge to earnings of a like amount.

For fair value estimates provided by third party vendors, management also considered the models and methodology for appropriate consideration of both observable and unobservable inputs, including appropriately adjusted discount rates and credit spreads for securities with limited or inactive markets, and whether the quoted prices reflect orderly transactions. For certain securities, the Company obtained independent estimates of inputs, including cash flows, in supplement to third party vendor provided information. The Company also reviewed financial statements of select issuers, with follow up discussions with issuers' management for clarification and verification of information relevant to the Company's impairment analysis.

In evaluating securities for other-than-temporary impairment losses, management assesses whether the Company intends to sell or if it is more likely-than-not that it will be required to sell impaired securities. In so doing, management considers contractual constraints, liquidity, capital, asset/liability management and securities portfolio objectives. With respect to its impaired securities at September 30, 2011, management determined that it does not intend to sell and that there is no expected requirement to sell any of its impaired securities.

Based on an analysis of its impaired securities as of September 30, 2011, the Company determined that none of such securities had other-than-temporary impairment.

Substantially all of the Company's loan receivables are with customers within the Company's market areas. Although the Company has a diversified loan portfolio, a substantial portion of its customers' ability to honor their obligations is dependent upon the economic performance in the Company's market areas. Net deferred fees, premiums, and discounts of \$3,299,000 and \$6,001,000 are included in the loans receivable balance at September 30, 2011 and December 31, 2010, respectively.

Table of Contents

The following is a summary of activity in the ALLL:

(Dollars in thousands)	Three Months ended September 30,		Nine Months ended September 30,	
	2011	2010	2011	2010
Balance at beginning of the period	\$ 139,795	141,665	137,107	142,927

Balance at end of the period	\$ 138,093	134,257	138,093	134,257

The Company considers its impaired loans to be the primary credit quality indicator for monitoring the credit quality of the loan portfolio. Loans are designated impaired when, based upon current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement, and therefore, the Company has serious doubts as to the ability of such borrowers to fulfill the contractual obligation. Impaired loans include non-performing loans (i.e., non-accrual loans and accruing loans ninety days or more past due) and accruing loans under ninety days past due where it is probable payments will not be received according to the loan agreement (e.g., troubled debt restructuring). Loan impairment is measured in the same manner for each class within the loan portfolio. Interest income recognized on impaired loans for the periods ended September 30, 2011 and December 31, 2010 was not significant.

The following schedules disclose the impaired loans by portfolio class of loans:

(Dollars in thousands)	Total	At or for the Three or Nine Months ended September 30, 2011				
		Residential Real Estate	Commercial Real Estate	Other Commercial	Home Equity	Other Consumer

Table of Contents

A restructured loan is considered a troubled debt restructuring (TDR) if the creditor, for economic or legal reasons related to the debtor's financial difficulties, grants a concession to the debtor that it would not otherwise consider. A TDR loan is considered an impaired loan and a specific valuation allowance is established when the fair value of the collateral-dependent loan or present value of the loan's expected future cash flows (discounted at the loan's effective interest rate based on the original contractual rate) is lower than the carrying value of the impaired loan. The Company made the following types of loan modifications, some of which were considered a TDR:

Reduction of the stated interest rate for the remaining term of the debt;

Extension of the maturity date(s) at a stated rate of interest lower than the current market rate for newly originated debt having similar risk characteristics; and

Reduction of the face amount of the debt as stated in the debt agreements.

The following is a summary of the TDRs that have occurred during the periods presented and the TDRs that occurred within the previous twelve months that subsequently defaulted during the periods presented on a portfolio class basis:

(Dollars in thousands)	Three Months ended September 30, 2011					
	Total	Residential Real Estate	Commercial Real Estate	Other Commercial	Home Equity	Other Consumer
Troubled debt restructurings						
Number of loans	76	5	25	34	8	4
Pre-modification outstanding balance	\$ 28,544	2,861	19,033	3,844	1,397	1,409
Post-modification outstanding balance	\$ 26,879	2,702	17,533	3,831	1,399	1,414
Troubled debt restructurings that subsequently defaulted						
Number of loans	37	4	13	16	3	1
Recorded balance	\$ 26,700	934	20,630	2,686	2,351	99

(Dollars in thousands)	Nine Months ended September 30, 2011					
	Total	Residential Real Estate	Commercial Real Estate	Other Commercial	Home Equity	Other Consumer
Troubled debt restructurings						
Number of loans	246	15	84	117	14	16
Pre-modification outstanding balance	\$ 112,748	11,896	77,025	15,312	4,372	4,143
Post-modification outstanding balance	\$ 110,111	11,737	75,178	15,269	4,374	3,553
Troubled debt restructurings that subsequently defaulted						
Number of loans	65	7	27	21	9	1
Recorded balance	\$ 56,831	1,828	47,520	3,038	4,346	99

The majority of TDRs occurring in each loan class was a result of extensions of the maturity date and in total accounted for approximately 67 percent of the TDRs. For commercial real estate, the class with the largest amount of TDRs, approximately 63 percent were extensions of the maturity date, 10 percent were reductions in the interest rate, and 19 percent were a combination of extensions of the maturity date, reductions in the interest rate or reductions in the loan balance.

In addition to the TDRs that occurred during the periods provided in the preceding tables, the Company had TDRs with pre-modification loan balances of \$20,745,000 and \$79,703,000 for the three and nine months ended September 30, 2011, respectively, for which other real estate owned was received in full or partial satisfaction of the loans. The majority of such TDRs were in commercial real estate.

Table of Contents

As a result of adopting the FASB amendment relating to TDRs during the third quarter of 2011, the Company reassessed all loan restructurings that occurred during the first six months of 2011 for potential identification as TDRs. With respect to loan restructurings occurring in the first six months of 2011, the Company newly identified \$74,557,000 as TDRs all of which are considered impaired as of September 30, 2011. Of these newly identified TDRs, \$53,319,000 were not previously identified as impaired loans; such loans had a valuation allowance of \$3,221,000 as of September 30, 2011. The remaining \$21,238,000 of newly identified TDRs were previously considered to be impaired and the Company continues to allocate a specific valuation allowance.

4) Goodwill

The changes in the carrying amount of goodwill and accumulated impairment charge are as follows:

(Unaudited - Dollars in thousands)	At or for the Three or Nine Months ended September 30,	
	2011	2010
Net carrying value at beginning of period	\$ 146,259	146,259
Impairment charge	(40,159)	
Net carrying value at end of period	106,100	146,259
Gross carrying value	146,259	146,259
Accumulated impairment charge	(40,159)	
Net carrying value	\$ 106,100	146,259

The Company tests goodwill for impairment at the bank subsidiary level annually during the third quarter. In addition, goodwill of a subsidiary is tested for impairment between annual tests if an event occurs or circumstances change that would more-likely-than not reduce the fair value of a bank subsidiary below its carrying amount. Due to high levels of volatility and dislocation in bank stock prices nationwide during the third quarter 2011, as well as the Company's internal evaluation process, the Company engaged an independent valuation firm to determine the implied fair value of Mountain West Bank and 1st Bank. These two bank subsidiaries were selected because of Mountain West's losses and decline in credit quality and 1st Bank's significant amount of goodwill relative to its total assets. The implied fair value of these bank subsidiaries was estimated using the quoted market prices of other banks, discounted cash flows and inputs from comparable transactions. As a result of the evaluation, the Company determined the goodwill of \$23,159,000 (\$15,613,000 after-tax) at Mountain West was fully impaired and the goodwill of \$41,718,000 at 1st Bank was partially impaired by \$17,000,000. The remaining goodwill of \$81,382,000 at the other bank subsidiaries was not determined to be impaired at September 30, 2011.

Table of Contents

5) Comprehensive Income

The Company's only component of comprehensive income other than net earnings is the unrealized gain or loss, net of tax, on available-for-sale securities.

(Dollars in thousands)	Three Months ended September 30,		Nine Months ended September 30,	
	2011	2010	2011	2010
Net (loss) earnings	\$ (19,048)	9,445	3,123	32,737
Unrealized holding gains arising during the period	25,498	14,620	64,680	30,208
Tax expense	(9,993)	(5,730)	(25,348)	(11,839)
Net after tax	15,505	8,890	39,332	18,369
Reclassification adjustment for gains included in net (loss) earnings	(813)	(2,041)	(346)	(2,597)
Tax expense	319	800	136	1,018
Net after tax	(494)	(1,241)	(210)	(1,579)
Net unrealized gain on securities	15,011	7,649	39,122	16,790
Total comprehensive (loss) income	\$ (4,037)	17,094	42,245	49,527

6) Earnings Per Share

Basic (loss) earnings per common share is computed by dividing net (loss) earnings by the weighted average number of shares of common stock outstanding during the period presented. Diluted (loss) earnings per share is computed by including the net increase in shares as if dilutive outstanding stock options were exercised, using the treasury stock method.

The following schedule contains the data used in the calculation of basic and diluted (loss) earnings per share:

	Three Months ended September 30,		Nine Months ended September 30,	
	2011	2010	2011	2010
Net (loss) earnings available to common stockholders, basic and diluted	\$ (19,048,000)	9,445,000	3,123,000	32,737,000
Average outstanding shares - basic	71,915,073	71,915,073	71,915,073	68,897,348
Add: dilutive stock options				1,880
Average outstanding shares - diluted	71,915,073	71,915,073	71,915,073	68,899,228
Basic (loss) earnings per share	\$ (0.27)	0.13	0.04	0.48
Diluted (loss) earnings per share	\$ (0.27)	0.13	0.04	0.48

There were 1,597,959 and 2,309,410 stock options excluded from the diluted average outstanding share calculation for the nine months ended September 30, 2011 and 2010, respectively, due to the option exercise price exceeding the market price.

Table of Contents

7) Fair Value of Assets and Liabilities

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. There is a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The three levels of inputs that may be used to measure fair value are as follows:

Level 1	Quoted prices in active markets for identical assets or liabilities
Level 2	Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities
Level 3	Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities

The following is a description of the inputs and valuation methodologies used for assets measured at fair value on a recurring basis. There have been no significant changes in the valuation techniques during the nine months ended September 30, 2011.

Investment securities: fair value for available-for-sale securities is estimated by obtaining quoted market prices for identical assets, where available. If such prices are not available, fair value is based on independent asset pricing services and models, the inputs of which are market-based or independently sourced market parameters, including but not limited to, yield curves, interest rates, volatilities, prepayments, defaults, cumulative loss projections, and cash flows. For those securities where greater reliance on unobservable inputs occurs, such securities are classified as Level 3 within the hierarchy.

The following schedules disclose the major classes of assets measured at fair value on a recurring basis:

	Assets/ Liabilities Measured at Fair Value	September 30, 2011		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(Dollars in thousands)				
Investment securities, available-for-sale				
U.S. government and federal agency	\$ 209		209	
U.S. government sponsored enterprises	34,043		34,043	
State and local governments and other issues	1,036,158		1,036,158	
Collateralized debt obligations	6,450			6,450
Residential mortgage-backed securities	1,858,151		1,858,079	72
Total assets measured at fair value on a recurring basis	\$ 2,935,011		2,928,489	6,522

Table of Contents

(Dollars in thousands)	Assets/ Liabilities Measured at Fair Value	December 31, 2010		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Investment securities, available-for-sale				
U.S. government and federal agency	\$ 211		211	
U.S. government sponsored enterprises	41,518		41,518	
State and local governments and other issues	657,421		657,421	
Collateralized debt obligations	6,595			6,595
Residential mortgage-backed securities	1,690,102		1,689,946	156
Total assets measured at fair value on a recurring basis	\$ 2,395,847		2,389,096	6,751

The following schedules reconcile the beginning and ending balances for assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the nine month period ended September 30, 2011 and the year ended December 31, 2010:

(Dollars in thousands)	Total	Significant Unobservable Inputs (Level 3)	
		Collateralized Debt Obligations	Residential Mortgage-backed Securities
Balance as of December 31, 2010	\$ 6,751	6,595	156
Total unrealized gains (losses) included in other comprehensive income	2,011	2,095	(84)
Amortization, accretion and principal payments	(2,240)	(2,240)	
Balance as of September 30, 2011	\$ 6,522	6,450	72

(Dollars in thousands)	Total	Significant Unobservable Inputs (Level 3)		
		State and Local Governments and Other Issues	Collateralized Debt Obligations	Residential Mortgage-backed Securities
Balance as of December 31, 2009	\$ 9,988	2,088	6,789	1,111
Total unrealized gains included in other comprehensive income	3,381		3,276	105
Amortization, accretion and principal payments	(1,510)		(1,510)	
Sales, maturities and calls	(3,020)		(1,960)	(1,060)
Transfers out of Level 3	(2,088)	(2,088)		
Balance as of December 31, 2010	\$ 6,751		6,595	156

The following is a description of the inputs and valuation methodologies used for assets recorded at fair value on a non-recurring basis. There have been no significant changes in the valuation techniques during the nine months ended September 30, 2011.

Other real estate owned: other real estate owned is carried at the lower of fair value at acquisition date or estimated fair value, less estimated cost to sell. Estimated fair value of other real estate owned is based on appraisals or evaluations. Other real estate owned is classified within Level 3 of the fair value hierarchy.

Table of Contents

Collateral-dependent impaired loans, net of ALLL: loans included in the Company's financials for which it is probable that the Company will not collect all principal and interest due according to contractual terms are considered impaired. Estimated fair value of collateral-dependent impaired loans is based on the fair value of the collateral, less estimated cost to sell. Collateral-dependent impaired loans are classified within Level 3 of the fair value hierarchy.

In determining fair values of other real estate owned and the collateral-dependent impaired loans, the Company considers the appraisal or evaluation as the starting point for determining fair value. The Company also considers other factors and events in the environment that may affect the fair value.

Goodwill: Goodwill is evaluated for impairment at the bank subsidiary level at least annually. As a result of a goodwill impairment assessment performed by an independent valuation firm for two of the Company's bank subsidiaries, Mountain West and 1st Bank, a goodwill impairment charge was recorded during the third quarter of 2011. The key inputs used to determine the implied fair value of such bank subsidiaries and the corresponding amount of the impairment charge included quoted market prices of other banks, discounted cash flows and inputs from comparable transactions. These inputs are classified within Level 3 of the fair value hierarchy.

