

APOLLO INVESTMENT CORP

Form POS 8C

December 20, 2016

As filed with the Securities and Exchange Commission on December 20, 2016

Securities Act Registration No. 333-205660

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM N-2

Registration Statement under the Securities Act of 1933

Pre-Effective Amendment No.

Post-Effective Amendment No. 2

and/or

Registration Statement Under the Investment Company Act of 1940

Amendment No.

Apollo Investment Corporation

(Exact Name of Registrant as Specified in the Charter)

9 West 57th Street

New York, NY 10019

(Address of Principal Executive Offices)

Registrant's Telephone Number, including Area Code: (212) 515-3450

Joseph D. Glatt

Cindy Z. Michel

c/o Apollo Investment Corporation

9 West 57th Street

New York, NY 10019

(Name and Address of Agent for Service)

Copies to:

Richard T. Prins, Esq.

Skadden, Arps, Slate, Meagher & Flom LLP

Four Times Square

New York, New York 10036

Approximate date of proposed public offering:

From time to time after the effective date of this Registration Statement

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, other than securities offered in connection with dividend or interest reinvestment plans, check the following box

It is proposed that this filing will become effective (check appropriate box):

when declared effective pursuant to section 8(c)

CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities Being Registered	Amount Being Registered	Proposed Maximum Offering Price per Unit	Proposed Maximum Aggregate Offering Price	Amount of Registration Fee
Common Stock, \$0.001 par value per share (2)(3)				
Preferred Stock, \$0.001 par value per share (2)				
Subscription Rights (2)				
Warrants (4)				
Debt Securities (5)				
Units (6)				
Purchase Contracts (7)				
Total (8)			\$1,500,000,000 (8)	\$174,300 (1)(9)

(1) Estimated pursuant to Rule 457(o) under the Securities Act of 1933, as amended, solely for the purpose of determining the registration fee. The proposed maximum offering price per security will be determined, from time to time, by the Registrant in connection with the sale by the Registrant of the securities registered under this registration statement. Prior to the initial filing of this registration statement, \$1,045,720,000 aggregate principal amount of securities remained registered and unsold pursuant to Registration Statement No. 333-189817, which was initially filed by the Registrant on July 5, 2013. Pursuant to Rule 457(p), \$142,637 of the total filing fee of \$174,300 required in connection with the initial registration of \$1,500,000,000 aggregate principal amount of securities under this registration statement was offset against the \$142,637 filing fee associated with the unsold securities registered under Registration Statement No. 333-189817, and an additional \$31,663 was paid in connection with the initial filing of this registration statement. Upon effectiveness of this registration statement, the offering of securities pursuant to Registration Statement No. 333-189817 was terminated.

(2) Subject to Note 8 below, there is being registered hereunder an indeterminate principal amount of common stock or preferred stock, or subscription rights to purchase shares of common stock as may be sold, from time to time separately or as units in combination with other securities registered hereunder.

(3) Includes such indeterminate number of shares of common stock as may, from time to time, be issued upon conversion or exchange of other securities registered hereunder, to the extent any such securities are, by their terms, convertible or exchangeable for common stock.

(4) Subject to Note 8 below, there is being registered hereunder an indeterminate principal amount of warrants as may be sold, from time to time, representing rights to purchase common stock, preferred stock or debt securities.

(5) Subject to Note 8 below, there is being registered hereunder an indeterminate principal amount of debt securities as may be sold, from time to time. If any debt securities are issued at an original issue discount, then the offering price shall be in such greater principal amount as shall result in an aggregate price to investors not to exceed \$1,500,000,000.

(6) Subject to Note 8 below, there is being registered hereunder an indeterminate principal amount of units issuable upon conversion or exchange of securities registered hereunder to the extent any such securities, are, by their terms convertible into or exchangeable for units, including upon the exercise of warrants or delivery upon settlement of purchase contracts. Each unit may consist of a combination of any two or more of the securities being registered hereby or debt obligations of third parties, including U.S. Treasury securities.

(7) Subject to Note 8 below, there is being registered hereunder an indeterminate principal amount of purchase contracts issuable upon conversion or exchange of securities registered hereunder to the extent any such securities are, by their terms convertible into or exchangeable for purchase contracts. Each purchase contract obligates the registrant to sell, and the holder thereof to purchase, an indeterminate number of debt securities, common stock, preferred stock or other securities registered hereunder.

(8)

In no event will the aggregate offering price of all securities issued from time to time pursuant to this registration statement exceed \$1,500,000,000.

(9) Previously paid.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until the Registration Statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer and sale is not permitted.

Apollo Investment Corporation is a closed-end, externally managed, non-diversified management investment company that has elected to be treated as a business development company, or BDC, under the Investment Company Act of 1940, or 1940 Act. Our investment objective is to generate current income and capital appreciation. We invest primarily in various forms of debt investments including secured and unsecured debt, loan investments and/or equity in private middle market companies. We may also invest in the securities of public companies and structured products such as collateralized loan obligations and credit-linked notes. We fund a portion of our investment with borrowed money, a practice commonly known as leverage. We can offer no assurances that we will continue to achieve our objective.

Apollo Investment Management, L.P., a wholly-owned subsidiary of Apollo Global Management, LLC, a leading global alternative investment manager, serves as our investment adviser. Apollo Investment Administration, LLC provides the administrative services necessary for us to operate.

We may offer, from time to time, in one or more offerings, together or separately, up to \$1,500,000,000 of our common stock, preferred stock, debt securities, units, subscription rights, purchase contracts or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, which we refer to, collectively, as the “securities.” The securities may be offered at prices and on terms to be described in one or more supplements to this prospectus.

Our common stock is quoted on The Nasdaq Global Select Market under the symbol “AINV.” The last reported closing price for our common stock on December 16, 2016 was \$6.15 per share.

This prospectus, and the accompanying prospectus supplement, contains important information you should know before investing in our securities. Please read it before you invest and keep it for future reference. We file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission. This information is available free of charge by contacting us at 9 West 57th Street, New York, NY 10019 or by calling us collect at (212) 515-3450 or on our website at www.apolloic.com. The SEC also maintains a website at www.sec.gov that contains such information free of charge.

Investing in our securities involves a high degree of risk and is highly speculative. Before buying any securities, you should read the discussion of the material risks of investing in our securities in “Risk Factors” beginning on page 8 of this prospectus.

We invest in securities that have been rated below investment grade by independent rating agencies or that would be rated below investment grade if they were rated. These securities, which are often referred to as “junk” or “high yield,” have predominantly speculative characteristics with respect to the issuer’s capacity to pay interest and repay principal. They may also be difficult to value and illiquid.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

This prospectus may not be used to consummate sales of securities unless accompanied by a prospectus supplement.

The date of this Prospectus is _____, 2016.

Table of Contents

You should rely only on the information contained in this prospectus and the accompanying prospectus supplement. We have not authorized anyone to provide you with additional information, or information different from that contained in this prospectus and the accompanying prospectus supplement. If anyone provides you with different or additional information, you should not rely on it. We are offering to sell, and seeking offers to buy, securities only in jurisdictions where offers and sales are permitted. The information contained in or incorporated by reference in this prospectus and the accompanying prospectus supplement is accurate only as of the date of this prospectus or such prospectus supplement. We will update these documents to reflect material changes. Our business, financial condition, results of operations and prospects may have changed since then.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we have filed with the Securities and Exchange Commission, or the SEC, using the “shelf” registration process. Under the shelf registration process, we may offer, from time to time, up to \$1,500,000,000 of our common stock, preferred stock, debt securities, units, subscription rights, purchase contracts or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities on the terms to be determined at the time of the offering. The securities may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus provides you with a general description of the securities that we may offer. Each time we use this prospectus to offer securities, we will provide a prospectus supplement that will contain specific information about the terms of that offering. If applicable, the prospectus supplement will identify any selling stockholders acting under the terms of certain registration rights agreements we may enter into from time to time. The prospectus supplement may also add, update or change information contained in this prospectus. Please carefully read this prospectus and any prospectus supplement together with any exhibits and the additional information described under the headings “Available Information” and “Risk Factors” before you make an investment decision.

Table of Contents

PROSPECTUS SUMMARY

This summary highlights some of the information in this prospectus. It is not complete and may not contain all of the information that you may want to consider. You should read carefully the more detailed information set forth under “Risk Factors” and the other information included in this prospectus. In this prospectus and any accompanying prospectus supplement, except where the context suggests otherwise, the terms “we”, “us”, “our”, “Company” and “Apollo Investment” refer to Apollo Investment Corporation; “Apollo Investment Management”, “AIM” or “investment adviser” refers to Apollo Investment Management, L.P.; “Apollo Administration” or “AIA” refers to Apollo Investment Administration, LLC; and “Apollo” refers to the affiliated companies of Apollo Investment Management, L.P.

APOLLO INVESTMENT

Apollo Investment Corporation, a Maryland corporation incorporated on February 2, 2004, is a closed-end, externally managed, non-diversified management investment company that has elected to be treated as a business development company (“BDC”) under the Investment Company Act of 1940 (the “1940 Act”). In addition, for tax purposes we have elected to be treated as a regulated investment company, or RIC, under the Internal Revenue Code of 1986, as amended (the “Code”).

Our investment objective is to generate current income and capital appreciation. We invest primarily in various forms of debt investments including secured and unsecured debt, loan investments and/or equity in private middle market companies. We may also invest in the securities of public companies and structured products such as collateralized loan obligations (“CLOs”) and credit-linked notes (“CLNs”). A CLO is a form of securitization in which the cash flows of a portfolio of loans are pooled and passed on to different classes of owners in various tranches. A CLN is a note where the payment of principal and/or interest is based on the performance of one or more debt obligations. CLNs are not securitizations.

Our portfolio is comprised primarily of investments in debt, including secured and unsecured debt of private middle-market companies that, in the case of senior secured loans, generally are not broadly syndicated and whose aggregate tranche size is typically less than \$250 million. Our portfolio also includes equity interests such as common stock, preferred stock, warrants or options. In this prospectus, we use the term “middle-market” to refer to companies with annual revenues between \$50 million and \$2 billion. While our investment objective is to generate current income and capital appreciation through investments in U.S. secured and unsecured loans, other debt securities and equity, we may also invest a portion of the portfolio in other investment opportunities, including foreign securities and structured products. Most of the debt instruments we invest in are unrated or rated below investment grade, which is an indication of size, credit worthiness and speculative nature relative to the capacity to pay interest and principal. Generally, if the Company’s unrated investments were rated, they would be rated below investment grade. These securities, which are often referred to as “junk” or “high yield,” have predominantly speculative characteristics with respect to the issuer’s capacity to pay interest and repay principal. They may also be difficult to value and illiquid. AIM is our investment adviser and a wholly-owned subsidiary of Apollo Global Management, LLC (“AGM”). AGM and other affiliates manage other funds that may have investment mandates that are similar, in whole or in part, with ours. AIM and its affiliates may determine that an investment is appropriate both for us and for one or more of those other funds. In such event, depending on the availability of such investment and other appropriate factors, AIM may determine that we should invest on a side-by-side basis with one or more other funds. We make all such investments subject to compliance with applicable regulations and interpretations, and our allocation procedures. In certain circumstances negotiated co-investments may be made only in accordance with the terms of the exemptive order we received from the SEC permitting us to do so.

During the year ended March 31, 2016, we invested \$1.1 billion across 22 new and 35 existing portfolio companies primarily through a combination of primary and secondary debt investments. This compares to \$2.2 billion across 60 new and 47 existing portfolio companies during the year ended March 31, 2015. Investments sold or repaid during the year ended March 31, 2016 totaled \$1.3 billion versus \$2.3 billion during the year ended March 31, 2015. The weighted average yields on our secured debt portfolio, unsecured debt portfolio and total debt portfolio as of March 31, 2016 at our current cost basis were 11.0%, 10.7% and 11.0%, respectively. As of March 31, 2015, the yields were 11.2%, 10.9% and 11.2%, respectively. The portfolio yields may be higher than an investor’s yield on an investment in

us due to sales load and other expenses. For the year ended March 31, 2016, the total return based on the change in market price per share and taking into account dividends and distributions, if any, reinvested in accordance with the dividend reinvestment plan was (17.5)% versus 1.9% for the year ended March 31, 2015. Such returns do not reflect any sales load that stockholders may have paid in connection with their purchase of shares of our common stock. As of March 31, 2016, our portfolio consisted of 89 portfolio companies and was invested 65% in secured debt, 9% in unsecured debt, 11% in structured products and other, 3% in preferred equity, and 12% in common equity/interests and warrants measured at fair value versus 105 portfolio companies invested 60% in secured debt, 14% in unsecured debt, 11% in structured products and other, 5% in preferred equity, and 10% in common equity/interests and warrants as of March 31, 2015.

1

Table of Contents

Since the initial public offering of Apollo Investment in April 2004 and through March 31, 2016, invested capital totaled \$16.4 billion in 371 portfolio companies. Over the same period, Apollo Investment completed transactions with more than 100 different financial sponsors.

As of March 31, 2016, 47% or \$1.1 billion of our income-bearing investment portfolio is fixed rate debt and 53% or \$1.2 billion is floating rate debt, measured at fair value. On a cost basis, 47% or \$1.1 billion of our income-bearing investment portfolio is fixed rate debt and 53% or \$1.3 billion is floating rate debt. As of March 31, 2015, 48% or \$1.3 billion of our income-bearing investment portfolio was fixed rate debt and 52% or \$1.4 billion was floating rate debt, measured at fair value. On a cost basis, 50% or \$1.4 billion of our income-bearing investment portfolio was fixed rate debt and 50% or \$1.4 billion was floating rate debt.

ABOUT APOLLO INVESTMENT MANAGEMENT

AIM, our investment adviser, is led by John Hannan, James Zelter, Howard Widra, Patrick Ryan and Tanner Powell. Potential investment and disposition opportunities are generally approved by one or more committees composed of personnel across AGM, including Messrs. Zelter, Widra, Ryan and Powell, and/or by all or a majority of Messrs. Zelter, Widra, Ryan and Powell depending on the underlying investment type and/or the amount of such investment. The composition of such committees and the overall approval process for our investments may change from time to time. AIM draws upon AGM's more than 25 year history and benefits from the broader firm's significant capital markets, trading and research expertise developed through investments in many core sectors in over 200 companies since inception.

ABOUT APOLLO INVESTMENT ADMINISTRATION

In addition to furnishing us with office facilities, equipment, and clerical, bookkeeping and record keeping services, AIA, an affiliate of AGM, also oversees our financial records as well as prepares our reports to stockholders and reports filed with the SEC. AIA also performs the calculation and publication of our net asset value, the payment of our expenses and oversees the performance of various third-party service providers and the preparation and filing of our tax returns. Furthermore, AIA provides on our behalf managerial assistance to those portfolio companies to which we are required to provide such assistance.

OPERATING AND REGULATORY STRUCTURE

Our investment activities are managed by AIM and supervised by our board of directors, a majority of whom are independent of AGM and its affiliates. AIM is an investment adviser that is registered under the Investment Advisers Act of 1940, or the Advisers Act. Under our investment advisory and management agreement, we pay AIM an annual base management fee based on our average gross assets as well as an incentive fee. See "Management—Investment Advisory and Management Agreement."

As a BDC, we are required to comply with certain regulatory requirements. Also, while we are permitted to finance investments using debt, our ability to use debt is limited in certain significant respects. See "Regulation." We have elected to be treated for federal income tax purposes as a RIC under Subchapter M of the Code. For more information, see "Certain U.S. Federal Income Tax Considerations."

DETERMINATION OF NET ASSET VALUE

The net asset value per share of our outstanding shares of common stock is determined quarterly by dividing the value of our total assets minus our liabilities by the total number of our shares outstanding.

In calculating the value of our total assets, we value investments for which market quotations are readily available at such market quotations if they are deemed to represent fair value. Market quotations may be deemed not to represent fair value in certain circumstances where AIM believes that facts and circumstances applicable to an issuer, a seller or purchaser or the market for a particular security causes current market quotes to not reflect the fair value of the security. Examples of these events could include cases in which material events are announced after the close of the market on which a security is primarily traded, when a security trades infrequently causing a quoted purchase or sale price to become stale or in the event of a "fire sale" by a distressed seller. Debt and equity securities that are not publicly traded or whose market price is not readily available or whose market quotations are not deemed to represent fair value are valued at fair value as determined in good faith by, or under the direction of, our board of directors pursuant to a written valuation policy and a consistently applied valuation process utilizing the input of our investment adviser,

independent valuation firms, and the audit committee. Because there is no readily available market value for a significant portion of the investments in our portfolio, we value these portfolio investments at fair value as determined in good faith by, or under the direction of, the board of directors.

Due to the inherent uncertainty of determining the fair value of our investments, the value of our investments may differ significantly from the values that would have been used had a readily available market existed for such investments, and the differences could be material. Determination of fair values involves subjective judgments and estimates not susceptible to substantiation by auditing procedures. Accordingly, under current accounting standards, the notes to our financial statements refer to

2

Table of Contents

the uncertainty with respect to the possible effect of such valuations, and any change in such valuations, on our financial statements. For more information, see “Determination of Net Asset Value.”

USE OF PROCEEDS

Unless otherwise specified in a prospectus supplement, we intend to use the net proceeds from the sale of our securities pursuant to this prospectus for general corporate purposes, which include investing in portfolio companies in accordance with our investment objective and strategies and repaying indebtedness incurred under our senior credit facility.

We anticipate that substantially all of the net proceeds of an offering of securities pursuant to this prospectus will be used for the above purposes within two years, depending on the availability of appropriate investment opportunities consistent with our investment objective and market conditions. Our portfolio is comprised primarily of investments in debt, including secured and unsecured debt of private middle market companies that, in the case of senior secured loans, generally are not broadly syndicated and whose aggregate tranche size is typically less than \$250 million. Our portfolio also includes equity interests such as common stock, preferred stock, warrants or options. Pending such investments, we will use the net proceeds of an offering to invest in cash equivalents, U.S. government securities and other high-quality debt investments that mature in one year or less from the date of investment, to reduce then-outstanding obligations under our credit facility or for other general corporate purposes. The supplement to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering. For more information, see “Use of Proceeds.”

DISTRIBUTIONS ON COMMON STOCK

We intend to continue to pay dividends or make other distributions on a quarterly basis to our common stockholders, however, we may not be able to maintain the current level of distribution payments, due to including, but not limited to, regulatory requirements. Our quarterly distributions, if any, will be determined by our board of directors. We expect that our distributions to stockholders generally will be from accumulated net investment income and from net realized capital gains, as applicable, although a portion may represent a return of capital. For more information, see “Distributions.”

DIVIDENDS ON PREFERRED STOCK

We may issue preferred stock from time to time, although we have no immediate intention to do so. If we issue shares of preferred stock, holders of such preferred stock will be entitled to receive cash dividends at an annual rate that will be fixed or will vary for the successive dividend periods for each series. In general, the dividend periods for fixed rate preferred stock will be quarterly.

DIVIDEND REINVESTMENT PLAN

We have adopted an “opt-out” dividend reinvestment plan that provides for reinvestment of our dividend distributions on behalf of our stockholders, unless a stockholder elects to receive cash. As a result, if our board of directors authorizes, and we declare, a cash dividend, then our stockholders who have not “opted out” of our dividend reinvestment plan will have their cash dividends automatically reinvested in additional shares of our common stock, rather than receiving the cash dividends. A registered stockholder must notify our transfer agent in writing in order to “opt-out” of the dividend reinvestment plan. For more information, see “Dividend Reinvestment Plan.”

PLAN OF DISTRIBUTION

We may offer, from time to time, up to \$1,500,000,000 of our common stock, preferred stock, debt securities, units, subscription rights, purchase contracts or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, on terms to be determined at the time of the offering.

Securities may be offered at prices and on terms described in one or more supplements to this prospectus directly to one or more purchasers, through agents designated from time to time by us, or to or through underwriters or dealers. The supplement to this prospectus relating to the offering will identify any agents or underwriters involved in the sale of our securities, and will set forth any applicable purchase price, fee and commission or discount arrangement or the basis upon which such amount may be calculated. In compliance with the guidelines of the Financial Industry Regulatory Authority, Inc. (“FINRA”), the maximum compensation to the underwriters or dealers in connection with the sale of our securities pursuant to this prospectus and the accompanying supplement to this prospectus may not exceed

8% of the aggregate offering price of the securities as set forth on the cover page of the supplement to this prospectus. We may not sell securities pursuant to this prospectus without delivering a prospectus supplement describing the method and terms of the offering of such securities. For more information, see “Plan of Distribution.”

3

Table of Contents

CONTINUED USE OF LEVERAGE

The availability of leverage depends upon the economic environment. Given current market conditions, there can be no assurance that we will be able to utilize leverage as anticipated, if at all, and we may determine or be required to reduce or eliminate our leverage over time. The current global economic environment, the potential systemic risk arising from illiquidity and rapid de-leveraging in the financial system at large may continue to contribute to market volatility and may have long-term effects on the U.S. and international financial markets. We cannot predict how long the financial markets and economic environment will continue to be affected by these events and cannot predict the effects of these or similar events.

OUR CORPORATE INFORMATION

Our administrative and principal executive offices are located at 730 Fifth Avenue, New York, NY 10019 and 9 West 57th Street, New York, NY 10019, respectively. Our common stock is quoted on The Nasdaq Global Select Market under the symbol "AINV." Our Internet website address is www.apolloic.com. Information contained on our website is not incorporated by reference into this prospectus and you should not consider information contained on our website to be part of this prospectus.

Table of Contents

FEES AND EXPENSES

The following table is intended to assist you in understanding the costs and expenses that an investor in shares of our common stock will bear directly or indirectly based upon the assumptions set forth below. The following table and example should not be considered a representation of our future expenses. Actual expenses may be greater or less than shown. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by “you,” “us” or “Apollo Investment,” or that “we” will pay fees or expenses, common stockholders will indirectly bear such fees or expenses as investors in Apollo Investment.

Stockholder transaction expenses:

Sales load (as a percentage of offering price)	—	% (1)
Offering expenses (as a percentage of offering price)	—	% (2)
Dividend reinvestment plan expenses	—	% (3)
Total common stockholder transaction expenses (as a percentage of offering price)	None	

Annual expenses (as percentage of net assets attributable to common stock) (4):

Management fees	3.45%	(5)
Incentive fees payable under investment advisory and management agreement	1.88%	(6)
Interest and other debt expenses on borrowed funds	3.74%	(7)
Other expenses	1.33%	(8)

Total annual expenses	10.40	% (9)
-----------------------	-------	-------

Example

The following example demonstrates the projected dollar amount of total cumulative expenses that would be incurred over various periods with respect to a hypothetical investment in our common stock. These dollar amounts are based upon the assumption that our annual operating expenses (other than performance-based incentive fees) and leverage would remain at the levels set forth in the table above. Transaction expenses are not included in the following example. In the event that shares of our common stock to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will restate this example to reflect the applicable sales load.

	1 year	3 years	5 years	10 years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return	\$ 84	\$ 242	\$ 390	\$ 716

While the example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. Assuming a 5% annual return, the incentive fee under the investment advisory and management agreement may not be earned or payable and is not included in the example. This illustration assumes that we will not realize any capital gains computed net of all realized capital losses and gross unrealized capital depreciation in any of the indicated time periods. If we achieve sufficient returns on our investments, including through the realization of capital gains, to trigger an incentive fee of a material amount, our expenses, and returns to our investors, would be higher. In addition, while the example assumes reinvestment of all dividends and distributions at net asset value, participants in our dividend reinvestment plan will receive a number of shares of our common stock, determined by dividing the total dollar amount of the dividend payable to a participant by the market price per share of our common stock at the close of trading on the valuation date for the dividend. See “Dividend Reinvestment Plan” for additional information regarding our dividend reinvestment plan.

Assuming, however, that the incentive fee under the investment advisory and management agreement is earned and payable, the following example demonstrates the projected dollar amount of total cumulative expenses that would be incurred over various periods with respect to a hypothetical investment in our common stock.

1 year 3 years 5 years 10 years

You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return

\$ 101 \$ 253 \$ 287 \$ 454 \$ 798

These examples and the expenses in the table above should not be considered a representation of our future expenses, and actual expenses may be greater or less than those shown.

5

Table of Contents

- (1) In the event that the securities to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will disclose the applicable sales load.
- (2) The related prospectus supplement will disclose the estimated amount of offering expenses, the offering price and the offering expenses borne by us as a percentage of the offering price.
- (3) The expenses of the dividend reinvestment plan per share are included in "Other expenses."
- (4) "Net assets attributable to common stock" equals net assets as of September 30, 2016.

The contractual management fee is calculated at an annual rate of 2.00% of our average total assets. Annual expenses are based on levels consistent with the quarter ended September 30, 2016, which are based on prior year amounts adjusted for new debt and equity issuances. For more detailed information about our computation of

- (5) average total assets, please see Note 3 of our financial statements for the quarter ended September 30, 2016. Effective April 1, 2016 through March 31, 2017, our investment adviser has agreed to waive 25% of its base management fee so that during the waiver period the management fee is reduced from 2% to 1.5%. Such waiver is not reflected in the management fees set forth in this table or in the examples above.

Assumes that annual incentive fees earned by our investment adviser, AIM, remain consistent with our current fee structure adjusted for new debt and equity issuances, if applicable. AIM earns incentive fees consisting of two parts. The first part, which is payable quarterly in arrears, is based on our pre-incentive fee net investment income for the immediately preceding calendar quarter. Pre-incentive fee net investment income, expressed as a rate of return on the value of our net assets at the end of the immediately preceding calendar quarter, is compared to the rate of 1.75% quarterly (7% annualized). Our net investment income used to calculate this part of the incentive fee is also included in the amount of our gross assets used to calculate the 2% base management fee (see footnote 5 above). Accordingly, we pay AIM an incentive fee as follows: (1) no incentive fee in any calendar quarter in which our pre-incentive fee net investment income does not exceed 1.75%, which we commonly refer to as the performance threshold; (2) 100% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the performance threshold but does not exceed 2.1875% in any calendar quarter; and (3) 20% of the amount of our pre-incentive fee net investment income, if any, that exceeds 2.1875% in any calendar quarter. These calculations are appropriately pro rated for any period of less than three months. The effect of the fee calculation described above is that if pre-incentive fee net investment income is equal to or exceeds 2.1875%, AIM will receive a fee of 20% of our pre-incentive fee net investment income for the quarter. You should be aware that a rise in the general level of interest rates can be expected to lead to higher interest rates applicable to our debt investments. Accordingly, an increase in interest rates would make it easier for us to meet or exceed the incentive fee performance threshold and may result in a substantial increase of the amount of incentive fees payable to our investment adviser with respect to pre-incentive fee net investment income. Furthermore, since the performance threshold is based on a percentage of our net asset value, decreases in our net asset value make it easier to achieve the performance threshold, holding portfolio size and other assumptions constant. The second part of the incentive fee will equal 20% of our realized capital gains for the calendar year, if any, computed net of all realized capital losses and unrealized capital depreciation (and incorporating unrealized depreciation on a gross investment-by-investment basis) and is payable in arrears at the end of each calendar year. The net incentive fees are currently entirely attributable to net investment income incentive fees.

Effective April 1, 2016 through March 31, 2017 ("waiver period"), AIM has agreed to waive up to 25% of its performance-based incentive fee so that during the waiver period the incentive fee on pre-incentive fee net investment income ("incentive fee") could be accrued at as low a rate as 15% to the extent the Company experiences cumulative net realized and change in unrealized losses during the waiver period ("cumulative net losses"). Such waiver is not reflected in the incentive fees set forth in this table or in the examples above.

During the waiver period, assuming that the investment adviser would earn incentive fees at the 20% rate provided in the Investment Advisory and Management Agreement, the incentive fee will initially be accrued at the rate of 17.5% and will be adjusted as of the end of each quarter. The incentive fee accrual will be increased up to a maximum rate of

20% to the extent that the Company experiences cumulative net realized and change in unrealized gains (“cumulative net gains”) during the period and will be decreased down to a minimum rate of 15% to the extent that the Company experiences cumulative net losses during the period. The inclusion of cumulative net gains and cumulative net losses will be measured on a cumulative basis from April 1, 2016 through the end of each quarter during the waiver period. Any cumulative net gains will result in a dollar for dollar increase in the incentive fee payable up to a maximum rate of 20% and any cumulative net losses will result in a dollar for dollar decrease in the incentive fee payable down to a minimum rate of 15%.

If the resulting incentive fee rate is less than 20%, the percentage at which the investment adviser’s 100% catch-up is complete will also be reduced ratably from 2.1875% (8.75% annualized) to as low as 2.06% (8.24% annualized).

6

Table of Contents

For a more detailed discussion of the calculation of this fee, see “Management—Investment Advisory and Management Agreement.”

Our interest and other debt expenses are based on borrowing levels and interest rates consistent with the levels during the quarter ended September 30, 2016, which are based on prior amounts adjusted for new debt issuances. As of September 30, 2016, we had \$926 million available and \$368 million in borrowings outstanding under our \$1.31 billion senior secured credit facility and \$1.015 billion of total debt outstanding. As of September 30, 2016, the Company had \$16.3 million in standby letters of credit issued through the senior secured credit facility. The (7) amount available for borrowing under the senior secured credit facility is reduced by any standby letters of credit issued. On April 24, 2015, the Company amended and restated the senior secured credit facility. For more information, see “Risk Factors—Risks relating to our business and structure—We fund a portion of our investments with borrowed money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources” in this base prospectus.

Includes our estimated overhead expenses, including payments under the administration agreement based on our (8) allocable portion of overhead and other expenses incurred by AIA in performing its obligations under the administration agreement. See “Management—Administration Agreement” in this base prospectus.

“Total annual expenses” as a percentage of net assets attributable to common stock are higher than the total annual expenses percentage would be for a company that is not leveraged. We borrow money to leverage our net assets and increase our total assets. The SEC requires that the “Total annual expenses” percentage be calculated as a (9) percentage of net assets (defined as total assets less indebtedness), rather than the total assets, including assets that have been funded with borrowed monies. If the “Total annual expenses” percentage were calculated instead as a percentage of total assets, our “Total annual expenses” would be 6.04% of total assets.

Table of Contents

RISK FACTORS

Before you invest in our shares, you should be aware of various risks, including those described below and those set forth under the caption “Recent Developments” in the accompanying prospectus supplement. You should carefully consider these risk factors, together with all of the other information included in this base prospectus and accompanying prospectus supplement, before you decide whether to make an investment in our securities. The risks set out below and in the accompanying prospectus supplement are not the only risks we face. If any of the following events occur, our business, financial condition and results of operations could be materially adversely affected. In such case, our net asset value and the trading price of our common stock could decline or the value of our preferred stock, debt securities, units, subscription rights, purchase contracts or warrants may decline, and you may lose all or part of your investment.

Risks Relating to the Current Environment

Rising interest rates may adversely affect the value of our portfolio investments which could have an adverse effect on our business, financial condition and results of operations.

Our debt investments may be based on floating rates, such as the London Interbank Offered Rate (“LIBOR”), the Euro Interbank Offered Rate (“EURIBOR”), the federal funds rate or the prime rate. General interest rate fluctuations may have a substantial negative impact on our investments, the value of our common stock and our rate of return on invested capital. A reduction in the interest rates on new investments relative to interest rates on current investments could also have an adverse impact on our net interest income. An increase in interest rates could decrease the value of any investments we hold which earn fixed interest rates, including subordinated loans, senior and junior secured and unsecured debt securities and loans and high-yield bonds, and also could increase our interest expense, thereby decreasing our net income. Also, an increase in interest rates available to investors could make investment in our common stock less attractive if we are not able to increase our dividend rate, which could reduce the value of our common stock.

Because we have borrowed money, and may issue preferred stock to finance investments, our net investment income depends, in part, upon the difference between the rate at which we borrow funds or pay distributions on preferred stock and the rate that our investments yield. As a result, we can offer no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income.

You should also be aware that a change in the general level of interest rates can be expected to lead to a change in the interest rate we receive on many of our debt investments. Accordingly, a change in the interest rate could make it easier for us to meet or exceed the performance threshold and may result in a substantial increase in the amount of incentive fees payable to our investment adviser with respect to the portion of the incentive fee based on income. Price declines and illiquidity in the corporate debt markets have adversely affected, and may in the future adversely affect, the fair value of our portfolio investments, reducing our net asset value through increased net unrealized depreciation.

As a BDC, we are required to carry our investments at market value or, if no market value is ascertainable, at fair value as determined in good faith by or under the direction of our Board of Directors. Decreases in the market values or fair values of our investments are recorded as unrealized depreciation, which reduces our net asset value.

Depending on market conditions, we could incur substantial realized losses and may suffer additional unrealized losses in future periods, which could have a material adverse impact on our business, financial condition and results of operations.

Capital markets may experience periods of disruption and instability. Such market conditions may materially and adversely affect debt and equity capital markets in the United States and abroad, which may have a negative impact on our business and operations.

From time to time, capital markets may experience periods of disruption and instability. For example, between 2007 and 2009, the global capital markets experienced an extended period of disruption as evidenced by a lack of liquidity in the debt capital markets, write-offs in the financial services sector, the re-pricing of credit risk and the failure of certain major financial institutions. Despite actions of the United States, federal government and foreign governments,

these events contributed to worsening general economic conditions that materially and adversely impacted the broader financial and credit markets and reduced the availability of debt and equity capital for the market as a whole and financial services firms in particular. While market conditions have largely recovered from the events of 2008 and 2009, there have been continuing periods of volatility, some lasting longer than others. For example, in the latter half of 2015 and continuing through the date of this prospectus, economic uncertainty and market volatility in China and geopolitical unrest in the Middle East, combined with continued volatility of oil prices, among other factors, have caused disruption in the capital markets, including the markets in which we participate. There can be no assurance that these market conditions will not continue or worsen in the future. During such market disruptions, we may have difficulty raising debt or equity capital especially as a result of regulatory constraints.

8

Table of Contents

Market conditions may in the future make it difficult to extend the maturity of or refinance our existing indebtedness, including the final maturity of our senior secured credit facility in April 2020, and any failure to do so could have a material adverse effect on our business. The illiquidity of our investments may make it difficult for us to sell such investments if required. As a result, we may realize significantly less than the value at which we have recorded our investments.

Given the extreme volatility and dislocation that the capital markets have historically experienced, many BDCs have faced, and may in the future face, a challenging environment in which to raise capital. We may in the future have difficulty accessing debt and equity capital, and a severe disruption in the global financial markets or deterioration in credit and financing conditions could have a material adverse effect on our business, financial condition and results of operations. In addition, significant changes in the capital markets, including the extreme volatility and disruption, have had, and may in the future have, a negative effect on the valuations of our investments and on the potential for liquidity events involving our investments. An inability to raise capital, and any required sale of our investments for liquidity purposes, could have a material adverse impact on our business, financial condition or results of operations. AIM monitors developments and seeks to manage our investments in a manner consistent with achieving our investment objective, but there can be no assurance that it will be successful in doing so; and AIM may not timely anticipate or manage existing, new or additional risks, contingencies or developments, including regulatory developments in the current or future market environment.

Volatility in the global financial markets resulting from relapse of the Eurozone crisis, geopolitical developments in Eastern Europe, turbulence in the Chinese stock markets and global commodity markets, the United Kingdom's vote to leave the European Union or otherwise could have a material adverse effect on our business, financial condition and results of operations.

Volatility in the global financial markets could have an adverse effect on the United States and could result from a number of causes, including a relapse in the Eurozone crisis, geopolitical developments in Eastern Europe, turbulence in the Chinese stock markets and global commodity markets or otherwise. The effects of the Eurozone crisis, which began in late 2009 as part of the global economic and financial crisis, continued to impact the global financial markets through 2015. Numerous factors continued to fuel the Eurozone crisis, including continued high levels of government debt, the undercapitalization and liquidity problems of many banks in the Eurozone and relatively low levels of economic growth. These factors made it difficult or impossible for some countries in the Eurozone, including Greece, Ireland and Portugal, to repay or refinance their debt without the assistance of third parties. As a combination of austerity programs, debt write-downs and the European Central Bank's commitment to restore financial stability to the Eurozone and the finalization of the primary European Stability Mechanism bailout fund, in 2013 and into 2014 interest rates began to fall and stock prices began to increase. Although these trends helped to stabilize the effects of the Eurozone crisis in the first half of 2014, the underlying causes of the crisis were not completely eliminated. As a result, the financial markets relapsed toward the end of 2014. In particular, Greece's newly elected government, which campaigned against austerity measures, has been unable to reach an acceptable solution to the country's debt crisis with the European Union, and in June 2015, Greece failed to make a scheduled debt repayment to the International Monetary Fund, falling into arrears. Following further unsuccessful negotiations between the government of Greece and the European Union to solve the Greek debt crisis, on July 5, 2015, Greek voters rejected a bailout package submitted by the European Commission, the European Central Bank and the International Monetary Fund, and while the European Central Bank continues to extend credit to Greece, it is uncertain how long such support will last, whether Greece will receive and accept any future bailout packages and whether Greece will default on future payments. The result of continued defaults and the removal of credit support for Greek banks may cause Greece to exit the European Union, which could lead to significant economic uncertainty and abandonment of the Euro common currency, resulting in destabilization in the financial markets. Continued financial instability in Greece and in other similarly situated Eurozone countries could have a continued contagion effect on the financial markets. Stock prices in China have experienced a significant drop in the second quarter of 2015, resulting primarily from continued sell-off of shares trading in Chinese markets. The volatility has been followed by volatility in stock markets around the world,

including in the United States, as well as increased turbulence in commodity markets, such as reductions in prices of crude oil. Although the Chinese government has already taken steps to halt the collapse, it is uncertain what effect such measures will have, if any. Continued sell-off and price drops in the Chinese stock markets may have a contagion effect across the financial markets.

In addition, Russian intervention in Ukraine during 2014 significantly increased regional geopolitical tensions. In response to Russian actions, U.S. and European governments have imposed sanctions on a limited number of Russian individuals and business entities. The situation remains fluid with potential for further escalation of geopolitical tensions, increased severity of sanctions against Russian interests, and possible Russian counter-measures. Further economic sanctions could destabilize the economic environment and result in increased volatility.

On June 23, 2016, voters in the United Kingdom referendum (the “Referendum”) on the question of whether to remain or leave the European Union voted in a majority in favor of leaving the European Union (“Brexit”). This historic event is widely expected to have consequences that are both profound and uncertain for the economic and political future of the United Kingdom and the European Union, and those consequences include significant legal and business uncertainties pertaining to our investments. Due to the very recent occurrence of Brexit, the full scope and nature of the consequences are not at this time known and are unlikely to be known for a significant period of time. However, Brexit has led to significant uncertainty in the business, legal and political environment. Risks associated with the outcome of the Referendum include short and long term market volatility and currency volatility (including

Table of Contents

volatility of the value of the British pound sterling relative to the United States dollar and other currencies and volatility in global currency markets generally), macroeconomic risk to the United Kingdom and European economies, impetus for further disintegration of the European Union and related political stresses (including those related to sentiment against cross border capital movements and activities of investors like us), prejudice to financial services businesses that are conducting business in the European Union and which are based in the United Kingdom, legal uncertainty regarding achievement of compliance with applicable financial and commercial laws and regulations in view of the expected steps to be taken pursuant to or in contemplation of Article 50 of the Treaty on European Union and negotiations undertaken under Article 218 of the Treaty on the Functioning of the European Union, and the unavailability of timely information as to expected legal, tax and other regimes.

Should the economic recovery in the United States be adversely impacted by increased volatility in the global financial markets caused by continued contagion from the Eurozone crisis, developments in respect of the Russian sanctions, further turbulence in Chinese stock markets and global commodity markets, Brexit or for any other reason, loan and asset growth and liquidity conditions at U.S. financial institutions, including us, may deteriorate.

Uncertainty about the financial stability of the United States and the new presidential administration could have a significant adverse effect on our business, financial condition and results of operations.

Due to federal budget deficit concerns, S&P downgraded the federal government's credit rating from AAA to AA+ for the first time in history on August 5, 2011. Further, Moody's and Fitch had warned that they may downgrade the federal government's credit rating. Further downgrades or warnings by S&P or other rating agencies, and the United States government's credit and deficit concerns in general, could cause interest rates and borrowing costs to rise, which may negatively impact both the perception of credit risk associated with our debt portfolio and our ability to access the debt markets on favorable terms. In addition, a decreased U.S. government credit rating could create broader financial turmoil and uncertainty, which may weigh heavily on our financial performance and the value of our common stock.

In October 2014, the Federal Reserve announced that it was concluding its bond-buying program, or quantitative easing, which was designed to stimulate the economy and expand the Federal Reserve's holdings of long-term securities, suggesting that key economic indicators, such as the unemployment rate, had showed signs of improvement since the inception of the program. It is unclear what effect, if any, the conclusion of the Federal Reserve's bond-buying program will have on the value of our investments. However, it is possible that, without quantitative easing by the Federal Reserve, these developments, along with the United States government's credit and deficit concerns and the European sovereign debt crisis discussed above, could cause interest rates and borrowing costs to rise, which may negatively impact our ability to access the debt markets on favorable terms. Additionally, in July 2016, the Federal Reserve reaffirmed its view that the current target range for the federal funds rate was appropriate based on current economic conditions. However, if key economic indicators, such as the unemployment rate or inflation, do not progress at a rate consistent with the Federal Reserve's objectives, the target range for the federal funds rate may increase and cause interest rates and borrowing costs to rise, which may negatively impact our ability to access the debt markets on favorable terms.

In November 2016, the US held its Federal election and elected Donald Trump, the Republican Party nominee. Following Mr. Trump's inauguration on January 20, 2017, the Republican Party will control both the executive and legislative branches of government, which increases the likelihood that legislation will be adopted implementing the policies of the Trump administration. While campaigning, President-elect Trump made statements suggesting he may seek to adopt legislation that could significantly affect the regulation of United States financial markets. Areas subject to potential change, amendment or repeal include the Dodd-Frank Act, including the Volcker Rule and various swaps and derivatives regulations, the authority of the Federal Reserve and the Financial Stability Oversight Council, and renewed proposals to separate banks' commercial and investment banking activities. President-elect Trump also stated

he would cause the United States to withdraw from or renegotiate various trade agreements and take other actions that would change current trade policies of the United States. We cannot predict which, if any, of these actions will be taken or, if taken, their effect on the financial stability of the United States. Such actions could have a significant adverse effect on our business, financial condition and results of operations.

If AIC can no longer satisfy the conditions of Letter 12-40 (as defined below) issued by the Commodity Futures Trading Commission (the “CFTC”), AIC and AIM could be subject to additional regulatory requirements.

