Forward-looking statements

This quarterly report contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 with respect to Harmony's financial condition, results of operations, business strategies, operating efficiencies, competitive positions, growth opportunities for existing services, plans and objectives of management, markets for stock and other matters. Statements in this quarter that are not historical facts are "forward-looking statements" for the purpose of the safe harbour provided by Section 21E of the U.S. Securities Exchange Act of 1934, as amended, and Section 27A of the U.S. Securities Act of 1933, as amended. Forward-looking statements are statements that are not historical facts.

These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words "expect", "anticipates", "believes", "intends", "estimates" and similar expressions. These statements are only predictions. All forward-looking statements involve a number of risks, uncertainties and other factors and we cannot assure you that such statements will prove to be correct. Risks, uncertainties and other factors could cause actual events or results to differ from those expressed or implied by the forward-looking statements.

These forward-looking statements, including, among others, those relating to the future business prospects, revenues and income of Harmony, wherever they may occur in this quarterly report and the exhibits to this quarterly report, are necessarily estimates reflecting the best judgment of the senior management of Harmony and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements.

As a consequence, these forward-looking statements should be considered in light of various important factors, including those set forth in this quarterly report.

Important factors that could cause actual results to differ materially from estimates or projections contained in the forward-looking statements include, without limitation: overall economic and business conditions in the countries in which we operate; the ability to achieve anticipated efficiencies and other cost savings in connection with past and future acquisitions; increases or decreases in the market price of gold; the occurrence of hazards associated with underground and surface gold mining; the occurrence of labour disruptions; availability, terms and deployment of capital; changes in government regulations, particularly mining rights and environmental regulations; fluctuations in exchange rates; currency devaluations and other macro-economic monetary policies; and socio-economic instability in the countries in which we operate.

Harmony's Integrated Annual Report,
Notice of Annual General Meeting, its
Sustainable Development Report and its Annual
Report filed on a Form 20F with the United
States' Securities and Exchange Commission
for the year ended 30 June 2012
are available on our website:

Competent person's declaration

Harmony reports in terms of the South African Code for the Reporting of Exploration results, Mineral Resources and Ore Reserves (SAMREC). Harmony employs an ore reserve manager at each of its operations who takes responsibility for reporting mineral resources and mineral reserves at his operation.

The mineral resources and mineral reserves in this report are based on information compiled by the following competent persons:

Reserves and resources South Africa:

Jaco Boshoff, Pri Sci Nat, who has 16 years' relevant experience and is registered with the South African Council for Natural Scientific Professions (SACNASP).

Reserves and resources PNG:

Stuart Hayward for the Wafi-Golpu mineral resources, Gregory Job for the Golpu mineral reserve, James Francis for the Hidden Valley mineral resources and Anton Kruger for the Hidden Valley mineral reserve. Messers Job, Francis and Kruger are corporate members of the Australian Institute of Mining and Metallurgy and Mr Hayward is a member of the Australian Institute of Geoscientists. All have relevant experience in the type and style of mineralisation for which they are reporting, and are competent persons as defined by the code.

These competent persons consent to the inclusion in the report of the matters based on the information in the form and context in which it appears. Mr Boshoff and Mr Job are full-time employees of Harmony Gold Mining Company Limited and Mr Hayward is a full-time employee of Wafi-Golpu Services Limited. Mr Francis and Mr Kruger are full-time employees of Newcrest Mining Limited (Newcrest). Newcrest is Harmony's joint venture partner in the Morobe Mining Joint Venture on the Hidden Valley mine and Wafi-Golpu project.

There has been no material changes in the mineral reserves declared as at 30 June 2012.

There has been no material changes in the mineral reserves declared as at 30 June 2012.

3

Chief executive officer's review

Harmony produced solid results for FY12, and improved on these in the first quarter of FY13. The company continues to generate strong cash flow, with low debt and undrawn lending facilities and a rand/dollar exchange rate that is working in our favour.

The past quarter has been a tumultuous time in the mining industry after unprotected strikes at one platinum mine spread across almost the entire mining industry, including our own Kusasalethu mine. In addition to the tragic loss of life at some operations in the mining industry and the economic cost of these actions, the scale of violence and intimidation has made media headlines around the world with concomitant impacts on investor sentiment, South Africa's sovereign credit rating, and national and industry reputations. These events have been extremely unfortunate not only for the industry and its employees, but also for future growth and development in South Africa, given the critical role of gold mining in our country's economic development.

At Harmony, some 5 400 employees at Kusasalethu mine near Carletonville embarked on an unprotected strike at the beginning of October 2012. We urged our employees to honour existing collective agreements entered into through the Chamber of Mines as well as existing bargaining structures. In addition, we continued to encourage all employees participating in this unlawful strike to act in a safe, responsible and peaceful manner, and to engage through established channels. The majority of striking workers returned to Kusasalethu on 25 October 2012. Safety inspections, safety inductions and health checks were done during the first few days of the workers' return, but production start-up has been slow.

Encouragingly, Harmony's other operations have remained at work during difficult times – arguably an indication that work done on building a common culture and values is producing benefits. I thank management teams and all employee representatives for the good relationships they have with each other and for being 'connected'.

