# Company Announcement

Interim financial report for the period 1 January 2011 to 30 September 2011

27 October 2011

## **Novo Nordisk increased operating profit by 12% in the first nine months of 2011**

### **Sales growth of 11% in local currencies driven by Victoza®, NovoRapid® and Levemir®**

#### **Sales increased by 11% in local currencies and by 8% in Danish kroner.**

- o Sales of modern insulins increased by 11% (7% in Danish kroner).
- o Victoza® sales of DKK 3,895 million (growth of 185% in Danish kroner).
- o Sales of NovoSeven® increased by 7% (3% in Danish kroner).
- o Sales in North America increased by 17% (10% in Danish kroner).
- o Sales in International Operations increased by 16% (12% in Danish kroner).

Gross margin improved by 0.2 percentage point in local currencies, reflecting a favourable product mix development due to increased sales of modern insulin versus lower human insulin sales. Measured in Danish kroner, the gross margin declined by 0.4 percentage points to 80.4%.

Reported operating profit increased by 12% to DKK 16,293 million. In local currencies, operating profit increased by approximately 18%.

Net profit increased by 19% to DKK 12,408 million. Earnings per share (diluted) increased by 22% to DKK 21.66.

Novo Nordisk submitted the regulatory dossiers for the new generation of insulins, Degludec and DegludecPlus, to the European and US regulatory authorities in September 2011.

The outlook for 2011 has been updated: sales growth measured in local currencies is now expected to be 10-11% (previously 9-11%), and operating profit growth measured in local currencies is now expected to be 17-19% (previously 15-19%).

The preliminary outlook for 2012 indicates high single-digit sales growth and operating profit growth of close to 10%, both measured in local currencies. The outlook is associated with unusual uncertainty given the challenging financial situation in major countries around the world. The outlook for operating profit furthermore reflects costs related to the expected launch of Degludec.

Lars Rebien Sørensen, president and CEO: We are pleased to see our key products, NovoRapid®, Levemir® and Victoza®, continue to drive strong underlying sales growth. The filing of our new-generation insulins, ultra-long-acting Degludec and DegludecPlus, in the US and Europe is a major milestone in the expansion of our leadership in diabetes care.

## Consolidated financial statement for the first nine months of 2011

The present unaudited interim financial report has been prepared in accordance with IAS 34 Interim Financial Reporting and the accounting policies set out in the *Annual Report 2010* of Novo Nordisk. Furthermore, the interim financial report and Management's Review are prepared in accordance with additional Danish disclosure requirements for interim reports of listed companies. Novo Nordisk has adopted all new, amended or revised accounting standards and interpretations (IFRSs) endorsed by the EU effective for the accounting period beginning on 1 January 2011. These IFRSs have not had any significant impact on the Group's interim financial report.

Amounts in DKK million, except average number of shares outstanding, earnings per share and full-time employees.

## Sales development

Sales increased by 11% measured in local currencies and by 8% in Danish kroner during the first nine months of 2011 compared to the same period last year. All regions contributed to growth; North America was the main contributor with 59% share of growth measured in local currencies, followed by International Operations and Region China, contributing 21% and 9%, respectively. Sales growth was realised within both diabetes care and biopharmaceuticals, with the majority of growth originating from Victoza® and the modern insulins. Sales growth in the first nine months of 2011 was reduced by approximately 2.5 percentage points due to healthcare reforms in the US, several European markets, China and Turkey.

	<b>Sales 9M 2011 DKK million</b>	<b>Growth as reported</b>	<b>Growth in local currencies</b>	<b>Share of growth in local currencies</b>
<b>The diabetes care segment</b>

<b>Total sales</b>	<b>48,226</b>	<b>8%</b>	<b>11%</b>	<b>100%</b>

In the following sections, unless otherwise noted, market data are based on moving annual total (MAT) volume data from August 2011 provided by the independent data provider IMS Health.