AIM has claimed relief available under a no-action letter (“Letter 12-40”) issued by the staff of the CFTC. Letter 12-40 relieves AIM from registering with the CFTC as the commodity pool operator (“CPO”) of AIC, provided that AIC (i) continues to be regulated by the SEC as a BDC, (ii) allocates no more than a designated percentage of its liquidation value to futures contracts, certain swap contracts and certain other derivative instruments that are within the jurisdiction of the Commodity Exchange Act (collectively, “CEA-regulated products”), and (iii) is not marketed to the public as a commodity pool or as a vehicle for trading in CEA-regulated products. If AIC can no longer satisfy the conditions of Letter 12-40, AIM could be subject to the CFTC’s CPO registration requirements, and the disclosure and operations of AIC would need to comply with all applicable regulations

Table of Contents

governing commodity pools and CPOs. If AIM were required to register as a CPO, it would also be required to become a member of the National Futures Association (“NFA”) and be subject to the NFA’s rules and bylaws. Compliance with these additional registration and regulatory requirements may increase AIM’s operating expenses, which, in turn, could result in AIC’s investors being charged additional fees.

The continued uncertainty relating to the sustainability and pace of economic recovery in the U.S. and globally could have a negative impact on our business.

Apollo Investment’s business is directly influenced by the economic cycle, and could be negatively impacted by a downturn in economic activity in the U.S. as well as globally. Fiscal and monetary actions taken by U.S. and non-U.S. government and regulatory authorities could have a material adverse impact on our business. To the extent uncertainty regarding the U.S. or global economy negatively impacts consumer confidence and consumer credit factors, our business, financial condition and results of operations could be adversely affected. Moreover, Federal Reserve policy, including with respect to certain interest rates and the decision to end its quantitative easing policy, may also adversely affect the value, volatility and liquidity of dividend and interest paying securities. Market volatility, rising interest rates and/or a return to unfavorable economic conditions could adversely affect our business.

Risks Relating to our Business and Structure

We may suffer credit losses.

Investment in small and middle-market companies is highly speculative and involves a high degree of risk of credit loss. These risks are likely to increase during volatile economic periods, as the U.S. and many other economies have experienced. See “Risks Relating to our Investments.”

We are dependent upon Apollo Investment Management’s key personnel for our future success and upon their access to AGM’s investment professionals and partners.

We depend on the diligence, skill and network of business contacts of the senior management of AIM specifically and AGM generally. Members of our senior management may depart at any time. We also depend, to a significant extent, on AIM’s access to the investment professionals and partners of AGM and the information and deal flow generated by the AGM investment professionals in the course of their investment and portfolio management activities. The senior management of AIM evaluates, negotiates, structures, closes and monitors our investments. Our future success depends on the continued service of senior members of AGM’s credit platform, including the senior management team of AIM. The departure of our senior management, any senior managers of AIM, or of a significant number of the investment professionals or partners of AGM, could have a material adverse effect on our ability to achieve our investment objective. In addition, we can offer no assurance that AIM will remain our investment adviser or that we will continue to have access to AGM’s partners and investment professionals or its information and deal flow.

Our financial condition and results of operations depend on our ability to manage future growth effectively.

Our ability to achieve our investment objective depends, in part, on our ability to grow, which depends, in turn, on AIM’s ability to identify, invest in and monitor companies that meet our investment criteria. Accomplishing this result on a cost-effective basis is largely a function of AIM’s structuring of the investment process, its ability to provide competent, attentive and efficient services to us and our access to financing on acceptable terms. The senior management team of AIM has substantial responsibilities under the investment advisory and management agreement, and with respect to certain members, in connection with their roles as officers of other AGM funds.

They may also be called upon to provide managerial assistance to our portfolio companies. These demands on their time may distract them or slow the rate of investment. In order to grow, we and AIM need to hire, train, supervise and manage new employees. Any failure to manage our future growth effectively could have a material adverse effect on our business, financial condition and results of operations.

Table of Contents

We operate in a highly competitive market for investment opportunities.

A number of entities compete with us to make the types of investments that we make. We compete with public and private funds, commercial and investment banks, commercial financing companies, other BDCs and, to the extent they provide an alternative form of financing, private equity funds. Competition for investment opportunities intensifies from time to time and may intensify further in the future. Some of our existing and potential competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions and valuation requirements that the 1940 Act imposes on us as a BDC and that the Code imposes on us as a RIC. We cannot assure you that the competitive pressures we face will not have a material adverse effect on our business, financial condition and results of operations. Also, as a result of this existing and potentially increasing competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we can offer no assurance that we will be able to identify and make investments that are consistent with our investment objective.

We do not seek to compete primarily based on the interest rates we offer, and we believe that some of our competitors make loans with interest rates that are comparable to or lower than the rates we offer.

We may lose investment opportunities if we do not match our competitors' pricing, terms and structure. If we match our competitors' pricing, terms and structure, we may experience decreased net interest income and increased risk of credit loss.

Any failure on our part to maintain our status as a BDC would reduce our operating flexibility.

If we do not remain a BDC, we might be regulated as a closed-end investment company under the 1940 Act, which would subject us to substantially more regulatory restrictions under the 1940 Act and correspondingly decrease our operating flexibility.

We will be subject to corporate-level income tax if we are unable to maintain our status as a RIC.

To maintain our RIC status under the Code, we must meet certain source-of-income, asset diversification and annual distribution requirements. The annual distribution requirement for a RIC generally is satisfied if we distribute at least 90% of our "investment company taxable income" (generally, our ordinary income and the excess, if any, of our net short-term capital gains over our net long-term capital losses), if any, to our stockholders on an annual basis. To the extent we use debt financing, we are subject to certain asset coverage ratio requirements and other financial covenants under loan and credit agreements, and could in some circumstances also become subject to such requirements under the 1940 Act, that could, under certain circumstances, restrict us from making distributions necessary to maintain our status as a RIC. If we are unable to obtain cash from other sources, we may fail to maintain our status as a RIC and, thus, may be subject to corporate-level income tax. To maintain our status as a RIC, we must also meet certain asset diversification requirements at the end of each calendar quarter. Failure to meet these tests may result in our having to dispose of certain investments quickly in order to prevent the loss of RIC status. Because most of our investments are in private companies, any such dispositions could be made at disadvantageous prices and may result in substantial losses. If we fail to maintain our status as a RIC for any reason and become subject to corporate-level income tax, the resulting corporate-level taxes could substantially reduce our net assets, the amount of income available for distribution and the amount of our distributions. Such a failure would have a material adverse effect on us and our stockholders.

To maintain our status as a RIC in a subsequent year, we would be required to distribute to our stockholders our earnings and profits attributable to non-RIC years. In addition, if we failed to maintain our status as a RIC for a period greater than two taxable years, then we would be required to elect to recognize and pay tax on any net built-in gain (the excess of aggregate gain, including items of income, over aggregate loss that would have been realized if we had been liquidated) or, alternatively, be subject to taxation on such built-in gain recognized for a period of up to ten years, in order to qualify as a RIC in a subsequent year.

We may have difficulty paying our required distributions if we recognize income before or without receiving cash representing such income.

For U.S. federal income tax purposes, we include in income certain amounts that we have not yet received in cash, such as original issue discount, which may arise if, for example, we receive warrants in connection with the making of a loan or payment-in-kind interest, which represents contractual interest added to the loan balance and typically due at the end of the loan term or possibly in other circumstances. Such original issue discount is included in income before we receive any corresponding cash payments and could be significant relative to our overall investment activities.

Loans structured with these features may represent a higher level of credit risk than loans the interest on which must be paid in cash at regular intervals. We also may be required to include in income certain other amounts that we do not receive in cash.

Table of Contents

The incentive fee payable by us that relates to our net investment income is computed and paid on income that may include some interest that has been accrued but not yet received in cash. If a portfolio company defaults on a loan, it is possible that accrued interest previously used in the calculation of the incentive fee will become uncollectible.

Consequently, while we may make incentive fee payments on income accruals that we may not collect in the future and with respect to which we do not have a formal clawback right against our investment adviser per se, the amount of accrued income written off in any period will reduce the income in the period in which such write-off was taken and thereby reduce such period's incentive fee payment. For the period between April 1, 2012 and March 31, 2016, the portion of the incentive fee that is attributable to deferred interest, such as PIK income, will not be paid to AIM until the Company receives such deferred interest in cash. The accrual of incentive fees shall be reversed if such interest is reversed in connection with any write-off or similar treatment of the investment.

Since in certain cases we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the tax requirement to distribute at least 90% of our investment company taxable income to maintain our status as a RIC. Accordingly, we may have to sell some of our investments at times we would not consider advantageous, raise additional debt or equity capital or reduce new investment originations in order to meet distribution and/or leverage requirements.

Regulations governing our operation as a BDC affect our ability to raise, and the way in which we raise, additional capital.

We may issue debt securities or preferred stock and/or borrow money from banks or other financial institutions, which we refer to collectively as "senior securities," up to the maximum amount permitted by the 1940 Act. Under the provisions of the 1940 Act, we are permitted, as a BDC, to issue senior securities only in amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200% after each issuance of senior securities. If the value of our assets declines, we may be unable to maintain asset coverage above the 200% level. If that happens, the contractual arrangements governing these securities may require us to sell a portion of our investments and, depending on the nature of our leverage, repay a portion of our indebtedness at a time when such sales may be disadvantageous.

BDCs may issue and sell common stock at a price below net asset value per share only in limited circumstances, one of which is during the one-year period after stockholder approval. In the past, our stockholders have approved a plan so that during the subsequent 12 month period we could, in one or more public or private offerings of our common stock, sell or otherwise issue shares of our common stock at a price below the then current net asset value per share, subject to certain conditions including parameters on the level of permissible dilution, approval of the sale by a majority of our independent directors and a requirement that the sale price be not less than approximately the market price of the shares of our common stock at specified times, less the expenses of the sale. Although we currently do not have such authority, we may in the future seek to receive such authority on terms and conditions set forth in the corresponding proxy statement. There is no assurance such approvals will be obtained.

In the event we sell, or otherwise issue, shares of our common stock at a price below net asset value per share, existing stockholders will experience net asset value dilution and the investors who acquire shares in such offering may thereafter experience the same type of dilution from subsequent offerings at a discount. For example, if we sell an additional 10% of our common shares at a 5% discount from net asset value, a stockholder who does not participate in that offering for its proportionate interest will suffer net asset value dilution of up to 0.5% or \$5 per \$1,000 of net asset value.

In addition to issuing securities to raise capital as described above, we may in the future securitize our loans to generate cash for funding new investments. To securitize loans, we may create a wholly-owned subsidiary, contribute a pool of loans to the subsidiary and have the subsidiary issue primarily investment grade debt securities to purchasers who we would expect would be willing to accept a substantially lower interest rate than the loans earn. We would retain all or a portion of the equity in the securitized pool of loans. Our retained equity would be exposed to any losses on the portfolio of loans before any of the debt securities would be exposed to such losses. An inability to successfully securitize our loan portfolio could limit our ability to grow our business and fully execute our business strategy and adversely affect our earnings, if any. Moreover, the successful securitization of our loan portfolio might expose us to losses as the residual loans in which we do not sell interests will tend to be those that are riskier and more apt to

generate losses.

We currently use borrowed funds to make investments and are exposed to the typical risks associated with leverage. We are exposed to increased risk of loss due to our use of debt to make investments. A decrease in the value of our investments will have a greater negative impact on the value of our common stock than if we did not use debt. Our ability to make distributions will be restricted if we fail to satisfy certain of our asset coverage ratios and other financial covenants and any amounts that we use to service our indebtedness are not available for distributions to our common stockholders.

13

Table of Contents

The agreements governing certain of our debt instruments require us to comply with certain financial and operational covenants. These covenants require us to, among other things, maintain certain financial ratios, including asset coverage and minimum stockholders' equity. As of March 31, 2016, we were in compliance with these covenants. However, our continued compliance with these covenants depends on many factors, some of which are beyond our control. In the event of deterioration in the capital markets and pricing levels subsequent to this period, net unrealized loss in our portfolio may increase in the future. Absent an amendment to our Senior Secured Facility (as defined below), continued unrealized loss in our investment portfolio could result in non-compliance with certain covenants. Accordingly, there are no assurances that we will continue to comply with these covenants. Failure to comply with these covenants would result in a default which, if we were unable to obtain a waiver from the debt holders, could accelerate repayment under the instruments and thereby have a material adverse impact on our liquidity, financial condition, results of operations and ability to make distributions.

Our current and future debt securities are and may be governed by an indenture or other instrument containing covenants restricting our operating flexibility. We, and indirectly our stockholders, bear the cost of issuing and servicing such securities. Our currently outstanding convertible securities have, and any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our common stock.

We fund a portion of our investments with borrowed money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us.

Borrowings and other types of financing, also known as leverage, magnify the potential for gain or loss on amounts invested and, therefore, increase the risks associated with investing in our securities. Our lenders and debt holders have fixed dollar claims on our assets that are superior to the claims of our common stockholders or any preferred stockholders. If the value of our assets increases, then leveraging would cause the net asset value to increase more sharply than it would have had we not leveraged. Conversely, if the value of our assets decreases, leveraging would cause net asset value to decline more sharply than it otherwise would have had we not leveraged. Similarly, any increase in our income in excess of consolidated interest payable on the borrowed funds would cause our net income to increase more than it would without the leverage, while any decrease in our income would cause net income to decline more sharply than it would have had we not borrowed. Such a decline could negatively affect our ability to make distributions to our common stockholders. Leverage is generally considered a speculative investment technique. We may in the future determine to fund a portion of our investments with preferred stock, which would magnify the potential for gain or loss and the risks of investing in us in the same way as our borrowings.

Preferred stock, which is another form of leverage, has the same risks to our common stockholders as borrowings because the dividends on any preferred stock we issue must be cumulative. Payment of such dividends and repayment of the liquidation preference of such preferred stock must take preference over any dividends or other payments to our common stockholders, and preferred stockholders are not subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference.

Changes in interest rates may affect our cost of capital and net investment income.

Because we borrow money, and may issue preferred stock to finance investments, our net investment income will depend, in part, upon the difference between the rate at which we borrow funds or pay dividends on preferred stock and the rate at which we invest these funds. As a result, we can offer no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income. In periods of rising interest rates, our cost of funds would increase except to the extent we have issued fixed rate debt or preferred stock, which could reduce our net investment income. Our long-term fixed-rate investments are financed primarily with equity and long-term debt. We may use interest rate risk management techniques in an effort to limit our exposure to interest rate fluctuations. Such techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act and applicable commodities laws. Interest rate hedging activities do not protect against credit risk.

Table of Contents

We have analyzed the potential impact of changes in interest rates on interest income net of interest expense. Assuming no changes to our balance sheet as of March 31, 2016, a hypothetical one percent increase in LIBOR on our floating rate assets and liabilities would decrease our earnings by less than one cent per average share over the next twelve months. Assuming no changes to our balance sheet as of March 31, 2016, a hypothetical two percent increase in LIBOR on our floating rate assets and liabilities would increase our earnings by two cents per average share over the next twelve months. Assuming no changes to our balance sheet as of March 31, 2016, a hypothetical three percent increase in LIBOR on our floating rate assets and liabilities would increase our earnings by four cents per average share over the next twelve months. Assuming no changes to our balance sheet as of March 31, 2016, a hypothetical four percent increase in LIBOR on our floating rate assets and liabilities would increase our earnings by six cents per average share over the next twelve months. In addition, we believe that our interest rate matching strategy and our ability to hedge mitigates the effects any changes in interest rates may have on our investment income. Although management believes that this is indicative of our sensitivity to interest rate changes, it does not adjust for potential changes in credit quality, size and composition of the assets on the balance sheet and other business developments that could affect net increase or decrease in net assets resulting from operations, or net income. Accordingly, no assurances can be given that actual results would not differ materially from the potential outcome simulated by this estimate. A portion of our floating rate investments may include features such as LIBOR floors. To the extent we invest in credit instruments with LIBOR floors, we may lose some of the benefits of incurring leverage. Specifically, if we issue preferred stock or debt (or otherwise borrow money), our costs of leverage will increase as rates increase. However, we may not benefit from the higher coupon payments resulting from increased interest rates if our investments in LIBOR floors and rates do not rise to levels above the LIBOR floors. In this situation, we will experience increased financing costs without the benefit of receiving higher income. This in turn may result in the potential for a decrease in the level of income available for dividends or distributions made by us. You should also be aware that a change in the general level of interest rates can be expected to lead to a change in the interest rates we receive on many of our debt investments. Accordingly, a change in interest rates could make it easier for us to meet or exceed the performance threshold and may result in a substantial increase in the amount of incentive fees payable to our investment adviser with respect to pre-incentive fee net investment income. Our business requires a substantial amount of capital to grow because we must distribute most of our income. Our business requires a substantial amount of capital. We have issued equity securities and have borrowed from financial institutions. A reduction in the availability of new capital could limit our ability to grow. We must distribute at least 90% of our investment company taxable income to maintain our regulated investment company status. As a result, any such cash earnings may not be available to fund investment originations. We expect to continue to borrow from financial institutions and issue additional debt and equity securities. If we fail to obtain funds from such sources or from other sources to fund our investments, it could limit our ability to grow, which may have an adverse effect on the value of our securities. In addition, as a BDC, our ability to borrow or issue additional preferred stock may be restricted if our total assets are less than 200% of our total borrowings and preferred stock. Many of our portfolio investments are recorded at fair value as determined in good faith by or under the direction of our Board of Directors and, as a result, there is uncertainty as to the value of our portfolio investments. A large percentage of our portfolio investments are not publicly traded. The fair value of these investments may not be readily determinable. We value these investments quarterly at fair value (based on ASC 820, its corresponding guidance and the principal markets in which these investments trade) as determined in good faith by or under the direction of our Board of Directors pursuant to a written valuation policy and a consistently applied valuation process utilizing the input of our investment adviser, independent valuation firms, third party pricing services and the Audit Committee of the Board of Directors. Our Board of Directors utilizes the services of independent valuation firms to aid it in determining the fair value of these investments. The types of factors that may be considered in fair value pricing of these investments include the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings, the markets in which the portfolio company does business, comparison to more liquid securities, indices and other market-related inputs, discounted cash flow, our principal market and other relevant factors. For these securities for which a quote is either not readily available or deemed not to represent fair

value, we utilize independent valuation firms to assist with valuation of these Level 3 investments. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, our determinations of fair value may differ materially from the values that would have been used if a readily available market for these investments existed and may differ materially from the amounts we realize on any disposition of such investments. Our net asset value could be adversely affected if our determinations regarding the fair value of these investments were materially higher than the values that we ultimately realize upon the disposal of such investments.

15

Table of Contents

In addition, decreases in the market values or fair values of our investments are recorded as unrealized loss. Unprecedented declines in prices and liquidity in the corporate debt markets have resulted in significant net unrealized loss in our portfolio in the past. The effect of all of these factors on our portfolio has reduced our NAV by increasing net unrealized loss in our portfolio. Depending on market conditions, we could incur substantial realized losses and may continue to suffer additional unrealized losses in future periods, which could have a material adverse impact on our business, financial condition and results of operations.

The lack of liquidity in our investments may adversely affect our business.

We generally make investments in private companies. Substantially all of these securities are subject to legal and other restrictions on resale or are otherwise less liquid than publicly traded securities. The illiquidity of our investments may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments. In addition, we may face other restrictions on our ability to liquidate an investment in a portfolio company to the extent that we or an affiliated manager of AGM has material non-public information regarding such portfolio company.

We may experience fluctuations in our periodic results.

We could experience fluctuations in our periodic operating results due to a number of factors, including the interest rates payable on the debt securities we acquire, the default rate on such securities, the level of our expenses (including the interest rates payable on our borrowings), the dividend rates on preferred stock we issue, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which we encounter competition in our markets and general economic conditions. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

Our ability to enter into transactions with our affiliates is restricted.

We are prohibited under the 1940 Act from knowingly participating in certain transactions with certain of our affiliates without the prior approval of our independent directors and, in some cases, of the SEC. Any person that owns, directly or indirectly, 5% or more of our outstanding voting securities will be our affiliate for purposes of the 1940 Act and we are generally prohibited from buying or selling any security (other than our securities) from or to such affiliate, absent the prior approval of our independent directors. The 1940 Act also prohibits certain “joint” transactions with certain of our affiliates, which could include investments in the same portfolio company (whether at the same or different times), without prior approval of our independent directors and, in some cases, of the SEC. We are prohibited from buying or selling any security from or to any person who owns more than 25% of our voting securities or certain of that person’s affiliates, or entering into prohibited joint transactions with such persons, absent the prior approval of the SEC through an exemptive order (other than in certain limited situations pursuant to current regulatory guidance). The analysis of whether a particular transaction constitutes a joint transaction requires a review of the relevant facts and circumstances then existing. Similar restrictions limit our ability to transact business with our officers or directors or their affiliates.

On March 29, 2016, we received an exemptive order from the SEC permitting us greater flexibility to negotiate the terms of co-investment transactions with certain of our affiliates, including investment funds managed by AIM or its affiliates, subject to the conditions included therein. Under the terms of the Order, a “required majority” (as defined in Section 57(o) of the 1940 Act) of our independent directors must make certain conclusions in connection with a co-investment transaction, including that (1) the terms of the proposed transaction are reasonable and fair to us and our stockholders and do not involve overreaching of us or our stockholders on the part of any person concerned, and (2) the transaction is consistent with the interests of our stockholders and is consistent with our board of directors approved criteria. In certain situations where co-investment with one or more funds managed by AIM or its affiliates is not covered by the Order, the personnel of AIM or its affiliates will need to decide which fund will proceed with the investment. Such personnel will make these determinations based on policies and procedures, which are designed to reasonably ensure that investment opportunities are allocated fairly and equitably among affiliated funds over time and in a manner that is consistent with applicable laws, rules and regulations. The Order is subject to certain terms and conditions so there can be no assurance that we will be permitted to co-invest with certain of our affiliates other than

in the circumstances currently permitted by regulatory guidance and the Order.

16

Table of Contents

There are significant potential conflicts of interest which could adversely affect our investment returns.

Allocation of Personnel

Potential investment and disposition opportunities are generally approved by one or more investment committees composed of personnel across AGM including Mr. Zelter and/or Mr. Widra, depending on the underlying investment type and/or the amount of such investment. Our executive officers and directors, and the partners of our investment adviser, AIM, serve or may serve as officers, directors or principals of entities that operate in the same or a related line of business as we do or of investment funds managed by our affiliates. Accordingly, they may have obligations to investors in those entities, the fulfillment of which might not be in the best interests of us or our stockholders. Moreover, we note that, notwithstanding the difference in principal investment objectives between us and other AGM funds, such other AGM sponsored funds, including new affiliated potential pooled investment vehicles or managed accounts not yet established (whether managed or sponsored by AGM or AIM itself), have and may from time to time have overlapping investment objectives with us and, accordingly, invest in, whether principally or secondarily, asset classes similar to those targeted by us. To the extent such other investment vehicles have overlapping investment objectives, the scope of opportunities otherwise available to us may be adversely affected and/or reduced. As a result, certain partners of AIM may face conflicts in their time management and commitments as well as in the allocation of investment opportunities to other AGM funds. In addition, in the event such investment opportunities are allocated among us and other investment vehicles managed or sponsored by, or affiliated with, AIM our desired investment portfolio may be adversely affected. Although AIM endeavors to allocate investment opportunities in a fair and equitable manner, it is possible that we may not be given the opportunity to participate in certain investments made by investment funds managed by AIM or investment managers affiliated with AIM.

No Information Barriers

There are no information barriers amongst AGM and certain of its affiliates. If AIM were to receive material non-public information about a particular company, or have an interest in investing in a particular company, AGM or certain of its affiliates may be prevented from investing in such company. Conversely, if AGM or certain of its affiliates were to receive material non-public information about a particular company, or have an interest in investing in a particular company, we may be prevented from investing in such company.

This risk may affect us more than it does other investment vehicles, as AIM generally does not use information barriers that many firms implement to separate persons who make investment decisions from others who might possess material, non-public information that could influence such decisions. AIM's decision not to implement these barriers could prevent its investment professionals from undertaking certain transactions such as advantageous investments or dispositions that would be permissible for them otherwise. In addition, AIM could in the future decide to establish information barriers, particularly as its business expands and diversifies.

Co-Investment Activity and Allocation of Investment Opportunities

AGM and its affiliated investment managers, including AIM, may determine that an investment is appropriate both for us and for one or more other funds. In such event, depending on the availability of such investment and other appropriate factors, AIM may determine that we should invest on a side-by-side basis with one or more other funds. We may make all such investments subject to compliance with applicable regulations and interpretations, and our allocation procedures. In certain circumstances, negotiated co-investments may be made only in accordance with the terms of the exemptive order we received from the SEC permitting us to do so. On March 29, 2016, we received an exemptive order from the SEC permitting us greater flexibility to negotiate the terms of co-investment transactions with certain of our affiliates, including investment funds managed by AIM or its affiliates, subject to the conditions included therein. The Order is subject to certain terms and conditions so there can be no assurance that we will be permitted to co-invest with certain of our affiliates other than in the circumstances currently permitted by regulatory guidance and the Order.

AGM has adopted allocation procedures that are intended to ensure that each fund or account managed by AGM or certain of its affiliates ("Apollo-advised funds") is treated in a manner that, over time, is fair and equitable. Allocations generally are made pro rata based on order size. In certain circumstances, the allocation policy provides for the allocation of investments pursuant to a predefined arrangement that is other than pro rata. As a result, in situations

where a security is appropriate for us but is limited in availability, we may receive a lower allocation than may be desired by our portfolio managers or no allocation if it is determined that the investment is more appropriate for a different Apollo-advised fund because of its investment mandate. Investment opportunities may be allocated on a basis other than pro rata to the extent it is done in good faith and does not, or is not reasonably expected to, result in an improper disadvantage or advantage to one participating Apollo-advised fund as compared to another participating Apollo-advised fund.

17

Table of Contents

In the event investment opportunities are allocated among us and other Apollo-advised funds, we may not be able to structure our investment portfolio in the manner desired. Although AGM endeavors to allocate investment opportunities in a fair and equitable manner, it is possible that we may not be given the opportunity to participate in certain investments made by other Apollo-advised funds or portfolio managers affiliated with AIM. Furthermore, we and the other Apollo-advised funds may make investments in securities where the prevailing trading activity may make impossible the receipt of the same price or execution on the entire volume of securities purchased or sold by us and such other Apollo-advised funds. When this occurs, the various prices may be averaged, and we will be charged or credited with the average price. Thus, the effect of the aggregation may operate on some occasions to our disadvantage. In addition, under certain circumstances, we may not be charged the same commission or commission equivalent rates in connection with a bunched or aggregated order.

It is possible that other Apollo-advised funds may make investments in the same or similar securities at different times and on different terms than we do. From time to time, we and the other Apollo-advised funds may make investments at different levels of an issuer's capital structure or otherwise in different classes of an issuer's securities. Such investments may inherently give rise to conflicts of interest or perceived conflicts of interest between or among the various classes of securities that may be held by such entities. Conflicts may also arise because portfolio decisions regarding us may benefit such other Apollo-advised funds. For example, the sale of a long position or establishment of a short position by us may impair the price of the same security sold short by (and therefore benefit) one or more Apollo-advised funds, and the purchase of a security or covering of a short position in a security by us may increase the price of the same security held by (and therefore benefit) one or more Apollo-advised funds. In these circumstances AIM and its affiliates will seek to resolve each conflict in a manner that is fair to the various clients involved in light of the totality of the circumstances. In some cases the resolution may not be in our best interests. AGM and its clients may pursue or enforce rights with respect to an issuer in which we have invested, and those activities may have an adverse effect on us. As a result, prices, availability, liquidity and terms of our investments may be negatively impacted by the activities of AGM or its clients, and transactions for us may be impaired or effected at prices or terms that may be less favorable than would otherwise have been the case.

Fees and Expenses

In the course of our investing activities, we pay management and incentive fees to AIM, and reimburse AIM for certain expenses it incurs. As a result, investors in our common stock invest on a "gross" basis and receive distributions on a "net" basis after expenses, resulting in, among other things, a lower rate of return than one might achieve through direct investments. As a result of this arrangement, there may be times when the management team of AIM has interests that differ from those of our common stockholders, giving rise to a conflict.

AIM receives a quarterly incentive fee based, in part, on our pre-incentive fee income, if any, for the immediately preceding calendar quarter. This incentive fee will not be payable to AIM unless the pre-incentive net investment income exceeds the performance threshold. To the extent we or AIM are able to exert influence over our portfolio companies, the quarterly pre-incentive fee may provide AIM with an incentive to induce our portfolio companies to prepay interest or other obligations in certain circumstances.

Allocation of Expenses

We have entered into a royalty-free license agreement with AGM, pursuant to which AGM has agreed to grant us a non-exclusive license to use the name "Apollo." Under the license agreement, we have the right to use the "Apollo" name for so long as AIM or one of its affiliates remains our investment adviser. In addition, we rent office space from AIA, an affiliate of AIM, and pay AIA our allocable portion of overhead and other expenses incurred by AIA in performing its obligations under the administration agreement, including our allocable portion of the cost of our Chief Financial Officer and Chief Compliance Officer and their respective staffs, which can create conflicts of interest that our Board of Directors must monitor.

In the past following periods of volatility in the market price of a company's securities, securities class action litigation has, from time to time, been brought against that company.

If our stock price fluctuates significantly, we may be the target of securities litigation in the future. Securities litigation could result in substantial costs and divert management's attention and resources from our business.

Table of Contents

To the extent original issue discount (“OID”) and PIK interest constitute a portion of our income, we will be exposed to typical risks associated with such income being required to be included in taxable and accounting income prior to receipt of cash representing such income.

Our investments may include OID and PIK interest arrangements, which represents contractual interest added to a loan balance and due at the end of such loan’s term. To the extent OID or PIK interest constitute a portion of our income, we are exposed to typical risks associated with such income being required to be included in taxable and accounting income prior to receipt of cash, including the following:

The higher interest rates of OID and PIK instruments reflect the payment deferral and increased credit risk associated with these instruments, and OID and PIK instruments generally represent a significantly higher credit risk than coupon loans.

Even if the accounting conditions for income accrual are met, the borrower could still default when our actual collection is supposed to occur at the maturity of the obligation.

OID and PIK instruments may have unreliable valuations because their continuing accruals require continuing judgments about the collectibility of the deferred payments and the value of any associated collateral. OID and PIK income may also create uncertainty about the source of our cash distributions.

An election to defer PIK interest payments by adding them to loan principal increases our gross assets, thus increasing our investment adviser’s future base management fees, and increases future investment income, thus increasing our investment adviser’s future income incentive fees at a compounding rate.

Market prices of zero-coupon or PIK securities may be affected to a greater extent by interest rate changes and may be more volatile than securities that pay interest periodically and in cash.

For accounting purposes, any cash distributions to stockholders representing OID and PIK income are not treated as coming from paid-in capital, even if the cash to pay them comes from offering proceeds. As a result, despite the fact that a distribution representing OID and PIK income could be paid out of amounts invested by our stockholders, the 1940 Act does not require that stockholders be given notice of this fact by reporting it as a return of capital.

Changes in the laws or regulations governing our business or the businesses of our portfolio companies and any failure by us or our portfolio companies to comply with these laws or regulations, could negatively affect the profitability of our operations or of our portfolio companies.

We are subject to changing rules and regulations of federal and state governments, as well as the stock exchange on which our common stock is listed. These entities, including the Public Company Accounting Oversight Board, the SEC and the NASDAQ Global Select Market, have issued a significant number of new and increasingly complex requirements and regulations over the course of the last several years and continue to develop additional regulations. In particular, changes in the laws or regulations or the interpretations of the laws and regulations that govern BDCs, RICs or non-depository commercial lenders could significantly affect our operations and our cost of doing business. We are subject to federal, state and local laws and regulations and are subject to judicial and administrative decisions that affect our operations, including our loan originations, maximum interest rates, fees and other charges, disclosures to portfolio companies, the terms of secured transactions, collection and foreclosure procedures and other trade practices. If these laws, regulations or decisions change, or if we expand our business into jurisdictions that have adopted more stringent requirements than those in which we currently conduct business, we may have to incur significant expenses in order to comply, or we might have to restrict our operations. In addition, if we do not comply with applicable laws, regulations and decisions, we may lose licenses needed for the conduct of our business and be subject to civil fines and criminal penalties, any of which could have a material adverse effect upon our business, financial condition and results of operations.

Provisions of the Maryland General Corporation Law and of our charter and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock.

The Maryland General Corporation Law, our charter and our bylaws contain provisions that may discourage, delay or make more difficult a change in control or the removal of our directors. We are subject to Subtitle 6 of Title 3 of the Maryland General Corporate Law, the Maryland Business Combination Act, subject to any applicable requirements of the 1940 Act. Our Board of Directors has adopted a resolution exempting from the Business Combination Act any business combination between us and any other person, subject to prior approval of such business combination by our Board of Directors, including approval by a majority of our disinterested directors. If the resolution exempting business combinations is repealed or our Board of Directors does not approve a business combination, the Business Combination Act may discourage third parties from trying to acquire control of us and increase the difficulty of consummating such an offer. We are subject to Subtitle 7 of Title 3 of the Maryland General Corporate Law, the

Table of Contents

Maryland Control Share Acquisition Act. Our bylaws exempt from the Maryland Control Share Acquisition Act acquisitions of our common stock by any person. If we amend our bylaws to repeal the exemption from the Control Share Acquisition Act, the Control Share Acquisition Act also may make it more difficult for a third party to obtain control of us and increase the difficulty of consummating such an offer. We intend to give the SEC prior notice should our Board of Directors elect to amend our bylaws to repeal the exemption from the Control Share Acquisition Act.

We have also adopted other measures that may make it difficult for a third party to obtain control of us, including provisions of our charter classifying our Board of Directors in three classes serving staggered three-year terms, and provisions of our charter authorizing our Board of Directors to classify or reclassify shares of our stock in one or more classes or series, to cause the issuance of additional shares of our stock, and to amend our charter, without stockholder approval, to increase or decrease the number of shares of stock that we have authority to issue. These provisions, as well as other provisions of our charter and bylaws, may delay, defer or prevent a transaction or a change in control that might otherwise be in the best interests of our stockholders.

We may choose to pay dividends in our own common stock, in which case you may be required to pay federal income taxes in excess of the cash dividends you receive.

We may distribute taxable dividends that are payable in cash and shares of our common stock at the election of each stockholder. The Internal Revenue Service has issued private letter rulings on cash/stock dividends paid by RICs and real estate investment trusts where the cash component is limited to 20% of the total distribution if certain requirements are satisfied. Stockholders receiving such dividends will be required to include the full amount of the dividend (including the portion payable in stock) as ordinary income (or, in certain circumstances, long-term capital gain) to the extent of our current and accumulated earnings and profits for federal income tax purposes. As a result, stockholders may be required to pay income taxes with respect to such dividends in excess of the cash dividends received. If a U.S. stockholder sells the common stock that it receives as a dividend in order to pay this tax, the sales proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of our common stock at the time of the sale. Furthermore, with respect to non-U.S. stockholders, we may be required to withhold U.S. tax with respect to such dividends, including in respect of all or a portion of such dividend that is payable in common stock. In addition, if a significant number of our stockholders determine to sell shares of our common stock in order to pay taxes owed on dividends, it may put downward pressure on the trading price of our common stock. It is unclear whether and to what extent we will be able to pay taxable dividends in cash and common stock (whether pursuant to a private letter ruling or otherwise).

If we fail to maintain an effective system of internal control over financial reporting, we may not be able to accurately report our financial results or prevent fraud. As a result, stockholders could lose confidence in our financial and other public reporting, which would harm our business and the trading price of our common stock.

Effective internal controls over financial reporting are necessary for us to provide reliable financial reports and, together with adequate disclosure controls and procedures, are designed to prevent fraud. Any failure to implement required new or improved controls, or difficulties encountered in their implementation could cause us to fail to meet our reporting obligations. In addition, any testing by us conducted in connection with Section 404 of the Sarbanes-Oxley Act, or the subsequent testing by our independent registered public accounting firm (when undertaken, as noted below), may reveal deficiencies in our internal controls over financial reporting that are deemed to be material weaknesses or that may require prospective or retroactive changes to our consolidated financial statements or identify other areas for further attention or improvement. Inferior internal controls could also cause investors and lenders to lose confidence in our reported financial information, which could have a negative effect on the trading price of our common stock.

We may experience cyber security incidents and are subject to cyber security risks.

Our business operations rely upon secure information technology systems for data processing, storage and reporting. Despite careful security and controls design, implementation and updating, our information technology systems could become subject to cyber attacks. Cyber attacks include, but are not limited to, gaining unauthorized access to digital systems (e.g., through “hacking” or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of service attacks on websites (i.e., efforts to make network services unavailable to intended users). Network, system, application and data breaches could result in operational disruptions or information misappropriation, which could have a material adverse effect on our business, results of operations and financial condition.

Cyber security failures or breaches by our investment adviser and other service providers (including, but not limited to, accountants, custodians, transfer agents and administrators), and the issuers of securities in which we invest, have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with our ability to calculate its net asset value, impediments to trading, the inability of our stockholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs.

Table of Contents

In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future. While we have established a business continuity plan in the event of, and risk management systems to prevent, such cyber attacks, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, we cannot control the cyber security plans and systems put in place by our service providers and issuers in which we invest. We and our stockholders could be negatively impacted as a result.

The failure in cyber security systems, as well as the occurrence of events unanticipated in our disaster recovery systems and management continuity planning could impair our ability to conduct business effectively.

The occurrence of a disaster such as a cyber attack, a natural catastrophe, an industrial accident, a terrorist attack or war, events unanticipated in our disaster recovery systems, or a support failure from external providers, could have an adverse effect on our ability to conduct business and on our results of operations and financial condition, particularly if those events affect our computer-based data processing, transmission, storage, and retrieval systems or destroy data. If a significant number of our managers were unavailable in the event of a disaster, our ability to effectively conduct our business could be severely compromised.

We depend heavily upon computer systems to perform necessary business functions. Despite our implementation of a variety of security measures, our computer systems could be subject to cyber attacks and unauthorized access, such as physical and electronic break-ins or unauthorized tampering. Like other companies, we may experience threats to our data and systems, including malware and computer virus attacks, unauthorized access, system failures and disruptions. If one or more of these events occurs, it could potentially jeopardize the confidential, proprietary and other information processed and stored in, and transmitted through, our computer systems and networks, or otherwise cause interruptions or malfunctions in our operations, which could result in damage to our reputation, financial losses, litigation, increased costs, and/or regulatory penalties.

We are dependent on information systems and systems failures could significantly disrupt our business, which may, in turn, negatively affect the market price of our common stock and our ability to pay dividends.

Our business is dependent on our and third parties' communications and information systems. Any failure or interruption of those systems, including as a result of the termination of an agreement with any third-party service providers, could cause delays or other problems in our activities. Our financial, accounting, data processing, backup or other operating systems and facilities may fail to operate properly or become disabled or damaged as a result of a number of factors including events that are wholly or partially beyond our control and adversely affect our business.

There could be:

- sudden electrical or telecommunications outages;
- natural disasters such as earthquakes, tornadoes and hurricanes;
- disease pandemics;
- events arising from local or larger scale political or social matters, including terrorist acts; and
- cyber attacks.

These events, in turn, could have a material adverse effect on our operating results and negatively affect the market price of our common stock and our ability to pay dividends to our stockholders.

The effect of global climate change may impact the operations of our portfolio companies.

There is evidence of global climate change. Climate change creates physical and financial risk and some of our portfolio companies may be adversely affected by climate change. For example, the needs of customers of energy companies vary with weather conditions, primarily temperature and humidity. To the extent weather conditions are affected by climate change, energy use could increase or decrease depending on the duration and magnitude of any changes. Increased energy use due to weather changes may require additional investments by our portfolio companies engaged in the energy business in more pipelines and other infrastructure to serve increased demand. Increases in the cost of energy also could adversely affect the cost of operations of our portfolio companies if the use of energy products or services is material to their business. A decrease in energy use due to weather changes may affect some of our portfolio companies' financial condition, through decreased revenues. Extreme weather conditions in general require more system backup, adding to costs, and can contribute to increased system stresses, including service

interruptions. Energy companies could also be affected by the potential for lawsuits against or taxes or other regulatory costs imposed on greenhouse gas emitters, based on links drawn between greenhouse gas emissions and climate change.

Table of Contents

Our investment adviser and administrator have the right to resign on 60 days' notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our business, financial condition and results of operations.

Our investment adviser and administrator have the right, under our investment management agreement and administration agreement, respectively, to resign at any time upon not less than 60 days' written notice, whether we have found a replacement or not. If our investment adviser or our administrator resigns, we may not be able to find a replacement or hire internal management or administration with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our business, financial condition and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and investment activities or our internal administration activities, as applicable, is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by our investment adviser and its affiliates or our administrator and its affiliates. Even if we are able to retain comparable management or administration, whether internal or external, the integration of such management or administration and their lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our business, financial condition and results of operations.

Risks Relating to our Investments

Our investments in prospective portfolio companies are risky, and you could lose all or part of your investment. Investment in middle-market companies is speculative and involves a number of significant risks including a high degree of risk of credit loss. Middle-market companies may have limited financial resources and may be unable to meet their obligations under their debt securities that we hold, which may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of us realizing any guarantees we may have obtained in connection with our investment. In addition, they typically have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns. Middle-market companies are more likely to depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us. Middle-market companies also generally have less predictable operating results, may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence, and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position. In addition, our executive officers, directors and our investment adviser may, in the ordinary course of business, be named as defendants in litigation arising from our investments in the portfolio companies.

We invest primarily in secured and unsecured debt of private middle-market companies. We also may invest in equity and structured products, such as CLOs and CLNs. We may not realize gains from our equity investments.

Secured loans, which we define to include first lien and second lien debt, are the most senior form of indebtedness of an issuer and, due to the ability of the lender to sell the collateral to repay its loan in the event of default, the lender will likely experience more favorable recovery than more junior creditors in the event of the issuer defaults on its indebtedness.

Unsecured debt or loans, also referred to as mezzanine loans or subordinated debt are generally unsecured and junior to other indebtedness of the issuer. As a consequence, the holder of a mezzanine loan may lack adequate protection in the event the issuer becomes distressed or insolvent and will likely experience a lower recovery than more senior debtholders in the event the issuer defaults on its indebtedness. In addition, mezzanine loans of middle-market companies are often highly illiquid and in adverse market conditions may experience steep declines in valuation even if they are fully performing.

We may invest in debt and equity positions of structured products, such as CLOs and CLNs. A CLO is a form of securitization in which the cash flows of a portfolio of loans are pooled and passed on to different classes of owners in

various tranches. A CLN is a synthetic obligation between two or more parties where the payment of principal and/or interest is based on the performance of some reference obligation. Credit-linked notes are created by embedding a credit default swap in a funded asset to form an investment whose credit risk and cash flow characteristics resemble those of a bond or loan. These credit-linked notes pay an enhanced coupon to the investor for taking on the added credit risk of the reference issuer. In addition to the credit risk of the reference entity and interest rate risk, the buyer/seller of credit-linked notes is subject to counterparty risk.