On 25 October 2012, the Chamber of Mines, representing Harmony, AngloGold Ashanti Ltd and Gold Fields Ltd, together with the National Union of Mineworkers, Solidarity and UASA, signed an agreement to give effect to clause 11 of the 2011 – 2013 Chamber Gold Wage Agreement to put an end to the national strikes in the gold industry. The adjustment effectively increases Harmony's wages by approximately R10 million per month.

Everything we do at Harmony is based on our values – safety, honesty, achievement, accountability and connectedness. This means we do what is right for our shareholders and other stakeholders, our employees, our assets and our business.

We were able to demonstrate these values in action effectively using concrete examples during an analyst visit to our Papua New Guinea (PNG) operations in September. Harmony's chairman and management recently visited PNG and had the opportunity to meet with the prime minister, the Honourable Peter O'Neill, and members of his cabinet. The official party visited our Hidden Valley mine and Wafi-Golpu project, which was indeed an honour and privilege for

us. Harmony is committed to building a mutually beneficial long-term partnership with the government of PNG, the communities living near our operations, our employees and other stakeholders.
Understanding the importance of delivering on our promises, we are focused on meeting our guidance to the investment community of delivering 1.7 million ounces of gold by 2016. An important component in reaching this milestone lies in the development work being done throughout the company to ensure our grade continues to improve. We trust that delivering on our targets will contribute to investors recognising the value in Harmony's share price.
Progress made towards our strategic objectives as at 30 June 2012 are:
Growth
Ore reserves
Increased by 27%
Dividends
Increased by 50%
Net debt
Lowered by R823m (US$123m)
Capital expenditure
Funded entirely by operations
– R3.2bn (US$414m)
Exploration
Expenditure
Increased by 54%
Number of gold and
copper targets
Increased
Diversity – geographic
and copper
Improved
Discovery cost
US$6 per equivalent resource
ounce
Optimising
operational
delivery
Improved safety
Fatalities down, improved
lost-time injury frequency rate
Disposed of non-core
assets
Evander and Rand Uranium
Improved margin
26% in FY11, 35% in FY12
Leverage to gold price
– 36% increase in R/kg gold
price = 80% increase in
rand profit
– 23% increase in US$/oz gold
price = 62% increase in
US$ profit

Golpu
World-class gold/copper project, long life
Lowest industry quartile operating cost (gold and copper)
Significant upside potential – Golpu and the Wafi transfer structure

This year (FY13) we plan to produce 1.3 million ounces of gold from continuing operations. This quarter's results show that we are on course, however the strike at Kusasalethu will impact on our target (±25 000oz).

Safety and values

Regrettably, Harmony recorded three fatalities in the quarter: Mzwandile Bhudaza was a rock driller at Unisel and Sera Nkhache and Simon Retselisitsoe Molefi were contractors at Joel mine. We extend our deepest sympathy to their families and colleagues.

Given the current turmoil in the mining industry, we need to be even more vigilant about safety. It is the most important aspect of our business, and one of Harmony's values, which requires everyone to make safety the foremost priority in all circumstances. Safety awareness campaigns are on-going.

Phakisa has now reached 27 months without a fatality (1.75 million shifts), while Masimong reached 1 million fatality-free shifts in June – a milestone that took 17 months to reach. Tshepong recorded 1 million fatality-free shifts in September 2012 after nine months. At the time of writing this report, Target 1 achieved three years without a fatality (more than 1 million fatality-free shifts). Through an increased focus on safety, behavioural improvements, reviewing accidents and potential dangerous areas, communication and remedial action, we are steadily improving the company's safety environment.

Gold market

The rand gold price received increased by 5% from R421 565/kg in the June 2012 quarter to R440 868/kg in the September 2012 quarter. During this period, the rand weakened 2% from R8.12/US$ to R8.25/US$. A 3% increase in the US dollar gold price to US$1 663/oz (US$1 615/oz in the June 2012 quarter) resulted in the higher rand per kilogram gold price.

Operational and financial results

The September 2012 quarter was a solid start to the new financial year, despite the noted industry challenges. Gold production from underground was 9% higher than the prior quarter, mainly driven by improved grade. Operating profit increased by 12% compared to the June 2012 quarter to more than R1.55 billion (including discontinued operations). Cash operating costs increased quarter on quarter, mainly due to two months of winter electricity tariffs and labour increases implemented on 1 July. This resulted in the rand per kilogram unit cost increasing by 6% from R278 091/kg in the June 2012 quarter to R294 404/kg in this quarter.

Wafi-Golpu

Results from the resource definition programme have been extremely encouraging and the resource potential at Wafi-Golpu continues to improve with ongoing drilling.

In Harmony's latest statement of mineral resources and reserves, we declared jointly-held Golpu's reserve of 450Mt at 1.21% copper and 0.86g/t gold for 12.4Moz gold and 5.4Mt copper. At 30 June 2012, Harmony's attributable gold equivalent mineral reserves in South Africa and PNG were 52.9Moz, a 31% annual increase in declared reserves. This is largely due to the increase in mineral reserves in PNG after completing the pre-feasibility study at Golpu. As drilling at Golpu continues, more ounces from PNG may be added to reserves.

Exploration

The New Guinea mobile belt represents a fertile porphyry copper/gold belt with significant exploration upside and the opportunity to repeat our success at Wafi-Golpu.

