NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1.

Accounting Records and Use of Estimates:

The accounting records are maintained in accordance with accounting principles generally accepted in the United States of America (GAAP). The preparation of the Company's financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, the disclosure of contingent assets and liabilities, and the reported amounts of revenues and expenses during the reporting period. The estimates that we make include allowance for doubtful accounts, depreciation and amortization, income tax assets and liabilities, fair value of marketable securities and revenue recognition. Estimates are based on historical experience where applicable or other assumptions that management believes are reasonable under the circumstances. Due to the inherent uncertainty involved in making estimates, actual results may differ from those estimates under different assumptions or conditions.

The interim financial statements are prepared pursuant to the requirements for reporting on Form 10-Q. The July 31, 2012 balance sheet was derived from audited financial statements but does not include all disclosures required by GAAP. The interim financial statements and notes thereto should be read in conjunction with the financial statements and notes included in the Company's latest Form 10-K Annual Report for the fiscal year ended July 31, 2012. In the opinion of management, the interim financial statements reflect all adjustments of a normal recurring nature necessary for a fair statement of the results for interim periods. The results of operations for the current period are not necessarily indicative of the results for the entire fiscal year ending July 31, 2013.

The computation of the annual expected effective tax rate at each interim period requires certain estimates and assumptions including, but not limited to, the expected operating income for the year and future periods, projections of the proportion of income (or loss), and permanent and temporary differences. The accounting estimates used to compute the provision for income taxes may change as new events occur, more experience is acquired, or as additional information is obtained. To the extent that the estimated annual effective tax rate changes during a quarter, the effect of the change on prior quarters is included in tax expense for the current quarter.

Prior to April 30, 2012, the Company historically calculated New York State and New York City taxes based on capital, as such, the taxes were considered franchise taxes and were not included when calculating deferred taxes. Effective April 30, 2012, management assumes future taxes for New York State and New York City will be calculated based on income. This change in management's assumption relating to operating income in future periods for state and city deferred tax calculations resulted in a charge to deferred tax expense of \$389,000 for the period ended April 30, 2012.

2.

Income Per Share of Common Stock:

Income per share has been computed by dividing the net income for the periods by the weighted average number of shares of common stock outstanding during the periods, adjusted for the purchase of treasury stock. Shares used in computing income per share were 2,015,780 for the nine months ended April 30, 2013 and April 30, 2012.

3.

Marketable Securities:

The Company categorizes marketable securities as either trading, available-for-sale or held-to-maturity. Trading securities are carried at fair value with unrealized gains and losses included in income. Available-for-sale securities are carried at fair value measurements using quoted prices in active markets for identical assets or liabilities with unrealized gains and losses recorded as a separate component of shareholders' equity. Held-to-maturity securities are carried at amortized cost. Dividends and interest income are accrued as earned. Realized gains and losses are determined on a specific identification basis. The Company reviews marketable securities for impairment whenever circumstances and situations change such that there is an indication that the carrying amounts may not be recovered. The Company did not classify any securities as trading during the nine months ended April 30, 2013 and April 30, 2012. The Company also did not classify any securities as trading at July 31, 2012.

The Company adopted Accounting Standards Certification (ASC) 820, *Fair Value Measurements and Disclosures* in 2011. ASC 820 establishes a fair value hierarchy that prioritizes the valuation techniques and creates the following three broad levels, with Level 1 valuation being the highest priority:

Level 1 valuation inputs are quoted market prices in active markets for identical assets or liabilities that are accessible at the measurement date (e.g., equity securities traded on the New York Stock Exchange).

Level 2 valuation inputs are from other than quoted market prices included in Level 1 that are observable for the asset or liability, either directly or indirectly (e.g., quoted market prices of similar assets or liabilities in active markets, or quoted market prices for identical or similar assets or liabilities in markets that are not active).

Level 3 valuation inputs are unobservable (e.g., an entity's own data) and should be used to measure fair value to the extent that observable inputs are not available.

In accordance with the provisions of *Fair Value Measurements*, the following are the Company's financial assets presented at fair value at April 30, 2013 and July 31, 2012.

4. Financial Instruments and Credit Risk Concentrations:

Financial instruments that are potentially subject to concentrations of credit risk consist principally of marketable securities, cash and cash equivalents and receivables. Marketable securities and cash and cash equivalents are placed with multiple financial institutions and multiple instruments to minimize risk. No assurance can be made that such financial institutions and instruments will minimize all such risk.

The Company derives rental income from fifty tenants, of which one tenant accounted for 20.02% and another tenant accounted for 15.99% of rental income during the nine months ended April 30, 2013. No other tenant accounted for more than 10% of rental income during the same period.

The Company has one irrevocable Letter of Credit totaling \$230,000 at April 30, 2013 and July 31, 2012 provided by one tenant as a security deposit.

- (a) On August 19, 2004, the Company extended the then existing loan for an additional forty-two (42) months, with an option to convert the loan to a seven (7) year permanent mortgage loan. (See Note 5(b) below). The Company in February 2008 converted the loan to a seven (7) year permanent mortgage loan. The interest rate on conversion was 6.98%.
- (b) The Company, on August 19, 2004, closed a loan with a bank for a \$12,000,000 multiple draw term loan. This loan financed seventy-five (75%) percent of the cost of capital improvements for an existing lease to a tenant and capital improvements for future tenant leases at the Company's Brooklyn, New York (Bond Street building) and Fishkill, New York properties through February 2008. The loan also financed \$850,000 towards the construction of two new elevators at the Company's Brooklyn, New York property (Bond Street building). The loan consists of: a) a permanent, first mortgage loan to refinance an existing first mortgage loan affecting the Fishkill, New York property, which matured on July 1, 2004 (the First Permanent Loan) (see Note 5(a)), b) a permanent subordinate mortgage loan in the amount of \$1,870,000 (the Second Permanent Loan), and c) multiple, successively subordinate loans in the amount \$8,295,274 (Subordinate Building Loans). As of August 19, 2004, the Company refinanced the existing mortgage on the Company's Fishkill, New York property, which balance was \$1,834,726 and took down an additional \$2,820,000 for capital improvements for two tenants at the Company's Bond Street building in Brooklyn, New York. In fiscal years 2006, 2007 and 2008, the Company drew down additional amounts totaling \$916,670, on its multiple draw term loan to finance tenant improvements and brokerage commissions for the leasing of 13,026 square feet for office use at the Company's Bond Street building in Brooklyn, New York. The Company, in February 2008, converted the loan to a seven (7) year permanent mortgage loan. The interest rate on conversion was 6.98%. Since the loan has been converted to a permanent mortgage loan, the balance of the financing on this loan was for the new elevators at the Company's Bond Street building in Brooklyn, New York in the amount of \$850,000 referred to above. The \$850,000 was drawn down in fiscal 2010. The outstanding balance of the loan totaling \$5,318,490 will become due and payable on February 18, 2015.
