Semi-Annual Report

This report provides management's discussion of fund performance for AllianceBernstein Global High Income Fund (the "Fund") for the semi-annual reporting period ended September, 2014. The Fund is a closed-end fund that trades on the New York Stock Exchange.

Investment Objective and Policies

The Fund seeks high current income, and secondarily, capital appreciation. The Fund invests without limit in securities denominated in non-U.S. currencies as well as those denominated in the U.S. dollar. The Fund may also invest, without limit, in sovereign debt securities issued by emerging and developed nations and in debt securities of U.S. and non-U.S. corporate issuers. For more information regarding the Fund's risks, please see "Disclosures and Risks" on pages 4-5 and "Note E Risks Involved in Investing in the Fund" of the Notes to Financial Statements on pages 97-99.

Investment Results

The table on page 6 shows the Fund's performance compared with its blended benchmark and its components for the six- and 12-month periods ended September 30, 2014. The blended benchmark is composed of equal weightings of the JPMorgan Government Bond Index-Emerging Markets (JPM GBI-EM, local currency-denominated), the JPMorgan Emerging Markets Bond Index Global (JPM EMBI Global), and the Barclays U.S. Corporate High Yield (HY) 2% Issuer Capped Index.

Individual performance for each of these indices is also included for both time periods.

The Fund outperformed the blended benchmark for both the six- and 12-month periods; an underweight to local emerging-market debt, which underperformed, contributed to returns, as did the Fund's overall currency exposure. Within the Fund's currency positioning, an underweight to the Russian ruble, South African rand and Australian dollar versus an overweight in the U.S. dollar, also contributed for both periods. Sector selection, specifically exposure to non-agency mortgages, as well as investment-grade and select emerging-market corporates, were positive contributors for both periods. Within the Fund's U.S. high yield holdings, an overweight to banks, as well as security selection in consumer non-cyclicals and communications, helped for both periods. Within the Fund's emerging-market allocation, an overweight to the Ivory Coast and underweight to Russia contributed positively during both periods, as did exposure to both hard and local currency in the Dominican Republic. For both periods, an allocation to bank loans detracted. An underweight in the Polish zloty contributed for the six-month period, while an overweight to U.S. high yield contributed for the 12-month period. Security selection in Argentina detracted for both periods.

The Fund utilized derivatives including Treasury futures and interest rate swaps to manage the overall duration and yield curve structure of the Fund;

yield curve positioning detracted from performance for the six-month period and added for the 12-month period. Currency forwards were employed to manage overall currency positioning which added to returns during both periods. Purchased options were utilized for hedging and investment purposes, which detracted for both periods; written options were utilized for hedging purposes, which had a positive impact during both periods. Credit default swaps were utilized for hedging and investment purposes, which had an immaterial impact during the six-month period, and detracted during the 12-month period. The Fund utilized leverage through reverse repurchase agreements at favorable rates, and was able to reinvest the proceeds into higher yielding securities; leverage contributed positively for both periods.

Market Review and Investment Strategy

During the six-month period ended September 30, 2014, markets remained heavily focused on the direction of interest rates, central bank monetary policy and global growth. In the first half of the period, the low interest rate environment and continued global growth supported both emerging-market debt and high yield. The high-yield market was additionally supported by positive corporate earnings, low default rates and investors demand for yield. However, volatility returned toward the end of the period, as U.S. dollar strength, geopolitical risks and slower growth all played a role in sending emerging-market debt and high yield into negative territory, dampening

earlier positive performance. Local currency debt was particularly hard hit. The U.S. Federal Reserve, nearing the end of its monthly asset purchase program, also brought an eventual increase in official rates into focus once again. Softness in some commodity prices, particularly oil, added another dimension of risk to commodity-rich emerging-market economies. Furthermore, U.S. high yield was adversely impacted in September by outflows from retail high-yield funds and record-setting issuance.

Growth in the emerging markets continues to move forward sluggishly, while inflation is on the higher end of many emerging-market central banks' ranges. Within the Fund's emerging-market exposure, the Fund's Management Team (the Team) continues to be deliberate about country selection and remain cautious in the Fund's positioning in large, lower-quality countries with high volatility. The Fund is maintaining a diversified allocation to emerging-market corporates the Team finds attractive, and has only limited exposure to emerging-market local debt. The Team is closely monitoring emerging investor flows, which were weakly positive in the third quarter of 2014, as well as the impact of lower oil prices on each country. With emerging-market growth in the more moderate range, the Team believes that differentiating between countries and sectors has become even more important.

In the Team's view, continued moderate global growth should provide a supportive backdrop for high yield, and the Team anticipates that growth

will be fast enough to prevent a significant deterioration of credit quality, but not so fast as to warrant reactionary monetary policy tightening. Credit fundamentals are still generally solid and the Team continues to look for opportunities in periods of volatility, while emphasizing the importance of

security selection. The Team cautions against the reach for yield, and remains selective in the Fund's exposure to CCC-rated* bonds. The Fund's high-yield holdings are attractively valued compared to current and expected defaults, and are diversified at the country, sector and issuer levels.

* *A measure of the quality and safety of a bond or portfolio, based on the issuer's financial condition, and not based on the financial condition of the fund itself. AAA is highest (best) and D is lowest (worst). Ratings are subject to change. Investment-grade securities are those rated BBB and above.*

DISCLOSURES AND RISKS

AllianceBernstein Global High Income Fund Shareholder Information

Weekly comparative net asset value (NAV) and market price information about the Fund is published each Saturday in *Barron's* and in other newspapers in a table called Closed End Funds . Daily NAV and market price information, and additional information regarding the Fund, is available at www.alliancebernstein.com and www.nyse.com. For additional shareholder information regarding this Fund, please see page 106.

Benchmark Disclosure

The unmanaged JPM® GBI-EM (local currency-denominated), the JPM® EMBI Global, and the Barclays U.S. Corporate HY 2% Issuer Capped Index do not reflect fees and expenses associated with the active management of a mutual fund portfolio. The JPM GBI-EM represents the performance of local currency government bonds issued by emerging markets. The JPM EMBI Global (market-capitalization weighted) represents the performance of U.S. dollar-denominated Brady bonds, Eurobonds, and trade loans issued by sovereign and quasi-sovereign entities. The Barclays U.S. Corporate HY 2% Issuer Capped Index is the 2% Issuer Capped component of the U.S. Corporate High Yield Index, which represents the performance of fixed income securities having a maximum quality rating of Ba1, a minimum amount outstanding of \$150 million, and at least one year to maturity. An investor cannot invest directly in an index, and its results are not indicative of the performance of any specific investment, including the Fund.

A Word About Risk

Market Risk: The value of the Fund's assets will fluctuate as the stock or bond market fluctuates. The value of its investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events that affect large portions of the market.

Interest Rate Risk: Changes in interest rates will affect the value of investments in fixed-income securities. When interest rates rise, the value of investments in fixed-income securities tends to fall and this decrease in value may not be offset by higher income from new investments. Interest rate risk is generally greater for fixed-income securities with longer maturities or durations.

Credit Risk: An issuer or guarantor of a fixed-income security, or the counterparty to a derivatives or other contract, may be unable or unwilling to make timely payments of interest or principal, or to otherwise honor its obligations. The issuer or guarantor may default, causing a loss of the full principal amount of a security. The degree of risk for a particular security may be reflected in its credit rating. There is the possibility that the credit rating of a fixed-income security may be downgraded after purchase, which may adversely affect the value of the security.

Below Investment Grade Securities: Investments in fixed-income securities with lower ratings (commonly known as junk bonds) tend to have a higher probability that an issuer will default or fail to meet its payment obligations. These securities may be subject to greater price volatility due to such factors as specific corporate developments, interest rate sensitivity, negative perceptions of the junk bond market generally and less secondary market liquidity.