### Diabetes care sales development

Sales of diabetes care products increased by 12% measured in local currencies and by 9% in Danish kroner to DKK 36,465 million compared to the first nine months of 2010. Novo Nordisk is the world leader in diabetes care and now holds a global value market share of 24% compared to 23% at the same point in time last year.

#### Modern insulins, human insulins and protein-related products

In the first nine months of 2011, sales of modern insulins, human insulins and protein-related products increased by 5% measured in local currencies and by 2% in Danish kroner to DKK 30,644 million compared to the first nine months of 2010, driven by North America, International Operations and Region China. Global insulin sales growth was negatively impacted by healthcare reforms and a decline in human insulin sales especially in Europe and North America.

## Edgar Filing: NOVO NORDISK A S - Form 6-K

Sales of modern insulins increased by 11% in local currencies and by 7% in Danish kroner to DKK 20,909 million compared to the first nine months of 2010, reflecting steady, organic sales growth. North America, International Operations and Region China were the main contributors to the growth. Sales of modern insulins constitute more than 72% of Novo Nordisk's sales of insulin.

Insulin market shares (volume, MAT)	Novo Nordisk's share of total insulin market		Novo Nordisk's share of modern insulin market	
	Aug 2011	Aug 2010	Aug 2011	Aug 2010
<b>Global</b>	<b>50%</b>	<b>51%</b>	<b>46%</b>	<b>46%</b>

Japan	60%	64%	54%	57%
China**	63%	63%	68%	70%

Source: IMS, August 2011 data.

\*: Data for the 11 major countries in IO, \*\*: Data for mainland China, excluding Hong Kong and Taiwan

### *North America*

Sales of modern insulins, human insulins and protein-related products in North America increased by 8% in local currencies and by 2% measured in Danish kroner in the first nine months of 2011. This reflects continued solid sales performance of especially NovoRapid® and Levemir® offset by a decline in human insulin sales and a negative impact of more than 4 percentage point of the US healthcare reform adopted in March 2010. Currently, around 45% of Novo Nordisk's modern insulin volume in the US is being sold in the prefilled device FlexPen® compared to around 42% for the same period last year.

### *Europe*

Sales in Europe decreased by 2% in local currencies and by 1% measured in Danish kroner in the first nine months of 2011. The market growth of the insulin volume in Europe is currently low, ie below 3%, and Novo Nordisk insulin sales are negatively impacted by market share losses, especially in the UK and healthcare reforms implemented during 2010 and 2011. The penetration of the modern insulin portfolio continues and, consequently, human insulin sales are declining. Currently, around 96% of Novo Nordisk's insulin volume in Europe is being sold in devices. In October 2011 a new disposable prefilled insulin pen, FlexTouch®, was launched in the UK with Novo Nordisk's rapid-acting insulin analogue NovoRapid®.

### *International Operations*

Sales in International Operations increased by 12% in local currencies and by 7% in Danish kroner in the first nine months of 2011. The growth is primarily driven by modern insulins with all three insulin analogues growing solidly. Currently, around 57% of Novo Nordisk's insulin volume in International Operations' non-tender markets is being sold in devices.

### *Region China*

Sales in Region China increased by 13% in local currencies and by 11% in Danish kroner in the first nine months of 2011. The main contributor to growth was sales of modern insulin with the entire portfolio growing strongly while sales of human insulin continue to add to overall growth in the region. The sales growth in the third quarter of 2011 has been negatively impacted by Chinese healthcare reforms. Currently, around 96% of Novo Nordisk's insulin volume in China is being sold in devices.

CVR number:  
24256790

#### **Japan & Korea**

Sales in Japan & Korea decreased by 3% in local currencies and were unchanged measured in Danish kroner in the first nine months of 2011. The sales development reflects sales growth for modern insulins being offset by a decline in human insulin sales. Further, continued low market growth is impacting overall growth. The device penetration in Japan remains high with approximately 98% of Novo Nordisk's insulin volume being used in devices, primarily FlexPen®.