22

Table of Contents

When we invest in unsecured and secured loans, we have acquired and may continue to acquire warrants or other equity securities as well. In addition, we may invest directly in the equity securities of portfolio companies. Our goal is ultimately to dispose of such equity interests and realize gains upon our disposition of such interests. However, the equity interests we receive may not appreciate in value and, in fact, may decline in value. Accordingly, we may not be able to realize gains from our equity interests, and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience.

Our investments in structured products may be riskier and less transparent to us and our stockholders than direct investments in the underlying companies.

We invest in structured products. Generally, there may be less information available to us regarding the underlying debt investments held by structured products than if we had invested directly in the debt of the underlying companies. As a result, our stockholders will not know the details of the underlying securities of the structured products in which we will invest. Our structured product investments will also be subject to the risk of leverage associated with the debt issued by such structured products and the repayment priority of senior debt holders in such structured products. Our investments in prospective portfolio companies may be risky, and we could lose all or part of our investment.

Structured products typically will have no significant assets other than their underlying loans; payments on structured product investments are and will be payable solely from the cash flows from such loans.

Structured products typically will have no significant assets other than their underlying loans. Accordingly, payments on structured product investments are and will be payable solely from the cash flows from such loans, net of all management fees and other expenses. Payments to us as a holder of structured product investments are and will be met only after payments due on the senior notes (and, where appropriate, the junior secured notes) from time to time have been made in full. This means that relatively small numbers of defaults of loans may adversely impact our returns.

Our structured product investments are exposed to leveraged credit risk.

We may be in a subordinated position with respect to realized losses on loans underlying our investments in structured products. The leveraged nature of structured products, in particular, magnifies the adverse impact of loan defaults.

Structured product investments represent a leveraged investment with respect to the underlying loans. Therefore, changes in the market value of the structured product investments could be greater than the change in the market value of the underlying loans, which are subject to credit, liquidity and interest rate risk.

There is the potential for interruption and deferral of cash flow from CLO investments.

If certain minimum collateral value ratios and/or interest coverage ratios are not met by a CLO, primarily due to loan defaults, then cash flow that otherwise would have been available to pay distributions to us on our CLO investments may instead be used to redeem any senior notes or to purchase additional loans, until the ratios again exceed the minimum required levels or any senior notes are repaid in full. This could result in an elimination, reduction or deferral in the distribution and/or principal paid to the holders of the CLO investments, which would adversely impact our returns.

Investments in foreign securities may involve significant risks in addition to the risks inherent in U.S. investments. Our CLO investment strategy involves investments in foreign CLOs. Investing in foreign entities may expose us to additional risks not typically associated with investing in U.S. issuers. These risks include changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility. Further, we, and the CLOs in which we invest, may have difficulty enforcing creditor's rights in foreign jurisdictions. In addition, the underlying companies of the CLOs in which we invest may be foreign, which may create greater exposure for us to foreign economic developments.

The payment of underlying portfolio manager fees and other charges on CLO investments could adversely impact our returns.

We may invest in CLO investments where the underlying portfolio securities may be subject to management, administration and incentive or performance fees, in addition to those payable by us. Payment of such additional fees could adversely impact the returns we achieve.

23

Table of Contents

The inability of a CLO collateral manager to reinvest the proceeds of the prepayment of loans may adversely affect us. There can be no assurance that for any CLO investment, in the event that any of the loans of a CLO underlying such investment are prepaid, the CLO collateral manager will be able to reinvest such proceeds in new loans with equivalent investment returns. If the CLO collateral manager cannot reinvest in new loans with equivalent investment returns, the interest proceeds available to pay interest on the rated liabilities and investments may be adversely affected.

Our CLO investments are subject to prepayments and calls, increasing re-investment risk.

Our CLO investments and/or the underlying senior secured loans may be prepaid more quickly than expected, which could have an adverse impact on our value. Prepayment rates are influenced by changes in interest rates and a variety of economic, geographic and other factors beyond our control, and consequently cannot be predicted with certainty. In addition, for a CLO collateral manager there is often a strong incentive to refinance well performing portfolios once the senior tranches amortize. The yield to maturity of the investments will depend on the amount and timing of payments of principal on the loans and the price paid for the investments. Such yield may be adversely affected by a higher or lower than anticipated rate of prepayments of the debt.

Furthermore, our CLO investments generally do not contain optional call provisions, other than a call at the option of the holders of the equity tranches for the senior notes and the junior secured notes to be paid in full after the expiration of an initial period in the deal (referred to as the “non-call period”).

The exercise of the call option is by the relevant percentage (usually a majority) of the holders of the equity tranches and, therefore, where we do not hold the relevant percentage we will not be able to control the timing of the exercise of the call option. The equity tranches also generally have a call at any time based on certain tax event triggers. In any event, the call can only be exercised by the holders of equity tranches if they can demonstrate (in accordance with the detailed provisions in the transaction) that the senior notes and junior secured notes will be paid in full if the call is exercised.

Early prepayments and/or the exercise of a call option other than at our request may also give rise to increased re-investment risk with respect to certain investments, as we may realize excess cash earlier than expected. If we are unable to reinvest such cash in a new investment with an expected rate of return at least equal to that of the investment repaid, this may reduce our net income and, consequently, could have an adverse impact on our ability to pay dividends.

We have limited control of the administration and amendment of loans owned by the CLOs in which we invest. We may not be able to directly enforce any rights and remedies in the event of a default of a loan held by a CLO vehicle. In addition, the terms and conditions of the senior secured loans underlying our CLO investments may be amended, modified or waived only by the agreement of the underlying lenders. Generally, any such agreement must include a majority or a super majority (measured by outstanding loans or commitments) or, in certain circumstances, a unanimous vote of the lenders. Consequently, the terms and conditions of the payment obligations arising from loans could be modified, amended or waived in a manner contrary to our preferences.

We have limited control of the administration and amendment of any CLO in which we invest.

The terms and conditions of target securities may be amended, modified or waived only by the agreement of the underlying security holders. Generally, any such agreement must include a majority or a super majority (measured by outstanding amounts) or, in certain circumstances, a unanimous vote of the security holders. Consequently, the terms and conditions of the payment obligation arising from the CLOs in which we invest be modified, amended or waived in a manner contrary to our preferences.

Loans of CLOs may be sold and replaced resulting in a loss to us.

The loans underlying our CLO investments may be sold and replacement collateral purchased within the parameters set out in the relevant CLO indenture between the CLO and the CLO trustee and those parameters may typically only be amended, modified or waived by the agreement of a majority of the holders of the senior notes and/or the junior secured notes and/or the equity tranche once the CLO has been established. If these transactions result in a net loss, the magnitude of the loss from the perspective of the equity tranche would be increased by the leveraged nature of the investment.

Table of Contents

Our financial results may be affected adversely if one or more of our significant equity or junior debt investments in a CLO vehicle defaults on its payment obligations or fails to perform as we expect.

We expect that a majority of our portfolio of CLO investments will consist of equity and junior debt investments in CLOs, which involve a number of significant risks. CLOs are typically highly levered up to approximately 10 times, and therefore the junior debt and equity tranches that we will invest in are subject to a higher risk of total loss than the senior debt portion. In particular, investors in CLOs indirectly bear risks of the underlying debt investments held by such CLOs. We will generally have the right to receive payments only from the CLOs, and will generally not have direct rights against the underlying borrowers or the entities that sponsored the CLOs. Although it is difficult to predict whether the prices of indices and securities underlying CLOs will rise or fall, these prices, and therefore, the prices of the CLOs, will be influenced by the same types of political and economic events that affect issuers of securities and capital markets generally.

The investments we make in CLOs are thinly traded or have only a limited trading market. CLO investments are typically privately offered and sold, in the primary and secondary markets. As a result, investments in CLOs may be characterized as illiquid securities. In addition to the general risks associated with investing in debt securities, CLOs carry additional risks, including, but not limited to: (i) the possibility that distributions from the underlying loans will not be adequate to make interest or other payments; (ii) the quality of the underlying loans may decline in value or default; and (iii) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the CLO or unexpected investment results. Further, our investments in equity and junior debt tranches of CLOs are subordinate to the senior debt tranches thereof.

Investments in structured vehicles, including equity and junior debt instruments issued by CLOs, involve risks, including credit risk and market risk. Changes in interest rates and credit quality may cause significant price fluctuations. Additionally, changes in the underlying Senior Secured Loans held by a CLO may cause payments on the instruments we hold to be reduced, either temporarily or permanently. Structured investments, particularly the subordinated interests in which we invest, are less liquid than many other types of securities and may be more volatile than the Senior Secured Loans underlying the CLOs in which we invest.

Non-investment grade debt involves a greater risk of default and higher price volatility than investment grade debt. The loans underlying our CLO investments typically are rated non-investment grade and, in limited circumstances, are unrated. Non-investment grade securities are predominantly speculative with respect to the issuer's capacity to pay interest and repay principal when due and therefore involve a greater risk of default and higher price volatility than investment grade debt.

We will have no influence on management of underlying investments managed by non-affiliated third party CLO collateral managers.

We are not responsible for and have no influence over the asset management of the portfolios underlying the CLO investments we hold as those portfolios are managed by non-affiliated third party CLO collateral managers. Similarly, we are not responsible for and have no influence over the day-to-day management, administration or any other aspect of the issuers of the individual securities. As a result, the values of the portfolios underlying our CLO investments could decrease as a result of decisions made by third party CLO collateral managers.

Our CLN investments are subject to counterparty risk, interest rate risk and credit risk.

Certain credit-linked notes also may be thinly traded or have a limited trading market. Credit-linked notes are typically privately offered and sold. Holders of credit-linked notes bear risks of the underlying investments, index or reference obligation and are subject to counterparty risk. Credit-linked notes are used to transfer credit risk. The performance of the notes is linked to the performance of some underlying reference obligation. The notes are usually issued by a special purpose vehicle ("SPV") that sells credit protection through a credit default swap transaction in return for a premium and an obligation to pay the transaction sponsor should a reference entity experience a certain credit event or events, such as bankruptcy. The SPV invests the proceeds from the notes to cover its contingent payment obligation. Revenue from the investments and the money received as premium are used to pay interest to note holders. The main risk of credit-linked notes is the risk of the reference entity experiencing a credit event that triggers the contingent payment obligation. Should such an event occur, the SPV would have to pay the transaction

sponsor and payments to the note holders would be subordinated.

25

Table of Contents

Investments in the energy sector are subject to many risks.

We have made certain investments in and relating to the energy sector. The operations of energy companies are subject to many risks inherent in the transporting, processing, storing, distributing, mining or marketing of natural gas, natural gas liquids, crude oil, coal, refined petroleum products or other hydrocarbons, or in the exploring, managing or producing of such commodities, including, without limitation: damage to pipelines, storage tanks or related equipment and surrounding properties caused by hurricanes, tornadoes, floods, fires and other natural disasters or by acts of terrorism, inadvertent damage from construction and farm equipment, leaks of natural gas, natural gas liquids, crude oil, refined petroleum products or other hydrocarbons, and fires and explosions. These risks could result in substantial losses due to personal injury or loss of life, severe damage to and destruction of property and equipment and pollution or other environmental damage, and may result in the curtailment or suspension of their related operations, any and all of which could adversely affect our portfolio companies in the energy sector. In addition, the energy sector has experienced significant volatility at times, which may occur in the future, and which could negatively affect the returns on any investment made by the Company in this sector. In addition, valuation of certain investments includes the probability weighting of future events which are outside of management's control. The final outcome of such events could increase or decrease the fair value of the investment in a future period.

Crude oil and natural gas prices are volatile. A substantial and/or extended decline in crude oil and natural gas prices could have a material adverse effect on some of our portfolio companies in the energy sector.

Crude oil and natural gas prices historically have been volatile and likely will continue to be volatile given current geopolitical conditions. The prices for crude oil and natural gas are subject to a variety of factors beyond our control, such as the domestic and foreign supply of crude oil and natural gas; consumer demand for crude oil and natural gas, and market expectations regarding supply and demand. These factors and the volatility of the energy markets make it extremely difficult to predict price movements. Accordingly, our portfolio companies in the energy sector is at risk for the volatility in crude oil and natural gas prices. A prolonged decline in crude oil and/or natural gas prices may have an adverse effect on our business, financial condition and/or operating results.

Cyclical within the energy sector may adversely affect our business.

Industries within the energy sector are cyclical with fluctuations in commodity prices and demand for commodities driven by a variety of factors. The highly cyclical nature of the industries within the energy sector may lead to volatile changes in commodity prices, which may adversely affect the earnings of energy companies in which we may invest. A prolonged continuation of depressed oil and natural gas prices could negatively impact the energy and power industry and energy-related investments within our investment portfolio.

A prolonged continuation of depressed oil and natural gas prices would adversely affect the credit quality and performance of certain of our debt and equity investments in energy and power and related companies. A decrease in credit quality and performance would, in turn, negatively affect the fair value of these investments, which would consequently negatively affect our net asset value. Should a prolonged period of depressed oil and natural gas prices occur, the ability of certain of our portfolio companies in the energy and power and related industries to satisfy financial or operating covenants imposed by us or other lenders may be adversely affected, which could, in turn, negatively impact their financial condition and their ability to satisfy their debt service and other obligations.

Likewise, should a prolonged period of depressed oil and natural gas prices occur, it is possible that the cash flow and profit generating capacity of these portfolio companies could also be adversely affected thereby negatively impacting their ability to pay us dividends or distributions on our investments.

Commodities are subject to many risks that may adversely affect some of our portfolio companies.

The prices of commodities are subject to a variety of factors such as political and regulatory changes, seasonal variations, weather, technology and market conditions. These factors and the volatility of the commodities markets make it extremely difficult to predict price movements. Accordingly, the commodities industry has experienced significant volatility at times, which may occur in the future, and which could negatively affect the returns on any investment made by the Company in this industry.

Table of Contents

Economic recessions or downturns could impair our portfolio companies and harm our operating results. Many of our portfolio companies may be susceptible to economic slowdowns or recessions and may be unable to repay our loans during these periods. Therefore, our non-performing assets may increase and the value of our portfolio may decrease during these periods if we are required to write down the values of our investments. Adverse economic conditions also may decrease the value of collateral securing some of our loans and the value of our equity investments. Economic slowdowns or recessions could lead to financial losses in our portfolio and a decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing investments and harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, acceleration of the time when the loans are due and foreclosure on its secured assets, which could trigger cross-defaults under other agreements and jeopardize the portfolio company's ability to meet its obligations under the debt that we hold. We may incur additional expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting portfolio company.

Our portfolio companies may be highly leveraged and a covenant breach by our portfolio companies may harm our operating results.

Some of our portfolio companies may be highly leveraged, which may have adverse consequences to these companies and to us as an investor. These companies may be subject to restrictive financial and operating covenants and the leverage may impair these companies' ability to finance their future operations and capital needs. As a result, these companies' flexibility to respond to changing business and economic conditions and to take advantage of business opportunities may be limited. Further, a leveraged company's income and net assets will tend to increase or decrease at a greater rate than if borrowed money were not used.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans and foreclosure on its secured assets, which could trigger cross-defaults under other agreements and jeopardize a portfolio company's ability to meet its obligations under the debt or equity securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, with a defaulting portfolio company.

There may be circumstances where our debt investments could be subordinated to claims of other creditors or we could be subject to, among other things, lender liability or fraudulent conveyance claims.

We could, in certain circumstances, become subject to potential liabilities that may exceed the value of our original investment in a portfolio company that experiences severe financial difficulties. For example, we may be adversely affected by laws related to, among other things, fraudulent conveyances, voidable preferences, lender liability, and the bankruptcy court's discretionary power to disallow, subordinate or disenfranchise particular claims or re-characterize investments made in the form of debt as equity contributions.

If we do not invest a sufficient portion of our assets in qualifying assets, we could fail to qualify as a BDC or be precluded from investing according to our current business strategy.

As a BDC, we may not acquire any assets other than "qualifying assets" unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets. We believe that most of the investments that we may acquire in the future will constitute qualifying assets. However, we may be precluded from investing in what we believe are attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets, we could be found to be in violation of the 1940 Act provisions applicable to BDCs, which would have a material adverse effect on our business, financial condition and results of operations. Similarly, these rules could prevent us from making follow-on investments in existing portfolio companies (which could result in the dilution of our position) or could require us to dispose of investments at inappropriate times in order to come into compliance with the 1940 Act. Because most of our investments will be in private companies, and therefore will be relatively illiquid, any such dispositions could be made at disadvantageous prices and could result in substantial losses.

Table of Contents

Our portfolio contains a limited number of portfolio companies, which subjects us to a greater risk of significant loss if any of these companies defaults on its obligations under any of its debt securities.

A consequence of the limited number of investments in our portfolio is that the aggregate returns we realize may be significantly adversely affected if one or more of our significant portfolio company investments perform poorly or if we need to write down the value of any one significant investment. Beyond our income tax diversification requirements, we do not have fixed guidelines for diversification, and our portfolio could contain relatively few portfolio companies.

Our failure to make follow-on investments in our portfolio companies could impair the value of our portfolio. Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as “follow-on” investments, in order to: (1) increase or maintain in whole or in part our equity ownership percentage; (2) exercise warrants, options or convertible securities that were acquired in the original or subsequent financing; or (3) attempt to preserve or enhance the value of our investment.

We may elect not to make follow-on investments, may be constrained in our ability to employ available funds, or otherwise may lack sufficient funds to make those investments. We have the discretion to make any follow-on investments, subject to the availability of capital resources. The failure to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful operation. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make a follow-on investment because we may not want to increase our concentration of risk, because we prefer other opportunities, or because we are inhibited by compliance with BDC requirements or the desire to maintain our tax status.

When we do not hold controlling equity interests in our portfolio companies, we may not be in a position to exercise control over our portfolio companies or to prevent decisions by management of our portfolio companies that could decrease the value of our investments.

We do not generally take controlling equity positions in our portfolio companies. To the extent that we do not hold a controlling equity interest in a portfolio company, we are subject to the risk that a portfolio company may make business decisions with which we disagree, and the stockholders and management of a portfolio company may take risks or otherwise act in ways that are adverse to our interests. Due to the lack of liquidity for the debt and equity investments that we typically hold in our portfolio companies, we may not be able to dispose of our investments in the event we disagree with the actions of a portfolio company, and may therefore suffer a decrease in the value of our investments.

An investment strategy focused primarily on privately-held companies presents certain challenges, including the lack of available information about these companies, a dependence on the talents and efforts of only a few key portfolio company personnel and a greater vulnerability to economic downturns.

We have invested and will continue to invest primarily in privately-held companies. Generally, little public information exists about these companies, and we are required to rely on the ability of AIM’s investment professionals to obtain adequate information to evaluate the potential returns from investing in these companies.

If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose money on our investments. Also, privately-held companies frequently have less diverse product lines and smaller market presence than public company competitors, which often are larger. These factors could affect our investment returns.

Our portfolio companies may incur debt that ranks equally with, or senior to, our investments in such companies. We have invested and intend to invest primarily in mezzanine and senior debt securities issued by our portfolio companies. The portfolio companies usually have, or may be permitted to incur, other debt that ranks equally with, or senior to, the debt securities in which we invest. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which we are entitled to receive payments in respect of the debt securities in which we invest. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of debt instruments ranking senior to our investment in that portfolio company would typically be entitled to receive payment in full before we receive any distribution in

respect of our investment. After repaying such senior creditors, such portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of debt ranking equally with debt securities in which we invest, we would have to share on an equal basis any distributions with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company.

28

Table of Contents

In addition, we may not be in a position to control any portfolio company by investing in its debt securities. As a result, we are subject to the risk that a portfolio company in which we invest may make business decisions with which we disagree and the management of such company, as representatives of the holders of their common equity, may take risks or otherwise act in ways that do not serve our interests as debt investors.

Our incentive fee may induce AIM to make certain investments, including speculative investments.

The incentive fee payable by us to AIM may create an incentive for AIM to make investments on our behalf that are risky or more speculative than would be the case in the absence of such compensation arrangement. The way in which the incentive fee payable to AIM is determined, which is calculated separately in two components as a percentage of the net investment income (subject to a performance threshold) and as a percentage of the realized gain on invested capital, may encourage our investment adviser to use leverage to increase the return on our investments. Under certain circumstances, the use of leverage may increase the likelihood of default, which would disfavor the holders of our common stock, including investors in offerings of common stock, securities convertible into our common stock or warrants representing rights to purchase our common stock or securities convertible into our common stock. In addition, AIM receives the incentive fee based, in part, upon net capital gains realized on our investments. Unlike the portion of the incentive fee based on net investment income, there is no performance threshold applicable to the portion of the incentive fee based on net capital gains. As a result, AIM may have a tendency to invest more in investments that are likely to result in capital gains as compared to income producing securities. Such a practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses, particularly during economic downturns.

The incentive fee payable by us to AIM also may create an incentive for AIM to invest on our behalf in instruments that have a deferred interest feature such as investments with PIK provisions. Under these investments, we would accrue the interest over the life of the investment but would typically not receive the cash income from the investment until the end of the term or upon the investment being called by the issuer. Our net investment income used to calculate the income portion of our incentive fee, however, includes accrued interest. For the time period between April 1, 2012 and September 30, 2016, the portion of the incentive fee that is attributable to deferred interest, such as PIK, will not be paid to AIM until Apollo Investment receives such interest in cash. Even though such portion of the incentive fee will be paid only when the accrued income is collected, the accrued income is capitalized and included in the calculation of the base management fee. The accrual of incentive fees shall be reversed if such interest is reversed in connection with any write-off or similar treatment of the investment. The payment of incentive fees to AIM is made on accruals of expected cash interest. If a portfolio company defaults on a loan, it is possible that accrued interest previously used in the calculation of the incentive fee will become uncollectible. Thus, while a portion of this incentive fee would be based on income that we have not yet received in cash and with respect to which we do not have a formal claw-back right against our investment adviser per se, the amount of accrued income to the extent written off in any period will reduce the income in the period in which such write-off was taken and thereby reduce such period's incentive fee payment. However, even if a loan is put on non-accrual status, its capitalized interest will not be reversed and may continue to be included in the calculation of the base management fee based on an estimation of the loan's fair value.

We may invest, to the extent permitted by law, in the securities and instruments of other investment companies, including private funds, and, to the extent we so invest, will bear our ratable share of any such investment company's expenses, including management and performance fees. We will also remain obligated to pay management and incentive fees to AIM with respect to the assets invested in the securities and instruments of other investment companies. With respect to each of these investments, each of our common stockholders will bear his or her share of the management and incentive fee of AIM as well as indirectly bearing the management and performance fees and other expenses of any investment companies in which we invest.

We may be obligated to pay our investment adviser incentive compensation even if we incur a loss.

Our investment adviser is entitled to incentive compensation for each fiscal quarter in an amount equal to a percentage of the excess of our pre-incentive fee net investment income for that quarter (before deducting incentive compensation) above a performance threshold for that quarter. Accordingly, since the performance threshold is based

on a percentage of our net asset value, decreases in our net asset value make it easier to achieve the performance threshold. Our pre-incentive fee net investment income for incentive compensation purposes excludes realized and unrealized capital losses or depreciation that we may incur in the fiscal quarter, even if such capital losses or depreciation result in a net loss on our statement of operations for that quarter. Thus, we may be required to pay AIM incentive compensation for a fiscal quarter even if there is a decline in the value of our portfolio or we incur a net loss for that quarter. In addition, increases in interest rates may increase the amount of incentive fees we pay to our investment adviser even though our performance relative to the market has not increased.

29

Table of Contents

Our investments in foreign securities may involve significant risks in addition to the risks inherent in U.S. investments.

Our investment strategy contemplates that a portion of our investments may be in securities of foreign companies. Investing in foreign companies may expose us to additional risks not typically associated with investing in U.S. companies. These risks include changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility. These risks are likely to be more pronounced for investments in companies located in emerging markets and particularly for middle-market companies in these economies.

Although most of our investments are denominated in U.S. dollars, our investments that are denominated in a foreign currency are subject to the risk that the value of a particular currency may change in relation to one or more other currencies. Among the factors that may affect currency values are trade balances, the level of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation, and political developments. We may employ hedging techniques to minimize these risks, but we can offer no assurance that we will, in fact, hedge currency risk or, that if we do, such strategies will be effective. Hedging transactions may expose us to additional risks.

If we engage in hedging transactions, we may expose ourselves to risks associated with such transactions. We may utilize instruments such as forward contracts, currency options and interest rate swaps, caps, collars and floors to seek to hedge against fluctuations in the relative values of our portfolio positions from changes in currency exchange rates and market interest rates. Hedging against a decline in the values of our portfolio positions does not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of such positions decline. However, such hedging can establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of such portfolio positions. Such hedging transactions may also limit the opportunity for gain if the values of the underlying portfolio positions should increase. Moreover, it may not be possible to hedge against an exchange rate or interest rate fluctuation that is so generally anticipated that we are not able to enter into a hedging transaction at an acceptable price. Our ability to engage in hedging transactions may also be adversely affected by recent rules adopted by the CFTC.

While we may enter into transactions to seek to reduce currency exchange rate and interest rate risks, unanticipated changes in currency exchange rates or interest rates may result in poorer overall investment performance than if we had not engaged in any such hedging transactions. In addition, the degree of correlation between price movements of the instruments used in a hedging strategy and price movements in the portfolio positions being hedged may vary. Moreover, for a variety of reasons, we may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation may prevent us from achieving the intended hedge and expose us to risk of loss. In addition, it may not be possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in non-U.S. currencies because the value of those securities is likely to fluctuate as a result of factors not related to currency fluctuations. Our ability to engage in hedging transactions may also be adversely affected by recent rules adopted by the CFTC.

New market structure requirements applicable to derivatives could significantly increase the costs of utilizing over-the-counter (“OTC”) derivatives.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) enacted, and CFTC and the SEC have issued or proposed rules to implement, both broad new regulatory requirements and broad new structural requirements applicable to OTC derivative markets and, to a lesser extent, listed commodity futures (and futures options) markets.

These changes include, but are not limited to: requirements that many categories of the most liquid OTC derivatives (currently limited to specified interest rate swaps and index credit default swaps) be executed on qualifying, regulated exchanges and be submitted for clearing; real-time public and regulatory reporting of specified information regarding OTC derivative transactions; and enhanced documentation requirements and recordkeeping requirements. Margin

requirements for uncleared OTC derivatives and position limits are also expected to be adopted by the CFTC and other regulators in the future.

While these changes are intended to mitigate systemic risk and to enhance transparency and execution quality in the OTC derivative markets, the impact of these changes is not known at this time. Furthermore, “financial end users,” such as us, that enter into OTC derivatives that are not cleared will, pending finalization of the applicable regulations, generally be required to provide margin to collateralize their obligations under such derivatives. Under current proposed rules, the level of margin that would be required to be collected in connection with uncleared OTC derivatives is in many cases substantially greater than the level currently required by market participants or clearinghouses.

Table of Contents

These changes could significantly increase the costs to us of utilizing OTC derivatives, reduce the level of exposure that we are able to obtain (whether for risk management or investment purposes) through OTC derivatives, and reduce the amounts available to us to make non-derivative investments. These changes could also impair liquidity in certain OTC derivatives and adversely affect the quality of execution pricing that we are able to obtain, all of which could adversely impact our investment returns. Furthermore, the margin requirements for cleared and uncleared OTC derivatives may require that AIM, in order to maintain its relief from the CFTC's CPO registration requirements, limit our ability to enter into hedging transactions or to obtain synthetic investment exposures, in either case adversely affecting our ability to mitigate risk.

Proposed position aggregation requirements may restrict the swap positions that AIM may enter into.

The Dodd-Frank Act significantly expanded the scope of the CFTC's authority and obligation to require reporting of, and adopt limits on, the size of positions that market participants may own or control in commodity futures and futures options contracts and swaps. The Dodd-Frank Act also narrowed existing exemptions from such position limits for a broad range of risk management transactions.

In accordance with the requirements of the Dodd-Frank Act, the CFTC is required to establish speculative position limits on additional listed futures and options on physical commodities and economically equivalent OTC derivatives; position limits applicable to swaps that are economically equivalent to United States listed futures and futures options contracts, including contracts on non-physical commodities, such as rates, currencies, equities and credit default swaps; and aggregate position limits for a broad range of derivatives contracts based on the same underlying commodity, including swaps and futures and futures options contracts.

The full impact of these recent changes is not known at this time. Individually and collectively, these changes could increase our costs of maintaining positions in commodity futures and futures option contracts and swaps and reduce the level of exposure we are able to obtain (whether for risk management or investment purposes) through commodity futures and futures option contracts and swaps. These changes could also impair liquidity in certain swaps and adversely affect the quality of execution pricing that we are able to obtain, all of which could adversely impact our investment returns.

The effects of various environmental regulations may negatively affect the aviation industry and some of our portfolio companies.

The effects of various environmental regulations may negatively affect the airline industry. This may adversely affect some of our portfolio companies. Governmental regulations regarding aircraft and engine noise and emissions levels apply based on where the relevant aircraft is registered and operated. For example, jurisdictions throughout the world have adopted noise regulations which require all aircraft to comply with noise level standards. In addition to the current requirements, the United States and the International Civil Aviation Organization ("ICAO") have adopted a new, more stringent set of standards for noise levels which applies to engines manufactured or certified on or after January 1, 2006. Currently, U.S. regulations would not require any phase-out of aircraft that qualify with the older standards applicable to engines manufactured or certified prior to January 1, 2006, but the European Union has established a framework for the imposition of operating limitations on aircraft that do not comply with the new standards and incorporated aviation-related emissions into the European Union's Emissions Trading Scheme ("ETS") beginning in 2012.

In addition to more stringent noise restrictions, the United States and other jurisdictions are beginning to impose more stringent limits on nitrogen oxide, carbon monoxide and carbon dioxide emissions from engines, consistent with current ICAO standards. Concerns over global warming also could result in more stringent limitations on the operation of aircraft.

European countries generally have relatively strict environmental regulations that can restrict operational flexibility and decrease aircraft productivity. The European Parliament has confirmed that all emissions from flights within the European Union are subject to the ETS requirement, even those emissions that are emitted outside of the European Union. The European Union suspended the enforcement of the ETS requirements for international flights outside of the European Union due to a proposal issued by the ICAO in October 2013 to develop a global program to reduce international aviation emissions, which would be enforced by 2020. In response to this, the European Commission has

proposed to amend the ETS so that only flights or portions thereof that take place in European regional airspace are subject to the ETS requirements. The potential impact of ETS and the forthcoming ICAO requirements on costs have not been completely identified. Any of these regulations could limit the economic life of the aircraft and engines, reduce their value, limit our portfolio companies' ability to lease or sell the non-compliant aircraft and engines or, if engine modifications are permitted, require our portfolio companies to make significant additional investments in the aircraft and engines to make them compliant. In addition, compliance with current or future regulations, taxes or duties imposed to deal with environmental concerns could cause our portfolio companies to incur higher costs, thereby generating lower net revenues and resulting in an adverse impact on the financial condition of such portfolio companies.

Risks Relating to our Debt Instruments

Our senior secured credit facility begins amortizing in April 2019 and any inability to renew, extend or replace the facility could adversely impact our liquidity and ability to find new investments or maintain distributions to our stockholders.

On April 24, 2015, the Company amended and restated its senior secured, multi-currency, revolving credit facility (the “Senior Secured Facility”). The amendment increased the lenders’ commitments to \$1.31 billion, extended the final maturity date through April 24, 2020, and allows the Company to seek additional commitments from new and existing lenders in the future, up to an aggregate facility size not to exceed \$1.965 billion. The Senior Secured Facility is secured by substantially all of the assets in Apollo Investment’s portfolio, including cash and cash equivalents.

Commencing May 24, 2019, the Company is required to repay, in twelve consecutive monthly installments of equal size, the outstanding amount under the Senior Secured Facility as of April 24, 2019. In addition, the stated interest rate on the facility was changed from LIBOR plus 2.00% to a formula-based calculation based on a minimum borrowing base, resulting in a stated interest rate of either LIBOR plus 1.75% or LIBOR plus 2.00%. As of March 31, 2016, the stated interest rate on the facility was LIBOR plus 2.00%. The Company is required to pay a commitment fee of 0.375% per annum on any unused portion of the Senior Secured Facility and participation and fronting fees totaling 2.25% per annum on the letters of credit issued.

There can be no assurance that we will be able to renew, extend or replace the Senior Secured Facility upon the termination of the lenders’ obligations to make new loans or the Senior Secured Facility’s final maturity on terms that are favorable to us, if at all. Our ability to renew, extend or replace the Senior Secured Facility will be constrained by then-current economic conditions affecting the credit markets. In the event that we are not able to renew, extend or replace the Senior Secured Facility at the time of the termination of the lenders’ obligations to make new loans or the Senior Secured Facility’s final maturity, this could have a material adverse effect on our liquidity and ability to fund new investments, our ability to make distributions to our stockholders and our ability to qualify as a RIC.

Our senior secured notes and unsecured notes have maturity dates over the course of the next several years, and any inability to replace or repay our senior secured notes or unsecured notes could adversely impact our liquidity and ability to fund new investments or maintain distributions to our stockholders.

On September 29, 2011, the Company closed a private offering of \$45 million aggregate principal amount of senior secured notes consisting of two series: \$29 million aggregate principal amount of 5.875% Senior Secured Notes, Series A, due September 29, 2016 (the “Series A Notes”); and \$16 million aggregate principal amount of 6.250% Senior Secured Notes, Series B, due September 29, 2018 (the “Series B Notes”).

On October 9, 2012, the Company issued \$150 million aggregate principal amount of 6.625% senior unsecured notes due October 15, 2042 (the “2042 Notes”). On June 17, 2013, the Company issued \$135 million aggregate principal amount of 6.875% senior unsecured notes due July 15, 2043 (the “2043 Notes”). On June 24, 2013, an additional \$15 million aggregate principal amount of the 2043 Notes was issued pursuant to the underwriters’ over-allotment option exercise. On March 3, 2015, the Company issued \$350 million aggregate principal amount of 5.250% senior unsecured notes due March 3, 2025 (the “2025 Notes”).

There can be no assurance that we will be able to replace the Series A Notes, the Series B Notes, the 2042 Notes, the 2043 Notes or the 2025 Notes upon their maturity on terms that are favorable to us, if at all. Our ability to replace the Series A Notes, the Series B Notes, the 2042 Notes, the 2043 Notes or the 2025 Notes will be constrained by then-current economic conditions affecting the credit markets. In the event that we are not able to replace or repay the Series A Notes, the Series B Notes, the 2042 Notes, the 2043 Notes or the 2025 Notes at the time of their maturity, this could have a material adverse effect on our liquidity and ability to fund new investments, our ability to make distributions to our stockholders and our ability to qualify as a RIC.

Table of Contents

The trading market or market value of our debt securities may fluctuate.

Our publicly issued debt securities may or may not have an established trading market. We cannot assure you that a trading market for debt securities will ever develop or be maintained if developed. In addition to our creditworthiness, many factors may materially adversely affect the trading market for, and market value of, debt securities we may issue. These factors include, but are not limited to, the following:

- the time remaining to the maturity of these debt securities;
- the outstanding principal amount of debt securities with terms identical to these debt securities;
- the ratings assigned by national statistical ratings agencies;
- the general economic environment;
- the supply of debt securities trading in the secondary market, if any;
- the redemption or repayment features, if any, of these debt securities;
- the level, direction and volatility of market interest rates generally; and
- market rates of interest higher or lower than rates borne by the debt securities.

You should also be aware that there may be a limited number of buyers if and when you decide to sell your debt securities. This too may materially adversely affect the market value of the debt securities or the trading market for the debt securities

Terms relating to redemption may materially adversely affect your return on any debt securities that we may issue.

If our noteholders' debt securities are redeemable at our option, we may choose to redeem your debt securities at times when prevailing interest rates are lower than the interest rate paid on your debt securities. In addition, if our noteholders' debt securities are subject to mandatory redemption, we may be required to redeem such debt securities also at times when prevailing interest rates are lower than the interest rate paid on such debt securities. In this circumstance, a noteholder may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as the debt securities being redeemed.

Our credit ratings may not reflect all risks of an investment in our debt securities.

Our credit ratings are an assessment by third parties of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of our debt securities. Our credit ratings, however, may not reflect the potential impact of risks related to market conditions generally or other factors discussed above on the market value of or trading market for the publicly issued debt securities.

Risks Relating to Issuance of our Preferred Stock

An investment in our preferred stock should not constitute a complete investment program.

If we issue preferred stock, the net asset value and market value of our common stock may become more volatile.

We cannot assure you that the issuance of preferred stock would result in a higher yield or return to the holders of the common stock. The issuance of preferred stock would likely cause the net asset value and market value of the common stock to become more volatile. If the dividend rate on the preferred stock were to approach the net rate of return on our investment portfolio, the benefit of leverage to the holders of the common stock would be reduced. If the dividend rate on the preferred stock were to exceed the net rate of return on our portfolio, the leverage would result in a lower rate of return to the holders of common stock than if we had not issued preferred stock. Any decline in the net asset value of our investments would be borne entirely by the holders of common stock. Therefore, if the market value of our portfolio were to decline, the leverage would result in a greater decrease in net asset value to the holders of common stock than if we were not leveraged through the issuance of preferred stock. This greater net asset value decrease would also tend to cause a greater decline in the market price for the common stock.

Table of Contents

We might be in danger of failing to maintain the required asset coverage of the preferred stock or of losing our ratings on the preferred stock or, in an extreme case, our current investment income might not be sufficient to meet the dividend requirements on the preferred stock. In order to counteract such an event, we might need to liquidate investments in order to fund a redemption of some or all of the preferred stock. In addition, we would pay (and the holders of common stock would bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred stock, including higher advisory fees if our total return exceeds the dividend rate on the preferred stock. Holders of preferred stock may have different interests than holders of common stock and may at times have disproportionate influence over our affairs.

The issuance of shares of preferred stock with dividend or conversion rights, liquidation preferences or other economic terms favorable to the holders of preferred stock could adversely affect the market price for our common stock by making an investment in the common stock less attractive. In addition, the dividends on any preferred stock we issue must be cumulative. Payment of dividends and repayment of the liquidation preference of preferred stock must take preference over any dividends or other payments to our common stockholders, and holders of preferred stock are not subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference (other than convertible preferred stock that converts into common stock). In addition, under the 1940 Act, preferred stock constitutes a “senior security” for purposes of the 200% asset coverage test.

Holders of any preferred stock we might issue would have the right to elect members of the Board of Directors and class voting rights on certain matters.

Holders of any preferred stock we might issue, voting separately as a single class, would have the right to elect two members of the Board of Directors at all times and in the event dividends become two full years in arrears would have the right to elect a majority of the directors until such arrearage is completely eliminated. In addition, preferred stockholders have class voting rights on certain matters, including changes in fundamental investment restrictions and conversion to open-end status, and accordingly can veto any such changes. Restrictions imposed on the declarations and payment of dividends or other distributions to the holders of our common stock and preferred stock, both by the 1940 Act and by requirements imposed by rating agencies or the terms of our credit facilities, might impair our ability to maintain our qualification as a RIC for federal income tax purposes. While we would intend to redeem our preferred stock to the extent necessary to enable us to distribute our income as required to maintain our qualification as a RIC, there can be no assurance that such actions could be effected in time to meet the tax requirements.

Risks Relating to an Investment in our Common Stock

Investing in our securities involves a high degree of risk and is highly speculative.

The investments we make in accordance with our investment objective may result in a higher amount of risk than alternative investment options and volatility or loss of principal. Our investments in portfolio companies may be highly speculative and aggressive, therefore, an investment in our securities may not be suitable for someone with a low risk tolerance.

There is a risk that investors in our equity securities may not receive distributions or that our distributions may not grow over time and that investors in our debt securities may not receive all of the interest income to which they are entitled.

We intend to make distributions on a quarterly basis to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. In addition, due to the asset coverage test applicable to us as a BDC, we may in the future be limited in our ability to make distributions. Also, our revolving credit facility may limit our ability to declare dividends if we default under certain provisions or fail to satisfy certain other conditions. If we do not distribute a certain percentage of our income annually, we will suffer adverse tax consequences, including possible loss of the tax benefits available to us as a RIC. In addition, in accordance with U.S. generally accepted accounting principles and tax regulations, we include in income certain amounts that we have not yet received in cash, such as contractual payment-in-kind interest, which represents contractual interest added to the loan balance that becomes due at the end of the loan term, or the accrual of original issue or market discount. Since we may recognize

income before or without receiving cash representing such income, we may have difficulty meeting the requirement to distribute at least 90% of our investment company taxable income to obtain tax benefits as a RIC.

We will be subject to a 4% non-deductible federal excise tax on certain undistributed income of RICs unless we distribute in a timely manner an amount at least equal to the sum of (1) 98% of our ordinary income for each calendar year, (2) 98.2% of our capital gain net income for the one-year period ending October 31 in that calendar year and (3) any income recognized, but not distributed, in preceding years. We will not be subject to excise taxes on amounts on which we are required to pay corporate income taxes (such as retained net capital gains). Finally, if more stockholders opt to receive cash distributions rather than participate in our dividend reinvestment plan, we may be forced to liquidate some of our investments and raise cash in order to make cash distribution payments.

Table of Contents

Our shares may trade at discounts from net asset value or at premiums that are unsustainable over the long term. Shares of business development companies may trade at a market price that is less than the net asset value that is attributable to those shares. This characteristic of closed-end investment companies is separate and distinct from the risk that our net asset value per share may decline. The possibility that our shares of common stock will trade at a discount from net asset value or at a premium that is unsustainable over the long term are separate and distinct from the risk that our net asset value will decrease. It is not possible to predict whether shares will trade at, above, or below net asset value.

Investigations and reviews of Apollo affiliates' use of placement agents could harm Apollo Investment's reputation, depress its stock price or have other negative consequences.