Inflation Risk: This is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund's assets can decline as can the value of the Fund's distributions. This risk is significantly greater if the Fund invests a significant portion of its assets in fixed-income securities with longer maturities.

Foreign (Non-U.S.) Risk: Investments in securities of non-U.S. issuers may involve more risk than those of U.S. issuers. These securities may fluctuate more widely in price and may be less liquid due to adverse market, economic, political, regulatory or other factors.

(Disclosures, Risks and Note about Historical Performance continued on next page)

DISCLOSURES AND RISKS

(continued from previous page)

Emerging Market Risk: Investments in emerging market countries may have more risk because the markets are less developed and less liquid as well as being subject to increased economic, political, regulatory or other uncertainties.

Currency Risk: Fluctuations in currency exchange rates may negatively affect the value of the Fund's investments or reduce its returns.

Leverage Risk: To the extent the Fund uses leveraging techniques, its NAV may be more volatile because leverage tends to exaggerate the effect of changes in interest rates and any increase or decrease in the value of the Fund's investments.

Diversification Risk: The Fund may have more risk because it is non-diversified, meaning that it can invest more of its assets in a smaller number of issuers and that adverse changes in the value of one security could have a more significant effect on the Fund's NAV.

Derivatives Risk: Investments in derivatives may be illiquid, difficult to price, and leveraged so that small changes may produce disproportionate losses for the Fund, and may be subject to counterparty risk to a greater degree than more traditional investments.

Management Risk: The Fund is subject to management risk because it is an actively managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its techniques will produce the intended results.

The Fund may invest in mortgage-backed and/or other asset-backed securities, including securities backed by mortgages and assets with an international or emerging markets origination and securities backed by non-performing loans at the time of investment. Investments in mortgage-backed and other asset-backed securities are subject to certain additional risks. The value of these securities may be particularly sensitive to changes in interest rates. These risks include extension risk, which is the risk that, in periods of rising interest rates, issuers may delay the payment of principal, and prepayment risk, which is the risk that, in periods of falling interest rates, issuers may pay principal sooner than expected, exposing the Fund to a lower rate of return upon reinvestment of principal. Mortgage-backed securities offered by nongovernmental issuers and other asset-backed securities may be subject to other risks, such as higher rates of default in the mortgages or assets backing the securities or risks associated with the nature and servicing of mortgages or assets backing the securities.

These risks are fully discussed in the Fund's prospectus.

An Important Note About Historical Performance

The performance on the following page represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. All fees and expenses related to the operation of the Fund have been deducted. Performance assumes reinvestment of distributions and does not account for taxes.

Portfolio of Investments

ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND 67

The fund currently owns investments collateralized by subprime mortgage loans. Subprime loans are offered to homeowners who do not have a history of debt or who have had problems meeting their debt obligations. Because repayment is less certain, subprime borrowers pay a higher rate of interest than prime borrowers. As of September 30, 2014, the fund's total exposure to subprime investments was 6.99% of net assets. These investments are valued in accordance with the fund's Valuation Policies (see Note A for additional details).

NOTES TO FINANCIAL STATEMENTS

September 30, 2014 (unaudited)

NOTE A

Significant Accounting Policies

AllianceBernstein Global High Income Fund, Inc. (the Fund) was incorporated under the laws of the State of Maryland on May 20, 1993 and is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company. The financial statements have been prepared in conformity with U.S. generally accepted accounting principles (U.S. GAAP), which require management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

Portfolio securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at fair value as determined in accordance with procedures established by and under the general supervision of the Fund's Board of Directors (the Board).

In general, the market values of securities which are readily available and deemed reliable are determined as follows: securities listed on a national securities exchange (other than securities listed on the NASDAQ Stock Market, Inc. (NASDAQ)) or on a foreign securities exchange are valued at the last sale price at the close of the exchange or foreign securities exchange. If there has been no sale on such day, the securities are valued at last traded price from the previous day. Securities listed on more than one exchange are valued by reference to the principal exchange on which the securities are traded; securities listed only on NASDAQ are valued in accordance with the NASDAQ Official Closing Price; listed or over the counter (OTC) market put or call options are valued at the mid level between the current bid and ask prices. If either a current bid or current ask price is unavailable, AllianceBernstein L.P. (the Adviser) will have discretion to determine the best valuation (e.g. last trade price in the case of listed options); open futures are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used; U.S. government securities and other debt instruments having 60 days or less remaining until maturity are valued at amortized cost if their original maturity was 60 days or less. If the original term to maturity exceeded 60 days, the securities are valued by a pricing service, if a market price is available. If a market price is not available, the securities are valued by using amortized cost as of the 61st day prior to maturity. Fixed-income securities, including mortgage-backed and asset-backed securities, may be valued on the basis of prices provided by a pricing service or at a price obtained from one or more of the major broker-dealers. In cases where broker-dealer quotes are obtained, the Adviser may

establish procedures whereby changes in market yields or spreads are used to adjust, on a daily basis, a recently obtained quoted price on a security; swaps and other derivatives are valued daily, primarily using independent pricing services, independent pricing models using market inputs, as well as third party broker-dealers or counterparties. Investment companies are valued at their net asset value each day.

Securities for which market quotations are not readily available (including restricted securities) or are deemed unreliable are valued at fair value. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, analysis of the issuer's financial statements or other available documents. In addition, the Fund may use fair value pricing for securities primarily traded in non-U.S. markets because most foreign markets close well before the Fund values its securities at 4:00 p.m., Eastern Time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities.

2. Fair Value Measurements

In accordance with U.S. GAAP regarding fair value measurements, fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. U.S. GAAP establishes a framework for measuring fair value, and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability (including those valued based on their market values as described in Note A.1 above). Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The fair value of debt instruments, such as bonds, and over-the-counter derivatives is generally based on market price quotations, recently executed market transactions (where observable) or industry recognized modeling techniques and are generally classified as Level 2. Pricing vendor inputs to Level 2

valuations may include quoted prices for similar investments in active markets, interest rate curves, coupon rates, currency rates, yield curves, option adjusted spreads, default rates, credit spreads and other unique security features in order to estimate the relevant cash flows which is then discounted to calculate fair values. If these inputs are unobservable and significant to the fair value, these investments will be classified as Level 3. In addition, non-agency rated investments are classified as Level 3.

Where readily available market prices or relevant bid prices are not available for certain equity investments, such investments may be valued based on similar publicly traded investments, movements in relevant indices since last available prices or based upon underlying company fundamentals and comparable company data (such as multiples to earnings or other multiples to equity). Where an investment is valued using an observable input, such as another publicly traded security, the investment will be classified as Level 2. If management determines that an adjustment is appropriate based on restrictions on resale, illiquidity or uncertainty, and such adjustment is a significant component of the valuation, the investment will be classified as Level 3. An investment will also be classified as Level 3 where management uses company fundamentals and other significant inputs to determine the valuation.

Options and warrants are valued using market-based inputs to models, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency, where such inputs and models are available. Alternatively the values may be obtained through unobservable management determined inputs and/or management's proprietary models. Where models are used, the selection of a particular model to value an option or a warrant depends upon the contractual terms of, and specific risks inherent in, the option or warrant as well as the availability of pricing information in the market. Valuation models require a variety of inputs, including contractual terms, market prices, measures of volatility and correlations of such inputs. Exchange traded options generally will be classified as Level 2. For options or warrants that do not trade on exchange but trade in liquid markets, inputs can generally be verified and model selection does not involve significant management judgment. Options and warrants are classified within Level 2 on the fair value hierarchy when all of the significant inputs can be corroborated to market evidence. Otherwise such instruments are classified as Level 3.