The following schedules disclose the major classes of assets with a recorded change during the period resulting from re-measuring the assets at fair value on a non-recurring basis:

	September 30, 2011			
	Assets/ Liabilities Measured at Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(Dollars in thousands)				
Other real estate owned	\$ 26,634			26,634
Collateral-dependent impaired loans, net of allowance for loan and lease losses	57,398			57,398
Goodwill	24,718			24,718
Total assets measured at fair value on a non-recurring basis with a recorded change	\$ 108,750			108,750

	December 31, 2010			
	Assets/ Liabilities Measured at Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(Dollars in thousands)				
Other real estate owned	\$ 17,492			17,492
Collateral-dependent impaired loans, net of allowance for loan and lease losses	47,283			47,283
Total assets measured at fair value on a non-recurring basis with a recorded change	\$ 64,775			64,775

Table of Contents

The following is a description of the methods used to estimate the fair value of all other assets and liabilities recognized at amounts other than fair value.

Assets

Cash and cash equivalents and accrued interest receivable: fair value is estimated at book value of such financial assets.

Non-marketable equity securities: fair value is estimated at book value due to restrictions that limit the sale or transfer of such securities.

Loans held for sale: fair value is estimated at book value due to the insignificant time between origination date and sale date.

Loans receivable, net of ALLL: fair value is estimated by discounting the future cash flows using the rates at which similar notes would be written for the same remaining maturities.

Liabilities

Accrued interest payable: fair value is estimated at book value of such financial liabilities.

Deposits: fair value of term deposits is estimated by discounting the future cash flows using rates of similar deposits with similar maturities. The estimated fair value of demand, NOW, savings, and money market deposits is the book value since rates are regularly adjusted to market rates.

Advances from Federal Home Loan Bank (FHLB): fair value of advances is estimated based on borrowing rates currently available to the Company for advances with similar terms and maturities.

Securities sold under agreements to repurchase (repurchase agreements), federal funds purchased and other borrowed funds: fair value of term repurchase agreements and other term borrowings is estimated based on current repurchase rates and borrowing rates currently available to the Company for repurchases and borrowings with similar terms and maturities. The estimated fair value for overnight repurchase agreements, federal funds purchased and other borrowings is book value.

Subordinated debentures: fair value of the subordinated debt is estimated by discounting the estimated future cash flows using current estimated market rates for subordinated debt issuances with similar characteristics.

Off-balance sheet financial instruments: commitments to extend credit and letters of credit represent the principal categories of off-balance sheet financial instruments. Rates for these commitments are set at time of loan closing, such that no adjustment is necessary to reflect these commitments at market value. The Company has immaterial off-balance sheet financial instruments.

Table of Contents

The following presents the carrying amounts and estimated fair values of the Company's financial instruments:

(Dollars in thousands)	September 30, 2011		December 31, 2010	
	Amount	Fair Value	Amount	Fair Value
Financial assets				
Cash and cash equivalents	\$ 133,771	133,771	105,091	105,091
Investment securities, available-for-sale	2,935,011	2,935,011	2,395,847	2,395,847
Loans held for sale	67,876	67,876	76,213	76,213

FHLB advances	889,053	920,108	965,141	974,853
Repurchase agreements, federal funds purchased and other borrowed funds	361,612	361,620	269,408	269,414
Subordinated debentures	125,239	63,173	125,132	70,404
Accrued interest payable	5,693	5,693	7,245	7,245
Total financial liabilities	\$ 6,152,125	6,131,061	5,888,828	5,855,890

8) Operating Segment Information

Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by management in deciding how to allocate resources and in assessing performance. The Company's operating segments include each of the individual bank subsidiaries, GORE and the Parent.

The accounting policies of the individual operating segments are the same as those of the Company. Transactions between operating segments are conducted at fair value, resulting in profits that are eliminated for reporting consolidated results of operations. Intersegment revenues primarily represents interest income on intercompany borrowings, management fees, and data processing fees received by individual banks or the Parent. Intersegment revenues, expenses and assets are eliminated in order to report results in accordance with accounting principles generally accepted in the United States of America. Expenses for centrally provided services are allocated based on the estimated usage of those services.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This Form 10-Q may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, but are not limited to, statements about management's plans, objectives, expectations and intentions that are not historical facts, and other statements identified by words such as expects, anticipates, intends, plans, believes, should, projects, estimates or words of similar meaning. These forward-looking statements are based on current beliefs and expectations of management and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond the Company's control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change. The following factors, among others, could cause actual results to differ materially from the anticipated results or other expectations in the forward-looking statements, including those set forth in this Form 10-Q:

the risks associated with lending and potential adverse changes of the credit quality of loans in the Company's portfolio, including as a result of declines in the housing and real estate markets in its geographic areas;

increased loan delinquency rates;

the risks presented by a continued economic downturn, which could adversely affect credit quality, loan collateral values, other real estate owned values, investment values, liquidity and capital levels, dividends and loan originations;

changes in market interest rates, which could adversely affect the Company's net interest income and profitability;

legislative or regulatory changes that adversely affect the Company's business, ability to complete pending or prospective future acquisitions, limit certain sources of revenue, or increase cost of operations;

costs or difficulties related to the integration of acquisitions;

the goodwill the Company has recorded in connection with acquisitions could become additionally impaired, which may have an adverse impact on our earnings and capital;

reduced demand for banking products and services;

the risks presented by public stock market volatility, which could adversely affect the market price of our common stock and our ability to raise additional capital in the future;

competition from other financial services companies in our markets;

loss of services from the senior management team; and

Edgar Filing: GLACIER BANCORP INC - Form 10-Q

the Company's success in managing risks involved in the foregoing.

Additional factors that could cause actual results to differ materially from those expressed in the forward-looking statements are discussed in Risk Factors in Item 1A. Please take into account that forward-looking statements speak only as of the date of this Form 10-Q. The Company does not undertake any obligation to publicly correct or update any forward-looking statement if it later becomes aware that actual results are likely to differ materially from those expressed in such forward-looking statement.

Table of Contents**Non-GAAP Financial Measures**

In addition to the results presented in accordance with accounting principles generally accepted in the United States of America (GAAP), this Form 10-Q contains certain non-GAAP financial measures. The Company believes that providing these non-GAAP financial measures provides investors with information useful in understanding the Company's financial performance, performance trends, and financial position. While the Company uses these non-GAAP measures in its analysis of the Company's performance, this information should not be considered an alternative to measurements required by GAAP.

A reconciliation of certain GAAP financial measures to non-GAAP financial measures is disclosed in both the three month and nine month Performance Summary sections. The reconciling item between the GAAP and non-GAAP financial measures was the current quarter goodwill impairment charge (net of tax) of \$32.6 million.

The goodwill impairment charge was \$40.2 million with a tax benefit of \$7.6 million which resulted in a goodwill impairment charge (net of tax) of \$32.6 million. The tax benefit applied only to the \$19.4 million of goodwill associated with taxable acquisitions and was determined based on the Company's marginal income tax rate of 38.9 percent.

The diluted earnings per share reconciling item was determined based on the goodwill impairment charge (net of tax) divided by the weighted average diluted shares of 71,915,073.

The goodwill impairment charge (net of tax) was included but not annualized in determining annualized earnings for both the GAAP return on average assets and GAAP return on average equity. The average assets used in the GAAP and non-GAAP return on average assets ratios were \$6.996 billion and \$6.854 billion for the three and nine month periods, respectively. The average equity used in the GAAP and non-GAAP return on average equity ratios were \$877 million and \$860 million for the three and nine month periods, respectively.

Financial Condition Analysis**Assets**

The following table summarizes the asset balances as of the dates indicated, and the amount of change from December 31, 2010 and September 30, 2010:

(Unaudited - Dollars in thousands)	September 30, 2011	December 31, 2010	September 30, 2010	\$ Change from December 31, 2010	\$ Change from September 30, 2010

Table of Contents

Total assets at September 30, 2011 were \$7.043 billion, which was \$65 million, or 1 percent, greater than total assets of \$6.978 billion at June 30, 2011 and \$770 million, or 12 percent, greater than total assets of \$6.273 billion at September 30, 2010.

Investment securities, including interest bearing deposits and federal funds sold, increased \$152 million, or 5 percent, during the quarter and increased \$1.179 billion, or 66 percent, from September 30, 2010. During the previous two quarters, the Company has purchased investment securities to primarily offset the lack of loan growth and to maintain interest income. The investment securities purchased during the current quarter were predominately U.S. Agency Collateralized Mortgage Obligations (CMO) with short weighted-average-lives. Investment securities represent 42 percent of total assets at September 30, 2011 versus 36 percent at December 31, 2010 and 29 percent at September 30, 2010. Excluding the increase in interest bearing cash deposits and unrealized gain on investment securities, the growth in the investment securities portfolio during the current quarter was \$126 million compared to a decrease in the loan portfolio of \$78.2 million during the current year.

At September 30, 2011, the loan portfolio was \$3.524 billion, a decrease of \$78.2 million, or 2 percent, during the quarter. Excluding net charge-offs of \$18.9 million and loans transferred to other real estate owned of \$14.9 million, loans decreased \$44.4 million, or 1 percent, during the current quarter. During the first nine months of 2011, the loan portfolio decreased \$226 million, or 6 percent, from total loans of \$3.749 billion at December 31, 2010. Excluding net charge-offs of \$54.8 million and loans transferred to other real estate owned of \$64.5 million, loans decreased \$106 million, or 3 percent, from December 31, 2010. During the past twelve months, the loan portfolio decreased \$345 million, or 9 percent, over loans receivable of \$3.869 billion at September 30, 2010. The largest decrease in dollars was in commercial loans which decreased \$179 million, or 7 percent, from September 30, 2010. The largest percentage decrease was in real estate loans which decreased \$154 million, or 23 percent, from September 30, 2010. The continued downturn in the economy and resulting lack of loan demand were the primary reasons for the decreases in the loan portfolio.

Other assets decreased \$14.4 million from June 30, 2011 and decreased \$73.8 million from September 30, 2010, such decreases including the current quarter goodwill impairment charge (net of tax) of \$32.6 million.

Liabilities

The following table summarizes the liability balances as of the dates indicated, and the amount of change from December 31, 2010 and September 30, 2010:

(Unaudited - Dollars in thousands)	September 30, 2011	December 31, 2010	September 30, 2010	\$ Change from December 31, 2010	\$ Change from September 30, 2010
Non-interest bearing deposits	\$ 996,265	855,829	887,637	140,436	108,628
Interest bearing deposits	3,774,263	3,666,073	3,530,204	108,190	244,059
Federal funds purchased	45,000			45,000	45,000
Repurchase agreements	301,820	249,403	237,609	52,417	64,211
FHLB advances	889,053	965,141	579,184	(76,088)	309,869
Other borrowed funds	14,792	20,005	17,386	(5,213)	(2,594)
Subordinated debentures	125,239	125,132	125,096	107	143
Other liabilities	44,869	39,500	41,889	5,369	2,980
Total liabilities	\$ 6,191,301	5,921,083	5,419,005	270,218	772,296

Table of Contents

As of September 30, 2011, non-interest bearing deposits of \$996 million increased \$79.4 million, or 9 percent, since June 30, 2011 and increased \$109 million, or 12 percent, since September 30, 2010. The increase in non-interest bearing deposits was driven by the continued growth in the number of personal and business customers, as well as existing customers retaining cash deposits because of the uncertainty in the current economic environment and for liquidity purposes. Interest bearing deposits of \$3.774 billion at September 30, 2011 included \$186 million of reciprocal deposits (e.g., Certificate of Deposit Account Registry System deposits). Interest bearing deposits increased \$108 million, or 3 percent, from the prior year end and included a \$69.8 million increase in wholesale deposits including reciprocal deposits. Interest bearing deposits increased \$244 million, or 7 percent, since September 30, 2010 and included a \$121 million increase in wholesale deposits including reciprocal deposits. The increase in deposits was 92 percent of the increase in total liabilities since prior year end and was 46 percent of the increase in total liabilities in the previous twelve months. These increases in deposits have been beneficial to the Company in funding the investment security growth at low costs over the prior twelve months. Repurchase agreements were \$302 million at September 30, 2011, an increase of \$52.4 million, or 21 percent, from December 31, 2010 and an increase of \$64.2 million, or 27 percent, from September 30, 2010.

To fund growth in the investment securities portfolios, the Company's level of borrowings has increased as needed to supplement deposit growth. Since prior year end, the Company's level of borrowings has remained stable with a decrease of \$76.1 million in Federal Home Loan Bank (FHLB) advances being partially offset by the increase in federal funds purchased of \$45.0 million. The Company's FHLB advances increased \$310 million and federal funds purchased increased \$45.0 million since September 30, 2010.

Stockholders' Equity

The following table summarizes the stockholders' equity balances as of the dates indicated, and the amount of change from December 31, 2010 and September 30, 2010:

(Unaudited - Dollars in thousands, except per share data)	September 30, 2011	December 31, 2010	September 30, 2010	\$ Change from December 31, 2010	\$ Change from September 30, 2010
Common equity	\$ 811,738	837,676	837,212	(25,938)	(25,474)
Accumulated other comprehensive income	39,650	528	16,442	39,122	23,208
Total stockholders' equity	851,388	838,204	853,654	13,184	(2,266)
Goodwill and core deposit intangible, net	(114,941)	(157,016)	(157,774)	42,075	42,833
Tangible stockholders' equity	\$ 736,447	681,188	695,880	55,259	40,567
Stockholders' equity to total assets	12.09%	12.40%	13.61%		
Tangible stockholders' equity to total tangible assets	10.63%	10.32%	11.38%		
Book value per common share	\$ 11.84	11.66	11.87	0.18	(0.03)
Tangible book value per common share	\$ 10.24	9.47	9.68	0.77	0.56
Market price per share at end of period	\$ 9.37	15.11	14.59	(5.74)	(5.22)

Tangible stockholders' equity increased \$40.6 million, or \$0.56 per share since September 30, 2010 resulting in tangible stockholders' equity to tangible assets of 10.63 percent and tangible book value per share of \$10.24 as of September 30, 2011. Total stockholders' equity and book value per share increased \$13.2 million and \$0.18 per share from the prior year end. The increase came primarily from accumulated other comprehensive income representing net unrealized gains or losses (net of tax) on the investment securities portfolio which was largely offset by the current quarter goodwill impairment charge (net of tax) of \$32.6 million. The current quarter decrease in market price per share resulted from the high levels of volatility and dislocation in bank stock prices nationwide during the third quarter 2011.

Table of Contents

On September 28, 2011, the Company's Board of Directors declared a cash dividend of \$0.13 per share, payable October 20, 2011 to shareholders of record on October 11, 2011. Future cash dividends will depend on a variety of factors, including net income, capital, asset quality, general economic conditions and regulatory considerations.

