

SWISS HELVETIA FUND, INC.

Form N-30B-2

June 01, 2015

THE SWISS HELVETIA FUND, INC.

For the three-month period ended March 31, 2015, the performance of the Swiss Helvetia Fund, Inc. (the Fund), as measured by the change in value in the Fund's net asset value (NAV), increased by 3.91% in US dollars. For the same period, the Fund's share price performance increased by 3.59%, as the discount at which the Fund traded its shares widened. This compares with an increase of 4.89% in the Swiss equity markets, as measured by the Swiss Performance Index (the Index or SPI) as measured in US dollars.

Economic environment during the period under review

Global economic review

Global economic growth reported for the final quarter of 2014 was weaker than the rate posted in the third quarter. This was mainly due to a softening of data reported for the US, where the real GDP growth rate registered in the third quarter more than halved from 5% to 2.2%. In the Eurozone, there was a moderate acceleration from 0.8% to 0.9%. In the UK, the rate also advanced slightly from 2.8% to 3%. Japan recovered to 1.5% quarterly growth after a slump in the previous two quarters, and China was stable at 7.3%.

In the US, although the quantitative easing (QE) process has been terminated, the Federal Reserve appears reluctant to start raising short-term interest rates. Meanwhile, in large part due to the slow pace of economic activity and lower energy prices, the massive

QE effort of the European Central Bank (ECB) does not appear to be causing inflationary pressures in consumer prices.

In terms of Swiss monetary policy, the big event during the reporting period was the Swiss National Bank's (SNB) abolishment of the floor for the Euro exchange rate against the Swiss franc, which occurred on January 15, 2015. This led to an approximate 15% rise of the Swiss franc against all other currencies. The US dollar subsequently continued its rise against most currencies, including the Swiss franc. As a result, while the Swiss franc strengthened by just over 2% against the US dollar for the first quarter 2015, it strengthened by approximately 15% against the Euro.

Swiss economic review

Swiss real GDP in the fourth quarter of 2014 grew by 0.6% (not annualized) equal to the third quarter. The preliminary growth estimate for 2014 came at 2.0% according to the Swiss State Secretariat for Economic Affairs (SECO). The strongest contribution, accounting for 1.4% of the 2.0% GDP growth, came from the balance of trade. Exports of goods (excluding valuables) advanced by 4.8% while imports grew only by 1.3% (however, this component is expected to change in 2015, after the SNB abandoned the floor for the EUR/CHF exchange rate). Private consumption, which was a more stable component in 2014 and is expected to remain so, grew by about 1% and contributed approximately 0.5% to annual GDP.

THE SWISS HELVETIA FUND, INC.

Market environment during the period under review

Equity and bond markets performed well during the first quarter, primarily driven by the start of QE by the ECB. Most stock markets experienced positive performance in local currencies, but when measured in US dollars, some of the strong advances were offset by the significant decline that most currencies experienced except the Swiss franc. In terms of regional performance in local currencies, the MSCI Europe stood out when measured in Euros, having returned 16.75% on the prospect of better economic growth and the ECB's QE, which however led to a decline of the common currency, resulting in a return for the MSCI Europe of only 3.52% in US dollars. In general, when looking at the performance in US dollars, regional or country index performance had marginal variance, and the SPI emerged as a leader with an advance of 4.89%, compared to an almost flat performance of the Standard & Poor's 500 during the same period.

Within the Swiss equity market, there were important differences both in terms of sectors and stocks. Generally, stocks with high dividend yields fared better, with some exceptions: *Adecco*, *Geberit* and *UBS* were among the top performers within the blue chip Swiss Market Index, despite paying dividends at a rate below that of the Index. The performance of the three heavyweights can be found around the median. *Novartis* slightly outperformed, while *Roche* lagged slightly due to a drug development set-back in December, and *Nestlé* was subdued due to

its 2015 guidance for organic growth, which was below its long-term ambitions. Small and mid caps moderately outperformed the Index by 1.6%.