Valuations of mortgage-backed or other asset-backed securities, by pricing vendors, are based on both proprietary and industry recognized models and discounted cash flow techniques. Significant inputs to the valuation of these instruments are value of the collateral, the rates and timing of delinquencies, the rates and timing of prepayments, and default and loss expectations, which are driven in part by housing prices for residential mortgages. Significant inputs are determined based on relative value analyses, which incorporate comparisons to

instruments with similar collateral and risk profiles, including relevant indices. Mortgage and asset-backed securities for which management has collected current observable data through pricing services are generally categorized within Level 2. Those investments for which current observable data has not been provided are classified as Level 3.

Bank loan prices are provided by third party pricing services and consist of a composite of the quotes received by the vendor into a consensus price. Bank loans are classified as Level 3, as significant input used in the fair value measurement of these instruments is the market quotes that are received by the vendor and these inputs are not observable.

Other fixed income investments, including non-U.S. government and corporate debt, are generally valued using quoted market prices, if available, which are typically impacted by current interest rates, maturity dates and any perceived credit risk of the issuer. Additionally, in the absence of quoted market prices, these inputs are used by pricing vendors to derive a valuation based upon industry or proprietary models which incorporate issuer specific data with relevant yield/spread comparisons with more widely quoted bonds with similar key characteristics. Those investments for which there are observable inputs are classified as Level 2. Where the inputs are not observable, the investments are classified as Level 3.

The following table summarizes the valuation of the Fund's investments by the above fair value hierarchy levels as of September 30, 2014:

Investments in

Securities	Level 1	Level 2	Level 3	Total
Assets:				
Corporates Non-Investment Grades	\$ 0	\$ 801,584,329	\$ 8,665,772#	\$ 810,250,101

Total^	\$ 38,687,189	\$ 1,269,447,939	\$ 199,443,073	\$ 1,507,578,201

The Fund held securities with zero market value at period end.

* Other financial instruments are derivative instruments, such as futures, forwards and swaps, which are valued at the unrealized appreciation/depreciation on the instrument. Other financial instruments may also include options written and swaptions which are valued at market value.

Only variation margin receivable/payable at period end is reported within the statement of assets and liabilities. This amount reflects cumulative appreciation/(depreciation) of exchange-traded derivatives as reported in the portfolio of investments.

^ There were de minimis transfers under 1% of net assets between Level 1 and Level 2 during the reporting period.

The Fund recognizes all transfers between levels of the fair value hierarchy assuming the financial instrument was transferred at the beginning of the reporting period.

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value.

	Corporates - Non-Investment Grades#	Corporates - Investment Grades	Collateralized Mortgage Obligations	Bank Loans#

** The unrealized appreciation/depreciation is included in net change in unrealized appreciation/depreciation of investments and other financial instruments in the accompanying statement of operations.

The following represents information about significant observable inputs related to the Fund with material categories of Level 3 investments at September 30, 2014. Securities priced by third party vendors or at cost are excluded from the following table.

Quantitative Information about Level 3 Fair Value Measurements				
	Fair Value at 9/30/2014	Valuation Technique	Unobservable Input	Range/Weighted Average
Corporates Non-Investment Grades	\$ 0	Qualitative Assessment		\$0.00/ N/A
Whole Loan Trusts	\$ 2,787,120	Market Approach		\$5.53/ N/A
	\$ 1,490,458	Market Approach	Level Yield Internal Rate of Return	Benchmark & 500 bp/ N/A

The Adviser has established a Valuation Committee (the Committee) which is responsible for overseeing the pricing and valuation of all securities held in the Fund. The Committee operates under pricing and valuation policies and procedures established by the Adviser and approved by the Board, including pricing policies which set forth the mechanisms and processes to be employed on a daily basis to implement these policies and procedures. In particular, the pricing policies describe how to determine market quotations for securities and other instruments. The Committee's responsibilities include: 1) fair value and liquidity determinations (and oversight of any third parties to whom any responsibility for fair value and liquidity determinations is delegated), and 2) regular monitoring of the Adviser's pricing and valuation policies and procedures and modification or enhancement of these policies and procedures (or recommendation of the modification of these policies and procedures) as the Committee believes appropriate.

The Committee is also responsible for monitoring the implementation of the pricing policies by the Adviser's Pricing Group (the Pricing Group) and a third party which performs certain pricing functions in accordance with the pricing policies. The Pricing Group is responsible for the oversight of the third party on a day-to-day basis. The Committee and the Pricing Group perform a series of activities to provide reasonable assurance of the accuracy of prices including: 1) periodic vendor due diligence meetings, review of methodologies, new developments, and process at vendors, 2) daily comparisons of security valuation versus prior day for all securities that exceeded established thresholds, and 3) daily review of unpriced, stale, and variance reports with exceptions reviewed by senior management and the Committee.

In addition, several processes outside of the pricing process are used to monitor valuation issues including: 1) performance and performance attribution reports

are monitored for anomalous impacts based upon benchmark performance, and 2) portfolio managers review all portfolios for performance and analytics (which are generated using the Adviser's prices).

3. Currency Translation

Assets and liabilities denominated in foreign currencies and commitments under forward currency exchange contracts are translated into U.S. dollars at the mean of the quoted bid and ask prices of such currencies against the U.S. dollar. Purchases and sales of portfolio securities are translated into U.S. dollars at the rates of exchange prevailing when such securities were acquired or sold. Income and expenses are translated into U.S. dollars at the rates of exchange prevailing when accrued.

Net realized gain or loss on foreign currency transactions represents foreign exchange gains and losses from sales and maturities of foreign fixed income investments, foreign currency exchange contracts, holding of foreign currencies, currency gains or losses realized between the trade and settlement dates on foreign investment transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains and losses from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of net unrealized appreciation and depreciation of foreign currency denominated assets and liabilities.

4. Taxes

It is the Fund's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provisions for federal income or excise taxes are required. The Fund may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on income and/or capital gains earned or repatriated. Taxes are accrued and applied to net investment income, net realized gains and net unrealized appreciation/depreciation as such income and/or gains are earned.

In accordance with U.S. GAAP requirements regarding accounting for uncertainties in income taxes, management has analyzed the Fund's tax positions taken or expected to be taken on federal and state income tax returns for all open tax years (the current and the prior three tax years) and has concluded that no provision for income tax is required in the Fund's financial statements.

5. Investment Income and Investment Transactions

Dividend income is recorded on the ex-dividend date or as soon as the Fund is informed of the dividend. Interest income is accrued daily. Investment transactions are accounted for on the date securities are purchased or sold. Investment gains and losses are determined on the identified cost basis. The Fund amortizes premiums and accretes discounts as adjustments to interest income.

6. Dividends and Distributions

Dividends and distributions to shareholders, if any, are recorded on the ex-dividend date. Income dividends and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with U.S. GAAP. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

NOTE B

Advisory Fee and Other Transactions with Affiliates

Under the terms of the investment advisory agreement, the Fund pays the Adviser an advisory fee at an annual rate of .90% of the Fund's average weekly net assets. Such fee is accrued daily and paid monthly.

Pursuant to the amended administration agreement, the Fund may reimburse the Adviser for certain legal and accounting services provided to the Fund by the Adviser, provided, however, that the reimbursement may not exceed .15% annualized of average weekly net assets. For the six months ended September 30, 2014, such fee amounted to \$48,871.

Under the terms of a Shareholder Inquiry Agency Agreement with AllianceBernstein Investor Services, Inc. (ABIS), a wholly owned subsidiary of the Adviser, the Fund reimburses ABIS for costs relating to servicing phone inquiries on behalf of the Fund. During the six months ended September 30, 2014, there was no such reimbursement paid to ABIS.