Results of Operations The Three Months ended September 30, 2011**Compared to the Three Months ended June 30, 2011 and September 30, 2010****Performance Summary**

	Three Months ended		
(Unaudited - Dollars in thousands, except per share data)	September 30, 2011	June 30, 2011	September 30, 2010
Net (loss) earnings (GAAP)	\$ (19,048)	11,886	9,445
Add goodwill impairment charge, net of tax	32,613		
Operating earnings (non-GAAP)	\$ 13,565	11,886	9,445
Diluted (loss) earnings per share (GAAP)	\$ (0.27)	0.17	0.13

Return on average equity (annualized) (GAAP)	-8.61%	5.54%	4.37%
Add goodwill impairment charge, net of tax	14.74%		
Return on average equity (annualized) (non-GAAP)	6.13%	5.54%	4.37%

Excluding the goodwill impairment charge (net of tax) of \$32.6 million, operating earnings for the current quarter of \$13.6 million or \$0.19 per share, an increase of 46 percent from the prior year third quarter of \$0.13 per share. Included in the per share quarterly results were gains (net of tax) of \$497 thousand from the sale of investment securities in the current quarter and \$1.2 million in the prior year third quarter. Operating earnings is considered a non-GAAP financial measure and additional information regarding this measurement and reconciliation is provided under the Non-GAAP Financial Measures section. Including the goodwill impairment charge, the net loss for the quarter was \$19.0 million or \$0.27 per share.

Net Interest Income

The current quarter net interest income of \$60.1 million remained stable compared to the prior quarter. There was a small decrease in interest income compared to the prior quarter as loan interest income decreased which was largely offset by the increased investment income as the asset mix continued to shift to investments. The current quarter net interest margin as a percentage of earning assets, on a tax-equivalent basis, was 3.92 percent, a decrease of 9 basis points from the prior quarter net interest margin of 4.01 percent. Such decrease was a result of the decrease of 11 basis points in yields on earning assets, most of which was from lower yielding investment securities.

Table of Contents

Net interest income for the current quarter increased by \$1.6 million from the same quarter last year. The primary reason for the increase was the reduction in interest expense of \$2.3 million, or 17 percent, as a result of the bank subsidiaries continuing reduction in deposit rates and obtaining lower cost borrowings. The funding cost for the current quarter was 87 basis points compared to 89 basis points for the prior quarter was 119 basis points for the prior year third quarter. The current quarter interest income included \$7.6 million of premium amortization (net of discount accretion) on CMOs, such amount was an increase of \$3.4 million over the prior year third quarter premium amortization. The premium amortization in the current quarter accounted for a 46 basis point reduction in the net interest margin compared to a 28 basis point reduction in the net interest margin for the prior year third quarter. The current quarter net interest margin was 3.92 percent, a decrease of 27 basis points from the 4.19 percent net interest margin for the prior year third quarter. In addition to the CMO premium amortization, the lower yield and volume of loans along with an increase in lower yielding investment securities has continued to put pressure on the net interest margin. The current quarter net interest margin included a 4 basis points reduction from the reversal of interest on non-accrual loans.

Non-interest Income

Non-interest income for the current quarter totaled \$20.9 million, an increase of \$3.1 million over the prior quarter and a decrease of \$3.0 million over the same quarter last year. Service charge fee income of \$12.5 million increased \$278 thousand, or 2 percent, from the prior quarter and decreased \$686 thousand, or 5 percent, from the prior year third quarter. Gain on sale of loans increased \$830 thousand, or 19 percent, over the prior quarter and decreased \$2.2 million, or 30 percent, over the same quarter last year. Such changes were the result of an increase in refinance activity during the third quarter of 2011, although at much lower levels than the refinance volume in the third quarter of 2010. Gain on the sale of investment securities was \$813 thousand for the current quarter compared to a loss of \$591 thousand on the sale of investment securities in the prior quarter and a gain of \$2.0 million in the prior year third quarter. Other income of \$2.5 million for the current quarter was an increase of \$573 thousand from the prior quarter and an increase of \$1.1 million from prior year third quarter. Increases from the prior quarter and the prior year third quarter in other income are attributable to other real estate owned operating revenue, gain on sale of other real estate owned and rental income from low income housing tax credit investments. Other real estate owned operating revenue and gain on sale of other real estate owned was \$903 thousand for the current quarter compared to \$697 thousand for the prior quarter and \$469 thousand for the prior year quarter.

Table of Contents**Non-interest Expense**

The following tables summarize non-interest expense for the periods indicated, including the amount and percentage change from June 30, 2011 and September 30, 2010:

(Unaudited - Dollars in thousands)	Three Months ended		
	September 30, 2011	June 30, 2011	September 30, 2010

Advertising and promotions	127	(150)	8%	-8%
Outsourced data processing expense	(51)	(10)	-6%	-1%
Other real estate owned expense	2,136	(2,457)	42%	-25%
Federal Deposit Insurance Corporation premiums	(559)	(995)	-25%	-38%
Core deposit intangibles amortization	9	(202)	2%	-25%
Other expense	(479)	573	-5%	7%
Total non-interest expense before goodwill impairment charge	1,919	(3,876)	4%	-7%
Goodwill impairment charge	40,159	40,159	n/m	n/m
Total non-interest expense	\$ 42,078	\$ 36,283	91%	70%

Excluding the goodwill impairment charge, non-interest expense of \$48.1 million for the quarter increased by \$1.9 million, or 4 percent, from the prior quarter and decreased by \$3.9 million, or 7 percent, from the prior year third quarter. Other real estate owned expense increased \$2.1 million, or 42 percent, from the prior quarter and decreased \$2.5 million, or 25 percent, from the prior year third quarter. The current quarter other real estate owned expense of \$7.2 million included \$1.3 million of operating expense, \$4.5 million of fair value write-downs, and \$1.4 million of loss on sale of other real estate owned. Other real estate owned expense will fluctuate as the Company continues to work through non-performing loans and dispose of foreclosure properties.

Table of Contents

Excluding other real estate owned expense, the Company and its bank subsidiaries continue to effectively manage other operating expenses. Compensation and employee benefits increased by \$437 thousand, or 2 percent, from the prior quarter and decreased \$628 thousand, or 3 percent, from the prior year third quarter. Occupancy and equipment expense increased \$299 thousand, or 5 percent, from the prior quarter and was stable compared to the same quarter last year. Federal Deposit Insurance Corporation (FDIC) premiums decreased \$559 thousand, or 25 percent, from the prior quarter and decreased \$995 thousand, or 38 percent, from the prior year third quarter as a result of a change in the FDIC assessment calculation. Other expense decreased \$479 thousand, or 5 percent, from the prior quarter and increased \$573 thousand, or 7 percent, from the same quarter last year.

Efficiency Ratio

The efficiency ratio for the current quarter was 48 percent compared to 50 percent for the prior year third quarter. The lower efficiency ratio was primarily the result of a decrease in operating expenses and a decrease in interest expense.

Provision for Loan Losses

(Unaudited - Dollars in thousands)	Provision for Loan Losses	Net Charge-Offs	ALLL as a Percent of Loans	Accruing Loans 30-89 Days Past Due as a Percent of Loans	Non-Performing Assets to Total Subsidiary Assets
Q3 2011	\$ 17,175	18,877	3.92%	0.60%	3.49%
Q2 2011	19,150	20,184	3.88%	1.14%	3.68%
Q1 2011	19,500	15,778	3.86%	1.44%	3.78%
Q4 2010	27,375	24,525	3.66%	1.21%	3.91%
Q3 2010	19,162	26,570	3.47%	1.06%	4.03%
Q2 2010	17,246	19,181	3.58%	0.92%	4.01%
Q1 2010	20,910	20,237	3.58%	1.53%	4.19%
Q4 2009	36,713	19,116	3.52%	2.15%	4.13%

The current quarter provision for loan losses was \$17.2 million, a decrease of \$2.0 million from the prior quarter and a decrease of \$2.0 million from the third quarter in 2010. Loan portfolio growth, composition, average loan size, credit quality considerations, and other environmental factors will continue to determine the level of additional provision for loan loss expense at each subsidiary bank. Net charged-off loans for the current quarter were \$18.9 million compared to \$20.2 million for the prior quarter and \$26.6 million for the third quarter in 2010. A real positive this quarter was the decrease in early stage delinquencies (accruing 30-89 days past due) as a percentage of loans which dropped from 1.14 percent in the prior quarter to 0.60 percent as of September 30, 2011.

The determination of the allowance for loan and lease losses (ALLL or allowance) and the related provision for loan losses is a critical accounting estimate that involves management's judgments about current environmental factors which affect loan losses, such factors including economic conditions, changes in collateral values, net charge-offs, and other factors discussed in Additional Management's Discussion and Analysis Allowance for Loan and Lease Losses.

Table of Contents**Results of Operations The Nine Months ended September 30, 2011****Compared to the Nine Months ended September 30, 2010****Performance Summary**

(Unaudited - Dollars in thousands, except per share data)	Nine Months ended	
	September 30, 2011	September 30, 2010
Net earnings (GAAP)	\$ 3,123	32,737
Add goodwill impairment charge, net of tax	32,613	
Operating earnings (non-GAAP)	\$ 35,736	32,737
Diluted earnings per share (GAAP)	\$ 0.04	0.48
Add goodwill impairment charge, net of tax	0.46	
Diluted earnings per share (non-GAAP)	\$ 0.50	0.48
Return on average assets (annualized) (GAAP)	0.22%	0.70%
Add goodwill impairment charge, net of tax	0.48%	
Return on average assets (annualized) (non-GAAP)	0.70%	0.70%
Return on average equity (annualized) (GAAP)	1.76%	5.43%
Add goodwill impairment charge, net of tax	3.80%	
Return on average equity (annualized) (non-GAAP)	5.56%	5.43%

Excluding the goodwill impairment charge, operating earnings for the nine month period ended September 30, 2011 was \$35.7 million or \$0.50 per share, an increase of 4 percent from the prior year first nine months. Operating earnings is considered a non-GAAP financial measure and additional information regarding this measurement and reconciliation is provided under the Non-GAAP Financial Measures section. Including the goodwill impairment charge, net earnings was \$3.1 million or \$0.04 per share for the nine month period ended September 30, 2011.

Table of Contents**Revenue Summary**

The following table summarizes revenue for the periods indicated, including the amount and percentage change from September 30, 2010:

(Unaudited - Dollars in thousands)	Nine Months ended		\$ Change	% Change
	September 30, 2011	September 30, 2010		
Net interest income				
Interest income	\$ 211,368	\$ 219,319	\$ (7,951)	-4%
Interest expense	34,297	41,214	(6,917)	-17%
Total net interest income	177,071	178,105	(1,034)	-1%
Non-interest income

	\$ 233,253	\$ 239,691	\$ (6,438)	-3%
Net interest margin (tax-equivalent)	3.95%	4.32%		

Net Interest Income

Net interest income for the first nine months of 2011 decreased \$1.0 million, or 1 percent, over the same period last year as total interest income decreased \$8.0 million, or 4 percent, while total interest expense decreased \$6.9 million, or 17 percent. The decrease in interest income from the prior year resulted from the increase in premium amortization (as interest rates declined) coupled with the reduction in loan balances, the combination of which put further pressure on earning assets. Interest income also continues to reflect the Company's purchase of a significant amount of investment securities over the course of several quarters at lower yields than the loans they replaced. Interest income included \$24.2 million in premium amortization (net of discount accretion) on CMOs which was an increase of \$15.1 million from prior year, such increase the result of the increased purchases of CMOs combined with the continued refinance activity. The premium amortization in the first nine months of 2011 accounted for a 51 basis point reduction in the net interest margin compared to a 21 basis point reduction in the net interest margin for the same period last year. The decrease in interest expense was primarily attributable to the rate decreases on interest bearing deposits and lower cost borrowings. The funding cost for the first nine months of 2011 was 91 basis points compared to 120 basis points for the same period last year.

The net interest margin decreased 37 basis points from 4.32 percent for the first nine months of 2010 to 3.95 for the same period in 2011, such decrease attributable to a lower yield and volume of loans coupled with an increase in lower yielding investment securities and higher premium amortization.

Non-interest Income

Non-interest income of \$56.2 million for the first nine months of 2011 decreased \$5.4 million over the same period in 2010. Gain on sale of loans decreased \$3.3 million, or 19 percent, from the same period in 2010 due to a significant reduction in refinance activity. Excluding the prior year \$1.8 million gain on the sale of Mountain West's merchant card servicing portfolio, other income increased \$1.7 million over the same period in 2010 of which \$796 thousand relates to other real estate owned operating revenue and gain on sale of other real estate owned.

Table of Contents**Non-interest Expense**

The following table summarizes non-interest expense for the periods indicated, including the amount and percentage change from September 30, 2010:

(Unaudited - Dollars in thousands)	Nine Months ended		\$ Change	% Change
	September 30, 2011	September 30, 2010		
Compensation, employee benefits and related expense	\$ 64,380	\$ 65,243	\$ (863)	-1%
Occupancy and equipment expense	17,709	17,970	(261)	-1%
Advertising and promotions	4,881	5,148	(267)	-5%
Outsourced data processing expense	2,304	2,205	99	4%
Other real estate owned expense	14,359	19,346	(4,987)	-26%
Federal Deposit Insurance Corporation premiums	6,159	6,998	(839)	-12%
Core deposit intangibles amortization	1,916	2,422	(506)	-21%
Other expense	25,127	22,880	2,247	10%
Total non-interest expense before goodwill impairment charge	136,835	142,212	(5,377)	-4%
Goodwill impairment charge	40,159		40,159	n/m
Total non-interest expense	\$ 176,994	\$ 142,212	\$ 34,782	24%

Excluding the goodwill impairment charge, non-interest expense for the first nine months of 2011 decreased by \$5.4 million, or 4 percent, from the same period in 2010. Compensation and employee benefits decreased \$863 thousand, or 1 percent, and occupancy and equipment expense decreased \$261 thousand, or 1 percent, from the prior year same period. Other real estate owned expense of \$14.4 million decreased \$5.0 million, or 26 percent, from the prior year period. The other real estate owned expense for the first nine months of 2011 included \$4.0 million of operating expenses, \$6.9 million of fair value write-downs, and \$3.5 million of loss on sale of other real estate owned. FDIC premiums decreased \$839 thousand, or 12 percent, from the prior year period as a result of a change in the FDIC assessment calculation. Other expense increased \$2.2 million, or 10 percent, from the prior year period primarily due to an increase of \$988 thousand from debit card expenses and various other expense categories.