Performance

The Fund's performance benefited in absolute USD terms from some of its larger positions, *i.e.*, *Novartis*, *Roche*, *Lindt & Sprungli*, *Nestlé*, *Tecan*, *UBS*, *Syngenta* and *Swiss Life*. Some smaller holdings also were helpful for absolute performance: *Leonteq*, *Basilea*, *Implenia*, *Evolva*, *Lonza*, *Clariant*, *Helvetia* and *DKSH*. These stocks also contributed positively to performance compared against the return of the SPI, with three exceptions: *Novartis* (outperformed the Index and is held at an underweight due to the Fund's industry concentration limitations), *UBS* (outperformed the Index and is held at an underweight) and *Swiss Life* (underperformed the Index slightly and is held at an overweight). Among the Fund's larger positions, *Swatch* and *Richemont* contributed negatively on an absolute and relative basis. Other stocks that had an absolute and relative negative impact were *Belimo*, *Sonova*, *Bucher*, *OC Oerlikon*, *Bruckhardt Compression* and *Logitech*.

During the period, there was an overall neutral effect from stock and sector allocation on the Fund's NAV return of 3.91% in US dollars, which was equivalent to the performance of the Index's performance of 4.89% before taking into account the impact of private equity holdings, Fund expenses and dividend reinvestments.

THE SWISS HELVETIA FUND, INC.

Private Equity Investments

The value of the Fund's private equity investments decreased during the reporting period. The limited partnership *Zurmont Madison Private Equity LLP* distributed the proceeds of two further divestments, but also reduced the value of its holdings. There was a minor negative revaluation at *Selfrag*, reflecting the terms of a capital increase announced in the first quarter that the Fund chose not participate in and which is expected to close in the second quarter of 2015.

Portfolio changes

There has been a rather low turnover, both in dollar terms and in the number of portfolio purchases and sales. In total, there were 8 purchases and 6 sales of listed equities on a net basis during the quarter. As of March 31, 2015, there are 35 listed companies held by the Fund, 6 direct investments into private equity firms and two participations held in private equity limited partnerships.

Leonteq AG

DKSH Holding, Ltd.

In the first quarter of 2015, we added three new positions to the Fund: *Airopack*, *gategroup* and *Sunrise Communications*.

Airopack is a small company with a focus on innovative packaging and dispenser solutions, including dispensing technology driven by air pressure without the need for chemical propellants. Its largest client is Procter & Gamble, which is offering under the Gillette brand first products (razor gel) with the dispenser solution of *Airopack*.

Travel and Leisure company *gategroup* is an independent provider of products and services for on-board passengers in trains and airplanes. Its core operation is airline catering. We had several meetings with management and with the company's chairman as well as with an activist shareholder. We gained confidence that the operational underperformance of the business will be addressed and therefore decided to buy a position in this stock.

THE SWISS HELVETIA FUND, INC.

Sunrise Communications is a telecommunication company with operations solely in Switzerland. It is a top company in a highly concentrated and attractive Swiss market with high brand loyalty. We decided to participate in the company's IPO as we like the stable nature of the business and as it was priced at a discount to Swisscom, the incumbent industry leader.

We increased the Fund's positions in *Swiss Life*, *Feintool* and *OC Oerlikon* when these stocks sold off after the SNB's decision to abandon the Swiss franc minimum exchange rate to the Euro.

During the quarter we completely disposed of our position in *Sika*. While the stock had performed well since our acquisition, we disposed of our position after evaluating the potential impact of an ongoing legal dispute involving the company's founding family.

In addition, we reduced several positions that either had a strong stock price performance or where we believe the market is underestimating the impact of the SNB's decision regarding the Swiss franc/Euro exchange rate.