The Fund may invest in the AllianceBernstein Fixed-Income Shares, Inc.- Government STIF Portfolio (Government STIF Portfolio), an open-end management investment company managed by the Adviser. The Government STIF Portfolio is offered as a cash management option to mutual funds and other institutional accounts of the Adviser, and is not available for direct purchase by members of the public. The Government STIF Portfolio pays no investment management fees but does bear its own expenses. A summary of the Fund's transactions in shares of the Government STIF Portfolio for the six months ended September 30, 2014, is as follows:

Market Value March 31, 2014 (000)	Purchases at Cost (000)	Sales Proceeds (000)	Market Value September 30, 2014 (000)	Dividend Income (000)
\$ 18,398	\$ 211,119	\$ 222,554	\$ 6,963	\$ 7

NOTE C**Investment Transactions**

Purchases and sales of investment securities (excluding short-term investments) for the six months ended September 30, 2014 were as follows:

	Purchases	Sales
Investment securities (excluding U.S. government securities)	\$ 272,767,685	\$ 216,398,094
U.S. government securities	135,720,977	0

The cost of investments for federal income tax purposes was substantially the same as cost for financial reporting purposes. Accordingly, gross unrealized appreciation and unrealized depreciation (excluding foreign currency exchange contracts, written options, futures and swaps) are as follows:

Gross unrealized appreciation	\$ 81,183,106
Gross unrealized depreciation	(34,469,220)
Net unrealized appreciation	\$ 46,713,886

1. Derivative Financial Instruments

The Fund may use derivatives in an effort to earn income and enhance returns, to replace more traditional direct investments, to obtain exposure to otherwise inaccessible markets (collectively, investment purposes), or to hedge or adjust the risk profile of its portfolio.

The principal types of derivatives utilized by the Fund, as well as the methods in which they may be used are:

Forward Currency Exchange Contracts

The Fund may enter into forward currency exchange contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain firm purchase and sales commitments denominated in foreign currencies and for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under Currency Transactions.

A forward currency exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contract and the closing of such contract would be included in net realized gain or loss on foreign currency transactions. Fluctuations in the value of open forward currency exchange contracts are recorded for financial reporting purposes as unrealized appreciation and/or depreciation by the Fund. Risks may arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

During the six months ended September 30, 2014, the Fund held forward currency exchange contracts for hedging and non-hedging purposes.

Futures

The Fund may buy or sell futures for investment purposes or for the purpose of hedging its portfolio against adverse effects of potential movements in the market. The Fund bears the market risk that arises from changes in the value of these instruments and the imperfect correlation between movements in the price of the futures and movements in the price of the assets, reference rates or indices which they are designed to track. Among other things, the Fund may purchase or sell futures for foreign currencies or options thereon for non-hedging purposes as a means of making direct investment in foreign currencies, as described below under **Currency Transactions**.

At the time the Fund enters into a future, the Fund deposits and maintains as collateral an initial margin with the broker, as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. Risks may arise from the potential inability of a counterparty to meet the terms of the contract. The credit/counterparty risk for exchange-traded futures is generally less than privately negotiated futures, since the clearinghouse, which is the issuer or counterparty to each exchange-traded future, has robust risk mitigation standards, including the requirement to provide initial and variation margin. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the time it was closed.

Use of long futures subjects the Fund to risk of loss in excess of the amounts shown on the statement of assets and liabilities, up to the notional value of the futures. Use of short futures subjects the Fund to unlimited risk of loss. Under some circumstances, futures exchanges may establish daily limits on the amount that the price of a future can vary from the previous day's settlement price, which could effectively prevent liquidation of unfavorable positions.

During the six months ended September 30, 2014, the Fund held futures for hedging purposes.

Option Transactions

For hedging and investment purposes, the Fund may purchase and write (sell) put and call options on U.S. and foreign securities, including government securities, and foreign currencies that are traded on U.S. and foreign securities exchanges and over-the-counter markets. Among other

things, the Fund may use options transactions for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under **Currency Transactions** and may use options strategies involving the purchase and/or writing of various combinations of call and/or put options, for hedging and investment purposes.

The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerages, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Fund could result in the Fund selling or buying a security or currency at a price different from the current market value.

The Fund may also invest in options on swaps, also called **swaptions**. A swaption is an option that gives the buyer the right, but not the obligation, to enter into a swap on a future date in exchange for paying a market-based premium. A receiver swaption gives the owner the right to receive the total return of a specified asset, reference rate, or index. A payer swaption gives the owner the right to pay the total return of a specified asset, reference rate, or index. Swaptions also include options that allow an existing swap to be terminated or extended by one of the counterparties.

During the six months ended September 30, 2014, the Fund held purchased options for hedging and non-hedging purposes.

During the six months ended September 30, 2014, the Fund held written options for hedging purposes.

For the six months ended September 30, 2014, the Fund had the following transactions in written options:

	Number of Contracts	Premiums Received
Options written outstanding as of 3/31/14	5,515	\$ 261,583
Options written	16,973	610,206
Options expired	(17,916)	(695,046)
Options bought back	(4,572)	(176,743)
Options exercised	0	0
Options written outstanding as of 9/30/14	0	\$ 0

For the six months ended September 30, 2014, the Fund had the following transactions in written swaptions:

	Notional Amount	Premiums Received
Swaptions written outstanding as of 3/31/14	212,950,000	\$ 227,395
Swaptions written	373,820,787	1,281,410
Swaptions expired	(274,253,787)	(584,306)
Swaptions bought back	(279,867,000)	(895,408)
Swaptions closed	0	0
Swaptions written outstanding as of 9/30/14	32,650,000	\$ 29,091

Swaps

The Fund may enter into swaps to hedge its exposure to interest rates, credit risk, or currencies. The Fund may also enter into swaps for non-hedging purposes as a means of gaining market exposures including by making direct investments in foreign currencies, as described below under *Currency Transactions*. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other, with the difference being paid by one party to the other. In addition, collateral may be pledged or received by the Fund in accordance with the terms of the respective swaps to provide value and recourse to the Fund or its counterparties in the event of default, bankruptcy or insolvency by one of the parties to the swap.

Risks may arise as a result of the failure of the counterparty to the swap to comply with the terms of the swap. The loss incurred by the failure of a counterparty is generally limited to the net interim payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore, the Fund considers the creditworthiness of each counterparty to a swap in evaluating potential counterparty risk. This risk is mitigated by having a netting arrangement between the Fund and the counterparty and by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty. Additionally, risks may arise from

unanticipated movements in interest rates or in the value of the underlying securities. The Fund accrues for the interim payments on swaps on a daily basis, with the net amount recorded within unrealized appreciation/depreciation of swaps on the statement of assets and liabilities, where applicable. Once the interim payments are settled in cash, the net amount is recorded as realized gain/(loss) on swaps on the statement of operations, in addition to any realized gain/(loss) recorded upon the termination of swaps. Upfront premiums paid or received are recognized as cost or proceeds on the statement of assets and liabilities and are amortized on a straight line basis over the life of the contract. Amortized upfront premiums are included in net realized gain/(loss) from swaps on the statement of operations. Fluctuations in the value of swaps are recorded as a component of net change in unrealized appreciation/depreciation of swaps on the statement of operations.

Certain standardized swaps, including certain interest rate swaps and credit default swaps, are (or soon will be) subject to mandatory central clearing. Cleared swaps are transacted through futures commission merchants (FCMs) that are members of central clearinghouses, with the clearinghouse serving as central counterparty, similar to transactions in futures contracts. Centralized clearing will be required for additional categories of swaps on a phased-in basis based on requirements published by the Securities and Exchange Commission and Commodity Futures Trading Commission.

At the time the Fund enters into a centrally cleared swap, the Fund deposits and maintains as collateral an initial margin with the broker, as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. Risks may arise from the potential inability of a counterparty to meet the terms of the contract. The credit/counterparty risk for exchange-traded swaps is generally less than privately negotiated swaps, since the clearinghouse, which is the issuer or counterparty to each exchange-traded swap, has robust risk mitigation standards, including the requirement to provide initial and variation margin. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the time it was closed.