Efficiency Ratio

The efficiency ratio was 50 percent for both the first nine months of 2011 and 2010. There was a notable decrease in gain on sale of loans for the first nine months of 2011 compared to 2010 as refinance activity slowed during 2011. The decrease in gain on sale of loans was offset by increases in tax-exempt investment security income.

Provision for Loan Losses

The provision for loan losses was \$55.8 million for 2011, a decrease of \$1.5 million, or 3 percent, from the same period in 2010. Net charged-off loans during the first nine months of 2011 was \$54.8 million, a decrease of \$11.1 million from the same period in 2010.

Non-performing assets decreased \$12.1 million, or 19 percent annualized, and non-performing loans decreased \$6.2 million, or 15 percent annualized, during the current quarter. In addition to the decrease in non-performing loans, early stage delinquencies (accruing 30-89 days past due) of \$21.1 million at September 30, 2011, significantly decreased from the prior quarter early stage delinquencies of \$41.2 million and the prior year end early stage delinquencies of \$45.5 million. The Company has continued to work diligently on its non-performing loans while maintaining an adequate allowance for loan losses and this was reflected in the credit quality ratios which have improved during the second and

third quarters of 2011.

Table of Contents

The largest category of non-performing assets was land, lot and other construction loans which was \$135 million, or 54 percent, of non-performing assets at September 30, 2011. The majority of the loans in this category was \$73.6 million of land development loans at September 30, 2011. Net charged-off land, lot and other construction loans during the nine months ended September 30, 2011 was \$26.3 million, or 48 percent, of total net charged-off loans. Although land, lot and other construction loans have historically put pressure on the Company's credit quality, the Company has diligently reduced this category of non-performing assets by \$20.2 million, or 13 percent, since prior year end. In addition, the Company has reduced land, lot and other construction loans by \$148 million, or 27 percent, since prior year end.

Most of the Company's non-performing assets are secured by real estate, and based on the most current information available to management, including updated appraisals or evaluations, the Company believes the value of the underlying real estate collateral is adequate to minimize significant charge-offs or loss to the Company. Each bank subsidiary evaluates the level of its non-performing assets, the values of the underlying real estate and other collateral, and related trends in net charge-offs in determining the adequacy of the ALLL. Through pro-active credit administration, the Banks work closely with borrowers to seek favorable resolution to the extent possible, thereby attempting to minimize net charge-offs or losses to the Company.

Loans that are thirty days or more past due based on payments received and applied to the loan are considered delinquent. Loans are designated non-accrual and the accrual of interest is discontinued when the collection of the contractual principal or interest is unlikely. A loan is typically placed on non-accrual when principal or interest is due and has remained unpaid for ninety days or more. When a loan is placed on non-accrual status, interest previously accrued but not collected is reversed against current period interest income. Subsequent payments are applied to the outstanding principal balance if doubt remains as to the ultimate collectability of the loan. Interest accruals are not resumed on partially charged-off impaired loans. For other loans on non-accrual, interest accruals are resumed on such loans only when they are brought fully current with respect to interest and principal and when, in the judgment of management, the loans are estimated to be fully collectible as to both principal and interest.

For non-performing construction loans involving residential structures, the percentage of completion exceeds 95 percent at September 30, 2011. For construction loans involving commercial structures, the percentage of completion ranges from projects not started to projects completed at September 30, 2011. During the construction loan term, all construction loan collateral properties are inspected at least monthly, or more frequently as needed, until completion. Draws on construction loans are predicated upon the results of the inspection and advanced based upon a percentage of completion basis versus original budget percentages. When construction loans become non-performing and the associated project is not complete, the Company on a case-by-case basis makes the decision to advance additional funds or to initiate collection/foreclosure proceedings. Such decision includes obtaining as-is and at completion appraisals for consideration of potential increases or decreases in the collateral's value. The Company also considers the increased costs of monitoring progress to completion, and the related collection/holding period costs should collateral ownership be transferred to the Company. With very limited exception, the Company does not disburse additional funds on non-performing loans. Instead, the Company has proceeded to collection and foreclosure actions in order to reduce the Company's exposure to loss on such loans.

Table of Contents

Impaired Loans

Loans are designated impaired when, based upon current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement and therefore, the Company has serious doubts as to the ability of such borrowers to fulfill the contractual obligation. Impaired loans include non-performing loans (i.e., non-accrual loans and accruing loans 90 days or more past due) and accruing loans under ninety days past due where it is probable payments will not be received according to the loan agreement (e.g., troubled debt restructuring). The Company measures impairment on a loan-by-loan basis. An insignificant delay or shortfall in the amounts of payments would not cause a loan or lease to be considered impaired. The Company determines the significance of payment delays and shortfalls on a case-by-case basis, taking into consideration all of the facts and circumstances surrounding the loan and the borrower, including the length and reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest due. At the time a loan is identified as impaired, it is measured for impairment and thereafter reviewed and measured on at least a quarterly basis for additional impairment.

The amount of the impairment is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, except when it is determined that repayment of the loan is expected to be provided solely by the underlying collateral. For impairment based on expected future cash flows, the Company considers all information available as of a measurement date, including past events, current conditions, potential prepayments, and estimated cost to sell when such costs are expected to reduce the cash flows available to repay or otherwise satisfy the loan. For alternative ranges of cash flows, the likelihood of the possible outcomes is considered in determining the best estimate of expected future cash flows. The effective interest rate for a loan restructured in a troubled debt restructuring (TDR) is based on the original contractual rate.

When the ultimate collectability of the total principal of an impaired loan is in doubt and designated as non-accrual, all payments are applied to principal under the cost recovery method. When the ultimate collectability of the total principal on an impaired loan is not in doubt, contractual interest is generally credited to interest income when received under the cash basis method. Impaired loans were \$268 million and \$225 million as of September 30, 2011 and December 31, 2010, respectively. The ALLL includes valuation allowances of \$14.9 million and \$16.9 million specific to impaired loans as of September 30, 2011 and December 31, 2010, respectively. Of the total impaired loans at September 30, 2011, there were 40 commercial real estate and other commercial loans, each exceeding \$1 million, such loans aggregating \$128 million, or 48 percent, of the impaired loans. The 40 loans were collateralized by 141 percent of the loan value, the majority of which had appraisals (new or updated) in the previous twelve months, such appraisals reviewed at least quarterly taking into account current market conditions. Of the total impaired loans at September 30, 2011, there were 250 loans aggregating \$135 million, or 50 percent, whereby the borrowers had more than one impaired loan. The amount of impaired loans that have had partial charge-offs during the year for which the Company continues to have concern about the collectability of the remaining loan balance was \$32.1 million. Of these loans, there were charge-offs of \$18.5 million during the first nine months of 2011.

Appraisals and Evaluations

For collateral-dependent loans and real estate loans for which foreclosure or a deed-in-lieu of foreclosure is probable, impairment is measured by the fair value of the collateral, less estimated cost to sell. The fair value of the collateral is determined primarily based upon appraisal or evaluation (new or updated) of the underlying property value. The Company reviews appraisals or evaluations, giving consideration to the highest and best use of the collateral, with values reduced by discounts to consider lack of marketability and estimated cost to sell. Appraisals or evaluations (new or updated) are reviewed at least quarterly and more frequently based on current market conditions, including deterioration in a borrower's financial condition and when property values may be subject to significant volatility. After review and acceptance of the collateral appraisal or evaluation (new or updated), adjustments to an impaired loan's value may occur.

Table of Contents

In deciding whether to obtain a new or updated appraisal or evaluation, the Company considers the impact of the following factors and environmental events:

passage of time;

improvements to, or lack of maintenance of, the collateral property;

stressed and volatile economic conditions, including market values;

changes in the performance, risk profile, size and complexity of the credit exposure;

limited or specific use collateral property;

high loan-to-value credit exposures;

changes in the adequacy of the collateral protections, including loan covenants and financially responsible guarantors;

competing properties in the market area;

changes in zoning and environmental contamination;

the nature of subsequent transactions (e.g., modification, restructuring, refinancing); and

the availability of alternative financing sources.

The Company also takes into account (1) the Company's experience with whether the appraised values of impaired collateral-dependent loans are actually realized, and (2) the timing of cash flows expected to be received from the underlying collateral to the extent such timing is significantly different than anticipated in the most recent appraisal.

The Company generally obtains new or updated appraisals or evaluations annually for collateral underlying impaired loans. For collateral-dependent loans for which the appraisal of the underlying collateral is more than twelve months old, the Company updates collateral valuations through procedures that include obtaining current inspections of the collateral property, broker price opinions, comprehensive market analyses and current data for conditions and assumptions (e.g., discounts, comparable sales and trends) underlying the appraisals' valuation techniques. The Company's impairment/valuation procedures take into account new and updated appraisals on similar properties in the same area in order to capture current market valuation changes, unfavorable and favorable.

Restructured Loans

A restructured loan is considered a TDR if the creditor, for economic or legal reasons related to the debtor's financial difficulties, grants a concession to the debtor that it would not otherwise consider. The Company made the following types of loan modifications, some of which were considered a TDR:

Reduction of the stated interest rate for the remaining term of the debt;

Extension of the maturity date(s) at a stated rate of interest lower than the current market rate for newly originated debt having similar risk characteristics; and

Reduction of the face amount of the debt as stated in the debt agreements.

The Company had TDR loans of \$152.9 million as of September 30, 2011. The Company's TDR loans are considered impaired loans of which \$67.0 million are designated as non-accrual. As a result of adopting the Financial Accounting Standards Board's (FASB) amendment relating to TDRs during the third quarter of 2011, the Company reassessed all restructurings that occurred during the first six months of 2011 for potential identification as TDRs and identified \$74.6 million in newly identified TDRs. Of these newly identified TDRs, \$53.3 million were not previously identified as impaired loans; such loans had a specific allocation of \$3.2 million as of September 30, 2011.

Table of Contents

The Company has not participated in any of the U.S. Departments of the Treasury and Housing and Urban Developments loan modification and refinancing programs. Each restructured debt is separately negotiated with the borrower and includes terms and conditions that reflect the borrower's prospective ability to service the debt as modified. The Company discourages the multiple loan strategy when restructuring loans regardless of whether or not the notes are TDR loans. The Company does not have any commercial TDR loans as of September 30, 2011 that have repayment dates extended at or near the original maturity date for which the Company has not classified as impaired. The Company has TDR loans of \$20.6 million that are in non-accrual status or that have had partial charge-offs during the year, the borrowers of which continue to have \$33.5 million in other loans that are on accrual status.

The Company recognizes that while borrowers may experience deterioration in their financial condition, many continue to be creditworthy customers who have the willingness and capacity for debt repayment. In determining whether non-restructured or unimpaired loans issued to a single or related party group of borrowers should continue to accrue interest when the borrower has other loans that are impaired or TDRs, the Company on a quarterly or more frequent basis performs an updated and comprehensive assessment of the willingness and capacity of the borrowers to timely and ultimately repay their total debt obligations, including contingent obligations. Such analysis takes into account current financial information about the borrowers and financially responsible guarantors, if any, including for example:

analysis of global, i.e., aggregate debt service for total debt obligations;

assessment of the value and security protection of collateral pledged using current market conditions and alternative market assumptions across a variety of potential future situations; and

loan structures and related covenants.

Other Real Estate Owned

Property acquired by foreclosure or deed-in-lieu of foreclosure is carried at the lower of fair value at acquisition date or current estimated fair value, less estimated selling cost. Fair value is determined as the amount that could be reasonably expected in a current sale between a willing buyer and a willing seller in an orderly transaction between market participants at the measurement date. If the fair value of the asset, less estimated selling cost, is less than the cost of the property, a loss is recognized in other expenses and the asset carrying value is reduced. Gain or loss on disposition of real estate owned is recorded in non-interest income or non-interest expense, respectively. In determining the fair value of the properties on the date of transfer and any subsequent estimated losses of net realizable value, the fair value of other real estate acquired by foreclosure or deed-in-lieu of foreclosure is determined primarily based upon appraisal or evaluation of the underlying property value. The loan book value prior to the acquisition and transfer of the loan into other real estate owned during 2011 was \$79.7 million of which \$19.1 million was residential real estate, \$53.4 million was commercial, and \$7.2 million was consumer and other loans. The loan collateral acquired in foreclosure during 2011 was \$64.5 million of which \$14.1 million was residential real estate, \$46.0 million was commercial, and \$4.4 million was consumer and other loans. The following table sets forth the changes in other real estate owned for the periods ended September 30, 2011 and December 31, 2010:

(Unaudited - Dollars in thousands)	Nine Months ended September 30, 2011	Year ended December 31, 2010
Balance at beginning of period	\$ 73,485	57,320
Additions	64,478	72,572
Capital improvements	647	273
Write-downs	(6,853)	(10,429)
Sales	(38,108)	(46,251)
Balance at end of period	\$ 93,649	73,485

Table of Contents

Interest Reserves

Interest reserves are used to periodically advance loan funds to pay interest charges on the outstanding balance of the related loan. As with any extension of credit, the decision to establish a loan-funded interest reserve upon origination of construction loans, including residential construction and land, lot and other construction loans, is based on prudent underwriting, including the feasibility of the project, expected cash flow, creditworthiness of the borrower and guarantors, and the protection provided by the real estate and other underlying collateral. Interest reserves provide an effective means for addressing the cash flow characteristics of construction loans. In response to the downturn in the housing market and potential impact upon construction lending, the Company discourages the creation or continued use of interest reserves.

The Company's loan policy and credit administration practices establish standards and limits for all extensions of credit that are secured by interests in or liens on real estate, or made for the purpose of financing the construction of real property or other improvements. Ongoing monitoring and review of the loan portfolio is based on current information, including: the borrowers' and guarantors' creditworthiness, value of the real estate and other collateral, the project's performance against projections, and monthly inspections by employees or external parties until the real estate project is complete.

Interest reserves are advanced provided the related construction loan is performing as expected. Loans with interest reserves may be extended, renewed or restructured only when the related loan continues to perform as expected and meets the prudent underwriting standards identified above. Such renewals, extension or restructuring are not permitted in order to keep the related loan current.

In monitoring the performance and credit quality of a construction loan, the Company assesses the adequacy of any remaining interest reserve, and whether the use of an interest reserve remains appropriate in the presence of emerging weakness and associated risks in the construction loan.