#### **Victoza® (GLP-1 therapy for type 2 diabetes)**

Victoza® sales reached DKK 3,895 million during the first nine months of 2011 reflecting solid market performance in both the US and Europe. Victoza® has now reached a global value market share of 54% in the GLP-1 segment primarily driven by a value market share of 47% in the US and 64% in Europe.

The launch of Victoza® has accelerated the growth of the overall GLP-1 market value: the MAT value of the global GLP-1 market has grown 59% during the last 12 months, compared to 22% growth during the preceding 12 months. The global roll-out of Victoza® continues and Victoza® is launched in 40 countries, now including China.

#### **NovoNorm®/Prandin®/PrandiMet® (oral antidiabetic products)**

In the first nine months of 2011, sales of oral antidiabetic products declined by 3% measured in local currencies and by 8% in Danish kroner to DKK 1,926 million compared to the first nine months of 2010. The sales development reflects lower sales in Europe due to generic competition in several European markets, partly offset by continued sales growth in China.

### **Biopharmaceuticals sales development**

In the first nine months of 2011, sales of biopharmaceutical products increased by 7% measured in local currencies and by 5% measured in Danish kroner to DKK 11,761 million compared to the first nine months of 2010 with all regions contributing to the growth.

#### **NovoSeven® (bleeding disorders therapy)**

Sales of NovoSeven® increased by 7% in local currencies and by 3% in Danish kroner to DKK 6,216 million compared to the first nine months of 2010. All regions contributed to the sales growth for NovoSeven®; International Operations was the primary contributor to growth followed by Europe and North America.

#### **Norditropin® (growth hormone therapy)**

Sales of Norditropin® increased by 5% measured in local currencies and by 4% measured in Danish kroner to DKK 3,707 million compared to the first nine months of 2010. The sales growth was driven by International Operations, Japan & Korea and North America partly offset by a decline in Europe. Novo Nordisk is the second-largest company in the global growth hormone market with a 23% market share measured in volume.

#### **Other products**

Sales of other products within biopharmaceuticals, which predominantly consist of hormone replacement therapy (HRT)-related products, increased by 14% measured in local currencies and by 12% in Danish kroner to DKK 1,838 million compared to the first nine months of 2010. This development primarily reflects continued sales progress for Vagifem® 10 mcg, supported by GlucaGen® sales in the US and Japan.

Company Announcement no 67 / 2011

## Development in costs

The cost of goods sold grew 10% to DKK 9,467 million in the first nine months of 2011. The gross margin measured in local currencies increased 0.2 percentage point in the first nine months of 2011. This primarily reflects a product mix impact due to the upgrade from human insulins to modern insulins. Reported gross margin was 80.4% compared to 80.8% for the same period last year due to a negative currency impact of 0.6 percentage point.

In the first nine months of 2011, total non-production-related costs increased by 6% in local currencies and by 4% in Danish kroner to DKK 22,815 million compared to the first nine months of 2010.

Sales and distribution costs increased by 5% to DKK 13,617 million primarily as a result of increased sales promotion in the US and China as well as sales force expansion in the US in the fourth quarter of 2010 and costs related to the 'Manufacturer's fee part of the US healthcare reform.

Research and development costs of DKK 6,876 million remained at a level similar to the same period last year. This primarily reflects expanding research activities and initiation of pivotal trials, offset by the completion of the phase 3a programme for Degludec and DegludecPlus.

Licence fees and other operating income constituted DKK 349 million in the first nine months of 2011 compared to DKK 493 million in the first nine months of 2010. This development is primarily due to a non-recurring income related to a patent settlement during the first quarter of 2010.

## Net financials

Net financials showed a net expense of DKK 179 million in the first nine months of 2011 compared to a net expense of DKK 966 million in the first nine months of 2010.

For the first nine months of 2011, the foreign exchange result was an expense of DKK 109 million compared to an expense of DKK 805 million in the first nine months of 2010. The foreign exchange loss in the first nine months of 2011 reflects losses on commercial balances in non-hedged currencies partly offset by net gains on foreign exchange hedging contracts primarily related to the US dollar.