Given that investing in greenfields exploration remains a significant part of our growth strategy, Harmony's PNG exploration portfolio currently comprises three quality projects in the New Guinea mobile belt:

- Mt Hagen – mineralised porphyry copper system with highly anomalous mineralisation and alteration patterns
- Amanab – structurally hosted Au vein system
- Lake Kopiago area – potential OK Tedi/Grasberg-style target developed with detailed airborne magnetics

In South Africa, a surface drilling exploration process is under way at Masimong to prove up the extension of the known B Reef value trend in this area.

Evander transaction

In May 2012, Harmony concluded an agreement with Pan African Resources plc to dispose of its 100% interest in Evander Gold Mines Limited for R1.5 billion. Following competition authority approval in July 2012, the remaining conditions precedent are expected to be fulfilled during the third quarter of FY13.

Conclusion

In recent years, Harmony has built a reputation as a leading gold mining company in both South Africa and PNG. These results confirm that Harmony is guided by a clear strategy and expert management teams delivering sustainable and competitive results.

While the gold price, rand/dollar exchange rate, geographic and currency diversification will always be key factors in our company's performance, we are confident that the people, policies, systems and infrastructure in place will ensure Harmony's competitiveness and sustainability for many years to come.

We are committed to creating value for our shareholders and we are honouring our obligations to our employees, communities living near our mines and other stakeholders. In recent years, Harmony has invested millions of rands into improving the living standards of many communities in South Africa and Papua New Guinea through local development initiatives and our social and labour plans (see our 2012 sustainable development report on www.harmony.co.za).

We measure, we measure up and we deliver – growing gold production, reserves, profits and stakeholder benefits is our plan for FY13.

Graham Briggs

Chief executive officer

5

Safety and health

Harmony is committed to the health and wellbeing of our employees as it promotes a safe and productive workplace and supports a positive workplace culture. At Harmony we aim to provide a positive, supportive working environment that values the safety, health and wellbeing of our employees.

During the quarter it was decided to integrate all safety behaviour and culture initiatives into the Harmony culture programme of which safety is the first value. The work done on the integration will continue during the December 2012 quarter.

Regrettably three employees were fatally injured during the quarter in two separate incidents at Unisel and Joel, compared to one at Evander in the previous quarter. This marks a deterioration in the Fatal Injury Frequency Rate (FIFR) quarter on quarter to 0.13, from 0.04 in the previous quarter. The FIFR year to date improved by 19% to 0.13, when compared to the actual figure for the previous year of 0.16.

Year on year Harmony's total FIFR showed a continued improvement and the year to date is at the lowest level ever, but still well above the 2013 industry milestone target of 0.03. All efforts are directed towards achieving the industry-target.

The Lost Time Injury Frequency Rate (LTIFR) regressed by 3% quarter on quarter from 5.90 to 6.10 while the year to date LTIFR improved by 16% to 6.10, when compared to the actual figure for the previous year of 7.29. The year on year LTIFR improved at most South African operations with Kalgold, Masimong and Bambanani improving by 50% or more.

During the quarter, the follow-up audits on the gap analysis performed by the International Register of Certificated Auditors (IRCA) were completed at all operations and workshops with representatives from each operation were held to get additional inputs to further improve the Harmony Occupational Health and Safety Management system.

A final document has been compiled for approval and implementation.

High level safety and health audits were completed on three operations during the quarter and four audit reviews were done at the applicable operations by the chief executive officer (CEO) and various other executives. The CEO used this opportunity to meet with full-time health and safety representatives and union officials at the mine to discuss safety related matters. This effort is a first-rate example of visible felt leadership with safety being led from the top.

The most significant safety achievements during the quarter were:

- Randfontein surface operations achieved 4 750 000 fatality free shifts
- Phakisa achieved 1 750 000 fall of ground fatality free shifts
- Masimong achieved 1 000 000 fatality free shifts

Our pro-active approach to the health and wellness of our employees continues through a diverse array of measures, programmes and initiatives which are supported and invested in by the Company to promote the good health of our employees. By taking a pro-active approach to our workplace health and safety, we are minimising and eliminate risks before they occur.

Financial overview

Net profit

The net profit for the September 2012 quarter was R522 million, 388% higher than the previous quarter. This reflects the increase in gold sold of 371kg (4%) as well as an increase in the gold price received of 5% to R440 868/kg.

Share-based payments

Share-based payments increased from R21 million to R105 million in the September 2012 quarter. This includes a cost of R81 million relating to the new Employee Share Ownership Plan (ESOP) awards that were granted in August 2012. In terms of the ESOP rules, all employees other than management were awarded a minimum of 100 Scheme Shares and 200 Share Appreciation Rights (SARs). In addition these employees qualify for an additional cash bonus under the SARs in the event that the share price growth is less than R18 per share.

Harmony issued 3.5 million shares to the Tlhakanelo Share Trust on 31 August 2012. In terms of IFRS 2, Share-based Payment, the SARs includes an equity-settled portion as well as a cash-settled portion relating to the cash bonus. The cash-settled portion has been recognised in the balance sheet as a derivative financial liability.