The ongoing accrual and recognition of uncollected interest as income continues only when facts and circumstances continue to reasonably support the contractual payment of principal or interest. Loans are typically designated as non-accrual when the collection of the contractual principal or interest is unlikely and has remained unpaid for ninety days or more. For such loans, the accrual of interest and its capitalization into the loan balance will be discontinued.

The Company had \$80.7 million and \$141 million in loans with interest reserves with remaining reserves of \$396 thousand and \$879 thousand as of September 30, 2011 and December 31, 2010, respectively.

Allowance for Loan and Lease Losses

Determining the adequacy of the ALLL involves a high degree of judgment and is inevitably imprecise as the risk of loss is difficult to quantify. The ALLL methodology is designed to reasonably estimate the probable loan and lease losses within each bank subsidiary's loan and lease portfolios. Accordingly, the ALLL is maintained within a range of estimated losses. The determination of the ALLL, including the provision for loan losses and net charge-offs, is a critical accounting estimate that involves management's judgments about all known relevant internal and external environmental factors that affect loan losses, including the credit risk inherent in the loan and lease portfolios, economic conditions nationally and in the local markets in which the community bank subsidiaries operate, changes in collateral values, delinquencies, non-performing assets and net charge-offs.

Although the Company and Banks continue to actively monitor economic trends, soft economic conditions combined with potential declines in the values of real estate that collateralize most of the Company's loan and lease portfolios may adversely affect the credit risk and potential for loss to the Company.

Table of Contents

The ALLL evaluation is well documented and approved by each bank subsidiary's Board of Directors and reviewed by the Parent's Board of Directors. In addition, the policy and procedures for determining the balance of the ALLL are reviewed annually by each bank subsidiary's Board of Directors, the Parent's Board of Directors, the internal audit department, independent credit reviewers and state and federal bank regulatory agencies.

At the end of each quarter, each of the community bank subsidiaries analyzes its loan and lease portfolio and maintain an ALLL at a level that is appropriate and determined in accordance with accounting principles generally accepted in the United States of America. The allowance consists of a specific allocation component and a general allocation component. The specific allocation component relates to loans that are determined to be impaired. A specific valuation allowance is established when the fair value of a collateral-dependent loan or the present value of the loan's expected future cash flows (discounted at the loan's effective interest rate) is lower than the carrying value of the impaired loan. The general allocation component relates to probable credit losses inherent in the balance of the loan portfolio based on prior loss experience, adjusted for changes in trends and conditions of qualitative or environmental factors.

When applied to each bank subsidiary's historical loss experience, the environmental factors result in the provision for loan losses being recorded in the period in which the loss has probably occurred. When the loss is confirmed at a later date, a charge-off is recorded.

Management of each bank subsidiary exercises significant judgment when evaluating the effect of applicable qualitative or environmental factors on each bank subsidiary's historical loss experience for loans not identified as impaired. Quantification of the impact upon each bank subsidiary's ALLL is inherently subjective as data for any factor may not be directly applicable, consistently relevant, or reasonably available for management to determine the precise impact of a factor on the collectability of the Bank's unimpaired loan portfolio as of each evaluation date. Bank management documents its conclusions and rationale for changes that occur in each applicable factor's weight (i.e., measurement and ensures that such changes are directionally consistent based on the underlying current trends and conditions for the factor).

The Company is committed to a conservative management of the credit risk within the loan and lease portfolios, including the early recognition of problem loans. The Company's credit risk management includes stringent credit policies, individual loan approval limits, limits on concentrations of credit, and committee approval of larger loan requests. Management practices also include regular internal and external credit examinations, identification and review of individual loans and leases experiencing deterioration of credit quality, procedures for the collection of non-performing assets, quarterly monitoring of the loan and lease portfolios, semi-annual review of loans by industry, and periodic stress testing of the loans secured by real estate.

The Company's model of eleven independent wholly-owned community banks, each with its own loan committee, chief credit officer and Board of Directors, provides substantial local oversight to the lending and credit management function. Unlike a traditional, single-bank holding company, the Company's decentralized business model affords multiple reviews of larger loans before credit is extended, a significant benefit in mitigating and managing the Company's credit risk. The geographic dispersion of the market areas in which the Company and the community bank subsidiaries operate further mitigates the risk of credit loss. While this process is intended to limit credit exposure, there can be no assurance that further problem credits will not arise and additional loan losses incurred, particularly in periods of rapid economic downturns.

The primary responsibility for credit risk assessment and identification of problem loans rests with the loan officer of the account. This continuous process, utilizing each of the Banks' internal credit risk rating process, is necessary to support management's evaluation of the ALLL adequacy. An independent loan review function verifying credit risk ratings evaluates the loan officer and management's evaluation of the loan portfolio credit quality. The loan review function also assesses the evaluation process and provides an independent analysis of the adequacy of the ALLL.

Table of Contents

The Company considers the ALLL balance of \$138 million adequate to cover inherent losses in the loan and lease portfolios as of September 30, 2011. However, no assurance can be given that the Company will not, in any particular period, sustain losses that are significant relative to the ALLL amount, or that subsequent evaluations of the loan and lease portfolios applying management's judgment about then current factors, including economic and regulatory developments, will not require significant changes in the ALLL. Under such circumstances, this could result in enhanced provisions for loan losses. See additional risk factors in Part II, ITEM 1A. Risk Factors.

The following table summarizes the allocation of the ALLL:

(Unaudited - Dollars in thousands)	September 30, 2011		December 31, 2010		September 30, 2010	
	Allowance for Loan and Lease Losses	Percent of Loans in Category	Allowance for Loan and Lease Losses	Percent of Loans in Category	Allowance for Loan and Lease Losses	Percent of Loans in Category

Table of Contents

The allowance determined by each of the eleven community bank subsidiaries is combined together into a single allowance for the Company. As of September 30, 2011, December 31, 2010 and September 30, 2010, the Company's allowance consisted of the following components:

(Unaudited - Dollars in thousands)	September 30, 2011	December 31, 2010	September 30, 2010
Specific allocation	\$ 14,946	16,871	18,622
General allocation	123,147	120,236	115,635
Total allowance	\$ 138,093	137,107	134,257

Each of the Bank's ALLL is considered adequate to absorb losses from any class of its loan and lease portfolio. For the nine months ended September 30, 2011 and throughout 2010, the Company believes the allowance is commensurate with the risk in the Company's loan and lease portfolio and is directionally consistent with the change in the quality of the Company's loan and lease portfolio as determined at each bank subsidiary.

At September 30, 2011, the allowance was \$138 million, an increase of \$986 thousand from the prior year end and an increase of \$3.8 million from a year ago. The allowance was 3.92 percent of total loans outstanding at September 30, 2011, compared to 3.66 percent at December 31, 2010 and 3.47 percent at September 30, 2010. The allowance was 89 percent of non-performing loans at September 30, 2011, an increase from 70 percent at the prior year end and from 68 percent a year ago.

During the third quarter of 2011, the overall total of the ALLL decreased by \$1.7 million, the net result of a \$1.1 million increase in the specific allocation and a \$2.8 million decrease in the general allocation of the allowance. The decrease in the general allocation during the current quarter was due to a decrease in total loans of \$78.2 million and newly identified TDRs of \$53.3 million that were previously included in the general allocation and are individually reviewed for impairment as of September 30, 2011. The increase in the general allocation since prior year end was due to an increase in the bank subsidiaries' overall historical loss experience adjusted for environmental factors during the nine months ended September 30, 2011, albeit total loans collectively evaluated for impairment decreased by \$269 million during such period.

Presented below are select aggregated statistics that were considered when determining the adequacy of the Company's ALLL at September 30, 2011:

Positive trends

Charge-offs, net of recoveries, in the third quarter of 2011 were \$18.9 million, a decrease of \$1.3 million from the prior quarter.

Non-accruing construction loans (i.e., residential construction and land, lot and other construction) were \$71.2 million, or 47 percent, of the \$151.8 million of non-accruing loans at September 30, 2011, a reduction of \$14.1 million during the current quarter. Non-accruing construction loans at June 30, 2011 accounted for 55 percent of the \$154.8 million of non-accruing loans.

Non-performing loans as a percent of total loans at September 30, 2011 decreased to 4.42 percent as compared to 4.50 percent at June 30, 2011 and 5.26 percent at December 31, 2010.

Early stage delinquencies (accruing loans 30-89 days past due) decreased to \$21.1 million at September 30, 2011 from \$41.2 million at June 30, 2011.

Table of Contents

Negative trends

Net charge-offs of construction loans were \$11.1 million, or 59 percent, of the \$18.9 million of net charge-offs during the current quarter compared to net charge-offs of construction loans of \$9.9 million, or 49 percent, of the \$20.2 million of net charge-offs in the prior quarter.

Impaired loans as a percentage of total loans were 7.60 percent at September 30, 2011, an increase from 5.80 percent at June 30, 2011. The increase in the impaired loans as a percentage of total loans was primarily a result of the increase in newly identified TDRs from reassessing loan restructurings for the first six months of 2011.

The eleven bank subsidiaries provide commercial services to individuals, small to medium size businesses, community organizations and public entities from 106 locations, including 97 branches, across Montana, Idaho, Wyoming, Colorado, Utah, and Washington. The Rocky Mountain areas in which the bank subsidiaries operate have diverse economies and markets that are tied to commodities (crops, livestock, minerals, oil and natural gas), tourism, real estate and land development and an assortment of industries, both manufacturing and service-related. Thus, the changes in the global, national, and local economies are not uniform across each of the bank subsidiaries.

Though stabilizing, the soft economic conditions during much of 2010 continued in the first nine months of 2011, including declining sales of existing real property (e.g., single family residential, multi-family, commercial buildings and land), an increase in existing inventory of real property, increase in real property delinquencies and foreclosures, and corresponding decrease in absorption rates, and lower values of real property that collateralize most of the Company's loan and lease portfolios, among other factors. While the national unemployment rate increased steadily from 7.4 percent at the start of 2009 to 10.0 percent at year end 2009, dropping to 9.4 percent at year end 2010 and 9.1 percent at September 30, 2011, the unemployment rates for most states in which the community bank subsidiaries conduct operations were lower throughout this time period compared to the national unemployment rate. Agricultural price declines in livestock and grain in 2009 have recovered significantly and remain strong. While prices for oil have held strong, prices for natural gas currently remain weak (due to excess supply) especially when compared to the exceptionally high price levels of natural gas during 2008. Although the cost of living (as reflected in Consumer Price Index measures) has slowly increased in the first nine months of 2011, the overall decline in the cost of living during 2010 and 2009 helped buffer the general softening of the economy nationally, regionally and locally, and the impact of lower real property values. The tourism industry and related lodging continues to be a source of strength for those banks whose market areas have national parks and similar recreational areas in the market areas served. Such changes affected the bank subsidiaries in distinctly different ways as each bank has its own geographic area and local economy influences over both a short-term and long-term horizon.

The specific allocation of \$14.9 million pertains to total impaired loans of \$268 million. Included in the impaired loans is \$190 million of loans which have no specific allowance allocation since the fair value of collateral-dependent loans or the present value of the loan's expected future cash flows (discounted at the loan's effective interest rate) is higher than the carrying value of such impaired loans. In determining the need for a specific allowance allocation on impaired loans, the effects of decreases in the fair value of the underlying collateral were considered.

Table of Contents

In evaluating the need for a specific or general allocation for impaired and unimpaired loans, respectively, within the Company's construction loan portfolio, including residential construction and land, lot and other construction loans, the credit risk related to such loans was considered in the ongoing monitoring of such loans, including assessments based on current information, including new or updated appraisals or evaluations of the underlying collateral, expected cash flows and the timing thereof, as well as the estimated cost to sell when such costs are expected to reduce the cash flows available to repay or otherwise satisfy the construction loan. Construction loans are 14 percent of the Company's total loan portfolio and account for 47 percent of the Company's non-accrual loans at September 30, 2011. Collateral securing construction loans includes residential buildings (e.g., single/multi-family and condominiums), commercial buildings, and associated land (multi-acre parcels and individual lots, with and without shorelines). Outstanding balances are centered in Western Montana and Northern Idaho, as well as Boise and Sun Valley, Idaho. None of the individual bank subsidiaries have a concentration of construction loans exceeding 5 percent of the Company's total loan portfolio.

As identified below, the following four bank subsidiaries had non-accrual construction loans that aggregated 5 percent or more of the Company's \$71.2 million of non-accrual construction loans at September 30, 2011. During the current quarter, non-accrual construction loans decreased \$14.1 million, or 17 percent, from \$85.3 million at June 30, 2011. Also identified below are the principal areas of the bank subsidiaries operations in which the collateral properties of such non-accrual construction loans are located:

Glacier	40 percent	Western Montana
First Security	27 percent	Western Montana
Mountain West	17 percent	Northern Idaho and Boise and Sun Valley, Idaho
Big Sky	11 percent	Western Montana

Residential non-accrual construction loans are 4 percent of the total construction loans on non-accrual status as of September 30, 2011. Unimproved land and land development loans collectively account for the bulk of the non-accrual commercial construction loans at the four bank subsidiaries. With locations and operations in the contiguous northern Rocky Mountain states of Idaho and Montana, the geography and economies of each of the four bank subsidiaries are predominantly tied to real estate development given the sprawling abundance of timbered valleys and mountainous terrain with significant lakes, streams and watershed areas. Consistent with the general economic downturn, the market for upscale primary, secondary and other housing as well as the associated construction and building industries have stalled after years of significant growth. As the housing market (rental and owner-occupied) and related industries continue to recover from the downturn, the Company continues to reduce its exposure to loss in the construction loan and other segments of the total loan portfolio.

Other-Than-Temporary Impairment on Securities Accounting Policy and Analysis

The Company views the determination of whether an investment security is temporarily or other-than-temporarily impaired as a critical accounting policy, as the estimate is susceptible to significant change from period to period because it requires management to make significant judgments, assumptions and estimates in the preparation of its consolidated financial statements. The Company assesses individual securities in its investment securities portfolio for impairment at least on a quarterly basis, and more frequently when economic or market conditions warrant. An investment is impaired if the fair value of the security is less than its carrying value at the financial statement date. If impairment is determined to be other-than-temporary, an impairment loss is recognized by reducing the amortized cost for the credit loss portion of the impairment with a corresponding charge to earnings for a like amount.

Table of Contents

For fair value estimates provided by third party vendors, management also considered the models and methodology for appropriate consideration of both observable and unobservable inputs, including appropriately adjusted discount rates and credit spreads for securities with limited or inactive markets, and whether the quoted prices reflect orderly transactions. For certain securities, the Company obtained independent estimates of inputs, including cash flows, in supplement to third party vendor provided information. The Company also reviewed financial statements of select issuers, with follow up discussions with issuers' management for clarification and verification of information relevant to the Company's impairment analysis.

