Disclaimer Cautionary statement regarding forward-looking statements This presentation contains forward-looking statements that involve inherent risks and uncertainties, and we might not be able to achieve the predictions, forecasts, projections and other outcomes we describe or imply in forward-looking statements. A number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions we express in these forward-looking statements, including those we identify in "Risk Factors" in our Annual Report on Form 20-F for the fiscal year ended December 31, 2014 and in "Cautionary statement regarding forward-looking information" in our fourth quarter earnings release 2015 filed with the US Securities and Exchange Commission, and in other public filings and press releases. We do not intend to update these forward-looking statements except as may be required by applicable law. We may not achieve the benefits of our strategic initiatives We may not achieve all of the expected benefits of our strategic initiatives. Factors beyond our control, including but not limited to the market and economic conditions, changes in laws, rules or regulations and other challenges discussed in our public filings, could limit our ability to achieve some or all of the expected benefits of these initiatives. Year to date financial information is subject to further review The selected YTD 2016 financial information presented herein is preliminary and only reflects certain of our results for certain 2016 periods specified in this presentation. This data has not been evaluated, reviewed or audited by our independent registered public accounting firm. Accordingly, the YTD 2016 financial information contained in this presentation is inherently subject to change. This data should not be taken as a forecast or prediction of our results for 1Q16 as a whole or any other future periods. Statement regarding purpose and basis of presentation This presentation contains certain historical information that has been re-segmented to approximate what our results under our new structure would have been, had it been in place from January 1, 2014. In addition, "Illustrative," "Ambition" and "Goal" presentations are not intended to be viewed as targets or projections, nor are they considered to be Key Performance Indicators. All such presentations are subject to a large number of inherent risks, assumptions and uncertainties, many of which are outside of our control. Accordingly, this information should not be relied on for any purpose. In preparing this presentation, management has made estimates and assumptions which affect the reported numbers. Actual results may differ. Figures throughout presentation may also be subject to rounding adjustments. Statement regarding non-GAAP financial measures This presentation also contains non-GAAP financial measures. Information needed to reconcile such non-GAAP financial measures to the most directly comparable measures under US GAAP can be found in this presentation, which is available on our website at [credit-suisse.com](http://credit-suisse.com). Statement regarding capital, liquidity and leverage As of January 1, 2013, Basel 3 was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. As of January 1, 2015, the Bank for International Settlements (BIS) leverage ratio framework, as issued by the Basel Committee on Banking Supervision (BCBS), was implemented in Switzerland by FINMA. Our related disclosures are in accordance with our interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this presentation. Capital and ratio numbers for periods prior to 2013 are based on estimates, which are calculated as if the Basel 3 framework had been in place in Switzerland during such periods. Unless otherwise noted, leverage exposure is based on the BIS leverage ratio framework and consists of period-end balance sheet assets and prescribed regulatory adjustments. Leverage amounts for 4Q14, which are presented in order to show meaningful comparative information, are based on estimates which are calculated as if the BIS leverage ratio framework had been implemented in Switzerland at such time. Beginning in 2015, the Swiss leverage ratio is calculated as Swiss total capital, divided by period-end leverage exposure. The look-through BIS tier 1 leverage ratio and CET1 leverage ratio are calculated as look-through BIS tier 1 capital and CET1 capital, respectively, divided by end-period leverage exposure. Cautionary statement regarding this presentation This presentation does not constitute or form part of and should not be construed as, an offer to sell or issue or the solicitation of an offer to buy or acquire securities of Credit Suisse Group AG or Credit Suisse AG (together, the "Company") in any jurisdiction or an inducement to enter into investment activity. No part of this document, nor the fact of its distribution, should form the basis of, or be relied on in connection with, any contract or commitment or investment decision whatsoever. No representation, warranty or undertaking, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of the information or the opinions contained herein. None of the Company or any of its affiliates, advisors or representatives shall have any liability whatsoever (in negligence or otherwise) for any loss howsoever arising from any use of this document or its contents or otherwise arising in connection with the document. 2 March 23, 2016