Outlook

Global economic outlook

Expectations for 2015 are for a moderate recovery, although the global economy softened toward the end of last year, mainly driven by the US. Also, lower commodity prices, particularly the large slide in oil

prices, led to concerns over global growth. While these have a dampening effect in the short term, we believe they should lead to economic tailwinds in the long term, which reinforces our view that the economy should accelerate modestly after the US digests a weak first quarter. Thanks to the ECB's large quantitative easing program and the ensuing slide of the Euro, growth is expected to pick up from a low level in Europe, while a weaker yen should have a comparable effect on the Japanese economy. Emerging economies generally are likely to benefit from an upswing in advanced economies, although commodity dependent countries such as Russia and Brazil may continue to be impacted by heightened volatility in commodities. In contrast, net energy importers such as India should benefit, although factors such as exchange rate links to the US dollar, a tighter US monetary policy and a strong dollar might weigh on growth. Meanwhile, China is expected to decelerate as the property market cools and business capex is held back by overcapacity, but it should still grow solidly above other major economies.

Swiss economic outlook

Although last year's Swiss real GDP once again outpaced the Euro area and accelerated to an annualized preliminary growth rate of 2% in the fourth quarter of 2014, forecasts for 2015 have been lowered to 0.9% by SECO after the SNB decided to abandon the minimum exchange rate against the Euro. This will likely dampen the growth of an export oriented economy like Switzerland considerably, and we deem the official

THE SWISS HELVETIA FUND, INC.

estimate as optimistic. However, the weakness can be categorized as transient, as so far there are no reasons to expect a significant further strengthening of the Swiss franc. Therefore, our outlook for 2016 is again more realistic, and a reversion to 1.8% growth is currently expected.

Investment view

In terms of our overall market view, we expect strong liquidity and modest improvements in growth to continue to support equities despite the increase in valuations. We have, however, also highlighted previously that we expect volatility to increase from its currently low level. This would not be atypical for the later stages of a bull market.

Looking at the Swiss market, we should not be surprised that, after the SNB's decision, earnings estimates have fallen about 12% measured against where they stood at the start of 2015. While they have recovered slightly since the end of February, this is related to the strong correlation between Swiss earnings and the US dollar and should not yet be interpreted as a sign that overall earnings fundamentals have improved.

We currently think that the geopolitical risks are more or less confined to Russia, the Ukraine, the Middle East and Africa. We also expect the current Euro exit discussion to be limited to Greece. As a result, there is currently a lower risk for global markets, but the source of many of these issues emanates

from unexpected and irrational human behavior, and therefore they should not be disregarded completely.

As long as these risks do not become reality, equity markets should continue to rise. The liquidity injected by central banks is so significant and other asset classes, in particular bonds, are offering such low yields that the additional money created by central banks will eventually flow into equities. However, we expect volatility to increase, as it is typical in the later stages of an equity bull market. We do not expect a near end of the bull market, but rather would like to highlight the increased risk of a more significant set-back, after which we would expect equity indices to advance to even higher levels. As price-conscious investors, we are prone to add or increase positions in stocks during potential market corrections when prices become very attractive and when there is more valuation dispersion among stocks than we currently discern.

Ultimately, we continue to believe that Swiss equities are a good investment, especially in the long term. Many Swiss companies are global leaders of industry and we believe that Swiss companies will be able to successfully cope with a strengthening Swiss franc, as they have done over the last several decades.

THE SWISS HELVETIA FUND, INC.

Notes to Schedule of Investments (Unaudited)

Note 1 Organization and Significant Accounting Policies

A. Organization

The Swiss Helvetia Fund, Inc. (the Fund) is registered under the Investment Company Act of 1940, as amended (the Act), as a non-diversified, closed-end management investment company. The Fund is organized as a corporation under the laws of the State of Delaware.

The investment objective of the Fund is to seek long-term growth of capital through investment in equity and equity-linked securities of Swiss companies. The Fund may also acquire and hold equity and equity-linked securities of non-Swiss companies in limited instances.

B. Securities Valuation

The Fund values its investments at fair value in accordance with accounting principles generally accepted in the United States (GAAP).

When valuing listed equity securities, the Fund uses the last sale price on the securities exchange or national securities market on which such securities primarily are traded (the Primary Market) prior to the calculation of the Fund's net asset value (NAV). When valuing equity securities that are not listed (except privately-held companies and private equity limited partnerships) or that are listed but have not traded on a day on which the Fund calculates its NAV, the Fund uses the mean between the bid and asked prices for that day. If there are no asked quotations for such a security, the value of such security will be the most recent bid quotation on the Primary Market on that day. On any day when a security's Primary Market is closed because of a local holiday or other scheduled closure, but the New York Stock Exchange is open, the Fund may use the prior day's closing prices to value such security regardless of the length of the scheduled closing.