Impairment of investments

The impairment of investments amounting to R48 million in the September 2012 quarter and R144 million in the June 2012 quarter recorded in the income statement is the reduction in the fair market value of the investment in Witwatersrand Consolidated Gold Resources Limited.

Net gain on financial instruments

The net gain on financial instruments of R74 million in the September 2012 quarter is due to the increased market value of the rehabilitation funds' equity-linked deposits invested with Nedbank.

Profit on discontinued operations

Profit from discontinued operations is R89 million in the September 2012 quarter and R180 million in the June 2012 quarter. The amounts represent the net profit after taxation for Evander Gold Mines Limited. Included in the amount for the June 2012 quarter is the profit on sale of Evander 6 and Twistdraai to Taung Gold Limited of R159 million (net of taxation).

Earnings per share

Total basic earnings per share increased from 25 SA cents to 121 SA cents per share in the September 2012 quarter. Total headline earnings per share increased from a loss of 6 SA cents to earnings of 123 SA cents per share.

Borrowings and cash

The long-term portion of borrowings increased from R1 503 million to R1 840 million in the September 2012 quarter, mainly due to a drawdown of US$40 million on the US dollar syndicated revolving credit facility. During the same period cash and cash equivalents increased from R1 773 million to R2 266 million as a result of strong cash flow generated by operating activities, resulting in a positive net cash position of R120 million at quarter-end.

Assets and liabilities of disposal group classified as held for sale

Assets and liabilities of disposal groups classified as held for sale at 30 September 2012 represents the assets and liabilities of Evander Gold Mines Limited that were classified as held for sale and includes increases in cash balances as well as mining assets.

Operational overview

GROUP OPERATIONAL RESULTS

Continuing operations (excludes Evander)

Indicator	Units	September 2012	June 2012	% variance

Operating profit
R'000 1 408 376 1 295 036
9

A continued focus on grade and a further reduction in safety stoppages contributed to an 8% increase in production at 10 013kg quarter on quarter. Recovered grade was 5% higher at 2.10g/t, with our underground operations recording a 7% increase in recovered grade at 4.52g/t. Tonnes milled increased by 3% quarter on quarter to 4 761 000t.

Higher winter electricity tariffs and the annual wage increase, which came into effect on 1 July 2012, resulted in cash operating costs being 6% higher at R294 404/kg, when compared to R278 091/kg in the previous quarter.

Operating profit was 9% higher at R1.4 billion, due to increases in recovered grade and revenue.

The Rand gold price received increased by 5% from R421 565/kg to R440 868/kg quarter on quarter, while the US dollar gold price received increased by only 3% to US$1 663/oz, from US$1 615/oz in the June 2012 quarter. The higher R/kg gold price is due to the effect of a 2% weakening of the Rand from R8.12/US$ in the June 2012 quarter to R8.25/US$ in the quarter under review.

At our Investor Day held on 28 August 2012, we listed our operations from the biggest production contributor to the smallest. Our quarterly reporting has been brought in line with this approach.

(9)
Kusasalethu had a steady quarter following a very good June quarter, producing 1 601kg of gold. An improved recovered grade at 4.88g/t equalised the effect of 3% less tonnes milled at 328 000t.
Cash operating costs were higher at R282 606/kg due to higher electricity winter tariffs, the annual wage increase and an increase in plant costs due to repairs to the milling section.
Kusasalethu again recorded the highest quarterly operating profit in the group of R250 million.

After the quarter under review, Kusasalethu's workforce embarked on an unprotected strike. The strike lasted for 23 days from 2 October 2012 to 25 October 2012, after a final ultimatum was issued and 98% of the workforce subsequently returned to work. It is estimated that the start-up and assessments at the mine will take about ten days to ensure that the mining activities return safely to normal operating capacity. The loss in production during the 23 days of strike action is estimated at approximately 15 000oz; this excludes the production lost during the assessment and safety start-up period.

Cash operating costs	R/kg	294 156	282 498	(4)
Operating profit	R'000	125 560	107 927	16

Despite lower tonnes milled, gold production was 7% higher quarter on quarter at 871kg, due to a 14% increase in recovered grade at 3.56g/t. Tonnes milled were affected by maintenance work that was performed on the trackless machinery used in the Kimberley Reef.

An operating profit of R126 million was generated during the quarter due to the higher gold production and higher gold price received. Cash operating costs were higher at R294 156/kg, due to electricity winter tariffs, annual wage increases and the upgrade of railbound equipment.

(49)
Gold production at Phakisa was 8% lower quarter on quarter at 679kg, due to a collapse in the No. 3 ventilation shaft and industrial action at the shaft (which was resolved). The ventilation issues are being addressed – repairs to the No. 3 shaft have commenced and are likely to take four months. Changes to the ventilation system may result in production remaining static for the balance of the financial year. Grade remained steady at 4.78g/t.
An operating profit of R48 million was generated during the quarter compared to R94 million in the June 2012 quarter. The reduction in operating profit is attributable to lower gold production and higher cash operating costs of R367 785/kg. Costs were higher due to annual wage increases, electricity winter tariffs, the replacement of railveyor cars and an increase in engineering equipment associated with the build-up in production.

Tshepong recorded a R126 million operating profit, despite a 6% decrease in recovered grade and a 1% decrease in tonnes milled at 313 000t. Gold production decreased by 7% to 1 159kg. Quarter-on-quarter, cash operating cost per unit increased to R329 079/kg due to lower volumes, annual wage increases and the electricity winter tariffs.