3 March 23, 2016 Summary Our recent performance has further highlighted two key areas of challenge for Credit Suisse: Our fixed cost base and Our scale in Global Markets in the Americas and Europe. This has translated into pressures on our capital position as demonstrated in a lower than expected CET1 ratio as reported at the end of 4Q15. A number of actions had been underway since October, to address these challenges. We had set ourselves: A gross cost saving target of CHF 3.5 bn by the end 2018. A RWA target of USD 83-85 bn in Global Markets by end 2018 from USD 118 bn at 3Q15. When we presented our 4Q15 results on February 4, we said that we would reassess our plans to (i) reduce our cost base and (ii) right size Global Markets. Since then, the market environment has remained unsupportive, with continued pressure in 1Q16. Like for the previous quarter, Global Markets will contribute a negative result in 1Q16, albeit at lower levels. We have now completed the reassessment of our plans and we are announcing today a step up in the pace of our restructuring with: An increase of our gross cost saving target from CHF 3.5 bn to CHF 4.3 bn with a CHF 1.7 bn gross cost savings target for 2016. A new RWA target of USD 60 bn for Global Markets, approximately 30% below the previous targets.

33 Improving the risk-adjusted performance of the portfolio GM Volatility – Quarterly Loss Maximum Quarterly Pre-Tax Income Loss in Stress Scenario<sup>4</sup> ~(-50)% Reduced Volatility (1) Return on regulatory capital is calculated using income after tax, reflects ‘worst of’ return on RWA or leverage exposure; (2) As-reported by Credit Suisse (2011-2015), excludes goodwill and major litigation items, 2011-13 reported leverage exposure estimated based on 2014 Add-On; (4) Scenarios based on varying macro-economic assumptions; (4) Maximum Quarterly PTI loss based on flight-to-quality 5 (“FTQ”) losses adjusted for management actions (position sale, hedging), net of fees, commissions, carry and client monetization income over fixed quarterly expenses; (5) A stress scenario defined as a position loss in an event of one-week of turbulent markets The restructured Global Markets’ business portfolio aims to generate returns on regulatory capital that are more stable through the cycle The reduction in resources allocated to Securitized Products and Leveraged Finance affects two of Global Markets’ historically highest returning businesses. The reduction in risk exposure to illiquid assets in Securitized Products and Distressed Credit portfolios improves the overall risk profile in Global Markets. Reduction in modelled Flight-to-Quality<sup>5</sup> metrics and smaller business footprint translates into significantly lower potential Pre-Tax Income quarterly losses GM evolution of returns Rescaled Footprint Return on Regulatory Capital<sup>1</sup> Historic Average<sup>2</sup> 2.7% 14.3% 10.2% Target Average<sup>3</sup> Changes lead to more stable structural returns and higher quality of earnings March 23, 2016

---

2015 Year-End vs. Target (USD bn) RWA Leverage Exposure (30)% (22)% Further optimization of Global Markets reduces the division's previous target RWA level by 30%, from USD 83-85bn to ~USD 60bn. Division-wide RWA reductions will be driven by inventory reductions in Securitized Products, Distressed Credit, CLO Secondary and other illiquid inventories. Global Market's target for leverage exposure will be reduced a further 22%, from USD 370bn to ~USD 290bn. The primary drivers for leverage exposure reduction are reductions in Securitized Products and Illiquid or Long-Dated Customer Financing, partially offset by additional reinvestment in Prime Services. Reducing levels of resource consumption across Global Markets Changes will drive significant reductions in RWA and leverage exposure (1) As of October 21, 2015 1 1 34 Rationalization/ Realignment Rationalization/ Realignment (pre-inflation) March 23, 2016