When valuing fixed-income securities, the Fund uses the last bid price prior to the calculation of the Fund's NAV. If there is no current bid price for a fixed-income security, the value of such security will be the mean between the last quoted bid and asked prices on that day. Overnight and certain other short-term fixed-income securities with maturities of less than sixty days will be valued by the amortized cost method, unless it is determined that the amortized cost method would not represent the fair value of such security.

It is the responsibility of the Fund's Board of Directors (the Board) to establish procedures to provide for the valuation of the Fund's portfolio holdings. When valuing securities for which market quotations are not readily available, or for which the market quotations that are available are considered unreliable, the Fund determines a fair value in good faith in accordance with these procedures (a Fair Value). The Fund may use these procedures to establish the Fair Value of securities when, for example, a significant event occurs between the time the market closes and the time the Fund values its investments. After consideration of various factors, the Fund may value the securities at their last reported price or at some other value.

Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

Swiss exchange-listed options, including Eurex-listed options, are valued at their most recent sale price (latest bid for long options and the latest ask for short options) on the Primary Market, or if there are no such sales, at the average of the most recent bid and asked quotations on such Primary Market, or if such quotations are not available, at the last bid quotation (in the case of purchased options) or the last asked quotation (in the case of written options). If, however, there are no such quotations, such options will be valued using the implied volatilities observed for similar options or from aggregated data as an input to a model. Options traded in the over-the-counter market are valued at the price communicated by the counterparty to the option, which typically is the price at which the counterparty would close out the transaction. Option contracts that are neither exchange-listed nor traded in the over-the-counter market, and where no broker can provide a quote or approved pricing vendor a price, may be valued using the implied volatilities observed for similar instruments or from aggregated market data received from services (*e.g.*, Bloomberg) as an input to a widely-accepted model.

 THE SWISS HELVETIA FUND, INC.

Notes to Schedule of Investments (Unaudited) (continued)

The Fund is permitted to invest in investments that do not have readily available market quotations. For such investments, the Act requires the Board to determine their Fair Value. The aggregate value of these investments amounted to \$15,983,282 or 4.32% of the Fund's net assets at March 31, 2015, and are listed in Note 3 to the Schedule of Investments.

Various inputs are used to determine the value of the Fund's investments. These inputs are summarized in the three broad levels listed below:

Level 1 unadjusted quoted prices in active markets for identical assets and liabilities

Level 2 other significant observable inputs (including quoted prices of similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund's investments as of March 31, 2015:

	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	Level 3 Significant Unobservable Inputs	Total
Investments in Securities				
Common Stock*	\$ 338,329,797	\$	\$ 4,176,574	\$ 342,506,371
Preferred Stock*			3,078,625	3,078,625
Private Equity Limited Partnerships			8,728,083	8,728,083
Total Investments in Securities	\$ 338,329,797	\$	\$ 15,983,282	\$ 354,313,079

* Please see the Schedule of Investments for industry classifications.

Level 3 securities, which are listed in Note 3 to the Schedule of Investments, consist of the Fund's investments in privately-held companies and private equity limited partnerships that invest in privately-held companies.

Inputs and valuation techniques used by the Fund to value its Level 3 investments in privately-held companies may include the following: acquisition cost; fundamental analytical data; discounted cash flow analysis; nature and duration of restrictions on disposition of the investment;

Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

public trading of similar securities of similar issuers; economic outlook and condition of the industry in which the issuer participates; financial condition of the issuer; and the issuer's prospects, including any recent or potential management or capital structure changes. Although these valuation inputs may be observable in the marketplace as is characteristic of Level 2 investments, the privately-held companies, categorized as Level 3 investments, generally are highly illiquid in terms of resale.