This was the first quarter post the commissioning of the waste pass at Masimong. Gold production increased by 31% to 987kg, due to increased tonnes milled at 261 000t and a 16% increase in recovered grade.
Cash operating costs improved by 4% at R265 698/kg due to higher volumes, despite the annual increase in wages and higher electricity cost due to winter tariffs.
An operating profit of R177 million was recorded for the quarter; this represents a 64% improvement quarter on quarter.

Hidden Valley increased production by 4% quarter on quarter at 689kg of gold and a 7% increase in silver production at 6 975kg at a cash operating cost of R379 303/kg. The 4% improvement in the cash operating costs in the September 2012 quarter reflects the increase in gold and silver production and higher silver prices.
Mill throughput and gold recoveries improved during the September quarter, whilst gold grades remained steady. The crusher upgrade is planned to commence during the March 2013 quarter, which will allow the overland conveyor to operate at planned capacity.
An operating profit of R26 million was recorded, due to higher production at the mine.

Recovered grade at Target 1 improved by 34% quarter on quarter from 4.49g/t to 6.02g/t, mainly due to higher than expected grades from some of the massive panels as well as improved face grades from the narrow reef stopes. As a result, gold production increased by 33% to 1 071kg, while tonnes milled were slightly down at 178 000t.

The increase in gold production reduced the cash operating costs by 21% to R221 587/kg, despite an increase in electricity winter tariffs and plant costs.

Target 1 generated an operating profit of R219 million for the quarter; this represents a 79% increase when compared to the previous quarter.

Bambanani

Indicator	Units	September 2012	June 2012	% variance
Tonnes	000	33	22	50
Grade	g/t	10.21	9.14	12
Gold produced	kg	337	201	68
Cash operating costs	R/kg	329 674	426 204	23
Operating profit/(loss)	R'000	40 649	(400)	>100

Bambanani turned its operating loss of R400 000 in the previous quarter to an operating profit of R41 million. Improvements in tonnes milled at 33 000t and recovered grade at 10.21g/t resulted in a 68% increase in gold production at 337kg for the quarter. The increase in recovered grade is due to the increase in face grades as mining moves into higher grade raises.

Due to the higher gold production, the cash operating costs improved by 23% to R329 674/kg despite cost increases.

Joel

Indicator	Units	September 2012	June 2012	% variance

Operating profit	R'000	212 482	191 871	11

Gold production increased by 14% quarter on quarter to 900kg, mainly due to an increase in tonnes milled at 167 000t, while the grade remained stable at 5.39g/t. As a result, operating profit was higher at R212 million.

Joel has the lowest cash operating cost in Harmony at R189 823/kg. The 5% increase from R180 796/kg in the previous quarter is due to annual wage increases and higher winter electricity tariffs.

Unisel milled 116 000t at a recovered grade of 3.71g/t which resulted in a 6% decrease in gold production at 430kg quarter on quarter. The lower grade was mainly due to a decrease in belt grade, which is being addressed through applying clean mining practices.
Cash operating costs increased by 19% to R338 063/kg, due to lower gold production, annual wage increases and higher winter electricity tariffs. Lower production and higher costs resulted in a decrease in operating profit to R44 million.

Target 3 recorded a 27% increase in gold produced at 367kg, compared to 290kg produced in the June 2012 quarter, due to higher recovered grade and increased tonnes. Recovered grade improved by 16% quarter on quarter, largely due to an increase in face grade. Tonnes milled increased by 9% at 87 000t for the quarter.
Cash operating costs per unit improved by 6% at R359 738/kg, due to increased gold production.
Higher gold production, combined with a higher gold price received, resulted in operating profit doubling from R12 million to R27 million.

Recovered grade at Steyn 2 increased by 15% quarter on quarter to 10.10g/t, mainly due to an increase in the belt grade. The changeover to hoist Steyn 2's ore from West Shaft's infrastructure took place during the quarter. The changeover process hampered the hoisting of tonnes at 10 000t, which resulted in a 4% decrease in gold production at 101kg.
Operating profit was lower quarter on quarter at R6 million due to the decrease in gold production and higher cash operating costs.

9

TOTAL SOUTH AFRICAN SURFACE OPERATIONS

Continuing operations (excluding Evander surface sources)

Indicator	Units	September 2012	June 2012	% variance

An increase in plant availability resulted in more tonnes being processed. Recovered grade decreased by 17% quarter on quarter to 0.39g/t, resulting in lower gold production at 280kg. The decrease in grade is due to the majority of the surface sources reporting lower grades with the waste rock dumps having the biggest impact.
Cash operating costs were higher quarter on quarter at R378 161/kg, due to continued maintenance costs and dust suppression on dormant slimes dams, resulting in a much lower operating profit of R20 million.

Mining at Kalgold was done from both the A-zone and the Watertank pits, resulting in tonnes milled being 16% higher quarter on quarter at 390 000t. The recovered grade improved by 7% quarter on quarter to 0.87g/t, mainly due to the improved plant feed grade. Eight carbon in leach tanks were successfully commissioned during the quarter, which replaced the timeworn carbon in leach tanks at the plant.
Cash operating costs remained steady at R251 459/kg, due to increased gold output. Operating profit was 36% higher quarter on quarter at R60 million.

