**Related Question**

**Will there be changes in the various federal and state affiliate rules on Day One?**

No. The existing federal and state electric and gas affiliate rules will prevail after the merger close.

The objective of the FERC Standards is to prevent undue discrimination by transmission providers in favor of their marketing function affiliates. In general, the purpose of the state codes is to promote competitive markets and ensure that regulated companies (e.g., NSTAR Electric, CL&P) and their employees do not subsidize or provide unauthorized benefit to affiliates.

Remember, it is important to know that the no-conduit rule lies at the heart of all codes and is the rule most frequently put to use day-to-day. With few exceptions, regulated and shared services employees are prohibited from sharing non-public information with competitive affiliate and marketing function employees.
