### Important Notice

2

This document has been created by Macquarie Capital Investment Management LLC (MCIM) for informational purposes only. This document does not carry any right of publication or disclosure. Neither this document nor any of its contents may be used for any purpose without the consent of MCIM.

MGU's investment objective is to provide its common stockholders a high level of total return consisting of dividends and other income, subject to market risk. An investment in common stock represents an indirect investment in the portfolio of securities held by the Fund, which fluctuates. Because the Fund concentrates its investments in the infrastructure industry, the Fund will be more susceptible to adverse events affecting that industry than a more diversified fund. Infrastructure issuers are typically subject to a variety of factors that may affect their performance, including high interest costs in connection with capital construction programs, costs associated with environmental and other regulatory requirements, and surplus capacity, increased competition from other providers of services, uncertainties concerning the cost of energy and the

Infrastructure issuers may be subject to regulation by various governmental authorities and may also be affected by government service interruption due to environmental, operational or other mishaps, the imposition of special tariffs and changes in tax law. This industry also has some special features that cause certain risks to be more prevalent than in other industry sectors. As a result, the Fund's common stock may be worth more or less than the original investment or the Fund's net asset value.

Investments in closed-end funds involve risk, and you should consider this Fund only as a long-term investment option. Closed-end funds are generally not continuously offered. There is a one-time public offering and once issued, shares of closed-end funds are sold in the open market. Shares of closed-end funds frequently trade at a discount to the net asset value. The price of the Fund's stock is determined by market forces beyond the control of the Fund. Therefore, the Fund cannot predict whether its stock will trade at, below or above net asset value. Certain statements contained in this document may be forward-looking in nature. Such statements represent management's current expectations at the time the statements are made, with regard to the matters addressed. All forward-looking statements are subject to risks and uncertainties that may cause them to differ materially from those expressed in, or implied by, such statements. Management does not undertake any obligation to update such statements, whether as a result of new information, future events, or otherwise.

The information in this document reflects prevailing market conditions and our judgment as of this date, which are subject to change. Do not rely on information not relied upon and assumed, without independent verification, the accuracy and completeness of all information available from public sources. Past performance is not indicative of future results. No representation or warranty is made as to the efficacy of any particular strategy or investment achieved. An investment is not a deposit and is not insured by the Federal Deposit Insurance Corporation or any other governmental agency. Other than Macquarie Bank Limited ABN 46 008 583 542 ("MBL"), none of the entities noted in this document are authorized under the Banking Act 1959 (Commonwealth of Australia). The obligations of these entities do not represent deposits or other liabilities of Macquarie. We do not provide assurance in respect of the obligations of these entities. There is no assurance that any fund mentioned herein would be a subsidiary or division of Macquarie.

Macquarie Global Infrastructure Total Return Fund ( MGU )  
Macquarie Global Infrastructure Total Return Fund ( MGU ) is a specialty closed-end fund focused primarily on investing globally in equity securities in the infrastructure space.  
The  
Fund  
is  
a  
unique  
global  
infrastructure

product  
that  
is,  
and  
consistently  
has  
been, marketed to long-term investors  
MGU s  
performance  
has  
been  
strong  
especially  
since  
the  
credit  
crisis  
with  
a  
three-year  
market price total return of 97.1% as of April 30, 2012  
MGU  
has  
meaningfully  
increased  
its  
distribution  
for  
the  
past  
two  
years  
once  
management  
felt  
it  
was  
prudent.  
Since  
that  
time  
the  
distribution  
has  
increased  
50%

The Fund s discount has also been steadily narrowing. We believe the market is reacting to the effects of strong performance and dividend yield

The Fund has three independent Directors who have been with the Fund since its inception and who are experienced in finance as well as infrastructure investing. MGU s

Directors do not serve as directors of any other funds and are not aligned with any stockholder special interest group. From inception, each Director of MGU has been strongly supported by stockholders, and has received an affirmative vote in excess of 80% of the Fund's outstanding shares

Past performance is no indication of future performance

4  
Macquarie Global Infrastructure Total Return Fund ( MGU )  
Investment Objective\*  
The Fund's investment objective is to provide to its common shareholders ( stockholders ) a high level of total return consisting of dividends and other income, and capital appreciation. The Fund invests at least 80% of its assets in equity and equity-like securities issued by US and non US issuers  
Fund Launched  
August 26, 2005 (NYSE: MGU)  
Investment Strategy  
We invest in companies that own and/or operate physical infrastructure assets such as toll

roads,  
airports,  
seaports,  
utilities  
and  
pipelines.