The Evander operation had a good quarter, showing improvements in all production results.
An increase of 18% in gold production and a 14% improvement in cash operating costs at R259 613/kg, resulted in an operating profit of R141 million.
Gold production at Evander increased to 817kg, due to a net increase of 8% in tonnes milled at 159 000t and an increase in recovered grade to 5.14g/t.

10
Results for the first quarter
ended 30 September 2012

Development

The main purpose of development is to explore the potential of future mining operations. A development programme is vital to the life of a mine.

The on-reef development grade of a shaft is an indication of the grades that will be mined in future. Important information such as expected geological structures, dip of the orebody and channel width is derived.

Depending on the shaft layout – such as the length of the raise line and spacing – ledging and stoping will take place approximately 18 to 36 months after on-reef development. Therefore the target areas for development are extremely important to prove the existence of ore of sufficient mineral content to be profitably mined and to continuously upgrade resources to reserves.

Mineral reserves block grades vs development grades
September 2012

Note: The ore reserve block grades reflect the grades of the blocks in the life-of-mine plans for the various operations. These blocks are to a large degree the blocks above a certain cut-off grade that has been targeted for mining. The development grades are those as sampled in the ongoing on-reef development at the operations and no selectivity has been applied from a grade point of view.

Kusasalethu

The quarter on quarter development grade is in line with expectations and continues to support the resource estimates.

Doornkop

The development grade improved further during this quarter, due to a new raise line that was started on 192 level.

Phakisa

There was a quarter on quarter drop in the development grade. This is as a result of lower on reef meters developed in the better grade Basal Reef raises.

Tshepong

Both the Basal Reef and the B Reef development grades improved quarter on quarter. The Basal Reef returned some very good results in the decline area of the mine. This is very encouraging in terms of the future grade profile of Tshepong.

Masimong

Basal Reef development grades remain erratic, but improved marginally quarter on quarter. There was a drop in the B Reef development grades as some of the drives advanced out of the B Reef channels into areas of non-deposition of B Reef.

Target 1 (narrow reef mining)

The raises developed for narrow reef mining on the Dreyerskuil formation continue to return good values, exceeding our expectations.

Bambanani

All development is taking place in the shaft pillar. The development grade remains in line with expectations and continues to support the high grade profile of the mine.

Joel

Development grades increased during this quarter as a result of good values intersected in the raises being developed on 129 level.

Unisel

At Unisel, the development grade of the Basal Reef improved further owing to the development of higher grade pillars in the Brand 5 shaft area. The Leader Reef grade also improved and continued to show encouraging results. There was no development planned on the Middle Reef during the quarter.

Target 3 (narrow reef mining)

Both the A Reef and B Reef returned very encouraging results during the quarter. However, no Basal Reef was developed during the quarter. This is due to logistical and infrastructure constraints encountered in some of the sub-shaft areas, which is in the process of being re-commissioned.

Evander

There was an increase in the quarter on quarter development grade, due to higher grades intersected in the winzes being developed in the payshoot area. However, some localised lower grades were also intersected, which is typical of the erratic nature of the grade distribution in the Kimberly Reef.

** No reef development was done at Steyn 2 during this period, only shaft pillar extraction*

11

Exploration highlights

International (Papua New Guinea)

Morobe Mining Joint Venture (MMJV) (50% Harmony)

Wafi-Golpu

On 29 August 2012, Harmony released its ore reserve and mineral resource estimates for Wafi-Golpu complex, following the completion of the technical pre-feasibility study for the Golpu deposit.

The highlights of the Golpu pre-feasibility study as well as the detail on the capital and operating costs are as follows:

*Highlights of the Golpu pre-feasibility study (PFS)**

- Excellent potential for further mineral discoveries in the region
- Golpu deposit – a large, low cost, long life, block cave mining operation
  - Updated Golpu probable mineral reserve estimate containing 12.4 million ounces of gold and 5.4 million tonnes of copper for 38.9 million gold equivalent ounces [1]
  - Drilling within the Lift 1 post completion of the study have returned higher grades than modelled in the Mineral Reserve, thus there is grade upside potential to the mineral reserve estimate
  - First production by 2019, subject to approvals and feasibility study
  - Mine life of 26 years and annual production reaches 490 000 ounces of gold and 290 000 tonnes of copper during the period 2026 to 2035 under the PFS base case scenario
  - First quartile cash costs (whether measured by gold or copper unit cost)
  - Estimated capital cost to first production of US$4.85 billion. This estimate is at PFS level and capital costs are undergoing further evaluation with the objective of optimising these
  - Harmony has budgeted US$114 million for study and drilling programme costs for FY13 and the company's share of expenditure for the feasibility study is estimated to be in the order of US$400 million, over half of which would comprise expenditure on additional resource definition drilling and early stage access decline development
  - Total capital expenditure to first production occurs over a six year period. Harmony expects to be able to fund its share of the capital expenditure largely from operating cash flow (refer to Harmony's Investor Day presentation, dated 29 August 2012 on www.harmony.co.za)
  - High grade drill intercepts occur at depth indicating good potential for a third mining lift
  - Further metallurgical test work is expected to optimise the metal recoveries assumed in the PFS
- The Wafi deposit is in Concept Study, with progress to PFS likely to occur later this calendar year

** Important to note is that the Golpu pre-feasibility study excludes information on Wafi*

The Golpu Indicated Mineral Resource is inclusive of the Golpu Probable Mineral Reserve as set out above. For the purpose of this release, Mineral
Resources and Mineral Reserves are reported in 100% terms. Harmony has a beneficial interest of 50% in these resources and reserves.

