We are a holding company that, through subsidiaries, provides personal automobile insurance with a concentration on nonstandard auto insurance. Although licensed to write insurance in all 50 states and the District of Columbia, we focus on select states that we believe offer the greatest opportunity for premium growth and profitability.

Basis of Consolidation and Reporting

The accompanying consolidated financial statements are unaudited and should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2013. This Quarterly Report on Form 10-Q, including the Condensed Notes to Consolidated Financial Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations, focuses on our financial performance since the beginning of the year. These financial statements reflect certain adjustments necessary for a fair presentation of our results of operations and financial position. Such adjustments consist of normal, recurring accruals recorded to match expenses with their related revenue streams and the elimination of all significant inter-company transactions and balances.

We revised the presentation of our Consolidated Statements of Earnings for the three months ended March 31, 2013 to correctly classify \$25.3 million of installment and other fee income as a component of total revenues and to conform to our current-year presentation. Previously, installment and other fee income was presented net within our commissions and other underwriting expenses, which was not in compliance with GAAP, thereby understating both total revenues and total expenses by an equivalent amount. This revision is not considered to be material to previously issued financial statements since it has no effect on the results of operations, financial condition or cash flows in any period presented or in any previously issued financial statements.

We have evaluated events that occurred after March 31, 2014 for recognition or disclosure in our financial statements and the notes to the financial statements.

Schedules may not foot due to rounding.

Estimates

We based certain accounts and balances within these financial statements upon our estimates and assumptions. The amount of reserves for claims not yet paid, for example, is an item that we can only record by estimation. Unrealized capital gains and losses on investments are subject to market fluctuations, and we use judgment in the determination of whether unrealized losses on certain securities are temporary or other-than-temporary. Should actual results differ significantly from these estimates, the effect on our results of operations could be material. The results of operations

for the periods presented may not be indicative of our results for the entire year.

Note 3 Fair Value

Fair values of instruments are based on:

- (i) quoted prices in active markets for identical assets (Level 1), quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in
- (ii) markets that are not active and model-derived valuations in which all significant inputs are observable in active markets (Level 2) or
- valuations derived from valuation techniques in which one or more significant inputs are unobservable in the marketplace (Level 3).

The following tables present, for each of the fair value hierarchy levels, our assets and liabilities for which we report fair value on a recurring basis (in thousands):

Condensed Notes to Consolidated Financial Statements

We do not report our long-term debt at fair value in the Consolidated Balance Sheets. The \$282.3 million and \$272.6 million fair value of our long-term debt at March 31, 2014 and December 31, 2013, respectively, would be included in Level 2 of the fair value hierarchy if it were reported at fair value.

Level 1 includes cash and cash equivalents, U.S. Treasury securities, an exchange-traded fund and equities invested in a rabbi trust which funds our Supplemental Employee Retirement Plan ("SERP"). Level 2 includes securities whose fair value was determined using observable market inputs. Level 3 securities are comprised of (i) securities for which there is no active or inactive market for similar instruments, (ii) securities whose fair value is determined based on unobservable inputs and (iii) securities, other than those backed by the U.S. Government, that are not rated by a nationally recognized statistical rating organization ("NRSRO"). We recognize transfers between levels at the beginning of the reporting period.

A third party nationally recognized pricing service provides the fair value of securities in Level 2. We review the third party pricing methodologies quarterly and test for significant differences between the market price used to value the security and recent sales activity.

The following tables present the progression in the Level 3 fair value category (in thousands):

Of the \$5.6 million fair value of securities in Level 3 at March 31, 2014, which consists of nine securities, we priced six based on non-binding broker quotes, one price was provided by our unaffiliated money manager and one security, which was included in Level 3 because it was not rated by a nationally recognized statistical rating organization, was priced by a nationally recognized pricing service. We manually calculated the remaining one security, which had a fair value of \$0.1 million.

Condensed Notes to Consolidated Financial Statements

Quantitative information about the significant unobservable inputs used in the fair value measurement of the manually priced security at March 31, 2014 is as follows (in millions):

	Fair Value	Valuation Technique	Unobservable Input	Value Used
Corporate bond	\$0.1	Recovery rate ¹	Probability of default	100%

¹ Recovery rate for senior unsecured bonds as indicated in Moody's Investor's Service Annual Default Study: Corporate Default and Recovery Rates, 1920-2013.

