KEY FEATURES

Quarter on quarter

South African operations record a fatal-free quarter

Restructuring for safe, profitable ounces continues

Gold production decreased by 10% quarter on quarter due to stoppages at Kusasalethu and Hidden Valley

Majority of operations perform in line with plans, with grade remaining consistent

Production profit of R618 million

Headline loss of R496 million, due to lower production and restructuring

FORWARD-LOOKING STATEMENTS

This quarterly report contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 with respect to Harmony's financial condition, results of operations, business strategies, operating efficiencies, competitive positions, growth opportunities for existing services, plans and objectives of management, markets for stock and other matters. Statements in this quarter that are not historical facts are "forward-looking statements" for the purpose of the safe harbour provided by Section 21E of the U.S. Securities Exchange Act of 1934, as amended, and Section 27A of the U.S. Securities Act of 1933, as amended. Forward-looking statements are statements that are not historical facts. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words "expect", "anticipates", "believes", "intends", "estimates" and similar expressions. These statements are only predictions. All forward-looking statements involve a number of risks, uncertainties and other factors and we cannot assure you that such statements will prove to be correct. Risks, uncertainties and other factors could cause actual events or results to differ from those expressed or implied by the forward-looking statements. These forward-looking statements, including, among others, those relating to the future business prospects, revenues and income of Harmony, wherever they may occur in this quarterly report and the exhibits to this quarterly report, are necessarily estimates reflecting the best judgement of the senior management of Harmony and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. As a consequence, these forward-looking statements should be considered in light of various important factors, including those set forth in this quarterly report. Important factors that could cause actual results to differ materially from estimates or projections contained in the forward-looking statements include, without limitation: overall economic and business conditions in the countries in which we operate; the ability to achieve anticipated efficiencies and other cost savings in connection with past and future acquisitions; increases or decreases in the market price of gold; the occurrence of hazards associated with underground and surface gold mining; the occurrence of labour disruptions;

availability, terms and deployment of capital; changes in government regulations, particularly mining rights and environmental regulations; fluctuations in exchange rates; currency devaluations and other macro-economic monetary policies; and socio-economic instability in the countries in which we operate.

Harmony's Integrated Annual Report and the Form 20-F filed with the United States' Securities and Exchange Commission for the financial year ended 30 June 2014 are available on our website at

COMPETENT PERSON'S DECLARATION

Harmony reports in terms of the South African Code for the Reporting of Exploration results, Mineral Resources and Ore Reserves (SAMREC). In

South Africa Harmony appoints an ore reserve manager at each of its operations who takes responsibility for the compilation and reporting of mineral resources and mineral reserves at their operations. In Papua New Guinea, competent persons are appointed for the mineral resources and mineral reserves for specific projects and operations.

The mineral resources and mineral reserves in this report are based on information compiled by the following competent persons:

Resources and Reserves South Africa: Jaco Boshoff, BSc (Hons), MSc, MBA, Pr. Sci. Nat., who has 19 years' relevant experience and is registered with the South African Council for Natural Scientific Professions (SACNASP) and a member of the South African Institute of Mining and Metallurgy (SAIMM).

Resources and Reserves Papua New Guinea: Gregory Job, BSc, MSc, who has 26 years relevant experience and is a member of the Australian

Institute of Mining and Metallurgy (AusIMM). Mr Job has sufficient experience which is relevant to the styles of mineralisation and types of deposits

under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian

Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the "JORC Code").

Mr Boshoff and Mr Job are full-time employees of Harmony Gold Mining Company Limited. These competent persons consent to the inclusion in

the report of the matters based on the information in the form and context in which it appears.

Mineral Resource and Reserve information as at 30 June 2014 has not changed.

MESSAGE FROM THE CHIEF EXECUTIVE OFFICER

1. SAFETY

Harmony recorded a fatal-free quarter in South Africa – a major achievement for a deep level underground gold mining company. Management and employees are commended for their efforts and commitment to achieving zero harm.

