## **Economic Scenario**

Global economic activity points to a recovery, chiefly due to the developed economies. In the third quarter of 2013, the global manufacturing Purchasing Managers Index (PMI) reached 53.3 points, its highest level for 18 months, mainly fueled by the recovery of the Eurozone countries. September's Eurozone PMI reached 52.2 points, the highest figure since the second quarter of 2011, led by Germany. The IMF expects global GDP growth of 2.9% in 2013 and 3.6% in 2014.

### **USA**

Indicators in the United States are also pointing to a recovery. The manufacturing PMI, published by the Institute for Supply Management (ISM), moved up for the fourth consecutive month, reaching 56.2 points in September, versus 55.7 in the previous month. Industrial production grew by 0.6% in September, with installed capacity use of 78.3%.

Also in September, unemployment rate fell to 7.2%, 0.4 p.p. down on June, but still above pre-global-crisis levels.

On the other hand, the impasse regarding the raising of the U.S. debt ceiling had a negative impact on economic activity in the quarter.

Given this scenario, the FED opted to maintain its economic stimuli, continuing with its asset purchase program. The institution expects 2013 GDP growth of between 2.0% and 2.3%.

### **Europe**

September's economic activity figures in Europe also indicate a recovery, led by Germany, but with the peripheral nations also recording positive indicators. In this context, the highlight was Spain, which posted growth of 0.1% in 3Q13 over the previous three months, following nine consecutive quarters of decline.

Average unemployment rate, on the other hand, remained high in Euro zone, reaching 12.2% in September, one of the highest levels since 1995. The Greek and Spanish rates had the highest levels. The latest figures from Greece show a 26.6% rate in July, while Spain's rate remained flat at 26.6% in September.

As a result, the European Central Bank maintained a cautious approach, signaling that it may offer a new round of long-term loans to the banks.

In the United Kingdom, third-quarter GDP edged up by 0.8% over 2Q13, which in turn recorded growth of 0.7%, with services making an important contribution. Manufacturing PMI reached 56.7 points in September, slightly below the 57.1 recorded in August, exceeding 50 points for the sixth consecutive month. Likewise year-over-year industrial output increased 2.2% in September.

## **Asia**

The Chinese government stimuli have proved successful, as shown by the latest economic indicators. Third-quarter GDP grew by 7.8% in the last 12 months and 2.2% over 2Q13. Compound PMI climbed from 48.2 points in June to 51.2 points in September, while industrial production moved up by 10.2% in the same month. Therefore, the government has reiterated its 2013 GDP growth target of 7.5%.

Japanese GDP grew by 3.8% in the second quarter, while manufacturing PMI reached 52.5 points in September, the highest figure since February 2011. Consumer confidence also moved up in September following three consecutive reductions, reaching 54.5 points. Retail sales grew by 3.1% in September, while industrial output moved up by 1.5%. Consequently, Japan's central bank (BoJ) raised its economic assessment of the country's nine regions for the second consecutive month.

## Brazil

In 2Q13 GDP posted growth of 1.5%, reflecting the 3.9% increase in agriculture and the 3.6% upturn in gross fixed capital formation. In the 12 months through June, year-on-year growth came to 1.9%. The Central Bank's FOCUS report expects annual GDP growth of 2.5% in 2013.

Industrial production in September 2013 grew 0,7% over August, and moved up by 1.6% in the first nine months over the same period last year.

Inflation measured by the IPCA consumer price index recorded 0.35% in September, giving 5.86% in the last 12 months, above the target ceiling defined by the Monetary Policy Committee (COPOM), which raised the Selic base rate for the fifth consecutive time at its last meeting in September, this time to 9.50% p.a.

The real remained highly volatile against the U.S. dollar throughout the third quarter, peaking at R\$2.45/US\$, given the uncertainties surrounding the FED's reduction of the monetary stimuli. However, following the decision to maintain the stimuli, the dollar fell back, closing September at R\$2.23/US\$.