The significant unobservable inputs used in the fair value measurement of our manually-priced corporate bond are a probability of default assumption and an assigned credit rating. Significant changes in either of these inputs in isolation could result in a significant change in fair value measurement for this corporate bond. Generally, a reduction in probability of default would increase security valuation. A change in the credit rating assumption would change the yield spread associated with that bond, and thus the yield used in discounting the cash flows to arrive at the security's valuation.

There were no transfers between Levels 1, 2 or 3 during either the three months ended March 31, 2014 or the three months ended March 31, 2013.

The gains or losses included in net earnings are included in the line item "Net realized (losses) gains on investments" in the Consolidated Statements of Earnings. We recognize the net gains or losses included in other comprehensive income in the line item "Unrealized gains (losses) on investments, net" in the Consolidated Statements of Comprehensive Income and the line item "Change in unrealized gain on investments" or the line item "Change in non-credit component of impairment losses on fixed maturities" in the Consolidated Statements of Changes in Shareholders' Equity.

The following table presents the carrying value and estimated fair value of our financial instruments (in thousands):

Note 4 Investments

We consider all fixed maturity and equity securities to be available-for-sale and report them at fair value with the net unrealized gains or losses reported after-tax (net of any valuation allowance) as a component of other comprehensive income. The proceeds from sales of securities for the three months ended March 31, 2014 and the three months ended March 31, 2013 were \$65.0 million and \$196.2 million, respectively. The proceeds for the three months ended March 31, 2014 were net of \$0.2 million of receivable for securities sold during the first quarter of 2014 that had not settled at March 31, 2014. The proceeds for the three months ended March 31, 2013 were net of \$2.8 million of receivable for securities sold during the first quarter of 2013 that had not settled at March 31, 2013.

Gross gains of \$0.8 million and gross losses of \$0.1 million were realized on sales of available for sale securities during the three months ended March 31, 2014 compared with gross gains of \$4.3 million and gross losses of \$0.4 million realized on sales during the three months ended March 31, 2013. Gains or losses on securities are determined on a specific identification basis.

INFINITY PROPERTY AND CASUALTY CORPORATION FORM 10-Q

Condensed Notes to Consolidated Financial Statements

The determination of whether unrealized losses are "other-than-temporary" requires judgment based on subjective as well as objective factors. Factors we considered and resources we used in our determination include:

the intent to sell the security;

whether it is more likely than not that there will be a requirement to sell the security before our anticipated recovery;

whether the unrealized loss is credit-driven or a result of changes in market interest rates;

the length of time the security's fair value has been below our cost;

the extent to which fair value is less than cost basis;

historical operating, balance sheet and cash flow data contained in issuer SEC filings;

issuer news releases;

near-term prospects for improvement in the issuer and/or its industry;

industry research and communications with industry specialists and

third-party research and credit rating reports.

We regularly evaluate for potential impairment each security position that has any of the following: a fair value of less than 95% of its book value, an unrealized loss that equals or exceeds \$100,000 or one or more impairment charges recorded in the past. In addition, we review positions held related to an issuer of a previously impaired security.

Condensed Notes to Consolidated Financial Statements

For fixed maturity securities that are other-than-temporarily impaired, we assess our intent to sell and the likelihood that we will be required to sell the security before recovery of our amortized cost. If a fixed maturity security is considered other-than-temporarily impaired but we do not intend to and are not more than likely to be required to sell the security before our recovery of amortized cost, we separate the amount of the impairment into a credit loss component and the amount due to all other factors ("non-credit component"). The excess of the amortized cost over the present value of the expected cash flows determines the credit loss component of an impairment charge on a fixed maturity security. The present value is determined using the best estimate of cash flows discounted at (1) the effective interest rate implicit at the date of acquisition for non-structured securities or (2) the book yield for structured securities. The techniques and assumptions for determining the best estimate of cash flows vary depending on the type of security. We recognize the credit loss component of an impairment charge in net earnings and the non-credit component in accumulated other comprehensive income. If we intend to sell or will, more likely than not, be required to sell a security, we treat the entire amount of the impairment as a credit loss.