As of 30 September 2011, foreign exchange hedging losses of around DKK 550 million have been deferred for future loss recognition in the income statements in 2011 and 2012.

In the first nine months of 2010, the result from associated companies was included in net financials with an income of DKK 39 million. After the divestment of shares in ZymoGenetics Inc. and transfer of Innate Pharma S.A. to Other non-current financial assets in the fourth quarter of 2010, the result from investments in associated companies has declined to DKK 0.

## Key developments in the third quarter of 2011

Please refer to appendix 1 for an overview of the quarterly numbers in DKK.

Sales in the third quarter of 2011 increased by 11% in local currencies and by 6% in Danish kroner to DKK 16,532 million compared to the same period in 2010. The growth is primarily driven by Victoza® and modern insulins partly offset by a decline in human insulin sales. Sales growth in the third quarter of 2011 was primarily driven by North America and International

## Edgar Filing: NOVO NORDISK A S - Form 6-K

Operations. The sales growth in China was low due to the implementation of healthcare reforms, including Essential Drug List bidding in some provinces and price reductions on human insulin and NovoNorm®. The price reductions were enacted on 1 September 2011, following a national drug price review, and have led to inventory reductions in the distribution pipeline.

The reported gross margin was negatively impacted by currency effects whereas the gross margin measured in local currencies was realised at the same level in the third quarter of 2011 compared to the same period last year.

Sales and distribution costs increased by 3% for the third quarter of 2011 compared to the same period last year, primarily driven by an expanded diabetes care field force in the US.

Research and development costs decreased by 2% in the third quarter of 2011 compared to the same period last year due to the completion of Degludec and DegludecPlus phase 3a trials.

Reported operating profit increased by 9% in the third quarter of 2011 compared to the same period last year, and by 20% in local currencies. This primarily reflects the steady operating performance offset by a negative currency impact.

## Outlook

The current expectations for 2011 are summarised in the table below:

<b>Expectations are <i>as reported</i>, if not otherwise stated</b>	<b>Current expectations 27 October 2011</b>	<b>Previous expectations 4 August 2011</b>
<b>Sales growth</b> in local currencies as reported	<b>10-11%</b> <b>Around 2.5 percentage points lower</b>	9-11% Around 3 percentage points lower
<b>Operating profit growth</b> in local currencies as reported	<b>17-19%</b> <b>Around 5 percentage points lower</b>	15-19% Around 5.5 percentage points lower
<b>Net financials</b>	<b>Loss of around DKK 250 million</b>	Income of around DKK 150 million
<b>Effective tax rate</b>	Around 23%	Around 23%
<b>Capital expenditure</b>	<b>Around DKK 3 billion</b>	Around DKK 3.5 billion
<b>Depreciation, amortisation and impairment losses</b>	Around DKK 2.7 billion	Around DKK 2.7 billion
<b>Free cash flow</b>	<b>Around DKK 17.5 billion</b>	More than DKK 16 billion

Novo Nordisk now expects **sales growth** in 2011 of 10-11% measured in local currencies. This is based on expectations for continued market penetration of Novo Nordisk's key products, as well as expectations for continued intense competition, generic competition to oral antidiabetic products, and negative impact from the implementation of healthcare reforms primarily in the US and Europe. Given the current level of exchange rates versus Danish kroner, the reported sales growth is now expected to be around 2.5 percentage points lower than growth measured in local currencies.

For 2011, growth in **operating profit** is now expected to be 17-19% measured in local currencies. Given the current level of exchange rates versus Danish kroner, the reported operating profit growth is now expected to be around 5 percentage points lower than growth measured in local currencies.

CVR number:  
24256790

---

## Edgar Filing: NOVO NORDISK A S - Form 6-K

For 2011, Novo Nordisk now expects a **net financial loss** of around DKK 250 million. The current expectation reflects losses on commercial balances in non-hedged currencies as well as losses on foreign exchange hedging contracts due to the lower average level of exchange rates prevailing in the second half of 2009 and in 2010, ie the point in time when the forward contracts maturing in 2011 were established.