The Fund values its Level 3 investments in the two private equity limited partnerships in accordance with Accounting Standards Codification 820-10-35, *Investments in Certain Entities that Calculate Net Asset Value Per Share (Or its Equivalent)* (ASC 820-10-35). ASC 820-10-35 permits a reporting entity to measure the fair value of an investment that does not have a readily determinable fair value, based on the NAV of the investment as a practical expedient, without further adjustment, unless it is probable that the investment will be sold at a value significantly different than the NAV. If the NAV of the investment is not as of the Fund's measurement date, then the NAV should be adjusted to reflect any significant events that may change the valuation. Inputs and valuation techniques for these adjustments may include fair valuations of the partnerships and their portfolio holdings provided by the partnerships' general partners or managers, other available information about the partnerships' portfolio holdings, values obtained on redemption from other limited partners, discussions with the partnerships' general partners or managers and/or other limited partners and comparisons of previously-obtained estimates to the partnerships' audited financial statements. In using the unadjusted

THE SWISS HELVETIA FUND, INC.

Notes to Schedule of Investments (Unaudited) (continued)

NAV as a practical expedient, certain attributes of the investment that may impact its fair value are not considered. Attributes of those investments include the investment strategies of the privately-held companies and may also include, but are not limited to, restrictions on the investor's ability to redeem its investments at the measurement date and any unfunded commitments.

When valuing Level 3 investments, management also may consider potential events that could have a material impact on the operations of a privately-held company or private equity limited partnership. Not all of these factors may be considered or available, and other relevant factors may be considered on an investment-by-investment basis. The table below summarizes the techniques and unobservable inputs for the valuation of Level 3 investments.

Quantitative Information about certain Level 3 Fair Value Measurements

	Fair Value at March 31, 2015	Valuation Technique	Unobservable inputs	Range ¹
Privately-held companies				
<i>Biotechnology</i>				
NovImmune SA Common Shares	\$1,643,450	Market approach	Recent round of financing	N/A
NovImmune SA Preferred Shares	1,715,613	Market approach	Recent round of financing	N/A
Ixodes AG Preferred Shares	699,207	Discounted cash flow	Discount rate Probability of success rate on research and development	14%-16% 40%-60%
<i>Industrial Goods & Services</i>				
SelFrag AG, Class A, Series C Preferred Shares	232,062	Market approach	Recent round of financing	N/A
SelFrag AG, Class A, Series D Preferred Shares	72,751	Market approach	Recent round of financing	N/A
SelFrag AG, Class A, Series E Preferred Shares	159,283	Market approach	Recent round of financing	N/A
<i>Medical Equipment</i>				
Kuros Biosurgery AG Common Shares	702,234	Market approach	Proposed round of financing	N/A
EyeSense AG Preferred Shares	199,709	Market approach	Recent round of financing	N/A
Spineart SA Common Shares	1,830,890	Market approach	2014 peer group revenue multiples	3.0x-4.0x
Private Equity Limited Partnerships				
<i>Biotechnology</i>				
Aravis Biotech II Limited Partnership	1,970,656	NAV as a practical expedient	N/A	N/A
<i>Financial Services</i>				
Zurmont Madison Private Equity, Limited Partnership	6,757,427	NAV as a practical expedient	N/A	N/A
Total	\$15,983,282			

¹ Significant changes in any of these ranges would result in a significantly higher or lower fair value measurement. Generally, a change in the probability of success rate on research and development is accompanied by a directionally similar change in fair value. Conversely, a change in the discount rate is accompanied by a directionally opposite change in fair value.

THE SWISS HELVETIA FUND, INC.

Notes to Schedule of Investments (Unaudited) (continued)

The Fund's policy is to disclose transfers between Levels based on their market prices at the reporting period end. There were no transfers between Levels for the period ended March 31, 2015.

The following is a reconciliation of Level 3 assets for which significant unobservable inputs were used to determine fair value.