Non-marketable equity securities owned at September 30, 2011 primarily consisted of stock issued by the FHLB of Seattle and Topeka, such shares measured at cost in recognition of the transferability restrictions imposed by the issuers. Other non-marketable equity securities include Federal Agriculture Mortgage Corporation and Bankers' Bank of the West Bancorporation, Inc.

With respect to FHLB stock, the Company evaluates such stock for other-than-temporary impairment. Such evaluation takes into consideration 1) FHLB deficiency, if any, in meeting applicable regulatory capital targets, including risk-based capital requirements, 2) the significance of any decline in net assets of the FHLB as compared to the capital stock amount for the FHLB and the time period for any such decline, 3) commitments by the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB, 4) the impact of legislative and regulatory changes on the FHLB, and 5) the liquidity position of the FHLB.

Based on the analysis of its impaired non-marketable equity securities as of September 30, 2011, the Company determined that none of such securities had other-than-temporary impairment.

The Company believes that macroeconomic conditions occurring during the first nine months of 2011 and in 2010 have unfavorably impacted the fair value of certain debt securities in its investment portfolio. On August 5, 2011, Standard and Poor's downgraded the United States long-term debt rating from its AAA rating to AA+. On August 8, 2011, Standard and Poor's downgraded from AAA to AA+ the credit ratings of certain long-term debt instruments issued by Fannie Mae and Freddie Mac and other U.S. government agencies linked to long-term United States debt. For debt securities with limited or inactive markets, the impact of these macroeconomic conditions upon fair value estimates includes higher risk-adjusted discount rates and downgrades in credit ratings provided by nationally recognized credit rating agencies, (e.g., Moody's, S&P, Fitch, and DBRS).

In evaluating debt securities for other-than-temporary impairment losses, management assesses whether the Company intends to sell the security or if it is more likely-than-not that the Company will be required to sell the debt security. In so doing, management considers contractual constraints, liquidity, capital, asset / liability management and securities portfolio objectives.

Table of Contents

The following table separates investments with an unrealized loss position at September 30, 2011 into two categories: investments purchased prior to 2011 and those purchased during 2011. Of those investments purchased prior to 2011, the fair value and unrealized loss at December 31, 2010 is also presented.

(Dollars in thousands)	September 30, 2011			December 31, 2010		
	Fair Value	Unrealized Loss	Unrealized Loss as a Percent of Fair Value	Fair Value	Unrealized Loss	Unrealized Loss as a Percent of Fair Value
State and local governments and other issues	\$ 21,046	(640)	-3.04%	20,167	(1,526)	-7.57%
Collateralized debt obligations	6,450	(2,487)	-38.56%	6,595	(4,583)	-69.49%
Residential mortgage-backed securities	146,291	(1,495)	-1.02%	217,340	(841)	-0.39%
Total temporarily impaired securities purchased prior to 2011	\$ 173,787	(4,622)	-2.66%	244,102	(6,950)	-2.85%
State and local governments and other issues	\$ 31,206	(1,016)	-3.26%			
Residential mortgage-backed securities	392,215	(2,432)	-0.62%			
Total temporarily impaired securities purchased during 2011	\$ 423,421	(3,448)	-0.81%			
State and local governments and other issues	\$ 52,252	(1,656)	-3.17%			
Collateralized debt obligations	6,450	(2,487)	-38.56%			
Residential mortgage-backed securities	538,506	(3,927)	-0.73%			
Total temporarily impaired securities	\$ 597,208	(8,070)	-1.35%			

With respect to severity, the following table provides the number of securities and amount of unrealized loss in the various ranges of unrealized loss as a percent of book value.

(Dollars in thousands)	Unrealized Loss	Number of Debt Securities
Greater than 30.0%	\$	
20.1% to 30.0%	(2,487)	6
15.1% to 20.0%	(338)	2
10.1% to 15.0%	(355)	1
5.1% to 10.0%	(940)	9
0.1% to 5.0%	(3,950)	236
Total	\$ (8,070)	254

With respect to the duration of the impaired debt securities, the Company identified 29 which have been continuously impaired for the twelve months ending September 30, 2011. The valuation history of such securities in the prior year(s) was also reviewed to determine the number of months in prior year(s) in which the identified securities was in an unrealized loss position. Of the 29 securities, 14 are state and local tax-exempt securities with an unrealized loss of \$623 thousand, the most notable of which had an unrealized loss of \$210 thousand. Of the 29 securities, 6 are identical CDO securities with an aggregate unrealized loss of \$2.5 million, the most notable of which had an unrealized loss of \$622 thousand.

Table of Contents

With respect to the CDO securities, each is in the form of a pooled trust preferred structure of which the Company owns a portion of the Senior Notes tranche. All of the assets underlying the pooled trust preferred structure are capital securities issued by trust subsidiaries of holding companies of banks and thrifts. Since December 31, 2009, the Senior Notes have been rated A3 by Moody's. The Senior Notes have also been rated as of September 30, 2011 by Fitch as BBB, such rating effective September 21, 2010. Prior to such downgrade, Fitch had rated the Senior Notes as A. As of September 30, 2011, 10 of the 26 trust subsidiaries compared to 9 of the 26 trust subsidiaries at December 31, 2010 were treated by the Trustee as in default, either because of an actual default or elective deferral of interest payments on their respective obligations. As of the end of the third and second quarters of 2010, 8 of the 26 trust subsidiaries were treated by the Trustee as in default on their respective obligations underlying the CDO structure. As of the end of the first quarter of 2010 and the fourth quarter of 2009, 6 of the 26 trust subsidiaries were treated as in default compared to 3 of the 26 trust subsidiaries treated as in default on their respective obligations as of the end of the first three quarters of 2009. In accordance with the prospectus for the CDO structure, the priority of payments favors holders of the Senior Notes over holders of the Mezzanine Notes and Income Notes. Though the maturity of the CDO structure is June 15, 2031, 40.4 percent of the outstanding principal of the Senior Notes has been prepaid through September 30, 2011. More specifically, at any time the Senior Notes are outstanding, if either the Senior Principle or Senior Interest Coverage Tests (the Senior Coverage Tests) are not satisfied as of a calculation date, then funds that would have otherwise been used to make payments on the Mezzanine Notes or Income Notes shall instead be applied as principle prepayments on the Senior Notes. Both the Senior Principle Coverage Test and the Senior Interest Test exceeded their threshold levels. For the first three quarters of 2011 and the preceding five quarters, the Senior Principle Coverage Test was below its threshold level, while the Senior Interest Coverage Test exceeded its threshold level. The Senior Coverage Tests exceeded the threshold levels for each of the first three quarters of 2009. In its assessment of the Senior Notes for potential other-than-temporary impairment, the Company evaluated the underlying issuers and engaged a third party vendor to stress test the performance of the underlying capital securities and related obligors. Such stress testing has been performed at the end of each quarter of 2011, 2010 and 2009. In each instance of stress testing, the results reflect no credit loss for the Senior Notes. In evaluating such results, the Company reviewed with the third party vendor the stress test assumptions and concurred with the analyses in concluding that the impairment at September 30, 2011 and at the end of each of the prior quarters of 2011, 2010 and 2009 was temporary, and not other-than-temporary.

Of the 29 securities temporarily impaired continuously for the twelve months ended September 30, 2011, 7 are non-guaranteed private label whole loan mortgages with an aggregate unrealized loss of \$427 thousand, the most notable of which had an unrealized loss of \$304 thousand. Of the 7 non-guaranteed private label whole loan mortgages, 5 are collateralized by 30-year fixed rate residential mortgages considered to be Prime and 2 are collateralized by 30-year fixed rate residential mortgages considered to be ALT A. Moreover, none of the underlying mortgage collateral is considered subprime.

The Company engages a third-party to perform detailed analysis for other-than-temporary impairment of such securities. Such analysis takes into consideration original and current data for the tranche and CMO structure, the non-guaranteed classification of each CMO tranche, current and deal inception credit ratings, credit support (protection) afforded the tranche through the subordination of other tranches in the CMO structure, the nature of the collateral (e.g., Prime or Alt-A) underlying each CMO tranche, and realized cash flows since purchase. When available, the collateral loss estimates are compared against loss estimates obtained from the credit rating agencies for the CMO structure and the resulting impact upon the tranche.

Table of Contents

The analysis includes performance projections based upon cash flow assumptions designed to assess risk by capturing key performance data and trends such as delinquencies, severity of defaults, severity of collateral loss, and a range of prepayment speeds taking into account both voluntary (CRR) and involuntary (CDR) payments and the seniority of the CMO tranche within the CMO deal. The projected cash flows incorporate a range of macroeconomic trends, including for example, interest rates, gross domestic product and employment, as well as home price appreciation/depreciation (HPA) and geographic affordability (Geo Aff).

HPA is a primary driver of credit performance in addition to loan characteristics. Negative HPA refers to declining house price appreciation (i.e., depreciation in essence). HPA scenarios are performed at loan-level capturing characteristics such as loan-to-value, credit scores (e.g., FICO), loan type, occupancy, purpose, and geography. Geo Aff is also a house price appreciation scenario and such refers to house price affordability levels by geography (relative to income). Prior to performing any HPA or Geo Aff-based analysis, significant fine-tuning adjustments are made to factor in the current state of the housing market. Tuning adjustments include delinquency roll rates, cure rates, voluntary prepayments, loan-to-values, and credit scores. Additionally, other factors used in the analyses are updated for current market conditions and trends, including loss severities and collateral loss estimates provided by the credit rating agencies for the CMO structures.

Based on the analysis of its impaired debt securities as of September 30, 2011, the Company determined that none of such securities had other-than-temporary impairment.

Goodwill Impairment

The Company tests goodwill and other intangible assets for impairment at the reporting unit level (i.e., bank subsidiaries) annually during the third quarter. In addition, goodwill and other intangible assets of a subsidiary are tested for impairment between annual tests if an event occurs or circumstances change that would more-likely-than not reduce the fair value of a reporting units below its carrying amount. Examples of events and circumstances that could trigger the need for interim impairment testing include:

A significant change in legal factors or in the business climate;

An adverse action or assessment by a regulator;

Unanticipated competition;

A loss of key personnel;

A more-likely-than-not expectation that a reporting unit or a significant portion of a reporting unit will be sold or otherwise disposed of; and

The testing for recoverability of a significant asset group within a reporting unit.

The goodwill impairment test is a two-step process which requires the Company to make assumptions and judgments regarding fair value. In the first step for evaluating for possible impairment, the Company compares the estimated fair value of its reporting units to the carrying value, which includes goodwill. If the estimated fair value is less than the carrying value, the second step is completed to compute the impairment amount, if any, by determining the implied fair value of goodwill. This determination requires the allocation of the estimated fair value of the reporting units to the assets and liabilities of the reporting units. Any remaining unallocated fair value represents the implied fair value of goodwill, which is compared to the corresponding carrying value of goodwill to compute impairment, if any. A recent FASB amendment provides the Company the option, prior to the two-step process, to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more-likely-than-not that the fair value of the a reporting unit is less than its carrying value. The Company chose not to early adopt this amendment during the third quarter 2011.

Table of Contents

During the third quarter of 2011, there were high levels of volatility and dislocation in bank stock prices nationwide, such that the Company's stock was trading at prices that were below the Company's book value per share for August and September and soft economic conditions continued in certain market areas of the Company. Due to such factors, as well as the Company's internal evaluation process, the Company engaged an independent valuation firm to determine the implied fair value of Mountain West and 1st Bank. These two bank subsidiaries were selected because of Mountain West's losses and decline in credit quality and 1st Bank's significant amount of goodwill relative to its total assets. As part of step one of the goodwill impairment test, the independent valuation firm estimated the fair value of each of these bank subsidiaries using the quoted market prices of other publicly traded depository banks and thrifts, discounted cash flows and inputs from comparable acquisition transactions. Based on the estimated fair value, it was determined the valuation firm should proceed to step two of the goodwill impairment test whereby the firm valued the assets and liabilities of these banks and concluded that the implied fair value of goodwill was less than the current carrying value of goodwill for each of these two banks. As a result of the valuation, the Company recognized goodwill impairment charges of \$23.2 million (\$15.6 million after-tax) and \$17.0 million at Mountain West and 1st Bank, respectively.

For the remaining eight bank subsidiaries each with goodwill, the Company determined an independent valuation was not necessary based on the Company's analysis of each of the separate bank subsidiaries' goodwill carrying value, earnings, capital and credit quality metrics as of September 30, 2011. For each of these bank subsidiaries, the Company performed the first step in evaluating goodwill for possible impairment utilizing data provided by the independent valuation firm. The Company determined an estimated fair value based on such data and applying premiums and discounts that took into account each of the individual bank subsidiaries' earnings, capital and credit quality metrics as of September 30, 2011. In addition, the Company determined the Company's estimated fair value and compared such value to the Company's market capitalization at September 30, 2011 to calculate an implied control premium for the Company. The implied control premium was determined to be reasonable based upon estimated control premiums provided by an independent third party. Based on the results of these tests, the Company concluded it did not need to proceed to step two of the goodwill impairment testing process for any of the eight bank subsidiaries with goodwill. Based on such analysis, there is no goodwill impairment as of September 30, 2011 at any of the remaining eight bank subsidiaries each with goodwill.

Significant judgment was applied in assessing goodwill for impairment and the Company believes the assumptions utilized were reasonable and appropriate. In addition, the Company continues to maintain \$106 million in goodwill on its balance sheet and future adverse changes in the economic environment, operating results of the reporting units, or other factors could result in future goodwill impairment.

Federal and State Income Taxes

Income tax (benefit) expense for the nine months ended September 30, 2011 and 2010 was (\$2.7) million and \$7.4 million, respectively. The Company's effective tax rate for the nine months ended September 30, 2011 and 2010 was -619.59 percent and 18.49 percent, respectively. The primary reason for the current year negative effective tax rate is the low pre-tax income of \$434 thousand which was mainly a result of the \$40.2 million goodwill impairment charge. In addition to the current year goodwill impairment charge, the significant reasons for the low effective rates are the amount of tax-exempt investment income and federal tax credits. The tax-exempt income was \$23.0 million and \$17.4 million for the nine months ended September 30, 2011 and 2010, respectively. The federal income tax credit benefits were \$663 thousand and \$2.5 million for the three and nine months ended September 30, 2011, respectively, and \$300 thousand and \$1.8 million for three and nine months ended September 30, 2010, respectively.