The **effective tax rate** for 2011 is still expected to be around 23%.

**Capital expenditure** is now expected to be around DKK 3 billion in 2011, primarily related to investments in the new insulin formulation and filling plant in China and a new prefilled device production facility in Denmark. Expectations for **depreciation, amortisation and impairment losses** are still around DKK 2.7 billion and **free cash flow** is now expected to be around DKK 17.5 billion.

With regard to the **financial outlook for 2012**, Novo Nordisk expects to provide detailed guidance on expectations in connection with the release of full-year financial results for 2011 on 2 February 2012. In light of the current challenging economic environment in major countries around the world, providing a financial forecast for 2012 is currently associated with unusual uncertainty. However, at present the preliminary plans for 2012 indicate high single- digit sales growth in percent and close to 10% growth in operating profit, both measured in local currencies. The outlook reflects expectations for continued solid penetration of the portfolio of modern insulins, continued global roll-out of Victoza® and progress for key products within biopharmaceuticals. Furthermore, the outlook reflects significant costs related to the expected launch of the ultra-long-acting insulin Degludec, an impact from healthcare reforms, generic competition for oral antidiabetic products and intensifying competition within both diabetes care and biopharmaceuticals. Due to an expected positive currency impact following the appreciation of Novo Nordisk's main invoicing currencies during 2011, the reported sales growth for 2012 is expected to be around 0.5 percentage points higher than the growth measured in local currencies, and the reported operating profit growth is expected to be around 1.5 percentage points higher than the growth measured in local currencies. The accounting effect of net foreign exchange hedging losses, deferred for loss recognition in 2012 when the hedged operating cash flows will be realised, is currently expected to be DKK 200 million.

All of the above expectations are based on the assumption that the global economic environment will not significantly change business conditions for Novo Nordisk during the remainder of 2011 and in 2012 and that currency exchange rates, especially the US dollar, will remain at the current level versus the Danish krone during the remaining part of 2011 and in 2012. Please refer to appendix 7 for key currency assumptions.

## Edgar Filing: NOVO NORDISK A S - Form 6-K

Novo Nordisk has hedged expected net cash flows in a number of invoicing currencies and, all other things being equal, movements in key invoicing currencies will impact Novo Nordisk's operating profit as outlined in the table below.

Key invoicing currencies	Annual impact on Novo Nordisk's operating profit of a 5% movement in currency	Hedging period (months)
USD	DKK 700 million	12
JPY	DKK 155 million	13
CNY	DKK 120 million	12*
GBP	DKK 85 million	11

\* USD used as proxy when hedging Novo Nordisk's CNY currency exposure  
The financial impact from foreign exchange hedging is included in 'Net financials'.

## Research and development update

### Diabetes care: Insulin and GLP-1

*EASD meeting 12-16 September 2011 in Lisbon, Portugal*

At the annual EASD (European Association for the Study of Diabetes) meeting, Novo Nordisk presented the results from its broad diabetes research and development activities, including 55 posters, and five oral presentations. Key presentations included detailed results of two 52-week basal-bolus studies comparing the ultra-long-acting basal insulin Degludec with insulin glargine in people with type 1 and type 2 diabetes. The studies showed that Degludec lowers blood glucose levels and significantly reduces the rate of overall hypoglycaemia in type 2 patients and nocturnal hypoglycaemia in patients with type 1 or type 2 diabetes. In addition, results were presented from a trial in type 2 diabetes that showed that ultra-long-acting Degludec can be administered using flexible timing of dosing, with intervals of 8, 24 or 40 hours, without compromising the safety and efficacy profile when compared to insulin glargine dosed every 24 hours.