Interest Rate Swaps:

The Fund is subject to interest rate risk exposure in the normal course of pursuing its investment objectives. Because the Fund holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To help hedge against this risk and to maintain its ability to generate income at

prevailing market rates, the Fund may enter into interest rate swaps. Interest rate swaps are agreements between two parties to exchange cash flows based on a notional amount. The Fund may elect to pay a fixed rate and receive a floating rate, or, receive a fixed rate and pay a floating rate on a notional amount.

In addition, the Fund may also enter into interest rate swap transactions to preserve a return or spread on a particular investment or portion of its portfolio, or protecting against an increase in the price of securities the Fund anticipates purchasing at a later date. Interest rate swaps involve the exchange by a Fund with another party of their respective commitments to pay or receive interest (*e.g.*, an exchange of floating rate payments for fixed rate payments) computed based on a contractually-based principal (or notional) amount. Interest rate swaps are entered into on a net basis (*i.e.*, the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments).

During the six months ended September 30, 2014, the Fund held interest rate swaps for hedging purposes.

Credit Default Swaps:

The Fund may enter into credit default swaps, including to manage its exposure to the market or certain sectors of the market, to reduce its risk exposure to defaults by corporate and sovereign issuers held by the Fund, or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. The Fund may purchase credit protection (Buy Contract) or provide credit protection (Sale Contract) on the referenced obligation of the credit default swap. During the term of the swap agreement, the Fund receives/(pays) fixed payments from/(to) the respective counterparty, calculated at the agreed upon interest rate applied to the notional amount. If the Fund is a buyer/(seller) of protection and a credit event occurs, as defined under the terms of the swap agreement, the Fund will either (i) receive from the seller/(pay to the buyer) of protection an amount equal to the notional amount of the swap (the Maximum Payout Amount) and deliver/(take delivery of) the referenced obligation or (ii) receive/(pay) a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation.

In certain circumstances, Maximum Payout Amounts may be partially offset by recovery values of the respective referenced obligations, upfront premium received upon entering into the agreement, or net amounts received from settlement of buy protection credit default swaps entered into by the Fund for the same reference obligation with the same counterparty. As of September 30, 2014, the Fund had Buy Contracts outstanding with respect to the same referenced obligation and counterparty as certain Sale Contracts which may partially offset the Maximum Payout Amount in the amount of \$39,617,000.

Credit default swaps may involve greater risks than if the Fund had invested in the referenced obligation directly. Credit default swaps are subject to general market risk, liquidity risk, counterparty risk and credit risk. If the Fund is a buyer of protection and no credit event occurs, it will lose its investment. If the Fund is a seller of protection and a credit event occurs, the value of the referenced obligation received by the Fund coupled with the periodic payments previously received may be less than the Maximum Payout Amount it pays to the buyer, resulting in a loss to the Fund.

During the six months ended September 30, 2014, the Fund held credit default swaps for hedging and non-hedging purposes.

Implied credit spreads over Treasuries of comparable maturity utilized in determining the market value of credit default swaps on issuers as of period end are disclosed in the portfolio of investments. The implied spreads serve as an indicator of the current status of the payment/performance risk and typically reflect the market's assessment of the likelihood of default by the issuer of the referenced obligation. The implied credit spread of a particular reference entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Widening credit spreads typically represent a deterioration of the referenced entity's credit soundness and greater likelihood of default or other credit event occurring as defined under the terms of the agreement. A credit spread identified as Defaulted indicates a credit event has occurred for the referenced entity or obligation.

The Fund typically enters into International Swaps and Derivatives Association, Inc. Master Agreements (ISDA Master Agreement) or similar master agreements (collectively, Master Agreements) with its OTC derivative contract counterparties in order to, among other things, reduce its credit risk to counterparties. ISDA Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under an ISDA Master Agreement, the Fund typically may offset with the counterparty certain derivative financial instrument's payables and/or receivables with collateral held and/or posted and create one single net payment (close-out netting) in the event of default or termination.

Various Master Agreements govern the terms of certain transactions with counterparties, including transactions such as exchange-traded derivative transactions, repurchase and reverse repurchase agreements. These Master Agreements typically attempt to reduce the counterparty risk associated with such transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Cross-termination provisions under Master Agreements typically provide that a default in connection with one transaction between the Fund and a counterparty

gives the non-defaulting party the right to terminate any other transactions in place with the defaulting party to create one single net payment due to/due from the defaulting party. In the event of a default by a Master Agreements counterparty, the return of collateral with market value in excess of the Fund's net liability, held by the defaulting party, may be delayed or denied.

The Fund's Master Agreements may contain provisions for early termination of OTC derivative transactions in the event the net assets of the Fund decline below specific levels (net asset contingent features). If these levels are triggered, the Fund's counterparty has the right to terminate such transaction and require the Fund to pay or receive a settlement amount in connection with the terminated transaction.

At September 30, 2014 the Fund had entered into the following derivatives:

Derivative Type	Asset Derivatives Statement of		Liability Derivatives Statement of	
	Assets and Liabilities	Fair Value	Assets and Liabilities	Fair Value
	Location		Location	
Interest rate contracts	Receivable/Payable for variation margin on exchange-traded derivatives	\$ 279,582*		
Foreign exchange contracts	Unrealized appreciation on forward currency exchange contracts	9,582,697	Unrealized depreciation on forward currency exchange contracts	\$ 1,505,371
Foreign exchange contracts	Investments in securities, at value	83,481		
Credit contracts	Unrealized appreciation on credit default swaps	2,987,849	Unrealized depreciation on credit default swaps	1,292,636
Credit contracts	Receivable/Payable for variation margin on exchange-traded derivatives	459,227*	Receivable/Payable for variation margin on exchange-traded derivatives	490,404*
Credit contracts	Investments in securities, at value	138,109	Options written, at value	25,098

Derivative Type	Asset Derivatives Statement of		Liability Derivatives Statement of	
	Assets and Liabilities	Fair Value	Assets and Liabilities	Fair Value
Equity contracts			Unrealized depreciation on total return swaps	\$ 132,975
Equity contracts	Investment in securities, at value	\$ 572,041		
Total		\$ 14,102,986		\$ 3,446,484

* Only variation margin receivable/payable at period end is reported within the statement of assets and liabilities. This amount reflects cumulative appreciation/(depreciation) of exchange-traded derivatives as reported in the portfolio of investments.

The effect of derivative instruments on the statement of operations for the six months ended September 30, 2014:

Derivative Type	Location of Gain or (Loss) on Derivatives	Realized Gain or (Loss) on Derivatives	Change in Unrealized Appreciation or (Depreciation)
Interest rate contracts	Net realized gain/(loss) on swaps; Net change in unrealized appreciation/depreciation of swaps	\$ (980,119)	\$ 166,093
Interest rate contracts	Net realized gain/(loss) on futures; Net change in unrealized appreciation/depreciation of futures	34,152	639,664
Interest rate contracts	Net realized gain/(loss) on investment transactions; Net change in unrealized appreciation/depreciation of investment transactions	(62,969)	0
Foreign exchange contracts	Net realized gain/(loss) on foreign currency transactions; Net change in unrealized appreciation/depreciation of foreign currency denominated assets and liabilities	7,485,606	6,343,630