---

2015 Year-End vs. Target Cost Reductions (USD bn) Operating costs to be reduced by a further USD 1.2bn as a result of the new divisional structure and the previously announced ongoing London Rightsizing initiative. Savings will be predominantly driven by: Reduction of front office headcount and further reduction in functions that support Global Markets Efficiency programs including migrating Derivatives infrastructure onto a single, common platform across Solutions – a transformation of end-to-end processes and technology (~USD 0.2bn), and London rightsizing (~USD 0.1bn) The estimated cost-to-achieve to achieve savings is forecast at USD 1.2bn, with ongoing target operating costs for Global Markets expected to be 20% lower than 2015 adjusted operating expenses. Cost-to-Achieve: USD ~1.2bn (20)% Improving operating leverage in Global Markets Business exits and recalibration allow significant cost reductions to be targeted 35 1 Business exits and realignments relate to operations transferred across reporting segments and discontinued operations. 1 March 23, 2016

---

47 March 23, 2016 Measures to ensure delivery of our capital goals 1 Any such IPO would be subject to, among other things, all necessary approvals and would be intended to generate / raise additional capital for Credit Suisse AG or Credit Suisse (Schweiz) AG. CS Legal Entity Switzerland minority IPO1 On track for 2H17; expected capital impact of CHF 2 – 4 bn Business, real estate and other disposals / actions Potential scope to raise at least CHF 1 bn by end 2016 Global Markets wind-down Free up CHF 0.4 bn of capital by end 2017 Measures in place to strengthenour capital base Net cost savings Increased from CHF 2.0 bn to > CHF 3.0

---

2016: Expected to be the peak transformational year. Costs: Operating costs of CHF 19.8 bn in 2016, < CHF 18 bn by end of 2018. SRU is a core component of this with expenses from the original portfolio expected to decline by ~ CHF 750 mn in 2016 and a further ~ CHF 600 mn in 2017. The SRU utility will be further expanded in 2Q16 to support the Global Markets realignment, encompassing further GM infrastructure and developing an integrated plan with GM to minimize post run-off stranded costs. Restructuring costs expected to peak in 2016 at CHF 1 bn before dropping to CHF 0.6 bn in 2017. Capital Plan: Raise CHF 1 bn through disposals in 2016. Improve capital generation through lower expenses. Increase capital in 2017 by CHF 2 – 4 bn through the minority IPO<sup>1</sup> of our Credit Suisse Legal Entity Switzerland. Dividend Policy: as per Oct 21st, 2015. Recommendation of CHF 0.70 per share dividend with scrip option until we reach our capital target. In any event, we will not continue with scrip beyond 2017<sup>2</sup>. We intend to move to 40% Operating Free Cash Generated (OFCG) payout as capital targets are met. 48 March 23, 2016. 1 Any such IPO would be subject to, among other things, all necessary approvals and would be intended to generate / raise additional capital for Credit Suisse AG or Credit Suisse (Schweiz) AG. 2 Until we reach our capital target however, we will recommend CHF 0.70 per share with a scrip alternative; we will discontinue the scrip once we have clarity on regulatory requirements and litigation risks. In any event, we will not continue with the scrip beyond 2017.

54 March 23, 2016 1 Any such IPO would be subject to, among other things, all necessary approvals and would be intended to generate / raise additional capital for Credit Suisse AG or Credit Suisse (Schweiz) AG. 2 More precisely, Credit Suisse (Schweiz) AG. Stepping up the pace of our efforts to reduce our costs level and right size our Global Markets business. Increased our net cost saving target for 2018 from CHF 2.0 bn to CHF 3.0 bn. Reducing the scale of our Global Markets footprint – Global Markets will be smaller, with more stable earnings and focused on our clients. Global Markets RWA at USD 60 bn and leverage exposure at USD 290 bn by end-2016. Maintain a strong capital position by (i) generating additional cost saving, (ii) reducing capital consumption in Global Markets, (iii) targeting our growth investments, (iv) disposing of assets and businesses for at least CHF 1 bn. Execute a partial IPO<sup>1</sup> of Swiss Universal Bank<sup>2</sup> planned for 2017. Post restructuring, be positioned to grow profitably and generate capital