The following table is a progression of credit losses on fixed maturity securities that were bifurcated between a credit and non-credit component (in thousands):

The table below sets forth the scheduled maturities of fixed maturity securities at March 31, 2014, based on their fair values (in thousands). We report securities that do not have a single maturity date at average maturity. Actual maturities may differ from contractual maturities because certain securities may be called or prepaid by the issuers.

Note 5 Long-Term Debt

In September 2012, we issued \$275 million principal of senior notes due September 2022 (the "5.0% Senior Notes"). The 5.0% Senior Notes accrue interest at 5.0%, payable semiannually. At the time we issued the 5.0% Senior Notes, we capitalized \$2.2 million of debt issuance costs, which we are amortizing over the term of the 5.0% Senior Notes. We calculated the March 31, 2014 fair value of \$282.3 million using a 190 basis point spread to the ten-year U.S. Treasury Note of 2.72%.

In August 2011, we renewed our agreement for a \$50 million three-year revolving credit facility (the "Credit Agreement") that requires us to meet certain financial and other covenants. We are currently in compliance with all covenants under the Credit

Agreement. At March 31, 2014, there were no borrowings outstanding under the Credit Agreement.

Total loss and LAE payments	(237,502) (226,578)
Balance at End of Period			
Unpaid losses and LAE, net of reinsurance recoverables	648,346	583,008	
Add back reinsurance recoverables	14,544	13,793	
Total unpaid losses and LAE	\$662,890	\$596,800	
Unpaid losses on known claims	\$226,659	\$218,835	
IBNR losses	272,159	223,898	
LAE	164,072	154,068	
Total unpaid losses and LAE	\$662,890	\$596,800	

The \$3.1 million of favorable reserve development during the three months ended March 31, 2014 was primarily due to a decrease in frequency in accident year 2013 in Florida personal injury protection and material damage coverages in the states of California, Georgia and Pennsylvania.

Note 9 Commitments and Contingencies

Commitments

There have been no material changes from the commitments discussed in the Form 10-K for the year ended December 31, 2013. For a description of our previously reported commitments, refer to Note 14 Commitments and Contingencies in the Form 10-K for the year ended December 31, 2013.

Contingencies

From time to time, we and our subsidiaries are named as defendants in various lawsuits incidental to our insurance operations. We consider legal actions relating to claims made in the ordinary course of seeking indemnification for a loss covered by the insurance policy in establishing loss and LAE reserves. We also face in the ordinary course of business lawsuits that seek damages beyond policy limits, commonly known as extra-contractual or "bad faith" claims, as well as class action and

Condensed Notes to Consolidated Financial Statements

individual lawsuits that involve issues not unlike those facing other insurance companies and employers. We continually evaluate potential liabilities and reserves for litigation of these types using the criteria established by the Contingencies topic of the FASC. Under this guidance, we may only record reserves for a loss if the likelihood of occurrence is probable and we can reasonably estimate the amount. If a material loss, while not probable, is judged to be reasonably possible we will disclose the nature of the contingency and a possible range of loss if estimable. In Estate of Jorge Luis Arroyo, Jr., et al. v. Gustavo M. Rodriguez, et al (Circuit Court of Miami-Dade County, Florida), a third party claimant is attempting to recover from Infinity a \$30 million consent judgment obtained against an Infinity policyholder for personal injuries suffered by plaintiff. Infinity believes any claims of bad faith are unfounded and has denied any and all liability to plaintiff. While the outcome of this case, as with litigation generally, cannot be predicted with certainty, at this stage of the litigation we do not believe that the likelihood of a material loss is probable.

For a description of previously reported contingencies, refer to Note 14 Commitments and Contingencies in the Form 10-K for the year ended December 31, 2013.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains certain "forward-looking statements" which anticipate results based on our estimates, assumptions and plans that are subject to uncertainty. We make these statements subject to the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995. All statements in this report not dealing with historical results or current facts are forward-looking and we base them on estimates, assumptions and projections. Statements which include the words "assumes," "believes," "seeks," "expects," "may," "should," "intends," "likely "targets," "plans," "anticipates," "estimates" or the negative version of those words and similar statements of a future or forward-looking nature identify forward-looking statements. Examples of such forward-looking statements include statements relating to expectations concerning market conditions, premium growth, earnings, investment performance, expected losses, rate changes and loss experience.