There was one fatality at Hidden Valley in Papua New Guinea (PNG). An employee was fatally injured when struck by a reversing loader in the milling area. The matter was investigated and safety standards were reinforced.

2. GOLPU – A GAME CHANGER

The results of the updated Golpu prefeasibility study (PFS) were announced on the 15th of December 2014. Please refer to our website for more details: www.harmony.co.za.

The updated PFS supports our view that Golpu is a spectacular ore body with a large copper component, affordable and mineable. Our emphasis in preparing the PFS was to create flexibility to allow the size of the project to adapt to different levels of gold and copper prices, allowing Golpu to grow over time.

Key objectives of the study have been achieved by reducing the capital of the project, lowering operating costs and improving the rate of return. Harmony intends to fund the earlier stages of the project from internal cash flows, and reviewing other funding options for the latter stages.

Our application for an environmental permit has been submitted to the Papua New Guinean Department of Environment and Conservation. The permit relates to advanced exploration and feasibility support activities, comprising development of access roads, decline development to the ore body and associated works. The Stage 2 Concept Study was completed and demonstrated a technically feasible and economically viable plan to mine and process the remaining portion of the Golpu copper-gold reserve after depletion of Stage 1.

The Golpu project is a significant value accretive game-changer for Harmony.

3. OPERATIONAL RESULTS

Most of the South African operations delivered in line with their operational plans. Tshepong had an exceptional performance, beating its production plan by 16%. Masimong and Unisel delivered a consistent performance quarter on quarter, with Bambanani being our most profitable mine at a cash operating cost of R253 000/kg. Target 3 was placed on care and maintenance as planned.

On 2 December 2014, Harmony announced that a new plan would be implemented to return Kusasalethu to profitability. The new plan will entail mining lower volumes at higher grades at a reduced cost. Kusasalethu has not returned to profitability after various setbacks. The underperformance of the mine was further exacerbated by four fires and associated illegal mining activities during the past quarter. Harmony's intention is to restore

Kusasaletu to profitability by the end of the fourth quarter of the current financial year and we have commenced with a Section 189 process in terms of the Labour Relations Act to restructure the mine.

Hidden Valley also contributed to the quarter's lower production, due to a fatality and a belt tear on the overland conveyor (OLC). Both resulted in production stoppages at the mine. There was no structural damage to the OLC, but belt replacement work was not completed until January 2015. Maintenance scheduled for the OLC and the metallurgical plant in the first half of 2015 was brought forward and conducted while the belt was being replaced. Ore was hauled to the mill by truck during this period, adversely impacting costs.

Gold production during the March 2015 quarter is expected to be higher once Kusasaletu's restructuring is finalised and Hidden Valley returns to full production, positioning our operations to benefit from higher gold prices.

Lower gold production quarter on quarter and a lower gold price resulted in a decrease in production profit to R618 million in the December 2014 quarter, compared to R913 million in the previous quarter.

Cash operating cost for the December 2014 quarter improved (decreased) by 10% when compared to the previous quarter.

The decrease is due to lower electricity tariffs for the summer months, amounting to R200 million. Labour cost also decreased by R63 million in the December 2014 quarter. Capital expenditure for the December 2014 quarter increased by 14% to R682 million, compared to R596 million in the September 2014 quarter, due to major capital being spent at Phakisa and maintenance capital expenditure at most of the operations. However, we are still below the planned capital expenditure for FY15.

4. FINANCIAL RESULTS

Revenue

Revenue decreased by R716 million (16%) to R3 715 million as a result of the 14% decrease in gold sold to 8 580kg and a 2% decrease in the Rand gold price received to R432 963/kg in the December 2014 quarter.

Production costs

The decrease in production costs in the December 2014 quarter is mainly a result of the decrease in the electricity cost of R200 million due to the decrease in the electricity price tariffs and Target 3 having been placed on care and maintenance at the end of the September 2014 quarter.