While Apollo Investment has not, to date, raised any funds through the use of placement agents (other than through the ordinary course engagement of underwriters, from time to time, in connection with the public offering of Apollo Investment's securities), affiliates of AIM sometimes use placement agents to assist in marketing certain of the investment funds that they manage. Various state attorneys general and federal and state agencies have initiated industry-wide investigations into the use of placement agents in connection with the solicitation of investments, particularly with respect to investments by public pension funds. Certain affiliates of AGM have received subpoenas and other requests for information from various government regulatory agencies and investors in AGM's funds, seeking information regarding the use of placement agents. On October 14, 2009, the California Public Employees' Retirement System ("CalPERS"), one of AGM's strategic investors, announced that it had initiated a special review of placement agents and related issues. The report of the CalPERS special review was issued on March 14, 2011. That report does not allege any wrongdoing on the part of AGM or its affiliates. AGM is continuing to cooperate with all such investigations and other revisions. In addition, on May 6, 2010, the California Attorney General filed a civil complaint against Alfred Villalobos and his company, Arvco Capital Research, LLC ("Arvco"), a placement agent that AGM had used, and Federico Buenrostro Jr., the former CEO of CalPERS, alleging conduct in violation of certain California laws in connection with CalPERS' purchase of securities in various funds managed by AGM and another asset manager. No AGM entity is a party to the civil lawsuit, nor does the lawsuit allege any misconduct on the part of Apollo Investment, AIM or AGM. Likewise, on April 23, 2012, the SEC filed a lawsuit alleging securities fraud on the part of Arvco, as well as Messrs. Buenrostro and Villalobos, in connection with their activities concerning certain CalPERS investments in funds managed by AGM. This lawsuit also does not allege wrongdoing on the part of AGM, and in fact alleges that AGM was defrauded by Arvco, Villalobos, and Buenrostro. In January 2016, the court dismissed all claims against Mr. Villalobos due to his death and thereafter entered final judgments as to the remaining defendants pursuant to those defendants' consent to the entry of judgment against them. On March 14, 2013, the United States Department of Justice unsealed an indictment against Messrs. Villalobos and Buenrostro alleging, among other crimes, fraud in connection with those same activities; again, AGM is not accused of any wrongdoing and in fact is alleged to have been defrauded by the defendants. The criminal action was set for trial in a San Francisco federal court in July 2014, but was put on hold after Mr. Buenrostro pleaded guilty on July 11, 2014. As part of Mr. Buenrostro's plea agreement, he admitted to taking cash and other bribes from Mr. Villalobos in exchange for several improprieties, including attempting to influence CalPERS' investing decisions and improperly preparing disclosure letters to satisfy AGM's requirements. There is no suggestion that AGM was aware that Mr. Buenrostro had signed the letters with a corrupt motive. The government has indicated that they will file new charges against Mr. Villalobos incorporating Mr. Buenrostro's admissions. On August 7, 2014, the government filed a superseding indictment against Mr. Villalobos asserting additional charges. The trial was scheduled for February 23, 2015, but Mr. Villalobos passed away on January 13, 2015. Additionally, on April 15, 2013, Mr. Villalobos, Arvco and related entities (the "Arvco Debtors") brought a civil action in the United States Bankruptcy Court for the District of Nevada (the "Bankruptcy Court") against AGM. The action is related to the ongoing bankruptcy proceedings of the Arvco Debtors. This action alleges that Arvco served as a placement agent for AGM in connection with several funds associated with AGM, and seeks to recover purported fees the Arvco Debtors claim AGM has not paid them for a portion of placement agent services. In addition, the Arvco Debtors allege that AGM has interfered with the Arvco Debtors' commercial relationships with third parties, purportedly causing the Arvco Debtors to lose business and to

incur fees and expenses in the defense of various investigations and litigations. The Arvco Debtors also seek compensation from AGM for these alleged lost profits and fees and expenses. The Arvco Debtors' complaint asserts various theories of recovery under the Bankruptcy Code and common law. AGM denies the merit of all of the Arvco Debtors' claims and will vigorously contest them. The Bankruptcy Court has stayed this action pending the result in the criminal case against Mr. Villalobos. AGM has moved to dismiss the first amended complaint. The motion is pending. For these reasons, no estimate of possible loss, if any, can be made at this time.

35

Table of Contents

The market price of our securities may fluctuate significantly.

The market price and liquidity of the market for our securities may be significantly affected by numerous factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include:

- volatility in the market price and trading volume of securities of business development companies or other companies in our sector, which are not necessarily related to the operating performance of these companies;
- changes in regulatory policies or tax guidelines, particularly with respect to RICs or business development companies;
- the inclusion or exclusion of our common stock from certain indices;
- changes in law, regulatory policies or tax guidelines, or interpretations thereof, particularly with respect to RICs or BDCs;
- loss of RIC status;
- changes in earnings or variations in operating results;
- changes in the value of our portfolio of investments;
- any shortfall in revenue or net income or any increase in losses from levels expected by investors or securities analysts;
- departure of AIM's key personnel;
- operating performance of companies comparable to us;
- short-selling pressure with respect to shares of our common stock or BDCs generally;
- uncertainty surrounding the strength of the U.S. economic recovery;
- concerns regarding volatility in the Chinese stock market and Chinese currency;
- concerns regarding continued volatility of oil prices;
- general economic trends and other external factors; and
- loss of a major funding source.

We may be unable to invest the net proceeds raised from offerings on acceptable terms, which would harm our financial condition and operating results.

Until we identify new investment opportunities, we intend to either invest the net proceeds of future offerings in interest-bearing deposits or other short-term instruments or use the net proceeds from such offerings to reduce then-outstanding obligations under our credit facility. We cannot assure you that we will be able to find enough appropriate investments that meet our investment criteria or that any investment we complete using the proceeds from an offering will produce a sufficient return.

Sales of substantial amounts of our securities may have an adverse effect on the market price of our securities.

Sales of substantial amounts of our securities, or the availability of such securities for sale, could adversely affect the prevailing market prices for our securities. If this occurs and continues, it could impair our ability to raise additional capital through the sale of securities should we desire to do so.

If you do not fully exercise your subscription rights in any rights offering of our common stock, your interest in us may be diluted and, if the subscription price is less than our net asset value per share, you may experience an immediate dilution of the aggregate net asset value of your shares.

In the event we issue subscription rights to acquire shares of our common stock, stockholders who do not fully exercise their subscription rights should expect that they will, at the completion of the rights offering, own a smaller proportional interest in us than would be the case if they fully exercised their rights. In addition, if the subscription price is less than the net asset value per share of our common stock, a stockholder who does not fully exercise its subscription rights may experience an immediate dilution of the aggregate net asset value of its shares as a result of the offering. We would not be able to state the amount of any such dilution prior to knowing the results of the offering. Such dilution could be substantial.

Table of Contents

Stockholders may experience dilution in their ownership percentage if they do not participate in our dividend reinvestment plan.

All distributions declared in cash payable to stockholders that are participants in our dividend reinvestment plan are generally automatically reinvested in shares of our common stock. As a result, stockholders that do not participate in the dividend reinvestment plan may experience dilution over time. stockholders who do not elect to receive distributions in shares of common stock may experience accretion to the net asset value of their shares if our shares are trading at a premium and dilution if our shares are trading at a discount. The level of accretion or discount would depend on various factors, including the proportion of our stockholders who participate in the plan, the level of premium or discount at which our shares are trading and the amount of the distribution payable to a stockholder.

Table of Contents

USE OF PROCEEDS

Unless otherwise specified in a prospectus supplement, we intend to use the net proceeds from selling securities pursuant to this prospectus for general corporate purposes, which include investing in portfolio companies in accordance with our investment objective and strategies and repaying indebtedness incurred under our senior credit facility. We anticipate that substantially all of the net proceeds of an offering of securities pursuant to this prospectus will be used within two years, depending on the availability of appropriate investment opportunities consistent with our investment objective and market conditions. Our portfolio is comprised primarily of investments in debt, including secured and unsecured debt of private middle market companies that, in the case of senior secured loans, generally are not broadly syndicated and whose aggregate tranche size is typically less than \$250 million. Our portfolio also includes equity interests such as common stock, preferred stock, warrants or options. Pending our investments in new debt investments, we plan to invest a portion of the net proceeds from an offering in cash equivalents, U.S. government securities and other high-quality debt investments that mature in one year or less from the date of investment, to reduce then-outstanding obligations under our debt instruments, or for other general corporate purposes. The management fee payable by us will not be reduced while our assets are invested in such securities. See “Regulation—Temporary investments” for additional information about temporary investments we may make while waiting to make longer-term investments in pursuit of our investment objective. The supplement to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering.

Table of Contents

DISTRIBUTIONS

We intend to continue to pay dividends or make other distributions on a quarterly basis to our stockholders. Our quarterly distributions, if any, will be determined by our board of directors. We expect that our distributions to stockholders generally will be from accumulated net investment income and from cumulative net realized capital gains, as applicable, although a portion may represent a return of capital.

We have elected to be taxed as a RIC under Subchapter M of the Code. To maintain our RIC status, we must distribute at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, out of the assets legally available for distribution. In addition, although we currently intend to distribute realized net capital gains (i.e., net long-term capital gains in excess of net short-term capital losses), if any, at least annually, out of the assets legally available for such distributions, we may in the future decide to retain such capital gains for investment. In addition, we have substantial net capital loss carryforwards and consequently do not expect to generate cumulative net capital gains in the foreseeable future.

We maintain an “opt out” dividend reinvestment plan for our common stockholders. As a result, if we declare a distribution, then stockholders’ cash dividends will be automatically reinvested in additional shares of our common stock, unless they specifically “opt out” of the dividend reinvestment plan so as to receive cash dividends.

We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of these distributions from time to time. In addition, due to the asset coverage test applicable to us as a business development company, we may in the future be limited in our ability to make distributions. Also, our revolving credit facility may limit our ability to declare dividends if we default under certain provisions or fail to satisfy certain other conditions. If we do not distribute a certain percentage of our income annually, we may suffer adverse tax consequences, including possible loss of the tax benefits available to us as a regulated investment company. In addition, in accordance with U.S. generally accepted accounting principles and tax regulations, we include in income certain amounts that we have not yet received in cash, such as contractual PIK interest, which represents contractual interest added to the loan balance that becomes due at the end of the loan term, or the accrual of original issue or market discount. Since we may recognize income before or without receiving cash representing such income, we may not be able to meet the requirement to distribute at least 90% of our investment company taxable income to obtain tax benefits as a regulated investment company.

With respect to the distributions to stockholders, income from origination, structuring, closing, commitment and other upfront fees associated with investments in portfolio companies is treated as taxable income and accordingly, distributed to stockholders.

All distributions declared in cash payable to stockholders that are participants in our dividend reinvestment plan are generally automatically reinvested in shares of our common stock. As a result, stockholders that do not participate in the dividend reinvestment plan may experience dilution over time. Stockholders who do not elect to receive distributions in shares of common stock may experience accretion to the net asset value of their shares if our shares are trading at a premium and dilution if our shares are trading at a discount. The level of accretion or discount would depend on various factors, including the proportion of our stockholders who participate in the plan, the level of premium or discount at which our shares are trading and the amount of the distribution payable to a stockholder.

Table of Contents

The following table lists the quarterly distributions per share from our common stock for the past two fiscal years and the current fiscal year.

Record Dates	Payment Dates	Distribution Amount Per Share
Year Ended March 31, 2017		
12/21/2016	1/5/2017	\$ 0.15
9/21/2016	10/5/2016	\$ 0.15
6/21/2016	7/6/2016	\$ 0.20
Year Ended March 31, 2016		
3/21/2016	4/6/2016	\$ 0.20
12/21/2015	1/5/2016	\$ 0.20
9/21/2015	10/6/2015	\$ 0.20
6/19/2015	7/6/2015	\$ 0.20
Year Ended March 31, 2015		
3/20/2015	4/6/2015	\$ 0.20
12/19/2014	1/5/2015	\$ 0.20
9/19/2014	10/6/2014	\$ 0.20
6/20/2014	7/7/2014	\$ 0.20

SELECTED FINANCIAL DATA

The following selected financial and other data for the fiscal years ended March 31, 2016, 2015, 2014, 2013 and 2012 are derived from our financial statements which have been audited by PricewaterhouseCoopers LLP, our independent registered public accounting firm.

This selected financial data should be read in conjunction with our financial statements and related notes thereto and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included elsewhere in this prospectus.

	Year Ended March 31,				
	2016	2015	2014	2013	2012
Summary of Operations					
Total investment income	\$379,745	433,631	381,346	331,994	357,584
Net expenses	186,488	205,658	180,098	164,634	184,842
Net investment income	193,257	227,973	201,248	167,360	172,742
Net realized and change in unrealized gains (losses)	(237,783)	(152,551)	69,624	(62,889)	(259,006)
Net increase (decrease) in net assets resulting from operations	(44,526)	75,422	270,872	104,471	(86,264)
Per Share Data					
Net asset value	\$7.28	\$8.18	\$8.67	\$8.27	\$8.55
Net investment income	0.83	0.96	0.91	0.83	0.88
Earnings (loss) per share (Basic)	(0.19)	0.32	1.21	0.51	(0.44)
Earnings (loss) per share (Diluted) (2)	(0.19)	0.32	1.18	0.51	(0.44)
Distributions declared	0.80	0.8	0.8	0.8	1.04
Balance Sheet Data					
Total assets	\$3,093,287	\$3,560,891	\$3,641,951	\$2,944,312	\$2,775,263
Total debt outstanding	1,312,960	1,498,759	1,372,261	1,156,067	1,009,337
Net assets	1,645,581	1,937,608	2,051,611	1,677,389	1,685,231
Other Data					
Total return (1)	(17.53)%	1.86%	9.40%	28.24%	(32.40)%
Number of portfolio companies at year end	89	105	111	81	62
Total portfolio investments for the year	\$1,088,517	2,211,081	2,816,149	1,537,366	1,480,508
Investment sales and repayments for the year	\$1,338,689	2,250,782	2,322,189	1,337,431	1,634,520
Weighted average yield on debt portfolio at year end	11.00%	11.2%	11.1%	11.9%	11.9%
Weighted average shares outstanding (Basic)	232,555,815	236,741,351	222,800,255	202,875,329	196,583,804
Weighted average shares outstanding (Diluted) (2)	232,555,815	236,741,351	237,348,355	202,875,329	196,583,804

(1) Total return is based on the change in market price per share and takes into account dividends and distributions, if any, reinvested in accordance with our dividend reinvestment plan.

In applying the if-converted method, conversion is not assumed for purposes of computing diluted EPS if the effect (2) would be anti-dilutive. For the years ended March 31, 2016, 2015, 2013 and 2012, anti-dilution would total \$0.04, \$0.02, \$0.02 and \$0.08, respectively.

FORWARD-LOOKING STATEMENTS

Some of the statements in this prospectus constitute forward-looking statements, which relate to future events or our future performance or financial condition. The forward-looking statements contained in this prospectus involve risks and uncertainties, including statements as to:

- our future operating results;
- our business prospects and the prospects of our portfolio companies;
- the impact of investments that we expect to make;
- our contractual arrangements and relationships with third parties;
- the dependence of our future success on the general economy and its impact on the industries in which we invest;
- the ability of our portfolio companies to achieve their objectives;
- our expected financings and investments;
- the adequacy of our cash resources and working capital; and
- the timing of cash flows, if any, from the operations of our portfolio companies.

We generally use words such as “anticipates,” “believes,” “expects,” “intends” and similar expressions to identify forward-looking statements. Our actual results could differ materially from those projected in the forward-looking statements for any reason, including the factors set forth in “Risk Factors” and elsewhere in this prospectus.

We have based the forward-looking statements included in this prospectus on information available to us on the date of this prospectus. Although we undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, we have a general obligation to update to reflect material changes in our disclosures and you are advised to consult any additional disclosures that we may make directly to you or through reports that we in the future may file with the SEC, including annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our financial statements and related notes and other financial information appearing elsewhere in this prospectus. In addition to historical information, the following discussion and other parts of this prospectus contain forward-looking information that involves risks and uncertainties. Our actual results could differ materially from those anticipated by such forward-looking information due to the factors discussed under "Risk Factors" and "Forward-Looking Statements" appearing elsewhere in this prospectus.

Overview

Apollo Investment Corporation (the "Company," "Apollo Investment," "AIC," "we," "us," or "our") was incorporated under the Maryland General Corporation Law in February 2004. We have elected to be treated as a business development company ("BDC") under the Investment Company Act of 1940 (the "1940 Act"). As such, we are required to comply with certain regulatory requirements. For instance, we generally have to invest at least 70% of our total assets in "qualifying assets," including securities of private or thinly traded public U.S. companies, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less. In addition, for federal income tax purposes we have elected to be treated as a regulated investment company ("RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). Pursuant to this election and assuming we qualify as a RIC, we generally do not have to pay corporate-level federal income taxes on any income we distribute to our stockholders. We commenced operations on April 8, 2004 upon completion of our initial public offering that raised \$870 million in net proceeds from selling 62 million shares of common stock at a price of \$15.00 per share. Since then, and through March 31, 2016, we have raised approximately \$2.21 billion in net proceeds from additional offerings of common stock and we have repurchased common stock for \$62.4 million.

Apollo Investment Management, L.P. (the "investment adviser" or "AIM") is our investment adviser and a wholly-owned subsidiary of Apollo Global Management, LLC ("AGM"). The investment adviser, subject to the overall supervision of our Board of Directors, manages the day-to-day operations of, and provides investment advisory services to the Company. AGM and other affiliates manage other funds that may have investment mandates that are similar, in whole or in part, with ours. AIM and its affiliates may determine that an investment is appropriate both for us and for one or more of those other funds. In such event, depending on the availability of such investment and other appropriate factors, AIM may determine that we should invest on a side-by-side basis with one or more other funds. We make all such investments subject to compliance with applicable regulations and interpretations, and our allocation procedures. Certain types of negotiated co-investments may be made only in accordance with the terms of the exemptive order we received from the SEC permitting us to do so.

Apollo Investment Administration, LLC (the administrator or "AIA"), an affiliate of AGM, provides, among other things, administrative services and facilities for the Company. In addition to furnishing us with office facilities, equipment, and clerical, bookkeeping and recordkeeping services, AIA also oversees our financial records as well as prepares our reports to stockholders and reports filed with the SEC. AIA also performs the calculation and publication of our net asset value, the payment of our expenses and oversees the performance of various third-party service providers and the preparation and filing of our tax returns. Furthermore, AIA provides on our behalf managerial assistance to those portfolio companies to which we are required to provide such assistance.

Investments

Our investment objective is to generate current income and capital appreciation. We invest primarily in various forms of debt investments, including secured and unsecured debt, loan investments, and/or equity in private middle-market companies. We may also invest in the securities of public companies and in structured products and other investments such as collateralized loan obligations ("CLOs") and credit-linked notes ("CLNs"). Our portfolio is comprised primarily of investments in debt, including secured and unsecured debt of private middle-market companies that, in the case of senior secured loans, generally are not broadly syndicated and whose aggregate tranche size is typically less than \$250 million. Our portfolio also includes equity interests such as common stock, preferred stock, warrants or options.

Our level of investment activity can and does vary substantially from period to period depending on many factors, including the amount of debt and equity capital available to middle-market companies, the level of merger and acquisition activity for such companies, the general economic environment, and the competitive environment for the types of investments we make. As a BDC, we must not acquire any assets other than “qualifying assets” specified in the 1940 Act unless, at the time the acquisition is made, at least 70% of our total assets are qualifying assets (with certain limited exceptions).

Revenue

We generate revenue primarily in the form of interest and dividend income from the securities we hold and capital gains, if any, on investment securities that we may acquire in portfolio companies. Our debt investments, whether in the form of mezzanine or senior secured loans, generally have a stated term of five to ten years and bear interest at a fixed rate or a floating rate usually determined on

Table of Contents

the basis of a benchmark, such as the London Interbank Offered Rate (“LIBOR”), the Euro Interbank Offered Rate (“EURIBOR”), the federal funds rate or the prime rate. Interest on debt securities is generally payable quarterly or semiannually and while U.S. subordinated debt and corporate notes typically accrue interest at fixed rates, some of our investments may include zero coupon and/or step-up bonds that accrue income on a constant yield to call or maturity basis. In addition, some of our investments provide for payment-in-kind (“PIK”) interest or dividends. Such amounts of accrued PIK interest or dividends are added to the cost of the investment on the respective capitalization dates and generally become due at maturity of the investment or upon the investment being called by the issuer. We may also generate revenue in the form of commitment, origination, structuring fees, fees for providing managerial assistance and, if applicable, consulting fees, etc.

Expenses

For all investment professionals of AIM and their staff, when and to the extent engaged in providing investment advisory and management services to us, the compensation and routine overhead expenses of that personnel which is allocable to those services are provided and paid for by AIM. We bear all other costs and expenses of our operations and transactions, including those relating to:

- investment advisory and management fees;
- expenses incurred by AIM payable to third parties, including agents, consultants or other advisors, in monitoring our financial and legal affairs and in monitoring our investments and performing due diligence on our prospective portfolio companies;
- calculation of our net asset value (including the cost and expenses of any independent valuation firm);
- direct costs and expenses of administration, including independent registered public accounting and legal costs;
- costs of preparing and filing reports or other documents with the SEC;
- interest payable on debt, if any, incurred to finance our investments;
- offerings of our common stock and other securities;
- registration and listing fees;
- fees payable to third parties, including agents, consultants or other advisors, relating to, or associated with, evaluating and making investments;
- transfer agent and custodial fees;
- taxes;
- independent directors’ fees and expenses;
- marketing and distribution-related expenses;
- the costs of any reports, proxy statements or other notices to stockholders, including printing and postage costs;
- our allocable portion of the fidelity bond, directors and officers/errors and omissions liability insurance, and any other insurance premiums;
- organizational costs; and
- all other expenses incurred by us or the administrator in connection with administering our business, such as our allocable portion of overhead under the administration agreement, including rent and our allocable portion of the cost of our Chief Financial Officer, Chief Compliance Officer and their respective staffs.

We expect our general and administrative operating expenses related to our ongoing operations to increase moderately in dollar terms. During periods of asset growth, we generally expect our general and administrative operating expenses to decline as a percentage of our total assets and increase during periods of asset declines. Incentive fees, interest expense and costs relating to future offerings of securities, among others, may also increase or reduce overall operating expenses based on portfolio performance, interest rate benchmarks, and offerings of our securities relative to comparative periods, among other factors.

Table of Contents

Portfolio and Investment Activity

Our portfolio and investment activity during the years ended March 31, 2016 and March 31, 2015 was as follows:

(in millions)*	Year Ended March	
	31, 2016	2015
Investments made in portfolio companies	\$1,088.5	\$2,211.1
Investments sold	(738.4)	(1,406.9)
Net activity before repaid investments	350.1	804.1
Investments repaid	(600.3)	(843.8)
Net investment activity	\$(250.2)	\$(39.7)
Portfolio companies at beginning of period	105	111
Number of new portfolio companies	22	60
Number of exited portfolio companies	(38)	(66)
Portfolio companies at end of period	89	105
Number of investments in existing portfolio companies	35	47

*Totals may not foot due to rounding.

Our portfolio composition and weighted average yields as of March 31, 2016 and March 31, 2015 were as follows:

	March 31, 2016	March 31, 2015
Portfolio composition, at fair value:		
Secured debt	65 %	60 %
Unsecured debt	9 %	14 %
Structured products and other	11 %	11 %
Preferred equity	3 %	5 %
Common equity/interests and warrants	12 %	10 %
Weighted average yields, at amortized cost basis, exclusive of securities on non-accrual status (1):		
Secured debt portfolio	11.0 %	11.2 %
Unsecured debt portfolio	10.7 %	10.9 %
Total debt portfolio	11.0 %	11.2 %
Income-bearing investment portfolio composition, at fair value:		
Fixed rate amount	\$1.1 billion	\$1.3 billion
Floating rate amount	\$1.2 billion	\$1.4 billion
Fixed rate, as percentage of total	47 %	48 %
Floating rate, as percentage of total	53 %	52 %
Income-bearing investment portfolio composition, at amortized cost:		
Fixed rate amount	\$1.1 billion	\$1.4 billion
Floating rate amount	\$1.3 billion	\$1.4 billion
Fixed rate, as percentage of total	47 %	50 %
Floating rate, as percentage of total	53 %	50 %

(1)An investor's yield may be lower than the portfolio yield due to sales loads and other expenses.

Table of Contents

Since the initial public offering of Apollo Investment in April 2004 and through March 31, 2016, invested capital totaled \$16.4 billion in 371 portfolio companies. Over the same period, Apollo Investment completed transactions with more than 100 different financial sponsors.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses, gains and losses. Changes in the economic environment, financial markets, credit worthiness of portfolio companies and any other parameters used in determining such estimates could cause actual results to differ materially. In addition to the discussion below, our critical accounting policies are further described in the Notes to the Financial Statements.

Results of Operations

Operating results for the years ended March 31, 2016, 2015 and 2014 were as follows:

(in millions)*	Year Ended March 31,		
	2016	2015	2014
Investment income			
Interest income	\$310.3	\$388.6	\$336.7
Dividend income	57.8	32.5	31.8
Other income	11.6	12.5	12.9
Total investment income	\$379.7	\$433.6	\$381.3
Expenses			
Management and performance-based incentive fees, net of amounts waived	\$90.7	\$111.2	\$97.7
Interest and other debt expenses, net of reimbursements	80.8	79.2	68.6
Administrative services expense, net of reimbursements	6.3	5.7	5.6
Other general and administrative expenses	8.7	9.5	8.3
Net expenses	\$186.5	\$205.7	\$180.1
Net investment income	\$193.3	\$228.0	\$201.2
Net realized and change in unrealized gains (losses)			
Net realized losses	\$(195.4)	\$(13.4)	\$(106.5)
Net change in unrealized gains (losses)	(42.4)	(139.2)	176.1
Net realized and change in unrealized gains (losses)	(237.8)	(152.6)	69.6
Net increase (decrease) in net assets resulting from operations	\$(44.5)	\$75.4	\$270.9
Net investment income on per average share basis	\$0.83	\$0.96	\$0.91
Earnings (Loss) per share — basic	\$(0.19)	\$0.32	\$1.21
Earnings (Loss) per share — diluted (1)	\$(0.19)	\$0.32	\$1.18

*Totals may not foot due to rounding.

In applying the if-converted method, conversion is not assumed for purposes of computing diluted EPS if the effect (1) would be anti-dilutive. For the years ended March 31, 2016 and March 31, 2015, anti-dilution would total \$0.04 and \$0.02, respectively.

Total Investment Income

For the year ended March 31, 2016 as compared to the year ended March 31, 2015

The decrease in total investment income for the year ended March 31, 2016 compared to the year ended March 31, 2015 was primarily driven by a decrease in interest income of \$78.3 million due to a lower income-bearing investment portfolio, an increase in investments on non-accrual status, and a decrease in prepayment fees and income recognized from the acceleration of OID on repaid investments which totaled \$12.9 million and \$44.0 million for the years ended March 31, 2016 and March 31, 2015, respectively. The decrease in total investment income was partially offset by an

increase in dividend income of \$25.3 million, primarily due to distributions

46

Table of Contents

received from the following portfolio companies: AMP Solar (UK) Limited; Dynamic Product Tankers, LLC; Golden Bear Warehouse LLC; Golden Hill CLO I, LLC; Merx Aviation Finance, LLC; and MSEA Tankers LLC.

For the year ended March 31, 2015 as compared to the year ended March 31, 2014

The increase in total investment income for the year ended March 31, 2015 compared to the year ended March 31, 2014 was primarily due to the increase in interest income. Interest income increased due to an increase in the investment portfolio size, which increased to an average cost of \$3.5 billion for the year ended March 31, 2015 from an average cost of \$3.2 billion for the year ended March 31, 2014. The increase in total investment income was also due to an increase in prepayment fees and income recognized from the acceleration of OID on repaid investments which totaled \$44.0 million for the year ended March 31, 2015 as compared to \$24.8 million for the year ended March 31, 2014.

Net Expenses

For the year ended March 31, 2016 as compared to the year ended March 31, 2015

The decrease in expenses for the year ended March 31, 2016 compared to the year ended March 31, 2015 was primarily driven by a decrease of \$20.5 million in management and performance-based incentive fees (net of amounts waived) due to lower average gross assets, a higher CION fee offset, lower investment income, and reversal of prior period incentive fee due to lower than par realization on certain PIK investments. The decrease in management and performance-based incentive fees was partially offset by an increase of \$1.5 million in interest and other debt expenses, primarily due to the issuance of the 2025 Notes in March 2015, which increased the total cost of debt from 4.98% for the year ended March 31, 2015 to 5.45% for the year ended March 31, 2016. The increase in interest expense related to the 2025 Notes was partially offset by decreased utilization of the Senior Secured Facility, the repayment of the Senior Secured Notes in October 2015, and the repayment of the Convertible Notes in January 2016, which collectively decreased the average debt outstanding from \$1.59 billion during the year ended March 31, 2015 to \$1.47 billion during the year ended March 31, 2016.

For the year ended March 31, 2015 as compared to the year ended March 31, 2014

The increase in expenses for the year ended March 31, 2015 compared to the year ended March 31, 2014 was primarily driven by an increase of \$13.5 million in management and performance-based incentive fees (net of amounts waived) due to the increase in the size and net investment income earned on the portfolio. The increase in expenses was also attributable to an increase of \$10.7 million in interest and other debt expenses due to a higher average debt balance, which increased from \$1.24 billion during the year ended March 31, 2014 to \$1.59 billion during the year ended March 31, 2015. The total cost of debt declined from 5.52% during the year ended March 31, 2014 to 4.98% for the year ended March 31, 2015 primarily as a result of the utilization of our Senior Secured Credit Facility.

Net Realized Gains (Losses)

During the year ended March 31, 2016, we recognized gross realized gains of \$22.5 million and gross realized losses of \$217.9 million, resulting in net realized losses of \$195.4 million. Significant realized gains (losses) for the year ended March 31, 2016 are summarized below:

(in millions)	Net Realized Gain (Loss)
Fidji Luxco (BC) S.C.A.	\$ 11.8
Artsonig Pty Ltd	(21.7)
Molycorp, Inc.	(22.1)
Magnetation, LLC	(32.1)
Miller Energy Resources, Inc.	(33.5)
PlayPower Holdings, Inc.	(39.7)

During the year ended March 31, 2015, we recognized gross realized gains of \$50.3 million and gross realized losses of \$63.7 million, resulting in net realized losses of \$13.4 million. Significant realized gains (losses) for the year ended March 31, 2015 are summarized below:

(in millions)	Net Realized Gain (Loss)
Aventine Renewable Energy Holdings, Inc.	\$ 11.6
Altegrity, Inc.	(17.7)
Walter Energy Inc.	(26.5)

Liquidity and Capital Resources

The Company's liquidity and capital resources are generated and generally available through periodic follow-on equity and debt offerings, our senior secured, multi-currency Senior Secured Facility (as defined in Note 6 within the Notes to Financial Statements included elsewhere in this prospectus), our senior secured notes, our senior unsecured notes, investments in special purpose entities in which we hold and finance particular investments on a non-recourse basis, as well as from cash flows from operations, investment sales of liquid assets and repayments of senior and subordinated loans and income earned from investments.

Cash Equivalents

We deem certain U.S. Treasury bills, repurchase agreements and other high-quality, short-term debt securities as cash equivalents. (See Note 2 within the Notes to Financial Statements included elsewhere in this prospectus.) At the end of each fiscal quarter, we consider taking proactive steps utilizing cash equivalents with the objective of enhancing our investment flexibility during the following quarter, pursuant to Section 55 of the 1940 Act. More specifically, we may purchase U.S. Treasury bills from time-to-time on the last business day of the quarter and typically close out that position on the following business day, settling the sale transaction on a net cash basis with the purchase, subsequent to quarter end. Apollo Investment may also utilize repurchase agreements or other balance sheet transactions, including drawing down on our Senior Secured Facility, as we deem appropriate. The amount of these transactions or such drawn cash for this purpose is excluded from total assets for purposes of computing the asset base upon which the management fee is determined. There were no cash equivalents held as of March 31, 2016.

Debt

See Note 6 and Note 7 within the Notes to Financial Statements included elsewhere in this prospectus for information on the Company's debt and public offerings.

The following table shows the contractual maturities of our debt obligations as of March 31, 2016:

(in millions)	Total	Payments Due by Period			
		Less than 1 Year	1 to 3 Years	3 to 5 Years	More than 5 Years
Senior Secured Facility (1)	\$637.9	\$—	\$—	\$637.9	\$—
Senior Secured Notes (Series A)	29.0	29.0	—	—	—
Senior Secured Notes (Series B)	16.0	—	16.0	—	—
2042 Notes	150.0	—	—	—	150.0
2043 Notes	150.0	—	—	—	150.0

2025 Notes	344.7	—	—	—	344.7
Total Debt Obligations	\$1,327.6	\$29.0	\$16.0	\$637.9	\$644.7

(1) As of March 31, 2016, aggregate lender commitments under the Senior Secured Facility totaled \$1.31 billion and \$655.8 million of unused capacity. As of March 31, 2016, there were \$16.3 million of letters of credit issued under the Senior Secured Facility that were not recorded as liabilities on the Company's Statement of Assets and Liabilities.

Table of Contents

On April 24, 2015, the Company amended and restated the Senior Secured Facility. The amendment increased the lenders' commitments to \$1.31 billion, extended the final maturity date to April 24, 2020, and allows the Company to seek additional commitments from new and existing lenders in the future, up to an aggregate facility size not to exceed \$1.965 billion. The Senior Secured Facility is secured by substantially all of the assets in Apollo Investment's portfolio, including cash and cash equivalents. Commencing May 24, 2019, the Company is required to repay, in twelve consecutive monthly installments of equal size, the outstanding amount under the Senior Secured Facility as of April 24, 2019. In addition, the stated interest rate on the facility was changed from LIBOR plus 2.00% to a formula-based calculation based on a minimum borrowing base, resulting in a stated interest rate of either LIBOR plus 1.75% or LIBOR plus 2.00%. As of March 31, 2016, the stated interest rate on the facility was LIBOR plus 2.00%. The Company is required to pay a commitment fee of 0.375% per annum on any unused portion of the Senior Secured Facility and participation and fronting fees totaling 2.25% per annum on the letters of credit issued.

Stockholders' Equity

On August 6, 2015, the Company adopted a plan for the purpose of repurchasing up to \$50 million of its common stock in accordance with applicable rules specified in the Securities Exchange Act of 1934 (the "1934 Act") (the "August Repurchase Plan"). Since adopting the August Repurchase Plan, the Company has repurchased the full amount authorized by the Board of Directors under such plan.

On December 14, 2015, the Board of Directors approved a new plan to acquire up to an additional \$50 million of its common stock in accordance with applicable rules specified in the 1934 Act (the "Current Repurchase Plan," and together with the August Repurchase Plan, the "Repurchase Plans"). The Current Repurchase Plan is designed to allow the Company to repurchase its shares both during its open window periods and at times when it otherwise might be prevented from doing so under applicable insider trading laws or because of self-imposed trading blackout periods. A broker selected by the Company will have the authority under the terms and limitations specified in an agreement with the Company to repurchase shares on the Company's behalf in accordance with the terms of the Current Repurchase Plan. Repurchases are subject to SEC regulations as well as certain price, market volume and timing constraints specified in the Current Repurchase Plan. Pursuant to the Current Repurchase Plan, the Company may from time to time repurchase a portion of its shares of common stock and the Company is hereby notifying stockholders of its intention as required by applicable securities laws.

On September 15, 2015, the Company allocated \$5 million to be repurchased under the August Repurchase Plan in accordance with SEC Rule 10b5-1 (the "September 10b5-1 Repurchase Plan"). On December 16, 2015 and March 17, 2016, the Company allocated \$10 million and \$5 million, respectively, to be repurchased under the Current Repurchase Plan in accordance with SEC Rule 10b5-1 (together with the September 10b5-1 Repurchase Plan, the "10b5-1 Repurchase Plans").

Under the Repurchase Plans and the 10b5-1 Repurchase Plans (the "Plans"), the Company repurchased 10,584,855 shares at a weighted average price per share of \$5.90, inclusive of commissions. This represents a discount of approximately 23.09% of the average net asset value per share for the year ended March 31, 2016. Since the inception of the Plans through March 31, 2016, the dollar amount of shares repurchased totaled \$62.4 million.

Distributions

Distributions paid to stockholders for the years ended March 31, 2016, 2015 and 2014 totaled \$187.2 million (\$0.80 per share), \$189.4 million (\$0.80 per share), and \$175.4 million (\$0.80 per share), respectively. For income tax purposes, distributions made to stockholders are reported as ordinary income, capital gains, non-taxable return of capital, or a combination thereof. The tax character of distributions paid to stockholders through March 31, 2016 may include return of capital, however, the exact amount cannot be determined at this point. The final determination of the tax character of distributions will not be made until we file our tax return for the tax year ended March 31, 2016. Tax characteristics of all distributions will be reported to stockholders on Form 1099 after the end of the calendar year. Our quarterly distributions, if any, will be determined by our Board of Directors.

To maintain our RIC status, we must distribute at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, out of the assets legally available for distribution. Although we currently intend to distribute realized net capital gains (i.e., net long-term capital gains in excess of

short-term capital losses), if any, at least annually, out of the assets legally available for such distributions, we may in the future decide to retain such capital gains for investment. Currently, we have substantial net capital loss carryforwards and consequently do not expect to generate cumulative net capital gains in the foreseeable future. We maintain an “opt out” dividend reinvestment plan for our common stockholders. As a result, if we declare a dividend, then stockholders’ cash dividends will be automatically reinvested in additional shares of our common stock, unless they specifically “opt out” of the dividend reinvestment plan so as to receive cash dividends.

50

Table of Contents

We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of these distributions from time to time. In addition, due to the asset coverage test applicable to us as a BDC, we may in the future be limited in our ability to make distributions. Also, our revolving credit facility may limit our ability to declare dividends if we default under certain provisions or fail to satisfy certain other conditions. If we do not distribute a certain percentage of our income annually, we may suffer adverse tax consequences, including possible loss of the tax benefits available to us as a RIC. In addition, in accordance with GAAP and tax regulations, we include in income certain amounts that we have not yet received in cash, such as contractual PIK, which represents contractual interest added to the loan balance that becomes due at the end of the loan term, or the accrual of original issue or market discount. Since we may recognize income before or without receiving cash representing such income, we may not be able to meet the requirement to distribute at least 90% of our investment company taxable income to obtain tax benefits as a RIC.

With respect to the distributions to stockholders, income from origination, structuring, closing, commitment and other upfront fees associated with investments in portfolio companies is treated as taxable income and accordingly, distributed to stockholders.

PIK Income

For the year ended March 31, 2016, PIK income totaled \$40.1 million on total investment income of \$379.7 million. In order to maintain the Company's status as a RIC, this non-cash source of income must be paid out to stockholders annually in the form of dividends, even though the Company has not yet collected the cash. See Note 5 within the Notes to the Financial Statements for more information on the Company's PIK income.

Related Party Transactions

See Note 3 within the Notes to the Financial Statements for information on the Company's related party transactions. Effective April 1, 2016 through March 31, 2017, the investment adviser has agreed to waive 25% of its base management fee and up to 25% of its performance-based incentive fee so that during the waiver period the management fee is reduced from 2% to 1.5% and the incentive fee on pre-incentive fee net investment income ("incentive fee") could be accrued at as low a rate as 15% to the extent the Company experiences cumulative net realized and change in unrealized losses during the waiver period ("cumulative net losses").

During the waiver period, assuming that the investment adviser would earn incentive fees at the 20% rate provided in the Investment Advisory Agreement, the incentive fee will initially be accrued at the rate of 17.5% and will be adjusted as of the end of each quarter. The incentive fee accrual will be increased up to a maximum rate of 20% to the extent that the Company experiences cumulative net realized and change in unrealized gains ("cumulative net gains") during the period and will be decreased down to a minimum rate of 15% to the extent that the Company experiences cumulative net losses during the period. The inclusion of cumulative net gains and cumulative net losses will be measured on a cumulative basis from April 1, 2016 through the end of each quarter during the waiver period. Any cumulative net gains will result in a dollar for dollar increase in the incentive fee payable up to a maximum rate of 20% and any cumulative net losses will result in a dollar for dollar decrease in the incentive fee payable down to a minimum rate of 15%.

If the resulting incentive fee rate is less than 20%, the percentage at which the investment adviser's 100% catch-up is complete will also be reduced ratably from 2.1875% (8.75% annualized) to as low as 2.06% (8.24% annualized).

As an illustration of the foregoing incentive fee waiver, if cumulative pre-incentive fee net investment income through the end of each successive quarter during the waiver period is \$54 million, \$108 million, \$161 million and \$215 million, and the cumulative net gains or cumulative net losses are \$20 million gains, \$20 million losses, zero and \$10 million losses, the incentive fee would be accrued at a rate of 20% for the first quarter, 15% through the first two quarters, 17.5% through the first three quarters, and 15% through the end of the fiscal year.

Table of Contents**QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We are subject to financial market risks, including changes in interest rates. During the year ended March 31, 2016, many of the loans in our portfolio had floating interest rates. These loans are usually based on floating LIBOR and typically have durations of one to twelve months after which they reset to current market interest rates. The Company also has a Senior Secured Facility that is based on floating LIBOR rates.

The following table shows the approximate annual impact on net investment income of base rate changes in interest rates (considering interest rate flows for variable rate instruments) to our loan portfolio and outstanding debt as of March 31, 2016, assuming no changes in our investment and borrowing structure:

Basis Point Change	Net Investment Income	Net Investment Income Per Share
Up 400 basis points	\$ 14.0 million	\$ 0.062
Up 300 basis points	\$ 9.1 million	\$ 0.040
Up 200 basis points	\$ 4.2 million	\$ 0.018
Up 100 basis points	\$ (0.7) million	\$ (0.003)

We may hedge against interest rate fluctuations from time-to-time by using standard hedging instruments such as futures, options and forward contracts subject to the requirements of the 1940 Act and applicable commodities laws. While hedging activities may insulate us against adverse changes in interest rates, they may also limit our ability to participate in the benefits of lower interest rates with respect to our portfolio of investments.

SALES OF COMMON STOCK BELOW NET ASSET VALUE

We may submit to our stockholders, for their approval, a proposal seeking authorization for our ability, in one or more public or private offerings of our common stock, to sell or otherwise issue shares of our common stock at a price below our then current net asset value (“NAV”) per share, subject to certain conditions discussed below.

Conditions to Sales Below NAV. If we seek and receive such approval, from time to time we may sell shares of our common stock at a price below NAV, exclusive of sales compensation, only if the following conditions are met:

- a majority of our independent directors who have no financial interest in the sale have approved the sale;
- a majority of such directors, who are not interested persons of Apollo Investment, in consultation with the underwriter or underwriters of the offering if it is to be underwritten, have determined in good faith, and as of a time immediately prior to the first solicitation by or on behalf of Apollo Investment of firm commitments to purchase such securities or immediately prior to the sale of such securities, that the price at which such securities are to be sold is not less than a price which closely approximates the market value of those securities, less any underwriting commission or discount;

- and
- the number of shares sold pursuant to such authority does not exceed 25% of our then outstanding common stock immediately prior to each such sale.

If we seek and receive such approval, there will be no maximum level of discount from NAV at which we may sell shares pursuant to such authority. In making a determination that an offering below NAV per share is in our and our stockholders’ best interests, our board of directors may also consider a variety of factors including:

- The effect that an offering below NAV per share would have on our stockholders, including the potential dilution they would experience as a result of the offering;

- The amount per share by which the offering price per share and the net proceeds per share are less than the most recently determined NAV per share;

- The relationship of recent market prices of common stock to NAV per share and the potential impact of the offering on the market price per share of our common stock;

- Whether the estimated offering price would closely approximate the market value of our shares and would not be below current market price;

- The potential market impact of being able to raise capital in the current financial market;

Table of Contents

- The nature of any new investors anticipated to acquire shares in the offering;
- The anticipated rate of return on and quality, type and availability of investments; and
- The leverage available to us.