Table of Contents

The Company has equity investments in Certified Development Entities which have received allocations of new markets tax credits (NMTC). Administered by the Community Development Financial Institutions Fund of the U.S. Department of the Treasury, the NMTC program is aimed at stimulating economic and community development and job creation in low-income communities. The federal income tax credits received are claimed over a seven-year credit allowance period. The Company also has equity investments in low-income housing tax credits which are indirect federal subsidies used to finance the development of affordable rental housing for low-income households. The federal income tax credits received are claimed over a ten-year credit allowance period. The Company has investments in Qualified Zone Academy and Qualified School Construction bonds whereby the Company receives quarterly federal income tax credits in lieu of taxable interest income until the bonds mature. The federal income tax credits on these bonds are subject to federal and state income tax.

Following is a list of expected federal income tax credits to be received in the years indicated.

Years ended	New Markets Tax Credits	Low-Income Housing Tax Credits	Investment Securities Tax Credits	Total
(Dollars in thousands)				
2011	\$ 2,375	1,176	953	4,504

Net interest margin	3.68%	3.71%
Net interest margin (tax-equivalent)	3.92%	3.95%

¹ Excludes tax effect of \$3,634,000 and \$10,090,000 on tax-exempt investment security income for the three and nine months ended September 30, 2011, respectively.

² Excludes tax effect of \$392,000 and \$1,176,000 on investment security tax credits for the three and nine months ended September 30, 2011, respectively.

³ Wholesale deposits include brokered deposits classified as NOW, money market deposit, and certificate accounts.

Table of Contents**Rate/Volume Analysis**

Net interest income can be evaluated from the perspective of relative dollars of change in each period. Interest income and interest expense, which are the components of net interest income, are shown in the following table on the basis of the amount of any increases (or decreases) attributable to changes in the dollar levels of the Company's interest-earning assets and interest-bearing liabilities (Volume) and the yields earned and rates paid on such assets and liabilities (Rate). The change in interest income and interest expense attributable to changes in both volume and rates has been allocated proportionately to the change due to volume and the change due to rate.

(Dollars in thousands)	Nine Months ended September 30, 2011 vs. 2010		
	Increase (Decrease) Due to:		
	Volume	Rate	Net
Interest income			
Residential real estate loans	\$ (8,945)	(814)	(9,759)
Commercial loans	(7,960)	(2,829)	(10,789)
Consumer and other loans	(171)	(903)	(1,074)
Investment securities	24,349	(10,678)	13,671
Total interest income	7,273	(15,224)	(7,951)
Interest expense			
NOW accounts	157	(639)	(482)
Savings accounts	74	(220)	(146)
Money market deposit accounts	239	(2,906)	(2,667)
Certificate accounts	26	(3,376)	(3,350)
Wholesale deposits	533	(1,693)	(1,160)
FHLB advances	2,986	(937)	2,049
Repurchase agreements, federal funds purchased and other borrowed funds	(125)	(1,036)	(1,161)
Total interest expense	3,890	(10,807)	(6,917)
Net interest income	\$ 3,383	(4,417)	(1,034)

Liquidity Risk

Liquidity risk is the possibility that the Company will not be able to fund present and future obligations as they come due because of an inability to liquidate assets or obtain adequate funding at a reasonable cost. The objective of liquidity management is to maintain cash flows adequate to meet current and future needs for credit demand, deposit withdrawals, maturing liabilities and corporate operating expenses. Effective liquidity management entails three elements:

1. Assessing on an ongoing basis, the current and expected future needs for funds, and ensuring that sufficient funds or access to funds exist to meet those needs at the appropriate time.
2. Providing for an adequate cushion of liquidity to meet unanticipated cash flow needs that may arise from potential adverse circumstances ranging from high probability/low severity events to low probability/high severity.
3. Balancing the benefits between providing for adequate liquidity to mitigate potential adverse events and the cost of that liquidity.

Table of Contents

The Banks' primary sources of funds are customer deposits, receipts of principal and interest payments on loans and investment securities, proceeds from sale of loans and securities, short and long-term borrowings. In addition, the Company maintains liquidity capacity through secured and unsecured borrowing programs, wholesale deposit relationships, and unencumbered securities. The following table identifies certain liquidity sources and capacity available to the Company at September 30, 2011:

(Dollars in thousands)	September 30, 2011
FHLB advances	
Borrowing capacity	\$ 1,103,040
Amount utilized	(889,053)
Amount available	\$ 213,987
Federal Reserve Bank discount window	
Borrowing capacity	\$ 255,766
Amount utilized	
Amount available	\$ 255,766
Unsecured lines of credit available	\$ 138,760
Unencumbered securities	
U.S. government and federal agency	\$ 209
U.S. government sponsored enterprises	4,542
State and local governments and other issues	945,901
Collateralized debt obligations	6,450
Residential mortgage-backed securities	968,062
Total unencumbered securities	\$ 1,925,164

The Company and each of the bank subsidiaries has a wide range of versatility in managing the liquidity and asset/liability mix across each of the bank subsidiaries as well as the Company as a whole. Asset liability committees (ALCO) are maintained at the Parent and bank subsidiary levels with the ALCO committees meeting regularly to assess liquidity risk, among other matters. The Company monitors liquidity and contingency funding alternatives through management reports of liquid assets (e.g., investment securities), both unencumbered and pledged, as well as borrowing capacity, both secured and unsecured.

Capital Resources

Maintaining capital strength continues to be a long-term objective. Abundant capital is necessary to sustain growth, provide protection against unanticipated declines in asset values, and to safeguard the funds of depositors. Capital also is a source of funds for loan demand and enables the Company to effectively manage its assets and liabilities.

Table of Contents

The Federal Reserve Board has adopted capital adequacy guidelines that are used to assess the adequacy of capital in supervising a bank holding company. Each bank subsidiary was considered well capitalized by their respective regulator as of September 30, 2011 and December 31, 2010. There are no conditions or events since September 30, 2011 that management believes have changed the Company's or bank subsidiaries risk-based capital category. The following table illustrates the Federal Reserve Board's capital adequacy guidelines and the Company's compliance with those guidelines as of September 30, 2011.

(Dollars in thousands)	Tier 1 (Core) Capital	Tier 2 (Total) Capital	Leverage Capital
Total stockholders' equity	\$ 851,388	851,388	851,388
Less:			
Goodwill and intangibles	(113,252)	(113,252)	(113,252)
Net unrealized gain on investment securities	(39,650)	(39,650)	(39,650)
Other adjustments	(65)	(65)	(65)
Plus:			
Allowance for loan and lease losses		55,502	
Subordinated debentures	124,500	124,500	124,500
Regulatory capital	\$ 822,921	878,423	822,921
Risk weighted assets	\$ 4,357,575	4,357,575	
Total adjusted average assets			\$ 6,740,391
Capital as % of risk weighted assets	18.88%	20.16%	12.21%
Regulatory well capitalized requirement	6.00%	10.00%	
Excess over well capitalized requirement	12.88%	10.16%	

Dividend payments were \$0.39 per share for the nine months ended September 30, 2011. The payment of dividends is subject to government regulation in that regulatory authorities may prohibit banks and bank holding companies from paying dividends that would constitute an unsafe or unsound banking practice. Additionally, current guidance from the Federal Reserve provides, among other things, that dividends per share on the Company's common stock generally should not exceed earnings per share measured over the previous four fiscal quarters.

In addition to the primary and safeguard liquidity sources available, the Company has the capacity to issue 117,187,500 shares of common stock of which 71,915,073 has been issued as of September 30, 2011. The Company's capacity to issue additional shares has been demonstrated with the most recent stock issuances in 2010 and 2008, although no assurances can be made that future stock issuances would be as successful. The Company also has the capacity to issue 1,000,000 shares of preferred shares of which none are currently issued.

Short-term borrowings

A critical component of the Company's liquidity and capital resources is access to short-term borrowings to fund its operations. Short-term borrowings are accompanied by increased risks managed by ALCO such as rate increases or unfavorable change in terms which would make it more costly to obtain future short-term borrowings. The Company's short-term borrowing sources include FHLB advances, discount window borrowings, federal funds purchased, wholesale deposits, wholesale repurchase agreements, and Federal Reserve Bank. FHLB advances and certain other short-term borrowings may be extended as long-term borrowings to decrease certain risks such as liquidity or interest rate risk; however, the reduction in risks are weighed against the increased cost of funds.

Table of Contents

The following table provides information relating to short-term borrowings which consists of borrowings that mature within one year of period end:

(Dollars in thousands)	At or for the Nine Months ended September 30, 2011	At or for the Year ended December 31, 2010
Repurchase agreements		
Amount outstanding at end of period	\$ 301,820	249,403
Weighted interest rate on outstanding amount	0.48%	0.63%
Maximum outstanding at any month-end	\$ 305,536	252,083
Average balance	\$ 254,602	227,202
Weighted average interest rate	0.54%	0.71%
FHLB advances		
Amount outstanding at end of period	\$ 592,000	761,064
Weighted interest rate on outstanding amount	0.73%	0.32%
Maximum outstanding at any month-end	\$ 877,017	773,076
Average balance	\$ 712,347	488,044
Weighted average interest rate	0.68%	0.39%

Commitments

In the normal course of business, there are various outstanding commitments to extend credit, such as letters of credit and un-advanced loan commitments, which are not reflected in the accompanying condensed consolidated financial statements. Management does not anticipate any material losses as a result of these transactions. The Company has outstanding debt maturities, the largest aggregate amount of which are FHLB advances.

Effect of inflation and changing prices

Generally accepted accounting principles often require the measurement of financial position and operating results in terms of historical dollars, without consideration for change in relative purchasing power over time due to inflation. Virtually all assets of the Company and each bank subsidiary are monetary in nature; therefore, interest rates generally have a more significant impact on a company's performance than does the effect of inflation.

ITEM 3. Quantitative and Qualitative Disclosure about Market Risk

The Company believes that there have not been any material changes in information about the Company's market risk than was provided in the Form 10-K report for the year ended December 31, 2010.

ITEM 4. Controls and Procedures**Evaluation of Disclosure Controls and Procedures**

The Company's Chief Executive Officer and Chief Financial Officer have reviewed and evaluated the effectiveness of our disclosure controls and procedures (as required by Exchange Act Rules 240.13a-15(b) and 15d-14(c)) as of the date of this quarterly report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's current disclosure controls and procedures are effective and timely, providing them with material information relating to the Company required to be disclosed in the reports the Company files or submits under the Exchange Act.

Table of Contents

Changes in Internal Controls

There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the third quarter 2011, to which this report relates that have materially affected, or are reasonably likely to materially affect the Company's internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. Legal Proceedings

There are no pending material legal proceedings to which the registrant or its subsidiaries are a party.

ITEM 1A. Risk Factors

The Company and its eleven independent wholly-owned community bank subsidiaries are exposed to certain risks. The following is a discussion of the most significant risks and uncertainties that may affect the Company's business, financial condition and future results.

The continued challenging economic environment could have a material adverse effect on the Company's future results of operations or market price of stock.

The national economy, and the financial services sector in particular, are still facing significant challenges. Substantially all of the Company's loans are to businesses and individuals in Montana, Idaho, Wyoming, Utah, Colorado and Washington, markets facing many of the same challenges as the national economy, including elevated unemployment and declines in commercial and residential real estate. Although some economic indicators are improving both nationally and in the Company's markets, unemployment remains high and there remains substantial uncertainty regarding when and how strongly a sustained economic recovery will occur, and whether there will be another recession. These economic conditions can cause borrowers to be unable to pay their loans. The inability of borrowers to repay loans can erode earnings by reducing net interest income and by requiring the Company to add to its allowance for loan and lease losses. While the Company cannot accurately predict how long these conditions may exist, the challenging economy could continue to present risks for some time for the industry and Company. A further deterioration in economic conditions in the nation as a whole or in the Company's markets could result in the following consequences, any of which could have an adverse impact, which may be material, on the Company's business, financial condition, results of operations and prospects, and could also cause the market price of the Company's stock to decline:

loan delinquencies may increase further;

problem assets and foreclosures may increase further;

collateral for loans made may decline further in value, in turn reducing customers' borrowing power, reducing the value of assets and collateral associated with existing loans and increasing the potential severity of loss in the event of loan defaults;

demand for banking products and services may decline; and

low cost or non-interest bearing deposits may decrease.

Table of Contents

The allowance for loan and lease losses may not be adequate to cover actual loan losses, which could adversely affect earnings.

The Company maintains an ALLL in an amount that it believes is adequate to provide for losses in the loan portfolio. While the Company strives to carefully manage and monitor credit quality and to identify loans that may become non-performing, at any time there are loans included in the portfolio that will result in losses, but that have not been identified as non-performing or potential problem loans. By closely monitoring credit quality, the Company attempts to identify deteriorating loans before they become non-performing assets and adjust the ALLL accordingly. However, because future events are uncertain, and if difficult economic conditions continue or worsen, there may be loans that deteriorate to a non-performing status in an accelerated time frame. As a result, future additions to the ALLL may be necessary. Because the loan portfolio contains a number of loans with relatively large balances, the deterioration of one or a few of these loans may cause a significant increase in non-performing loans, requiring an increase to the ALLL. Additionally, future significant additions to the ALLL may be required based on changes in the mix of loans comprising the portfolio, changes in the financial condition of borrowers, which may result from changes in economic conditions, or changes in the assumptions used in determining the ALLL. Additionally, federal banking regulators, as an integral part of their supervisory function, periodically review the Company's loan portfolio and the adequacy of the ALLL. These regulatory agencies may require the Company to recognize further loan loss provisions or charge-offs based upon their judgments, which may be different from the Company's judgments. Any increase in the ALLL would have an adverse effect, which could be material, on the Company's financial condition and results of operations.

The Company has a high concentration of loans secured by real estate, so any further deterioration in the real estate markets could require material increases in ALLL and adversely affect the Company's financial condition and results of operations.

The Company has a high degree of concentration in loans secured by real estate. A sluggish recovery, or a continuation of the downturn in the economic conditions or real estate values of the Company's market areas, could adversely impact borrowers' ability to repay loans secured by real estate and the value of real estate collateral, thereby increasing the credit risk associated with the loan portfolio. The Company's ability to recover on these loans by selling or disposing of the underlying real estate collateral is adversely impacted by declining real estate values, which increases the likelihood that the Company will suffer losses on defaulted loans secured by real estate beyond the amounts provided for in the ALLL. This, in turn, could require material increases in the ALLL which would adversely affect the Company's financial condition and results of operations, perhaps materially.