We  
generally  
do  
not  
hold  
infrastructure  
support

companies such as construction, steel firms, or engineering firms. This purity of definition of our investable universe underpins our principle investment philosophy

Disciplined proprietary investment strategy focused on rigorous fundamental bottom-up research

Global portfolio is diversified by country and sub-sector

Class  
Hons,  
Mechanical)  
(University  
of  
Sydney),  
Bachelor  
of  
Commerce

(University of Sydney), Masters of Applied Finance (Macquarie University, Sydney);

Experience: Andrew joined the Infrastructure Securities team in 2007 as a Portfolio Manager. Andrew joined the Macquarie Group in 2001 in the Debt Markets division, where his focus was primarily on infrastructure transactions, particularly public-private partnerships. Prior to Macquarie, Andrew spent over 4 years at Lend Lease in its Project Finance group.

Education:

M.A.  
Economics  
(Trinity  
College),

B.A.  
Business  
Economics  
(Brown  
University),  
Chartered  
Financial Analyst (CFA)

Experience: Brad Frishberg joined Macquarie in 2009 as the head of Macquarie's Infrastructure Securities business and its Chief Investment Officer. Prior to joining Macquarie in 2009, he was managing director and U.S. equity portfolio manager at J.P. Morgan Asset Management, where over a period of 13 years he was responsible

for  
managing  
portfolios  
and  
businesses

in  
London,  
Tokyo,  
and  
New  
York.

Brad  
began  
his  
career

at Aetna Asset Management as an international analyst and then as a portfolio manager for Japanese equity and fixed income.

The  
Fund's  
performance  
has  
been  
strong.  
For  
periods  
ending  
April  
30,

2012:

The Fund's three year market price total return was 97.14%.

The one year return was 1.44%

Year to date return was 9.99%

Over the same periods, the S&P Global Infrastructure Index, the index hand-picked by Western for comparison purposes in their filing, had three, one and year to date returns of only 51.63%, (4.68%) and 6.77%, respectively

#### MGU Facts

The Fund has meaningfully increased its quarterly distributions to stockholders:

As the global financial crisis began to take its toll on global economies and markets in 2008-09, the Board, with the recommendation of Management, determined that it was prudent to reduce the Fund's distributions based on the multiple exogenous risks that existed at that time

When the Board and Management believed that those risks had begun to diminish as reflected in greater stability in the markets and global economies, the Fund began prudently raising its distributions in a responsible manner consistent with the Fund's investment program

Since 2010, the Fund's quarterly distribution has been raised three times for an aggregate increase of 50% (from \$0.16 to \$0.24 per share per quarter)

Past performance is no indication of future performance

Items for Consideration

Two matters will be considered at the June 21, 2012 annual stockholder meeting

Election of Class I Director

Stockholder Proposal regarding voting standard for director elections

14

Class I Director Election  
What is the Board Proposing?  
To  
re-elect  
Gordon  
A.  
Baird  
as  
Class  
I  
Director.

Mr.  
Baird  
is  
an  
independent,  
experienced  
and  
highly  
qualified  
Director  
who has served as a Director of the Fund since its inception

Education:

Chartered Financial Analyst  
Emory University, Economics

Overview of Experience:

Mr. Baird has served as a Director of the Fund since its inception, and does not serve on the board of any other registered funds

Mr. Baird is an independent Director and has never held a position with the Macquarie Group

Mr. Baird has extensive infrastructure and fund experience

Since

2011,

Mr.

Baird

has

been

an

advisor

to

Thomas

H.

Lee

Partners

L.P.,

a

Boston-based

private

equity

firm.

Prior

to his involvement with Thomas H. Lee Partners L.P., from 2003 to 2011, Mr. Baird had been the Chief Executive Officer and Member of the Board of Directors of Paramax Capital Partners LLC, an asset management firm

specializing

exclusively

in

the

financial

services

industry.

Prior

to

this,  
Mr.  
Baird  
worked  
as  
a  
private  
equity  
analyst  
in  
the investment  
management group at State Street Bank and Trust Company and the ABS securitization group at State  
Street Capital Corporation. Additionally, Mr. Baird is a member of the New York Securities Analyst Society and the  
Association for Investment Management and Research

Class I Director Election

Mr. Baird has extensive experience in evaluating and valuing infrastructure companies, including experience with:

Due diligence on electric power generation facilities in Guangdong province China while at State Street Boston Capital Corp

Due diligence on the Hong Kong container port facility while assistant vice president at State Street Bank and Trust Company

Emerging market project finance securitization strategies at Citigroup Global Markets

Cell tower financing proposal at State Street Bank and Trust Company

Advising banks on project finance loans and exposures while a Director in the FIG Group at Citigroup Global Markets

Valued gas and commodity limited partnership investments for clients of State Street Bank and Trust Company

Valued the international container shipping portfolio business of Fortune 100 company

Mr. Baird has extensive investment, closed-end fund and registered investment adviser experience, which includes:

20+ years of investing and banking experience

Former Chief Executive Officer and Board member of a SEC registered investment adviser

Former private equity analyst following banking, media, defense companies

Managed, invested in and served as a member of the board of directors of multiple closed end, unregistered private funds since 2003

Extensive accounting and tax knowledge including knowledge of taxation of master limited partnerships, domestic and off-shore investment funds, cross border transactions and withholding tax considerations and Passive Foreign Investment Company rules

16

Class I Director Election

What is Western Proposing?