The primary events or circumstances that could cause actual results to differ materially from what we expect include determinations with respect to reserve adequacy, realized gains or losses on the investment portfolio (including other-than temporary impairments for credit losses), loss cost trends, undesired business mix or risk profile for new business and competitive conditions in our key Focus States. We undertake no obligation to publicly update or revise any of the forward-looking statements. For a more detailed discussion of some of the foregoing risks and uncertainties which could cause actual results to differ from those contained in the forward-looking statements see "Risk Factors" contained in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2013.

OVERVIEW

In the first quarter of 2014, our gross written premium grew 0.5%. Our strategy for 2014 is to grow our profitable business including California, Florida and Texas personal auto and countrywide Commercial Vehicle while addressing higher combined ratios in Arizona, Georgia, Nevada and Pennsylvania. We expect this strategy to reduce gross written premium in our remaining Focus States as well as runoff business in the remaining states. In the first quarter of 2014, gross written premium in California, Florida, Texas and Commercial Vehicle grew 6.3% compared with the first quarter of 2013 while the remaining Focus States declined 28.9%. See Results of Operations – Underwriting – Premium for a more detailed discussion of our gross written premium growth.

Net earnings and diluted earnings per share for the three months ended March 31, 2014 were \$10.3 million and \$0.89, respectively, compared with \$8.7 million and \$0.74, respectively, for the three months ended March 31, 2013. The increase in diluted earnings per share for the three months ended March 31, 2014 was primarily due to an improvement in underwriting profitability.

Included in net earnings for the three months ended March 31, 2014 was \$2.0 million (\$3.1 million pre-tax) of favorable development on prior accident year loss and LAE reserves. The development was primarily due to a decrease in frequency in accident year 2013 in Florida personal injury protection and material damage coverages in California, Georgia and Pennsylvania. Included in net earnings for the three months ended March 31, 2013 was \$0.1 million (\$0.1 million pre-tax) of favorable development on prior accident year loss and LAE reserves.

The following table displays combined ratio results by accident year developed through March 31, 2014.

See Results of Operations – Underwriting – Profitability for a more detailed discussion of our underwriting results. Pre-tax net investment income for the three months ended March 31, 2014 was \$8.8 million compared with \$8.3 million for the three months ended March 31, 2013. The increase in pre-tax net investment income is a result of a 4.2% increase in average invested assets (at cost). Average investments have increased as a result of positive cashflow from operations due to growth in premiums and improved margins.

Our book value per share increased 1.6% from \$57.09 at December 31, 2013 to \$58.00 at March 31, 2014. This increase was primarily due to an increase in unrealized gains and earnings partially offset by dividends for the three months ended March 31, 2014.

Our insurance subsidiaries provide personal automobile insurance products with a concentration on nonstandard auto insurance. While there is no industry-recognized definition of nonstandard auto insurance, we believe that it is generally understood to mean coverage for drivers who, because of their driving record, age or vehicle type, represent higher than normal risks and pay higher rates for comparable coverage. We also write commercial vehicle insurance and insurance for classic collectible automobiles ("Classic Collector").

We offer three primary products to individual drivers: the Low Cost product, which offers the most restrictive coverage, the Value Added product, which offers broader coverage and higher limits, and the Premier product, which we designed to offer the broadest coverage for standard and preferred risk drivers.

We are licensed to write insurance in all 50 states and the District of Columbia, but we focus our operations in targeted urban areas identified in selected Focus States that we believe offer the greatest opportunity for premium growth and profitability.

We classify the states in which we operate into two categories:

- "Focus States" These states include Arizona, California, Florida, Georgia, Nevada, Pennsylvania and Texas.
- "Other States" Includes nine states where we are currently running off our writings.

We continually evaluate our market opportunities; thus, the Focus States and Other States may change over time as new market opportunities arise, as the allocation of resources changes or as regulatory environments change. Our net earned premium was as follows (\$ in thousands):