	Common Stock	Preferred Stock	Private Equity Limited Partnerships	Total
Balance as of December 31, 2014	\$ 4,082,631	\$ 3,084,987	\$ 14,962,890	\$ 22,130,508
Change in Unrealized Appreciation/Depreciation*	93,943	(6,362)	(1,512,361)	(1,424,780)
Net Realized Gain (Loss)				
Gross Purchases**				
Gross Sales**			(4,722,446)	(4,722,446)
Balance as of March 31, 2015	\$ 4,176,574	\$ 3,078,625	\$ 8,728,083	\$ 15,983,282

* The noted amounts of change in unrealized appreciation/depreciation relate to the fair value of Level 3 assets held on March 31, 2015.

** For private equity limited partnership investments, represents contributions of capital or return of capital distributions received.

C. Foreign Currency Translation

The Fund maintains its accounting records in U.S. dollars. The Fund's assets are invested primarily in Swiss equities. In addition, the Fund can make its temporary investments in Swiss franc-denominated bank deposits, short-term debt securities and money market instruments. Substantially all income received by the Fund is in Swiss francs. The Fund's NAV, however, is reported, and distributions from the Fund are made, in U.S. dollars, resulting in gain or loss from currency conversions in the ordinary course of business. Historically, the Fund has not entered into transactions designed to reduce currency risk and does not intend to do so in the future. The cost basis of foreign denominated assets and liabilities is determined on the date that they are first recorded within the Fund and translated to U.S. dollars. These assets and liabilities are subsequently valued each day at prevailing exchange rates. The difference between the original cost and current value denominated in U.S. dollars is recorded as unrealized foreign currency gain/loss. In valuing securities transactions, the receipt of income and the payment of expenses, the Fund uses the prevailing exchange rate on the transaction date.

D. Concentration of Market Risk

The Fund primarily invests in securities of Swiss issuers. Such investments may carry certain risks not ordinarily associated with investments in securities of U.S. issuers. These risks include future political and economic developments, unfavorable movements in the Swiss franc relative to the U.S. dollar, and the possible imposition of exchange controls and changes in governmental law and restrictions. In addition, concentrations of investments in securities of issuers located in a specific region expose the Fund to the economic and government policies of that region and may increase risk compared to a fund whose investments are more diversified.

 THE SWISS HELVETIA FUND, INC.

Notes to Schedule of Investments (Unaudited) (concluded)

Note 2 Capital Commitments

As of March 31, 2015, the Fund maintains illiquid investments in two private equity limited partnerships. These investments appear in the Fund's Schedule of Investments. The Fund's capital commitments for these partnerships are shown in the table below:

Investments	Original Capital Commitment*	Unfunded Commitment*	Fair Value as of March 31, 2015
Private Equity Limited Partnerships International (a)			
Aravis Biotech II, Limited Partnership	\$ 3,346,031	\$ 327,576	\$ 1,970,656
Zurmont Madison Private Equity, Limited Partnership	14,413,672	4,609,123	6,757,427

* The original capital commitment represents 3,250,000 and 14,000,000 Swiss francs for Aravis Biotech II, LP and Zurmont Madison Private Equity LP, respectively. The unfunded commitment represents 318,175 and 4,476,841 Swiss francs, respectively. The Swiss franc (CHF)/U.S. dollar exchange rate as of March 31, 2015 was used for conversion and equals 0.9713.

(a) This category consists of two private equity limited partnerships that invest primarily in ventures, biotechnology and in management buyout of industrial and consumer goods companies. There is no redemption right for the interests in these two limited partnerships. Instead, the nature of the investments in this category is that distributions are received through the realization of the underlying assets of the limited partnership.

THE SWISS HELVETIA FUND, INC.

Dividend Reinvestment Plan (Unaudited)

The Plan

The Fund's Dividend Reinvestment Plan (the Plan) offers a convenient way for you to reinvest capital gains distributions and ordinary income dividends, payable in whole or in part in cash, in additional shares of the Fund.

Some of the Plan features are:

Once you enroll in the Plan, all of your future distributions and dividends payable in whole or in part in cash will be automatically reinvested in Fund shares in accordance with the terms of the Plan.