[1] Gold equivalent based on US$1 400/oz Au and US$3.50/lb Cu

Estimate capital and operating cost as per Golpu pre-feasibility study

The estimated initial capital cost to first production for the Golpu development from the PFS is set out below.

There is potential for capital costs to be optimised from the PFS estimates and capital costs are undergoing further evaluation to leverage cost reduction opportunities presented by forecast weaker economic conditions. No major commitments are being made until this review has been completed.

Capital cost estimate

Area	PFS Estimate (US$m)*
Direct Costs	
Mine	968
Process Plant	652
Infrastructure	558
Power Supply	472
Total Direct Costs	2 649
Indirect Costs	
Project Management	678
Owners' Costs	635
Drilling and Studies	445
Total Indirect Costs	1 758
Contingency	437
Total Capital Cost	4 845

**Figures quoted on 100% basis*

Harmony's share of project expenditure up to completion of the feasibility study is expected to be approximately US$400 million and a further US$270 million prior to receiving all approvals and permits necessary for construction to commence in mid-2016. The majority of this pre-execution phase expenditure comprises resource definition drilling, technical studies and access decline development.

In addition to the contingency shown in the capital cost estimate table above, growth allowances have been made in each sub-element of Direct and Indirect Costs.

After first production, there will be ongoing capital expenditure for the remainder of the mine life, including ongoing mine development to deliver the projected production. The PFS estimates total capital expenditure on a 100% basis (including the US$4.8 billion referred to above) for the life of the project to be US$9.8 billion.

The operating costs per tonne of ore processed for Lift 1 and Lift 2 estimated in the PFS are as follows:

Operating cost estimate

Area	PFS Estimate (US$/t processed) (Life-of-Project)
Mining	8.64
Processing	7.39
Infrastructure	1.62
G&A	5.01
Total Operating Cost	22.65

Indicative pre-feasibility parameters

The key outcomes of the study are as follows:

Pre-feasibility base case 22Mtpa capacity	Units	Result*
Production Life	Years	26
Peak Au Production	koz pa	560
Peak Cu Production	kt pa	335
Annual Au Production[1]	koz pa	490
Annual Cu Production[1]	kt pa	290
Gold Cash Cost[2]	US$/oz	Negative 2 600[3]
Copper Cash Cost[2]	US$/lb	0.54[3]

Total Initial Capital
US$B
4.85
Total Capital
US$B
9.75

1. For the period 2026 – 2035
2. Net of by-product credits
3. Price assumption used: Gold $1 650/oz and Copper US$3.50/lb
** Figures quoted on 100% basis*

The joint venture participants are engaging with the government and landowner representatives, to ensure alignment on the planned project development and key elements of the next phase of work. Capital costs and key contractors are also being reviewed before the commencement of the feasibility study.

13

Figure 1: Plan view of MMJV project area in PNG

Drilling at Wafi-Golpu targeted the high grade zones in the upper levels of the Golpu deposit and also continued to better define the eastern margin of the resource at depth.

Drill hole WR426, targeting the eastern margin, intersected 942m at 0.94g/t Au and 1.18% Cu from 1 038m including 340m at 1.91g/t Au and 2.35% Cu from 1 246m, in line with surrounding drill holes. This confirms the vertical altitude of the geology model.

Hidden Valley district exploration

Exploration drilling continues along the prospective Wafi Transfer Zone and at the Kerimenge prospect, four kilometres north of Hidden Valley mine. The regional exploration campaign advanced with surface sampling at the Garawaria prospect, 60 kilometres southeast of Hidden Valley. Results from the ongoing regional program on EL1629 continue to highlight Garawaria as a standout gold/copper-gold target.

Results received for remaining trench samples included:

Trench 1C:

62m @ 4.01 g/t Au

Trench 3:

55m @ 1.41 g/t Au

An initial 7 holes drill programme has been approved for the prospect and camp construction and pad preparation are underway.

PNG exploration (Harmony 100%)

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
for the period ended 30 September 2012 (Rand)

1. Accounting policies

Basis of accounting

The condensed consolidated financial statements for the quarter ended 30 September 2012 have been prepared in accordance with IAS 34, Interim Financial Reporting, JSE Listings Requirements and in the manner required by the Companies Act of South Africa. They should be read in conjunction with the annual financial statements for the year ended 30 June 2012, which have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS). The accounting policies are consistent with those described in the annual financial statements, except for the adoption of applicable revised and/or new standards issued by the International Accounting Standards Board.