Other items

Other items included in cost of sales increased to R272 million in the December 2014 quarter, mainly as a result of employment termination and restructuring costs of R182 million which include the retrenchments of management in service areas and employees at Kusasaletu, Target 3 and Ernest Oppenheimer Hospital.

Scrapping of property, plant and equipment

We embarked on a life-of-mine optimisation process which was completed during the December 2014 quarter. The optimisation resulted in a greater focus on mining profitable and higher grade areas at our South African operations. It also resulted in removing lower grade and unprofitable areas from the mine plan for most of the operations. In the case of Kusasalethu and Masimong the optimisation lead to the abandonment of levels and areas with a carrying value and such areas were accordingly identified for scrapping.

Harmony Gold Mining Company Limited

Results for the second quarter FY15 and six months ended 31 December 2014

4

Other expenses – net

The decrease to R52 million in expenses in the December 2014 quarter is mainly due to a reduced foreign exchange translation loss recorded on the US\$ syndicated loan of R69 million compared to R192 million in the September 2014 quarter. The Rand weakened from US\$/R11.32 at 30 September 2014 to US\$/R11.57 at 31 December 2014.

Loan to associate

During the December 2014 quarter, Rand Refinery Proprietary Limited drew down on the shareholders loan, of which Harmony's portion is R120 million.

Borrowings

The increase in the amount recorded on the balance sheet is due to the translation effect on the drawn amount of US\$ 270 million. Harmony secured a new revolving credit facility of up to US\$250 million with a three year duration. The facility matures in February 2018.

5. GOLD MARKET

During the December 2014 quarter the average US dollar gold price received decreased by 6% to US\$1 200/oz, in comparison to US\$1 282/oz in the previous quarter. The decrease was partially offset by the weakening of the rand dollar exchange rate to R11.22/US\$, compared to R10.77/US\$ in the September 2014 quarter. As a result, the rand gold price received decreased quarter on quarter from R443 690/kg to R432 963/kg.

The company is positioned to remain competitive in times of low gold prices and benefit from higher gold prices.

6. RESTRUCTURING FOR PROFITABILITY

6.1 Closure of Target 3

The restructuring process, which began in August 2014, was concluded during the December 2014 quarter following the signing of the agreement with all representative trade unions. The majority of the affected employees were absorbed at other operations.

6.2 Closure of Ernest Oppenheimer Hospital (EOH)

Our employees have access to medical hubs at our operations, which provide medical care and wellness advice to our employees. This strategy was implemented some two years ago. Keeping our employees healthy as well as our improved safety, resulted in EOH having fewer and fewer patients.

The hospital was licensed for 450 patients. Occupancy had, however dropped to below 100. The unit was therefore economically inefficient. As a result, we decided to close EOH. Most of the functions that EOH rendered have been moved to other hospitals in the Welkom area.

Discussions with the Department of Health as new potential owners of EOH are advanced. Should the transaction be concluded, it will enhance the ability of the province to supply healthcare to the

community.

6.3 Restructuring of Kusasalethu

On 2 December 2014, notice was given to all representative trade unions of our intention to restructure Kusasalethu. Agreement was reached on the establishment of a task team to oversee the fair implementation of any mitigating alternatives to retrenchment, which includes transfers to other operations, voluntary separations, early retirements and re-skilling.

6.4 Voluntary separations for management

There were 59 management employees who opted for voluntary retrenchment or early retirement packages as part of the central services management restructuring process.

6.5 Financial effects of the restructuring

Our decision to restructure and optimise our operations, will contribute to a more profitable Harmony in the future. Unprofitable areas have been scrapped to the value of R214 million at Kusasalethu and R216 million at Masimong. Refer to financial results above. Retrenchment costs of R182 million have been recorded for the quarter.