*Degludec and DegludecPlus submitted in Europe and the US for marketing authorisation*

As earlier announced, Novo Nordisk submitted the regulatory dossiers for Degludec and DegludecPlus to the regulatory authorities in the EU and US on September 26 and 29, respectively. The filings are based on results from the BEGIN and BOOST clinical trial programmes, which involved nearly 10,000 type 1 and type 2 diabetes patients. Since then Novo Nordisk has also submitted the Degludec regulatory dossier to the regulatory authorities in Canada and Switzerland.

*Levemir® approved as add-on therapy to Victoza® in Europe*

On 24 October 2011 the European Commission approved the usage of Novo Nordisk's basal insulin analogue, Levemir®, as add-on therapy to the once-daily GLP-1 analogue, Victoza®, in patients with type 2 diabetes. The approval is based on data from a randomised, open-label, 52-week clinical trial in 988 patients, conducted to evaluate the safety and efficacy of adding once-daily Levemir® to treatment with Victoza® 1.8 mg plus metformin.

*Levemir® approved as basal insulin for children aged two to five years in Europe*

On 24 October 2011 the European Commission approved the usage of Novo Nordisk's basal insulin analogue, Levemir®, for children aged two to five years. No other basal insulin is currently indicated for this patient population.

### **Biopharmaceuticals: Haemostasis**

*Longer-acting recombinant factor VIIa derivative, NN7128/NN7129, discontinued*

Following further analysis of the phase 2 results for the longer-acting recombinant factor VIIa derivative, N7-GP, Novo Nordisk has decided to discontinue development of this compound for prophylactic treatment in haemophilia patients with inhibitors. Although the trial showed that the compound significantly reduced overall bleeding rates, with a solid safety profile, no clear dose-response relationship could be established.

*N8-GP, NN7088, to be investigated in a global phase 3 programme*

Following the positive phase 1 results and interactions with regulatory authorities for the longer acting recombinant factor VIII molecule, N8-GP, Novo Nordisk has decided to progress the development towards phase 3 trials which are expected to be initiated in the first half of 2012.

## **Sustainability update**

The total number of employees (full-time equivalent) was 32,016 as of 30 September 2011 compared to 29,515 at the same time last year. New hiring was led by expansions in China, the US and countries in the International Operations region.

On 19-20 September, the United Nations held a high-level meeting on the prevention and control of non-communicable diseases (NCDs) like diabetes, cardiovascular diseases and cancers. In the declaration from the meeting, the General Assembly acknowledges that the global burden and threat of NCD's constitutes one of the 21st century's major challenges for social and economic development. Furthermore, it calls on governments, industry and civil society in collaboration to deliver sustainable, effective responses. Novo Nordisk welcomes the declaration, which underlines the importance of the company's continued efforts to improve diabetes care all over the world.

In conjunction with the UN meeting the World Health Organisation (WHO) called upon the pharmaceutical industry to make insulin available and affordable in poor and low-income countries. Novo Nordisk reaffirmed that low-priced human insulin will remain in the company's portfolio in such countries.

## **Equity**

Total equity was DKK 35,428 million at the end of the first nine months of 2011, equivalent to 57.1% of total assets, compared to 59.9% at the end of the first nine months of 2010. Please refer to appendix 5 for further elaboration on changes in equity during the first nine months of 2011.

### **Treasury shares and 2011 share repurchase programme**

On 11 August 2011, Novo Nordisk announced the purchase of 5,100,000 B-shares for an amount of DKK 2.9 billion from Novo A/S. On 11 August 2011, Novo Nordisk also announced a DKK 2.1 billion share repurchase programme as part of the overall DKK 10 billion share repurchase programme for 2011. The purpose of the programme is a reduction of the company's share capital. Under the programme announced on 11 August 2011 Novo Nordisk repurchased B shares for an amount of DKK 2.1 billion in the period from 11 August 2011 to 25 October 2011. Novo Nordisk has now repurchased 15,106,205 shares corresponding to a total value of DKK 9.0 billion during 2011.

As per 25 October 2011, Novo Nordisk A/S and its wholly-owned affiliates owned 21,724,574 treasury shares, corresponding to 3.7% of the total share capital.