If we seek and receive such approval, we will not sell shares under a prospectus supplement to the registration statement or current post-effective amendment thereto of which this prospectus forms a part (the “current registration statement”) if the cumulative dilution to our NAV per share from offerings under the current registration statement exceeds 15%. This limit would be measured separately for each offering pursuant to the current registration statement by calculating the percentage dilution or accretion to aggregate NAV from that offering and then summing the percentage from each offering. For example, if our most recently determined NAV per share at the time of the first offering is \$10.00 and we have 140 million shares outstanding, sale of 35 million shares at net proceeds to us of \$5.00 per share (a 50% discount) would produce dilution of 10.0%. If we subsequently determined that our NAV per share increased to \$11.00 on the then 175 million shares outstanding and then made an additional offering, we could, for example, sell approximately an additional 43.75 million shares at net proceeds to us of \$8.25 per share, which would produce dilution of 5.0%, before we would reach the aggregate 15% limit. If we file a new post-effective amendment, the threshold would reset.

Sales by us of our common stock at a discount from NAV pose potential risks for our existing stockholders whether or not they participate in the offering, as well as for new investors who participate in the offering.

The following three headings and accompanying tables will explain and provide hypothetical examples on the impact of an offering at a price less than NAV per share on three different set of investors:

- existing stockholders who do not purchase any shares in the offering.
- existing stockholders who purchase a relatively small amount of shares in the offering or a relatively large amount of shares in the offering.
- new investors who become stockholders by purchasing shares in the offering.

Impact on Existing Stockholders who do not Participate in the Offering

Our existing stockholders who do not participate in an offering below NAV per share or who do not buy additional shares in the secondary market at the same or lower price we obtain in the offering (after expenses and commissions) face the greatest potential risks. These stockholders will experience an immediate decrease (often called dilution) in the NAV of the shares they hold and their NAV per share. These stockholders will also experience a disproportionately greater decrease in their participation in our earnings and assets and their voting power than the increase we will experience in our assets, potential earning power and voting interests due to the offering. These stockholders may also experience a decline in the market price of their shares, which often reflects to some degree announced or potential increases and decreases in NAV per share. This decrease could be more pronounced as the size of the offering and level of discounts increase.

The following table illustrates the level of net asset value dilution that would be experienced by a nonparticipating stockholder in four different hypothetical offerings of different sizes and levels of discount from net asset value per share, although it is not possible to predict the level of market price decline that may occur. Actual sales prices and discounts may differ from the presentation below.

The examples assume that we have 1,000,000 common shares outstanding, \$15,000,000 in total assets and \$5,000,000 in total liabilities. The current net asset value and net asset value per share are thus \$10,000,000 and \$10.00. The table illustrates the dilutive effect on a nonparticipating stockholder of (1) an offering of 50,000 shares (5% of the outstanding shares) at \$9.50 per share after offering expenses and commission (a 5% discount from net asset value), (2) an offering of 100,000 shares (10% of the outstanding shares) at \$9.00 per share after offering expenses and commissions (a 10% discount from net asset value), (3) an offering of 250,000 shares (25% of the outstanding shares) at \$7.50 per share after offering expenses and commissions (a 25% discount from net asset value) and (4) an offering of 250,000 shares (25% of the outstanding shares) at par value of \$0.001 per share after offering expenses and commissions (effectively a 100% discount from net asset value). We do not currently anticipate offering shares of common stock at a discount in excess of 25%, which is illustrated in Example 3, although we reserve the right to do so. The 100% column in the following table is the maximum discount at which we may legally offer shares of

common stock. It is presented for illustrative purposes only, as it is unlikely our management or Board of Directors would consider offering shares at a discount near such a level.

Impact on Existing Stockholders who do Participate in the Offering

Our existing stockholders who participate in an offering below NAV per share or who buy additional shares in the secondary market at the same or lower price as we obtain in the offering (after expenses and commissions) will experience the same types of NAV dilution as the nonparticipating stockholders, albeit at a lower level, to the extent they purchase less than the same percentage of the discounted offering as their interest in our shares immediately prior to the offering. The level of NAV dilution will decrease as the number of shares such stockholders purchase increases. Existing stockholders who buy more than such percentage will experience NAV dilution but will, in contrast to existing stockholders who purchase less than their proportionate share of the offering, experience an increase (often called accretion) in NAV per share over their investment per share and will also experience a disproportionately greater increase in their participation in our earnings and assets and their voting power than our increase in assets, potential earning power and voting interests due to the offering. The level of accretion will increase as the excess number of shares such stockholder purchases increases. Even a stockholder who over-participates will, however, be subject to the risk that we may make additional discounted offerings in which such stockholder does not participate, in which case such a stockholder will experience NAV dilution as described above in such subsequent offerings. These stockholders may also experience a decline in the market price of their shares, which often reflects to some degree announced or potential increases and decreases in NAV per share. This decrease could be more pronounced as the size of the offering and level of discount to NAV increases.

The following chart illustrates the level of dilution and accretion in the hypothetical 25% discount offering from the prior chart for a stockholder that acquires shares equal to (1) 50% of its proportionate share of the offering (i.e., 1,250 shares, which is 0.50% of the offering 250,000 shares rather than its 1.00% proportionate share) and (2) 150% of such

percentage (i.e., 3,750 shares, which is 1.50% of an offering of 250,000 shares rather than its 1.00% proportionate share). The prospectus supplement pursuant to which any discounted offering is made will include a chart for this example based on the actual number of shares in such offering and the actual discount from the most recently determined NAV per share.

Impact on New Investors

Investors who are not currently stockholders, but who participate in an offering below NAV and whose investment per share is greater than the resulting NAV per share (due to selling compensation and expenses paid by us) will experience an immediate decrease, albeit small, in the NAV of their shares and their NAV per share compared to the price they pay for their shares. Investors who are not currently stockholders and who participate in an offering below NAV per share and whose investment per share is also less than the resulting NAV per share due to selling compensation and expenses paid by the issuer being significantly less than the discount per share will experience an immediate increase in the NAV of their shares and their NAV per share compared to the price they pay for their shares. These investors will experience a disproportionately greater participation in our earnings and assets and their voting power than our increase in assets, potential earning power and voting interests. These investors will, however, be subject to the risk that we may make additional discounted offerings in which such new stockholder does not participate, in which case such new stockholder will experience dilution as described above in such subsequent offerings. These investors may also experience a decline in the market price of their shares, which often reflects to some degree announced or potential increases and decreases in NAV per share. This decrease could be more pronounced as the size of the offering and level of discounts increases.

The following chart illustrates the level of dilution or accretion for new investors that would be experienced by a new investor in the same 5%, 10%, 25% and 100% discounted offerings as described in the first chart above. The illustration is for a new investor who purchases the same percentage (1.00%) of the shares in the offering as the

stockholder in the prior examples held immediately prior to the offering. The prospectus supplement pursuant to which any discounted offering is made will include a chart for this example based on the actual number of shares in such offering and the actual discount from the most recently determined NAV per share.

PRICE RANGE OF COMMON STOCK

Our common stock is traded on the NASDAQ Global Select Market under the symbol "AINV." The following table lists the high and low closing sale price for our common stock, the closing sale price as a premium (discount) to net asset value, or NAV, and quarterly distributions per share for the past two fiscal years and each full quarter since the beginning of the current fiscal year. The last reported closing sales price of our common stock on December 16, 2016 was \$6.15 per share. As of December 16, 2016, we had 70 stockholders of record. While our common stock has from time to time traded in excess of our net asset value, there can be no assurance, however, that it will trade at such a premium (to net asset value) in the future.

	NAV Per Share (1)	Sales Price		Premium (Discount) of High Sales Price to NAV (2)		Premium (Discount) of Low Sales Price to NAV (2)		Dividends Declared
		High	Low					
Year Ended March 31, 2017								
Third quarter through December 16, 2016	*	6.15	5.65	*		*		0.15
Second quarter	6.95	6.27	5.42	(9.8)%	(22.0)%	0.15
First quarter	6.90	5.97	5.03	(13.5)%	(27.1)%	0.20
Year Ended March 31, 2016								
Fourth quarter	7.28	5.70	4.26	(21.7)%	(41.5)%	0.20
Third quarter	7.56	6.39	4.78	(15.5)%	(36.8)%	0.20
Second quarter	7.83	7.29	5.36	(6.9)%	(31.5)%	0.20
First quarter	8.01	8.03	6.95	0.2	%	(13.2)%	0.20
Year Ended March 31, 2015

Third quarter	8.43	8.44	6.80	0.0	%	(19.3)%	0.20
Second quarter	8.72	8.87	8.13	1.7	%	(6.8)%	0.20
First quarter	8.74	8.64	7.83	(1.1)%	(10.4)%	0.20

NAV per share is determined as of the last day in the relevant quarter and therefore may not reflect the net asset (1) value per share on the date of the high and low sales prices. The net asset values shown are based on outstanding shares at the end of the relevant quarter.

(2) Calculated using the respective high or low sales price divided by the net asset value per share at the end of the relevant quarter.

*NAV not yet determined.

Apollo Investment

Apollo Investment Corporation (“Apollo Investment,” “Company,” “AIC,” “we,” “us,” and “our”), a Maryland corporation incorporated on February 2, 2004, is a closed-end, externally managed, non-diversified management investment company that has elected to be treated as a business development company (“BDC”) under the Investment Company Act of 1940 (the “1940 Act”). In addition, for tax purposes we have elected to be treated as a regulated investment company (“RIC”), under the Internal Revenue Code of 1986, as amended (the “Code”).

Our investment objective is to generate current income and capital appreciation. We invest primarily in various forms of debt investments including secured and unsecured debt, loan investments and/or equity in private middle-market companies. We may also invest in the securities of public companies and structured products such as collateralized loan obligations and credit-linked notes. These structured products are typically a form a securitization in which the cash flows of a portfolio of loans are pooled and passed on to different classes of owners in various tranches. Our portfolio is comprised primarily of investments in debt, including secured and unsecured debt of private middle-market companies that, in the case of senior secured loans, generally are not broadly syndicated and whose aggregate tranche size is less than \$250 million. Our portfolio also includes equity interests such as common stock, preferred stock, warrants or options. In this prospectus, we use the term “middle-market” to refer to companies with annual revenues between \$50 million and \$2 billion. While our investment objective is to generate current income and capital appreciation through investments in U.S. secured and unsecured loans, other debt securities and equity, we may also invest a portion of the portfolio in other investment opportunities, including foreign securities and structured products. Most of the debt instruments we invest in are unrated or rated below investment grade, which is often an indication of size, credit worthiness and speculative nature relative to the capacity of the borrower to pay interest and principal.

Apollo Investment Management, L.P. (“AIM”) serves as our investment adviser and is a wholly-owned subsidiary of Apollo Global Management, LLC (“AGM”). AGM and other affiliates manage other funds that may have investment mandates that are similar, in whole or in part, with ours. AIM and its affiliates may determine that an investment is appropriate both for us and for one or more of those other funds. In such event, depending on the availability of such investment and other appropriate factors, AIM may determine that we should invest on a side-by-side basis with one or more other funds. We make all such investments subject to compliance with applicable regulations and interpretations, and our allocation procedures. In certain circumstances negotiated co-investments may be made only in accordance with the terms of the exemptive order we received from the SEC permitting us to do so.

During the year ended March 31, 2016, we invested \$1.1 billion across 22 new and 35 existing portfolio companies primarily through a combination of primary and secondary debt investments. This compares to \$2.2 billion across 60 new and 47 existing portfolio companies during the year ended March 31, 2015. Investments sold or repaid during the year ended March 31, 2016 totaled \$1.3 billion versus \$2.3 billion during the year ended March 31, 2015. The weighted average yields on our secured debt portfolio, unsecured debt portfolio and total debt portfolio as of March 31, 2016 at our current cost basis were 11.0%, 10.7% and 11.0%, respectively. As of March 31, 2015, the yields were 11.2%, 10.9% and 11.2%, respectively. The portfolio yields may be higher than an investor’s yield on an investment in us due to sales load and other expenses. For the year ended March 31, 2016, the total return based on the change in market price per share and taking into account dividends and distributions, if any, reinvested in accordance with the dividend reinvestment plan was (17.5)% versus 1.9% for the year ended March 31, 2015. Such returns do not reflect any sales load that stockholders may have paid in connection with their purchase of shares of our common stock. As of March 31, 2016, our portfolio consisted of 89 portfolio companies and was invested 65% in secured debt, 9% in unsecured debt, 11% in structured products and other, 3% in preferred equity, and 12% in common equity/interests and warrants measured at fair value versus 105 portfolio companies invested 60% in secured debt, 14% in unsecured debt, 11% in structured products and other, 5% in preferred equity, and 10% in common equity/interests and warrants as of March 31, 2015.

Since the initial public offering of Apollo Investment in April 2004 and through March 31, 2016, invested capital totaled \$16.4 billion in 371 portfolio companies. Over the same period, Apollo Investment completed transactions

with more than 100 different financial sponsors.

As of March 31, 2016, 47% or \$1.1 billion of our income-bearing investment portfolio is fixed rate debt and 53% or \$1.2 billion is floating rate debt, measured at fair value. On a cost basis, 47% or \$1.1 billion of our income-bearing investment portfolio is fixed rate debt and 53% or \$1.3 billion is floating rate debt. As of March 31, 2015, 48% or \$1.3 billion of our income-bearing investment portfolio was fixed rate debt and 52% or \$1.4 billion was floating rate debt, measured at fair value. On a cost basis, 50% or \$1.4 billion of our income-bearing investment portfolio was fixed rate debt and 50% or \$1.4 billion was floating rate debt.

About Apollo Investment Management

AIM, our investment adviser, is led by John Hannan, James Zelter, Howard Widra, Patrick Ryan and Tanner Powell. Potential investment and disposition opportunities are generally approved by one or more committees composed of personnel across AGM, including Messrs. Zelter, Widra, Ryan and Powell and/or all or a majority of Messrs. Zelter, Widra, Ryan and Powell depending on the underlying investment type and/or the amount of such investment. The composition of such committees and the overall approval process for our investments may change from time to time. AIM draws upon AGM's more than 25 year history and benefits from the broader firm's significant capital markets, trading and research expertise developed through investments in many core sectors in over 200 companies since inception.

About Apollo Investment Administration

In addition to furnishing us with office facilities, equipment, and clerical, bookkeeping and record keeping services, AIA, an affiliate of AGM, also oversees our financial records as well as prepares our reports to stockholders and reports filed with the SEC. AIA also performs the calculation and publication of our net asset value, the payment of our expenses and oversees the performance of various third-party service providers and the preparation and filing of our tax returns. Furthermore, AIA provides on our behalf managerial assistance to those portfolio companies to which we are required to provide such assistance.

Operating and Regulatory Structure

Our investment activities are managed by AIM and supervised by our board of directors, a majority of whom are independent of AGM and its affiliates. AIM is an investment adviser that is registered under the Investment Advisers Act of 1940, or the Advisers Act. Under our investment advisory and management agreement, we pay AIM an annual base management fee based on our average gross assets as well as an incentive fee. See "Management—Investment Advisory and Management Agreement."

As a BDC, we are required to comply with certain regulatory requirements. Also, while we are permitted to finance investments using debt, our ability to use debt is limited in certain significant respects. See "Regulation." We have elected to be treated for federal income tax purposes as a RIC under Subchapter M of the Code. For more information, see "Certain U.S. Federal Income Tax Considerations."

Investments

We seek to create a portfolio that includes primarily debt investments including secured loans and unsecured loans and, to a lesser extent, equity investments by investing, on an individual portfolio company basis, approximately \$20 million to \$250 million of capital, on average, in the securities of middle-market companies, as well as structured products such as collateralized loan obligations. The average investment size will vary as the size of our capital base varies. Our target portfolio consists primarily of long-term secured debt, as well as unsecured and mezzanine positions of private middle-market companies. Structurally, unsecured and mezzanine debt usually ranks subordinate in priority of payment to senior debt, such as bank debt, and is characterized as unsecured. As such, other creditors may rank senior to us in the event of an insolvency. However, unsecured and mezzanine debt ranks senior to common and preferred equity in a borrowers' capital structure. Unsecured and mezzanine debt may have a fixed or floating interest rate. Additional income can be generated from upfront fees, call protection including call premiums, equity co-investments or warrants. We may also invest in debt and equity positions of structured products, such as collateralized loan obligations ("CLOs") and credit-linked notes ("CLNs"). A CLO is a form of securitization in which the cash flows of a portfolio of loans are pooled and passed on to different classes of owners in various tranches. A CLN is a note where the payment of principal and/or interest is based on the performance of one or more debt obligations. CLNs are not securitizations.

Our principal focus is to provide capital to middle-market companies in a variety of industries. We generally seek to target companies that generate positive free cash flows or that may support debt investments with strong asset coverage, and we may provide debtor-in-possession or reserve financing. Additionally we may acquire investments in the secondary market if we believe the risk-adjusted returns are attractive.

As a result of the amendment of our senior secured credit facility on April 24, 2015, the industry classifications were updated in the Schedule of Investments as of March 31, 2016. The following is a representative list of the industries in

which we have invested as of March 31, 2016:

- ✦ Aerospace & Defense
- ✦ Aviation and Consumer Transport
- ✦ Broadcasting & Subscription
- ✦ Business Services
- ✦ Chemicals, Plastics & Rubber
- ✦ Consumer Goods – Durable
- ✦ Consumer Services

We may also invest in other industries if we are presented with attractive opportunities. In an effort to increase our returns and the number of investments that we can make, we may in the future seek to securitize our debt investments. To the extent we elect to include higher quality portfolio holdings in the securitization vehicle and retain lower quality holdings in our portfolio, investing in our shares may be riskier. To securitize debt investments, we may create a wholly owned subsidiary and contribute a pool of loans to the subsidiary. We may sell debt of or interests in the subsidiary on a non-recourse basis to purchasers whom we would expect to be willing to accept a lower interest rate to invest in investment-grade securities. We may use the proceeds of such sales to reduce indebtedness or to fund additional investments. We may also invest through special purpose entities or other arrangements, including total return swaps and repurchase agreements, in order to obtain non-recourse financing or for other purposes.

We may invest, to the extent permitted by law, in the securities and instruments of other investment companies and in private funds. We may also co-invest on a concurrent basis with affiliates of ours, subject to compliance with applicable regulations and our allocation procedures. Certain types of negotiated co-investments may be made only in accordance with the terms of the exemptive order we received from the SEC permitting us to do so. On March 29, 2016, we received an exemptive order from the SEC (the “Order”) permitting us greater flexibility to negotiate the terms of co-investment transactions with certain of our affiliates, including investment funds managed by AIM or its affiliates, subject to the conditions included therein. Under the terms of the Order, a “required majority” (as defined in Section 57(o) of the 1940 Act) of our independent directors must be able to reach certain conclusions in connection with a co-investment transaction, including that (1) the terms of the proposed transaction are reasonable and fair to us and our stockholders and do not involve overreaching of us or our stockholders on the part of any person concerned, and (2) the transaction is consistent with the interests of our stockholders and is consistent with our board of directors' approved criteria. In certain situations where co-investment with one or more funds managed by AIM or its affiliates is not covered by the Order, the personnel of AIM or its affiliates will need to decide which fund will proceed with the investment. Such personnel will make these determinations based on policies and procedures, which are designed to reasonably ensure that investment opportunities are allocated fairly and equitably among affiliated funds over time and in a manner that is consistent with applicable laws, rules and regulations. The Order is subject to certain terms and conditions so there can be no assurance that we will be permitted to co-invest with certain of our affiliates other than in the circumstances currently permitted by regulatory guidance and the Order.

Table of Contents

The following table summarizes our top ten portfolio companies and industries based on fair value as of March 31, 2016:

Portfolio Company	% of Portfolio	Industry	% of Portfolio

	100.0%	100.0%

Investment Selection and Due Diligence

We are committed to a value oriented philosophy of, among other things, capital preservation and commit resources to managing risks associated with our investment portfolio. Our investment adviser conducts due diligence on prospective portfolio companies. In conducting its due diligence, our investment adviser uses information provided by the company and its management team, publicly available information, as well as information from their extensive relationships with former and current management teams, consultants, competitors and investment bankers and the direct experience of the senior partners of our affiliates.

Our investment adviser's due diligence will typically include:

- review of historical and prospective financial information;
- on-site visits;

Table of Contents

• interviews with management, employees, customers and vendors of the potential portfolio company;
• review of loan documents;
• background checks; and
• research relating to the company's management, industry, markets, products and services, and competitors.

Upon the completion of due diligence and a decision to seek approval for an investment in a company, the professionals leading the proposed investment generally present the investment opportunity to and seek approval in accordance with our investment approval process. Additional due diligence with respect to any investment may be conducted on our behalf by attorneys and accountants prior to the closing of the investment, as well as other outside advisers, as appropriate.

Investment Structure

Once we have determined that a prospective portfolio company is suitable for investment, we work with the management of that company and its other capital providers, including senior, junior and equity capital providers, to structure an investment.

We generally seek to structure our investments as secured loans with a direct lien on the assets or cash flows of the company that provide for increased downside protection in the event of insolvency while maintaining attractive risk-adjusted returns and current interest income. We generally seek for these secured loans to obtain security interests in the assets of our portfolio companies that serve as collateral in support of the repayment of these loans. This collateral may take the form of first or second priority liens on the assets of a portfolio company. In some cases, we may enter into debt investments that, by their terms, convert into equity or additional debt securities or defer payments of interest after our investment. Also, in some cases our debt investments may be collateralized by a subordinated lien on some or all of the assets of the borrower. Typically, our loans have maturities of three to ten years.

We seek to tailor the terms of our investments to the facts and circumstances of the transaction and the prospective portfolio company, negotiating a structure that protects our rights and manages our risk while creating incentives for the portfolio company to achieve its business plan and improve its profitability.

For example, in addition to seeking a senior position in the capital structure of our portfolio companies, we seek to limit the downside potential of our investments by:

• requiring an expected total return on our investments (including both interest and potential equity appreciation) that compensates us for credit risk;
• generally incorporating call protection into the investment structure where possible; and
• negotiating covenants and information rights in connection with our investments that afford our portfolio companies flexibility in managing their businesses, but which are still consistent with our goal of preserving our capital. Such restrictions may include affirmative and negative covenants, default penalties, lien protection, change of control provisions and board rights, including either observation or participation rights. Our investments may include equity features, such as warrants or options to buy a minority interest in the portfolio company. Any warrants we receive with our debt securities generally require only a nominal cost to exercise, and thus, as a portfolio company appreciates in value, we may achieve additional investment return from this equity interest. We may structure the warrants to provide provisions protecting our rights as a minority-interest holder, as well as puts, or rights to sell such securities back to the company, upon the occurrence of specified events. In many cases, we may also seek to obtain registration rights in connection with these equity interests, which may include demand and "piggyback" registration rights. We expect to hold most of our investments to maturity or repayment, but we may sell certain of our investments sooner if a liquidity event takes place such as a sale or recapitalization or worsening of credit quality of a portfolio company, among other reasons.

Valuation Process

The following is a description of the steps we take each quarter to determine the value of our portfolio. Our portfolio of investments is recorded at fair value as determined in good faith by or under the direction of our Board of Directors pursuant to a written valuation policy and a consistently applied valuation process utilizing the input of our investment adviser, independent valuation firms, third party pricing services and the Audit Committee of the Board of Directors. Since this process necessarily involves the use of judgment and the engagement of independent valuation firms, there

is no certainty as to the value of our portfolio investments. Investments for which market quotations are readily available are recorded in our financial statements at such market quotations if they are deemed to represent fair value. Market quotations may be deemed not to represent fair value where AIM believes that facts and circumstances applicable to an issuer, a seller or purchaser or the market for a particular security causes current market quotes not to reflect the fair value of the

62

Table of Contents

security, among other reasons. Examples of these events could include cases in which material events are announced after the close of the market on which a security is primarily traded, when a security trades infrequently causing a quoted purchase or sale price to become stale or in the event of a “fire sale” by a distressed seller.

With respect to investments for which market quotations are not readily available or when such market quotations are deemed not to represent fair value, our Board of Directors has approved a multi-step valuation process each quarter, as described below:

1. Our quarterly valuation process begins with each investment being initially valued by the investment professionals of our investment adviser who are responsible for the portfolio company.
2. Preliminary valuation conclusions are then documented and discussed with senior management of our investment adviser.
3. Independent valuation firms are engaged by our Board of Directors to conduct independent appraisals by reviewing our investment adviser’s preliminary valuations and then making their own independent assessment.
The Audit Committee of the Board of Directors reviews the preliminary valuation of our investment adviser and the
4. valuation prepared by the independent valuation firms and responds, if warranted, to the valuation recommendation of the independent valuation firms.
The Board of Directors discusses valuations and determines in good faith the fair value of each investment in our
5. portfolio based on the input of our investment adviser, the applicable independent valuation firm, and the Audit Committee of the Board of Directors.

In addition, some of our investments provide for payment-in-kind (“PIK”) interest or dividends. Such amounts of accrued PIK interest or dividends are added to the cost of the investment on the respective capitalization dates and generally become due at maturity of the investment or upon the investment being called by the issuer. Upon capitalization, PIK is subject to the fair value estimates associated with their related investments.

Ongoing Relationships with Portfolio Companies

Monitoring

AIM monitors our portfolio companies on an ongoing basis and also monitors the financial trends of each portfolio company to determine if each is meeting its respective business plans and to assess the appropriate course of action for each company. In addition, senior investment professionals of AIM may take board seats or obtain board observation rights for our portfolio companies.

AIM has several methods of evaluating and monitoring the performance and fair value of our investments, which can include, but are not limited to, the assessment of success of the portfolio company in adhering to its business plan and compliance with covenants; periodic and regular contact with portfolio company management and, if appropriate, the financial or strategic sponsor, to discuss financial position, requirements and accomplishments; comparisons to other portfolio companies in the industry; attendance at and participation in board meetings; and review of monthly and quarterly financial statements and financial projections for portfolio companies.

AIM also uses an investment rating system to characterize and monitor our expected level of returns on each investment in our portfolio. These ratings are just one of several factors that AIM uses to monitor our portfolio, but they are not in and of themselves a determinative of fair value. AIM grades the credit risk of all investments on a scale of 1 to 5 no less frequently than quarterly. This system is intended primarily to reflect the underlying risk of a portfolio investment relative to our initial cost basis in respect of such portfolio investment (i.e., at the time of acquisition), although it may also take into account under certain circumstances the performance of the portfolio company’s business, the collateral coverage of the investment and other relevant factors.

Under this system, investments with a grade of 1 involve the least amount of risk to our initial cost basis. The trends and risk factors for this investment since origination or acquisition are generally favorable, which may include the performance of the portfolio company or a potential exit. Investments graded 2 involve a level of risk to our initial cost basis that is similar to the level of risk underwritten at the time of origination or acquisition. This portfolio company is generally performing in accordance with our analysis of its business and the full return of principal and interest or dividend is expected. Investments graded 3 indicate that the risk to our ability to recoup the cost of such investment has increased since origination or acquisition, but full return of principal and interest or dividend is

expected. A portfolio company with an investment grade of 3 requires closer monitoring. Investments graded 4 indicate that the risk to our ability to recoup the cost of such investment has increased significantly since origination or acquisition, including as a result of factors such as declining performance and noncompliance with debt covenants, and we expect some loss of interest, dividend or capital appreciation, but still expect an overall positive internal rate of return on the investment. Investments graded 5 indicate that the risk to our ability to recoup the cost of such investment has increased materially since origination or acquisition and the portfolio company likely

Table of Contents

has materially declining performance. Loss of interest or dividend and some loss of principal investment is expected, which would result in an overall negative internal rate of return on the investment. For investments graded 4 or 5, AIM enhances its level of scrutiny over the monitoring of such portfolio company.

AIM monitors and, when appropriate, changes the investment ratings assigned to each investment in our portfolio. In connection with our valuation process, AIM reviews these investment ratings on a quarterly basis, and the Audit Committee of the Board of Directors monitors such ratings. It is possible that the grade of certain of these portfolio investments may be reduced or increased over time.

Managerial Assistance

As a BDC, we must offer, and must provide upon request, significant managerial assistance to certain of our portfolio companies. This assistance could involve, among other things, monitoring the operations of our portfolio companies, participating in board and management meetings, consulting with and advising officers of portfolio companies and providing other organizational and financial guidance. We may receive fees for these services.

Competition

Our primary competitors in providing financing to middle-market companies include public and private funds, commercial and investment banks, commercial financing companies, other BDCs or hedge funds, and, to the extent they provide an alternative form of financing, private equity funds. Some of our existing and potential competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC or the restrictions that the Code imposes on us as a RIC.

We also expect to use the industry information of AGM's investment professionals to which we have access to assess investment risks and determine appropriate pricing for our investments in portfolio companies. In addition, we believe that the relationships of the senior managers of AIM and those of our affiliates enable us to learn about, and compete effectively for, financing opportunities with attractive middle-market companies in the industries in which we seek to invest.

Staffing

The Company has no employees. All of the services we utilize are provided by third parties. Our Chief Financial Officer and Chief Compliance Officer and additional personnel assisting them in such functions are employees of AIA and perform their respective functions under the terms of the administration agreement with AIA. Certain of our other executive officers are managing partners of our investment adviser. Our day-to-day investment operations are managed by our investment adviser, which draws on the broader capabilities of the Opportunistic Credit segment of AGM's credit business. In addition, we generally reimburse AIA for our allocable portion of expenses incurred by it in performing its obligations under the administration agreement, including rent and our allocable portion of the cost of our Chief Financial Officer, Chief Compliance Officer and Corporate Secretary and their respective staffs.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act") imposes a wide variety of regulatory requirements on publicly-held companies and their insiders. Many of these requirements affect us. For example:

• Pursuant to Rule 13a-14 under the Securities Exchange Act of 1934 (the "1934 Act"), our Chief Executive Officer and Chief Financial Officer must certify the accuracy of the financial statements contained in our periodic reports.

• Pursuant to Item 307 of Regulation S-K, our periodic reports must disclose our conclusions about the effectiveness of our disclosure controls and procedures.

• Pursuant to Rule 13a-15 of the 1934 Act, our management must prepare a report regarding its assessment of our internal control over financial reporting.

• Pursuant to Item 308 of Regulation S-K and Rule 13a-15 of the 1934 Act, our periodic reports must disclose whether there were significant changes in our internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to material weaknesses.

The Sarbanes-Oxley Act requires us to review our current policies and procedures to determine whether we comply with the Sarbanes-Oxley Act and the regulations promulgated thereunder. We will continue to monitor our compliance with all regulations that are adopted under the Sarbanes-Oxley Act and will take actions necessary to ensure that we are in compliance therewith.

Table of Contents

MANAGEMENT

Our business and affairs are managed under the direction of our board of directors. The board of directors currently consists of nine members, six of whom are not “interested persons” of Apollo Investment as defined in Section 2(a)(19) of the 1940 Act. We refer to these individuals as our independent directors (the “Independent Directors”). Our board of directors elects our officers, who serve at the discretion of the board of directors.

BOARD OF DIRECTORS

Under our charter, our directors are divided into three classes. Generally speaking, each class of directors holds office for a three year term. At each annual meeting of our stockholders, the successors to the class of directors whose terms expire at such meeting will be elected to hold office for a term expiring at the annual meeting of stockholders held in the third year following the year of their election. Each director holds office for the term to which he or she is elected and until his or her successor is duly elected and qualifies.

Directors

As of the date of this prospectus, information regarding the board of directors is as follows:

Name	Age	Position	Director Since	Expiration of Term
Interested Directors				
John J. Hannan	63	Chairman of the Board and Director	2004	2018
James C. Zelter	54	Chief Executive Officer and Director	2008	2019
Bradley J. Wechsler	65	Director	2004	2019
Independent Directors				
Hilary E. Ackermann	60	Director	2015	2018
Jeanette W. Loeb	64	Director	2011	2017
Frank C. Puleo	70	Director	2008	2017
R. Rudolph Reinfrank	61	Director	2013	2018
Carl Spielvogel	87	Director	2004	2017
Elliot Stein, Jr.	67	Director	2004	2019

The address for each director is c/o Apollo Investment Corporation, 9 West 57th Street, New York, NY 10019.

Executive officers who are not directors

Information regarding our executive officers who are not directors is as follows:

Name	Age	Position
Howard Widra	47	President
Gregory W. Hunt	59	Chief Financial Officer and Treasurer
Cindy Z. Michel	42	Chief Compliance Officer and Vice President
Joseph D. Glatt	43	Chief Legal Officer, Vice President and Secretary

The address for each executive officer is c/o Apollo Investment Corporation, 9 West 57th Street, New York, NY 10019.

Board of Directors’ Oversight Role in Management

The board of directors’ role in management of Apollo Investment is oversight. As is the case with virtually all investment companies, including business development companies (as distinguished from operating companies), our service providers, primarily AIM, AIA and their affiliates, have responsibility for our day-to-day management, which includes responsibility for risk management (including management of investment performance and investment risk, valuation risk, issuer and counterparty credit risk, compliance risk and operational risk). As part of its oversight, the board of directors, acting at its scheduled meetings, or the chairman or the lead Independent Director acting between board of directors’ meetings, regularly interacts with and receives reports from senior personnel of service providers,

including Apollo Investment's Chief Executive Officer, its President and Chief Operating Officer and its Chief

65

Table of Contents

Financial Officer (or a senior representative of their respective offices), Apollo Investment's and AIM's Chief Compliance Officer and portfolio management personnel.

The audit committee of the board of directors (which consists of all the Independent Directors), meets regularly, and between meetings the audit committee chair maintains contact, with our independent registered public accounting firm, our Chief Financial Officer and the internal auditor. In addition, at its quarterly meetings, the audit committee meets with the independent valuation services that evaluate certain of our securities holdings for which there are not readily available market values. The board of directors also receives periodic presentations from senior personnel of AIM or its affiliates regarding risk management generally, as well as periodic presentations regarding specific operational, compliance or investment areas such as business continuity, personal trading, valuation, credit and investment research.

The board of directors has adopted policies and procedures designed to address certain of our risks. In addition, Apollo Investment, AIM, AIA and other of our service providers have adopted a variety of policies, procedures and controls designed to address our particular risks. However, it is not possible to eliminate all of the risks applicable to us. The board of directors also receives reports from our counsel or counsel to AIM and the board of directors' own independent legal counsel regarding regulatory compliance and governance matters. The board of directors' oversight role does not make the board of directors a guarantor of our investments or activities or the activities of any of our service providers on behalf of Apollo Investment.

Board of Directors Composition and Leadership Structure

The 1940 Act requires that at least a majority of our directors not be "interested persons" (as defined in the 1940 Act) of Apollo Investment. Currently, six of our nine directors are Independent Directors. The chairman of the board of directors is an interested person of Apollo Investment, and the Independent Directors have designated a Lead Independent Director who chairs meetings or executive sessions of the Independent Directors, reviews and comments on board of directors' meeting agendas, represents the views of the Independent Directors to management and facilitates communication among the Independent Directors and their counsel and between management and the Independent Directors. The board of directors has determined that its leadership structure, in which over 60% of the directors are not affiliated with AIM, is appropriate in light of the services that AIM and its affiliates provide to us and potential conflicts of interest that could arise from these relationships.

Biographical Information

Directors

Our directors have been divided into two groups—Independent Directors and interested directors. Interested directors are interested persons as defined in the 1940 Act.

Information About Each Director's Experience, Qualifications, Attributes or Skills.

Additional information about each director follows (supplementing the information provided in the tables above) that describes some of the specific experiences, qualifications, attributes or skills that each director possesses which the board believes has prepared them to be effective directors. The board of directors believes that the significance of each director's experience, qualifications, attributes or skills is an individual matter (meaning that experience that is important for one director may not have the same value for another) and that these factors are best evaluated at the board level, with no single director, or particular factor, being indicative of board effectiveness. However, the board of directors believes that directors need to have the ability to critically review, evaluate, question and discuss information provided to them, and to interact effectively with our management, service providers and counsel, in order to exercise effective business judgment in the performance of their duties; the board of directors believes that its members satisfy this standard. Experience relevant to having this ability may be achieved through a director's educational background; business, professional training or practice (e.g., medicine, accounting or law), public service or academic positions; experience from service as a board member (including the board of directors of Apollo Investment) or as an executive of investment funds, public companies or significant private or not-for-profit entities or other organizations; and/or other life experiences. To assist them in evaluating matters under federal and state law, the directors are counseled by their own independent legal counsel, who participates in board of directors' meetings and interacts with AIM, and also may benefit from information provided by our or AIM's counsel; both board of directors and our counsel have

significant experience advising funds and fund board members. The board of directors and its committees have the ability to engage other experts as appropriate. The board of directors evaluates its performance on an annual basis.

Independent Directors

Hilary E. Ackermann (60) Director. Ms. Ackermann became a Director of the Company in August 2015. Ms. Ackermann currently serves as a Director of Dynegy Inc., a power company, where she also serves as Chair of the Finance and Commercial Oversight Committee. She also serves as a Director of The Hartford Funds mutual fund complex. Ms. Ackermann was Chief Risk Officer with Goldman Sachs Bank USA from October 2008 until October 2011, where she also served as Vice Chair of the Bank Risk

Table of Contents

Committee, was a member of Community Investment, Business Standards and New Activities Committees and the GS Group level Credit Policy and Capital Committees, and chaired the GS Group level Operational Risk Committee. Ms. Ackermann served as Managing Director, Credit Department of Goldman Sachs & Co. from January 2002 until October 2008, as a Vice President of the Credit Department from 1989 to 2001, and as an Associate in the Credit Department from 1985 to 1988. Prior to joining Goldman Sachs, Ms. Ackermann served as Assistant Department Head of the Credit Department at Swiss Bank Corporation from 1981 until 1985.

Jeanette W. Loeb (64) Director. Ms. Loeb became a Director of the Company in August 2011. Ms. Loeb currently serves as a Director and Chief Executive Officer of PetCareRx, Inc., a leading e-commerce pet pharmacy that sells pet medications, supplies and food directly to the consumer. Ms. Loeb joined PetCareRx, Inc. in 2001. From 1977 until 1994, Ms. Loeb was an investment banker at Goldman Sachs & Co., where she served as the head of the Structured Finance Department in the U.S. Ms. Loeb was named the first woman partner of Goldman Sachs & Co. in 1986 and served as a partner from 1986 to 1994. Ms. Loeb received an MBA from Harvard Business School and graduated Phi Beta Kappa from Wellesley College with a BA in economics. She currently serves on the board and the finance committee of New York City Center and the board for Alliance Bernstein Multi-Manager Alternative Fund, and has previously been on the board and audit committee of the United Nations Development Corporation, a member of the board of the Collegiate School, the Treasurer and a board member of the Society of Memorial Sloan Kettering, and a founding member of the Wellesley Business Leadership Council.

Frank C. Puleo (70) Director. Mr. Puleo became a Director of the Company in February 2008. Mr. Puleo currently serves as a Director of South Street Holdings, LLC (formerly known as CMET Finance Holdings, Inc.), a company that finances securities inventory for customers and dealers and licenses trade processing software, SLM Corp., a student loan company, and Syncora Capital Assurance, Inc., a monoline financial guaranty and insurance company. Previously, Mr. Puleo was also a partner at Milbank, Tweed, Hadley & McCloy LLP where he advised clients on structured finance transactions, bank and bank holding company regulatory and securities law matters. Mr. Puleo became a partner of Milbank, Tweed, Hadley & McCloy LLP in 1978 and Co-Chair of the firm's Global Finance Group in 1995 until retiring at the end of 2006. He was a member of the firm's Executive Committee from 1982 to 1991 and from 1996 to 2002. Mr. Puleo served as a Lecturer at Columbia University School of Law from 1997 to 2001.

R. Rudolph Reinfrank (61) Director. Mr. Reinfrank became a Director of the Company in June 2013. Mr. Reinfrank currently serves as a Director of Parker Drilling Company Inc. Since October 2009 Mr. Reinfrank has served as the Managing General Partner of Riverford Partners, LLC, a strategic advisory and investment firm based in Los Angeles, CA ("Riverford"). Riverford acts as an investor, board member and strategic adviser to growth companies and companies in transition. In 2000, Mr. Reinfrank co-founded and served as a Managing General Partner of Clarity Partners, L.P. until 2009. In 1997, he co-founded and serves as a Managing General Partner of Rader Reinfrank & Co. In 2006, he co-founded Clarity China, L.P. Mr. Reinfrank is also a Senior Adviser to Pall Mall Capital, Limited (London) and Transnational Capital Corporation.

Carl Spielvogel (87) Director. Ambassador Spielvogel became a Director of the Company in March 2004. Ambassador Spielvogel was and is currently Chairman and Chief Executive Officer of Carl Spielvogel Enterprises, Inc., an international management and counseling company, from 1997 to 2000, and from 2001 to present. From 2000 to 2001, Ambassador Spielvogel served as U.S. Ambassador to the Slovak Republic, based in Bratislava, Slovakia. He served as a Director of Interactive Data Corporation, Inc. from 1996 to 2009, and as a member of its Audit Committee and Chairman of the Independent Shareholders Committee. From 1994 to 1997, Ambassador Spielvogel was Chairman and Chief Executive Officer of the United Auto Group, Inc., one of the first publicly-owned auto dealership groups. Earlier, Ambassador Spielvogel was Chairman and Chief Executive Officer of Backer Spielvogel Bates Worldwide, a global marketing communications company from 1985 to 1994. Ambassador Spielvogel is a trustee of the Metropolitan Museum of Art; a member of the Board of Trustees and Chairman of the Business Council of the Asia Society; a member of the Board of Trustees of Lincoln Center for the Performing Arts; a member of the Council on Foreign Relations; a member of the Executive Committee of the Council of American Ambassadors; a Trustee and member of the Executive Committee of the State University of New York, and a former Fellow of the Kennedy

School of Government at Harvard University. Before becoming an Ambassador, he was a Governor of the United States Government Board of Broadcasting.

Elliot Stein, Jr. (67) Director. Mr. Stein became a Director of the Company in March 2004 and currently serves as lead Independent Director. Mr. Stein has also been a Director of Apollo Senior Floating Rate Fund Inc. since 2011 and a Director of Apollo Tactical Income Fund Inc. since 2013. He has served as Chairman of Acertas LLC and Senturion Forecasting, LLC (consulting firms) since 2013 and Caribbean International News Corporation from 1985 to 2013, and is a board member of various private companies including Multi-Pack Solutions and Cohere Communications. Mr. Stein was a Managing Director of Commonwealth Capital Partners and has served as a Director of VTG Holdings and Bargain Shop Holdings, Inc. Mr. Stein is a Trustee of Claremont Graduate University and the New School University. He is a member of the Council on Foreign Relations. Mr. Stein received a BA from Claremont McKenna College.

67

Table of Contents

Interested Directors

John J. Hannan (63) Chairman of the Board of Directors. Mr. Hannan became a Director of the Company in March 2004 and was elected as Chairman of the Board of Directors in August 2006. He served as the Chief Executive Officer from February 2006 to November 2008. Mr. Hannan, a senior partner of Apollo Management, L.P., co-founded Apollo Management, L.P. in 1990. He is also currently on the Board of Directors of EP Energy Corporation. Mr. Hannan formerly served as a Director of Vail Resorts, Inc. and Goodman Global, Inc.