7. WAGE NEGOTIATIONS 2015

Preparations for this year's wage negotiations are under way, with the Gold Wage Caucus meeting regularly, both under the auspices of the Chamber of Mines and independently.

Harmony is engaging with all union shop stewards on the fundamentals of gold mining, Harmony's cost structures and the marginality of our operations. We have also increased our internal communication efforts to ensure that employees are aware of the importance of being at work, being productive and earning their salaries and bonuses.

8. POWER SUPPLY

Since November 2014, the electricity supply in South Africa has been under pressure, with load shedding occurring at short notice. The power supplier, Eskom, announced that this will continue in the medium term. Load shedding has resulted in production losses during the quarter.

To ensure that our employees remain safe, especially while a shift is underground and that production continues, electricity needs to be managed efficiently, thus we have implemented the following mitigating measures:

- We are focusing our efforts on the reduction and optimisation of the use of electricity at each operation. Our emphasis is on reducing our electricity demand especially during peak times.
- We continue to look for and implement opportunities for load shifting where an opportunity presents itself and can be implemented with the least disruption to the operation and employees.
- Remaining industrial geysers are being replaced with heat pumps which will be finalised in March 2015.
- We have commissioned a study to identify direct purchase opportunities from Independent Power Producers and other opportunities to source electricity outside of Eskom. The study

also focuses on bringing renewable energy into our energy portfolio.

5

• Harmony is a member of the EIUG (Energy Intensive User Group of Southern Africa), who are collaborating with the Minister of Energy to implement plans in an attempt to stabilise the electricity supply risks in South Africa.

9. SILICOSIS

Harmony, Anglo American South Africa, AngloGold Ashanti, Gold Fields and Sibanye Gold announced in November 2014, that they have formed an industry working group to address issues relating to compensation and medical care for occupational lung disease in the gold mining industry in South Africa.

The companies have begun to engage all stakeholders on these matters, including government, organised labour, other mining companies and legal representatives of claimants who have filed legal suits against the companies. These legal proceedings are being defended.

Essentially, the companies are seeking a comprehensive solution which deals both with the legacy compensation issues and future legal frameworks and which, while being fair to employees, also ensure the future sustainability of companies in the industry.

10. MORE EXCITEMENT FROM PNG

(Harmony's 100% owned exploration area)

Drilling at Kili Teke is currently in progress with 732m completed by quarter end. At this very early stage of the drilling program, the broad zones of anomalism and their associated alteration styles and intensity are highly encouraging.

Post quarter end, drill results included 255m @ 0.24% Cu, 0.15 g/t Au from 146m. The entire drillhole is mineralised below the overthrust limestone. The intercept contains solid intervals of higher grade including 55m @ 0.45% Cu, 0.32 g/t Au from 160m, and some smaller intervals assaying in excess of 1% copper. From the outset, the drilling has outlined a sequence of highly altered and mineralized diorite porphyry together with narrower zones of copper-gold skarn mineralization. This greenfield project has the potential to develop into a major new copper gold find. Drilling continues.

11. CONCLUSION

In the current environment of volatile gold prices and possible deflationary trends, we are focussed – more than ever – on cost control and cash generation at existing operations. In addition, shareholder value is created through investing in Golpu, securing a sustainable, profitable future for Harmony.

Graham Briggs

Chief Executive Officer

THE INVESTMENT CASE FOR HARMONY

Firstly, we are the most efficient South African gold miner, by focusing on ways to improve our safety, production and cash operating costs. In addition, we are a company that's focused on the future. An investment in us is not just for short-term gain – we aim to provide increasing long-term benefits. We are able to do this primarily by funding our own capital, which puts us in

control of our business and enables us to make decisions that have a real impact on our profitability.

Secondly, we produce more than one million ounces of gold and being a leveraged gold company means that should the gold price rise our margins would improve dramatically in percentage terms. Management clearly understands this and we continue to make tough decisions in loss-making operations when the gold price softens. However, Harmony has a huge potential upside when the gold price strengthens, as we believe it will in the medium to long term.