Derivative Type	Location of Gain or (Loss) on Derivatives	Realized Gain or (Loss) on Derivatives	Change in Unrealized Appreciation or (Depreciation)
Foreign exchange contracts	Net realized gain/(loss) on investment transactions; Net change in unrealized appreciation/depreciation of investment transactions	\$ (294,714)	\$ (81,499)
Credit contracts	Net realized gain/(loss) on investment transactions; Net change in unrealized appreciation/depreciation of investment transactions	(1,315,937)	154,851
Credit contracts	Net realized gain/(loss) on swaps; Net change in unrealized appreciation/depreciation of swaps	2,154,450	(1,685,706)
Credit contracts	Net realized gain/(loss) on options written; Net change in unrealized appreciation/depreciation of options written	1,208,002	(291,714)
Equity contracts	Net realized gain/(loss) on swaps; Net change in unrealized appreciation/depreciation of swaps	0	(132,975)
Equity contracts	Net realized gain/(loss) on investment transactions; Net change in unrealized appreciation/depreciation of investment transactions	(2,158,726)	178,995
Equity contracts	Net realized gain/(loss) on options written; Net change in unrealized appreciation/depreciation of options written	174,062	0
Total		\$ 6,243,807	\$ 5,291,339

The following table represents the volume of the Fund's derivative transactions during the six months ended September 30, 2014:

Centrally Cleared Credit Default Swaps:	
Average notional amount of buy contracts.	\$ 35,528,112 ^(a)
Average notional amount of sale contracts	\$ 49,181,848
Centrally Cleared Interest Rate Swaps:	
Average notional amount.	\$ 153,197,143
Credit Default Swaps:	
Average notional amount of buy contracts	\$ 60,369,075
Average notional amount of sale contracts	\$ 54,031,136
Foreign Exchange Contracts:	
Average principal amount of buy contracts.	\$ 112,323,000
Average principal amount of sale contracts	\$ 267,823,182
Futures:	
Average original value of buy contracts.	\$ 141,272,156 ^(b)
Purchased Options Contracts:	
Average cost.	\$ 1,255,963
Total Return Swaps:	
Average notional amount.	\$ 13,110,000 ^(c)

(a) Positions were open for five months during the period.

(b) Positions were open for six months during the period.

(c) Positions were open for one month during the period.

For financial reporting purposes, the Fund does not offset derivative assets and derivative liabilities that are subject to netting arrangements in the statement of assets and liabilities.

All derivatives held at period end were subject to netting arrangements. The following tables present the Fund's derivative assets and liabilities by counterparty net of amounts available for offset under Master Agreements (MA) and net of the related collateral received/pledged by the Fund as of September 30, 2014:

Counterparty	Derivative Assets Subject to a MA	Derivatives Available for Offset	Cash Collateral Received*	Security Collateral Received*	Net Amount of Derivatives Assets
Exchange-Traded Derivatives:					
Goldman Sachs**	\$ 58,223	\$ 0	\$ 0	\$ 0	\$ 58,223
Morgan Stanley & Co. LLC**	410,067	(16,983)	0	0	393,084
UBS AG*	76,494	0	0	0	76,494
Total	\$ 544,784	\$ (16,983)	\$ 0	\$ 0	\$ 527,801

* The actual collateral received/pledged may be more than the amount reported due to overcollateralization.

** Cash has been posted for initial margin requirements for exchange-traded derivatives outstanding at September 30, 2014.

[^] Net amount represents the net receivable/(payable) that would be due from/to the counterparty in the event of default or termination. The net amount from OTC financial derivative instruments can only be netted across transactions governed under the same master agreement with the same counterparty. See Note C.3 for additional disclosure of netting arrangements regarding reverse repurchase agreements.

2. Currency Transactions

The Fund may invest in non-U.S. dollar securities on a currency hedged or unhedged basis. The Fund may seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives, including forward currency exchange contracts, futures and options on futures, swaps, and other options. The Fund may enter into transactions for investment opportunities when it anticipates that a foreign currency will appreciate or depreciate in value but securities denominated in that currency are not held by the Fund and do not present attractive investment opportunities. Such transactions may also be used when the Adviser believes that it may be more efficient than a direct investment in a foreign currency-denominated security. The Fund may also conduct currency exchange contracts on a spot basis (i.e., for cash at the spot rate prevailing in the currency exchange market for buying or selling currencies).

3. Reverse Repurchase Agreements

The Fund may enter into reverse repurchase transactions (RVP) in accordance with the terms of a Master Repurchase Agreement (MRA), under which the Fund sells securities and agrees to repurchase them at a mutually agreed upon date and price. At the time the Fund enters into a reverse repurchase agreement, it will establish a segregated account with the custodian containing liquid assets having a value comparable to the repurchase price. Under the MRA and other Master Agreements, the Fund is permitted to offset payables and/or receivables with collateral held and/or posted to the counterparty and create one single net payment due to or from the Fund in the event of a default. In the event of a default by a MRA counterparty, the Fund may be considered an unsecured creditor with respect to any excess collateral (collateral with a market value in excess

of the repurchase price) held by and/or posted to the counterparty, and as such the return of such excess collateral may be delayed or denied. For the six months ended September 30, 2014, the average amount of reverse repurchase agreements outstanding was \$94,710,899 and the daily weighted average interest rate was (0.47)%. During the period, the Fund received net interest payments from counterparties. At September 30, 2014, the Fund had reverse repurchase agreements outstanding in the amount of \$239,381,610 as reported in the statement of assets and liabilities.

The following table presents the Fund's RVP liabilities by counterparty net of the related collateral pledged by the Fund as of September 30, 2014:

Counterparty	RVP Liabilities Subject to a MRA	Securities Collateral Pledged*	Net Amount of RVP Liabilities
Barclays Capital, Inc.	\$ 45,445,967	\$ (45,445,967)	\$ 0
Credit Suisse Securities (USA) LLC.	35,081,935	(34,285,421)	796,514
Deutsche Bank Securities, Inc	74,077,457	(74,077,457)	0
ING Bank N.V	5,153,260	(4,698,906)	454,354
JPMorgan Chase Bank, N.A.	69,486,249	(69,486,249)	0
RBC Capital Markets	10,136,742	(8,574,295)	1,562,447
Total	\$ 239,381,610	\$ (236,568,295)	\$ 2,813,315

Including accrued interest.

* The actual collateral pledged may be more than the amount reported due to overcollateralization.

4. Loan Participations and Assignments

The Fund may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers, either in the form of participations at the time the loan is originated (Participations) or by buying an interest in the loan in the secondary market from a financial institution or institutional investor (Assignments). A loan is often administered by a bank or other financial institution (the Lender) that acts as agent for all holders. The agent administers the terms of the loan as specified in the loan agreement. When investing in Participations, the Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. In addition, when investing in Participations, the Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender and only upon receipt of payments by the Lender from the borrower. As a result, the Fund may be subject to the credit risk of both the borrower and the Lender. When the Fund purchases Assignments from Lenders, it will typically acquire direct rights against the borrower on the loan. These loans may include participations in bridge loans , which are loans taken out by borrowers for a short period (typically less than six months) pending arrangement of more permanent financing through, for example, the issuance of bonds, frequently high-yield bonds issued for the purpose of acquisitions. The Fund may also participate in unfunded loan commitments, which are contractual obligations

for investing in future Participations, and receive a commitment fee based on the amount of the commitment. Under these arrangements, the Fund may receive a fixed rate commitment fee and, if and to the extent the borrower borrows under the facility, the Fund may receive an additional funding fee.

Unfunded loan commitments and funded loans are marked to market daily.

As of September 30, 2014, the Fund had no unfunded loan commitments outstanding.

As of September 30, 2014, the fund had no bridge loan commitments outstanding.

During the six months ended September 30, 2014, the Fund received commitment fees or additional funding fees in the amount of \$25,863.

NOTE D

Capital Stock

During the six months ended September 30, 2014 the Fund issued no shares in connection with the Fund's dividend reinvestment plan. During the year ended March 31, 2014 the Fund issued 77,899 shares in connection with the Fund's dividend reinvestment plan.