Foreign reserves remained virtually flat at around US\$376 billion.

## **Adoption of IFRS 10/11**

As of January 1, 2013, the Company adopted IFRS 10 – Consolidated Financial Statements, corresponding to CPC 36 (R3) *Demonstrações Financeiras Consolidadas*, approved by the CVM in December 2012, and IFRS 11 – Joint Arrangements, corresponding to CPC 19 (R2) - *Negócios em Conjunto*, approved by the CVM in November 2012. Given that the proportional consolidation method is no longer permitted, the Company has ceased to consolidate its jointly-owned subsidiaries, Namisa, MRS Logística and CBSI, and now recognizes them in accordance with the equity accounting method. The main impacts were on net revenue, cost of goods sold, gross profit, the financial result, equity income and net income. For comparability purposes, the consolidated financial statements for the third quarter of 2012 were reclassified to reflect this alteration.

### **Net Revenue**

CSN posted record consolidated net revenue of R\$4,661 million in 3Q13, 15% up on 2Q13, mainly due to increased revenue from mining operations.

In the first nine months, net revenue totaled R\$12,364 million, 15% more than in 9M12, chiefly due to higher revenue from the steel segment, and also a new record.

### **Cost of Goods Sold (COGS)**

In 3Q13, consolidated COGS reached R\$3,259 million, 8% up on the previous quarter, primarily due to higher volume sold in mining segment.

The Gross Profit reached R\$1,402 million in the 3Q13, 35% up from 2Q13, for the same reasons afore mentioned.

## **Selling, General, Administrative and Other Operating Expenses**

Consolidated SG&A expenses totaled R\$315 million in 3Q13, 17% down on the previous quarter, chiefly due to lower distribution costs.

CSN recorded a net expense of R\$133 million in the "Other Operating Expenses" line in 3Q13, 9% down on the previous quarter, basically due to the upturn in non-recurring revenue in 3Q13.

## **EBITDA**

The Company uses Adjusted EBITDA to measure the performance of its various segments and operating cash flow generation capacity. It comprises net income before the net financial result, income and social contribution taxes, depreciation and amortization, equity income and other operating revenue (expenses).

Adjusted EBITDA considers the Company's proportional interest in Namisa, MRS Logística and CBSI and is on a comparable basis with the amounts published in 2012.

Adjusted EBITDA totaled R\$1,652 million in 3Q13, 51% up on the R\$1,095 million posted in 2Q13, primarily due to the contribution of the mining and steel segments.

The consolidated adjusted EBITDA margin reached 31%, 7 p.p. more than in 2Q13.

## Financial Result and Net Debt

The 3Q13 consolidated net financial result was negative by R\$597 million, chiefly due to the following factors:

- Interest on loans and financing totaling R\$588 million;
- Expenses of R\$30 million with the monetary restatement of tax payment installments;
- Other financial expenses totaling R\$43 million.

These negative effects were partially offset by consolidated financial revenue of R\$59 million and monetary and foreign exchange variations of R\$5 million.

Gross debt, net debt and the net debt/EBITDA ratio presented below reflect the Company's proportional interest in Namisa, MRS Logística and CBSI and are on a comparable basis with the amounts published in 2012.

On September 30, 2013, consolidated net debt stood at R\$17.8 billion, R\$0.9 billion more than the R\$16.9 billion recorded on June 30, 2013, essentially due to the following factors:

- Dividend and interest on equity payments totaling R\$0.4 billion;
- Investments of R\$0.8 billion in fixed assets;
- A R\$0.7 billion disbursement effect related to the cost of debt;
- A R\$0.5 billion increase in working capital;
- Other effects of R\$0.2 billion.

These effects were partially offset by adjusted EBITDA of R\$1.7 billion.

The net debt/EBITDA ratio based on LTM adjusted EBITDA closed the third quarter at 3.65x, 0.27x down on the ratio recorded at the end of the previous quarter.