You will receive shares valued at the lower of the Fund's net asset value or the Fund's market price as described below. The entire amount of your distribution or dividend will be reinvested automatically in additional Fund shares. For any balance that is insufficient to purchase full shares of the Fund, your account will be credited with fractional shares.

Your shares will be held in an account with the Plan agent. You will be sent regular statements for your records.

You may terminate participation in the Plan at any time.

The following are answers to frequently asked questions about the Plan.

How do I enroll in the Plan?

If you are holding certificates for your shares, contact American Stock Transfer & Trust Company (AST) at the address shown on the following page. If your shares are held in a brokerage account, contact your broker. Not all brokerage firms permit their clients to participate in dividend reinvestment plans such as the Plan and, even if your brokerage firm does permit participation, you may not be able to transfer your Plan

shares to another broker who does not permit participation. Your brokerage firm will be able to advise you about its policies.

How does the Plan work?

The cash portion of any dividends or distributions you receive, payable in whole or in part in cash, will be reinvested in shares of the Fund. The number of shares credited to your Plan account as a result of the reinvestment will depend upon the relationship between the Fund's market price and its net asset value per share on the record date of the distribution or dividend, as described below:

If the net asset value is greater than the market price (the Fund is trading at a discount), AST, as Plan Agent, will buy Fund shares for your account on the open market on the New York Stock Exchange or elsewhere. Your dividends or distributions will be reinvested at the average price AST pays for those purchases.

If the net asset value is equal to the market price (the Fund is trading at parity), the Fund will issue for your account new shares at net asset value.

Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

If the net asset value is less than but within 95% of the market price (the Fund is trading at a premium of less than 5%), the Fund will issue for your account new shares at net asset value.

If the net asset value is less than 95% of the market price (the Fund is trading at a premium of 5% or more), the Fund will issue for your account new shares at 95% of the market price.

If AST begins to buy Fund shares for your account at a discount to net asset value but, during the course of the purchases, the Fund's market price increases to a level above the net asset

THE SWISS HELVETIA FUND, INC.

Dividend Reinvestment Plan (Unaudited) (concluded)

value, AST will complete its purchases, even though the result may be that the average price paid for the purchases exceeds net asset value.

The stock portion of any dividends or distributions you receive is not subject to the Plan. When the Fund declares dividends or distributions payable either in (i) stock or (ii) stock or cash at the election of the stockholder, you will receive newly issued shares of the Fund (unless you elect to receive your dividend or distribution in cash) on terms and conditions that are otherwise identical to those of the Plan.

Will the entire amount of my distribution or dividend be reinvested?

The entire amount of your distribution or dividend, payable in cash, will be reinvested in additional Fund shares. If a balance remains after the purchase of whole shares, your account will be credited with any fractional shares (rounded to three decimal places) necessary to complete the reinvestment.

How can I sell my shares?

You can sell any or all of the shares in your Plan account by contacting AST. AST charges \$15 for the transaction plus \$.10 per share for this service. You can also withdraw your shares from your Plan account and sell them through your broker.

Does participation in the Plan change the tax status of my distributions or dividends?

No. The distributions and dividends are paid in cash and their taxability is the same as if you received the cash. It is only after the payment of distributions and dividends that AST reinvests the cash for your account.

Can I get certificates for the shares in the Plan?

AST will issue certificates for whole shares upon your request. Certificates for fractional shares will not be issued.

Is there any charge to participate in the Plan?

There is no charge to participate in the Plan. You will, however, pay a pro rata share of brokerage commissions incurred with respect to AST's open market purchases of shares for your Plan account.

How can I discontinue my participation in the Plan?

Contact your broker or AST in writing. If your shares are in a Plan account, AST will send you a certificate for your whole shares and a check for any fractional shares.

Where can I direct my questions and correspondence?

Contact your broker, or contact AST as follows:

By mail:

American Stock Transfer & Trust Company

PO Box 922

Wall Street Station

New York, NY 10269-0560

Through the Internet:

www.amstock.com

Through AST's automated voice response System:

1-888-556-0425

AST will furnish you with a copy of the Terms and Conditions of the Plan without charge.