Bradley J. Wechsler (65) Director. Mr. Wechsler became a Director of the Company in April 2004. Mr. Wechsler was the Co-Chairman and Co-Chief Executive Officer of IMAX Corporation from May 1996 through April 2009 and is currently Chairman. Since January 2015, Mr. Wechsler is the Managing Partner of Elysium, LLC, a limited liability company that manages the family office for Leon Black, the CEO of Apollo Global Management, LLC (“AGM”). Previously Mr. Wechsler has had several executive positions in the entertainment and finance industries and has made a number of private investments. Mr. Wechsler is a Vice-Chairman of the board of the NYU Hospital and Medical Center, a member of the Executive Committee and chairs its Finance Committee. He also sits on the board of Math for America and is a member of the Academy of Motion Picture Arts and Sciences.

James C. Zelter (54) Chief Executive Officer and Director. Mr. Zelter became the Chief Executive Officer and a Director of the Company in 2006. Mr. Zelter is the Managing Partner of Apollo Capital Management, L.P., where he oversees the firm’s activities in a broad array of asset classes. Prior to joining Apollo, Mr. Zelter was with Citigroup and its predecessor companies from 1994 to 2006. He was responsible for the global expansion and strong financial performance of the Special Situations Investment Group, a proprietary investment group he founded within Citigroup’s Fixed Income Division. As head of Citigroup’s Special Situations Investment Group, Mr. Zelter was responsible for the acquisition of approximately \$5 billion of non-performing loan portfolios and ancillary investments. While with Citigroup, Mr. Zelter also served on the Global Fixed Income Management Committee. In this role, he oversaw the firm’s High Yield Trading, Sales and Capital Market Groups. From 2003 to 2005, Mr. Zelter was Chief Investment Officer of Citigroup Alternative Investments. In addition, he was a standing member of the Citigroup Pension Investment Committee, the Salomon Smith Barney Capital Partners Investment Committee and the Citigroup Mezzanine Partners Investment Committee. Prior to joining Citigroup in 1994, Mr. Zelter was a High Yield Trader at Goldman Sachs & Co. Mr. Zelter is a board member of DUMAC, the investment management company that oversees the Duke Endowment and Duke Foundation, and is on the board of the Dalton School. Mr. Zelter has a BA in Economics from Duke University.

Executive Officers who are not directors

Howard T. Widra (47) President. Mr. Widra has been with Apollo Global Management, LLC and/or its affiliates since 2013. He became the President of Apollo Investment Corporation in June 2016. Mr. Widra is a co-founder of MidCap Financial (“MidCap”), a \$6 billion specialty finance business, and was formerly its Chief Executive Officer. Prior to MidCap, Mr. Widra was the founder and President of Merrill Lynch Capital Healthcare Finance. Prior to Merrill Lynch, Mr. Widra was President of GE Capital Healthcare Commercial Finance and held senior roles in its predecessor entities including President of Heller Healthcare Finance, and COO of Healthcare Financial Partners. Mr. Widra holds a J.D., Cum Laude, from the Harvard Law School and a B.A. in Economics from the University of Michigan.

Gregory W. Hunt (59) Chief Financial Officer and Treasurer. Mr. Hunt began his term as Chief Financial Officer and Treasurer of the Company in May 2012. Previously, Mr. Hunt was Executive Vice President and Chief Financial Officer for Yankee Candle which he joined in April 2010. Prior to joining Yankee Candle, Mr. Hunt served as the Executive Vice President of Strategic and Commercial Development for Norwegian Cruise Lines from 2007 to 2009. Prior to joining Norwegian Cruise Lines, Mr. Hunt served as Chief Financial Officer and Chief Restructuring Officer of Tweeter Home Entertainment Group, Inc. from 2006 to 2007 and Chief Financial Officer and Co-Chief Executive of Syratech Corporation from 2001 to 2006. Prior to Syratech, Mr. Hunt held several senior financial leadership positions including Chief Financial Officer of NRT Inc., Culligan Water Technologies, Inc. and Samsonite

Corporation. Mr. Hunt also serves as a Director of LogicSource, Inc. and as a member of the Board of Advisors for the University of Vermont School of Business. Mr. Hunt earned a bachelor of science degree in accounting from the University of Vermont and is a Certified Public Accountant.

Cindy Z. Michel (42) Vice President and Chief Compliance Officer. Ms. Michel joined Apollo in 2007. Ms. Michel is also the Chief Compliance Officer of AGM. Prior to joining Apollo, Ms. Michel served as the Director of Compliance of the Private Equity Division and the Global Trading Strategies Group at Lehman Brothers. Prior to that, she was associated with the investment bank Credit-Suisse Securities as a member of its Compliance Department supporting the Private Equity and Investment Banking businesses. Before joining Credit-Suisse, Ms. Michel was associated with the law firm of DLA Piper. Ms. Michel graduated from Columbia University with an AB in English and Economics and holds a JD from Boston University School of Law.

Table of Contents

Joseph D. Glatt (43) Chief Legal Officer, Secretary and Vice President. Mr. Glatt was appointed Chief Legal Officer of the Company in 2014, Secretary in 2010 and Vice President in 2009. Mr. Glatt is also currently General Counsel of Apollo Capital Management, L.P., a position he has held since 2007. Since 2011 he has served as the Chief Legal Officer of Apollo Senior Floating Rate Fund Inc., and since 2013, he has served as the Chief Legal Officer of Apollo Tactical Income Fund Inc. Mr. Glatt joined Apollo in 2007 and serves as General Counsel for Apollo Capital Management, L.P. Prior to that time, Mr. Glatt was associated with the law firms of Simpson Thacher & Bartlett LLP from 1998 to 2003 and Schulte Roth & Zabel LLP from 2003 to 2007, in each case, primarily focusing on mergers and acquisitions, leveraged buyouts and capital markets activities. Mr. Glatt received his JD from University of Pennsylvania Law School and graduated summa cum laude from Rutgers College with a BA in Political Science, Psychology and Hebraic Studies.

COMMITTEES OF THE BOARD OF DIRECTORS**Audit committee**

The audit committee operates pursuant to an audit committee charter approved by our board of directors. The charter sets forth the responsibilities of the audit committee, which include selecting or retaining each year an independent registered public accounting firm (the “auditors”) to audit our annual financial statements; reviewing and discussing with management and the auditors our annual audited financial statements, including disclosures made in management’s discussion and analysis, and recommending to the board of directors whether the audited financial statements should be included in our annual report on Form 10-K; reviewing and discussing with management and the auditors our quarterly financial statements prior to the filings of its quarterly reports on Form 10-Q; pre-approving the auditors’ engagement to render audit and/or permissible non-audit services; evaluating the qualifications, performance and independence of the auditors; reviewing preliminary valuations of the investment adviser and independent valuation firms and recommending valuations to the board of directors; and recommending compensation of the chief financial officer to the board of directors for determination. The audit committee is presently composed of six persons: Messrs. Reinfrank, Puleo, Spielvogel, Stein, Ms. Loeb and Ms. Ackermann, all of whom are Independent Directors and are otherwise considered independent under NASDAQ Marketplace Rule 5605(a)(2). Each member of the audit committee is expected to continue to serve on the audit committee after the Meeting. Mr. Reinfrank currently serves as the chairperson of the audit committee. Our board of directors has determined that Mr. Reinfrank is an “audit committee financial expert” as that term is defined under Item 401 of Regulation S-K under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). The audit committee charter is available on our website (<http://www.apolloic.com>). During the fiscal year ended March 31, 2016, the audit committee met eight times.

Nominating and corporate governance committee

The nominating and corporate governance committee is responsible for selecting qualified nominees to be elected to the board of directors by stockholders; identifying, selecting or recommending qualified nominees to fill any vacancies on the board of directors or a committee thereof; developing and recommending to the board of directors a set of corporate governance principles applicable to us; overseeing the evaluation of the board of directors and management; and undertaking such other duties and responsibilities as may from time to time be delegated by the board of directors to the nominating and corporate governance committee. The nominating and corporate governance committee is presently composed of six persons: Messrs. Puleo, Reinfrank, Spielvogel, Stein, Ms. Loeb and Ms. Ackermann. Mr. Stein currently serves as the chairman of the nominating and corporate governance committee. The nominating and corporate governance committee has adopted a written nominating and corporate governance committee charter which is available on our website (www.apolloic.com). During the fiscal year ended March 31, 2016, the nominating and corporate governance committee met four times.

Compensation committee

The compensation committee is responsible for determining, or recommending to the board of directors for determining, the compensation of our chief executive officer and all other executive officers, paid directly by us, if any. The compensation committee also assists the board of directors with all matters related to compensation, as directed by the board of directors. The current members of the compensation committee are Messrs. Reinfrank, Puleo, Spielvogel, Stein, Ms. Loeb and Ms. Ackermann, each of whom is not an interested person of us for purposes of the

1940 Act and the NASDAQ corporate governance rules. As shown below, none of our executive officers is directly compensated by us and, as a result, the compensation committee does not produce and/or review and report on executive compensation practices. The compensation committee Charter is available on our website (www.apolloic.com). During the fiscal year ended March 31, 2016, the compensation committee met two times.

69

(1) We do not have a profit sharing or retirement plan, and our Directors and Executive Officers do not receive any pension or retirement benefits.

(2) Ms. Ackermann was elected to serve as an independent director of the Company effective August 6, 2015 and has therefore received a prorated portion of the base fee for the Company's 2016 fiscal year as well as the appropriate fees for each meeting attended by her for the period.

(3) Mr. Zelter is also an executive officer of the Company.

(4) Mr. Goldthorpe resigned from his position as President of the Company on June 6, 2016 and Howard T. Widra was appointed President of the Company, effective as of June 6, 2016.

The independent directors' annual fee is \$125,000. The independent directors also receive \$2,500 plus reimbursement of reasonable out-of-pocket expenses incurred in connection with attending each board meeting, \$1,000 plus reimbursement of reasonable out-of-pocket expenses incurred in connection with each committee meeting attended, and \$1,500 for each telephonic committee or board meeting attended. In addition, the Lead Independent Director receives an annual fee of \$25,000, the Chairman of the Audit Committee receives an annual fee of \$15,000 and each chairman of any other committee receives an annual fee of \$2,500 for additional services in these capacities. Further, we purchase directors' and officers' liability insurance on behalf of our directors and officers.

Additional information required by this item, including for example, compensation of officers and directors, is contained in the Registrant's definitive Proxy Statement for its 2016 Annual Stockholders Meeting under the caption, "Compensation of Directors and Executive Officers" filed with the Securities and Exchange Commission on June 16, 2016 and is incorporated herein by reference.

INVESTMENT ADVISORY AND MANAGEMENT AGREEMENT

Management services

AIM serves as our investment adviser and is a wholly-owned direct subsidiary of Apollo Global Management. AIM is registered as an investment adviser under the Advisers Act. Subject to the overall supervision of our board of directors, the investment adviser manages the day-to-day operations of, and provides investment advisory and management services to, Apollo Investment. Under the terms of an investment advisory and management agreement, AIM:

- determines the composition of our portfolio, the nature and timing of the changes to our portfolio and the manner of implementing such changes;
- identifies, evaluates and negotiates the structure of the investments we make (including performing due diligence on our prospective portfolio companies); and
- closes and monitors the investments we make.

AIM's services under the investment advisory and management agreement are not exclusive, and it is free to furnish similar services to other entities so long as its services to us are not impaired.

Management fee

Pursuant to the investment advisory and management agreement, we pay AIM a fee for investment advisory and management services consisting of two components—a base management fee and an incentive fee. For the fiscal years ended March 31, 2016, 2015 and 2014, we paid \$ 66.18 million, \$73.60 million and \$62.82 million, respectively, in base management fees and expensed \$43.94, \$53.18 million and \$46.92 million, respectively, in performance-based incentive fees.

The base management fee is calculated at an annual rate of 2.00% of our average gross assets. The base management fee is payable quarterly in arrears. The base management fee is calculated based on the average value of our gross assets net of payable for investments and cash equivalents purchased at the end of the two most recently completed calendar quarters. Base management fees for any partial month or quarter are appropriately prorated.

The incentive fee has two parts, as follows: one part is calculated and payable quarterly in arrears based on our pre-incentive fee net investment income for the immediately preceding calendar quarter. For this purpose, pre-incentive fee net investment income means interest income, dividend income and any other income (including any other fees (other than fees for providing managerial assistance), such as commitment, origination, structuring, diligence and consulting fees or other fees that we receive from portfolio companies) accrued during the calendar quarter, minus our operating expenses for the quarter (including the base management fee, any expenses payable under the Administration Agreement, and any interest expense and dividends paid on any issued and outstanding preferred stock, but excluding the incentive fee). Pre-incentive fee net investment income does not include any realized capital gains computed net of all realized capital losses and unrealized capital depreciation. Pre-incentive fee net investment income, expressed as a rate of return on the value of our net assets at the end of the immediately preceding calendar quarter, is compared to the rate of 1.75% per quarter (7% annualized). Our net investment income used to calculate this part of the incentive fee is also included in the amount of our gross assets used to calculate the 2% base management fee.

We pay AIM an incentive fee with respect to our pre-incentive fee net investment income in each calendar quarter as follows:

- no incentive fee in any calendar quarter in which our pre-incentive fee net investment income does not exceed the performance threshold of 1.75%;
- 100% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the performance threshold but does not exceed 2.1875% in any calendar quarter (8.75% annualized); and
- 20% of the amount of our pre-incentive fee net investment income, if any, that exceeds 2.1875% in any calendar quarter (8.75% annualized).

The following is a graphical representation of the calculation of the income-related portion of the incentive fee:

Quarterly Incentive Fee Based on Net Investment Income

Table of Contents

PRE-INCENTIVE FEE NET INVESTMENT INCOME
(EXPRESSED AS A PERCENTAGE OF THE VALUE OF NET ASSETS)

PERCENTAGE OF PRE-INCENTIVE FEE NET INVESTMENT INCOME
ALLOCATED TO INCOME-RELATED PORTION OF INCENTIVE FEE

These calculations are appropriately pro rated for any period of less than three months. The effect of the fee calculation described above is that if pre-incentive fee net investment income is equal to or exceeds 2.1875%, AIM will receive a fee of 20% of our pre-incentive fee net investment income for the quarter. You should be aware that a rise in the general level of interest rates can be expected to lead to higher interest rates applicable to our debt investments. Accordingly, an increase in interest rates would make it easier for us to meet or exceed the incentive fee performance threshold and may result in a substantial increase of the amount of incentive fees payable to our investment adviser with respect to pre-incentive fee net investment income. Furthermore, since the performance threshold is based on a percentage of our net asset value, decreases in our net asset value make it easier to achieve the performance threshold.

The second part of the incentive fee is determined and payable in arrears as of the end of each calendar year (or upon termination of the Investment Advisory and Management Agreement, as of the termination date) and will equal 20% of our realized capital gains for each calendar year computed net of all realized capital losses and unrealized capital depreciation and incorporating unrealized depreciation on a gross investment-by-investment basis at the end of such year. Capital gains with respect to any investment will equal the difference between the proceeds from the sale of such investment and the accreted or amortized cost basis of such investment.

Examples of Quarterly Incentive Fee Calculation †

Example 1: Income Related Portion of Incentive Fee (*):

Alternative 1

Assumptions

Investment income (including interest, dividends, fees, etc.) = 1.25%

Performance threshold (1) = 1.75%

Management fee (2) = 0.50%

Other expenses (legal, accounting, custodian, transfer agent, etc.) (3) = 0.20%

Pre-incentive fee net investment income

(investment income—(management fee + other expenses)) = 0.55%

Pre-incentive net investment income does not exceed performance threshold, therefore there is no incentive fee.

Alternative 2

Assumptions

Investment income (including interest, dividends, fees, etc.) = 2.70%

Performance threshold (1) = 1.75%

Management fee (2) = 0.50%

Other expenses (legal, accounting, custodian, transfer agent, etc.) (3) = 0.20%

Pre-incentive fee net investment income

(investment income—(management fee + other expenses)) = 2.00%

Incentive fee = 100% × pre-incentive fee net investment income, in excess of the performance threshold (4)

= 100% × (2.00% – 1.75%)

= 0.25%

Table of Contents

Alternative 3

Assumptions

Investment income (including interest, dividends, fees, etc.) = 3.00%

Performance threshold (1) = 1.75%

Management fee (2) = 0.50%

Other expenses (legal, accounting, custodian, transfer agent, etc.) (3) = 0.20%

Pre-incentive fee net investment income

(investment income—(management fee + other expenses)) = 2.30%

Incentive fee = 100% × (2.1875% – 1.75%) + (20% × (pre-incentive fee net investment income—2.1875%))

= 0.4375%

Incentive fee = (100% × 0.4375%) + (20% × (2.30% – 2.1875%))

= 0.4375% + (20% × 0.1125%)

= 0.4375% + 0.0225%

= 0.46%

 † Calculated prior to giving effect to any fee waiver described below.

(*) The hypothetical amount of pre-incentive fee net investment income shown is based on a percentage of total net assets.

(1) Represents 7.0% annualized performance threshold.

(2) Represents 2.0% annualized management fee.

(3) Excludes organizational and offering expenses.

(4) This provides our investment adviser with an incentive fee of 20% on all of our pre-incentive fee net investment income when our net investment income equals or exceeds 2.1875% in any calendar quarter.

Example 2: Capital Gains Portion of Incentive Fee:

Alternative 1:

Assumptions

Year 1: \$20 million investment made in Company A (“Investment A”), and \$30 million investment made in Company B (“Investment B”)

Year 2: Investment A sold for \$50 million and fair market value (“FMV”) of Investment B determined to be \$32 million

Year 3: FMV of Investment B determined to be \$25 million

Year 4: Investment B sold for \$31 million

The capital gains portion of the incentive fee would be:

Year 1: None

Year 2: Capital gains incentive fee of \$6 million (\$30 million realized capital gains on sale of Investment A multiplied by 20%)

Year 3: None

\$5 million (20% multiplied by (\$30 million cumulative capital gains less \$5 million cumulative capital depreciation)) less \$6 million (previous capital gains fee paid in Year 2)

Year 4: Capital gains incentive fee of \$200,000

\$6.2 million (\$31 million cumulative realized capital gains multiplied by 20%) less \$6 million (capital gains fee taken in Year 2)

Table of Contents

Alternative 2

Assumptions

- Year 1: \$20 million investment made in Company A (“Investment A”), \$30 million investment made in Company B (“Investment B”) and \$25 million investment made in Company C (“Investment C”)

- Year 2: Investment A sold for \$50 million, FMV of Investment B determined to be \$25 million and FMV of Investment C determined to be \$25 million

- Year 3: FMV of Investment B determined to be \$27 million and Investment C sold for \$30 million

- Year 4: FMV of Investment B determined to be \$35 million

- Year 5: Investment B sold for \$20 million

The capital gains incentive fee, if any, would be:

- Year 1: None

- Year 2: \$5 million capital gains incentive fee

20% Multiplied by \$25 million (\$30 million realized capital gains on Investment A less unrealized capital depreciation on Investment B)

- Year 3: \$1.4 million capital gains incentive fee (1)

\$6.4 million (20% multiplied by \$32 million (\$35 million cumulative realized capital gains less \$3 million unrealized capital depreciation)) less \$5 million capital gains fee received in Year 2

- Year 4: None

- Year 5: None

\$5 million (20% multiplied by \$25 million (cumulative realized capital gains of \$35 million less realized capital losses of \$10 million)) less \$6.4 million cumulative capital gains fee paid in Year 2 and Year 3”

Effective April 1, 2016 through March 31, 2017 (the “waiver period”), the investment adviser has agreed to waive 25% of its base management fee and up to 25% of its performance-based incentive fee so that during the waiver period the management fee is reduced from 2% to 1.5% and the incentive fee on pre-incentive fee net investment income (“incentive fee”) could be accrued at as low a rate as 15% to the extent the Company experiences cumulative net realized and change in unrealized losses during the waiver period (“cumulative net losses”).

During the waiver period, assuming that the investment adviser would earn incentive fees at the 20% rate provided in the Investment Advisory Agreement, the incentive fee will initially be accrued at the rate of 17.5% and will be adjusted as of the end of each quarter. The incentive fee accrual will be increased up to a maximum rate of 20% to the extent that the Company experiences cumulative net realized and change in unrealized gains (“cumulative net gains”) during the period and will be decreased down to a minimum rate of 15% to the extent that the Company experiences cumulative net losses during the period. The inclusion of cumulative net gains and cumulative net losses will be measured on a cumulative basis from April 1, 2016 through the end of each quarter during the waiver period. Any cumulative net gains will result in a dollar for dollar increase in the incentive fee payable up to a maximum rate of 20% and any cumulative net losses will result in a dollar for dollar decrease in the incentive fee payable down to a minimum rate of 15%.

If the resulting incentive fee rate is less than 20%, the percentage at which the investment adviser’s 100% catch-up is complete will also be reduced ratably from 2.1875% (8.75% annualized) to as low as 2.06% (8.24% annualized).

As an illustration of the foregoing incentive fee waiver, if cumulative pre-incentive fee net investment income through the end of each successive quarter during the waiver period is \$54 million, \$108 million, \$161 million and \$215 million, and the cumulative net gains or cumulative net losses are \$20 million gains, \$20 million losses, zero and \$10 million losses, the incentive fee would be accrued at a rate of 20% for the first quarter, 15% through the first two quarters, 17.5% through the first three quarters, and 15% through the end of the fiscal year.

Payment of our expenses

All investment professionals of the investment adviser and their respective staffs when and to the extent engaged in providing investment advisory and management services, and the compensation and routine overhead expenses of such personnel allocable to such services, are provided and paid for by AIM. We bear all other costs and expenses of our operations and transactions, including those relating to: calculation of our net asset value (including the cost and

expenses of any independent valuation firm);

74

Table of Contents

expenses incurred by AIM payable to third parties, including agents, consultants or other advisers, in monitoring our financial and legal affairs and in monitoring our investments and performing due diligence on our prospective portfolio companies; interest payable on debt, if any, incurred to finance our investments; offerings of our common stock and other securities; investment advisory and management fees; fees payable to third parties, including agents, consultants or other advisers, relating to, or associated with, evaluating and making investments; transfer agent and custodial fees; registration fees; listing fees; taxes; independent directors' fees and expenses; costs of preparing and filing reports or other documents of the SEC; the costs of any reports, proxy statements or other notices to stockholders, including printing costs; our allocable portion of the fidelity bond, directors' and officers' errors and omissions liability insurance, and any other insurance premiums; direct costs and expenses of administration, including auditor and legal costs; and all other expenses incurred by us or Apollo Administration in connection with administering our business, such as our allocable portion of overhead under the administration agreement, including rent and our allocable portion of the cost of our chief compliance officer, chief financial officer and corporate secretary and their respective staffs.

(1) As illustrated in Year 3 of Alternative 1 above, if Apollo Investment were to be wound up on a date other than December 31st of any year, Apollo Investment may have paid aggregate capital gain incentive fees that are more than the amount of such fees that would be payable if Apollo Investment had been wound up on December 31st of such year.

Duration and termination

The continuation of our investment advisory and management agreement was approved by our board of directors on March 12, 2015. Unless terminated earlier as described below, it will remain in effect from year to year if approved annually by our board of directors or by the affirmative vote of the holders of a majority of our outstanding voting securities, including, in either case, approval by a majority of our directors who are not "interested persons" as defined in the 1940 Act. The investment advisory and management agreement will automatically terminate in the event of its assignment. Either party may terminate the investment advisory and management agreement without penalty upon not more than 60 days' written notice to the other party. See "Risk Factors—Risks relating to our business and structure—We are dependent upon AIM's key personnel for our future success and upon their access to Apollo's investment professionals and partners."

Indemnification

The investment advisory and management agreement provides that, absent willful misfeasance, bad faith or gross negligence in the performance of its duties or reckless disregard of its duties and obligations, AIM and its officers, managers, partners, agents, employees, controlling persons, members and any other person or entity affiliated with it are entitled to indemnification from Apollo Investment for any damages, liabilities, costs and expenses (including reasonable attorneys' fees and amounts reasonably paid in settlement) arising from the rendering of AIM's services under the investment advisory and management agreement or otherwise as an investment adviser of Apollo Investment.

Organization of the investment adviser

AIM is a Delaware limited partnership that is registered as an investment adviser under the Advisers Act. The principal executive offices of AIM are at 9 West 57th Street, New York, NY 10019.

Portfolio Managers

AIM, our investment adviser, is led by John Hannan, James Zelter, Howard Widra, Patrick Ryan and Tanner Powell. Potential investment and disposition opportunities are generally approved by one or more committees comprised of personnel across AGM, including Messrs. Zelter, Widra, Ryan and Powell and/or all or a majority of Messrs. Zelter, Widra, Ryan and Powell depending on the underlying investment type and/or the amount of such investment. The composition of such committees and the overall approval process for our investments may change from time to time. AIM draws upon AGM's more than 25 year history and benefits from the broader firm's significant capital markets, trading and research expertise developed through investments in many core sectors in over 200 companies since inception.

Within the context of the structure described above, the following individuals (the “Portfolio Managers”) have senior responsibility for the management of our investment portfolio: Howard Widra, James Zelter, Tanner Powell and Justin Sendak. Mr. Powell is AIM’s Chief Investment Officer and has primary responsibility for the day-to-day implementation and management of our investment portfolio.

For a discussion of Messrs. Widra and Zelter, please see “Management-Board of Directors-Biographical Information.” Mr. Powell joined AIM in 2006. From 2004 to 2006, Mr. Powell served as an analyst in Goldman Sachs’ Principal Investment Area (PIA), concentrating on mezzanine investing. From 2002 to 2004, Mr. Powell was an analyst in the Industrials group at Deutsche Bank. Mr. Sendak joined AGM in 2007 to concentrate on leveraged bank debt, high yield securities and alternative investment opportunities. Prior to joining AGM, Mr. Sendak was a Managing Director at Merrill Lynch & Co. specializing in underwriting and

Table of Contents

placing 144A high yield securities and leveraged loans involving transactions ranging between U.S. \$250 million to U.S. \$10 billion. Prior to that role, Mr. Sendak was a Managing Director in Capital Markets at CIBC World Markets Corp. from 2002 to 2005. Prior to 2002, Mr. Sendak was a Managing Director in CIBC World Markets Corp's Leveraged Finance Group, specializing in the structuring and placing of institutional bank debt.

Other Accounts Managed. As of March 31, 2016, the Portfolio Managers were primarily responsible for the day-to-day portfolio management of the following accounts:

Name of Portfolio Manager	Type of Accounts	Total Number of Accounts Managed	Total Assets (in millions) (1)	Number of Accounts Managed for which Advisory Fee is Based on Performance	Total Assets for which Advisory Fee is Based on Performance (in millions) (2)
Howard Widra(3)	Registered Investment Companies:	None	\$ —	—	\$ —
	Other Pooled Investment Vehicles:	None	\$ —	—	\$ —
	Other Accounts:	None	\$ —	—	\$ —
James C. Zelter	Registered Investment Companies:	None	\$ —	—	\$ —
	Other Pooled Investment Vehicles:	None	\$ —	—	\$ —
	Other Accounts:	None	\$ —	—	\$ —
Tanner Powell	Registered Investment Companies:	None	\$ —	—	\$ —
	Other Pooled Investment Vehicles:	1	\$ 968	—	\$ 968
	Other Accounts:	None	\$ —	1	\$ —
Justin Sendak	Registered Investment Companies:	None	\$ —	—	\$ —
	Other Pooled Investment Vehicles:	None	\$ —	—	\$ —
	Other Accounts:	None	\$ —	—	\$ —

(1) Total assets represents assets under management as defined by Apollo Global Management, LLC, which includes unfunded commitments.

(2) Represents the assets under management of the accounts managed that generate incremental fees in addition to management fees.

Mr. Widra also serves as a Portfolio Manager of MidCap Financial, a specialty finance business managed by (3) Apollo Capital Management, L.P., an affiliate of AGM, with \$5.8 billion in assets under management as of March 31, 2016.

Compensation. AIM's financial arrangements with the Portfolio Managers, its competitive compensation and its career path emphasis at all levels reflect the value senior management places on key resources. Compensation may include a variety of components and may vary from year to year based on a number of factors. The principal components of compensation include base compensation and discretionary compensation.

Base Compensation. Generally, Portfolio Managers receive an annual salary that is consistent with the market rate of annual salaries paid to similarly situated investment professionals.

Discretionary Compensation. Portfolio Managers also receive discretionary compensation generally consisting of two components: an annual bonus and carried interest.

Table of Contents

Annual Bonus. Generally, a Portfolio Manager receives an annual bonus based on such person's individual performance, operational performance for the Apollo-advised accounts for which such person serves, and such Portfolio Manager's impact on the overall operating performance and potential to contribute to long-term value and growth. A portion of each annual bonus may be deferred, and, at the discretion of Apollo, may be in the form of cash or equity of an Apollo entity, such as restricted stock units of Apollo Global Management, LLC.

Carried Interest. Generally, a Portfolio Manager receives carried interests with respect to the Apollo-advised accounts, subject to standard terms and conditions, including vesting.

Material Conflicts of Interest. Actual or apparent conflicts of interest may arise when a Portfolio Manager has day-to-day management responsibilities with respect to more than one fund or other account.

Certain inherent conflicts of interest arise from the fact that the Portfolio Managers, AIM and its affiliates provide investment management services both to us and the other Apollo-advised accounts, including other funds, client accounts, proprietary accounts and any other investment vehicles that AIM and its affiliates may establish from time to time, in which we will not have an interest. The Portfolio Managers, AIM and its affiliates may give advice and recommend securities to the other Apollo-advised accounts that may differ from advice given to, or securities recommended or bought for, us, even though their investment objectives may be the same or similar to ours.

AIM will seek to manage potential conflicts of interest in good faith; nonetheless, the portfolio strategies employed by the Portfolio Managers, AIM and its affiliates in managing the other Apollo-advised accounts could conflict with the transactions and strategies employed by the Portfolio Managers in managing us and may affect the prices and availability of the securities and instruments in which we invest. Conversely, participation in specific investment opportunities may be appropriate, at times, for both us and the other Apollo-advised accounts. It is the policy of AIM to generally share appropriate investment opportunities (and sale opportunities) with the other Apollo-advised accounts to the extent consistent with applicable legal requirements. In general, this policy will result in such opportunities being allocated pro rata among us and the other Apollo-advised accounts. Nevertheless, investment and/or opportunities may be allocated other than on a pro rata basis, to the extent it is done in good faith and does not, or is not reasonably expected to, result in an improper disadvantage or advantage to one participating Apollo-advised account as compared to another participating Apollo-advised account.

In the event investment opportunities are allocated among us and the other Apollo-advised accounts, we may not be able to structure our investment portfolio in the manner desired. Although AIM endeavors to allocate investment opportunities in a fair and equitable manner, it is possible that we may not be given the opportunity to participate in certain investments made by the other Apollo-advised accounts or portfolio managers affiliated with AIM.

Furthermore, we and the other Apollo-advised accounts may make investments in securities where the prevailing trading activity may make impossible the receipt of the same price or execution on the entire volume of securities purchased or sold by us and the other Apollo-advised accounts. When this occurs, the various prices may be averaged, and we will be charged or credited with the average price. Thus, the effect of the aggregation may operate on some occasions to our disadvantage. In addition, under certain circumstances, we may not be charged the same commission or commission equivalent rates in connection with a bunched or aggregated order.

It is possible that other Apollo-advised accounts may make investments in the same or similar securities at different times and on different terms than us. From time to time, we and the other Apollo-advised accounts may make investments at different levels of an issuer's capital structure or otherwise in different classes of an issuer's securities. Such investments may inherently give rise to conflicts of interest or perceived conflicts of interest between or among the various classes of securities that may be held by such entities. Conflicts may also arise because portfolio decisions regarding us may benefit the other Apollo-advised accounts. For example, the sale of a long position or establishment of a short position by us may impair the price of the same security sold short by (and therefore benefit) one or more Apollo-advised accounts, and the purchase of a security or covering of a short position in a security by us may increase the price of the same security held by (and therefore benefit) one or more Apollo-advised accounts.

Although the professional staff of AIM will devote as much time to our management as AIM deems appropriate to perform its obligations, the professional staff of AIM may have conflicts in allocating its time and services among us and AIM's other investment vehicles and accounts. AIM and its affiliates are not restricted from forming additional

investment funds, from entering into other investment advisory relationships or from engaging in other business activities, even though such activities may be in competition with us and/or may involve substantial time and resources of AIM and its professional staff. These activities could be viewed as creating a conflict of interest in that the time and effort of the members of AIM and their officers and employees will not be devoted exclusively to our business but will be allocated between our business and the management of the monies of other clients of AIM. Variation in Compensation. A conflict of interest may arise where the financial or other benefits available to a Portfolio Manager differ among the accounts that he or she manages. If the structure of AIM's management fee or the Portfolio Manager's compensation differs among accounts (such as where certain accounts pay higher management fees or performance based management fees), the Portfolio Managers may be motivated to favor certain accounts over others. The Portfolio Managers also may

77

Table of Contents

be motivated to favor accounts in which they have investment interests, or in which AIM or its affiliates have investment interests. Similarly, the desire to maintain assets under management or to enhance a Portfolio Manager's performance record or to derive other rewards, financial or otherwise, could influence the Portfolio Manager in affording preferential treatment to those accounts that could most significantly benefit the Portfolio Manager. For example, as reflected above, if a Portfolio Manager manages accounts which have performance fee arrangements, certain portions of his or her compensation will depend on the achievement of performance milestones on those accounts. The Portfolio Manager could be incented to afford preferential treatment to those accounts and thereby be subject to a potential conflict of interest.

We and AIM have adopted compliance policies and procedures that are reasonably designed to address the various conflicts of interest that may arise for AIM and its staff members. However, there is no guarantee that such policies and procedures will be able to detect and prevent every situation in which an actual or potential conflict may arise. Beneficial Ownership of Securities. The following table sets forth the dollar range of our equity securities beneficially owned by each of the Portfolio Managers as of March 31, 2016.

Name of Portfolio Manager	Dollar Range of Equity Securities in Apollo Investment (1)
Tanner Powell	\$10,001-\$50,000
Howard Widra	\$—
Justin Sendak	\$10,001-\$50,000
James C. Zelter	over \$1,000,000

(1) Dollar ranges are as follows: None, \$1—\$10,000, \$10,001—\$50,000, \$50,001—\$100,000, \$100,001—\$500,000, \$500,001—\$1,000,000 or over \$1,000,000.

Board Approval of the Investment Advisory and Management Agreement

At a meeting of our board of directors held on March 11, 2016, the board, including our directors who are not "interested persons" as defined in the 1940 Act, voted to approve the continuation of the investment advisory and management agreement between us and AIM for another annual period in accordance with the requirements of the 1940 Act. Our independent directors had the opportunity to consult in executive session with their counsel regarding the approval of such agreement. In reaching a decision to approve the continuation of the investment advisory and management agreement, our board of directors considered all factors that it believed to be relevant (including those described below). Our board of directors did not undertake to make any specific determination as to whether any particular factor, or any aspect of any particular factor, was favorable or unfavorable to its ultimate determination. Rather, our board of directors based its approval on the totality of information presented to, and reviewed by, it. In considering the renewal of our investment advisory and management agreement, individual directors may have given different weights to different factors. The substance of the board's considerations are summarized as follows: Nature, extent and quality of services. Our board of directors received and considered information regarding the nature, extent and quality of the investment selection process employed by our investment adviser. In addition, our board of directors received and considered other information regarding the administrative and other services rendered to us by affiliates of the investment adviser and noted information received at regular meetings throughout the year related to the services rendered by the investment adviser in its management of our affairs. Our board of directors also considered the backgrounds and responsibilities of the investment adviser's senior personnel and their qualifications and experience in connection with the types of investments made by us. The board noted changes to the investment adviser's personnel and the investment adviser's commitment to providing us with qualified investment and compliance personnel. Our board of directors concluded that our investment adviser's continued investment in staff and services appears sufficient to support our investment program and our investment adviser's parent company continues to support, and reiterate its willingness and ability to support our investment adviser's investment activities through shared resources and financial commitments. Our board of directors determined that the nature, extent and quality of the services provided by our investment adviser are adequate and appropriate.

Comparative analysis of our investment performance and management fees and expense ratio. Our board of directors reviewed the long-term and short-term investment performance of Apollo Investment and the investment adviser, as well as comparative data with respect to the long-term and short-term investment performance of other externally-managed business development companies, as provided by an independent third party information provider. As part of its review, our board of directors acknowledged that our investment performance has been adversely affected in recent periods, among other reasons, by our known emphasis in certain verticals, including oil and gas. Based on this acknowledgement and its understanding of our investment adviser's overall investment strategy and selection process, our board of directors concluded that our underperformance merited its ongoing consideration when

78

Table of Contents

approving the fees payable under our investment advisory and management agreement, including the fee waivers on our base management fee and incentive fee for the ensuing fiscal year.

Our board of directors also considered comparative data provided by the independent third party information provider based on publicly available information on the services rendered to, and the fees (including the base management fees and incentive fees) paid by, other externally-managed business development companies, as well as our operating expenses and expense ratio compared to other externally-managed business development companies, including those business development companies with similar investment objectives. Based upon its review, the board of directors concluded that the fee rates, including accounting for the fee waivers on our base management fee and incentive fee for the ensuing fiscal year, were within range of the fee rates of other externally-managed business development companies.

Cost of services provided and profits realized by our investment adviser and its affiliates from their relationship with us. Our board of directors received information regarding the profitability to our investment adviser and its affiliate and the methodology used by our investment adviser in allocating its costs regarding our operations and calculating profitability. In addition, our board of directors considered whether any direct or indirect collateral benefits inured to our investment adviser as a result of its affiliation with us. It was noted that we have entered into a separate administration agreement pursuant to which an affiliate of our investment adviser provides us with certain personnel and services not otherwise provided under our investment advisory and management agreement, which services are required for our operations, and we generally reimburse that affiliate on an at cost basis for such services.

Economies of scale and other benefits to our investment adviser. Our board of directors considered information about the potential of the investment adviser to realize economies of scale in managing our assets, and determined that, at this time, there were no material economies of scale to be realized by the investment adviser in managing our assets and that, to the extent future material economies of scale were realized, our board of directors would consider whether those economies of scale should be shared with us. The board also considered any "fallout" benefits or ancillary revenue received by AIM or its affiliates in connection with the services provided to us. Our board of directors considered the overall costs to our investment adviser and its affiliates to provide the scope of services we require to conduct our operations, including the reimbursement of expenses by us for administrative services under the separate administration agreement.

In evaluating our investment advisory and management agreement, our board of directors also relied on its previous knowledge, gained, among other ways, through meetings and other interactions with our investment adviser and its representatives and affiliates, of our investment adviser and the services provided to us by our investment adviser and its affiliates. Our board of directors also relied on information received or obtained on a routine and regular basis throughout the year relating to our operations and the investment management and other services provided under the agreement, including information on our investment performance in comparison to other business development companies and in light of general market conditions. In addition, our board of directors' consideration of our contractual fee arrangements had the benefit of a number of years of reviews of prior arrangements. Certain aspects of the arrangements may receive greater scrutiny in some years than in others, and the conclusions our of board of directors may be based, in part, on information obtained as part of these reviews. Based on the information reviewed and the discussions above, our directors, including a majority of our directors who are not "interested persons" as defined in the 1940 Act, unanimously determined to approve the continuation of our investment advisory and management agreement.

ADMINISTRATION AGREEMENT

Pursuant to a separate administration agreement, AIA furnishes us with office facilities, equipment and clerical, bookkeeping and record keeping services at such facilities. Under the administration agreement, AIA also performs, or oversees the performance of, our required administrative services, which include, among other things, being responsible for the financial records that we are required to maintain and preparing reports to our stockholders and reports filed with the SEC. In addition, AIA assists us in determining and publishing our net asset value, oversees the preparation and filing of our tax returns and the printing and dissemination of reports to our stockholders, and generally oversees the payment of our expenses and the performance of administrative and professional services

rendered to us by others. Payments under the administration agreement are equal to an amount based upon our allocable portion of AIA's overhead in performing its obligations under the administration agreement, including rent and our allocable portion of the cost of our chief compliance officer and chief financial officer and their respective staffs. Under the administration agreement, AIA also provides on our behalf managerial assistance to those portfolio companies to which we are required to provide such assistance. Either party may terminate the administration agreement without penalty upon 60 days' written notice to the other party.

At the fiscal years ended March 31, 2016, 2015 and 2014, expenses accrued under the administration agreement were \$6.3 million, \$5.7 million and \$5.6 million, respectively. For administrative expenses accrued during the most recently completed fiscal quarter, please see "Management's Discussion and Analysis of Financial Condition and Result of Operations—Results of Operations—Expenses."

Table of Contents

Indemnification

The administration agreement provides that, absent willful misfeasance, bad faith or gross negligence in the performance of its duties or reckless disregard of its duties and obligations, AIA and its officers, managers, partners, agents, employees, controlling persons, members and any other person or entity affiliated with it are entitled to indemnification from us for any damages, liabilities, costs and expenses (including reasonable attorneys' fees and amounts reasonably paid in settlement) arising from the rendering of AIA's services under the administration agreement or otherwise as administrator for us.

LICENSE AGREEMENT

We have entered into a license agreement with AGM pursuant to which AGM has agreed to grant us a non-exclusive, royalty-free license to use the name "Apollo." Under this agreement, we have the right to use the "Apollo" name, for so long as AIM or one of its affiliates remains our investment adviser. Other than with respect to this limited license, we will have no legal right to the "Apollo" name. This license agreement will remain in effect for so long as the investment advisory and management agreement with our investment adviser is in effect.

Table of Contents

CERTAIN RELATIONSHIPS

We have entered into an investment advisory and management agreement with AIM. Certain of our senior officers and our chairman of the board of directors have ownership and financial interests in AIM. Certain of our senior officers also serve as principals of other investment managers affiliated with AIM that may in the future manage investment funds with investment objectives similar to ours. In addition, our executive officers and directors and the partners of our investment adviser, AIM, serve or may serve as officers, directors or principals of entities that operate in the same or related line of business as we do, or of investment funds managed by its affiliates, although we may not be given the opportunity to participate in certain investments made by investment funds managed by advisers affiliated with AIM. However, our investment adviser and its affiliates intend to allocate investment opportunities in a fair and equitable manner consistent with our investment objectives and strategies so that we are not disadvantaged in relation to any other client.