In contrast to Mr. Baird, Western's director nominee, Robert H. Daniels, to the Fund's knowledge, has no significant experience with infrastructure assets and has never served as a director to a registered fund

Western states in a filing with the SEC that if its director nominee were elected, he would propose that the Board consider replacing the Fund's investment manager

A director nominee taking such an extreme position on the Fund's investment manager despite never having served in any capacity with respect to the Fund, never, to our knowledge, having served as a director to a registered fund, and having, to the Fund's knowledge, no significant experience with infrastructure

assets  
generally,  
raises  
the  
question  
whether  
the  
director  
nominee  
fails  
to  
appreciate

his fiduciary duty to the Fund and its stockholders to be informed prior to taking or suggesting any action

17

Mr. Baird, the Board's Director Nominee, is highly qualified, experienced and independent, and will fairly and objectively consider the interests of all stockholders in helping determine the future direction of the Fund

Stockholder Proposal  
Original  
Fund  
Structure.  
The  
Fund  
was  
originally  
offered  
to  
investors

with  
a  
majority  
voting  
provision

as an integral part of its structure. The Board approved, and the Fund's stockholders have historically embraced, the majority voting provision as an element of the closed-end fund structure, which is integral to properly implementing the Fund's global infrastructure investment strategy

Stability  
and  
Continuity.

In  
accordance  
with  
the  
Fund's  
Bylaws,  
each  
Director  
has  
from  
inception

been elected by a majority of the Fund's outstanding shares of Common Stock. The Board is structured this way to provide stability and continuity. That stability enhances long-term planning and has allowed the Fund to attract and retain highly qualified Directors who are familiar with the Fund, its business and investment strategy, who understand the complexities of global infrastructure investing, and who are able to exercise informed business judgment in the oversight of the Fund

18

Stockholder Proposal: to request the Board to take the necessary steps to amend the Bylaws so that when Board elections are contested with more nominees than open seats, a plurality of votes cast will be sufficient for election

The Board strongly opposes the Stockholder Proposal. The Fund and its stockholders have been well served by the majority voting provision in the Fund's Bylaws. The Board believes the majority voting provision is in the best interests of the Fund and its stockholders for the following reasons

#### Stockholder Proposal

19

##### Enhanced Independence.

shares enhances the independence of Non-Interested Directors by providing them with the ability to remain in office until a clear majority of all stockholders elects a new Director. This provides additional independence from Fund management as well as special interests groups who may have an agenda contrary to the long-term interests of all stockholders. As a result, Non-Interested Directors are able to make decisions that are in the best interest of the Fund, and not management or those special interests groups

##### Accountability to Stockholders.

in a context where every stockholder counts - as opposed to permitting a Director to be elected by

significantly less than a majority of the Fund's outstanding shares - increases the Director's accountability to stockholders. The majority voting provision in the Fund's Bylaws ensures that each Director is accountable to all of the Fund's stockholders.

All Stockholders Are Considered.

excess of 80% of the Fund's outstanding shares. The majority voting provision ensures that, prior to a new director assuming office, that director must receive a clear consensus of the majority of all the Fund's outstanding shares of Common Stock. The Board is concerned that the stockholder's proposal could adversely impact the Fund and its stockholders by lowering the standards required to elect a Director

Electing Directors by a vote of a majority of all the Fund's outstanding

The Board believes that the ability to vote for or against a Director

From inception, each Director has received an affirmative vote in

Stockholder Proposal

While  
this  
proposal  
has  
been  
presented  
in  
isolation,  
it  
is

part  
of  
Western's  
tactics  
to  
pressure  
the  
Fund

into taking what it believes are detrimental short-term actions designed to benefit Western and the hedge funds they advise at the expense of the Fund's long-term investors

While Western positions itself to be representing the interests of all stockholders, the Fund believes that they are simply seeking to use the system for their own benefit. Importantly, Western is a fiduciary only to the hedge funds they manage, and owes no similar duty to the Fund's stockholders

20