One of our key strengths at Harmony is our understanding of where we operate – on both an economic and a social level.

The countries in which we operate and have experience, South Africa and Papua New Guinea, are both emerging economies.

They are developing countries and we are able to contribute to local communities in a way that can make a lasting difference.

For this reason, we wholeheartedly embrace our social licences to mine and endeavour to go beyond compliance.

The final reason to invest in Harmony is Golpu. It's a resource that we're sure will develop into a world-class copper gold mine, and will allow us to sustain our business well into the future.

Includes capital expenditure for Wafi-Golpu and other international projects of R1 million in the December 2014 quarter (September 2014 quarter: R15 million)

(December 2013 quarter: Rnil) and R12 million in the year ended 30 June 2014.

** Cash generated by operating activities and cash utilised by investing activities previously reported as R683 million and (R625 million) restated to R710 million and (R652 million) respectively in the December 2013 quarter. This is mainly related to the change in accounting policy for IFRIC 20.*

#

Cash generated by operating activities and cash utilised by investing activities previously reported as R918 million and (R1 252 million) restated to R1 011 million and

(R1 345 million) respectively in the six months ended 31 December 2013. This is mainly related to the change in accounting policy for IFRIC 20.

The accompanying notes are an integral part of these condensed consolidated financial statements.

13

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

for the six months ended 31 December 2014 (Rand)

1.

Accounting policies

Basis of accounting

The condensed consolidated financial statements for the six months ended 31 December 2014 have been prepared in accordance

with IAS 34, Interim Financial Reporting, JSE Listings Requirements, SAICA Financial Reporting Guides as issued by the Accounting

Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council, and in the manner

required by the Companies Act of South Africa. They should be read in conjunction with the annual financial statements for the

year ended 30 June 2014, which have been prepared in accordance with International Financial Reporting Standards as issued by

the International Accounting Standards Board (IFRS). The accounting policies are consistent with those described in the annual

financial statements, except for the adoption of applicable revised and/or new standards issued by the International Accounting

Standards Board.

The following accounting standards, amendments to standards and new interpretations have been adopted with effect from

1 July 2014 and had no impact on the financial results of the group:

IFRSs

Annual Improvements 2010 – 2012 Cycle

IAS 32

Amendment – Presentation – Offsetting Financial Assets and Financial Liabilities

IAS 36

Amendment – Impairment of Assets – Recoverable amount disclosures for non-financial assets

4. Loss on scrapping of property, plant and equipment

During the financial year, management and the South African operations embarked on a life-of-mine optimisation process which was finalised at the end of the December 2014 quarter. The optimisation ensured greater focus on mining profitable and higher grade areas at our operations and therefore resulted in the abandonment of lower grade and unprofitable areas from the

life-of-
mine plan for most of the operations.

In the case of Kusasalethu and Masimong, the optimisation lead to the abandonment of levels and areas with a carrying value. The abandonment of these areas, resulted in the derecognition of property, plant and equipment as no future economic benefits are expected from its use or disposal and a loss on scrapping of property, plant and equipment of R214 million on Kusasalethu and R216 million on Masimong was recorded in the December 2014 quarter.

5.

Investment in associate

Harmony holds a 10.38% share in Rand Refinery Proprietary Limited (Rand Refinery). Due to the issues experienced at Rand Refinery

following the implementation of a new Enterprise Resource Planning (ERP) system on 1 April 2013, Harmony provided for its full

share of loss for the inventory discrepancy and recognised a R127 million loss in the June 2014 quarter.

As a precautionary measure following the challenges experienced by the implementation of the software system, Rand Refinery's

shareholders have extended Rand Refinery an irrevocable, subordinated loan facility of up to R1.2 billion. The facility is convertible

to equity after a period of two years. The agreements relating to the facility were signed on 23 July 2014.