We have entered into a royalty-free license agreement with AGM, pursuant to which AGM has agreed to grant us a non-exclusive license to use the name "Apollo." Under the license agreement, we have the right to use the "Apollo" name for so long as AIM or one of its affiliates remains our investment adviser. In addition, we rent office space from AIA, an affiliate of AIM, and pay Apollo Administration our allocable portion of overhead and other expenses incurred by Apollo Administration in performing its obligations under our administration agreement with AIA, including our allocable portion of the cost of our chief financial officer and chief compliance officer and their respective staffs, which can create conflicts of interest that our board of directors must monitor. We may invest, to the extent permitted by law, on a concurrent basis with affiliates of AIM, subject to compliance with applicable regulations and our allocation procedures.

Table of Contents**CONTROL PERSONS AND PRINCIPAL STOCKHOLDERS**

As of December 16, 2016, to our knowledge, there were no persons that owned 25% or more of our outstanding voting securities, and no person would be deemed to control us, as such term is defined in the 1940 Act.

The following table sets forth, as of December 16, 2016, certain ownership information with respect to our common stock for each person whom we believe, based upon Schedule 13D, Schedule 13G, Form 13F or other filings by such person with the SEC and other information obtained from such person, may beneficially own 5% or more of our outstanding common stock, and for all officers and directors as a group as of December 16, 2016. Unless otherwise indicated, we believe that each beneficial owner set forth in the table has sole voting and investment power over such securities.

Name and address of Beneficial Owner	Type of ownership(1)	Shares owned	Percentage of common stock outstanding	
Thornburg Investment Management Inc. (2)	Beneficial	24,808,839	11.29	%
FMR LLC (3)	Beneficial	13,510,191	6.15	%
Apollo Principal Holdings III LP(4)	Beneficial	8,885,229	4.04	%
All officers and directors as a group (12 persons) (5)	Beneficial	673,147	*	

* Represents less than 1%.

(1) All of our common stock is owned of record by Cede & Co., as nominee of The Depository Trust Company.

The principal address for Thornburg Investment Management Inc. (“Thornburg”) is 2300 North Ridgetop Road, Santa Fe, New Mexico 87506. Information obtained from a Form 13F filed by Thornburg with the SEC reporting share ownership as of September 30, 2016. Based on that filing, Thornburg maintains the sole power to vote or dispose of 24,808,839 shares.

The principal address for FMR LLC (“FMR”) is 245 Summer Street, Boston, Massachusetts 02210. Information obtained from a Form 13F filed by FMR with the SEC reporting share ownership as of September 30, 2016. Based on that filing, FMR maintains the sole power to vote 946,954 shares and has no power to vote 12,563,237 shares and has shared power with investment advisers under common control to dispose of 13,510,191 shares.

(4) Apollo Principal Holdings III LP is an affiliate of the Company.

The following table sets forth the dollar range of our equity securities beneficially owned by each of our directors as of December 16, 2016. Information as to the beneficial ownership is based on information furnished to Apollo Investment Corporation by such persons. (We are not part of a “family of investment companies” as that term is defined in the 1940 Act).

Name of Director	Dollar Range of Equity Securities in Apollo Investment Corporation (1)
Independent Directors	
Hilary E. Ackermann	\$ 50,001 – \$100,000
Jeanette Loeb (2)	\$ 100,001 – \$500,000
Frank C. Puleo	\$ 100,001 – \$500,000
R. Rudolph Reinfrank	\$ 100,001 – \$500,000
Carl Spielvogel (2)	\$ 1 – \$ 10,000
Elliot Stein, Jr. (2)	\$ 100,001 – \$500,000
Interested Directors	
John J. Hannan (2)	\$ 500,001 – \$1,000,000
James C. Zelter	Over \$1,000,000
Bradley J. Wechsler	\$ 100,001 – \$500,000

Dollar ranges are as follows: None, \$1—\$10,000, \$10,001—\$50,000, \$50,001—\$100,000, \$100,001—\$500,000,
(1) \$500,001—\$1,000,000 or over \$1,000,000.

(2) Dollar range includes shares held through indirect beneficial ownership of a family trust.

Table of Contents

PORTFOLIO COMPANIES

The following is a listing of each portfolio company or its affiliate, together referred to as portfolio companies, in which we had an investment at March 31, 2016. A percentage shown for a class of investment securities held by us represents the percentage of the class owned and does not necessarily represent voting ownership. A percentage shown for equity securities, other than warrants or options, represents the actual percentage of the class of security held on a fully diluted basis. A percentage shown for warrants and options held represents the percentage of a class of security we may own assuming we exercise our warrants or options after dilution. See the financial statements to this base prospectus and any accompanying prospectus supplement for information regarding the fair value of these securities and for the general terms of any loans to the portfolio companies.

The portfolio companies are presented in three categories: “companies more than 25% owned,” which represent portfolio companies with respect to which we directly or indirectly own more than 25% of the outstanding voting securities of such portfolio company and, therefore, unless otherwise noted, are presumed to be controlled by us under the 1940 Act; “companies owned 5% to 25%,” which represent portfolio companies with respect to which we directly or indirectly own 5% to 25% of the outstanding voting securities of such portfolio company or with respect to which we hold one or more seats on the portfolio company’s board of directors and, therefore, are deemed to be an affiliated person under the 1940 Act; and “companies less than 5% owned,” which represent portfolio companies with respect to which we directly or indirectly own less than 5% of the outstanding voting securities of such portfolio company and with respect to which we have no other affiliations. We make available significant managerial assistance to our portfolio companies. We generally request and may receive rights to observe the meetings of our portfolio companies’ board of directors.

Name and Address of Portfolio Company	Nature of its Principal Business	Title of Securities Held by Apollo Investment	Percentage of Class Held (1)
Companies More Than 25% Owned

This information is based on data made available to us as of March 31, 2016. We have no independent ability to (1) verify this information. Some, if not all, portfolio companies are subject to voting agreements with varied voting rights.

Table of Contents

- Certain investments that Apollo Investment has determined are not “qualifying assets” under Section 55(a) of the 1940 Act. Under the 1940 Act, we may not acquire any non-qualifying asset unless, at the time such acquisition is made, qualifying assets represent at least 70% of our total assets. Apollo Investment monitors the status of these assets on an ongoing basis.
- (2) There are governing documents that precludes us from controlling management of the portfolio companies and therefore we disclaim such portfolio companies are controlled companies of us.
- (3) Merx Aviation Finance, LLC and its subsidiaries (“Merx Aviation”) is principally engaged in acquiring and leasing commercial aircraft to airlines. Its focus is on current generation aircraft, held either domestically or internationally. Merx Aviation may acquire fleets of aircraft through securitized, non-recourse debt or individual aircraft. Merx Aviation is not intended to compete with the numerous large lessors but rather to be complementary to them, providing them capital for various transactions. Merx Aviation also may outsource its aircraft servicing requirements to the large lessors that have the global staff necessary to complete such tasks. See “Risk Factors-Risks Relating to Our Investments-The effects of various environmental regulations may negatively affect the aviation industry and some of our portfolio companies.”
- (4)

Table of Contents

DETERMINATION OF NET ASSET VALUE

The net asset value per share of our outstanding shares of common stock is determined quarterly by dividing the value of our total assets minus our liabilities by the total number of our shares outstanding.

In calculating the value of our total assets, we value investments for which market quotations are readily available at such market quotations if they are deemed to represent fair value. Debt and equity securities that are not publicly traded or whose market price is not readily available or whose market quotations are not deemed to represent fair value are valued at fair value as determined in good faith by or under the direction of our board of directors. Market quotations may be deemed not to represent fair value in certain circumstances where AIM reasonably believes that facts and circumstances applicable to an issuer, a seller or purchaser or the market for a particular security causes current market quotes not to reflect the fair value of the security. Examples of these events could include cases in which material events are announced after the close of the market on which a security is primarily traded, when a security trades infrequently causing a quoted purchase or sale price to become stale or in the event of a “fire sale” by a distressed seller.

If and when market quotations are deemed not to represent fair value, we typically utilize independent third party valuation firms to assist us in determining fair value. Accordingly, such investments go through our multi-step valuation process as described below. In each case, our independent valuation firms considered observable market inputs together with significant unobservable inputs in arriving at their valuation recommendations for such Level 3 categorized assets.

With respect to investments for which market quotations are not readily available or when such market quotations are deemed not to represent fair value, our board of directors has approved a multi-step valuation process each quarter, as described below:

- (1) our quarterly valuation process begins with each portfolio company or investment being initially valued by the investment professionals of our investment adviser responsible for the portfolio investment;
- (2) preliminary valuation conclusions are then documented and discussed with senior management of our investment adviser;
- (3) independent valuation firms are engaged by our board of directors to conduct independent appraisals by reviewing our investment adviser’s preliminary valuations and then making their own independent assessment;
- (4) the audit committee of the board of directors reviews the preliminary valuation of our investment adviser and the valuation prepared by the independent valuation firm and responds to the valuation recommendation of the independent valuation firm to reflect any comments; and
- (5) the board of directors discusses valuations and determines in good faith the fair value of each investment in our portfolio based on the input of our investment adviser, the applicable independent valuation firm, third party pricing services and the audit committee.

Investments are valued utilizing a market approach, an income approach, or both approaches, as appropriate. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities (including a business). The income approach uses valuation techniques to convert future amounts (for example, cash flows or earnings) to a single present amount (discounted). The measurement is based on the value indicated by current market expectations about those future amounts. In following these approaches, the types of factors that we may take into account in fair value pricing our investments include, as relevant: available current market data, including relevant and applicable market trading and transaction comparables, applicable market yields and multiples, security covenants, call protection provisions, information rights, the nature and realizable value of any collateral, the portfolio company’s ability to make payments, its earnings and discounted cash flows, the markets in which the portfolio company does business, comparisons of financial ratios of peer companies that are public, M&A comparables, our principal market (as the reporting entity) and enterprise values, among other factors.

Determination of fair values involves subjective judgments and estimates not susceptible to substantiation by auditing procedures. Accordingly, under current auditing standards, the notes to our financial statements refer to the uncertainty with respect to the possible effect of such valuations, and any change in such valuations, on our financial

statements.

Our board of directors reviews the accuracy of the valuations of our portfolio investments and, no less frequently than annually, the adequacy of our policies and procedures regarding valuations and the effectiveness of their implementation.

Table of Contents

DIVIDEND REINVESTMENT PLAN

We have adopted a dividend reinvestment plan that provides for reinvestment of our dividend distributions on behalf of our stockholders, unless a stockholder elects to receive cash as provided below. As a result, if our board of directors authorizes, and we declare, a cash dividend, then our stockholders who have not “opted out” of our dividend reinvestment plan will have their cash dividends automatically reinvested in additional shares of our common stock, rather than receiving the cash dividends.

No action is required on the part of a registered stockholder to have such stockholder’s cash dividend reinvested in shares of our common stock. A registered stockholder may elect to receive a dividend in cash by notifying American Stock Transfer and Trust Company, the plan administrator and our transfer agent and registrar, in writing so that such notice is received by the plan administrator not less than 10 days prior to the record date for dividends to stockholders. The plan administrator will set up an account for shares acquired through the plan for each stockholder who has not elected to receive dividends in cash and hold such shares in non-certificated form. Upon request by a stockholder participating in the plan, received in writing not less than 10 days prior to the record date, the plan administrator will, instead of crediting shares to the participant’s account, issue a certificate registered in the participant’s name for the number of whole shares of our common stock and a check for any fractional share.

Those stockholders whose shares are held by a broker or other financial intermediary may receive dividends in cash by notifying their broker or other financial intermediary of their election.

We intend to use primarily newly-issued shares to implement the plan, whether our shares are trading at a premium or at a discount to net asset value. However, we reserve the right to purchase shares in the open market in connection with our implementation of the plan. The number of shares to be issued to a stockholder is determined by dividing the total dollar amount of the dividend payable to such stockholder by the market price per share of our common stock at the close of regular trading on The Nasdaq Global Select Market on the valuation date for such dividend. Market price per share on that date will be the closing price for such shares on The Nasdaq Global Select Market or, if no sale is reported for such day, at the average of the reported bid and asked prices. The number of shares of our common stock to be outstanding after giving effect to payment of the dividend cannot be established until the value per share at which additional shares will be issued has been determined and elections of our stockholders have been tabulated. Stockholders who do not elect to receive dividends in shares of common stock may experience accretion to the net asset value of their shares if our shares are trading at a premium and dilution if our shares are trading at a discount. The level of accretion or discount would depend on various factors, including the proportion of our stockholders who participate in the plan, the level of premium or discount at which our shares are trading and the amount of the dividend payable to a stockholder.

The plan administrator’s fees under the plan will be paid by us. If a participant elects by written notice to the plan administrator to have the plan administrator sell part or all of the shares held by the plan administrator in the participant’s account and remit the proceeds to the participant, the plan administrator is authorized to deduct a \$15 transaction fee plus a 10¢ per share brokerage commission from the proceeds.

Stockholders are subject to U.S. federal income tax on dividends automatically reinvested in additional shares of our common stock. The automatic reinvestment of dividends into shares of our common stock will generally not relieve participants of any U.S. federal, state or local income tax that otherwise would be payable (or required to be withheld) on such dividends. In that event, plan participants will be treated as receiving cash in an amount equal to the fair market value of such shares as of the reinvestment date, and such amount would be treated as described under "Certain U.S. Federal Income Tax Considerations." Accordingly, a shareholder may incur a tax liability even though such shareholder has not received a cash distribution with which to pay the tax.

Participants may terminate their accounts under the plan by notifying the plan administrator via its website at www.amstock.com, by filling out the transaction request form located at the bottom of their statement and sending it to the plan administrator at P.O. Box 922, Wall Street Station, NY, NY 10269-0560 or by calling the plan administrator’s Interactive Voice Response System at 1-888-777-0324.

The plan may be terminated by us upon notice in writing mailed to each participant at least 30 days prior to any record date for the payment of any dividend by us. All correspondence, including requests for additional information, concerning the plan should be directed to the plan administrator by mail at American Stock Transfer and Trust Company, 6201 15th Avenue, Brooklyn NY 11219 or by telephone at (718) 921-8200.

Table of Contents**CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS**

The following discussion is a general summary of certain U.S. federal income tax considerations applicable to us and to an investment in shares of our common stock. This summary does not purport to be a complete description of the income tax considerations applicable to such an investment. For example, we have not described tax consequences that we assume to be generally known by investors or certain considerations that may be relevant to certain types of holders subject to special treatment under U.S. federal income tax laws, including stockholders subject to the alternative minimum tax, tax-exempt organizations, insurance companies, dealers in securities, pension plans and trusts, and financial institutions. This summary assumes that investors hold our common stock as capital assets (generally property held for investment). The discussion is based upon the Code, Treasury regulations, administrative and judicial interpretations, and other applicable authorities all as in effect as of the date of this prospectus and all of which are subject to differing interpretations or change, possibly retroactively, which could affect the continuing validity of this discussion. We have not sought and will not seek any ruling from the Internal Revenue Service (the “IRS”) regarding any matters discussed herein. No assurance can be given that the IRS would not assert, or that a court would not sustain, a position contrary to those set forth below. This summary does not discuss any aspects of U.S. estate or gift tax or foreign, state or local tax. It does not discuss the special treatment under U.S. federal income tax laws that could result if we invested in tax-exempt securities or certain other investment assets.

This summary does not discuss the consequences of an investment in shares of our preferred stock, debt securities or warrants representing rights to purchase shares of our common stock, preferred stock or debt securities. The tax consequences of such an investment will be discussed in a relevant prospectus supplement.

A “U.S. stockholder” is a beneficial owner of shares of our common stock that is for U.S. federal income tax purposes:

• a citizen or individual resident of the United States;

• a corporation, or other entity treated as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States or any state thereof or the District of Columbia; or

• a trust or an estate, the income of which is subject to U.S. federal income taxation regardless of its source.

A “non-U.S. stockholder” is a beneficial owner of shares of our common stock that is neither a U.S. stockholder nor a partnership for U.S. federal income tax purposes.

If a partnership (including an entity treated as a partnership for U.S. federal income tax purposes) holds shares of our common stock, the tax treatment of a partner in the partnership will generally depend upon the status of the partner and the activities of the partnership. A prospective stockholder that is a partner of a partnership holding shares of our common stock should consult its tax advisers with respect to the purchase, ownership and disposition of shares of our common stock.

Tax matters are very complicated, and the tax consequences to an investor of an investment in our shares will depend on the facts of his, her or its particular situation. We encourage investors to consult their own tax advisers regarding the specific consequences of such an investment, including tax reporting requirements, the applicability of federal, state, local and foreign tax laws, eligibility for the benefits of any applicable tax treaty and the effect of any possible changes in the tax laws.

Election to be Taxed as a RIC

As a BDC, we have elected to be treated as a RIC under Subchapter M of the Code. As a RIC, we generally will not have to pay corporate-level federal income taxes on any ordinary income or capital gains that we distribute to our stockholders as dividends. To qualify as a RIC, we must, among other things, meet certain source-of-income and asset diversification requirements (as described below). In addition, to obtain RIC tax treatment we must distribute to our stockholders, for each taxable year, at least 90% of our “investment company taxable income” (determined without regard to the dividends paid deduction), which is generally our ordinary income plus the excess of net short-term capital gains over net long-term capital losses (the “Annual Distribution Requirement”).

Taxation as a RIC

If we qualify as a RIC and satisfy the Annual Distribution Requirement, then we will not be subject to federal income tax on the portion of our investment company taxable income and net capital gain (i.e., net long-term capital gains in excess of net short-term capital losses) we distribute to stockholders with respect to that year. We will be subject to

U.S. federal income tax at the regular corporate rates on any income or capital gain not distributed (or deemed distributed) to our stockholders.

We will be subject to a 4% nondeductible federal excise tax on certain undistributed income of RICs unless we distribute in a timely manner an amount at least equal to the sum of (1) 98% of our ordinary income for each calendar year, (2) 98.2% of our capital gain net income for the one-year period ending October 31 in that calendar year and (3) any income recognized, but not

94

Table of Contents

distributed, in preceding years (the “Excise Tax Avoidance Requirement”). We will not be subject to excise taxes on amounts on which we are required to pay corporate income taxes (such as retained net capital gains).

In order to qualify as a RIC for federal income tax purposes, we must, among other things:

• qualify and have in effect an election to be treated as a BDC under the 1940 Act at all times during each taxable year; derive in each taxable year at least 90% of our gross income from dividends, interest, payments with respect to certain securities loans, gains from the sale of stock or other securities or foreign currencies, or other income derived with respect to our business of investing in such stock or securities or foreign currencies, and net income derived from an interest in a “qualified publicly traded partnership” (as defined in the Code) (the “90% Income Test”); and

• diversify our holdings so that at the end of each quarter of the taxable year:

at least 50% of the value of our assets consists of cash, cash equivalents, U.S. Government securities, securities of other RICs, and other securities if such other securities of any one issuer do not represent more than 5% of the value of our assets or more than 10% of the outstanding voting securities of the issuer; and

no more than 25% of the value of our assets is invested (1) in the securities, other than U.S. Government securities or securities of other RICs, of one issuer or of two or more issuers that are controlled, as determined under applicable tax rules, by us and that are engaged in the same or similar or related trades or businesses or (2) in securities of one or more qualified publicly traded partnerships (the “Diversification Tests”).

We may be required to recognize taxable income in circumstances in which we do not receive cash. For example, if we hold debt obligations that are treated under applicable tax rules as having original issue discount (such as debt instruments with PIK interest or, in certain cases, increasing interest rates or issued with warrants), we must include in income each year a portion of the original issue discount that accrues over the life of the obligation, regardless of whether cash representing such income is received by us in the same taxable year. Because any original issue discount accrued will be included in our investment company taxable income for the year of accrual, we may be required to make a distribution to our stockholders in order to satisfy the Annual Distribution Requirement, even though we will not have received any corresponding cash amount.

Gain or loss recognized by us from the sale or exchange of warrants or other securities acquired by us, as well as any loss attributable to the lapse of such warrants, generally will be treated as capital gain or loss. Such gain or loss generally will be long-term or short-term, depending on how long we held a particular warrant or other security.

Although we do not presently expect to do so, we are authorized to borrow funds and to sell assets in order to satisfy the Annual Distribution Requirement. However, under the 1940 Act, we are not permitted to make distributions to our stockholders while our debt obligations and other senior securities are outstanding unless certain “asset coverage” tests are met. See “Regulation—Senior Securities.” Moreover, our ability to dispose of assets to meet the Annual Distribution Requirements may be limited by (1) the illiquid nature of our portfolio and/or (2) other requirements relating to our status as a RIC, including the Diversification Tests. If we dispose of assets in order to meet the Annual Distribution Requirement or the Excise Tax Avoidance Requirement, we may make such dispositions at times that, from an investment standpoint, are not advantageous. Alternatively, to satisfy our Annual Distribution Requirement, we may declare a taxable dividend payable in cash or stock at the election of each stockholder. In such case, for federal income tax purposes, the amount of the dividend paid in stock will be equal to the amount of cash that could have been received instead of stock. See “Taxation of U.S. Stockholders” and “Taxation of Non-U.S. Stockholders” below for tax consequences to stockholders upon receipt of such dividends.

If we fail to satisfy the Annual Distribution Requirement or otherwise fail to qualify as a RIC in any taxable year (for example, because we fail the 90% Income Test described above), we will be subject to tax in that year on all of our taxable income, regardless of whether we make any distributions to our stockholders. In that case, all of our income would be subject to corporate-level federal income tax, reducing the amount available to be distributed to our stockholders. In contrast, assuming we qualify as a RIC, our corporate-level federal income tax should be substantially reduced or eliminated. See “Election to be Taxed as a RIC” above.

Certain of our investment practices may be subject to special and complex federal income tax provisions that may, among other things, (i) treat dividends that would otherwise constitute qualified dividend income as non-qualified dividend income, (ii) treat dividends that would otherwise be eligible for the corporate dividends-received deduction

as ineligible for such treatment, (iii) disallow, suspend or otherwise limit the allowance of certain losses or deductions, (iv) convert lower-taxed long-term capital gain into higher-taxed short-term capital gain or ordinary income, (v) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited), (vi) cause us to recognize income or gain without a corresponding receipt of cash, (vii) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur, (viii) adversely alter the characterization of certain complex financial transactions and (ix) produce income that will not be qualifying income for purposes of

95

Table of Contents

the 90% Income Test. We intend to monitor our transactions and may make certain tax elections to mitigate the effect of these provisions and prevent our disqualification as a RIC.

Except as discussed below under the heading “Failure to Qualify as a RIC,” the remainder of this discussion assumes that we qualify as a RIC and have satisfied the Annual Distribution Requirement.

Taxation of U.S. Stockholders

Distributions by us (including distributions pursuant to our dividend reinvestment plan or where stockholders can elect to receive cash or stock) generally are taxable to U.S. stockholders as ordinary income or capital gains. Distributions of our “investment company taxable income” (which is, generally, our ordinary income plus net short-term capital gains in excess of net long-term capital losses) will be taxable as ordinary income to U.S. stockholders to the extent of our current or accumulated earnings and profits, whether paid in cash or reinvested in additional common stock through our dividend reinvestment plan. To the extent such distributions paid by us to non-corporate stockholders (including individuals) are attributable to dividends received by us from U.S. corporations and certain qualified foreign corporations, and provided that certain holding period and other requirements are met, such distributions generally will be eligible for a reduced maximum federal income tax rate. In this regard, it is anticipated that distributions paid by us will generally not be attributable to dividends and, therefore, generally will not qualify for the reduced maximum rate. Distributions of our net capital gain (which is generally our net long-term capital gains in excess of net short-term capital losses) properly reported by us as “capital gain dividends” will be taxable to U.S. stockholders as long-term capital gains (currently taxed at a reduced maximum rate in the case of individuals, trusts or estates), regardless of the U.S. stockholder’s holding period for his, her or its common stock and regardless of whether paid in cash or reinvested in additional common stock. Distributions in excess of our earnings and profits first will reduce a U.S. stockholder’s adjusted tax basis in such stockholder’s common stock and, after the adjusted tax basis is reduced to zero, will constitute capital gains to such U.S. stockholder.

Although we currently intend to distribute any net capital gain at least annually, we may in the future decide to retain some or all of our net capital gain, but designate the retained amount as a “deemed distribution.” In that case, among other consequences, we will pay tax on the retained amount, each U.S. stockholder will be required to include his, her or its share of the deemed distribution in income as if it had been actually distributed to the U.S. stockholder, and the U.S. stockholder will be entitled to claim a credit equal to his, her or its allocable share of the tax paid thereon by us. The amount of the deemed distribution net of such tax will be added to the U.S. stockholder’s tax basis for his, her or its common stock. Since we expect to pay tax on any retained capital gains at our regular corporate tax rate and since that rate is in excess of the maximum rate currently payable by individuals on long-term capital gains, the amount of tax that individual stockholders will be treated as having paid and for which they will receive a credit will exceed the tax they owe on the retained net capital gain. Such excess generally may be claimed as a credit against the U.S. stockholder’s other federal income tax obligations or may be refunded to the extent it exceeds a stockholder’s liability for federal income tax. A stockholder that is not subject to federal income tax or otherwise required to file a federal income tax return would be required to file a federal income tax return on the appropriate form in order to claim a refund for the taxes we paid. In order to utilize the deemed distribution approach, we must provide written notice to our stockholders prior to the expiration of 60 days after the close of the relevant taxable year. We cannot treat any of our investment company taxable income as a “deemed distribution.”

For purposes of determining (1) whether the Annual Distribution Requirement is satisfied for any year and (2) the amount of capital gain dividends paid for that year, we may, under certain circumstances, elect to treat a dividend that is paid during the following taxable year as if it had been paid during the taxable year in question. If we make such an election, the U.S. stockholders will still be treated as receiving the dividend in the taxable year in which the distribution is made. However, any dividend declared by us in October, November or December of any calendar year, payable to stockholders of record on a specified date in such a month and actually paid during January of the following year, will be treated as if it had been paid by us and received by our U.S. stockholders on December 31 of the year in which the dividend was declared.

If an investor purchases shares of our common stock shortly before the record date of a distribution, the price of the shares will include the value of the distribution and the investor will be subject to tax on the distribution even though

it represents a return of his, her or its investment.

A U.S. stockholder generally will recognize taxable gain or loss if the stockholder sells or otherwise disposes of his, her or its shares of our common stock. The gain or loss will be measured by the difference between the sale price and the stockholder's tax basis in his, her or its shares. Any gain or loss arising from such sale or disposition generally will be treated as long-term capital gain or loss if the stockholder has held his, her or its shares for more than one year. Otherwise, it would be classified as short-term capital gain or loss. However, any capital loss arising from the sale or disposition of shares of our common stock held for six months or less will be treated as long-term capital loss to the extent of the amount of capital gain dividends received, or undistributed capital gain deemed received, with respect to such shares. In addition, all or a portion of any loss recognized upon a disposition of shares of our common stock may be disallowed if other shares of our common stock are acquired (whether through reinvestment of distributions or otherwise) within 30 days before or after the disposition, in which case the basis of the shares acquired will be adjusted to reflect the disallowed loss.

96

Table of Contents

In general, individual and other non-corporate U.S. taxable stockholders currently are subject to a reduced maximum federal income tax rate on their net capital gain, i.e., the excess of net long-term capital gain over net short-term capital loss for a taxable year, including any long-term capital gain derived from an investment in our shares.

Corporate U.S. stockholders currently are subject to federal income tax on net capital gain at the rates applied to ordinary income. Non-corporate stockholders with net capital losses for a year (i.e., capital losses in excess of capital gains) generally may deduct up to \$3,000 of such losses against their ordinary income each year; any net capital losses of a non-corporate stockholder in excess of \$3,000 generally may be carried forward and used in subsequent years as provided in the Code. Corporate stockholders generally may not deduct any net capital losses against ordinary income for a year, but may carry back such losses for three years or carry forward such losses for five years.

Certain U.S. stockholders who are individuals, estates or trusts and whose income exceeds certain thresholds will be required to pay a 3.8% Medicare tax on all or a portion of their “net investment income”, which includes dividends received from us and capital gains from the sale or other disposition of our stock.

We will send to each of our U.S. stockholders, as promptly as possible after the end of each calendar year, a notice detailing, on a per share and per distribution basis, the amounts includible in such U.S. stockholder’s taxable income for such year as ordinary income and as long-term capital gain. In addition, the federal tax status of each year’s distributions generally will be reported to the IRS (including the amount of dividends, if any, eligible for the reduced maximum rate). Distributions may also be subject to additional state, local and foreign taxes depending on a U.S. stockholder’s particular situation. Dividends distributed by us generally will not be eligible for the dividends-received deduction or the reduced maximum rate applicable to qualifying dividends.

We may be required to withhold federal income tax (“backup withholding”) from all taxable distributions to any non-corporate U.S. stockholder (1) who fails to furnish us with a correct taxpayer identification number or a certificate that such stockholder is exempt from backup withholding or (2) with respect to whom the IRS notifies us that such stockholder has failed to report properly certain interest and dividend income to the IRS and to respond to notices to that effect. An individual’s taxpayer identification number is his or her social security number. Any amount withheld under backup withholding is allowed as a credit against the U.S. stockholder’s federal income tax liability and may entitle such stockholder to a refund, provided that proper information is timely provided to the IRS.

Taxation of Non-U.S. Stockholders

Whether an investment in the shares is appropriate for a non-U.S. stockholder will depend upon that person’s particular circumstances. An investment in the shares by a non-U.S. stockholder may have adverse tax consequences. Non-U.S. stockholders should consult their tax advisers before investing in our common stock.

Distributions of our “investment company taxable income” to non-U.S. stockholders, subject to the discussion below, will be subject to withholding of federal tax at a 30% rate (or lower rate provided by an applicable treaty) to the extent of our current and accumulated earnings and profits unless the distributions are effectively connected with a U.S. trade or business of the non-U.S. stockholder, and, if an income tax treaty applies, attributable to a permanent establishment in the United States, in which case the distributions will be subject to federal income tax at the rates applicable to U.S. stockholders, and we will not be required to withhold federal tax if the non-U.S. stockholder complies with applicable certification and disclosure requirements. Special certification requirements apply to a non-U.S. stockholder that is a foreign partnership or a foreign trust, and such entities are urged to consult their own tax advisers.

Properly reported dividends are generally exempt from U.S. federal withholding tax where they (i) are paid in respect of our “qualified net interest income” (generally, our U.S.-source interest income, other than certain contingent interest and interest from obligations of a corporation or partnership in which we are at least a 10% stockholder, reduced by expenses that are allocable to such income) or (ii) are paid in respect of our “qualified short-term capital gains” (generally, the excess of our net short-term capital gain over our long-term capital loss for such taxable year).

Depending on the circumstances, we may report all, some or none of our potentially eligible dividends as such qualified net interest income or as qualified short-term capital gains, and/or treat such dividends, in whole or in part, as ineligible for this exemption from withholding. In order to qualify for the exemption from withholding for qualified net interest income, a foreign investor would need to comply with applicable certification requirements relating to its non-U.S. status (including, in general, furnishing an IRS Form W-8BEN or W-8BEN-E or substitute Form). In the

case of common shares held through an intermediary, the intermediary may withhold even if we designate the payment as qualified net interest income or qualified short-term capital gain. Foreign investors should contact their intermediaries with respect to the application of these rules to their accounts. There can be no assurance as to what portion of our distributions would qualify for favorable treatment as qualified net interest income or qualified short-term capital gains.

Except as discussed below, actual or deemed distributions of our net capital gain to a non-U.S. stockholder and gains realized by a non-U.S. stockholder upon the sale of our common stock will not be subject to federal withholding tax and generally will not be subject to federal income tax unless the distributions or gains, as the case may be, are effectively connected with a U.S. trade or business of the non-U.S. stockholder and, if an income tax treaty applies, are attributable to a permanent establishment maintained by

Table of Contents

the non-U.S. stockholder in the United States (in which case, such distributions or gains will be subject to federal income tax at the rates applicable to U.S. stockholders).

Withholding at a rate of 30% will be generally required on dividends in respect of, and after December 31, 2018, on gross proceeds from the sale of, our common stock held by or through certain foreign financial institutions (including investment funds), unless such institution enters into an agreement with the Secretary of the Treasury to report, on an annual basis, certain information with respect to shares in, and accounts maintained by, the institution to the extent such shares or accounts are held by certain United States persons or by certain non-U.S. entities that are wholly or partially owned by United States persons, and to withhold on certain payments. Accordingly, the entity through which our common stock is held will affect the determination of whether such withholding is required. Similarly, dividends in respect of, and after December 31, 2018, gross proceeds from the sale of, our common stock held by an investor that is a non-financial non-U.S. entity will be subject to withholding at a rate of 30%, unless such entity either (i) certifies to us that such entity does not have any “substantial United States owners” or (ii) provides certain information regarding the entity’s “substantial United States owners,” which we will in turn provide to the Secretary of the Treasury. An intergovernmental agreement between the United States and an applicable foreign country, or future Treasury regulations or other guidance, may modify these requirements. Non-U.S. stockholders are encouraged to consult with their tax advisers regarding the possible implications of these requirements on their investment in our common stock.

If we distribute our net capital gain in the form of deemed rather than actual distributions (which we may do in the future), a non-U.S. stockholder will be entitled to a federal income tax credit or tax refund equal to the stockholder’s allocable share of the tax we pay on the capital gains deemed to have been distributed. In order to obtain the refund, the non-U.S. stockholder must obtain a U.S. taxpayer identification number and file a federal income tax return even if the non-U.S. stockholder would not otherwise be required to obtain a U.S. taxpayer identification number or file a federal income tax return. For a corporate non-U.S. stockholder, distributions (both actual and deemed), and gains realized upon the sale of our common stock that are effectively connected with a U.S. trade or business may, under certain circumstances, be subject to an additional “branch profits tax” at a 30% rate (or at a lower rate if provided for by an applicable tax treaty). Accordingly, investment in the shares may not be appropriate for certain non-U.S. stockholders.

A non-U.S. stockholder who is a non-resident alien individual, and who is otherwise subject to withholding of federal income tax, may be subject to information reporting and backup withholding of federal income tax on dividends unless the non-U.S. stockholder provides us or the dividend paying agent with an IRS Form W-8BEN (or an acceptable substitute form) or otherwise meets documentary evidence requirements for establishing that it is a non-U.S. stockholder or otherwise establishes an exemption from backup withholding.

Non-U.S. persons should consult their own tax advisers with respect to the U.S. federal income tax and withholding tax, and state, local and foreign tax consequences of an investment in the shares.

Failure to Qualify as a RIC

If we were unable to qualify for treatment as a RIC (for example, because we fail the 90% Income Test described above), we would be subject to federal income tax on all of our taxable income at regular corporate rates. We would not be able to deduct distributions to stockholders, nor would they be required to be made. Distributions would generally be taxable to our individual and other non-corporate taxable stockholders as ordinary dividend income eligible for the reduced maximum rate to the extent of our current and accumulated earnings and profits. Subject to certain limitations under the Code, corporate distributees would be eligible for the dividends-received deduction. Distributions in excess of our current and accumulated earnings and profits would be treated first as a return of capital to the extent of the stockholder’s adjusted tax basis, and any remaining distributions would be treated as a capital gain. Moreover, if we fail to qualify as a RIC in any year, we must pay out our earnings and profits accumulated in that year in order to qualify again as a RIC. If we fail to qualify as a RIC for a period of greater than two taxable years, we would be required to recognize any net built-in gains with respect to certain of our assets (i.e., the excess of the aggregate gains, including items of income, over aggregate losses that would have been realized with respect to such assets if we had been liquidated) or, alternatively, be subject to taxation on such built-in gain recognized for a period

of up to ten years, in order to qualify as a RIC in a subsequent year.

98

Table of Contents

DESCRIPTION OF OUR CAPITAL STOCK

The following description is based on relevant portions of the Maryland General Corporation Law and on our charter and bylaws. This summary is not necessarily complete, and we refer you to the Maryland General Corporation Law and our charter and bylaws for a more detailed description of the provisions summarized below.

Capital Stock

As of the date of this base prospectus, our authorized capital stock consists of 400,000,000 shares of stock, par value \$0.001 per share, all of which is initially designated as common stock. Our common stock is quoted on The Nasdaq Global Select Market under the ticker symbol "AINV." There are no outstanding options or warrants to purchase our stock, and no stock has been authorized for issuance under any equity compensation plans. Under Maryland law, our stockholders generally are not personally liable for our debts or obligations. The last reported closing market price of our common stock on December 16, 2016 was \$6.15 per share. As of December 16, 2016, we had 70 stockholders of record.

Under our charter, our board of directors is authorized to classify and reclassify any unissued shares of stock into other classes or series of stock and authorize the issuance of shares of stock without obtaining stockholder approval. As permitted by the Maryland General Corporation Law, our charter provides that the board of directors, without any action by our stockholders, may amend the charter from time to time to increase or decrease the aggregate number of shares of stock or the number of shares of stock of any class or series that we have authority to issue.

The following table sets forth information of our capital stock as of December 16, 2016:

Title of Class of Securities	Amount Authorized	Amount Held by Registrant or for its Account	Amount Outstanding Exclusive of Amount held by Registrant or for its Account
Common stock, par value \$0.001 per share	400,000,000	None	219,694,654 shares

Common stock

All shares of our common stock have equal rights as to earnings, assets, dividends and voting and, when they are issued, will be duly authorized, validly issued, fully paid and nonassessable. Distributions may be paid to the holders of our common stock if, as and when authorized by our board of directors and declared by us out of funds legally available therefor. Shares of our common stock have no preemptive, exchange, conversion or redemption rights and are freely transferable, except where their transfer is restricted by federal and state securities laws or by contract. In the event of a liquidation, dissolution or winding up of Apollo Investment, each share of our common stock would be entitled to share ratably in all of our assets that are legally available for distribution after we pay all debts and other liabilities and subject to any preferential rights of holders of our preferred stock, if any preferred stock is outstanding at such time. Each share of our common stock is entitled to one vote on all matters submitted to a vote of stockholders, including the election of directors. Except as provided with respect to any other class or series of stock, the holders of our common stock will possess exclusive voting power. There is no cumulative voting in the election of directors, which means that holders of a majority of the outstanding shares of common stock can elect all of our directors, and holders of less than a majority of such shares will be unable to elect any director.

Preferred stock

Our charter authorizes our board of directors to classify and reclassify any unissued shares of stock into other classes or series of stock, including preferred stock. Prior to issuance of shares of each class or series, the board of directors is required by Maryland law and by our charter to set the terms, preferences, conversion or other rights, voting powers, restrictions, limitations as to dividends or other distributions, qualifications and terms or conditions of redemption for each class or series. Thus, the board of directors could authorize the issuance of shares of preferred stock with terms and conditions which could have the effect of delaying, deferring or preventing a transaction or a change in control that might involve a premium price for holders of our common stock or otherwise be in their best interest. You should

note, however, that any issuance of preferred stock must comply with the requirements of the 1940 Act. The 1940 Act requires, among other things, that (1) immediately after issuance and before any dividend or other distribution is made with respect to our common stock and before any purchase of common stock is made, such preferred stock together with all other senior securities must not exceed an amount equal to 50% of our total assets after such issuance and after deducting the amount of such dividend, distribution or purchase price, as the case may be, and (2) the holders of shares of preferred stock, if any are issued, must be entitled as a class to elect two directors at all times and to elect a majority of the directors if dividends on such preferred stock become in arrears by two years or more until the arrears are eliminated. Certain matters under the 1940 Act require the separate vote of the holders of any issued and outstanding preferred stock. For example, holders of preferred stock would

99

Table of Contents

vote separately from the holders of common stock on a proposal to cease operations as a BDC. We believe that the availability for issuance of preferred stock will provide us with increased flexibility in structuring future financings and acquisitions.

Limitation on Liability of Directors and Officers; Indemnification and Advance of Expenses

Maryland law permits a Maryland corporation to include in its charter a provision limiting the liability of its directors and officers to the corporation and its stockholders for money damages except for liability resulting from (a) actual receipt of an improper benefit or profit in money, property or services or (b) active and deliberate dishonesty that is material to a cause of action resulting in a final judgment adverse to the director. Our charter contains such a provision which eliminates directors' and officers' liability to the maximum extent permitted by Maryland law, subject to the requirements of the 1940 Act.

Maryland law requires a corporation (unless its charter provides otherwise, which our charter does not) to indemnify a director or officer who has been successful, on the merits or otherwise, in the defense of any proceeding to which he or she is made, or threatened to be made, a party by reason of his or her service in that capacity. Maryland law permits a corporation to indemnify its present and former directors and officers, among others, against judgments, penalties, fines, settlements and reasonable expenses actually incurred by them in connection with any proceeding to which they may be made, or threatened to be made, a party by reason of their service in those or other capacities unless it is established that (a) the act or omission of the director or officer was material to the matter giving rise to the proceeding and (1) was committed in bad faith or (2) was the result of active and deliberate dishonesty, (b) the director or officer actually received an improper personal benefit in money, property or services or (c) in the case of any criminal proceeding, the director or officer had reasonable cause to believe that the act or omission was unlawful. However, under Maryland law, a Maryland corporation may not indemnify for an adverse judgment in a suit by or in the right of the corporation or for a judgment of liability on the basis that a personal benefit was improperly received, unless in either case a court orders indemnification, and then only for expenses. In addition, Maryland law permits a corporation to advance reasonable expenses to a director or officer upon the corporation's receipt of (a) a written affirmation by the director or officer of his or her good faith belief that he or she has met the standard of conduct necessary for indemnification by the corporation and (b) a written undertaking by him or her or on his or her behalf to repay the amount paid or reimbursed by the corporation if it is ultimately determined that the standard of conduct was not met.

Our charter authorizes us, to the maximum extent permitted by Maryland law and subject to the requirements of the 1940 Act, to obligate ourselves to indemnify any present or former director or officer or any individual who, while a director or officer and at our request, serves or has served another corporation, real estate investment trust, partnership, joint venture, trust, employee benefit plan or other enterprise as a director, officer, partner or trustee, from and against any claim or liability to which that person may become subject or which that person may incur by reason of his or her status as a present or former director or officer, and to pay or reimburse their reasonable expenses in advance of final disposition of a proceeding. Our bylaws obligate us, to the maximum extent permitted by Maryland law and subject to the requirements of the 1940 Act, to indemnify any present or former director or officer or any individual who, while a director or officer and at our request, serves or has served another corporation, real estate investment trust, partnership, joint venture, trust, employee benefit plan or other enterprise as a director, officer, partner or trustee and who is made, or threatened to be made, a party to the proceeding by reason of his or her service in that capacity and to pay or reimburse their reasonable expenses in advance of final disposition of a proceeding. Our charter and bylaws also permit us to indemnify and advance expenses to any person who served a predecessor of us in any of the capacities described above and any of our employees or agents or any employees or agents of our predecessor, if any. In accordance with the 1940 Act, we will not indemnify any person for any liability to which such person would be subject by reason of such person's willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his office.

Provisions of the Maryland General Corporation Law and Our Charter and Bylaws

Provisions of the Maryland General Corporation Law and of our charter and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock. The Maryland General Corporation Law, our charter and

our bylaws contain provisions that may discourage, delay or make more difficult a change in control of Apollo Investment or the removal of our directors.