2. Cost of sales

Figures in million	Quarter ended			Year ended

2 975
12 137
1. The comparative figures are re-presented due to Evander being reclassified as a discontinued operation. See note 6 in this regard
2. Refer to note 3 for details

3. Share-based payments

This includes the cost relating to the new Employee Share Ownership Plan (ESOP) awards that were granted in August 2012. In terms of the ESOP rules, all employees other than management were awarded a minimum of 100 Scheme Shares and 200 Share Appreciation Rights (SARs), with employees with service longer than ten years receiving an additional ten percent. Both the Scheme Shares and SARs vest in five equal portions on each anniversary of the award. In addition these employees qualify for an additional cash bonus under the SARs in the event that the share price growth is less than R18 per share. The effect of the bonus puts the employees in the position they would have been in had the share price increased by R18 per share since issue date.

Harmony issued 3.5 million shares to the Tlhakanelo Share Trust, on 31 August 2012. In addition, 6 817 880 SARs were issued. In terms of IFRS 2, *Share-based Payment*, the SARs includes an equity-settled portion as well as a cash-settled portion related to the cash bonus. The cash-settled portion has been recognised on the balance sheet as a derivative financial liability, the fair value of which will be re-measured at each reporting date.

4.

Impairment of investments

The impairment of the investment in Witswatersrand Consolidated Gold Resources Limited (Wits Gold) results from the decline in the fair value of the investment on the JSE.

5. Taxation

The Supreme Court of Appeal's decision on Freegold's appeal regarding the South African Revenue Service's (SARS) application of mining tax ringfencing was received on 1 October 2012 and the Court found in favour of SARS. This resulted in additional normal taxes of R94 million offset by deferred tax credits of R154 million. Unredeemed capital deductions are not allowed against non-mining income. However these deductions will be allowable against future mining income.

6.

Disposal groups classified as held for sale and discontinued operations

Evander Gold Mines Limited

The assets and liabilities of Evander Gold Mines Limited (Evander), a wholly-owned subsidiary of Harmony Gold Mining Company Limited
(Harmony), have been classified as held for sale following signing of a sale of shares and claims agreement on 30 January 2012. On 30 May 2012,
Harmony announced the signing of a new sale of shares and claims agreement with Pan African Resources plc (Pan African).The disposal will
be for an aggregate purchase consideration of R1.5 billion, excluding the proceeds of the Taung Gold Limited transaction.

The transaction is subject to, among others, the following conditions precedent:

• Pan African obtaining the requisite shareholder approval for the acquisition; and
• obtaining all relevant regulatory approvals

The operation also meets the requirements to be classified as a discontinued operation. The comparative figures in the income statement have
been re-presented as a result.

Net asset value per share (cents)	7 920	7 897	7 290

8. Borrowings

The Nedbank revolving credit facility was repaid in full during the December 2011 quarter and the full R850 million facility is available until December 2013.

The balance on the Nedbank term facilities at 30 September 2012 is R762 million.

US$40 million of the US$300 million syndicated revolving credit facility was drawn during the September 2012 quarter, taking the drawn down level to US$170 million. The facility is repayable by August 2015.

9. Commitments and contingencies

Figures in million	At 30 September 2012 (Unaudited)	At 30 June 2012 (Audited)	At 30 September 2011 (Unaudited)
Capital expenditure commitments:			
Contracts for capital expenditure	510	519	290
Authorised by the directors but not contracted for			

2 263
2 257
3 570
2 773
2 776
3 860
This expenditure will be financed from existing resources and, where appropriate, borrowings.
Contingent liability
For a detailed disclosure on contingent liabilities refer to Harmony's annual report for the financial year ended 30 June 2012, available on the
group's website (www.harmony.co.za). There were no significant changes in contingencies since 30 June 2012.
10. Related parties
Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the
group, directly or indirectly, including any director (whether executive or otherwise) of the group. During the September 2012 quarter, Harmony
shares were purchased by certain directors as set out below:
Graham Briggs
14 347 shares
Frank Abbott
73 900 shares
Ken Dicks
12 500 shares
11. Subsequent events
(a)
Tax court judgement – refer to note 5 for the details.
(b) On 2 October 2012 employees at our Kusasalethu operation went on strike. This will affect production in the December 2012 quarter.
Refer to the CEO's review on page 3 for further details.
12. Segment report
The segment report follows on the page 25.

24

Results for the first quarter
ended 30 September 2012

13. Reconciliation of segment information to consolidated income statements

Figures in million	30 September 2012 (Unaudited)	30 September[1] 2011 (Unaudited)
The "Reconciliation of segment information to consolidated income statements" line item in the segment report is broken down in the following elements, to give a better understanding of the differences between the income statement and segment report:		
Reconciliation of production profit to gross profit		
Total segment revenue	4 619	3 929
Total segment production costs	(3 070)	(2 623)
Production profit per segment report	1 549	1 306
Discontinued operations	(141)	(172)
Production profit from continuing operations	1 408	1 134
Cost of sales items, other than production costs and royalty expense	(620)	(535)
Gross profit as per income statements*	**788**	**599**

[1] The comparative figures are re-presented due to Evander being reclassified as a discontinued operation. See note 6 in this regard

* *The reconciliation was done up to the first recognisable line item on the income statement. The reconciliation will follow the income statement after that.*

(1) The Virginia segment comprised of several mines, including Unisel. The other mines were placed on care and maintenance, the last in October 2010. As their results are no longer included in the comparative information, Unisel now becomes a
segment on its own.