NOTE E

Risks Involved in Investing in the Fund

Interest Rate Risk and Credit Risk Interest rate risk is the risk that changes in interest rates will affect the value of the Fund's investments in fixed-income debt securities such as bonds or notes. Increases in interest rates may cause the value of the Fund's investments to decline. Credit risk is the risk that the issuer or guarantor of a debt security, or the counterparty to a derivative contract, will be unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. The degree of risk for a particular security may be reflected in its credit rating. Credit risk is greater for medium quality and lower-rated securities. Lower-rated debt securities and similar unrated securities (commonly known as "junk bonds") have speculative elements or are predominantly speculative risks.

Duration Risk Duration is a measure that relates the expected price volatility of a fixed-income security to changes in interest rates. The duration of a fixed-income security may be shorter than or equal to full maturity of a fixed-income security. Fixed-income securities with longer durations have more risk and will decrease in price as interest rates rise. For example, a fixed-income security with a duration of three years will decrease in value by approximately 3% if interest rates increase by 1%.

Mortgage-Backed and/or Other Asset-Backed Securities Risk Investments in mortgage-backed and other asset-backed securities are subject to certain additional risks. The value of these securities may be particularly sensitive to changes in interest rates. These risks include extension risk, which is the risk that, in periods of rising interest rates, issuers may delay the payment of principal, and prepayment risk, which is the risk that in periods of falling interest rates, issuers may pay principal sooner than expected, exposing the Fund to a lower rate of return upon reinvestment of principal. Mortgage-backed securities offered by non-governmental issuers and other asset-backed securities may be subject to other risks, such as higher rates of default in the mortgages or assets backing the securities or risks associated with the nature and servicing of mortgages or assets backing the securities.

Foreign Securities Risk Investing in securities of foreign companies or foreign governments involves special risks which include changes in foreign currency exchange rates and the possibility of future political and economic developments which could adversely affect the value of such securities. Moreover, securities of many foreign companies or foreign governments and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies and the U.S. government.

Foreign investment risk may be particularly high to the extent the Fund invests in emerging market securities of issuers based in countries with developing economies. These securities may present market, credit, currency, liquidity, legal, political and other risks different from, or greater than, the risks of investing in developed foreign (non-U.S.) countries.

Currency Risk This is the risk that changes in foreign currency exchange rates may negatively affect the value of the Fund's investments or reduce the returns of the Fund. For example, the value of the Fund's investments in foreign currency-denominated securities or currencies may decrease if the U.S. dollar is strong (i.e., gaining value relative to other currencies) and other currencies are weak (i.e., losing value relative to the U.S. dollar). Currency markets are generally not as regulated as securities markets. Independent of the Fund's investments in securities denominated in foreign currencies, the Fund's positions in various foreign currencies may cause the Portfolio to experience investment losses due to the changes in exchange rates and interest rates.

Derivatives Risk The Fund may enter into derivative transactions such as forwards, options, futures and swaps. Derivatives may be illiquid, difficult to price, and leveraged so that small changes may produce disproportionate losses for the Fund, and subject to counterparty risk to a greater degree than more traditional investments. Derivatives may result in significant losses, including losses that are far greater than the value of the derivatives reflected in the statement of assets and liabilities.

Indemnification Risk In the ordinary course of business, the Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these indemnification provisions and expects the risk of loss thereunder to be remote. Therefore, the Fund has not accrued any liability in connection with these indemnification provisions.

Leverage Risk The Fund may utilize leverage through borrowings or the investment techniques of reverse repurchase agreements and dollar rolls. Reverse repurchase agreements and dollar rolls are speculative techniques and the proceeds from these transactions may be used, similar to borrowings by the Fund, for investment purposes.

Leverage may result in higher returns to the Fund than if the Fund were not leveraged, but may also adversely affect returns, particularly if the market is declining. The risks of leverage also include potentially a higher volatility of the NAV of the Common Stock, potentially more volatility in the market value of the Common Stock and the relatively greater effect on the NAV of the Common Stock caused by the favorable or adverse changes in portfolio security values or currency exchange rates. In addition, changes in the interest rate environment can increase or decrease shareholder returns. The Fund maintains asset coverage of at least 300% with respect to borrowings.

To the extent that the current interest rate on the Fund's indebtedness approaches the net return on the leveraged portion of the Fund's investment portfolio, then the benefit to the shareholders will be reduced. If the rate on indebtedness were to exceed the net return on the same portion of the portfolio, then this would result in a lower rate of return for the shareholders. Similarly, the use of leverage in a declining market can advance the decrease of the Fund's NAV more so than if the Fund were not leveraged, which would likely be reflected in a greater decline in the market price for shares of Common Stock than if the Fund were not leveraged. In extreme cases, if the Fund's current investment income were not sufficient to meet interest payments on indebtedness or if the Fund failed to maintain the asset coverage required by the 1940 Act, then it could be necessary for the Fund to liquidate certain investments at a time when it may be disadvantageous to do so. The use of derivative instruments by the Fund, such as forwards, futures, options and swaps, may result in a form of leverage.

NOTE F

Distributions to Shareholders

The tax character of distributions paid for the year ending March 31, 2015 will be determined at the end of the current fiscal year.

The tax character of distributions paid during the fiscal years ended March 31, 2014 and March 31, 2013 were as follows:

	2014	2013
Distributions paid from:		
Ordinary income	\$ 111,966,291	\$ 117,708,724
Long-term capital gains	24,549,589	6,067,305
Total taxable distributions	136,515,880	123,776,029
Total distributions paid	\$ 136,515,880	\$ 123,776,029

As of March 31, 2014, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Undistributed ordinary income	\$ 7,621,617
Undistributed capital gains	13,569,861
Accumulated capital and other losses	(491,586) ^(a)
Unrealized appreciation/(depreciation)	92,033,259 ^(b)
Total accumulated earnings/(deficit)	\$ 112,733,151

^(a) As of March 31, 2014, the cumulative deferred loss on straddles was \$491,586.

^(b) The differences between book-basis and tax-basis unrealized appreciation/(depreciation) are attributable primarily to the tax deferral of losses on wash sales, the tax treatment of passive foreign investment companies (PFICs), swaps and partnerships, and the realization for tax purposes of gains/losses on certain derivative instruments.

For tax purposes, net capital losses may be carried over to offset future capital gains, if any. Funds are permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010 for an indefinite period, and such losses will retain their character as either short-term or long-term capital losses. As of March 31, 2014, the Fund did not have any capital loss carryforwards.

NOTE G

Subsequent Events

Management has evaluated subsequent events for possible recognition or disclosure in the financial statements through the date the financial statements are issued. Management has determined that there are no material events that would require disclosure in the Fund's financial statements through this date.

Portfolio turnover rate	16 %	36 %	38 %	26 %	52 %	38 %

(a) Based on average shares outstanding.

(b) Amount is less than \$0.005.

(c) Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. Total investment return calculated for a period of less than one year is not annualized.

(d) Annualized.

* Includes the impact of proceeds received and credited to the Fund resulting from the class actions settlements, which enhanced the Fund's performance for the year ended March 31, 2011 by 0.01%.

See notes to financial statements.

ADDITIONAL INFORMATION

(unaudited)

AllianceBernstein Global High Income Fund

Shareholders whose shares are registered in their own names will automatically be participants in the Dividend Reinvestment Plan (the Plan), pursuant to which distributions to shareholders will be paid in or reinvested in additional shares of the Fund, unless they elect to receive cash. Computershare Trust Company N.A. (the Agent) will act as agent for participants under the Plan. Shareholders whose shares are held in the name of a broker or nominee should contact such broker or nominee to determine whether or how they may participate in the Plan.