The 2011 DKK 10 billion share repurchase programme has now been expanded by DKK 2 billion to DKK 12 billion based on the improved outlook for free cash flow generation in 2011 primarily related to a lower level of tangible investments. The DKK 3 billion remaining part of the increased share repurchase programme of DKK 12 billion will be executed in the period from November 2011 to January 2012 and will be initiated shortly.

## Legal update

As of 24 October 2011, Novo Nordisk Inc., along with a majority of the hormone therapy product manufacturers in the US, is a defendant in product liability lawsuits related to hormone therapy products. These lawsuits currently involve a total of 50 individuals who allege use of a Novo Nordisk hormone therapy product. The products (Activella® and Vagifem®) have been sold and marketed in the US since 2000. Until July 2003, the products were sold and marketed exclusively in the US by Pharmacia & Upjohn Company (now Pfizer Inc.). Furthermore, 72 individuals currently allege, in relation to similar lawsuits against Pfizer Inc., that they have also used a Novo Nordisk hormone therapy product. Currently, Novo Nordisk does not have any trials scheduled in 2011. Novo Nordisk does not expect the pending claims to have a material impact on Novo Nordisk's financial position.

## Edgar Filing: NOVO NORDISK A S - Form 6-K

statements of plans, objectives or goals for future operations, including those related to Novo Nordisk's products, product research, product development, product introductions and product approvals as well as cooperation in relation thereto  
statements containing projections of or targets for revenues, income (or loss), earnings per share, capital expenditures, dividends, capital structure or other net financials

statements regarding future economic performance, future actions and outcome of contingencies such as legal proceedings, and

statements regarding the assumptions underlying or relating to such statements.

In this document, examples of forward-looking statements can be found under the headings 'Outlook', 'Research and development update', 'Equity' and 'Legal update'.

These statements are based on current plans, estimates and projections. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific. Novo Nordisk cautions that a number of important factors, including those described in this document, could cause actual results to differ materially from those contemplated in any forward-looking statements.

Factors that may affect future results include, but are not limited to, global as well as local political and economic conditions, including interest rate and currency exchange rate fluctuations, delay or failure of projects related to research and/or development, unplanned loss of patents, interruptions of supplies and production, product recall, unexpected contract breaches or terminations, government-mandated or market-driven price decreases for Novo Nordisk's products, introduction of competing products, reliance on information technology, Novo Nordisk's ability to successfully market current and new products, exposure to product liability and legal proceedings and investigations, changes in governmental laws and related interpretation thereof, including on reimbursement, intellectual property protection and regulatory controls on testing, approval, manufacturing and marketing, perceived or actual failure to adhere to ethical marketing practices, investments in and divestitures of domestic and foreign companies, unexpected growth in costs and expenses, failure to recruit and retain the right employees and failure to maintain a culture of compliance.

Please also refer to the overview of risk factors in 'Risk Management' on pp 43-45 of the Annual Report 2010 available on the company's website [novonordisk.com](http://novonordisk.com).

Unless required by law, Novo Nordisk is under no duty and undertakes no obligation to update or revise any forward-looking statement after the distribution of this document, whether as a result of new information, future events or otherwise.

## Management statement

The Board of Directors and Executive Management have reviewed and approved the interim financial report of Novo Nordisk A/S for the first nine months of 2011. The interim financial report has not been audited or reviewed by the company's independent auditors.

The interim financial report has been prepared in accordance with IAS 34 'Interim Financial Reporting' and accounting policies set out in the *Annual Report 2010* of Novo Nordisk. Furthermore, the interim financial report and Management's Review are prepared in accordance with additional Danish disclosure requirements for interim reports of listed companies.

In our opinion, the accounting policies used are appropriate and the overall presentation of the interim financial report is adequate. Furthermore, in our opinion, Management's Review includes a true and fair account of the development in the operations and financial circumstances, of the results for the period and of the financial position of the Group as well as a description of the most significant risks and elements of uncertainty facing the Group in accordance with Danish disclosure requirements for listed companies.