## **Indebtness (R\$ MM) and Net Debt / Adjusted EBITDA**

### **Equity Result**

The consolidated equity result totaled R\$208 million in 3Q13, basically due to the result of the jointly-owned subsidiary Namisa.

### **Net Income**

CSN posted consolidated third-quarter net income of R\$503 million, in line with the 2Q13 figure.

### **Capex**

Investments reflect the Company's proportional interest in Namisa, MRS Logística and CBSI and are on a comparable basis with the amounts published in 2012.

CSN invested R\$838 million in 3Q13, R\$424 million of which in the parent company, allocated as follows:

- ü Casa de Pedra mine and Port of Itaguaí: R\$191 million;
- ü Long steel: R\$105 million.

The remaining R\$414 million went to subsidiaries or joint subsidiaries, mostly in the following projects:

- ü Transnordestina Logística: R\$301 million;
- ü MRS: R\$41 million;
- ü Namisa: R\$11 million.

### **Working Capital**

Working capital allocated to the Company's businesses closed 3Q13 at R\$2,455 million, R\$513 million up on the R\$1,942 million recorded at the end of 2Q13, chiefly due to the reduction in the suppliers line. The average supplier payment period narrowed by 17 days, partially offset by the four-day reduction in the inventory turnover period, raising the cash conversion cycle

by 13 days.

### **Distribution**

According to INDA (the Brazilian Steel Distributors' Association), domestic flat steel sales by distributors totaled 3.4 million tonnes in the first nine months, 3.3% up on 9M12.

In the same period, purchases by the associated network came to 3.5 million tonnes, 10.7% up year-on-year. Inventories closed September at around 1.1 million tonnes, identical to the end of August, with a turnover of 2.7 months of sales.

### **Sales Volume**

## Mining

### **Scenario**

In 3Q13, the seaborne iron ore market was positively impacted by higher demand for steel products in China, thanks to strong government stimuli and investments in infrastructure, which triggered the restocking of iron ore by steel plants. As a result, the Platts Fe62% CFR China index averaged US\$132.51/dmt in 3Q13, 5.2% up on the previous three months.

The iron-ore quality premium hovered between US\$2.10 and US\$2.40/dmt per 1% of Fe content, while freight costs on the Tubarão/Qingdao route averaged US\$23.30/wmt, 30.6% more than the US\$17.84/wmt recorded in 2Q13, due to higher demand for ships.

In 3Q13, Brazilian exports accounted for 27% of the seaborne market, totaling 86 million tonnes, 14% up on the quarter before.

### **Iron Ore Sales**

<sup>1</sup> Sales volumes include 100% of the stake in NAMISA.

### **Net Revenue**

Net revenue from mining operations totaled R\$1.65 billion in 3Q13, 67% more than in 2Q13, chiefly due to the upturn in sales volume and higher prices.

CSN is a highly integrated company, with steel, mining, cement, logistics and energy businesses. The Company operates throughout the entire steel production chain, from the mining of iron ore to the production and sale of a diversified range of high value-added steel products, including coated and galvanized, as well as tin plate. Thanks to its integrated production system and exemplary management, CSN's production costs are among the lowest in the global steel sector. CSN recorded consolidated net revenue of R\$16.9 billion in 2012.

The Company uses Adjusted EBITDA to measure the segments' performance and operating cash flow capacity. It comprises net income before the net financial result, income and social contribution taxes, depreciation and amortization, results from investees and other operating revenue (expenses). Despite being an indicator used to measure the segments' results, EBITDA is not a measure recognized by the Brazilian accounting practices or IFRS, with no standard definition and therefore cannot be used as comparison basis with similar indicators adopted by other companies.

Net debt as presented is used by CSN to measure the Company's financial performance. However, net debt is not recognized as a measurement of financial performance according to the accounting practices adopted in Brazil, nor should it be considered in isolation, or as an indicator of liquidity.