We are subject to Subtitle 8 of Title 3 of the Maryland General Corporation Law, the Maryland Business Combination Act, subject to any applicable requirements of the 1940 Act. Our board of directors has adopted a resolution exempting from the Business Combination Act any business combination between us and any other person, subject to prior approval of such business combination by our board of directors, including approval by a majority of our disinterested directors. If the resolution exempting business combinations is repealed or our board of directors does not approve a business combination, the Business Combination Act may discourage third parties from trying to acquire control of us and increase the difficulty of consummating such an offer.

We are also subject to Subtitle 7 or Title 3 of the Maryland General Corporation Law, the Maryland Control Share Acquisition Act. Our bylaws currently exempt from the Maryland Control Share Acquisition Act acquisitions of our common stock by any person. If we amend our bylaws to repeal the exemption from the Control Share Acquisition Act, the Control Share Acquisition Act may make it more difficult for a third party to obtain control of us and increase the difficulty of consummating such an offer.

100

Table of Contents

We have also adopted other measures that may make it difficult for a third party to obtain control of us, including provisions of our charter classifying our board of directors in three classes serving staggered three-year terms, and provisions of our charter authorizing our board of directors to classify or reclassify shares of our stock in one or more classes or series, to cause the issuance of additional shares of our stock, and to amend our charter, without stockholder approval, to increase or decrease the number of shares of stock that we have authority to issue. These provisions, as well as other provisions of our charter and bylaws, may delay, defer or prevent a transaction or a change in control that might otherwise be in the best interests of our stockholders.

Classified board of directors

Our board of directors is divided into three classes of directors serving staggered three-year terms. At each annual meeting of our stockholders, the successors to the class of directors whose terms expire at such meeting will be elected to hold office for a term expiring at the annual meeting of stockholders held in the third year following the year of their election. Each director holds office for the term to which he or she is elected and until his or her successor is duly elected and qualifies. A classified board of directors may render a change in control of us or removal of our incumbent management more difficult. We believe, however, that the longer time required to elect a majority of a classified board of directors will help to ensure the continuity and stability of our management and policies.

Election of directors

Our charter provides that the affirmative vote of the holders of a majority of the shares of stock outstanding and entitled to vote in the election of directors will be required to elect a director, unless our bylaws provide otherwise. Our bylaws provide that a nominee for director shall be elected as a director only if such nominee receives the affirmative vote of a majority of the total votes cast for and affirmatively withheld as to such nominee at a meeting of stockholders duly called and at which a quorum is present, unless there is a contested election, in which case, directors will be elected by a plurality of the votes cast.

Number of directors; vacancies; removal

Our charter provides that the number of directors will be set only by the board of directors in accordance with our bylaws. Our bylaws provide that a majority of our entire board of directors may at any time increase or decrease the number of directors. However, unless our bylaws are amended, the number of directors may never be less than four nor more than nine. Pursuant to Section 3-802(b) of the Maryland General Corporation Law, we have elected in our charter to be subject to Section 3-804(c) of the Maryland General Corporation Law regarding the filling of vacancies on the board of directors. Accordingly, except as may be provided by the board of directors in setting the terms of any class or series of preferred stock, any and all vacancies on the board of directors may be filled only by the affirmative vote of a majority of the remaining directors in office, even if the remaining directors do not constitute a quorum, and any director elected to fill a vacancy will serve for the remainder of the full term of the directorship in which the vacancy occurred and until a successor is elected and qualifies, subject to any applicable requirements of the 1940 Act.

Our charter provides that a director may be removed only for cause, as defined in our charter, and then only by the affirmative vote of at least two-thirds of the votes entitled to be cast in the election of directors.

Action by stockholders

Under the Maryland General Corporation Law, stockholder action can be taken only at an annual or special meeting of stockholders, unless the charter provides for a lesser percentage (which our charter does not), by unanimous written consent in lieu of a meeting. These provisions, combined with the requirements of our bylaws regarding the calling of a stockholder-requested special meeting of stockholders discussed below, may have the effect of delaying consideration of a stockholder proposal until the next annual meeting.

Advance notice provisions for stockholder nominations and stockholder proposals

Our bylaws provide that with respect to an annual meeting of stockholders, nominations of persons for election to the board of directors and the proposal of business to be considered by stockholders may be made only (1) pursuant to our notice of the meeting, (2) by or at the direction of the board of directors or (3) by a stockholder who is entitled to vote at the meeting and who has complied with the advance notice procedures of the bylaws. With respect to special meetings of stockholders, only the business specified in our notice of the meeting may be brought before the meeting.

Nominations of persons for election to the board of directors at a special meeting may be made (1) by or at the direction of the board of directors or (2) provided that, the special meeting has been called for the purpose of electing directors, by a stockholder who is entitled to vote at the meeting and who has complied with the advance notice provisions of the bylaws.

The purpose of requiring stockholders to give us advance notice of nominations and other business is to afford our board of directors a meaningful opportunity to consider the qualifications of the proposed nominees and the advisability of any other proposed business and, to the extent deemed necessary or desirable by our board of directors, to inform stockholders and make

101

Table of Contents

recommendations about such qualifications or business, as well as to provide a more orderly procedure for conducting meetings of stockholders. Although our bylaws do not give our board of directors any power to disapprove stockholder nominations for the election of directors or proposals recommending certain action, they may have the effect of precluding a contest for the election of directors or the consideration of stockholder proposals if proper procedures are not followed and of discouraging or deterring a third party from conducting a solicitation of proxies to elect its own slate of directors or to approve its own proposal without regard to whether consideration of such nominees or proposals might be harmful or beneficial to us and our stockholders.

Calling of special meetings of stockholders

Our bylaws provide that special meetings of stockholders may be called by our board of directors and certain of our officers. Additionally, our bylaws provide that, subject to the satisfaction of certain procedural and informational requirements by the stockholders requesting the meeting, a special meeting of stockholders will be called by our secretary upon the written request of stockholders entitled to cast not less than a majority of all the votes entitled to be cast at such meeting.

Approval of extraordinary corporate action; amendment of charter and bylaws

Under Maryland law, a Maryland corporation generally cannot dissolve, amend its charter, merge, sell all or substantially all of its assets, engage in a share exchange or engage in similar transactions outside the ordinary course of business, unless approved by the affirmative vote of stockholders entitled to cast at least two-thirds of the votes entitled to be cast on the matter. However, a Maryland corporation may provide in its charter for approval of these matters by a lesser percentage, but not less than a majority of all of the votes entitled to be cast on the matter. Our charter generally provides for approval of charter amendments and extraordinary transactions by the stockholders entitled to cast at least a majority of the votes entitled to be cast on the matter. Our charter also provides that certain charter amendments and any proposal for our conversion, whether by merger or otherwise, from a closed-end company to an open-end company or any proposal for our liquidation or dissolution requires the approval of the stockholders entitled to cast at least 80 percent of the votes entitled to be cast on such matter. However, if such amendment or proposal is approved by at least two-thirds of our continuing directors (in addition to approval by our board of directors), such amendment or proposal may be approved by a majority of the votes entitled to be cast on such a matter. The “continuing directors” are defined in our charter as our current directors as well as those directors whose nomination for election by the stockholders or whose election by the directors to fill vacancies is approved by a majority of the continuing directors then on the board of directors. The holders of any preferred stock outstanding would have a separate class vote on any conversion to an open-end company.

Our charter and bylaws provide that the board of directors will have the exclusive power to adopt, alter or repeal any provision of our bylaws and to make new bylaws.

No appraisal rights

Except with respect to appraisal rights arising in connection with the Maryland Control Share Acquisition Act discussed below, as permitted by the Maryland General Corporation Law, our charter provides that stockholders will not be entitled to exercise appraisal rights unless the board of directors, upon the affirmative vote of a majority of the entire board of directors, shall determine that such rights shall apply.

Control share acquisitions

The Control Share Acquisition Act provides that control shares of a Maryland corporation acquired in a control share acquisition have no voting rights except to the extent approved by a vote of two-thirds of the votes entitled to be cast on the matter. Shares owned by the acquiror, by officers or by directors who are employees of the corporation are excluded from shares entitled to vote on the matter. Control shares are voting shares of stock which, if aggregated with all other shares of stock owned by the acquiror or in respect of which the acquiror is able to exercise or direct the exercise of voting power (except solely by virtue of a revocable proxy), would entitle the acquiror to exercise voting power in electing directors within one of the following ranges of voting power:

- one-tenth or more but less than one-third;
- one-third or more but less than a majority; or
- a majority or more of all voting power.

The requisite stockholder approval must be obtained each time an acquiror crosses one of the thresholds of voting power set forth above. Control shares do not include shares the acquiring person is then entitled to vote as a result of having previously obtained stockholder approval. A control share acquisition means the acquisition of control shares, subject to certain exceptions.

A person who has made or proposes to make a control share acquisition may compel the board of directors of the corporation to call a special meeting of stockholders to be held within 50 days of demand to consider the voting rights of the shares. The right to compel the calling of a special meeting is subject to the satisfaction of certain conditions, including an undertaking to pay

102

Table of Contents

the expenses of the meeting. If no request for a meeting is made, the corporation may itself present the question at any stockholders' meeting.

If voting rights are not approved at the meeting or if the acquiring person does not deliver an acquiring person statement as required by the statute, then the corporation may repurchase for fair value any or all of the control shares, except those for which voting rights have previously been approved. The right of the corporation to repurchase control shares is subject to certain conditions and limitations, including, as provided in our bylaws, compliance with the 1940 Act. Fair value is determined, without regard to the absence of voting rights for the control shares, as of the date of the last control share acquisition by the acquiror or of any meeting of stockholders at which the voting rights of the shares are considered and not approved. If voting rights for control shares are approved at a stockholders' meeting and the acquiror becomes entitled to vote a majority of the shares entitled to vote, all other stockholders may exercise appraisal rights. The fair value of the shares as determined for purposes of appraisal rights may not be less than the highest price per share paid by the acquiror in the control share acquisition.

The Control Share Acquisition Act does not apply (a) to shares acquired in a merger, consolidation or share exchange if the corporation is a party to the transaction or (b) to acquisitions approved or exempted by the charter or bylaws of the corporation.

Our bylaws contain a provision exempting from the Control Share Acquisition Act any and all acquisitions by any person of our shares of stock. There can be no assurance that such provision will not be amended or eliminated at any time in the future. However, we will amend our bylaws to be subject to the Control Share Acquisition Act only if the board of directors determines that it would be in our best interests based on our determination that our being subject to the Control Share Acquisition Act does not conflict with the 1940 Act.

Business combinations

Under Subtitle 6 of Title 8 of the Maryland General Corporation Law, the Maryland Business Combination Act, "business combinations" between a Maryland corporation and an interested stockholder or an affiliate of an interested stockholder are prohibited for five years after the most recent date on which the interested stockholder becomes an interested stockholder. "Business combinations" include a merger, consolidation, share exchange or, in circumstances specified in the statute, an asset transfer or issuance or reclassification of equity securities. An interested stockholder is defined as:

- any person who beneficially owns 10% or more of the voting power of the corporation's shares; or
- an affiliate or associate of the corporation who, at any time within the two-year period prior to the date in question, was the beneficial owner of 10% or more of the voting power of the then outstanding voting stock of the corporation.

A person is not an interested stockholder under this statute if the board of directors approved in advance the transaction by which the person otherwise would have become an interested stockholder. However, in approving a transaction, the board of directors may provide that its approval is subject to compliance, at or after the time of approval, with any terms and conditions determined by the board of directors.

After the five-year prohibition, any business combination between the corporation and an interested stockholder generally must be recommended by the board of directors of the corporation and approved by the affirmative vote of at least:

- 80% of the votes entitled to be cast by holders of outstanding shares of voting stock of the corporation; and
- two-thirds of the votes entitled to be cast by holders of voting stock of the corporation other than shares held by the interested stockholder with whom or with whose affiliate the business combination is to be effected or held by an affiliate or associate of the interested stockholder.

These super-majority vote requirements do not apply if the corporation's common stockholders receive a minimum price, as defined under Maryland law, for their shares in the form of cash or other consideration in the same form as previously paid by the interested stockholder for its shares.

The statute permits various exemptions from its provisions, including business combinations that are exempted by the board of directors before the time that the interested stockholder becomes an interested stockholder. Our board of directors has adopted a resolution that any business combination between us and any other person is exempted from the provisions of the Business Combination Act, provided that the business combination is first approved by the board

of directors, including a majority of the directors who are not interested persons as defined in the 1940 Act. This resolution, however, may be altered or repealed in whole or in part at any time. If this resolution is repealed, or the board of directors does not otherwise approve a business combination, the statute may discourage others from trying to acquire control of us and increase the difficulty of consummating any offer.

103

Table of Contents

Conflict with 1940 Act

Our bylaws provide that, if and to the extent that any provision of the Maryland General Corporation Law, including the Control Share Acquisition Act (if we amend our bylaws to be subject to such act) and the Business Combination Act, or any provision of our charter or bylaws conflicts with any provision of the 1940 Act, the applicable provision of the 1940 Act will control.

104

Table of Contents

DESCRIPTION OF OUR PREFERRED STOCK

In addition to shares of common stock, our charter authorizes the issuance of preferred stock. We may issue preferred stock from time to time, although we have no immediate intention to do so. If we offer preferred stock under this prospectus, we will issue an appropriate prospectus supplement. We may issue preferred stock from time to time in one or more classes or series, without stockholder approval. Prior to issuance of shares of each class or series, our board of directors is required by Maryland law and by our charter to set the terms, preferences, conversion or other rights, voting powers, restrictions, limitations as to dividends or other distributions, qualifications and terms or conditions of redemption for each class or series. Any such an issuance must adhere to the requirements of the 1940 Act, Maryland law and any other limitations imposed by law.

The following is a general description of the terms of the preferred stock we may issue from time to time. Particular terms of any preferred stock we offer will be described in the prospectus supplement relating to such preferred stock. If we issue preferred stock, it will pay dividends to the holders of the preferred stock at either a fixed rate or a rate that will be reset frequently based on short-term interest rates, as described in a prospectus supplement accompanying each preferred share offering.

The 1940 Act requires, among other things, that (1) immediately after issuance and before any distribution is made with respect to common stock, the liquidation preference of the preferred stock, together with all other senior securities, must not exceed an amount equal to 50% of our total assets (taking into account such distribution), (2) the holders of shares of preferred stock, if any are issued, must be entitled as a class to elect two directors at all times and to elect a majority of the directors if dividends on the preferred stock are in arrears by two years or more and (3) such shares be cumulative as to dividends and have a complete preference over our common stock to payment of their liquidation preference in the event of a dissolution.

For any series of preferred stock that we may issue, our board of directors or a committee thereof will determine and the Articles Supplementary and prospectus supplement relating to such series will describe:

- the designation and number of shares of such series;
- the rate, whether fixed or variable, and time at which any dividends will be paid on shares of such series, as well as whether such dividends are participating or non-participating;
- any provisions relating to convertibility or exchangeability of the shares of such series;
- the rights and preferences, if any, of holders of shares of such series upon our liquidation, dissolution or winding up of our affairs;
- the voting powers, if any, of the holders of shares of such series;
- any provisions relating to the redemption of the shares of such series;
- any limitations on our ability to pay dividends or make distributions on, or acquire or redeem, other securities while shares of such series are outstanding;
- any conditions or restrictions on our ability to issue additional shares of such series or other securities;
- if applicable, a discussion of certain U.S. federal income tax considerations; and
- any other relative powers, preferences and participating, optional or special rights of shares of such series, and the qualifications, limitations or restrictions thereof.

All shares of preferred stock that we may issue will be identical and of equal rank except as to the particular terms thereof that may be fixed by our board of directors, and all shares of each series of preferred stock will be identical and of equal rank except as to the dates from which dividends thereon will be cumulative.

Table of Contents

DESCRIPTION OF OUR WARRANTS

The following is a general description of the terms of the warrants we may issue from time to time. Particular terms of any warrants we offer will be described in the prospectus supplement relating to such warrants.

We may issue warrants to purchase shares of our common stock. Such warrants may be issued independently or together with shares of common stock and may be attached or separate from such shares of common stock. We will issue each series of warrants under a separate warrant agreement to be entered into between us and a warrant agent. The warrant agent will act solely as our agent and will not assume any obligation or relationship of agency for or with holders or beneficial owners of warrants.

A prospectus supplement will describe the particular terms of any series of warrants we may issue, including the following:

- the title of such warrants;
- the aggregate number of such warrants;
- the price or prices at which such warrants will be issued;
- the currency or currencies, including composite currencies, in which the price of such warrants may be payable;
- the number of shares of common stock issuable upon exercise of such warrants;
- the price at which and the currency or currencies, including composite currencies, in which the shares of common stock purchasable upon exercise of such warrants may be purchased;
- the date on which the right to exercise such warrants shall commence and the date on which such right will expire;
- whether such warrants will be issued in registered form or bearer form;
- if applicable, the minimum or maximum amount of such warrants which may be exercised at any one time;
- if applicable, the number of such warrants issued with each share of common stock;
- if applicable, the date on and after which such warrants and the related shares of common stock will be separately transferable;
- information with respect to book-entry procedures, if any;
- if applicable, a discussion of certain U.S. federal income tax considerations; and
- any other terms of such warrants, including terms, procedures and limitations relating to the exchange and exercise of such warrants.

We and the warrant agent may amend or supplement the warrant agreement for a series of warrants without the consent of the holders of the warrants issued thereunder to effect changes that are not inconsistent with the provisions of the warrants and that do not materially and adversely affect the interests of the holders of the warrants.

Under the 1940 Act, we may generally only offer warrants provided that (1) the warrants expire by their terms within ten years; (2) the exercise or conversion price is not less than the current market value at the date of issuance; (3) our stockholders authorize the proposal to issue such warrants, and our board of directors approves such issuance on the basis that the issuance is in the best interests of Apollo Investment and its stockholders; and (4) if the warrants are accompanied by other securities, the warrants are not separately transferable unless no class of such warrants and the securities accompanying them has been publicly distributed. The 1940 Act also provides that the amount of our voting securities that would result from the exercise of all outstanding warrants at the time of issuance may not exceed 25% of our outstanding voting securities.

Table of Contents

DESCRIPTION OF OUR DEBT SECURITIES

We may issue debt securities in one or more series. The specific terms of each series of debt securities will be described in the particular prospectus supplement relating to that series. The prospectus supplement may or may not modify the general terms found in this prospectus and will be filed with the SEC. For a complete description of the terms of a particular series of debt securities, you should read both this prospectus and the prospectus supplement relating to that particular series. We may also issue debt securities privately. Such securities are not subject to the terms described below.

As required by federal law for all bonds and notes of companies that are publicly offered, the debt securities are governed by a document called an “indenture.” An indenture is a contract between us and U.S. Bank National Association, a financial institution acting as trustee on your behalf, and is subject to and governed by the Trust Indenture Act of 1939, as amended. The trustee has two main roles. First, the trustee can enforce your rights against us if we default. There are some limitations on the extent to which the trustee acts on your behalf, described in the second paragraph under “Events of Default—Remedies if an Event of Default Occurs.” Second, the trustee performs certain administrative duties for us.

Because this section is a summary, it does not describe every aspect of the debt securities and the indenture. We urge you to read the indenture because it, and not this description, defines your rights as a holder of debt securities. For example, in this section, we use capitalized words to signify terms that are specifically defined in the indenture. Some of the definitions are repeated in this prospectus, but for the rest you will need to read the indenture. We will file the form of the indenture with the SEC prior to the commencement of any debt offering, at which time the form of indenture would be publicly available. See “Available Information” for information on how to obtain a copy of the indenture.

The prospectus supplement, which will accompany this prospectus, will describe the particular series of debt securities being offered by including:

- the designation or title of the series of debt securities;
- the total principal amount of the series of debt securities;
- the percentage of the principal amount at which the series of debt securities will be offered;
- the date or dates on which principal will be payable;
- the rate or rates (which may be either fixed or variable) and/or the method of determining such rate or rates of interest, if any;
- the date or dates from which any interest will accrue, or the method of determining such date or dates, and the date or dates on which any interest will be payable;
- the terms for redemption, extension or early repayment, if any;
- the currencies in which the series of debt securities are issued and payable;
- whether the amount of payments of principal, premium or interest, if any, on a series of debt securities will be determined with reference to an index, formula or other method (which could be based on one or more currencies, commodities, equity indices or other indices) and how these amounts will be determined;
- the place or places, if any, other than or in addition to The City of New York, of payment, transfer, conversion and/or exchange of the debt securities;
- the denominations in which the offered debt securities will be issued;
- the provision for any sinking fund;
- any restrictive covenants;
- any Events of Default;
- whether the series of debt securities are issuable in certificated form;
- any provisions for defeasance or covenant defeasance;
- any special federal income tax implications, including, if applicable, federal income tax considerations relating to original issue discount;

Table of Contents

whether and under what circumstances we will pay additional amounts in respect of any tax, assessment or governmental charge and, if so, whether we will have the option to redeem the debt securities rather than pay the additional amounts (and the terms of this option);

any provisions for convertibility or exchangeability of the debt securities into or for any other securities;

whether the debt securities are subject to subordination and the terms of such subordination;

the listing, if any, on a securities exchange; and

any other terms.

The debt securities may be secured or unsecured obligations. Under the provisions of the 1940 Act, we are permitted, as a BDC, to issue debt only in amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200% after each issuance of debt. Unless the prospectus supplement states otherwise, principal (and premium, if any) and interest, if any, will be paid by us in immediately available funds.

General

The indenture provides that any debt securities proposed to be sold under this prospectus and the attached prospectus supplement (“offered debt securities”) and any debt securities issuable upon the exercise of warrants or upon conversion or exchange of other offered securities (“underlying debt securities”), may be issued under the indenture in one or more series.

For purposes of this prospectus, any reference to the payment of principal of or premium or interest, if any, on debt securities will include additional amounts if required by the terms of the debt securities.

The indenture limits the amount of debt securities that may be issued thereunder from time to time. Debt securities issued under the indenture, when a single trustee is acting for all debt securities issued under the indenture, are called the “indenture securities”. The indenture also provides that there may be more than one trustee thereunder, each with respect to one or more different series of indenture securities. See “Resignation of Trustee” below. At a time when two or more trustees are acting under the indenture, each with respect to only certain series, the term “indenture securities” means the one or more series of debt securities with respect to which each respective trustee is acting. In the event that there is more than one trustee under the indenture, the powers and trust obligations of each trustee described in this prospectus will extend only to the one or more series of indenture securities for which it is trustee. If two or more trustees are acting under the indenture, then the indenture securities for which each trustee is acting would be treated as if issued under separate indentures.

The indenture does not contain any provisions that give you protection in the event we issue a large amount of debt or we are acquired by another entity.

We refer you to the prospectus supplement for information with respect to any deletions from, modifications of or additions to the Events of Default or our covenants that are described below, including any addition of a covenant or other provision providing event risk or similar protection.

We have the ability to issue indenture securities with terms different from those of indenture securities previously issued and, without the consent of the holders thereof, to reopen a previous issue of a series of indenture securities and issue additional indenture securities of that series unless the reopening was restricted when that series was created.

Senior Securities

Information about our senior securities is shown in the following table as of each year ended March 31 since we commenced operations, unless otherwise noted. The “—” indicates information which the SEC expressly does not require to be disclosed for certain types of senior securities. The report of our independent registered public accounting firm covering the total amount of senior securities outstanding as of March 31, 2016, 2015, 2014, 2013, 2012, 2011, 2010, 2009, 2008 and 2007 is attached as an exhibit to the registration statement of which this prospectus is a part.

(1) Total amount of each class of senior securities outstanding at the end of the period presented.

(2) The asset coverage ratio for a class of senior securities representing indebtedness is calculated as our consolidated total assets, less all liabilities and indebtedness not represented by senior securities, divided by senior securities representing indebtedness. This asset coverage ratio is multiplied by \$1,000 to determine the Asset Coverage Per Unit.

(3) The amount to which such class of senior security would be entitled upon the involuntary liquidation of the issuer in preference to any security junior to it.

(4) Not applicable, except for with respect to the 2042 Notes, the 2043 Notes, and the Convertible Notes, as other senior securities do not have sufficient trading for an average market value per unit to be determined. The average market value per unit for each of the 2042 Notes, the 2043 Notes, and the Convertible Notes is based on the closing daily prices of such notes and is expressed per \$100 of indebtedness (including for the 2042 Notes and the 2043 Notes, which were issued in \$25 increments).

(5) Included in this amount is foreign currency debt obligations as outlined in the table in note 6.

(6) On October 4, 2015, the Senior Secured Notes, which had an outstanding principal balance of \$225,000, matured and were repaid in full.

(7) On January 15, 2016, the Convertible Notes, which had an outstanding principal balance of \$200,000, matured and were repaid in full.

Table of Contents

(8) Restrictive legends were removed in 2012.

Conversion and Exchange

If any debt securities are convertible into or exchangeable for other securities, the prospectus supplement will explain the terms and conditions of the conversion or exchange, including the conversion price or exchange ratio (or the calculation method), the conversion or exchange period (or how the period will be determined), if conversion or exchange will be mandatory or at the option of the holder or us, provisions for adjusting the conversion price or the exchange ratio and provisions affecting conversion or exchange in the event of the redemption of the underlying debt securities. These terms may also include provisions under which the number or amount of other securities to be received by the holders of the debt securities upon conversion or exchange would be calculated according to the market price of the other securities as of a time stated in the prospectus supplement.

Issuance of Securities in Registered Form

We may issue the debt securities in registered form, in which case we may issue them either in book-entry form only or in “certificated” form. Debt securities issued in book-entry form will be represented by global securities. We expect that we will usually issue debt securities in book-entry only form represented by global securities.

We also will have the option of issuing debt securities in non-registered form as bearer securities if we issue the securities outside the United States to non-U.S. persons. In that case, the prospectus supplement will set forth the mechanics for holding the bearer securities, including the procedures for receiving payments, for exchanging the bearer securities, including the procedures for receiving payments, for exchanging the bearer securities for registered securities of the same series, and for receiving notices. The prospectus supplement will also describe the requirements with respect to our maintenance of offices or agencies outside the United States and the applicable U.S. federal tax law requirements.

Book-Entry Holders

We will issue registered debt securities in book-entry form only, unless we specify otherwise in the applicable prospectus supplement. This means debt securities will be represented by one or more global securities registered in the name of a depository that will hold them on behalf of financial institutions that participate in the depository’s book-entry system. These participating institutions, in turn, hold beneficial interests in the debt securities held by the depository or its nominee. These institutions may hold these interests on behalf of themselves or customers.

Under the indenture, only the person in whose name a debt security is registered is recognized as the holder of that debt security. Consequently, for debt securities issued in book-entry form, we will recognize only the depository as the holder of the debt securities and we will make all payments on the debt securities to the depository. The depository will then pass along the payments it receives to its participants, which in turn will pass the payments along to their customers who are the beneficial owners. The depository and its participants do so under agreements they have made with one another or with their customers; they are not obligated to do so under the terms of the debt securities.

As a result, investors will not own debt securities directly. Instead, they will own beneficial interests in a global security, through a bank, broker or other financial institution that participates in the depository’s book-entry system or holds an interest through a participant. As long as the debt securities are represented by one or more global securities, investors will be indirect holders, and not holders, of the debt securities.

Street Name Holders

In the future, we may issue debt securities in certificated form or terminate a global security. In these cases, investors may choose to hold their debt securities in their own names or in “street name.” Debt securities held in street name are registered in the name of a bank, broker or other financial institution chosen by the investor, and the investor would hold a beneficial interest in those debt securities through the account he or she maintains at that institution.

For debt securities held in street name, we will recognize only the intermediary banks, brokers and other financial institutions in whose names the debt securities are registered as the holders of those debt securities and we will make all payments on those debt securities to them. These institutions will pass along the payments they receive to their customers who are the beneficial owners, but only because they agree to do so in their customer agreements or because they are legally required to do so. Investors who hold debt securities in street name will be indirect holders, and not holders, of the debt securities.

Legal Holders

Our obligations, as well as the obligations of the applicable trustee and those of any third parties employed by us or the applicable trustee, run only to the legal holders of the debt securities. We do not have obligations to investors who hold beneficial interests in global securities, in street name or by any other indirect means. This will be the case whether an investor chooses to be an indirect holder of a debt security or has no choice because we are issuing the debt securities only in book-entry form.

111

Table of Contents

For example, once we make a payment or give a notice to the holder, we have no further responsibility for the payment or notice even if that holder is required, under agreements with depositary participants or customers or by law, to pass it along to the indirect holders but does not do so. Similarly, if we want to obtain the approval of the holders for any purpose (for example, to amend an indenture or to relieve us of the consequences of a default or of our obligation to comply with a particular provision of an indenture), we would seek the approval only from the holders, and not the indirect holders, of the debt securities. Whether and how the holders contact the indirect holders is up to the holders.

When we refer to you, we mean those who invest in the debt securities being offered by this prospectus, whether they are the holders or only indirect holders of those debt securities. When we refer to your debt securities, we mean the debt securities in which you hold a direct or indirect interest.

Special Considerations for Indirect Holders

If you hold debt securities through a bank, broker or other financial institution, either in book-entry form or in street name, we urge you to check with that institution to find out:

- how it handles securities payments and notices,
- whether it imposes fees or charges,
- how it would handle a request for the holders' consent, if ever required,
- whether and how you can instruct it to send you debt securities registered in your own name so you can be a holder, if that is permitted in the future for a particular series of debt securities,
- how it would exercise rights under the debt securities if there were a default or other event triggering the need for holders to act to protect their interests, and
- if the debt securities are in book-entry form, how the depositary's rules and procedures will affect these matters.

Global Securities

As noted above, we usually will issue debt securities as registered securities in book-entry form only. A global security represents one or any other number of individual debt securities. Generally, all debt securities represented by the same global securities will have the same terms.

Each debt security issued in book-entry form will be represented by a global security that we deposit with and register in the name of a financial institution or its nominee that we select. The financial institution that we select for this purpose is called the depositary. Unless we specify otherwise in the applicable prospectus supplement, The Depository Trust Company, New York, New York, known as DTC, will be the depositary for all debt securities issued in book-entry form.

A global security may not be transferred to or registered in the name of anyone other than the depositary or its nominee, unless special termination situations arise. We describe those situations below under "Special Situations when a Global Security Will Be Terminated". As a result of these arrangements, the depositary, or its nominee, will be the sole registered owner and holder of all debt securities represented by a global security, and investors will be permitted to own only beneficial interests in a global security. Beneficial interests must be held by means of an account with a broker, bank or other financial institution that in turn has an account with the depositary or with another institution that has an account with the depositary. Thus, an investor whose security is represented by a global security will not be a holder of the debt security, but only an indirect holder of a beneficial interest in the global security.

Special Considerations for Global Securities

As an indirect holder, an investor's rights relating to a global security will be governed by the account rules of the investor's financial institution and of the depositary, as well as general laws relating to securities transfers. The depositary that holds the global security will be considered the holder of the debt securities represented by the global security.

If debt securities are issued only in the form of a global security, an investor should be aware of the following:

- An investor cannot cause the debt securities to be registered in his or her name, and cannot obtain certificates for his or her interest in the debt securities, except in the special situations we describe below.

An investor will be an indirect holder and must look to his or her own bank or broker for payments on the debt securities and protection of his or her legal rights relating to the debt securities, as we describe under “Issuance of Securities in Registered Form” above.

112

Table of Contents

An investor may not be able to sell interests in the debt securities to some insurance companies and other institutions that are required by law to own their securities in non-book-entry form.

An investor may not be able to pledge his or her interest in a global security in circumstances where certificates representing the debt securities must be delivered to the lender or other beneficiary of the pledge in order for the pledge to be effective.

The depositary's policies, which may change from time to time, will govern payments, transfers, exchanges and other matters relating to an investor's interest in a global security. We and the trustee have no responsibility for any aspect of the depositary's actions or for its records of ownership interests in a global security. We and the trustee also do not supervise the depositary in any way.

If we redeem less than all the debt securities of a particular series being redeemed, DTC's practice is to determine by lot the amount to be redeemed from each of its participants holding that series.

An investor is required to give notice of exercise of any option to elect repayment of its debt securities, through its participant, to the applicable trustee and to deliver the related debt securities by causing its participant to transfer its interest in those debt securities, on DTC's records, to the applicable trustee.

DTC requires that those who purchase and sell interests in a global security deposited in its book-entry system use immediately available funds. Your broker or bank may also require you to use immediately available funds when purchasing or selling interests in a global security.

Financial institutions that participate in the depositary's book-entry system, and through which an investor holds its interest in a global security, may also have their own policies affecting payments, notices and other matters relating to the debt securities. There may be more than one financial intermediary in the chain of ownership for an investor. We do not monitor and are not responsible for the actions of any of those intermediaries.

Special Situations when a Global Security will be Terminated

In a few special situations described below, a global security will be terminated and interests in it will be exchanged for certificates in non-book-entry form (certificated securities). After that exchange, the choice of whether to hold the certificated debt securities directly or in street name will be up to the investor. Investors must consult their own banks or brokers to find out how to have their interests in a global security transferred on termination to their own names, so that they will be holders. We have described the rights of legal holders and street name investors under "Issuance of Securities in Registered Form" above.

The special situations for termination of a global security are as follows:

if the depositary notifies us that it is unwilling, unable or no longer qualified to continue as depositary for that global security, and we do not appoint another institution to act as depositary within 60 days,

if we notify the trustee that we wish to terminate that global security, or

if an event of default has occurred with regard to the debt securities represented by that global security and has not been cured or waived; we discuss defaults later under "Events of Default."

The prospectus supplement may list situations for terminating a global security that would apply only to the particular series of debt securities covered by the prospectus supplement. If a global security is terminated, only the depositary, and not we or the applicable trustee, is responsible for deciding the names of the institutions in whose names the debt securities represented by the global security will be registered and, therefore, who will be the holders of those debt securities.

Payment and Paying Agents

We will pay interest to the person listed in the applicable trustee's records as the owner of the debt security at the close of business on a particular day in advance of each due date for interest, even if that person no longer owns the debt security on the interest due date. That day, usually about two weeks in advance of the interest due date, is called the "record date." Because we will pay all the interest for an interest period to the holders on the record date, holders buying and selling debt securities must work out between themselves the appropriate purchase price. The most common manner is to adjust the sales price of the debt securities to prorate interest fairly between buyer and seller based on their respective ownership periods within the particular interest period. This prorated interest amount is called "accrued interest."

Table of Contents

Payments on Global Securities

We will make payments on a global security in accordance with the applicable policies of the depositary as in effect from time to time. Under those policies, we will make payments directly to the depositary, or its nominee, and not to any indirect holders who own beneficial interests in the global security. An indirect holder's right to those payments will be governed by the rules and practices of the depositary and its participants, as described under "—Special Considerations for Global Securities."

Payments on Certificated Securities

We will make payments on a certificated debt security as follows. We will pay interest that is due on an interest payment date by check mailed on the interest payment date to the holder at his or her address shown on the trustee's records as of the close of business on the regular record date. We will make all payments of principal and premium, if any, by check at the office of the applicable trustee in New York, NY and/or at other offices that may be specified in the prospectus supplement or in a notice to holders against surrender of the debt security.

Alternatively, if the holder asks us to do so, we will pay any amount that becomes due on the debt security by wire transfer of immediately available funds to an account at a bank in New York City, on the due date. To request payment by wire, the holder must give the applicable trustee or other paying agent appropriate transfer instructions at least 15 business days before the requested wire payment is due. In the case of any interest payment due on an interest payment date, the instructions must be given by the person who is the holder on the relevant regular record date. Any wire instructions, once properly given, will remain in effect unless and until new instructions are given in the manner described above.

Payment When Offices Are Closed

If any payment is due on a debt security on a day that is not a business day, we will make the payment on the next day that is a business day. Payments made on the next business day in this situation will be treated under the indenture as if they were made on the original due date, except as otherwise indicated in the attached prospectus supplement. Such payment will not result in a default under any debt security or the indenture, and no interest will accrue on the payment amount from the original due date to the next day that is a business day.

Book-entry and other indirect holders should consult their banks or brokers for information on how they will receive payments on their debt securities.

Events of Default

You will have rights if an Event of Default occurs in respect of the debt securities of your series and is not cured, as described later in this subsection.

The term "Event of Default" in respect of the debt securities of your series means any of the following:

- We do not pay the principal of, or any premium on, a debt security of the series on its due date.
- We do not pay interest on a debt security of the series within 30 days of its due date.
- We do not deposit any sinking fund payment in respect of debt securities of the series on its due date.

We remain in breach of a covenant in respect of debt securities of the series for 60 days after we receive a written notice of default stating we are in breach. The notice must be sent by either the trustee or holders of at least 25% of the principal amount of debt securities of the series.

• We file for bankruptcy or certain other events of bankruptcy, insolvency or reorganization occur.

• Any other Event of Default in respect of debt securities of the series described in the prospectus supplement occurs.

An Event of Default for a particular series of debt securities does not necessarily constitute an Event of Default for any other series of debt securities issued under the same or any other indenture. The trustee may withhold notice to the holders of debt securities of any default, except in the payment of principal, premium or interest, if it considers the withholding of notice to be in the best interests of the holders.

Remedies if an Event of Default Occurs

If an Event of Default has occurred and has not been cured, the trustee or the holders of at least 25% in principal amount of the debt securities of the affected series may declare the entire principal amount of all the debt securities of that series to be due and immediately payable. This is called a declaration of acceleration of maturity. A declaration of acceleration of maturity may be canceled by the holders of a majority in principal amount of the debt securities of the

affected series.

114

Table of Contents

Except in cases of default, where the trustee has some special duties, the trustee is not required to take any action under the indenture at the request of any holders unless the holders offer the trustee reasonable protection from expenses and liability (called an “indemnity”). (Section 315 of the Trust Indenture Act of 1939) If reasonable indemnity is provided, the holders of a majority in principal amount of the outstanding debt securities of the relevant series may direct the time, method and place of conducting any lawsuit or other formal legal action seeking any remedy available to the trustee. The trustee may refuse to follow those directions in certain circumstances. No delay or omission in exercising any right or remedy will be treated as a waiver of that right, remedy or Event of Default.

Before you are allowed to bypass your trustee and bring your own lawsuit or other formal legal action or take other steps to enforce your rights or protect your interests relating to the debt securities, the following must occur:

• You must give your trustee written notice that an Event of Default has occurred and remains uncured.

The holders of at least 25% in principal amount of all outstanding debt securities of the relevant series must make a written request that the trustee take action because of the default and must offer reasonable indemnity to the trustee against the cost and other liabilities of taking that action.

• The trustee must not have taken action for 60 days after receipt of the above notice and offer of indemnity.

• The holders of a majority in principal amount of the debt securities must not have given the trustee a direction inconsistent with the above notice during that 60-day period.

However, you are entitled at any time to bring a lawsuit for the payment of money due on your debt securities on or after the due date.

Holders of a majority in principal amount of the debt securities of the affected series may waive any past defaults other than

- the payment of principal, any premium or interest or

in respect of a covenant that cannot be modified or amended without the consent of each holder.

Book-entry and other indirect holders should consult their banks or brokers for information on how to give notice or direction to or make a request of the trustee and how to declare or cancel an acceleration of maturity.

Each year, we will furnish to each trustee a written statement of certain of our officers certifying that to their knowledge we are in compliance with the indenture and the debt securities or else specifying any default.

Merger or Consolidation

Under the terms of the indenture, we are generally permitted to consolidate or merge with another entity. We are also permitted to sell all or substantially all of our assets to another entity. However, we may not take any of these actions unless all the following conditions are met:

• Where we merge out of existence or sell our assets, the resulting entity must agree to be legally responsible for our obligations under the debt securities.

The merger or sale of assets must not cause a default on the debt securities and we must not already be in default (unless the merger or sale would cure the default). For purposes of this no-default test, a default would include an Event of Default that has occurred and has not been cured, as described under “Events of Default” above. A default for this purpose would also include any event that would be an Event of Default if the requirements for giving us a notice of default or our default having to exist for a specific period of time were disregarded.

Under the indenture, no merger or sale of assets may be made if as a result any of our property or assets or any property or assets of one of our subsidiaries, if any, would become subject to any mortgage, lien or other encumbrance unless either (i) the mortgage, lien or other encumbrance could be created pursuant to the limitation on liens covenant in the indenture (see “Indenture Provisions—Limitation on Liens” below) without equally and ratably securing the indenture securities or (ii) the indenture securities are secured equally and ratably with or prior to the debt secured by the mortgage, lien or other encumbrance.

• We must deliver certain certificates and documents to the trustee.

• We must satisfy any other requirements specified in the prospectus supplement relating to a particular series of debt securities.

Table of Contents

Modification or Waiver

There are three types of changes we can make to the indenture and the debt securities issued thereunder.

Changes Requiring Your Approval

First, there are changes that we cannot make to your debt securities without your specific approval. The following is a list of those types of changes:

- change the stated maturity of the principal of, or interest on, a debt security;
- reduce any amounts due on a debt security;
- reduce the amount of principal payable upon acceleration of the maturity of a security following a default;
- adversely affect any right of repayment at the holder's option;
- change the place (except as otherwise described in the prospectus or prospectus supplement) or currency of payment on a debt security;
- impair your right to sue for payment;
- adversely affect any right to convert or exchange a debt security in accordance with its terms;
- modify the subordination provisions in the indenture in a manner that is adverse to holders of the debt securities;
- reduce the percentage of holders of debt securities whose consent is needed to modify or amend the indenture;
- reduce the percentage of holders of debt securities whose consent is needed to waive compliance with certain provisions of the indenture or to waive certain defaults;
- modify any other aspect of the provisions of the indenture dealing with supplemental indentures, modification and waiver of past defaults, changes to the quorum or voting requirements or the waiver of certain covenants; and
- change any obligation we have to pay additional amounts.

Changes Not Requiring Approval

The second type of change does not require any vote by the holders of the debt securities. This type is limited to clarifications and certain other changes that would not adversely affect holders of the outstanding debt securities in any material respect. We also do not need any approval to make any change that affects only debt securities to be issued under the indenture after the change takes effect.

Changes Requiring Majority Approval

Any other change to the indenture and the debt securities would require the following approval:

• If the change affects only one series of debt securities, it must be approved by the holders of a majority in principal amount of that series.

• If the change affects more than one series of debt securities issued under the same indenture, it must be approved by the holders of a majority in principal amount of all of the series affected by the change, with all affected series voting together as one class for this purpose.

In each case, the required approval must be given by written consent.

The holders of a majority in principal amount of all of the series of debt securities issued under an indenture, voting together as one class for this purpose, may waive our compliance with some of our covenants in that indenture.

However, we cannot obtain a waiver of a payment default or of any of the matters covered by the bullet points included above under “—Changes Requiring Your Approval.”

Further Details Concerning Voting

When taking a vote, we will use the following rules to decide how much principal to attribute to a debt security:

For original issue discount securities, we will use the principal amount that would be due and payable on the voting date if the maturity of these deb
