**Petrobras denies occupation of Bolivian fields**

---

(Rio de Janeiro, April 7, 2006). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA], a Brazilian international energy company, announces that the San Alberto and San Antonio fields in Bolivia continue operating and their respective installations remain intact. Contrary to reports today, the two fields have not been occupied.

Petrobras confirms that groups of demonstrators are blocking roads in the region, adversely affecting work on repairing the Company's oil pipeline in addition to lines operated by other companies damaged due to the rains.

Since last weekend, it has been raining torrentially in the Bolivian Chaco region. Strong-flowing floodwater has uncovered some parts of the pipeline operated by Petrobras, damaging a stretch of approximately 800 meters.

## FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