If the Board declares a distribution payable either in shares or in cash, as holders of the Common Stock may have elected, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in shares of Common Stock of the Fund valued as follows:

- (i) If the shares of Common Stock are trading at net asset value or at a premium above net asset value at the time of valuation, the Fund will issue new shares at the greater of net asset value or 95% of the then current market price.
- (ii) If the shares of Common Stock are trading at a discount from net asset value at the time of valuation, the Agent will receive the distribution in cash and apply it to the purchase of the Fund's shares of Common Stock in the open market on the New York Stock Exchange or elsewhere, for the participants' accounts. Such purchases will be made on or shortly after the payment date for such distribution and in no event more than 30 days after such date except where temporary curtailment or suspension of purchase is necessary to comply with Federal securities laws. If, before the Agent has completed its purchases, the market price exceeds the net asset value of a share of Common Stock, the average purchase price per share paid by the Agent may exceed the net asset value of the Fund's shares of Common Stock, resulting in the acquisition of fewer shares than if the distribution had been paid in shares issued by the Fund.

The Agent will maintain all shareholders' accounts in the Plan and furnish written confirmation of all transactions in the account, including information needed by shareholders for tax records. Shares in the account of each Plan participant will be held by the Agent in non-certificate form in the name of the participant, and each shareholder's proxy will include those shares purchased or received pursuant to the Plan.

There will be no charges with respect to shares issued directly by the Fund to satisfy the dividend reinvestment requirements. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Agent's open market purchases of shares.

The automatic reinvestment of distributions will not relieve participants of any income taxes that may be payable (or required to be withheld) on distributions.

Experience under the Plan may indicate that changes are desirable. Accordingly, the Fund reserves the right to amend or terminate the Plan as applied to any voluntary cash payments made and any dividend or distribution paid subsequent to written notice of the change sent to participants in the Plan at least 90 days before the record date for such dividend or distribution. The Plan may also be amended or terminated by the Agent on at least 90 days written notice to participants in the Plan. All correspondence concerning the Plan should be directed to the Agent at Computershare Trust Company N.A., P.O. Box 30170 College Point, TX 77842-3170.

(1) Member of the Audit Committee, the Governance and Nominating Committee and the Independent Directors Committee.

(2) The day-to-day management of, and investment decisions for, the Fund's portfolio are made by the Global Fixed-Income: Emerging Market Investment Team. While all members of the team work jointly to determine the majority of the investment strategy including stock selection for the Fund, Messrs. Paul J. DeNoon, Douglas J. Peebles, Marco G. Santamaria and Matthew S. Sheridan, members of the Global Fixed-Income: Emerging Market Investment Team, are primarily responsible for the day-to-day management of the Fund's portfolio.

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940 that the Fund may purchase from time to time at market prices shares of its Common Stock in the open market.

This report, including the financial statements herein, is transmitted to the shareholders of AllianceBernstein Global High Income Fund for their information. The financial information included herein is taken from the records of the Fund. This is not a prospectus, circular or representation intended for use in the purchase of shares of the Fund or any securities mentioned in this report.

Annual Certifications As required, on April 30, 2014, the Fund submitted to the New York Stock Exchange (NYSE) the annual certification of the Fund's Chief Executive Officer certifying that he is not aware of any violation of the NYSE's Corporate Governance listing standards. The Fund also has included the certifications of the Fund's Chief Executive Officer and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act of 2002 as exhibits to the Fund's Form N-CSR filed with the Securities and Exchange Commission for the reporting period.

ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND 105

Board of Directors

SUMMARY OF GENERAL INFORMATION

Shareholder Information

The Fund distributes its daily net asset value (NAV) to various financial publications or independent organizations such as Lipper, Inc., Morningstar, Inc. and Bloomberg.

Weekly comparative net asset value and market price information about the Fund is published each Monday in *The Wall Street Journal*, each Saturday in *Barron's* and other newspapers in a table called "Closed-End Funds." Daily net asset value information and market price information and additional information regarding the Fund is available at www.alliancebernstein.com and at www.nyse.com.

Dividend Reinvestment Plan

If your shares are held in your own name, you will automatically be a participant in the Plan unless you elect to receive cash. If your shares are held in nominee or street name through a broker or nominee who provides this service, you will also automatically be a participant in the Plan. If your shares are held in the name of a broker or nominee who does not provide this service, you will need to instruct them to participate in the Plan on your behalf or your distributions will not be reinvested. In such case, you will receive your distributions in cash.

For questions concerning shareholder account information, or if you would like a brochure describing the Dividend Reinvestment Plan, please call Computershare Trust Company, N.A. at (800) 219-4218.

Privacy Notice (This information is not part of the Shareholder Report.)

AllianceBernstein and its affiliates (collectively "AllianceBernstein") understand the importance of maintaining the confidentiality of their clients' nonpublic personal information. Nonpublic personal information is personally identifiable financial information about our clients who are natural persons. To provide financial products and services to our clients, we may collect information about clients from a variety of sources, including: (1) account documentation, including applications or other forms, which may include information such as a client's name, address, phone number, social security number, assets, income and other household information, (2) client transactions with us and others, such as account balances and transactions history, and (3) information from visitors to our websites provided through online forms, site visitorship data and online information-collecting devices known as "cookies".

It is our policy not to disclose nonpublic personal information about our clients, or former clients (collectively "clients"), except to our affiliates, or to others as permitted or required by law. From time to time, we may disclose nonpublic personal information that we collect about our clients to non-affiliated third parties, including those that perform transaction processing or servicing functions, those that provide marketing services for us or on our behalf pursuant to a joint marketing agreement or those that provide professional services to us under a professional services agreement, all of which require the third party provider to adhere to our privacy policy. We have policies and procedures to safeguard nonpublic personal information about our clients that include restricting access to nonpublic personal information and maintaining physical, electronic and procedural safeguards which comply with applicable standards.

It is also our policy to prohibit the sharing of our clients' personal information among our affiliated group of investment, brokerage, service and insurance companies for the purpose of marketing their products or services to clients, except as permitted by law. This information includes, but is not limited to, a client's income and account history.

We have policies and procedures to ensure that certain conditions are met before an AllianceBernstein affiliated company may use information obtained from another affiliate to solicit clients for marketing purposes.

ITEM 2. CODE OF ETHICS.

(a) The registrant has adopted a code of ethics that applies to its principal executive officer, principal financial officer and principal accounting officer. A copy of the registrant's code of ethics is filed herewith as Exhibit 12(a)(1).

(b) During the period covered by this report, no material amendments were made to the provisions of the code of ethics adopted in 2(a) above.

(c) During the period covered by this report, no implicit or explicit waivers to the provisions of the code of ethics adopted in 2(a) above were granted.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

The registrant's Board of Directors has determined that independent directors Garry L. Moody and William H. Foulk, Jr. qualify as audit committee financial experts.

ITEM 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

Not applicable when filing a semi-annual report to shareholders.

ITEM 5. AUDIT COMMITTEE OF LISTED REGISTRANTS.

Not applicable when filing a semi-annual report to shareholders.

ITEM 6. SCHEDULE OF INVESTMENTS.

Please see Schedule of Investments contained in the Report to Shareholders included under Item 1 of this Form N-CSR.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Not applicable when filing a semi-annual report to shareholders.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Not applicable when filing a semi-annual report to shareholders.

ITEM 9. PURCHASES OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS.

Not applicable when filing a semi-annual report to shareholders.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There have been no material changes to the procedures by which shareholders may recommend nominees to the Fund's Board of Directors since the Fund last provided disclosure in response to this item.

ITEM 11. CONTROLS AND PROCEDURES.

(a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-2(c) under the Investment Company Act of 1940, as amended) are effective at the reasonable assurance level based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this document.

(b) There were no changes in the registrant's internal controls over financial reporting that occurred during the second fiscal quarter of the period that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

ITEM 12. EXHIBITS.

The following exhibits are attached to this Form N-CSR:

EXHIBIT NO.	DESCRIPTION OF EXHIBIT
12 (b) (1)	Certification of Principal Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