During the December 2014 quarter, Rand Refinery Proprietary Limited drew down R1.02 billion on the shareholders loan. Harmony's

portion of the shareholders' loan was R120 million. Interest on the facility is JIBAR plus a margin of 3.5%.

15

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS CONTINUED

for the six months ended 31 December 2014 (Rand)

6. Borrowings

The drawn level on the US\$ syndicated revolving credit facility remains at US\$270 million. The weakening of the Rand against the

US\$ resulted in a foreign exchange translation loss of R69 million being recorded in the December 2014 quarter (September 2014

quarter: R192 million), increasing the borrowings balance and Other expenses (net). The facility is repayable by September 2015. As

a result, the borrowings balance was reclassified to current liabilities.

Harmony secured a new revolving credit facility of up to US\$250 million with a three-year duration. The facility matures in

February 2018.

The debt covenants on all facilities are as follows:

At 31 December 2014, the full amount was available on the Nedbank revolving credit facility of R1.3 billion. The facility is available

until December 2016.

7.

Other non-current liabilities

During the September 2014 quarter, negotiations were entered into with the claimants in the matter relating to the pumping and

treatment cost of fissure water in the Klerksdorp, Orkney, Stilfontein and Hartbeesfontein (KOSH) Basin. Payment of R24 million was

made to Simmer and Jack Investments (Pty) Limited as full and final settlement during the September 2014 quarter.

The amount

owing to AngloGold Ashanti Limited was reclassified to trade and other payables at 30 September 2014 and the full and final

settlement of R30 million was made in October 2014.

8.

Financial risk management activities

Fair value determination

The following table presents the group's assets and liabilities that are measured at fair value by level within the fair value hierarchy:

Level 1: Quoted prices (unadjusted) in active markets for identical assets;

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset, either directly or indirectly (that

is, as prices) or indirectly (that is derived from prices);

Level 3: Inputs for the asset that are not based on observable market data (that is unobservable inputs).

16

Contingent liabilities

For a detailed disclosure on contingent liabilities refer to Harmony's annual financial statements for the financial year ended

30 June 2014, available on the group's website (www.harmony.co.za). There were no significant changes in contingencies since

30 June 2014.

10. Related parties

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the

activities of the group, directly or indirectly, including any director (whether executive or otherwise) of the group.

There have been

no transactions with related parties during the six months ended 31 December 2014.

11. Subsequent events

There were no subsequent events to report.

12. Segment report

The segment report follows on page 17.

Includes capital expenditure for Wafi-Golpu and other international projects of US\$nil million in the December 2014 quarter (September 2014 quarter: US\$1 million)

(December 2013 quarter: US\$nil) and US\$1 million in the year ended 30 June 2014.

** Cash generated by operating activities and cash utilised by investing activities previously reported as US\$67 million and (US\$62 million) restated to US\$70 million and (US\$65 million) respectively in the December 2013 quarter. This is mainly related to the change in accounting policy for IFRIC 20.*

Cash generated by operating activities and cash utilised by investing activities previously reported as US\$91 million and (US\$125 million) restated to US\$100 million and (US\$134 million) respectively in the six months ended 31 December 2013. This is mainly related to the change in accounting policy for IFRIC 20.

The currency conversion average rates for the quarter ended: December 2014: US\$1 = R11.22 (September 2014: US\$1 = R10.77,

December 2013: US\$1 = R10.12). For year ended: June 2014: US\$1 = R10.35. Six months ended: December 2014: US\$1 = R10.99

(December 2013: US\$1 = R10.04).

Closing balance translated at closing rates of: December 2014: US\$1 = R11.57 (September 2014: US\$1 = R11.32, June 2014: US\$1 =

R10.61, December 2013: US\$1 = R10.46).

The cash flow statement for the year ended 30 June 2014 has been extracted from the 2014 annual financial statements.
