Form 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended September 30, 2017

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-35630

Hi-Crush Partners LP

(Exact name of registrant as specified in its charter)

Delaware

(State or Other Jurisdiction of Incorporation or Organization)

90-0840530

(I.R.S. Employer Identification No.)

Three Riverway, Suite 1350

Houston, Texas

(Address of Principal Executive Offices)

77056

(Zip Code)

Registrant's telephone number, including area code (713) 980-6200

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company.) Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of October 25, 2017, there were 91,030,707 common units outstanding.

HI-CRUSH PARTNERS LP

Notes to Unaudited Condensed Consolidated Financial Statements

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

1. Basis of Presentation and Use of Estimates

The accompanying unaudited interim Condensed Consolidated Financial Statements ("interim statements") of Hi-Crush Partners LP (together with its subsidiaries, the "Partnership", "we", "us" or "our") have been prepared in accordance with accounting principles generally accepted in the United States ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X issued by the U.S. Securities and Exchange Commission ("SEC"). Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all normal and recurring adjustments and disclosures necessary for a fair statement are reflected in the interim periods presented. The results reported in these interim statements are not necessarily indicative of the results that may be reported for the entire year. These interim statements should be read in conjunction with the Partnership's Consolidated Financial Statements for the year ended December 31, 2016, which are included in the Partnership's Annual Report on Form 10-K filed with the SEC on February 21, 2017, as amended by the Partnership's Current Report on Form 8-K filed with the SEC on May 1, 2017. The year-end balance sheet data was derived from the audited financial statements.

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates.

These financial statements have been prepared assuming the Partnership will continue to operate as a going concern. On a quarterly basis, the Partnership assesses whether conditions have emerged which may cast substantial doubt about the Partnership's ability to continue as a going concern for the next twelve months following the issuance of the interim statements.

Hi-Crush Partners LP is a Delaware limited partnership formed on May 8, 2012 to acquire selected sand reserves and related processing and transportation facilities of Hi-Crush Proppants LLC. The Partnership is engaged in the excavation and processing of raw frac sand for use in hydraulic fracturing operations for oil and natural gas wells. In connection with its formation, the Partnership issued a non-economic general partner interest to Hi-Crush GP LLC, our general partner (the "General Partner" or "Hi-Crush GP"), and a 100% limited partner interest to Hi-Crush Proppants LLC (the "sponsor"), its organizational limited partner.

On August 9, 2016, the Partnership entered into a contribution agreement with the sponsor to acquire all of the outstanding membership interests in Hi-Crush Blair LLC ("Blair"), the entity that owned our sponsor's Blair facility, for \$75,000 in cash, 7,053,292 of newly issued common units in the Partnership, and payment of up to \$10,000 of contingent consideration (the "Blair Contribution"). The Partnership completed the acquisition of the Blair facility on August 31, 2016.

On February 23, 2017, the Partnership entered into a contribution agreement with our sponsor to acquire all of the outstanding membership interests in Hi-Crush Whitehall LLC ("Whitehall"), the entity that owned our sponsor's Whitehall facility, the remaining 2.0% equity interest in Hi-Crush Augusta LLC ("Augusta"), and all of the outstanding membership interests in PDQ Properties LLC (together, the "Other Assets"), for \$140,000 in cash and up to \$65,000 of contingent consideration over a two-year period (the "Whitehall Contribution"). The Partnership completed this acquisition on March 15, 2017.

The Blair Contribution and Whitehall Contribution were accounted for as transactions between entities under common control whereby the net assets of Blair, Whitehall and Other Assets were recorded at their historical cost. Therefore, the Partnership's historical financial information was recast to combine Blair, Whitehall and Other Assets with the Partnership as if the combinations had been in effect since inception of the common control. Refer to Note 3 - Acquisitions for additional disclosure regarding the Blair Contribution and Whitehall Contribution.

2. Significant Accounting Policies

In addition to the significant accounting policies listed below, a comprehensive discussion of our critical accounting policies and estimates is included in our Annual Report on Form 10-K filed with the SEC on February 21, 2017.

Accounts Receivable

Trade receivables relate to sales of raw frac sand and related services for which credit is extended based on the customer's credit history and are recorded at the invoiced amount and do not bear interest. The Partnership regularly reviews the collectability of accounts receivable. When it is probable that all or part of an outstanding balance will not be collected, the Partnership establishes or adjusts an allowance as necessary generally using the specific identification method. Account balances are charged against the allowance after all means of collection have been exhausted and potential recovery is considered remote. As of September 30, 2017 and December 31, 2016, the Partnership maintained an allowance for doubtful accounts of \$1,060 and \$1,549, respectively.

Table of Contents

HI-CRUSH PARTNERS LP

Notes to Unaudited Condensed Consolidated Financial Statements

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

Deferred Charges

Certain direct costs incurred in connection with debt financing have been capitalized and are being amortized using the straight-line method, which approximates the effective interest method, over the life of the debt. Amortization expense is included in interest expense.

Goodwill

Goodwill represents the excess of purchase price over the fair value of net assets acquired. The Partnership performs an assessment of the recoverability of goodwill during the third quarter of each fiscal year, or more often if events or circumstances indicate the impairment of an asset may exist. Our assessment of goodwill is based on qualitative factors to determine whether the fair value of the reporting unit is more likely than not less than the carrying value. An additional quantitative impairment analysis is completed if the qualitative analysis indicates that the fair value is not substantially in excess of the carrying value. The quantitative analysis determines the fair value of the reporting unit based on the discounted cash flow method and relative market-based approaches. Refer to Note 11 - Impairments and Other Expenses for additional disclosure regarding goodwill.

Equity Method Investments

The Partnership accounts for investments, which it does not control but has the ability to exercise significant influence, using the equity method of accounting. Under this method, the investment is carried originally at cost, increased by any allocated share of the Partnership's net income and contributions made, and decreased by any allocated share of the Partnership's net losses and distributions received. The Partnership's allocated share of income and losses are based on the rights and priorities outlined in the equity investment agreement.

On September 8, 2016, the Partnership entered into an agreement to become a member of Proppant Express Investments, LLC ("PropX"), which was established to develop critical last-mile logistics equipment for the proppant industry. PropX is responsible for manufacturing containers and conveyor systems that allow for transportation of frac sand from in-basin terminals to the well site. As of September 30, 2017, the Partnership's investment basis in PropX was \$14,258, which is accounted for as an equity method investment as the Partnership has a non-controlling interest in PropX, but has the ability to exercise significant influence. During the three months ended September 30, 2017, the Partnership made no capital contributions to PropX and recognized earnings of \$128 from its proportionate share of PropX's operating results during the three month period. During the nine months ended September 30, 2017, the Partnership made capital contributions of \$4,168 to PropX and incurred a loss of \$142 from its proportionate share of PropX's operating results during the nine month period.

Contingent Consideration

Accounting standards require that contingent consideration be recorded at fair value at the date of acquisition and revalued during subsequent reporting dates under the acquisition method of accounting. In connection with its recent acquisitions of Blair and Whitehall and Other Assets from its sponsor, the Partnership has entered into certain contingent consideration arrangements. As such transactions are between entities under common control, any differences between the calculated fair value, and the actual resulting payments in the future will be reflected as an equity adjustment to the deemed distributions associated with the acquisitions.

Revenue Recognition

Frac sand sales revenues are recognized when legal title passes to the customer, which may occur at the production facility, rail origin, terminal or well site. At that point, delivery has occurred, evidence of a contractual arrangement exists and collectability is reasonably assured. Amounts received from customers in advance of sand deliveries are recorded as deferred revenue. Revenue from make-whole provisions in our customer contracts is recognized at the end of the defined cure period when collectability is certain. Customer prepayments in excess of customer obligations remaining on account upon the termination of a contract are recognized as other operating income during the period in which the termination occurs. During the three months ended September 30, 2017, the Partnership recognized \$3,554 related to the termination of a contract, which is included in other operating income on our Condensed Consolidated Statements of Operations.

A substantial portion of our frac sand is sold to customers with whom we have long-term supply agreements, the current terms of which expire between 2018 and 2024. The agreements define, among other commitments, the volume of product that the Partnership must provide, the price that will be charged to the customer, and the volume that the customer must purchase by the end of the defined cure periods, which can range from three months to the end of a contract year.

Transportation services revenues are recognized as the services have been completed, meaning the related services have been rendered. At that point, delivery of service has occurred, evidence of a contractual arrangement exists and collectability is reasonably assured.

Table of Contents

HI-CRUSH PARTNERS LP

Notes to Unaudited Condensed Consolidated Financial Statements

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

Fair Value of Financial Instruments

The amounts reported in the balance sheet as current assets or liabilities, including cash, accounts receivable, accounts payable, accrued and other current liabilities approximate fair value due to the short-term maturities of these instruments. The fair value of the senior secured term loan approximated \$190,068 as of September 30, 2017, based on the market price quoted from external sources, compared with a carrying value of \$193,000. If the senior secured term loan was measured at fair value in the financial statements, it would be classified as Level 2 in the fair value hierarchy.

Net Income per Limited Partner Unit

We have identified the sponsor's incentive distribution rights as participating securities and compute income per unit using the two-class method under which any excess of distributions declared over net income or loss shall be allocated to the partners based on their respective sharing of income specified in the partnership agreement. Net income or loss per unit applicable to limited partners is computed by dividing limited partners' interest in net income or loss, after deducting any sponsor incentive distributions, by the weighted-average number of outstanding limited partner units. As described in Note 1, the Partnership's historical financial information has been recast to combine Blair, Whitehall and Other Assets for all periods presented. The amounts of incremental income or losses recast to periods prior to the Blair Contribution and Whitehall Contribution are excluded from the calculation of net income per limited partner unit.

Income Taxes

The Partnership is a pass-through entity and is not considered a taxable entity for federal tax purposes. Therefore, there is not a provision for income taxes in the accompanying Condensed Consolidated Financial Statements. The Partnership's net income or loss is allocated to its partners in accordance with the partnership agreement. The partners are taxed individually on their share of the Partnership's earnings. At September 30, 2017 and December 31, 2016, the Partnership did not have any liabilities for uncertain tax positions or gross unrecognized tax benefits.

Recent Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update ("ASU") 2014-09, an update that supersedes the most current revenue recognition guidance, as well as some cost recognition guidance. The update requires that an entity recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This update also requires new qualitative and quantitative disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments, information about contract balances and performance obligations, and assets recognized from costs incurred to obtain or fulfill a contract. The authoritative guidance, which may be applied on a full retrospective or modified retrospective basis whereby the entity records a cumulative effect of initially applying this update at the date of initial application, will be effective for the Partnership beginning January 1, 2018. The FASB has also issued the following standards which clarify ASU 2014-09 and have the same effective date as the original standard: ASU 2016-12, Revenue from Contracts with Customers: Narrow-Scope Improvements and Practical Expedients, ASU 2016-10 Revenue from Contracts with Customers: Identifying Performance Obligations and Licensing and ASU 2017-13, Revenue Recognition (Topic 605), Revenue from Contracts with Customers (Topic 606), Leases (Topic 840), and Leases (Topic 842).

The Partnership is currently assessing the potential impacts of the adoption of ASU 2014-09. Although we are still in the process of documenting our assessment of our contracts and the impact to our disclosure requirements, the Partnership does not anticipate a material impact on its revenue recognition practices. The Partnership generates revenue by excavating, processing and delivering frac sand and providing related services and recognizes revenue at the point of delivery to customers, at which point the earnings process is deemed to be complete. We currently intend to adopt ASU 2014-09 using the full retrospective approach.

In February 2016, the FASB issued ASU 2016-02, which will impact all leases with durations greater than twelve months. In general, such arrangements will be recognized as assets and liabilities on the balance sheet of the lessee. Under the new accounting guidance a right-of-use asset and lease obligation will be recorded for all leases, whether operating or financing, while the statement of operations will reflect lease expense for operating leases and amortization/interest expense for financing leases. The balance sheet amount recorded for existing leases at the date of adoption will be calculated using the applicable incremental borrowing rate at the date of adoption. The new accounting guidance is effective for the Partnership beginning in the first quarter of 2019, and should be applied retrospectively. The FASB has also issued the following standard which clarifies ASU 2016-02 and has the same effective date as the original standard: ASU 2017-13, Revenue Recognition (Topic 605), Revenue from Contracts with Customers (Topic 606), Leases (Topic 840), and Leases (Topic 842). The Partnership is currently assessing the impact that adopting this new accounting guidance will have on its Consolidated Financial Statements and footnote disclosures.

HI-CRUSH PARTNERS LP

Notes to Unaudited Condensed Consolidated Financial Statements

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

3. Acquisitions

Asset Acquisition of Permian Basin Sand Reserves

On March 3, 2017, the Partnership completed an acquisition of Permian Basin Sand Company, LLC ("Permian Basin Sand") for total consideration of \$200,000 in cash and 3,438,789 newly issued common units to the sellers, valued at \$62,242 based on the closing price as of March 3, 2017. Permian Basin Sand owns a 1,226-acre frac sand reserve strategically positioned in the Permian Basin, located within 75 miles of significant Delaware and Midland Basin activity.

The acquisition of Permian Basin Sand was accounted for as an asset acquisition as the acquired assets did not constitute a business. The total purchase consideration of \$263,072 is reflected as property, plant and equipment on the Condensed Consolidated Balance Sheet. The following table summarizes the total purchase consideration:

Cash paid to sellers	\$200,000
Issuance of common units to sellers	62,242
Transactions costs associated with the acquisition	830
Cost of Permian Basin Sand acquisition	\$263,072

Acquisition of Hi-Crush Whitehall LLC and Other Assets

On February 23, 2017, the Partnership entered into a contribution agreement with our sponsor to acquire all of the outstanding membership interests in Whitehall and Other Assets, for \$140,000 in cash and up to \$65,000 of contingent consideration over a two-year period. The Partnership completed this acquisition on March 15, 2017. In connection with this acquisition, the Partnership incurred \$588 of acquisition related costs during the nine months ended September 30, 2017, included in general and administrative expenses.

The contingent consideration is based on the Partnership's adjusted earnings before interest, taxes, depreciation and amortization ("Adjusted EBITDA") exceeding certain thresholds for each of the fiscal years ending December 31, 2017 and 2018. If those annual thresholds are met, the Partnership will pay an additional \$20,000 for each threshold met or exceeded. If the Partnership exceeds a total threshold for the cumulative two-year period, then it will pay an additional \$25,000, for an undiscounted total of up to \$65,000 to be paid in cash or common units at the Partnership's discretion. As of March 15, 2017, the estimated fair value of the contingent consideration liability based on available information was \$14,000, as reflected in other liabilities on our Condensed Consolidated Balance Sheet. Refer to Note 7 - Commitments and Contingencies for additional disclosure regarding the contingent consideration.

As a result of this transaction, the Partnership's historical financial information has been recast to combine the Consolidated Statements of Operations and the Consolidated Balance Sheets of the Partnership with those of Whitehall and Other Assets as if the combination had been in effect since inception of common control on August 16, 2012. Any material transactions between the Partnership, Whitehall and Other Assets have been eliminated. The balance of non-controlling interest as of December 31, 2016 includes the sponsor's interest in Whitehall and Other Assets prior to the combination. Except for the combination of the Consolidated Statements of Operations and the respective allocation of recast net income (loss), capital transactions between the sponsor and Whitehall and Other Assets prior to March 15, 2017 have not been allocated on a recast basis to the Partnership's unitholders. Such transactions are presented within the non-controlling interest column in the Consolidated Statement of Partners' Capital as the Partnership and its unitholders would not have participated in these transactions.

Table of Contents

HI-CRUSH PARTNERS LP

Notes to Unaudited Condensed Consolidated Financial Statements

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

The following table summarizes the carrying value of the Whitehall and Other Assets net assets as of March 15, 2017, and the allocation of the purchase price:

Net assets of Hi-Crush Whitehall LLC and Other Assets as of March 15, 2017:

Cash	\$ 198
Inventories	4,941
Prepaid expenses and other current assets	3
Property, plant and equipment	124,811
Accounts payable	(938)
Accrued liabilities and other current liabilities	(386)
Due to Hi-Crush Partners LP	(2,615)
Asset retirement obligation	(1,716)
Total carrying value of Whitehall and Other Assets net assets	\$ 124,298

Allocation of purchase price

Carrying value of sponsor's non-controlling interest prior to Whitehall Contribution	\$ 119,108
Excess purchase price over the acquired interest (a)	34,892
Cost of Whitehall and Other Assets acquisition	\$ 154,000

(a) The deemed distribution attributable to the purchase price was allocated to the common unitholders and excludes the \$14,000 estimated fair value of contingent consideration payable in the future.

Acquisition of Hi-Crush Blair LLC

On August 9, 2016, the Partnership entered into a contribution agreement with our sponsor to acquire all of the outstanding membership interests in Blair, the entity that owned our sponsor's Blair facility, for \$75,000 in cash, 7,053,292 of newly issued common units in the Partnership, and payment of up to \$10,000 of contingent consideration (the "Blair Contribution"). The Partnership completed the acquisition of the Blair facility on August 31, 2016. In connection with this acquisition, the Partnership incurred \$850 of acquisition related costs during the year ended December 31, 2016.

The contingent consideration is based on the Partnership's adjusted earnings before interest, taxes, depreciation and amortization ("Adjusted EBITDA") exceeding certain thresholds for each of the fiscal years ending December 31, 2017 and 2018. If the Partnership exceeds either or both of the respective thresholds, then it will pay an additional \$5,000 for each threshold met or exceeded, for an undiscounted total of up to \$10,000. As of August 31, 2016, the estimated fair value of the contingent consideration liability based on available information was \$5,000, as reflected in other liabilities on our Condensed Consolidated Balance Sheet. Refer to Note 7 - Commitments and Contingencies for additional disclosure regarding the contingent consideration.

As a result of this transaction, the Partnership's historical financial information has been recast to combine the Condensed Consolidated Statements of Operations and the Condensed Consolidated Balance Sheets of the Partnership with those of Blair as if the combination had been in effect since inception of common control on July 31, 2014. Any material transactions between the Partnership and Blair have been eliminated. Except for the combination of the Condensed Consolidated Statements of Operations and the respective allocation of recast net income (loss), capital transactions between the sponsor and Blair prior to August 31, 2016 have not been allocated on a recast basis to the Partnership's unitholders. Such transactions were allocated to non-controlling interest as the Partnership and its unitholders would not have participated in these transactions.

Total debt	193,230	196,420
Less: current portion of long-term debt	(3,137)	(2,962)
Long-term debt	\$ 190,093	\$ 193,458

Revolving Credit Agreement

On April 28, 2014, the Partnership entered into an amended and restated credit agreement (the "Revolving Credit Agreement"), which matures on April 28, 2019. On April 28, 2016, the Partnership entered into a third amendment (the "Third Amendment"). On August 31, 2016, the Partnership entered into a fourth amendment to the Revolving Credit Agreement, which allowed for the Blair Contribution. On March 3, 2017, the Partnership entered into a fifth amendment to the Revolving Credit Agreement, which allowed for the Whitehall Contribution and the acquisition of Permian Basin Sand. On October 12, 2017, the Partnership entered into a sixth amendment to the Revolving Credit Agreement, which allows the Partnership for repurchases of common units up to \$20,000 (see Note 13 - Subsequent Events). As of September 30, 2017, the Revolving Credit Agreement, as amended, is a senior secured revolving credit facility that permits aggregate borrowings of up to \$75,000, including a \$25,000 sublimit for letters of credit and a \$10,000 sublimit for swing line loans. The outstanding balance under the Revolving Credit Agreement was paid in full during the second quarter of 2016.

As of September 30, 2017, we had \$58,234 of undrawn borrowing capacity (\$75,000, net of \$16,766 letter of credit commitments) and no indebtedness under our Revolving Credit Agreement.

Borrowings under the Revolving Credit Agreement, as amended, bear interest at a rate equal to, at the Partnership's option, either (1) a base rate plus an applicable margin ranging between 1.25% per annum and 2.50% per annum, based upon the Partnership's leverage ratio, or (2) a Eurodollar rate plus an applicable margin ranging between 2.25% per annum and 3.50% per annum, based upon the Partnership's leverage ratio.

The Revolving Credit Agreement contains customary representations and warranties and customary affirmative and negative covenants, including limits or restrictions on the Partnership's ability to incur liens, incur indebtedness, make certain restricted payments, merge or consolidate, and dispose of assets. The Revolving Credit Agreement also requires compliance with customary financial covenants, which is a maximum leverage ratio of 4.5x for the six months ending September 30, 2017 annualized, 4.0x for the nine months ending December 31, 2017 annualized, and 3.5x for the twelve months ending March 31, 2018 and thereafter, and a minimum interest coverage ratio, as defined, of 2.5x for each fiscal quarter ending on or after June 30, 2017.

We are in compliance with the covenants contained in the Revolving Credit Agreement. Our ability to comply with such covenants in the future, and access our undrawn borrowing capacity under our Revolving Credit Agreement, is dependent primarily on achieving certain levels of EBITDA, as defined.

The Third Amendment also provides for an "equity cure" that can be applied to EBITDA covenant ratios for 2017 and all future periods. On January 4, 2017, the Partnership entered into an equity distribution program with certain financial institutions (each, a "Manager") under which we may sell, from time to time, through or to the Managers, common units representing limited partner interests in the Partnership up to an aggregate gross sales price of \$50,000 (see Note 8 - Equity).

The Revolving Credit Agreement contains customary events of default (some of which are subject to applicable grace or cure periods), including among other things, non-payment defaults, covenant defaults, cross-defaults to other material indebtedness, bankruptcy and insolvency defaults, and material judgment defaults. Such events of default could entitle the lenders to cause any or all of the Partnership's indebtedness under the Revolving Credit Agreement to become immediately due and payable. If such a default were to occur, and resulted in a cross default of the Term Loan Credit Agreement, as described below, all of our outstanding debt obligations could be accelerated which would have a material adverse impact on the Partnership.

Table of Contents

HI-CRUSH PARTNERS LP

Notes to Unaudited Condensed Consolidated Financial Statements

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

The Revolving Credit Agreement is secured by substantially all assets of the Partnership. In addition, the Partnership's subsidiaries have guaranteed the Partnership's obligations under the Revolving Credit Agreement and have granted to the revolving lenders security interests in substantially all of their respective assets.

Term Loan Credit Facility

On April 28, 2014, the Partnership entered into a credit agreement (the "Term Loan Credit Agreement") providing for a senior secured term loan credit facility (the "Term Loan Credit Facility") that permits aggregate borrowings of up to \$200,000, which has been fully drawn on April 28, 2014. The Term Loan Credit Agreement permits the Partnership, at its option, to add one or more incremental term loan facilities in an aggregate amount not to exceed \$100,000. Any incremental term loan facility would be on terms to be agreed among the Partnership, the administrative agent and the lenders who agree to participate in the incremental facility. The maturity date of the Term Loan Credit Facility is April 28, 2021.

The Term Loan Credit Agreement is secured by substantially all assets of the Partnership. In addition, the Partnership's subsidiaries have guaranteed the Partnership's obligations under the Term Loan Credit Agreement and have granted to the lenders security interests in substantially all of their respective assets.

Borrowings under the Term Loan Credit Agreement bear interest at a rate equal to, at the Partnership's option, either (1) a base rate plus an applicable margin of 2.75% per annum or (2) a Eurodollar rate plus an applicable margin of 3.75% per annum, subject to a LIBOR floor of 1.00%.

The Term Loan Credit Agreement contains customary representations and warranties and customary affirmative and negative covenants, including limits or restrictions on the Partnership's ability to incur liens, incur indebtedness, make certain restricted payments, merge or consolidate and dispose of assets. In addition, it contains customary events of default that entitle the lenders to cause any or all of the Partnership's indebtedness under the Term Loan Credit Agreement to become immediately due and payable. The events of default (some of which are subject to applicable grace or cure periods), include, among other things, non-payment defaults, covenant defaults, cross-defaults to other material indebtedness, bankruptcy and insolvency defaults and material judgment defaults. As of September 30, 2017, we were in compliance with the terms of the agreement.

As of September 30, 2017, we had \$189,039 indebtedness (\$193,000, net of \$1,035 of discounts and \$2,926 of debt issuance costs) under our Term Loan Credit Facility, which carried an interest rate of 5.05%.

Other Notes Payable

On October 24, 2014, the Partnership entered into a purchase and sales agreement to acquire land and underlying frac sand deposits. During each of the years ended December 31, 2016, 2015 and 2014, the Partnership paid cash consideration of \$2,500, and issued a three-year promissory note in the amount of \$3,676, respectively, in connection with this agreement. The promissory notes accrue interest at rates equal to the applicable short-term federal rates. All principal and accrued interest is due and payable at the end of the respective three-year promissory note terms in December 2019, December 2018 and October 2017. However, the promissory notes are prepaid on a quarterly basis during the three-year terms as sand is extracted, delivered, sold and paid for from the properties.

The Partnership made prepayments of \$1,032 and \$917 during the three months ended September 30, 2017 and 2016, respectively, and \$2,514 and \$2,851 during the nine months ended September 30, 2017 and 2016, respectively, based on the accumulated volume of sand extracted, delivered, sold and paid for. In October 2017, the Partnership made a prepayment of \$1,137 based on the volume of sand extracted, delivered, sold and paid for through the third quarter of 2017. As of September 30, 2017, the Partnership had repaid in full the promissory note due in October 2017 and had \$4,191 outstanding on its remaining promissory notes, which carry interest rates ranging from 0.56% to 0.74%.

7. Commitments and Contingencies

Customer Contracts

The Partnership enters into sales contracts with customers. These contracts establish minimum annual sand volumes that the Partnership is required to make available to such customers under initial terms ranging from three to seven

years. Through September 30, 2017, no payments for non-delivery of minimum annual sand volumes have been made by the Partnership to customers under these contracts.

Table of Contents

HI-CRUSH PARTNERS LP

Notes to Unaudited Condensed Consolidated Financial Statements

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

Supplier Contracts

D & I Silica, LLC ("D&I") has entered into a long-term supply agreement with a supplier (the "Sand Supply Agreement"), which includes a requirement to purchase certain volumes and grades of sands at specified prices. The quantities set forth in such agreement are not in excess of our current requirements.

Royalty Agreements

The Partnership has entered into royalty agreements under which it is committed to pay royalties on sand sold from its production facilities for which the Partnership has received payment by the customer. Royalty expense is recorded as the sand is sold and is included in costs of goods sold. Royalty expense was \$5,447 and \$2,011 for the three months ended September 30, 2017 and 2016, respectively, and \$13,085 and \$4,235 for the nine months ended September 30, 2017 and 2016, respectively.

Certain acreage is subject to a minimum annual royalty payment. If not paid within 30 days after the annual period, the original landowner has the right to purchase the property for one dollar, subject to certain terms. If we have not made the minimum required royalty payments, we may satisfy our obligation by making a lump-sum cash make-whole payment. Accordingly, we believe there is no material risk that we will be required to sell back the subject property pursuant to this agreement.

During the year ended December 31, 2016, the Partnership entered into an agreement to terminate certain existing royalty obligations for \$6,750, of which \$3,375 was paid during each of September 2017 and 2016. As a result of this agreement, the Partnership reduced its ongoing future royalty payments to the applicable counterparties for each ton of frac sand that is excavated, processed and sold to the Partnership's customers. As part of this transaction, we recorded an asset of \$6,750, as reflected in property, plant and equipment on the Condensed Consolidated Balance Sheet.

Property Value Guarantees

The Partnership entered into mining agreements and land use agreements with the Wisconsin municipalities of Bridge Creek, Lincoln, Springfield and Preston that contain property value guarantees ("PVG") for certain property owners in proximity to each mine. The respective PVGs establish a process whereby we guaranty fair market value to the owners of residential property specifically identified within the body of the PVG document. According to the terms of the PVGs, the property owner must notify us in the event they wish to sell the subject residence and additional acreage in certain instances. Upon such notice, the PVGs establish a process by which an appraisal is conducted and the subject property is appraised to establish fair market value and is listed with a real estate broker. In the event the property is sold within 180 days of listing, we agree to pay the owner any shortfall between the sales price and the established fair market value. In the event the property is not sold within the 180 day time frame, we are obligated to purchase the property for fair market value.

As of September 30, 2017, we have not accrued a liability related to the PVGs because it is not possible to estimate how many of the owners will elect to avail themselves of the provisions of the PVGs and it cannot be determined if shortfalls will exist in the event of a sale nor can the value of the subject property be ascertained until appraised. As of September 30, 2017, the Partnership has paid \$2,188 under these guarantees.

Lease Obligations

The Partnership has long-term leases for railcars, equipment and certain of its terminals. In the fourth quarter of 2016, the Partnership began leasing from PropX equipment manufactured and owned by PropX.

We have entered into service agreements with certain transload service providers which requires us to purchase minimum amounts of services over specific periods of time at specific locations. Our failure to purchase the minimum level of services would require us to pay shortfall fees. However, the minimum quantities set forth in the agreements are not in excess of our current forecasted requirements at these locations.

Table of Contents

HI-CRUSH PARTNERS LP

Notes to Unaudited Condensed Consolidated Financial Statements

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

As of September 30, 2017, future minimum operating lease payments and minimum purchase commitments are as follows:

Fiscal Year	Operating Leases	Minimum Purchase Commitments
2017 (three months)	\$7,292	\$ 1,509
2018	31,924	5,207
2019	31,783	2,616
2020	29,020	2,296
2021	22,557	2,296
Thereafter	34,313	4,167
	\$156,889	\$ 18,091

In addition, the Partnership has placed orders for additional leased railcars. Such long-term operating leases commence upon the future delivery of 700 railcars, which are scheduled to be delivered during the first half of 2018.

Equity Method Investments

On September 8, 2016, the Partnership committed to investing up to \$17,400 in PropX over the next year to 18 months for use in the manufacturing of containers and conveyor systems, among other things. As of September 30, 2017, the Partnership has funded \$14,400 of its commitment to PropX, of which \$4,168 was funded during the nine months ended September 30, 2017.

Contingent Consideration

As described in Note 3 - Acquisitions, the Partnership may pay the sponsor up to \$10,000 and \$65,000 of contingent consideration related to the Blair Contribution and the Whitehall Contribution, respectively. The payments are based on achievement of certain levels of Adjusted EBITDA in 2017 and 2018. Achievement of these threshold levels of Adjusted EBITDA, as defined in each of the contribution agreements, will be dependent on the quantity of volumes sold and related prices, which are forecasted at levels above current market prices. The Partnership's ability to meet such thresholds will be affected by events and circumstances beyond its control. If market or other economic conditions remain the same or deteriorate, the thresholds may not be met. If the thresholds are not attained during each of the contingency periods, no payment will be owed to the sponsor. A 10% increase or decrease in the achievement of Adjusted EBITDA versus current forecasts for the measurement periods could result in a range of potential payments under these arrangements which could differ from the current estimated fair value of the liabilities based on our current forecasts. The following table outlines the original fair value reflected as the carrying value in the financial statements, the range of minimum and maximum undiscounted payments, and a sensitivity calculation of the current estimated fair value and sensitivities based on achieving Adjusted EBITDA levels 10% above or below the Partnership's current forecasted results as of September 30, 2017. Based on the significant estimates and assumptions included in the analysis, actual results could differ from these estimates.

Transaction	Carrying Value of Liability	Undiscounted Payments		Sensitivity Analysis	
		Minimum	Maximum	Current Estimated Fair Value	+10% Adjusted EBITDA
Blair Contribution	\$ 5,000	\$ —	\$ 10,000	\$ 6,990	\$ 6,990
Whitehall Contribution	\$ 14,000	\$ —	\$ 65,000	\$ 38,908	\$ 38,908

Litigation

From time to time the Partnership may be subject to various claims and legal proceedings which arise in the normal course of business. Management is not aware of any legal matters that are likely to have a material adverse effect on

the Partnership's financial position, results of operations or cash flows.

8. Equity

During the second quarter of 2017, our sponsor distributed its 20,693,643 common units in the Partnership to its members. As of September 30, 2017, our management team, together with our board of directors have a 10% direct ownership interest in our limited partnership units. In addition, our sponsor is the owner of our General Partner.

17

Table of Contents

HI-CRUSH PARTNERS LP

Notes to Unaudited Condensed Consolidated Financial Statements

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

During the nine months ended September 30, 2017, the Partnership completed a public offering for a total of 23,575,000 common units, representing limited partnership interests in the Partnership for aggregate net proceeds of approximately \$412,577. The net proceeds from these offerings were used to fund the cash portion of the Whitehall Contribution, the cash portion of the Permian Basin Sand asset acquisition and for general partnership purposes. In addition, the Partnership issued 3,438,789 common units as additional consideration for the Permian Basin Sand asset acquisition on March 3, 2017.

During the nine months ended September 30, 2016, the Partnership completed three public offerings for a total of 19,550,000 common units, representing limited partnership interests in the Partnership for aggregate net proceeds of approximately \$189,015. The net proceeds from these offerings were used to pay off the outstanding balance under the Partnership's Revolving Credit Agreement, to fund the Blair Contribution and for general partnership purposes.

Equity Distribution Agreement

On January 4, 2017, the Partnership entered into an equity distribution program with certain financial institutions (each, a "Manager") under which we may sell, from time to time, through or to the Managers, common units representing limited partner interests in the Partnership up to an aggregate gross sales price of \$50,000. The Partnership did not issue any common units under this equity distribution program through the date of this filing.

Incentive Distribution Rights

Incentive distribution rights represent the right to receive increasing percentages (ranging from 15.0% to 50.0%) of quarterly distributions from operating surplus after minimum quarterly distribution and target distribution levels exceed \$0.54625 per unit per quarter. Our sponsor currently holds the incentive distribution rights, but it may transfer these rights at any time.

Allocations of Net Income

Our partnership agreement contains provisions for the allocation of net income and loss to the unitholders and our General Partner. For purposes of maintaining partner capital accounts, the partnership agreement specifies that items of income and loss shall be allocated among the partners in accordance with their respective percentage ownership interest. Normal allocations according to percentage interests are made after giving effect, if any, to priority income allocations in an amount equal to incentive cash distributions allocated 100% to our sponsor.

During the three and nine months ended September 30, 2017 and 2016, no income was allocated to our holders of incentive distribution rights.

Distributions

Our partnership agreement sets forth the calculation to be used to determine the amount of cash distributions that our limited partner unitholders and our holders of incentive distribution rights will receive.

On October 16, 2017, our General Partner's board of directors declared a cash distribution for the third quarter of 2017 totaling \$13,655, or \$0.15 per common unit. This distribution will be paid on November 14, 2017 to unitholders of record on October 31, 2017. No distributions were declared for our holders of incentive distribution rights.

Net Income per Limited Partner Unit

The following table outlines our basic and diluted, weighted average limited partner units outstanding during the relevant periods:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2017	2016	2017	2016
Basic common units outstanding	91,030,558	55,095,464	85,277,011	44,832,652
Potentially dilutive common units	997,066	—	997,066	—
Diluted common units outstanding	92,027,624	55,095,464	86,274,077	44,832,652

For purposes of calculating the Partnership's earnings per unit under the two-class method, common units are treated as participating preferred units. Incentive distribution rights are treated as participating securities.

Table of Contents

HI-CRUSH PARTNERS LP

Notes to Unaudited Condensed Consolidated Financial Statements

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

Diluted earnings per unit excludes any dilutive awards granted (see Note 9 - Unit-Based Compensation) if their effect is anti-dilutive. Diluted earnings per unit for the three and nine months ended September 30, 2017, includes the dilutive effect of all 997,066 phantom units, respectively, granted and outstanding at the assumed number of units which would have vested if the performance period had ended on September 30, 2017. During the three and nine months ended September 30, 2016, the Partnership incurred a net loss and, as a result, all 627,900 phantom units, respectively, of potentially dilutive awards granted and outstanding were excluded from the diluted earnings per unit calculation.

Distributions made in future periods based on the current period calculation of cash available for distribution are allocated to each class of equity that will receive such distributions.

Each period, the Partnership determines the amount of cash available for distributions in accordance with the partnership agreement. The amount to be distributed to limited partner unitholders and incentive distribution rights holders is subject to the distribution waterfall in the partnership agreement. Net earnings or loss for the period are allocated to each class of partnership interest based on the distributions to be made.

As described in Note 1, the Partnership's historical financial information has been recast to combine Blair, Whitehall and Other Assets for all periods presented. The amounts of incremental income or losses recast to periods prior to the Blair Contribution and Whitehall Contribution are excluded from the calculation of net income per limited partner unit.

The following tables provide a reconciliation of net income (loss) and the assumed allocation of net income (loss) under the two-class method for purposes of computing net income (loss) per limited partner unit for the three and nine months ended September 30, 2017 and 2016 (in thousands, except per unit amounts):

	Three Months Ended September 30, 2017	
	General Limited Partner and Units IDRs	Total
Declared distribution	\$-13,655	\$13,655
Assumed allocation of earnings in excess of distributions	—16,152	16,152
Assumed allocation of net income	\$-29,807	\$29,807
Earnings per limited partner unit - basic	\$0.33	
Earnings per limited partner unit - diluted	\$0.32	
	Three Months Ended September 30, 2016	
	General Limited Partner and Units IDRs	Total
Declared distribution	\$-0	\$0
Assumed allocation of distributions in excess of loss	—(11,734)	(11,734)
Add back recast income attributable to Blair through August 31, 2016	—(962)	(962)
Add back recast losses attributable to Whitehall and Other Assets	—992	992
Assumed allocation of net loss	\$-(11,704)	\$(11,704)
Loss per limited partner unit - basic	\$(0.21)	

Loss per limited partner unit - diluted \$(0.21)

Recast Equity Transactions

On March 15, 2017, in connection with the closing of the Whitehall Contribution, \$116,417 of sponsor advances were converted to capital, as reflected in the non-controlling interest section of the Condensed Consolidated Statement of Partners' Capital.

During the nine months ended September 30, 2016, the sponsor paid \$1,652 of expenses on behalf of Blair. Such transactions were recognized within non-controlling interest of the Condensed Consolidated Statement of Partners' Capital.

9. Unit-Based Compensation

Long-Term Incentive Plan

On August 21, 2012, Hi-Crush GP adopted the Hi-Crush Partners LP Long Term Incentive Plan (the "Plan") for employees, consultants and directors of Hi-Crush GP and those of its affiliates, including our sponsor, who perform services for the Partnership. The Plan consists of restricted units, unit options, phantom units, unit payments, unit appreciation rights, other equity-based awards, distribution equivalent rights and performance awards. The Plan limited the number of common units that may be issued pursuant to awards under the Plan to 1,364,035 units. The first amendment and restatement of the Plan was approved by our common unitholders and the number of common units under the Plan increased by an additional 2,700,000 common units effective as of September 21, 2016. After giving effect to the first amendment and restatement of the Plan, to the extent that an award is forfeited, cancelled, exercised, settled in cash, or otherwise terminates or expires without the actual delivery of common units pursuant to such

awards, the common units subject to the award will again be available for new awards granted under the Plan; provided, however, that any common units withheld to cover a tax withholding obligation will not again be available for new awards under the Plan. The Plan is administered by Hi-Crush GP's board of directors or a committee thereof. The cost of services received in exchange for an award of equity instruments is measured based on the grant-date fair value of the award and that cost is generally recognized over the vesting period of the award.

Table of Contents

HI-CRUSH PARTNERS LP

Notes to Unaudited Condensed Consolidated Financial Statements

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

Performance Phantom Units - Equity Settled

The Partnership has awarded Performance Phantom Units ("PPUs") pursuant to the Plan to certain employees. The number of PPUs that will vest will range from 0% to 200% of the number of initially granted PPUs and is dependent on the Partnership's total unitholder return over a three-year performance period compared to the total unitholder return of a designated peer group. Each PPU represents the right to receive, upon vesting, one common unit representing limited partner interests in the Partnership. The PPUs are also entitled to forfeitable distribution equivalent rights ("DERs"), which accumulate during the performance period and are paid in cash on the date of settlement. The fair value of each PPU is estimated using a fair value approach and is amortized into compensation expense, reduced for an estimate of expected forfeitures, over the period of service corresponding with the vesting period. Expected volatility is based on the historical market performance of our peer group. The following table presents information relative to our PPUs.

	Units	Grant Date Weighted-Average Fair Value per Unit
Outstanding at December 31, 2016	201,521	\$ 29.03
Forfeited	(39,399)	\$ 52.53
Outstanding at September 30, 2017	162,122	\$ 23.32

As of September 30, 2017, total compensation expense not yet recognized related to unvested PPUs was \$1,141, with a weighted average remaining service period of 0.9 years.

Time-Based Phantom Units - Equity Settled

The Partnership has awarded Time-Based Phantom Units ("TPUs") pursuant to the Plan to certain employees which automatically vest if the employee remains employed at the end of the vesting period. The vesting period is a cliff or graded vesting, generally ranging over a three-year period. Each TPU represents the right to receive, upon vesting, one common unit representing limited partner interests in the Partnership. The TPUs are also entitled to forfeitable DERs, which accumulate during the vesting period and are paid in cash on the date of settlement. The fair value of each TPU is calculated based on the grant-date unit price and is amortized into compensation expense, reduced for an estimate of expected forfeitures, over the period of service corresponding with the vesting period. The following table presents information relative to our TPUs.

	Units	Grant Date Weighted-Average Fair Value per Unit
Outstanding at December 31, 2016	378,260	\$ 16.40
Vested	(19,436)	\$ 32.33
Granted	495,163	\$ 8.47
Forfeited	(19,043)	\$ 20.32
Outstanding at September 30, 2017	834,944	\$ 11.23

As of September 30, 2017, total compensation expense not yet recognized related to unvested TPUs was \$6,424, with a weighted average remaining service period of 2.3 years.

Board Unit Grants

The Partnership issued 29,148 and 103,377 common units to certain of its directors during the nine months ended September 30, 2017 and 2016, respectively.

Table of Contents

HI-CRUSH PARTNERS LP

Notes to Unaudited Condensed Consolidated Financial Statements

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

Unit Purchase Programs

The Partnership has unit purchase programs ("UPP") offered under the Plan. The UPPs provide participating employees and members of our board of directors the opportunity to purchase common units representing limited partner interests of the Partnership at a discount. Non-director employees contribute through payroll deductions of the employee's eligible compensation during the applicable offering period. Directors contribute through cash contributions. If the closing price of the Partnership's common units on the purchase date is greater than or equal to the discount applied to the closing market price of our common units on a participant's applicable election date (the "Election Price"), then the participant will receive a number of common units equal to the amount of accumulated payroll deductions or cash contributions, as applicable (the "Contribution"), divided by the Election Price, capped at a specified number of common units. If the purchase date price is less than the Election Price, then the participant's Contribution will be returned to the participant. On the date of election, the Partnership calculates the fair value of the discount, which is recognized as unit compensation expense on a straight-line basis during the period from election date through the date of purchase.

The offering period under the Partnership's UPP adopted in 2015 (the "2015 UPP") ended on February 28, 2017 with a 10% discount of the fair value of our common units on the applicable election date. The participants under the 2015 UPP purchased 300,090 common units at an average price of \$5.49 on February 28, 2017.

On September 14, 2017, our General Partner's board of directors approved the termination of the Partnership's UPP that was adopted in March of 2017 (the "2017 UPP") and approved the adoption of the Second 2017 Unit Purchase Program (the "Second 2017 UPP"). On September 14, 2017, the offering period under the Second 2017 UPP commenced, with a 15% discount of the fair value of our common units on the applicable election date and a purchase date of November 15, 2018. With respect to any eligible individuals electing to participate in the Second 2017 UPP who were also participating in the 2017 UPP, any contributions that were made to the 2017 UPP and not withdrawn by a participant before September 14, 2017 were applied to the Second 2017 UPP.

Based on the current elected contributions, the participants will have the right to purchase an aggregate of approximately 338,000 common units. As of September 30, 2017, total accumulated contributions of \$438 from directors under the Second 2017 UPP is maintained within the accrued and other current liabilities line item on our Condensed Consolidated Balance Sheet.

Compensation Expense

The following table presents total unit-based compensation expense:

	Three Months Ended September 30, 2017		Nine Months Ended September 30, 2016	
Performance Phantom Units	\$373	\$647	\$1,121	\$1,811
Time-Based Phantom Units	714	352	1,993	732
Director and other unit grants	124	117	375	356
Unit Purchase Programs	298	39	417	116
Total compensation expense	\$1,509	\$1,155	\$3,906	\$3,015

10. Related Party Transactions

Effective August 16, 2012, our sponsor entered into a services agreement (the "Services Agreement") with our General Partner, Hi-Crush Services LLC ("Hi-Crush Services") and the Partnership, pursuant to which Hi-Crush Services provides certain management and administrative services to the Partnership to assist in operating the Partnership's business. Under the Services Agreement, the Partnership reimburses Hi-Crush Services and its affiliates, on a monthly basis, for the allocable expenses it incurs in its performance under the Services Agreement. These expenses include, among other things, administrative, rent and other expenses for individuals and entities that perform

services for the Partnership. Hi-Crush Services and its affiliates will not be liable to the Partnership for its performance of services under the Services Agreement, except for liabilities resulting from gross negligence. During the three months ended September 30, 2017 and 2016, the Partnership incurred \$1,375 and \$1,423, respectively, of management and administrative service expenses from Hi-Crush Services. During the nine months ended September 30, 2017 and 2016, the Partnership incurred \$3,968 and \$3,814, respectively, of management and administrative service expenses from Hi-Crush Services.

Table of Contents

HI-CRUSH PARTNERS LP

Notes to Unaudited Condensed Consolidated Financial Statements

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

In the normal course of business, our sponsor and its affiliates, including Hi-Crush Services, and the Partnership may from time to time make payments on behalf of each other.

As of September 30, 2017, an outstanding balance of \$11,546 payable to our sponsor is maintained as a current liability under the caption "Due to sponsor".

On September 8, 2016, the Partnership entered into an agreement to become a member of PropX, which is accounted for as an equity method investment. As of September 30, 2017 and December 31, 2016, the Partnership purchased \$5,679 and \$1,566, respectively, of equipment from PropX, which is reflected in property, plant and equipment. As of September 30, 2017 and December 31, 2016, the Partnership had accounts payable of \$1,472 and \$1,553, respectively, to PropX, which is reflected in accounts payable on our Condensed Consolidated Balance Sheet. In addition to equipment purchases, during the three and nine months ended September 30, 2017, we incurred \$539 and \$1,205, respectively, of lease expense for the use of PropX equipment, which is reflected in cost of goods sold.

During the three and nine months ended September 30, 2017 and 2016, the Partnership engaged in multiple construction projects and purchased equipment, machinery and component parts from various vendors that were represented by Alston Environmental Company, Inc. or Alston Equipment Company ("Alston Companies"), which regularly represent vendors in such transactions. The vendors in question paid a commission to the Alston Companies in an amount that is unknown to the Partnership. The sister of Mr. Alston, who is a director of our General Partner, has an ownership interest in the Alston Companies. The Partnership has not paid any sum directly to the Alston Companies and Mr. Alston has represented to the Partnership that he received no compensation from the Alston Companies related to these transactions.

11. Impairments and Other Expenses

Our goodwill arose from the acquisition of D&I in 2013 and is therefore allocated to the D&I reporting unit. During the three months ended March 31, 2016, volumes sold through the D&I reporting unit declined below previously forecasted levels and pricing deteriorated. Our customers faced uncertainty related to activity levels and reduced their active frac crews, resulting in declines in well completion activity and industry demand for frac sand. Therefore, as of March 31, 2016, we determined that the state of market conditions and activity levels indicated that an impairment of goodwill may exist. As a result, we assessed qualitative factors and determined that we could not conclude it was more likely than not that the fair value of goodwill exceeded its carrying value. In turn, we prepared a quantitative analysis of the fair value of the goodwill as of March 31, 2016, based on the weighted average valuation across several income and market based valuation approaches. The underlying results of the valuation were driven by our actual results during the three months ended March 31, 2016 and the pricing, costs structures and market conditions existing as of March 31, 2016, which were below our forecasts at the time of the previous goodwill assessments. Other key estimates, assumptions and inputs used in the valuation included long-term growth rates, discount rates, terminal values, valuation multiples and relative valuations when comparing the reporting unit to similar businesses or asset bases. Upon completion of the Step 1 and Step 2 valuation exercises, it was determined that an impairment loss of all goodwill was incurred, which was equal to the difference between the carrying value and estimated fair value of goodwill. During the nine months ended September 30, 2016, the Partnership recognized a \$33,745 impairment loss of all goodwill.

We recognized impairments and other expenses as outlined in the following table:

	Three Months Ended September 30, 2017		Nine Months Ended September 30, 2016	
Impairment of Goodwill	\$—	\$—	\$—	\$33,745

Edgar Filing: Hi-Crush Partners LP - Form 10-Q

Severance, retention and relocation	—	148	—	253
Exploration expenses	—	—	143	—
Expiration of exclusivity agreement	200	—	200	—
Impairments and other expenses	\$200	\$148	\$343	\$33,998

23

(Dollars in thousands, except per ton and per unit amounts, or where otherwise noted)

12. Segment Reporting

The Partnership manages, operates and owns assets utilized to supply frac sand to its customers. It conducts operations through its one operating segment titled "Frac Sand Sales". This reporting segment of the Partnership is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance.

13. Subsequent Events

On October 12, 2017, the Partnership entered into a sixth amendment to the Revolving Credit Agreement, which allows the Partnership for repurchases of common units up to \$20,000.

On October 16, 2017, our General Partner's board of directors declared a cash distribution for the third quarter of 2017 totaling \$13,655, or \$0.15 per common unit. This distribution will be paid on November 14, 2017 to unitholders of record on October 31, 2017. No distributions were declared for our holders of incentive distribution rights.

On October 17, 2017, the Partnership announced that the General Partner's board of directors approved a unit buyback program of up to \$100,000. The Partnership will seek consent under the Revolving Credit Agreement and Term Loan Credit Agreement allowing for the authorized amount of up to \$100,000. The repurchase program does not obligate the Partnership to repurchase any specific dollar amount or number of units and may be suspended, modified or discontinued by the board of directors at any time, in its sole discretion and without notice.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion of our historical performance, financial condition and future prospects in conjunction with our unaudited condensed financial statements and accompanying notes in "Item 1. Financial Statements" contained herein and our audited financial statements as of December 31, 2016, included in our Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 21, 2017, as amended by the Partnership's Current Report on Form 8-K filed with the SEC on May 1, 2017. The information provided below supplements, but does not form part of, our unaudited condensed financial statements. This discussion contains forward-looking statements that are based on the views and beliefs of our management, as well as assumptions and estimates made by our management. Actual results could differ materially from such forward-looking statements as a result of various risk factors, including those that may not be in the control of management. See "Forward-Looking Statements" in this Quarterly Report on Form 10-Q. All amounts are presented in thousands except tonnage, acreage or per unit data, or where otherwise noted.

Overview

We are a premier provider of proppant and logistics solutions to the North American energy industry. Our portfolio of purpose-built production facilities are capable of producing 13,430,000 tons per year of high-quality monocrystalline sand, a specialized mineral used as a proppant during the well completion process, necessary to facilitate the recovery of hydrocarbons from oil and natural gas wells. Our production facilities' direct access to major U.S. railroads enhance our delivery capabilities into consuming basins, while our strategically located owned and operated in-basin terminals as well as our in-basin production facility positions us within close proximity to significant activity in all major oil and gas basins for advantageous truck transportation. Our integrated distribution system, enhanced by our innovative PropStream™ logistics solution, efficiently delivers proppant the "last mile" into the blender, providing customers surety of supply from mine to well site.

We sell a substantial portion of the frac sand we produce to customers with whom we have long-term contracts. We provide certain contract customers with market pricing arrangements that may currently be at a discount to contracted pricing. We are in discussions with various existing and potential customers regarding new long-term contracts for varying terms and volume commitments. As of October 1, 2017, the average remaining contract terms from our long-term contracts was 3.2 years with remaining terms ranging from 15 to 87 months.

Our Assets and Operations

We own and operate the 971-acre facility with approximately 32,000 feet of integrated rail infrastructure, located in Wyeville, Wisconsin (the "Wyeville facility") and, as of December 31, 2016, contained 76.4 million tons of proven recoverable reserves of frac sand. The Wyeville facility, completed in June 2011 and expanded in 2012, has an annual processing capacity of approximately 1,850,000 tons of frac sand per year.

We own and operate the 1,187-acre facility with approximately 28,800 feet of integrated rail infrastructure, located in Eau Claire County, Wisconsin (the "Augusta facility") and, as of December 31, 2016, contained 40.9 million tons of proven recoverable reserves of frac sand. We completed construction of the Augusta facility in June 2012 and expanded in 2014. The Augusta facility has an annual processing capacity of approximately 2,860,000 tons of frac sand per year. During September 2016, the Partnership resumed production at its Augusta facility, which was temporarily idled in October 2015 as a result of market conditions.

We own and operate the 1,285-acre facility with approximately 43,000 feet of integrated rail infrastructure, located near Blair, Wisconsin (the "Blair facility") and, as of December 31, 2016, contained 117.7 million tons of proven recoverable reserves of frac sand. We completed construction of the Blair facility in March 2016. The Blair facility has an annual processing capacity of approximately 2,860,000 tons of frac sand per year.

We own and operate the 1,447-acre facility with approximately 30,000 feet of integrated rail infrastructure, located near Independence, Wisconsin and Whitehall, Wisconsin (the "Whitehall facility"), and as of December 31, 2016, contained 80.7 million tons of proven recoverable reserves of frac sand. The Whitehall facility, completed in the third quarter of 2014, is capable of delivering approximately 2,860,000 tons of frac sand per year. The Whitehall facility was temporarily idled during the second quarter of 2016 and resumed production in March 2017.

Edgar Filing: Hi-Crush Partners LP - Form 10-Q

In March 2017, we acquired a 1,226-acre frac sand reserve, located near Kermit, Texas, strategically positioned in the Permian Basin, within 75 miles of significant Delaware and Midland Basin activity. As of July 31, 2017, we completed construction of our fifth on-site processing plant capable of producing 3,000,000 tons per year (the "Kermit facility") and commenced operations. As of the commencement of operations in July 2017, the reserves contained 104.7 million tons of proven recoverable reserves of frac sand.

25

Table of Contents

According to John T. Boyd Company ("John T. Boyd"), our proven reserves at our facilities consist of frac sand exceeding American Petroleum Institute ("API") specifications. Analysis of sand at our facilities by independent third-party testing companies indicates that they demonstrate characteristics exceeding of API specifications with regard to crush strength, turbidity and roundness and sphericity. Based on third-party reserve reports by John T. Boyd, as of December 31, 2016 and updated for the July 2017 Kermit facility reserve report, we have an implied average reserve life of 31 years, assuming production at the rated capacity of 13,430,000 tons of frac sand per year.

As of September 30, 2017, we own or operate 11 terminal locations throughout Colorado, Pennsylvania, Ohio, New York and Texas, of which two are temporarily idled and six are capable of accommodating unit trains. On October 3, 2017, we commenced operations at our twelfth terminal facility in Pecos, Texas, which is capable of accommodating unit trains. Our terminals, including Pecos, include approximately 109,000 tons of rail storage capacity and approximately 140,000 tons of silo storage capacity.

We are continuously looking to increase the number of terminals we operate and expand our geographic footprint, allowing us to further enhance our customer service and putting us in a stronger position to take advantage of opportunistic short term pricing agreements. Our terminals are strategically located to provide access to Class I railroads, which enables us to cost effectively ship product from our production facilities in Wisconsin. As of September 30, 2017, we leased or owned 4,172 railcars used to transport our sand from origin to destination and managed a fleet of 2,228 additional railcars dedicated to our facilities by our customers or the Class I railroads. In addition, the Partnership has placed orders for an additional 700 leased railcars, which are scheduled to be delivered during the first half of 2018.

In September 2016, the Partnership entered into an agreement to become a member of Proppant Express Investments, LLC ("PropX"), which was established to develop critical last-mile logistics equipment for the proppant industry. In October 2016, the Partnership announced the successful pilot test of its PropStream integrated logistics solution, which involves loading frac sand at in-basin terminals into PropX containers before being transported by truck to the well site. At the well site, we believe the proprietary conveyor system ("PropBeastTM") significantly reduces noise and dust emissions due to its fully enclosed environment. As of September 30, 2017, we owned 19 PropBeast conveyors and leased 999 containers from PropX.

How We Generate Revenue

We generate revenue by excavating, processing and delivering frac sand and providing related services. A substantial portion of our frac sand is sold to customers with whom we have long-term contracts which have current terms expiring between 2018 and 2024. Each contract defines the minimum volume of frac sand that the customer is required to purchase monthly and annually, the volume that we are required to make available, the technical specifications of the product and the price per ton. During 2016 and the nine months ended September 30, 2017, we provided contract customers with temporary market pricing arrangements at a discount to certain contracted pricing levels. We also sell our frac sand on the spot market at prices and other terms determined by the existing market conditions as well as the specific requirements of the customer. Delivery of sand to our customers may occur at the rail origin, terminal or well site.

Due to sustained freezing temperatures in the Wisconsin area of operation during winter months, it is industry practice to halt excavation activities and operation of the wet plant during those months. As a result, we excavate and wash sand in excess of current delivery requirements during the months when our four Wisconsin facilities are operational. This excess sand is placed in stockpiles that feed the dry plant and fill customer orders throughout the year.

Costs of Conducting Our Business

The principal expenses involved in production of raw frac sand are excavation costs, labor, utilities, maintenance and royalties. We have a contract with a third party to excavate raw frac sand, deliver the raw frac sand to our processing facility and move the sand from our wet plant to our dry plant. We pay a fixed price per ton excavated and delivered without regard to the amount of sand excavated that meets API specifications. Accordingly, we incur excavation costs with respect to the excavation of sand and other materials from which we ultimately do not derive revenue (rejected materials), and for sand which is still to be processed through the dry plant and not yet sold. However, the ratio of rejected materials to total amounts excavated has been, and we believe will continue to be, in line with our expectations, given the extensive core sampling and other testing we undertook at our facilities.

Labor costs associated with employees at our processing facilities represent the most significant cost of converting raw frac sand to finished product. We incur utility costs in connection with the operation of our processing facilities, primarily electricity and natural gas, which are both susceptible to fluctuations. Our facilities require periodic scheduled maintenance to ensure efficient operation and to minimize downtime. Excavation, labor, utilities and other costs of production are capitalized as a component of inventory and are reflected in cost of goods sold when inventory is sold.

Table of Contents

We pay royalties to third parties at our Wisconsin facilities at various rates, as defined in the individual royalty agreements. During the third quarter of 2016, the Partnership entered into an agreement to terminate certain existing royalty agreements for \$6,750, of which \$3,375 was paid during each of September 2017 and 2016. As a result of this agreement, the Partnership reduced its ongoing future royalty payments to the applicable counterparties for each ton of frac sand that is excavated, processed and sold to the Partnership's customers. We currently pay an aggregate rate up to \$5.15 per ton of sand excavated from our Wisconsin facilities, delivered to and paid for by our customers. No royalties are paid on the sand extracted from our Kermit facility.

The principal expenses involved in distribution of processed sand from our on-site rail facilities are freight charges, fuel surcharges, railcar lease expense, terminal switch fees, demurrage costs, storage fees, transload fees, labor, facility rent and, on occasion, the cost of purchased sand. The principal expenses involved in delivering sand to the well site are costs associated with trucking, container rent, labor and other operating expenses associated with handling the product from the terminal to the well site.

We may, from time to time, purchase sand and other proppant through a long-term supply agreement with a third party at a specified price per ton and also through the spot market. We incur transportation costs including trucking, rail freight charges and fuel surcharges when transporting our sand from its origin to destination. We utilize multiple railroads to transport our sand and such transportation costs are typically negotiated through long-term working relationships.

We incur general and administrative costs related to our corporate operations. Under our partnership agreement and the services agreement with our sponsor and our general partner, our sponsor has discretion to determine, in good faith, the proper allocation of costs and expenses to us for its services, including expenses incurred by our general partner and its affiliates on our behalf. The allocation of such costs is based on management's best estimate of time and effort spent on the respective operations and facilities. Under these agreements, we reimburse our sponsor for all direct and indirect costs incurred on our behalf.

How We Evaluate Our Operations

We utilize various financial and operational measures to evaluate our operations. Management measures the performance of the Partnership through performance indicators, including gross profit, contribution margin, earnings before interest, taxes, depreciation and amortization ("EBITDA"), Adjusted EBITDA and distributable cash flow.

Gross Profit and Contribution Margin

We use contribution margin, which we define as total revenues less costs of goods sold excluding depreciation, depletion and amortization, to measure our financial and operating performance. Contribution margin excludes other operating expenses and income, including costs not directly associated with the operations of our business such as accounting, human resources, information technology, legal, sales and other administrative activities. We believe contribution margin is a meaningful measure because it provides an operating and financial measure of our ability to generate margin in excess of our operating cost base.

We use gross profit, which we define as revenues less costs of goods sold, to measure our financial performance. We believe gross profit is a meaningful measure because it provides a measure of profitability and operating performance based on the historical cost basis of our assets.

As a result, contribution margin, contribution margin per ton sold, sales volumes, sales price per ton sold and gross profit are key metrics used by management to evaluate our results of operations.

EBITDA, Adjusted EBITDA and Distributable Cash Flow

We view EBITDA and Adjusted EBITDA as important indicators of performance. We define EBITDA as net income plus depreciation, depletion and amortization and interest expense, net of interest income. We define Adjusted EBITDA as EBITDA, adjusted for earnings (loss) from equity method investments and any non-cash impairments of long-lived assets and goodwill. We define distributable cash flow as Adjusted EBITDA less cash paid for interest expense and maintenance and replacement capital expenditures, including accrual for reserve replacement, plus accretion of asset retirement obligations and non-cash unit-based compensation. We use distributable cash flow as a performance metric to compare cash generating performance of the Partnership from period to period and to compare the cash generating performance for specific periods to the cash distributions (if any) that are expected to be paid to our unitholders. Distributable cash flow will not reflect changes in working capital balances. EBITDA and Adjusted

EBITDA are supplemental measures utilized by our management and other users of our financial statements, such as investors, commercial banks, research analysts and others, to assess the financial performance of our assets without regard to financing methods, capital structure or historical cost basis.

Table of Contents

Note Regarding Non-GAAP Financial Measures

EBITDA, Adjusted EBITDA and distributable cash flow are not financial measures presented in accordance with GAAP. We believe that the presentation of these non-GAAP financial measures will provide useful information to investors in assessing our results of operations. Our non-GAAP financial measures should not be considered as alternatives to the most directly comparable GAAP financial measure. Each of these non-GAAP financial measures has important limitations as analytical tools because they exclude some but not all items that affect the most directly comparable GAAP financial measures. You should not consider EBITDA, Adjusted EBITDA or distributable cash flow in isolation or as substitutes for analysis of our results as reported under GAAP. Because EBITDA, Adjusted EBITDA and distributable cash flow may be defined differently by other companies in our industry, our definitions of these non-GAAP financial measures may not be comparable to similarly titled measures of other companies, thereby diminishing their utility.

The following table presents a reconciliation of EBITDA, Adjusted EBITDA and distributable cash flow to the most directly comparable GAAP financial measure, as applicable, for each of the periods indicated:

(in thousands)	Three Months Ended		Nine Months Ended	
	September 30, 2017	2016	September 30, 2017	2016
Reconciliation of distributable cash flow to net income (loss):				
Net income (loss)	\$29,807	\$(11,734)	\$39,356	\$(76,393)
Depreciation and depletion expense	8,806	4,932	21,234	12,689
Amortization expense	421	420	1,262	1,261
Interest expense	2,800	2,921	8,167	10,632
EBITDA	41,834	(3,461)	70,019	(51,811)
(Earnings) loss from equity method investments	(128)	—	142	—
Non-cash impairment of goodwill	—	—	—	33,745
Adjusted EBITDA	41,706	(3,461)	70,161	(18,066)
Less: Cash interest paid	(2,427)	(2,548)	(7,049)	(9,138)
Less: Maintenance and replacement capital expenditures, including accrual for reserve replacement (a)	(3,399)	(1,554)	(8,189)	(3,963)
Add: Accretion of asset retirement obligations	115	109	343	319
Add: Unit-based compensation	1,509	1,155	3,906	3,015
Distributable cash flow	37,504	(6,299)	59,172	(27,833)
Adjusted for: Distributable cash flow attributable to assets contributed by the sponsor, prior to the period in which the contribution occurred (b)	—	(400)	1,247	1,062
Distributable cash flow attributable to Hi-Crush Partners LP	37,504	(6,699)	60,419	(26,771)
Less: Distributable cash flow attributable to holders of incentive distribution rights	—	—	—	—
Distributable cash flow attributable to limited partner unitholders	\$37,504	\$(6,699)	\$60,419	\$(26,771)

Maintenance and replacement capital expenditures, including accrual for reserve replacement, were determined based on an estimated reserve replacement cost of \$1.35 per ton produced and delivered during the period. Such (a) expenditures include those associated with the replacement of equipment and sand reserves, to the extent that such expenditures are made to maintain our long-term operating capacity. The amount presented does not represent an actual reserve account or requirement to spend the capital.

The Partnership's historical financial information has been recast to consolidate Hi-Crush Blair LLC, Hi-Crush Whitehall LLC, 2.0% equity interest in Hi-Crush Augusta LLC and PDQ Properties LLC for the periods leading up (b) to their contribution into the Partnership. For purposes of calculating distributable cash flow attributable to Hi-Crush Partners LP, the Partnership excludes the incremental amount of recast distributable cash flow earned during the periods prior to the contributions.

Table of Contents

Basis of Presentation

The following discussion of our historical performance and financial condition is derived from the historical financial statements.

Factors Impacting Comparability of Our Financial Results

Our historical results of operations and cash flows are not indicative of results of operations and cash flows to be expected in the future principally for the following reasons:

During 2016, we provided significant price concessions and waivers under our contracts. Beginning in August 2014 and continuing through the second quarter of 2016, oil and natural gas prices declined dramatically and persisted at levels well below those experienced during the middle of 2014. In 2015, as a result of the market dynamics existing during the year and continuing in the first half of 2016, we provided market-based pricing to our contract customers and/or waivers of minimum volume purchase requirements, in certain circumstances in exchange for, among other things, additional term and/or volume. Market pricing for sand began to stabilize late in the third quarter of 2016, and we continue to deliver sand at market prices, which in some instances may be below those provided for in our existing contracts, negatively affecting our revenues, net income and cash generated from operations.

We commenced operations at our Kermit production facility on July 31, 2017. The Kermit facility commenced operations and sales of frac sand during the third quarter of 2017, resulting in an increase in volumes produced and delivered during the three months ended September 30, 2017 as compared to the same period of 2016.

Our Augusta production facility was temporarily idled until August 2016. In October 2015, we temporarily idled our Augusta facility, which has a higher cost structure than our other production facilities. During September 2016, the Partnership resumed production at the Augusta facility, resulting in an increase in volumes produced and delivered during the three and nine months ended September 30, 2017 as compared to the same periods of 2016.

Our Whitehall production facility was temporarily idled from the second quarter of 2016 through March 2017. The Whitehall facility was temporarily idled during the second quarter of 2016. The Partnership resumed production at the Whitehall facility in March 2017.

We completed construction of our Blair production facility in March 2016. We completed construction of our Blair facility in March 2016. Accordingly, our financial statements through March 31, 2016 include minimal sales and operations generated from our Blair facility.

We impaired our goodwill during the first quarter of 2016. During the three months ended March 31, 2016, we completed an impairment assessment of our goodwill. As a result of the assessment, we estimated the fair value of our goodwill and determined that it was less than its carrying value, resulting in an impairment of \$33,745.

We incurred bad debt expense in connection with a customer's bankruptcy filing. We incurred bad debt expense of \$8,236 during the first quarter of 2016, principally as a result of a spot customer filing for bankruptcy.

Our outstanding balance under the Revolving Credit Agreement was paid in full. During the second quarter of 2016, we repaid the outstanding balance under our Revolving Credit Agreement. During the nine months ended September 30, 2017, we did not have any indebtedness outstanding under our Revolving Credit Agreement. As a result, our interest expense was less during the nine months ended September 30, 2017 as compared to the same period of 2016.

During the fourth quarter of 2016, we launched PropStream, our integrated logistics solution, which delivers proppant into the blender at the well site. Accordingly, our financial statements through September 30, 2016 do not include any sales or operations generated from PropStream.

Market Conditions

Exploration and production activity during the first half of 2017 has been increasing, as demonstrated by the improvements in the reported Baker Hughes land rig count in the United States from a low average of 380 rigs in May 2016 to 916 rigs as of September 30, 2017. While still well below the high average of 1,859 rigs in November 2014, drilling and completions efficiencies have continued to improve such that the energy industry views 900 rigs as being capable of generating the same amount of completion and service intensity as 2,000 rigs did in 2014. The energy industry's outlook for the remainder of 2017 and 2018 activity levels includes oil and natural gas prices that would support continued rig count averages of 900 rigs in the fourth quarter of 2017 and the first half of 2018. Well completion activity would similarly be expected to increase over the next several quarters, which, when coupled with higher usage of frac sand per well, should result in an increased strong positive influence on demand for raw frac sand.

Table of Contents

Frac sand supply is expected to fall short of demand through the coming months and quarters. While stated capacity may exceed the expectations for frac sand demand, the available capacity is constrained due to 1) availability of the grades of sand that are currently in demand, 2) general operating conditions and normal downtime and 3) logistics constraints. The industry is adding capacity, particularly in the Permian Basin, over the next 12 to 18 months, however, we do not expect such supply to be available in the volume or timeframe needed to meet the increasing demand. The advent of "in-basin" sand supply available closer to the well site in the Permian Basin, may cause a shift in supply over time from Northern White sand to in-basin sand supply. However, we believe this shift will be specific to finer mesh sizes of sand, particularly 100 mesh which is the principal grade produced in-basin. Northern White supply of 100 mesh is likely to shift to meet the demand for sand in other basins, with other grades of Northern White continuing to find a market in the Permian. While these shifts may cause periodic mismatches of supply and demand in particular basins, we do not believe there will be a long-term oversupply of sand given the projections of increasing demand.

As a result of increasing demand for raw frac sand, pricing began to stabilize in the third quarter of 2016 and increased in the fourth quarter of 2016, although remaining below historical averages. Due to the winter limitations on producing wet sand for processing at many facilities, constraints on supply were exacerbated in the first quarter of 2017 and pricing rose quickly. Pricing was still increasing into the third quarter of 2017, although at a slower pace than experienced in the first quarter of 2017. While the outlook for pricing of raw frac sand in the remainder 2017 and into the early part of 2018 is uncertain, given the expected levels of well completion activity in North America, coupled with the increased frac sand demand per well, and the limitations to increase sand supply noted above, we believe frac sand pricing is likely to continue to rise and be more favorable in the next several months.

As we began to see increasing demand for frac sand in 2017, we prepared our idled facilities, Whitehall and the Augusta wet plant, to resume operations late in the first quarter of 2017. During the past two years, we continued to invest in terminal operations to reduce our cost of delivering sand in-basin. During the first quarter of 2017, we fully re-staffed our facilities and removed all railcars from long-term storage. In the third quarter of 2017, we commenced operations at our fifth plant, the Kermit facility, in the Permian Basin and have now completed construction of our Pecos terminal. As of today, all five of our frac sand production facilities are in operation.

The following table presents sales, volume and pricing comparisons for the third quarter of 2017, as compared to the second quarter of 2017:

	Three Months Ended			Percentage Change
	September 30, 2017	June 30, 2017	Change	
Revenues generated from the sale of frac sand (in thousands)	\$ 167,473	\$ 135,182	\$ 32,291	24 %
Tons sold	2,456,195	2,112,516	343,679	16 %
Percentage of volumes sold in-basin	61 %	64 %	(3 %)	(5 %)
Average price per ton sold	\$68	\$64	\$4	6 %

Revenues increased due to the sequential increase in sales volumes, combined with the generally higher pricing during the third quarter of 2017. Our average sales price per ton sold increased to \$68 per ton in the third quarter of 2017 from \$64 per ton in the second quarter of 2017, due to continued strong demand for frac sand coupled with limited supply. The average sales price between the two periods differs due to changes in industry market conditions and the resulting sales price trends, as well as the impact of the mix in pricing of FOB plant and in-basin volumes (61% and 64% of volumes were sold in-basin for the three months ended September 30, 2017 and June 30, 2017, respectively). Pricing in the third quarter of 2017 was rising throughout the three-month period and generally was higher than the second quarter of 2017. Through August 2017, one of our major customers had contracted pricing at the mine gate that was agreed to in the third quarter of 2016 and therefore our average price per ton may not fully reflect current market pricing. This customer's contract expired in August 2017 and we are currently selling sand to that customer at prices more reflective of current market conditions.

Table of Contents

Results of Operations

The following table presents revenues and expenses for the periods indicated:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2017	2016	2017	2016
Revenues	\$ 167,583	\$ 46,556	\$ 386,167	\$ 137,133
Costs of goods sold:				
Production costs	35,749	12,057	88,299	34,529
Logistics costs	84,206	29,627	203,621	91,247
Depreciation, depletion and amortization	8,805	4,929	21,229	12,683
Gross profit (loss)	38,823	(57)	73,018	(1,326)
Operating costs and expenses	6,344	8,756	25,353	64,435
Income (loss) from operations	32,479	(8,813)	47,665	(65,761)
Other income (expense):				
Earnings (loss) from equity method investments	128	—	(142)	—
Interest expense	(2,800)	(2,921)	(8,167)	(10,632)
Net income (loss)	\$ 29,807	\$ (11,734)	\$ 39,356	\$ (76,393)

Three Months Ended September 30, 2017 Compared to the Three Months Ended September 30, 2016

Revenues

The following table presents sales, volume and pricing comparisons for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016:

	Three Months Ended			Percentage	
	September 30,	2016	Change	Change	
	2017				
Revenues generated from the sale of frac sand (in thousands)	\$ 167,473	\$ 46,546	\$ 120,927	260	%
Tons sold	2,456,195	1,082,974	1,373,221	127	%
Percentage of volumes sold in-basin	61	% 47	% 14	% 30	%
Average price per ton sold	\$ 68	\$ 43	\$ 25	58	%

Revenues generated from the sale of frac sand were \$167,473 and \$46,546 for the three months ended September 30, 2017 and 2016, respectively, during which we sold 2,456,195 and 1,082,974 tons of frac sand, respectively. Average sales price per ton was \$68 and \$43 for the three months ended September 30, 2017 and 2016, respectively. The average sales price between the two periods differs due to industry market conditions, which changed from excess supply to short supply of frac sand, and the resulting sales price trends, as well as the impact of the mix in pricing of FOB plant and in-basin volumes (61% and 47% of tons were sold in-basin for the three months ended September 30, 2017 and 2016, respectively). Pricing in the third quarter of 2017 was rising throughout the three-month period and generally was substantially higher than the third quarter of 2016. Other revenue related to transload and terminaling, silo leases and other services was \$110 and \$10 for the three months ended September 30, 2017 and 2016, respectively.

Costs of Goods Sold – Production Costs

We incurred production costs of \$35,749 and \$12,057 for the three months ended September 30, 2017 and 2016, respectively. The principal components of our production costs are excavation costs, plant operating costs, royalties, and as necessary, the cost of purchased sand. The increase in production costs for the three months ended September 30, 2017 was primarily attributable to an increase in volumes being produced and delivered from our production facilities compared to the same period in 2016, when two of our production facilities were idled. In addition, during the three months ended September 30, 2017, we recognized a non-cash charge of \$2,308 related to the use of coarse material from inventory to augment our reclamation process.

Table of Contents

Costs of Goods Sold – Logistics Costs

We incurred logistics costs of \$84,206 and \$29,627 for the three months ended September 30, 2017 and 2016, respectively, reflecting an increase in volumes sold in-basin and at the well site. The principal components of logistics costs are the cost of freight and fuel surcharges, railcar lease and switch costs. These transportation related charges are capitalized as a component of finished goods inventory held in-basin and are reflected in cost of goods sold when the inventory is eventually sold in-basin or at the well site. Other logistics cost components, including transload fees, storage costs, and terminal operational costs, such as labor and rent, are charged to costs of goods sold in the period in which they are incurred.

Costs of Goods Sold – Depreciation, Depletion and Amortization of Intangible Assets

For the three months ended September 30, 2017 and 2016, we incurred \$8,805 and \$4,929, respectively, of depreciation, depletion and amortization expense. The increase was primarily driven by an increase in mining activity at our Wisconsin production facilities compared to the same period in 2016, coupled with an increased asset base due to the commencement of operations at the Kermit production facility.

Gross Profit (Loss)

Gross profit was \$38,823 for the three months ended September 30, 2017, compared to gross loss of \$(57) for the three months ended September 30, 2016. Gross profit (loss) percentage increased to 23.2% in the third quarter of 2017 from (0.1)% in the third quarter of 2016. The increase was primarily driven by increased prices and volumes in the third quarter of 2017.

Operating Costs and Expenses

For the three months ended September 30, 2017, we incurred total operating costs and expenses of \$6,344, primarily attributable to general and administrative expenses of \$9,583, offset by \$3,554 of other operating income related to the termination of a contract.

For the three months ended September 30, 2016, we incurred total operating costs and expenses of \$8,756 primarily attributable to general and administrative expenses of \$8,499. In the third quarter of 2016, the Partnership incurred \$850 in transaction costs associated with the Blair Contribution and \$407 in other business development costs.

Earnings from Equity Method Investments

During the three months ended September 30, 2017, the Partnership recognized earnings of \$128 from its equity method investment in PropX representing its proportionate share of PropX's operating results.

Interest Expense

Interest expense was \$2,800 and \$2,921 for the three months ended September 30, 2017 and 2016, respectively. The decrease in interest expense during the three months ended September 30, 2017 was primarily driven by the payment in full of the outstanding balance on our revolver in the second quarter of 2016, coupled with capitalized interest on major construction projects taking place during 2017.

Net Income (Loss)

Net income was \$29,807 for the three months ended September 30, 2017, compared to net loss of \$(11,734) for the three months ended September 30, 2016.

Nine Months Ended September 30, 2017 Compared to the Nine Months Ended September 30, 2016

Revenues

The following table presents sales, volume and pricing comparisons for the nine months ended September 30, 2017, as compared to the nine months ended September 30, 2016:

	Nine Months Ended		Change	Percentage	
	September 30, 2017	September 30, 2016		Change	Change
Revenues generated from the sale of frac sand (in thousands)	\$385,923	\$136,672	\$249,251	182	%
Tons sold	5,953,598	2,895,235	3,058,363	106	%
Percentage of volumes sold in-basin	64	% 52	% 12	% 23	%
Average price per ton sold	\$65	\$47	\$18	38	%

Table of Contents

Revenues generated from the sale of frac sand were \$385,923 and \$136,672 for the nine months ended September 30, 2017 and 2016, respectively, during which we sold 5,953,598 and 2,895,235 tons of frac sand, respectively. Average sales price per ton was \$65 and \$47 for the nine months ended September 30, 2017 and 2016, respectively. The average sales price between the two periods differs due to changes in industry market conditions (generally excess supply of frac sand with declining demand in the first nine months of 2016 compared to short supply of frac sand with strong demand in the first nine months of 2017) and the resulting sales price trends, as well as the impact of the mix in pricing of FOB plant and in-basin volumes (64% and 52% of tons were sold in-basin for the nine months ended September 30, 2017 and 2016, respectively). Pricing in the first nine months of 2017 was rising throughout the nine-month period and generally was higher than the first nine months of 2016, during which we continued to provide discounted pricing for contract customers. Other revenue related to transload and terminaling, silo leases and other services was \$244 and \$461 for the nine months ended September 30, 2017 and 2016, respectively.

Costs of Goods Sold – Production Costs

We incurred production costs of \$88,299 and \$34,529 for the nine months ended September 30, 2017 and 2016, respectively. The principal components of our production costs are excavation costs, plant operating costs, royalties, and as necessary, the cost of purchased sand. The increase in production costs for the nine months ended September 30, 2017 was primarily attributable to an increase in volumes being produced and delivered from our production facilities compared to the same period in 2016, coupled with having all five of our production facilities in operation during the third quarter of 2017. In addition, during the nine months ended September 30, 2017, we recognized a non-cash charge of \$2,308 related to the use of coarse material from inventory to augment our reclamation process.

Costs of Goods Sold – Logistics Costs

We incurred logistics costs of \$203,621 and \$91,247 for the nine months ended September 30, 2017 and 2016, respectively, reflecting an increase in volumes sold in-basin and at the well site. The principal components of logistics costs are the cost of freight and fuel surcharges, railcar lease and switch costs. These transportation related charges are capitalized as a component of finished goods inventory held in-basin and are reflected in cost of goods sold when the inventory is eventually sold in-basin or at the well site. Other logistics cost components, including transload fees, storage costs, and terminal operational costs, such as labor and rent, are charged to costs of goods sold in the period in which they are incurred. During the nine months ended September 30, 2017, we incurred \$794 of costs associated with the storage of idled railcars and one-time costs to remove our remaining railcars out of storage and back into service, as compared to \$1,315 for storage of idled railcars for the same period in 2016.

Costs of Goods Sold – Depreciation, Depletion and Amortization of Intangible Assets

For the nine months ended September 30, 2017 and 2016, we incurred \$21,229 and \$12,683, respectively, of depreciation, depletion and amortization expense. The increase was driven by an increase in mining activity at our Wisconsin production facilities, coupled with an increased asset base in 2017, including the commencement of operations at the Kermit production facility.

Gross Profit (Loss)

Gross profit was \$73,018 for the nine months ended September 30, 2017, compared to a gross loss of \$(1,326) for the nine months ended September 30, 2016. Gross profit (loss) percentage increased to 18.9% in the first nine months of 2017 from (1.0)% in the first nine months of 2016. The increase was primarily driven by increased prices and volumes in the first nine months of 2017.

Operating Costs and Expenses

For the nine months ended September 30, 2017, we incurred total operating costs and expenses of \$25,353 primarily attributable to general and administrative expenses of \$28,221, offset by \$3,554 of other operating income related to the termination of a contract. During the nine months ended September 30, 2017, the Partnership incurred non-recurring legal, professional, marketing and other business development costs associated with the Whitehall Contribution, the development of our Kermit facility and Pecos terminal.

For the nine months ended September 30, 2016, we incurred total operating costs and expenses of \$64,435, which included general and administrative expenses of \$30,118 and impairments and other expenses of \$33,998 primarily related to the impairment of goodwill. General and administrative expenses for the nine months ended September 30,

2016 also included \$850 in transaction costs associated with the Blair Contribution, \$407 in other business development costs and an \$8,236 increase in bad debt expense associated with a spot customer filing for bankruptcy.

Earnings (Loss) from Equity Method Investments

During the nine months ended September 30, 2017, the Partnership incurred a loss of \$(142) from its equity method investment in PropX representing its proportionate share of PropX's operating results during the period. The loss was driven by initial start-up and legal costs incurred since the formation of the joint venture in September 2016.

Table of Contents

Interest Expense

Interest expense was \$8,167 and \$10,632 for the nine months ended September 30, 2017 and 2016, respectively, principally associated with the interest on our term loan. The decrease in interest expense during the 2017 period was primarily driven by the payment in full of the outstanding balance on our revolver in the second quarter of 2016, coupled with capitalized interest on major construction projects taking place in 2017.

Net Income (Loss)

Net income was \$39,356 for the nine months ended September 30, 2017, compared to a net loss of \$(76,393) for the nine months ended September 30, 2016.

Liquidity and Capital Resources

Overview

We expect our principal sources of liquidity will be cash generated by our operations, supplemented by borrowings under our Revolving Credit Agreement, as available. We believe that cash from these sources will be sufficient to meet our short-term working capital requirements and long-term capital expenditure requirements. As of October 25, 2017, our sources of liquidity consisted of \$18,285 of available cash and \$58,234 pursuant to available borrowings under our Revolving Credit Agreement (\$75,000, net of \$16,766 letter of credit commitments) and had no indebtedness. In addition, we have a \$200,000 senior secured term loan facility which permits us to add one or more incremental term loan facilities in an aggregate amount not to exceed \$100,000. We also have entered into an equity distribution program under which we may sell, from time to time, common units representing limited partner interests in the Partnership up to an aggregate gross sales price of \$50,000. Our General Partner is also authorized to issue an unlimited number of units without the approval of existing limited partner unitholders.

We expect that our future principal uses of cash will be for working capital, capital expenditures, funding debt service obligations, making distributions to our unitholders and any repurchases of common units. On October 16, 2017, our General Partner's board of directors declared a cash distribution for the third quarter of 2017 of \$0.15 per common unit, of \$0.60 on an annualized basis, and no distribution was declared for our holders of incentive distribution rights. This distribution will be paid on November 14, 2017 to unitholders of record on October 31, 2017. This quarterly distribution equates to approximately \$13,655 per quarter, or \$54,620 per year, based on the number of common units currently outstanding. We intend to pay a quarterly distribution to the extent we have sufficient operating surplus, as defined in our partnership agreement, and cash generated from our operations after establishment of cash reserves and payment of fees and expenses, including payments to our General Partner and its affiliates. We do not have a legal or contractual obligation to pay this distribution.

On October 17, 2017, the Partnership announced that the General Partner's board of directors approved a unit buyback program of up to \$100,000. The repurchase program does not obligate the Partnership to repurchase any specific dollar amount or number of units and may be suspended, modified or discontinued by the board of directors at any time, in its sole discretion and without notice.

Revolving Credit Agreement and Senior Secured Term Loan Facility

As of October 25, 2017, we have a \$75,000 senior secured Revolving Credit Agreement, which matures in April 2019. As of October 25, 2017, we had \$58,234 of undrawn borrowing capacity (\$75,000, net of \$16,766 letter of credit commitments) and had no indebtedness under our Revolving Credit Agreement. The Revolving Credit Agreement contains customary representations and warranties and customary affirmative and negative covenants, including limits or restrictions on the Partnership's ability to incur liens, incur indebtedness, make certain restricted payments, merge or consolidate, and dispose of assets. The Revolving Credit Agreement also requires compliance with customary financial covenants, which is a maximum leverage ratio of 4.5x for the six months ending September 30, 2017 annualized, 4.0x for the nine months ending December 31, 2017 annualized, and 3.5x for the twelve months ending March 31, 2018 and thereafter, and a minimum interest coverage ratio, as defined, of 2.5x for each fiscal quarter ending on or after June 30, 2017.

We are in compliance with the covenants contained in the Revolving Credit Agreement. Our ability to comply with such covenants in the future, and access our undrawn borrowing capacity under our Revolving Credit Agreement, is dependent primarily on achieving certain levels of EBITDA, as defined.

Edgar Filing: Hi-Crush Partners LP - Form 10-Q

As of October 25, 2017, we have a \$200,000 senior secured term loan facility, which matures in April 2021. As of October 25, 2017, the senior secured term loan facility was fully drawn with a \$193,000 balance outstanding. The senior secured term loan facility permits us to add one or more incremental term loan facilities in an aggregate amount not to exceed \$100,000. Any incremental senior secured term loan facility would be on terms to be agreed among us, the administrative agent under the senior secured term loan facility and the lenders who agree to participate in the incremental facility. Borrowings under our senior secured term loan facility are secured by substantially all of our assets.

For additional information regarding our Revolving Credit Agreement and our senior secured term loan facility, see Note 6 of the Notes to Unaudited Condensed Consolidated Financial Statements included under Part I, Item 1 of this Quarterly Report on Form 10-Q.

Table of Contents

Credit Ratings

As of October 25, 2017, the credit rating of the Partnership's senior secured term loan credit facility was B from Standard and Poor's and B3 from Moody's.

The credit ratings of the Partnership's senior secured term loan facility reflect only the view of a rating agency and should not be interpreted as a recommendation to buy, sell or hold any of our securities. A credit rating can be revised upward or downward or withdrawn at any time by a rating agency, if it determines that circumstances warrant such a change. A credit rating from one rating agency should be evaluated independently of credit ratings from other rating agencies.

Equity Distribution Agreement

On January 4, 2017, the Partnership entered into an equity distribution program with certain financial institutions (each, a "Manager") under which we may sell, from time to time, through or to the Managers, common units representing limited partner interests in the Partnership up to an aggregate gross sales price of \$50,000. The Partnership did not issue any common units under this equity distribution program through the date of this filing.

Unit Buyback Program

On October 17, 2017, the Partnership announced that the General Partner's board of directors approved a unit buyback program of up to \$100,000. The Partnership will seek consent allowing for the authorized amount of up to \$100,000. The repurchase program does not obligate the Partnership to repurchase any specific dollar amount or number of units and may be suspended, modified or discontinued by the board of directors at any time, in its sole discretion and without notice. The Partnership did not buyback any common units under this unit buyback program through the date of this filing.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a material effect on our current or future financial condition, changes in financial condition, sales, expenses, results of operations, liquidity, capital expenditures or capital resources.

The Partnership has long-term operating leases for railcars and equipment used at its terminal sites, some of which are also under long-term lease agreements with various railroads.

Capital Requirements

Capital expenditures totaled \$108,116 during the nine months ended September 30, 2017, related to costs associated with the construction of the Kermit facility, the new terminal facility in Pecos, Texas, equipment for the PropStream integrated logistics solution and overburden removal, among other projects. We plan to spend \$7,000 to \$17,000 on capital expenditures during the remainder of 2017. In addition, we have committed to investing up to \$17,400 in PropX, of which \$14,400 has been funded through September 30, 2017.

Capital expenditures for 2018 are expected to be in the range of \$35,000 to \$45,000 related to continued investment in equipment for PropStream, normal maintenance capital expenditures, including overburden removal, at our production facilities and terminals, and discretionary investments in logistics assets.

Working Capital

Working capital is the amount by which current assets, excluding cash, exceed current liabilities and is a measure of our ability to pay our liabilities as they become due. At the end of any given period, accounts receivable and payable tied to sales and purchases are relatively balanced to the volume of tons sold during the period. The factors that typically cause variability in the Partnership's working capital are (1) changes in receivables due to fluctuations in volumes sold, pricing and timing of collection, (2) inventory levels, which the Partnership closely manages, or (3) major structural changes in the Partnership's asset base or business operations, such as any acquisition, divestures or organic capital expenditures. As of September 30, 2017, we had a positive working capital balance of \$59,099 as compared to a deficit of \$(61,233) at December 31, 2016. The deficit as of December 31, 2016, was driven by \$115,961 of cumulative advances received from our sponsor to finance the construction of the Whitehall facility.

Table of Contents

The following table summarizes our working capital as of the dates indicated.

	September 30, 2017	December 31, 2016
Current assets:		
Accounts receivable, net	\$ 107,879	\$ 52,834
Inventories	49,380	29,277
Prepaid and other current assets	2,819	2,716
Total current assets	160,078	84,827
Current liabilities:		
Accounts payable	44,080	19,264
Accrued and other current liabilities	25,894	8,155
Deferred revenues	19,459	—
Due to sponsor	11,546	118,641
Total current liabilities	100,979	146,060
Working capital (deficit)	\$ 59,099	\$ (61,233)

Accounts receivable increased \$55,045 during the nine months ended September 30, 2017, reflecting increased volumes and improved pricing as compared to the fourth quarter of 2016.

Our inventory consists primarily of sand that has been excavated and processed through the wet plant and finished goods. The increase in our inventory of \$20,103 was primarily driven by increased in-basin finished goods inventory at September 30, 2017 as compared to December 31, 2016, as we had more on-line production capacity with which to produce and forward place product.

Accounts payable and accrued liabilities increased by \$42,555 on a combined basis, primarily due to an increase in outstanding payables associated with capital projects and resumption of mining at all four Wisconsin production facilities and our Kermit facility.

Deferred revenues represent prepayments from customers for future deliveries of frac sand. The increase in deferred revenues was due to the collection of prepayments from customers during the nine months ended September 30, 2017. Our balance due to our sponsor decreased \$107,095 during the nine months ended September 30, 2017, primarily as a result of \$116,417 of sponsor advances converting to capital on March 15, 2017, in connection with the closing of the Whitehall Contribution.

The following table provides a summary of our cash flows for the periods indicated.

	Nine Months Ended	
	September 30, 2017	2016
Net cash provided by (used in):		
Operating activities	\$ 63,073	\$ (18,596)
Investing activities	(453,106)	(117,817)
Financing activities	409,418	148,052

Cash Flows - Nine Months Ended September 30, 2017 and 2016

Operating Activities

Net cash provided by operating activities was \$63,073 for the nine months ended September 30, 2017, compared to net cash used in operating activities of \$18,596 for the nine months ended September 30, 2016. Operating cash flows include net income of \$39,356 and a net loss of \$76,393 during the nine months ended September 30, 2017 and 2016, respectively, adjusted for non-cash operating expenses and the changes in operating assets and liabilities described above. The increase in cash flows from operations was primarily attributable to increased gross profit margins in the first nine months of 2017 as compared to the first nine months of 2016.

Table of Contents

Investing Activities

Net cash used in investing activities was \$453,106 for the nine months ended September 30, 2017, and consisted of the \$140,000 cost of the Whitehall Contribution, the \$200,830 cost of the Permian Basin Sand asset acquisition, \$4,168 of equity method investments and \$108,116 of capital expenditures primarily related to the construction of our Kermit facility and our new terminal facility in Pecos, Texas.

Net cash used in investing activities was \$117,817 for the nine months ended September 30, 2016, and consisted of the \$75,000 cost of the Blair Contribution, \$4,411 of equity method investments and \$38,406 of capital expenditures related to the completion of the Blair facility, completion of distribution terminal facilities in Colorado and Texas, and expansion of rail capacity at our Wyeville facility.

Financing Activities

Net cash provided by financing activities was \$409,418 for the nine months ended September 30, 2017, and was comprised of \$412,577 net proceeds from the issuance of 23,575,000 common units, \$456 of advances received from our sponsor, \$438 of proceeds from participants in our unit purchase program, offset by \$4,014 of repayments on other long-term debt and \$39 of payments on accrued distribution equivalent rights.

Net cash provided by financing activities was \$148,052 for the nine months ended September 30, 2016, and was comprised of \$189,015 net proceeds from the issuance of 19,550,000 common units, \$16,016 of advances received from our sponsor, offset by \$128 of loan origination costs, a \$52,500 repayment of the outstanding balance on our Revolving Credit Agreement and \$4,351 of repayments on other long-term debt.

Forward-Looking Statements

Some of the information in this Quarterly Report on Form 10-Q may contain forward-looking statements.

Forward-looking statements give our current expectations, contain projections of results of operations or of financial condition, or forecasts of future events. Words such as "may," "assume," "forecast," "position," "predict," "strategy," "expect," "intend," "hope," "plan," "estimate," "anticipate," "believe," "project," "budget," "potential," or "continue," and similar expressions are used to identify forward-looking statements. They can be affected by assumptions used or by known or unknown risks or uncertainties. Consequently, no forward-looking statements can be guaranteed. When considering these forward-looking statements, you should keep in mind the risk factors and other cautionary statements in this Quarterly Report on Form 10-Q and in our Annual Report on Form 10-K for the year ended December 31, 2016, as filed with the Securities and Exchange Commission on February 21, 2017, as amended by the Partnership's Current Report on Form 8-K filed with the SEC on May 1, 2017. Actual results may vary materially. You are cautioned not to place undue reliance on any forward-looking statements. You should also understand that it is not possible to predict or identify all such factors and as such should not consider the following to be a complete list of all potential risks and uncertainties. Factors that could cause our actual results to differ materially from the results contemplated by such forward-looking statements include:

- the volume of frac sand we are able to buy and sell;
- the price at which we are able to buy and sell frac sand;
- demand and pricing for our integrated logistics solutions;
- the pace of adoption of our integrated logistics solutions;
- the amount of frac sand we are able to timely deliver at the well site, which could be adversely affected by, among other things, logistics constraints, weather, or other delays at the transloading facility;
- changes in prevailing economic conditions, including the extent of changes in natural gas, crude oil and other commodity prices;
- the amount of frac sand we are able to excavate and process, which could be adversely affected by, among other things, operating difficulties and unusual or unfavorable geologic conditions;
- changes in the price and availability of natural gas or electricity;
- unanticipated ground, grade or water conditions;
- reduction in the amount of water available for processing;
- cave-ins, pit wall failures or rock falls;
- inability to obtain necessary production equipment or replacement parts;

•changes in the railroad infrastructure, price, capacity and availability, including the potential for rail line washouts;

37

Table of Contents

• changes in the price and availability of transportation;

• availability of or failure of our contractors to provide services at the agreed-upon levels or times;

• failure to maintain safe work sites at our facilities or by third parties at their work sites;

• inclement or hazardous weather conditions, including flooding, and the physical impacts of climate change;

• environmental hazards;

• industrial and transportation related accidents;

• technical difficulties or failures;

• fires, explosions or other accidents;

• late delivery of supplies;

• difficulty collecting receivables;

- inability of our customers to take delivery;

• difficulties in obtaining and renewing environmental permits;

- facility shutdowns or restrictions in operations in response to environmental regulatory actions including but not limited to actions related to endangered species;

• changes in laws and regulations (or the interpretation thereof) related to the mining and hydraulic fracturing industries, silica dust exposure or the environment;

• the outcome of litigation, claims or assessments, including unasserted claims;

• inability to acquire or maintain necessary permits, licenses or other approvals, including mining or water rights;

• labor disputes and disputes with our third-party contractors;

• inability to attract and retain key personnel;

• cyber security breaches of our systems and information technology;

• our ability to borrow funds and access capital markets; and

• changes in the political environment of the drilling basins in which we and our customers operate.

All forward-looking statements are expressly qualified in their entirety by the foregoing cautionary statements.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

(Dollars in thousands)

Quantitative and Qualitative Disclosure of Market Risks

Market risk is the risk of loss arising from adverse changes in market rates and prices. Historically, our risks have been predominantly related to potential changes in the fair value of our long-term debt due to fluctuations in applicable market interest rates and those risks that arise in the normal course of business, as we do not engage in speculative, non-operating transactions, nor do we utilize financial instruments or derivative instruments for trading purposes.

The market for frac sand is indirectly exposed to fluctuations in the prices of crude oil and natural gas to the extent such fluctuations impact drilling and completion activity levels and thus impact the activity levels of our customers in the pressure pumping industry. We do not intend to hedge our indirect exposure to commodity risk.

Interest Rate Risk

As of September 30, 2017, we had \$193,000 of principal outstanding under our senior secured term loan facility, with an effective interest rate of 5.05%. Assuming no change in the amounts outstanding, the impact on interest expense of a 10% increase or decrease in the average interest rate would be approximately \$974 per year.

Credit Risk – Customer Concentration

During the nine months ended September 30, 2017, approximately 38% of our revenues were earned from our two largest customers. Our customers are generally pressure pumping service providers and oil and gas exploration and production companies. This concentration of counterparties operating in a single industry may increase our overall exposure to credit risk in that the counterparties may be similarly affected by changes in economic, regulatory or other conditions. If a customer defaults or we are unable to renew or replace these customer relationships, our gross profit and cash flows may be adversely affected.

Recent Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update ("ASU") 2014-09, an update that supersedes the most current revenue recognition guidance, as well as some cost recognition guidance. The update requires that an entity recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This update also requires new qualitative and quantitative disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments, information about contract balances and performance obligations, and assets recognized from costs incurred to obtain or fulfill a contract. The authoritative guidance, which may be applied on a full retrospective or modified retrospective basis whereby the entity records a cumulative effect of initially applying this update at the date of initial application, will be effective for the Partnership beginning January 1, 2018. The FASB has also issued the following standards which clarify ASU 2014-09 and have the same effective date as the original standard: ASU 2016-12, Revenue from Contracts with Customers: Narrow-Scope Improvements and Practical Expedients, ASU 2016-10 Revenue from Contracts with Customers: Identifying Performance Obligations and Licensing and ASU 2017-13, Revenue Recognition (Topic 605), Revenue from Contracts with Customers (Topic 606), Leases (Topic 840), and Leases (Topic 842).

The Partnership is currently assessing the potential impacts of the adoption of ASU 2014-09. Although we are still in the process of documenting our assessment of our contracts and the impact to our disclosure requirements, the Partnership does not anticipate a material impact on its revenue recognition practices. The Partnership generates revenue by excavating, processing and delivering frac sand and providing related services and recognizes revenue at the point of delivery to customers, at which point the earnings process is deemed to be complete. We currently intend to adopt ASU 2014-09 using the full retrospective approach.

In February 2016, the FASB issued ASU 2016-02, which will impact all leases with durations greater than twelve months. In general, such arrangements will be recognized as assets and liabilities on the balance sheet of the lessee. Under the new accounting guidance a right-of-use asset and lease obligation will be recorded for all leases, whether operating or financing, while the statement of operations will reflect lease expense for operating leases and amortization/interest expense for financing leases. The balance sheet amount recorded for existing leases at the date of

adoption will be calculated using the applicable incremental borrowing rate at the date of adoption. The new accounting guidance is effective for the Partnership beginning in the first quarter of 2019, and should be applied retrospectively. The FASB has also issued the following standard which clarifies ASU 2016-02 and has the same effective date as the original standard: ASU 2017-13, Revenue Recognition (Topic 605), Revenue from Contracts with Customers (Topic 606), Leases (Topic 840), and Leases (Topic 842). The Partnership is currently assessing the impact that adopting this new accounting guidance will have on its Consolidated Financial Statements and footnote disclosures.

Table of Contents

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations is based on our consolidated financial statements, which have been prepared in accordance with accounting principles generally acceptable in the United States of America. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the dates of the financial statements and the reported revenues and expenses during the reporting periods. We evaluate these estimates and assumptions on an ongoing basis and base our estimates on historical experience, current conditions and various other assumptions that we believe to be reasonable under the circumstances. The results of these estimates form the basis for making judgments about the carrying values of assets and liabilities as well as identifying and assessing the accounting treatment with respect to commitments and contingencies. Our actual results may materially differ from these estimates.

Contingent Consideration

Accounting standards require that contingent consideration be recorded at fair value at the date of acquisition and revalued during subsequent reporting dates under the acquisition method of accounting. In connection with its recent acquisitions of Blair and Whitehall and Other Assets from its sponsor, the Partnership has entered into certain contingent consideration arrangements. As such transactions are between entities under common control, any differences between the calculated fair value, and the actual resulting payments in the future will be reflected as an equity adjustment to the deemed distributions associated with the acquisitions.

A discussion of our significant accounting policies is included in Note 2 of the Notes to Unaudited Condensed Consolidated Financial Statements included under Part I, Item 1 of this Quarterly Report on Form 10-Q and our Annual Report on Form 10-K, as filed with the SEC on February 21, 2017, as amended by the Partnership's Current Report on Form 8-K filed with the SEC on May 1, 2017. Significant estimates include, but are not limited to, purchase accounting allocations and valuations, asset retirement obligations, depletion of mineral rights, inventory valuation, valuation of unit-based compensation, estimated fair value of contingent consideration in the future and impairment of long-lived and intangible assets.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of such date, our disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15 and 15d-15 of the Exchange Act that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II

ITEM 1. LEGAL PROCEEDINGS.

Legal Proceedings

From time to time the Partnership may be subject to various claims and legal proceedings which arise in the normal course of business. Management is not aware of any legal matters that are likely to have a material adverse effect on the Partnership's financial position, results of operations or cash flows.

ITEM 1A. RISK FACTORS.

In addition to the other information set forth in this Quarterly Report on Form 10-Q, you should carefully consider the risk factors discussed under the caption "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2016, as filed with the SEC on February 21, 2017. There have been no material changes to the risk factors previously disclosed under the caption "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2016.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. MINE SAFETY DISCLOSURES.

We adhere to a strict occupational health program aimed at controlling exposure to silica dust, which includes dust sampling, a respiratory protection program, medical surveillance, training and other components. Our safety program is designed to ensure compliance with the standards of our Occupational Health and Safety Manual and U.S. Federal Mine Safety and Health Administration ("MSHA") regulations. For both health and safety issues, extensive training is provided to employees. We have safety committees at our plants made up of salaried and hourly employees. We perform annual internal health and safety audits and conduct semi-annual crisis management drills to test our abilities to respond to various situations. Health and safety programs are administered by our corporate health and safety department with the assistance of plant environmental, health and safety coordinators.

All of our production facilities are classified as mines and are subject to regulation by MSHA under the Federal Mine Safety and Health Act of 1977 (the "Mine Act"). MSHA inspects our mines on a regular basis and issues various citations and orders when it believes a violation has occurred under the Mine Act. Information concerning mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K (17 CFR 229.104) is included in Exhibit 95.1 to this Quarterly Report on Form 10-Q.

ITEM 5. OTHER INFORMATION.

None.

ITEM 6. EXHIBITS.

The exhibits to this report are listed in the Exhibit Index.