There can be no assurance the Company will be able to continue paying dividends on the common stock at recent levels.

The ability to pay dividends on the Company's common stock depends on a variety of factors. The Company paid dividends of \$0.13 per share in each quarter of 2010 and the first three quarters of 2011. The Company may not be able to continue paying quarterly dividends commensurate with recent levels. In that regard, the Federal Reserve now is requiring the Company to provide prior written notice and related information for staff review before declaring or paying dividends. In addition, current guidance from the Federal Reserve provides, among other things, that dividends per share generally should not exceed earnings per share. As a result, future dividends will generally depend on the sufficiency of earnings. Furthermore, the Company's ability to pay dividends depends on the amount of dividends paid to the Company by its subsidiaries, which is also subject to government regulation, oversight and review. In addition, the ability of some of the bank subsidiaries to pay dividends to the Company is subject to prior regulatory approval.

Table of Contents

The Company may not be able to continue to grow organically or through acquisitions.

Historically, the Company has expanded through a combination of organic growth and acquisitions. If market and regulatory conditions remain challenging, the Company may be unable to grow organically or successfully complete potential future acquisitions. In particular, while the Company intends to focus any near-term acquisition efforts on FDIC-assisted transactions within its existing market areas, there can be no assurance that such opportunities will become available on terms that are acceptable to the Company. Furthermore, there can be no assurance that the Company can successfully complete such transactions, since they are subject to a formal bid process and regulatory review and approval.

The FDIC has increased insurance premiums to rebuild and maintain the federal deposit insurance fund and there may be additional future premium increases and special assessments.

In 2009, the FDIC imposed a special deposit insurance assessment of five basis points on all insured institutions, and also required insured institutions to prepay estimated quarterly risk-based assessments through 2012.

The Dodd-Frank Act established 1.35 percent as the minimum deposit insurance fund reserve ratio. The FDIC has determined that the fund reserve ratio should be 2.0 percent and has adopted a plan under which it will meet the statutory minimum fund reserve ratio of 1.35 percent by the statutory deadline of September 30, 2020. The Dodd-Frank Act requires the FDIC to offset the effect on institutions with assets less than \$10 billion of the increase in the statutory minimum fund reserve ratio to 1.35 percent from the former statutory minimum of 1.15 percent. The FDIC has not announced how it will implement this offset or how larger institutions will be affected by it.

Despite the FDIC's actions to restore the deposit insurance fund, the fund will suffer additional losses in the future due to failures of insured institutions. There could be additional significant deposit insurance premium increases, special assessments or prepayments in order to restore the insurance fund's reserve ratio. Any significant premium increases or special assessments could have a material adverse effect on the Company's financial condition and results of operations.

The Company's loan portfolio mix increases the exposure to credit risks tied to deteriorating conditions.

The loan portfolio contains a high percentage of commercial, commercial real estate, real estate acquisition and development loans in relation to the total loans and total assets. These types of loans have historically been viewed as having more risk of default than residential real estate loans or certain other types of loans or investments. In fact, the FDIC has issued pronouncements alerting banks of its concern about banks with a heavy concentration of commercial real estate loans. These types of loans also typically are larger than residential real estate loans and other commercial loans. Because the Company's loan portfolio contains a significant number of commercial and commercial real estate loans with relatively large balances, the deterioration of one or more of these loans may cause a significant increase in non-performing loans. An increase in non-performing loans could result in a loss of earnings from these loans, an increase in the provision for loan losses, or an increase in loan charge-offs, which could have a material adverse impact on results of operations and financial condition.

Table of Contents

Non-performing assets have increased and could continue to increase, which could adversely affect the Company's results of operations and financial condition.

Non-performing assets (which include foreclosed real estate) adversely affect the Company's net income and financial condition in various ways. The Company does not record interest income on non-accrual loans or other real estate owned, thereby adversely affecting its income. When the Company takes collateral in foreclosures and similar proceedings, it is required to mark the related asset to the then fair market value of the collateral, less estimated cost to sell, which may result in a charge-off of the value of the asset and lead the Company to increase the provision for loan losses. An increase in the level of non-performing assets also increases the Company's risk profile and may impact the capital levels its regulators believe are appropriate in light of such risks. Continued decreases in the value of these assets, or the underlying collateral, or in these borrowers' performance or financial condition, whether or not due to economic and market conditions beyond the Company's control, could adversely affect the Company's business, results of operations and financial condition, perhaps materially. In addition to the carrying costs to maintain other real estate owned, the resolution of non-performing assets increases the Company's loan administration costs generally, and requires significant commitments of time from management and the Company's directors, which reduces the time they have to focus on growing the Company's business. The Company may experience further increases in non-performing assets in the future.

A decline in the fair value of the Company's investment portfolio could adversely affect earnings.

The fair value of the Company's investment securities could decline as a result of factors including changes in market interest rates, credit quality and ratings, lack of market liquidity and other economic conditions. Investment securities are impaired if the fair value of the security is less than the carrying value. When a security is impaired, the Company determines whether impairment is temporary or other-than-temporary. If an impairment is determined to be other-than-temporary, an impairment loss is recognized by reducing the amortized cost only for the credit loss associated with an other-than-temporary loss with a corresponding charge to earnings for a like amount. Any such impairment charge would have an adverse effect, which could be material, on the Company's results of operations and financial condition.

Recent and/or future U.S. credit downgrades or changes in outlook by major credit rating agencies may have an adverse effect on financial markets, including financial institutions and the financial industry.

On August 5, 2011, Standard and Poor's downgraded the United States long-term debt rating from its AAA rating to AA+. On August 8, 2011, Standard and Poor's downgraded from AAA to AA+ the credit ratings of certain long-term debt instruments issued by Fannie Mae and Freddie Mac and other U.S. government agencies linked to long-term United States debt. It is difficult to predict the effect of these actions, or any future downgrades or changes in outlook by Standard & Poor's or either of the other two major credit rating agencies. However, these events could impact the trading market for U.S. government securities, including agency securities, and the securities markets more broadly, and consequently could impact the value and liquidity of financial assets, including assets in the Company's investment portfolio. These actions could also create broader financial turmoil and uncertainty, which may negatively affect the global banking system and limit the availability of funding, including borrowing under repurchase agreements, at reasonable terms. In turn, this could have a material adverse effect on the Company's liquidity, financial condition and results of operations.

Table of Contents

Fluctuating interest rates can adversely affect profitability.

The Company's profitability is dependent to a large extent upon net interest income, which is the difference (or spread) between the interest earned on loans, securities and other interest-earning assets and interest paid on deposits, borrowings, and other interest-bearing liabilities. Because of the differences in maturities and repricing characteristics of interest-earning assets and interest-bearing liabilities, changes in interest rates do not produce equivalent changes in interest income earned on interest-earning assets and interest paid on interest-bearing liabilities. Accordingly, fluctuations in interest rates could adversely affect the Company's interest rate spread, and, in turn, profitability. The Company seeks to manage its interest rate risk within well established guidelines. Generally, the Company seeks an asset and liability structure that insulates net interest income from large deviations attributable to changes in market rates. However, the Company's structures and practices to manage interest rate risk may not be effective in a highly volatile rate environment.

If the goodwill recorded in connection with acquisitions becomes impaired, it could have an adverse impact on earnings and capital.

Accounting standards require that the Company account for acquisitions using the acquisition method of accounting. Under acquisition accounting, if the purchase price of an acquired company exceeds the fair value of its net assets, the excess is carried on the acquirer's balance sheet as goodwill. In accordance with generally accepted accounting principles in the United States of America, goodwill is not amortized but rather is evaluated for impairment on an annual basis or more frequently if events or circumstances indicate that a potential impairment exists. The Company has incurred an impairment of goodwill of \$40.2 million (\$32.6 million after-tax) during the third quarter of 2011. The Company continues to maintain \$106 million in goodwill on its balance sheet and there can be no assurance that future evaluations of goodwill will not result in findings of additional impairment and write-downs, which could be material. While a non-cash item, additional impairment of goodwill could have a material adverse effect on the Company's business, financial condition and results of operations. Furthermore, additional impairment of goodwill could subject the Company to regulatory limitations, including the ability to pay dividends on common stock.

Growth through future acquisitions could, in some circumstances, adversely affect profitability or other performance measures.

The Company has in recent years acquired other financial institutions. The Company may in the future engage in selected acquisitions of additional financial institutions, including transactions that may receive assistance from the FDIC, although the Company may not be able to successfully complete any such transactions. There are risks associated with any such acquisitions that could adversely affect profitability and other performance measures. These risks include, among other things, incorrectly assessing the asset quality of a financial institution being acquired, encountering greater than anticipated cost of integrating acquired businesses into the Company's operations, and being unable to profitably deploy funds acquired in an acquisition. The Company may not be able to continue to grow through acquisitions, and if it does there is a risk of negative impacts of such acquisitions on the Company's operating results and financial condition.

The Company anticipates that it might issue capital stock in connection with future acquisitions. Acquisitions and related issuances of stock may have a dilutive effect on earnings per share and the percentage ownership of current shareholders.

Table of Contents

A tightening of the credit markets may make it difficult to obtain adequate funding for loan growth, which could adversely affect earnings.

A tightening of the credit markets and the inability to obtain or retain adequate funds for continued loan growth at an acceptable cost may negatively affect the Company's asset growth and liquidity position and, therefore, earnings capability. In addition to core deposit growth, maturity of investment securities and loan payments, the Company also relies on alternative funding sources through correspondent banking, and borrowing lines with the Federal Reserve Bank and FHLB to fund loans. In the event the current economic downturn continues, particularly in the housing market, these resources could be negatively affected, both as to price and availability, which would limit and or raise the cost of the funds available to the Company.

The Company may pursue additional capital in the future, which could dilute the holders of the Company's outstanding common stock and may adversely affect the market price of common stock.

In the current economic environment, the Company believes it is prudent to consider alternatives for raising capital when opportunities to raise capital at attractive prices present themselves, in order to further strengthen the Company's capital and better position itself to take advantage of opportunities that may arise in the future. Such alternatives may include issuance and sale of common or preferred stock or borrowings by the Company, with proceeds contributed to the bank subsidiaries. Any such capital raising alternatives could dilute the holders of the Company's outstanding common stock, and may adversely affect the market price of the Company's common stock and performance measures such as earnings per share.

Business would be harmed if the Company lost the services of any of the senior management team.

The Company believes its success to date has been substantially dependent on its Chief Executive Officer and other members of the executive management team, and on the Presidents of its bank subsidiaries. The loss of any of these persons could have an adverse effect on the Company's business and future growth prospects.

Competition in the Company's market areas may limit future success.

Commercial banking is a highly competitive business. The Company competes with other commercial banks, savings and loan associations, credit unions, finance, insurance and other non-depository companies operating in its market areas. The Company is subject to substantial competition for loans and deposits from other financial institutions. Some of its competitors are not subject to the same degree of regulation and restriction as the Company. Some of the Company's competitors have greater financial resources than the Company. If the Company is unable to effectively compete in its market areas, the Company's business, results of operations and prospects could be adversely affected.

The Company operates in a highly regulated environment and changes or increases in, or supervisory enforcement of, banking or other laws and regulations or governmental fiscal or monetary policies could adversely affect the Company.

The Company is subject to extensive regulation, supervision and examination by federal and state banking authorities. In addition, as a publicly-traded company, the Company is subject to regulation by the Securities and Exchange Commission. Any change in applicable regulations or federal, state or local legislation or in policies or interpretations or regulatory approaches to compliance and enforcement, income tax laws and accounting principles could have a substantial impact on the Company and its operations. Changes in laws and regulations may also increase expenses by imposing additional fees or taxes or restrictions on operations. Additional legislation and regulations that could significantly affect powers, authority and operations may be enacted or adopted in the future, which could have a material adverse effect on the Company's financial condition and results of operations. Failure to appropriately comply with any such laws, regulations or principles could result in sanctions by regulatory agencies or damage to the Company's reputation, all of which could adversely affect the Company's business, financial condition or results of operations.

Table of Contents

In that regard, sweeping financial regulatory reform legislation was enacted in July 2010. Among other provisions, the new legislation 1) creates a new Bureau of Consumer Financial Protection with broad powers to regulate consumer financial products such as credit cards and mortgages, 2) creates a Financial Stability Oversight Council comprised of the heads of other regulatory agencies, 3) will lead to new capital requirements from federal banking agencies, 4) places new limits on electronic debt card interchange fees, and 5) requires the Securities and Exchange Commission and national stock exchanges to adopt significant new corporate governance and executive compensation reforms. The new legislation and regulations are expected to increase the overall costs of regulatory compliance.

Further, regulators have significant discretion and authority to prevent or remedy unsafe or unsound practices or violations of laws or regulations by financial institutions and holding companies in the performance of their supervisory and enforcement duties. Recently, these powers have been utilized more frequently due to the serious national, regional and local economic conditions the Company is facing. The exercise of regulatory authority may have a negative impact on the Company's financial condition and results of operations. Additionally, the Company's business is affected significantly by the fiscal and monetary policies of the U.S. federal government and its agencies, including the Federal Reserve Board.

The Company cannot accurately predict the full effects of recent legislation or the various other governmental, regulatory, monetary and fiscal initiatives which have been and may be enacted on the financial markets, on the Company and on its bank subsidiaries. The terms and costs of these activities, or the failure of these actions to help stabilize the financial markets, asset prices, market liquidity and a continuation or worsening of current financial market and economic conditions could materially and adversely affect the Company's business, financial condition, results of operations, and the trading price of the Company's common stock.

The Company has various anti-takeover measures that could impede a takeover.

The Company's articles of incorporation include certain provisions that could make more difficult the acquisition of the Company by means of a tender offer, a proxy contest, merger or otherwise. These provisions include a requirement that any Business Combination (as defined in the articles of incorporation) be approved by at least 80 percent of the voting power of the then-outstanding shares, unless it is either approved by the Board of Directors or certain price and procedural requirements are satisfied. In addition, the authorization of preferred stock, which is intended primarily as a financing tool and not as a defensive measure against takeovers, may potentially be used by management to make more difficult uninvited attempts to acquire control of the Company. These provisions may have the effect of lengthening the time required for a person to acquire control of the Company through a tender offer, proxy contest or otherwise, and may deter any potentially unfriendly offers or other efforts to obtain control of the Company. This could deprive the Company's shareholders of opportunities to realize a premium for their Glacier Bancorp, Inc. common stock, even in circumstances where such action is favored by a majority of the Company's shareholders.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds
