Delaware **95-4868120**
(State or Other Jurisdiction (I.R.S. Employer
of Incorporation) Identification No.)

1410 Market Street, Suite 200

Kirkland, WA 98033

(ADDRESS OF PRINCIPAL EXECUTIVE OFFICES)

(800) 641-2676

(ISSUER REGISTRANT TELEPHONE NUMBER)

SECURITIES REGISTERED UNDER SECTION 12(B) OF THE ACT: NONE

SECURITIES REGISTERED UNDER SECTION 12(G) OF THE ACT:

COMMON STOCK, PAR VALUE \$.0001

(TITLE OF CLASS)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: CoroWare, Inc, - Form 10-K

Indicate by check mark if disclosure of delinquent filers in response to Item 405 of Regulation S-K is not contained in this form, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the of the registrant's common stock held by non-affiliates of the registrant, computed by reference to price at which the common equity was sold, or the average bid and asked price of such common stock as of April 11, 2013, was \$220,284. For purposes of this computation, the registrant has excluded the market value of all shares of its common stock reported as being beneficially owned by executive officers and directors and holders of more than 10% of the common stock on a fully diluted basis of the registrant; such exclusion shall not, however, be deemed to constitute an admission that any such person is an "affiliate" of the registrant.

As of April 11, 2013 there were 2,202,838,008 shares of the issuer's \$.0001 par value common stock outstanding.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

In this annual report, references to “CoroWare,” “the Company,” “we,” “us,” and “our” refer to CoroWare, Inc.

This Annual Report on Form 10-K contains forward-looking statements regarding our business, financial condition, results of operations and prospects. Words such as "expects," "anticipates," "intends," "plans," "believes," "seeks," "estimates" and similar expressions or variations of such words are intended to identify forward-looking statements, but are not deemed to represent an all-inclusive means of identifying forward-looking statements as denoted in this Annual Report on Form 10-K. Additionally, statements concerning future matters are forward-looking statements.

Although forward-looking statements in this Annual Report on Form 10-K reflect the good faith judgment of our management, such statements can only be based on facts and factors currently known by us. Consequently, forward-looking statements are inherently subject to risks and uncertainties and actual results and outcomes may differ materially from the results and outcomes discussed in or anticipated by the forward-looking statements. Factors that could cause or contribute to such differences in results and outcomes include, without limitation, those specifically addressed under the heading "Risks Related to Our Business" below, as well as those discussed elsewhere in this Annual Report on Form 10-K. Readers are urged not to place undue reliance on these forward-looking statements, which speak only as of the date of this Annual Report on Form 10-K.

CoroWare undertakes no obligation to revise or update any forward-looking statements in order to reflect any event or circumstance that may arise after the date of this Annual Report on Form 10-K, except as required by law. Readers are urged to carefully review and consider the various disclosures made throughout this Annual Report, which are designed to advise interested parties of the risk factors that may affect our business, financial condition, results of operations and prospects.

PART I

ITEM 1. BUSINESS

Overview

CoroWare, Inc is a public holding company whose principal subsidiary, CoroWare Technologies, Inc. (“CTI”), has expertise in information technology consulting, mobile robotics, and affordable collaboration. Through our subsidiary, CoroWare delivers custom engineering services, hardware and software products, and subscription services that benefit customers in North America, Europe, Australia, Asia and the Middle East. Our customers span multiple industry sectors and comprise universities, large enterprises and small businesses, software and hardware product development companies, and non-profit organizations.

Employees

As of December 31, 2012, we had sixteen (16) employees composed of one (1) full time Officer and CEO, one (1) full time Director of Sales, one (1) full time Finance Administrator, two (2) full time Business Unit Managers, eight (8) full time engineers, and three (3) part time engineers. Our employees are not represented by a union. We consider relations with our employees to be positive and productive.

COROWARE TECHNOLOGIES, INC.

CTI is a software professional services company with a strong focus on Information Technology integration and robotics integration, business automation solutions, and unmanned systems solutions to its customers in North America and Europe.

CTI’s expertise includes the deployment and integration of computing platforms and applications, as well as the development of unmanned vehicle software and solutions for customers in the research, commercial, and homeland security market segments. CTI shall continue to offer its high value software systems development and integration services that complement the growing trend in outsourced software development services in Asia, Latin America, and Eastern Europe.

CoroWare Technologies comprises three separately managed lines of business:

CoroWare Business Solutions: IT and lab management; business intelligence; software architecture, design and development; content delivery; partner and program management.

Robotics and Automation: Custom engineering such as visualization, simulation and software development; and mobile robot platforms.

Enhanced Collaboration Solution: Collaboration and conferencing products, solutions and subscription services.

The Company's revenues are principally derived from standing contracts that include Microsoft (partner management and IT professional services), a European auto manufacturer (simulation software custom development), and other customers whose product development groups require custom software development and consulting companies. Existing contract revenues vary month by month based on the demands of the clients. The Company's collaboration effort is in the early stages of growth and will require additional working capital to compete effectively against new entrants in this rapidly growing market.

CoroWare Business Solutions

CoroWare Business Solutions (CBS) offers systems integration services that help our customers deliver secure, high quality revenue generating products and solutions.

Products and Solutions :

In 2013, we announced two new products for the cloud service providers and enterprise customers:

- CoroWare Cybersecurity for Enterprise Applications, which is built upon DSI's Spread Spectrum IPTM patented network security technology.

In 2012, we also delivered the below products:

- CoroWare Usage Reporter for Vidyo, a software package that provides usage statistics for Vidyo brand high-definition video conferencing systems.
- Billing Integration Framework for Accumulus and Vidyo, a software solution that integrates flexible billing from Accumulus Corp with the call detail records from Vidyo to create more flexible video conferencing subscription services.

In early 2011, we announced CoroWare License Manager™, a software license management solution that offers Cloud Service Providers and on-premise software publishers the ability to remotely enable, monitor, and configure cloud-based applications using a centralized management server.

Business Intelligence

Our CTI's solutions development group has created a variety of business intelligence applications to enable our customers to better understand and manage the data surrounding their own products and business services.

Content Management

Our program managers are experts in Microsoft's product and solution development tools and processes. CTI uses that experience to create product specifications, develop project plans, and perform security and release management audits – with the objective of helping Microsoft deliver its solutions and products efficiently, affordably and on schedule.

Lab Management

CTI's team of experienced hardware and software deployment engineers architect, deploy and support state-of-the-art computer lab facilities that include the latest builds of operating systems, developer tools, and servers. CTI employees currently provide lab management and systems engineering support services in three Microsoft data centers and labs.

Software Development

CTI's solutions development group has been instrumental in helping product development companies, including MetraTech, design, prototype, develop and test new products and solutions. CoroWare's consulting staff comprises a wide range of software architects with over 20 years experience, "user experience" application developers, web service software developers, database consultants, and project managers.

In order to compete with outsourcing software and IT consulting companies in India and China, CoroWare established a near shore consulting services group in 2007 as a low cost alternative with same time zone presence. CoroWare's Latin America partnerships offer superior cost dynamics and a near time zone alternative to Europe / US businesses requiring Spanish language capability. CoroWare's Near Shore Consulting Services offer a stable rate against the dollar, as well as close proximity, and a familiarity with US business processes.

Robotics and Automation (R&A)

We are a mobile robotics solutions integrator in the research community and have expertise in robotics simulation and software development. Our CoroBot and Explorer product lines are being used by over 50 corporate and academic researchers today.

Custom Engineering

We offer custom engineering expertise to customers who are looking for product realization, robotics simulation, systems architecture and design, and robotic applications development services. We believe CTI is uniquely positioned with its knowledge of robotics simulation; Player-Stage and Robotic Operating System (ROS) running on Ubuntu Linux systems; Concurrency and Coordination Runtime (CCR) and Decentralized Software Services (DSS) running on Microsoft Windows systems; embedded systems software development; and hardware and software integration services to help its customers deliver innovative product and solutions.

Solutions and Products

In May 2007, we began shipping the CoroBot Classic, an affordable and flexible mobile robot that was designed to minimize the complexity of robotic development. Combining a powerful PC-class platform with a robust, object-oriented software development system empowers researchers and robotics application developers to rapidly deploy and develop robotic solutions. Some university customers are deploying CoroBot Classics for use in various lab activities, including the development of swarm robotics applications designed to leverage groups of robots to complete complex tasks.

In June 2009, we began shipping the CoroBot Explorer. With more powerful motors, larger payload capacity, articulated suspension and enclosed electronics it is suitable for indoor or outdoor usage.

In 2010 and early 2011, we announced new features for the CoroBot Explorer II platform and support for Robot Operating System, which we believe will improve our sales into the research and education market segments.

In 2012, we reorganized our robotics division and moved the facility to Charlotte, North Carolina, to take better advantage of strategic partnerships with the University of North Carolina Charlotte.

Enterprise Collaboration Solutions (ECS)

Vidyo Reseller Business

In early 2009, we launched our collaboration – now referred to as Enterprise Collaboration Solutions - initiative in order to address the needs of enterprise customers with distributed business operations that are turning to new technologies to address the cost of doing business in a world that is increasingly dependent on suppliers, partners and customers worldwide. In order to overcome these challenges, enterprise customers are looking for solutions that are demonstrably effective and operationally affordable. As a result, small, medium and large sized businesses, including consulting companies, non-profit groups, and distance learning companies, are all giving serious consideration to purchasing affordable high definition videoconferencing solutions.

Through our partnership with Vidyo (<http://www.vidyo.com>), we are deploying high definition video conferencing solutions, including collaboration room systems, and offering CoroCall™ Business Class HD Video Conferencing (<http://www.corocall.com>), an affordable high definition videoconferencing subscription service that is based on Vidyo's technology.

CoroCall Subscription Services

As CoroWare began selling the Vidyo product line in 2009, many customers expressed a desire to mitigate capital expenditures and purchase cloud-based communication services instead. In response to this customer demand, CoroWare announced its CoroCall Business Class HD Video Conferencing subscription service in 2009, and subsequently upgraded to support improved audio and video conferencing capabilities which are superior to many of our competitors today.

In 2012, we expanded the CoroCall Business Class HD Video Conferencing service with the addition of integrated call recording and webcast. In addition, we also enhanced the security of the offering by implementing 128 bit AES encryption. In 2012, we also became a reseller of VidyoCast, a broadcast service that incorporates Vidyo's network tolerant video streaming into the broadcast arena.

Although this business is still in its early stages of growth, we have won and are pursuing significant customer opportunities with financial consulting organizations, product development/sales companies, religious organizations, and employment recruiters. This also expands the options available to customers of the video conferencing service, providing custom dial in phone numbers.

CoroCall Product Line

In 2010, we announced our first enhanced collaboration product, CoroWare NameTag, a Windows-based application that lets desktop video conferencing users customize their webcam experience. We have had significant corporate adoption of NameTag.

In early 2011, we expanded our range of products when the Company announced the early adopter release of CoroCall Communications, an Internet telephony, conferencing, and communications system. CoroCall Communications is a standalone appliance server with features that were previously available only to large enterprises at a much higher price, offering customers an integrated Internet telephony solution that includes phone communications, high definition (HD) audio and video conferencing, and advanced call management. 2102 and the beginning of 2013 have brought several enhancements and additions to our CoroCall service. Recording and streaming capabilities were added to the platform allowing users to record and or stream video conferences on the fly without administrative intervention or support. Additionally our service is now deployed in a secure manner utilizing HTTPS and AES encryption, insuring that our customers' calls and data are secure from hackers and potential eavesdroppers of sensitive information. By providing these new capabilities and managing customized solutions with API management, we have developed customers in vertical markets to include Health care, Education and legal applications. Law firms are utilizing our platforms for remote depositions and more. Schools are conducting virtual field trips and extended care facilities are connecting patients with care providers via our CoroCall Videoconferencing platform.

We have expanded our distribution model by developing a network of Value Added Service Providers (VASP's). By adding CoroCall cloud based subscription services to their existing telephony, data management and other telecom services, these resellers are developing new recurring revenue streams without having to build out infrastructure to do so.

Competition

Competitors in the IT consulting market comprise a combination of large and well established companies, such as Avanade and Tata Consultancy Services; and smaller, privately held consulting companies with practices in a single vertical arena such as custom software development, telecom billing, multimedia production and many other vertical industries.

We have maintained long-term relationships and have been successful in renewing contracts and in signing multi-month or yearlong contracts with key customers - including Microsoft and MetraTech, and are building similar client relationships with new customers.

Competitors in the mobile robotics and custom engineering marketplaces have comprised iRobot (IRBT), Adept / MobileRobots (ADEP), and privately held companies such as K-Team Mobile Robotics, RoboSoft, and Evolution Robotics. New entrants in this marketplace include Aethon, neato robotics, Brock Technologies, and Contineo Robotics.

Competitors in the collaboration market include:

- Legacy videoconferencing vendors such as Polycom, Tandberg/Cisco and Lifesize/Logitech
- Legacy videoconferencing service providers, such as AT&T, that deploy and support legacy equipment from Polycom, Tandberg/Cisco and Lifesize/Logitech
- New entrants in affordable and modest quality videoconferencing services, such as oovoo and Nefsis
- New entrants into cloud based bridging and multipoint services such as Blue Jeans, Vidtel and others
- Upgrades to existing Data conferencing platforms to include multi party video within the collaboration tool. i.e. Go to Meeting, Webex.

Customers

All three divisions saw growth in their customer bases in 2012 as compared with 2011. CBS added additional contracts with existing customers and added additional large enterprise accounts as well. R&A engaged with a number of additional universities and research facilities. ECS added customers to its hosted solutions and additional resellers, as well as securing product and accessory sales to a number of customers.

ARicon Joint Venture

CoroWare, Inc. (“Company”) entered into a joint venture agreement (“Joint Venture Agreement”) with Lucas Snyder (“Snyder”) as of September 24, 2012, whereby the parties have formed a North Carolina limited liability company, ARICON, LLC, to implement a joint venture that will develop and market mobile robot platforms, applications, and solutions for the construction industry.

The Company will contribute mobile robotics development capabilities and certain equipment to the joint venture; and Snyder will contribute his construction industry knowledge, expertise and customer relationships.

Pursuant to the Joint Venture Agreement, on September 27, 2012, the Company contributed 38,000,000 shares of its common stock to Aricon, LLC at a price of \$0.001 per share in a private placement exempt from registration under the Securities Act of 1933 in reliance on Section 4(2) of the Securities Act. The aggregate proceeds of the contribution into the formation of the joint venture were \$38,000.

Regulation

Our services and products are not uniquely subject to governmental or industry regulations.

Research & Development

Our research and development activities have primarily been focused on the development of software components, mobile robot platforms such as the CoroBot Explorer and CoroCall Business Class HD Video Conferencing. We intend to continue developing hardware and software products that we believe will potentially grow CoroWare's collaboration and mobile robotics products, solutions and services.

Research and development expenses from continuing operations for the years ended December 31, 2012 and December 31, 2011 were \$58,949 and \$122,221, respectively.

Products

CoroBot Classic:

CoroBot Classic was created to minimize the complexity of robot development. By combining a powerful PC-class platform with a robust, object-oriented software development system, the CoroBot Classic empowers users to rapidly deploy and develop robotic solutions. The CoroBot Classic also assists the hardware developer with additional physical mounting space, ports, sensors and communication devices.

CoroBot Explorer:

Our CoroBot Explorer mobile robot was created to expand on the capabilities of the CoroBot Classic and deliver a rugged indoor/outdoor platform that can withstand environmental elements such as dirt, dust, leaf debris, sand, gravel and shallow puddles. Extra ports and surface mounting space make Explorer a robust and expandable research robot.

CoroBot Junior:

Our CoroBot Junior mobile robot is an affordable smart UGV that includes a water resistant chassis with an integrated PC-class CPU, on-board infrared sensors, an HD 1080p camera, and a wireless controller for teleoperation. The CoroBot Jr is available with two chassis options: 3 wheeled (2 drive motor) chassis and 4 wheel (4 drive motor) chassis.

Usage Reporter for Vidyo:

Our Usage Reporter for Vidyo is a Windows-based software package that analyzes detailed video conferencing call records, including the number of Vidyo rooms, ports, users, and conference call minutes. This software product is an affordable and effective way for customers to generate video conferencing usage statistics that can be used to distribute costs and make informed purchasing decisions.

ITEM 1A. RISK FACTORS

As a smaller reporting company, as defined in Rule 12b-2 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), we are not required to provide the information required by this item.

ITEM 1B. UNRESOLVED STAFF COMMENTS

As a smaller reporting company, as defined in Rule 12b-2 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), we are not required to provide the information required by this item.

ITEM 2. PROPERTIES

Our corporate headquarters is located at 1410 Market Street, Suite 200, Kirkland, Washington 98033. We occupy 2,988 square feet located on the second floor of a commercial office building that is composed of 9 offices, 3 conference rooms, and a reception area.

We entered into a five year term lease from August 1, 2010 to July 31, 2015, at which time our lease expires. The lease provides that we pay the following monthly rent: (a) year one - \$3,735; (b) year 2 - \$3,984; (c) year 3 - \$4,233; (d) year 4 - \$4,482; and (e) year 5 - \$4,731.

ITEM 3. LEGAL PROCEEDINGS

CoroWare is not currently a party to, nor is any of our property currently the subject of, any pending legal proceeding that will have a material adverse affect on our business. None of our directors, officers or affiliates is involved in a proceeding adverse to our business or has a material interest adverse to our business.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Prices of Common Stock

Beginning in February 2002, CoroWare's common stock was eligible for listing in the OTC Bulletin Board. Our trading symbol was "SRMW" until such time as our acquisition of Hy-Tech Technology Group, Inc. on January 31, 2003 when our symbol became "HYTT". In November 2006, our name was changed to Innova Robotics & Automation, Inc. and the trading symbol was changed to INRA. In April 2008, we became CoroWare, Inc. and our trading symbol was changed to CROE. In April 2009, in conjunction with a 1-for-300 reverse stock split, our trading symbol was changed to COWI. In January 2012, we revised the par value of our Common Stock from \$0.001 to \$0.0001. In July 2012, we effected a reverse split of 1-for-200.

Our common stock is quoted on the OTCQB exchange under the symbol, "COWI". Accordingly, there can be no assurance as to the liquidity of any markets that may develop for our common stock, the ability of holders of our common stock to sell our common stock, or the prices at which holders may be able to sell our common stock.

The following table sets forth the quarterly high and low sales prices as reported during the last two fiscal years ended December 31, 2012 and December 31, 2011.

COMMON STOCK

Year Ended December 31, 2012	High	Low
First Quarter	\$0.04	\$0.02
Second Quarter	\$0.02	\$0.02
Third Quarter*	\$0.02	\$0.00
Fourth Quarter	\$0.00	\$0.00

Year Ended December 31, 2011	High	Low
First Quarter	\$0.0048	\$0.29
Second Quarter	\$0.01	\$0.04
Third Quarter	\$0.046	\$0.015
Fourth Quarter	\$0.002	\$0.0195

These quotations represent interdealer prices, without retail markup, markdown, or commission, and may not reflect actual transactions. As of April 11, 2013, there were approximately 253 record holders of the Company's common stock. This reflects a reverse 200 for 1 reverse split of the stock on July 6, 2012.

Dividend Policy

We have never declared or paid any cash dividends on our common stock. We anticipate that any earnings will be retained for development and expansion of our business and do not anticipate paying any cash dividends in the foreseeable future. Additionally, as of December 31, 2012, we have issued and outstanding 159,666 shares of Series B Preferred Stock all of which is entitled, prior to the declaration of any dividends on common stock, to a 5% dividend, payable in either cash or common stock. The board of directors has sole discretion to declare dividends based on our financial condition, results of operations, capital requirements, contractual obligations and other relevant factors. As of December 31, 2012, \$28,304 of Series B Preferred dividends had been converted into common stock. At December 31, 2012 and 2011, there were accrued unpaid dividends of \$15,969, and cumulative undeclared dividends to Preferred Series B shareholders of \$47,900 and \$39,917, respectively, the obligation for which is contingent upon declaration by the board of directors.

Securities Authorized for Issuance under Equity Compensation Plans

The following tables set forth the information as of December 31, 2012 with respect to compensation plans under which our equity securities are authorized for issuance:

EQUITY COMPENSATION PLAN INFORMATION

DECEMBER 31, 2012

Plan Category	Number of shares to be issued upon exercise of outstanding options and warrants	Weighted average price of outstanding options and warrants	Number of securities available for future issuance under equity compensation plans (excluding securities reflected in column (a))
	(a)	(b)	(c)
Equity compensation plans approved by security holders:			
2003 Stock Option Plan	—	n/a	—
2004 Stock Option Plan	—	n/a	—
2005 Stock Option Plan	38,164	\$ 2.97	38,164
Equity Stock Compensation plan not approved by security holders:			
2006 Employee Compensation Plan	n/a	n/a	—

Edgar Filing: CoroWare, Inc, - Form 10-K

2008 Amended Incentive Stock Plan	n/a	n/a	2,890
2008 SIP – SEC File #333-151258	n/a	n/a	—
2009 Incentive Stock Plan	n/a	n/a	374,900
Total	38,164		415,954

Stock Plans

As of December 31, 2012, CoroWare had four stock compensation plans which provided for the issuance of 455,503,333 shares to employees of CoroWare or our subsidiaries as follows:

Plan Description	Authorized Shares	Remaining Shares
2006 Employee Compensation Plan	3,333	-
2008 Incentive Stock Plan	200,000,000	2,890
2009 Incentive Stock Plan	500,000	33,300
2010 Incentive Stock Plan (333-165768)	5,000,000	248,250
2011 Incentive Stock Plan (333-171325)	200,000,000	470,515
2012 Incentive Stock Plan (333-183512)	50,000,000	493,015
Total	455,503,333	1,247,970

Stock Options

As of December 31, 2012, we had one active Stock Option Plan known as the 2005 Stock Option Plan. The Plan was approved by our stockholders on November 3, 2006 and authorized the issuance of 66,667 shares of common stock. The Board of Directors on December 31, 2007 cancelled options for 26,367 shares previously granted to current employees prior to that date which were exercisable at various prices and issued 26,367 options to these employees at the closing price as of December 31, 2007 or \$3.00. The number of options issued and outstanding under the 2005 plan on December 31, 2012 is 34,831.

In addition to the options issued under the 2005 Stock Option Plan, 26,560 options were issued outside of the Plan. For services rendered, 443 options were issued at a purchase price of \$51 per share, 3,833 options were issued at \$39 per share, 4,040 options were issued at \$15 per share 14,909 options were issued at \$33 per share and 3,333 options were issued at \$1.86 per share. The only options that remain outstanding are the 3,333 options that were issued at \$1.86 per share.

ITEM 6. SELECTED FINANCIAL DATA.

As a smaller reporting company, as defined in Rule 12-b-2 of the Exchange Act, we are not required to provide the information required by this item.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Cautionary and Forward Looking Statements

This section and other parts of this Form 10-K contain forward-looking statements that involve risks and uncertainties. Forward-looking statements can also be identified by words such as “anticipates,” “expects,” “believes,” “plans,” “predicts,” and similar terms. Forward-looking statements are not guarantees of future performance and CoroWare’s actual results may differ significantly from the results discussed in the forward-looking statements. The following discussion should be read in conjunction with the consolidated financial statements and notes thereto included in Item 8 of this Form 10-K. We assume no obligation to revise or update any forward-looking statements for any reason, except as required by law.

There is no assurance that we will be profitable, we may not be able to successfully develop, manage or market our products and services, we may not be able to attract or retain qualified executives and technology personnel, our products and services may become obsolete, government regulation may hinder our business, additional dilution in outstanding stock ownership may be incurred due to the issuance of more shares, warrants and stock options, or the exercise of warrants and stock options, and other risks inherent in the our businesses.

We undertake no obligation to publicly revise these forward-looking statements to reflect events or circumstances that arise after the date hereof. Readers should carefully review the factors described in other documents we file from time to time with the Securities and Exchange Commission, including the Quarterly Reports on Form 10-Q and Annual Report on Form 10-K filed by us in 2012 and any Current Reports on Form 8-K filed by us.

CRITICAL ACCOUNTING POLICIES

General

The consolidated financial statements and notes included in our quarterly and annual financial statements contain information that is pertinent to this management's discussion and analysis. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amounts of our assets and liabilities, and affect the disclosure of any contingent assets and liabilities. We believe these accounting policies involve judgment due to the sensitivity of the methods, assumptions, and estimates necessary in determining the related asset and liability amounts. The significant accounting policies are described in the notes to our financial statements and notes included elsewhere in this Form 10-K.

Revenue Recognition

We derive our software system integration services revenue from short-duration, time and material contracts. Generally, such contracts provide for an hourly-rate and a stipulated maximum fee. Revenue is recorded only on executed arrangements as time is incurred on the project and as materials, which are insignificant to the total contract value, are expended. Revenue is not recognized in cases where customer acceptance of the work product is necessary, unless sufficient work has been performed to ascertain that the performance specifications are being met and the customer acknowledges that such performance specifications are being met. We periodically review contractual performance and estimate future performance requirements. Losses on contracts are recorded when estimable. No contractual losses were identified during the periods presented.

We recognize revenue for our software and software professional services when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collectability is probable. Product sales are recognized by us generally at the time product is shipped. Shipping and handling costs are included in cost of goods sold.

We account for arrangements that contain multiple elements in accordance with FASB ASC 605-25, Revenue Recognition, Multiple Element Arrangements. When elements such as hardware, software and consulting services are contained in a single arrangement, or in related arrangements with the same customer, we allocate revenue to each element based on its relative fair value, provided that such element meets the criteria for treatment as a separate unit of accounting. The price charged when the element is sold separately generally determines fair value. In the absence of fair value for a delivered element, we allocate revenue first to the fair value of the underlying elements and allocate the residual revenue to the delivered elements. In the absence of fair value for an undelivered element, the arrangement is accounted for as a single unit of accounting, resulting in a delay of revenue recognition for the delivered elements until the undelivered elements are fulfilled. We limit the amount of revenue recognition for delivered elements to the amount that is not contingent on future delivery of products or services or subject to customer-specified return or refund privileges.

We recognize revenue from the sale of manufacturer's maintenance and extended warranty contracts in accordance with FASB ASC 605-45, Revenue Recognition, Principal Agent Considerations net of its costs of purchasing the related contracts.

Our ECS revenue is comprised of both services and products. ECS subscription service revenues are generated through the sale of CoroCall™, a managed video conferencing service and CoroCall Communications, a managed telephone service. Our contracts provide for usage pricing or when paid for pre-paid service. We recognize this revenue in the period that the services or minutes are used and prepaid. Product revenues are realized partly through the sale of Vidyo's product line, including room systems and back-end infrastructure, partly through the sale of CoroWare collaboration products, including CoroWare Usage Reporter for Vidyo, a software package that provides usage statistics for Vidyo brand high-definition video conferencing systems, and partly through the sales of related accessories. Revenues for these products are recognized upon delivery to the customer.

Share-based payment

Stock based compensation expense is recorded in accordance with FASB ASC 718, Compensation – Stock Compensation, for stock and stock options awarded in return for services rendered. The expense is measured at the grant-date fair value of the award and recognized as compensation expense on a straight line basis over the service period, which is the vesting period. We estimate forfeitures that we expect will occur and record expense based upon the number of awards expected to vest.

There were no options issued during the years ending December 31, 2012 and 2011.

Derivative Financial Instruments

Derivative financial instruments, as defined in FASB ASC 815, Derivatives and Hedging, consist of financial instruments or other contracts that contain a notional amount and one or more underlying variables (e.g. interest rate, security price or other variable), require no initial net investment and permit net settlement. The caption Derivative Liability consists of (i) the fair values associated with derivative features embedded in various convertible note financings and (ii) the fair values of the detachable warrants that were issued in connection with those financing arrangements.

We generally do not use derivative financial instruments to hedge exposures to cash-flow, market or foreign-currency risks. However, we have entered into certain other financial instruments and contracts, such as debt financing arrangements and freestanding warrants with features that are either (i) not afforded equity classification, (ii) embody risks not clearly and closely related to host contracts, or (iii) may be net-cash settled by the counterparty. As required by FASB ASC 815, these instruments are required to be carried as derivative liabilities, at fair value, in our financial statements.

We estimate fair values of derivative financial instruments using various techniques (and combinations thereof) that are considered to be consistent with the objective of measuring fair values. In selecting the appropriate technique, we consider, among other factors, the nature of the instrument, the market risks that it embodies and the expected means of settlement. For less complex derivative instruments, such as free-standing warrants, we generally use the Black-Scholes-Merton option valuation technique because it embodies all of the requisite assumptions (including trading volatility, estimated terms and risk free rates) necessary to value these instruments. For complex derivative instruments, such as embedded conversion options, we generally use the Flexible Monte Carlo valuation technique because it embodies all of the requisite assumptions (including credit risk, interest-rate risk and exercise/conversion behaviors) that are necessary to value these more complex instruments. Estimating fair values of derivative financial instruments requires the development of significant and subjective estimates that may, and are likely to, change over the duration of the instrument with related changes in internal and external market factors. In addition, option-based techniques are highly volatile and sensitive to changes in the trading market price of our common stock, which has a high-historical volatility. Since derivative financial instruments are initially and subsequently carried at fair values, our income will reflect the volatility in these estimate and assumption changes.

PLAN OF OPERATION

CoroWare is well positioned for managed growth in Fiscal Year 2013 through continued growth of our CoroWare Business Solutions and Robotics & Automation business units, and rapid growth of our Enterprise Collaboration Solutions business unit.

The CoroWare Business Solutions (CBS) business unit anticipates growing its revenues by delivering business intelligence, software development, IT consulting, lab management and release management professional services through its long term clients, including Microsoft. As well, it anticipates growing its revenues through the sales of products and solutions – such as CoroWare Billing Integration Framework and CoroWare License Manager - that help cloud service providers recognize revenues by delivering conferencing and application services. Additional revenue growth is expected through the sales of enterprise and cloud cyber security solutions.

The Robotics & Automation (R&A) business unit expects to achieve its revenue objectives by offering affordable mobile robotics platforms, products and custom solutions to researchers in the university, commercial and homeland security market segments. As well, the Robotics & Automation group is well positioned to pursue custom engineering opportunities with clients who are developing innovative software services, solutions and products that leverage our expertise in simulation, visualization, mobile robotics, and product realization.

The Enterprise Collaboration Solutions (ECS) business unit plans to rapidly grow its revenues by selling a combination of services and products. Collaboration service revenues are generated through the sale of CoroCall™, a managed business class HD video conferencing service that small, medium and large sized businesses - including consulting companies, non-profit groups, and distance learning companies – are considering as an alternative to purchasing and operating videoconferencing equipment and infrastructure. Product revenues are being realized partly through the sale of Vidyo's product line – including room systems and back-end infrastructure – partly through the sale of CoroWare collaboration products, partly through the sales of related accessories, and partly through the sales of VidyoCast products and services.

In order to achieve revenue and margin objectives in an increasingly global and competitive market, all of CoroWare's business units offer their customers the option of using CoroWare's near-shore resources, which comprise a team of highly capable IT architects, developers and testers with experience in software application development and integration, rich internet applications development, partner management portal development, IT infrastructure, and Quality Assurance.

We do not expect to sell any of CoroWare's fixed assets, including property or equipment in the next twelve months, nor do we expect to purchase any real property in the next twelve months. During the next twelve months we expect to purchase certain equipment to support software development, testing and continued deployment of CoroWare technologies. Additionally, we expect to purchase office equipment, computer equipment and laboratory development and testing equipment to support our planned personnel increase.

We are internally developing an investor relations program that will help the company communicate more effectively and actively with CoroWare shareholders, and generate greater awareness of CoroWare and our services, solutions and products.

Recent Financing Transactions

(a) \$17,500 Asher financing:

On August 9, 2012, the Company consummated an unsecured Securities Purchase Agreement with an unrelated third party for the sale by the Company of its 8% secured convertible debentures in the aggregate principal amount of \$17,500, net of deferred financing costs of \$2,500.

The debenture matures on May 13, 2013, nine months from the date of issuance. The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a

conversion rate equal to 50% of the market price, which is defined as the average of the lowest 3 trading prices for the Company's common stock during the 30 trading days prior to conversion.

In the Company's evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: effective term (using the remaining term of the host instrument); effective volatility (222.71% - 212.43%); and effective risk adjusted yield (12.5%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$15,452 at inception. There was no derivative expense recognized at inception.

There were no conversions on this instrument during the year ending December 31, 2012.

(b) \$20,000 Asher financing:

On August 2, 2012, Cariou sold \$20,000 of his convertible note to Asher. In connection with the sale, the Company restated the interest rate on the note from 15% to 10% and changed the conversion rate from the 5 day average closing price using the 5 trading days prior to conversion to 40% of the Market Price (defined as the average of the (1) lowest trading price for common stock during the 30 day trading period ending one trading day prior to the date of conversion). Additionally, the beneficial ownership limit was increased from 4.99% to 9.99%.

During the year ending December 31, 2012, Asher converted \$400 of the convertible debenture into 1,333,333 shares of the Company's common stock.

(c) \$25,000 Asher financing:

On October 10, 2012, , the Company consummated an unsecured Securities Purchase Agreement with an unrelated third party for the sale by the Company of its 8% secured convertible debentures in the aggregate principal amount of \$25,000.

There were no conversions on this instrument during the year ending December 31, 2012.

(d) \$11,440 Tangiers financing:

On March 7, 2012, the Company entered into an \$11,440 Convertible Note Agreement with an unrelated third party ("Tangiers"). The note calls for interest at 10% through the maturity date of March 7, 2013 and default interest at 20% thereafter.

The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal to 50% of the lowest trading price in the 7 days prior to the conversion date. Upon default, the conversion price changes to 40% of the lowest trading price in the 7 days prior to the conversion date.

(e) \$9,750 Tangiers financing:

On March 7, 2012, Robert Mackie sold his note to Tangiers. The note calls for interest at 10% through the maturity date of March 7, 2013 and default interest at 15% thereafter.

The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal to 50% of the lowest trading price in the 7 days prior to the conversion date. Upon default, the conversion price changes to 40% of the lowest trading price in the 7 days prior to the conversion date.

(f) \$20,000 Panache financing:

On August 12, 2012, Cariou sold \$20,000 of his convertible note to Panache. The note calls for interest at 10%.

There were no conversions on this instrument during the year ending December 31, 2012.

(g) \$10,000 Magna financing:

On August 20, 2012, Cariou sold \$10,000 of his convertible note to Magna Group, LLC ("Magna"). In connection with the sale, the maturity date was extended from May 4, 2011 to April 20, 2013, the Company restated the interest rate on the note from 15% to 12% and changed the conversion rate from the 5 day average closing price using the 5 trading days prior to conversion to 60% of the lowest trading price for common stock during the 3 trading days prior to the date of conversion. Additionally, if the stock is chilled by the DTC at any point in which this agreement is outstanding, the discount increases by an additional 8%.

There were no conversions on this instrument during year ending December 31, 2012.

(h) \$54,060 Ridge Point financing:

On August 30, 2012, the Company entered into a \$54,060 convertible note with LBB & Associates ("LBB"). The note bears interest at 10% and matures March 24, 2013. The note is convertible into common stock of the Company at a conversion rate equal to 65% of the average of the lowest two trading price for common stock during the 5 day trading period prior to the date of conversion.

On September 21, 2012, LBB sold this note to Ridge Point Capital. During the year ending December 31, 2012, there were three conversions on this debenture for 27,000,000 shares and \$9,870.

(i) \$6,000 Blackridge financing:

On April 4, 2012, the Company entered into a secured promissory note with Blackridge Capital, LLC. The note bears interest at 5% and matured May 25, 2012.

RESULTS OF OPERATIONS

YEAR ENDED DECEMBER 31, 2012 COMPARED TO YEAR ENDED DECEMBER 31, 2011:

During the year ended December 31, 2012 (the "2012 Period") revenues were \$1,309,251 compared to revenues of \$1,799,352 during the year ended December 31, 2011 (the "2011 Period"). Revenues in the 2012 period were lower compared to the 2011 period. In the third quarter of the 2012 Period, two of our enterprise customers reduced their

contract staffing budgets, mobile robot sales were lower than expected, and HD videoconferencing sales were delayed until later in the year. Revenues in the fourth quarter of the 2012 Period as enterprise customers purchased HD videoconferencing equipment and university customers purchased mobile robotics products.

Cost of goods sold was \$846,885 and \$1,214,737 for the 2012 Period and the 2011 Period, respectively. Cost of goods sold primarily represents labor and labor-related costs in addition to overhead costs.

Gross Profits decreased to \$462,366 during the 2012 Period compared to \$584,615 during the 2011 Period. Gross profits decreased during the 2012 Period as a result of Gross revenues declining. The Gross profit percentage in the 2012 Period was 35.3% compared to 32.5% in the 2011 Period. The increased Gross profit percentage was the result of an improved utilization of its IT consulting resources; a reduction in the cost of goods sold for mobile robots; and complementing videoconferencing equipment sales with premium deployment and support services.

Operating expenses were \$1,113,120 for the 2012 Period compared to \$1,321,480 for the 2011 Period. General and administrative expenses amounted to \$750,211 during the 2012 Period compared to \$863,299 for the 2011 Period, and represented mostly labor and related compensation costs, legal & professional fees, outside services, travel expenses, rental expense and related office expenses. Sales and marketing expenses were \$291,961 for the 2012 Period compared to \$314,195 for the 2011 Period. Depreciation and amortization costs were \$12,000 for the 2012 Period compared to \$21,765 for the 2011 Period.

Loss from operations was \$650,754 for the 2012 Period compared to \$736,865 for the 2011 Period. Loss from operations was lower in the 2012 Period due to a modest decrease in Cost of revenues, a modest decrease in Sales and marketing expenses, a decrease in research and development, and a decrease in General and Administrative expenses throughout the 2012 Period.

Other income (expense) was (\$7,079,453) during the 2012 Period compared to (\$1,291,730) in the 2011 Period. Other income (expense) is comprised primarily of derivative income (expense) and amortization of debt discount and deferred finance costs. The derivative expense for the 2012 Period was \$(6,568,387) compared to expense of (\$485,772) for the 2011 Period. The embedded conversion features associated with our convertible debentures are valued based on the number of shares that are indexed to that liability. Keeping the number of shares constant, the liability associated with the embedded conversion features increases as our share price increases and, likewise, decreases when our share price decreases. Derivative income (expense) displays the inverse relationship. The derivative expense in the 2012 Period is the result of the decrease in our stock price on the measurement dates at the beginning and end of the year (\$0.04 at December 31, 2011 versus \$0.0001 at December 31, 2012). A decrease in the stock price resulted in a decreased value of the embedded conversion feature (using the Monte Carlo calculation) which resulted in derivative income. Interest expense for the 2012 Period was \$568,964 compared to \$804,893 for the 2011 Period.

Net loss for the 2012 Period was \$7,730,208 compared to net loss of \$2,028,596 for the 2011 Period. The increased Net loss was the result of the increased Derivative expense incurred during the 2012 Period.

LIQUIDITY AND CAPITAL RESOURCES

During the year ended December 31, 2012 (the "2012 Period") we used \$369,390 net cash from operating activities versus a reduction of \$71,268 for the year ended December 31, 2011 (the "2011 Period").

Cash outflows from the Company's investing activities in the 2012 Period were \$1,371, compared with \$3,626 in the 2011 Period.

In the 2012 Period, the Company generated \$370,934 in cash from financing activities. This primarily reflects borrowings on convertible debentures. The Company's financing activities generated \$75,416 of cash during the 2011 Period.

At December 31, 2012, we had current assets of \$213,194, current liabilities of \$18,647,068, negative working capital of \$18,433,874 and an accumulated deficit of \$35,096,503.

We presently do not have any available credit, bank financing or other external sources of liquidity. We will need to obtain additional capital in order to expand operations and become profitable. In order to obtain capital, we may need to sell additional shares of our common stock or borrow funds from private lenders. There can be no assurance that we will be successful in obtaining additional funding. We will still need additional capital in order to continue operations until we are able to achieve positive operating cash flow. Additional capital is being sought, but we cannot guarantee that we will be able to obtain such investments. Financing transactions may include the issuance of equity or debt securities, obtaining credit facilities, or other financing mechanisms. However, even if we are able to raise the funds required, it is possible that we could incur unexpected costs and expenses, fail to collect significant amounts owed to us, or experience unexpected cash requirements that would force us to seek alternative financing. Furthermore, if we issue additional equity or debt securities, stockholders may experience additional dilution or the new equity securities may have rights, preferences or privileges senior to those of existing holders of our common stock. If additional financing is not available or is not available on acceptable terms, we will have to curtail our operations.

OFF-BALANCE SHEET ARRANGEMENTS

We do not have any off-balance sheet arrangements that are reasonably likely to have a current or future effect on our financial condition, revenues, results of operations, liquidity, or capital expenditures.

CONTRACTUAL OBLIGATIONS

The following table sets forth the contractual obligations of the Company as of December 31, 2012:

Contractual Obligations	Payments due by Period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Convertible debt	\$2,355,354	\$2,206,247	\$149,107	\$ -	\$ -
Notes payable	202,232	202,232	-	-	-
Notes payable, related parties	208,913	208,913	-	-	-
Small Business Administration loan	980,450	980,450	-	-	-
Operating leases	189,240	49,053	140,187	-	-
Total	\$3,936,189	\$3,646,895	\$289,294	\$ -	\$ -

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a smaller reporting company, as defined in Rule 12b-2 of the Exchange Act, we are not required to provide the information required by this item.

ITEM 8. FINANCIAL STATEMENTS

All financial information required by this Item is attached hereto at the end of this report beginning on page F-1 and is hereby incorporated by reference.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURES

None.

ITEM 9A-(T). CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures:

As of December 31, 2012, our principal executive officer and principal financial officer evaluated the effectiveness of the company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended). This evaluation of the disclosure controls and procedures included controls and procedures designed to ensure that information required to be disclosed by us in our reports that we file or submit under the Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Such disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed by the company in the reports that it files or submits under the Act is accumulated and communicated to our management, including our principal executive and principal financial officers, to allow timely decisions regarding required disclosure. Based on this evaluation, the company's principal executive officer and principal financial officer concluded that the company's disclosure controls and procedures were effective as of December 31, 2012.

Changes in Internal Control over Financial Reporting

No changes in the Company's internal control over financial reporting have come to management's attention during the Company's last fiscal year that have materially affected, or are likely to materially affect, the Company's internal control over financial reporting.

Limitations on Controls

Management does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent or detect all error and fraud. Any control system, no matter how well designed and operated, is based upon certain assumptions and can provide only reasonable, not absolute, assurance that its objectives will be met. Further, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the Company have been detected.

Management's Report on Internal Control over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system was designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements.

The Company's management assessed the effectiveness of our internal control over financial reporting as of December 31, 2012. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control—Integrated Framework*. Based on its assessment our management believes that, as of December 31, 2012, our internal control over financial reporting is effective.

Auditor's Attestation

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

ITEM 9B. OTHER INFORMATION

None.

PART III**ITEM 10. DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE**

Our directors, principal executive officers and significant employees as of December 31, 2012 are as specified on the following table:

Name	Age	Position
Lloyd Spencer	56	Chief Executive Officer, Interim Chief Financial Officer, Director, Treasurer
Shanna Gerrard	56	Secretary
Martin Nielson	61	Director
John Kroon	72	Chairman, Director

The principal occupations for each of our current executive officers and directors are as follows:

LLOYD T. SPENCER became our Chief Executive Officer on January 28, 2008, interim Chief Financial Officer on November 17, 2008 and a member of the board of directors and Vice President since September 20, 2007. Beginning in May 2006, Mr. Spencer has served as President and CEO of our subsidiary, CoroWare Technologies, Inc. Beginning in October 2004, Mr. Spencer was co-founder and President of CoroWare, Inc., a Washington State private company that was acquired by Innova Holdings, Inc., which is now known as CoroWare, Inc. From June 2002 to September 2004, Mr. Spencer was Vice President of Sales at Planet Technologies, a systems integration company based in Germantown, MD. From November 1996 to August 2001, Mr. Spencer was Solutions Unit Manager and Group Product Manager at Microsoft in Redmond, Washington. Prior to Microsoft, Mr. Spencer served as Assistant Vice-President and Business Unit Manager at Newbridge Networks; and Product Line Manager at Sun Microsystems. He is an active contributor to the robotics community in the Seattle area through his participation in the Seattle Robotics Society. He is also instrumental in initiating and fostering 4H robotics clubs and programs in Washington State. Mr. Spencer received his Bachelors degree from Cornell University in 1980 with a major in Biology and Animal Science and with an emphasis in Immunogenetics.

MARTIN NIELSON was the Company's Chief Executive Officer and Chairman of the Board of Directors from May 2003 until he resigned as Chairman effective June 1, 2004. Mr. Nielson is still on our Board of Directors. Mr. Nielson is a principal of Altos Bancorp, Inc., serving as its Chairman and Chief Executive Officer since November 2002. He has also served as Chief Executive Officer and director of Inclusion Inc. since September, 2000. Mr. Nielson and Altos were instrumental in assisting the Company in the negotiations that led to the Company's settlement of its litigation with SunTrust Bank and in securing the financing that funded that settlement. Mr. Nielson will continue as a director of the Company. Mr. Nielson is a senior executive with extensive experience in operations and finance. He has been a business builder for 30 years with such companies as Gap, Businessland, and Corporate Express. Altos,

which is an outgrowth of Nielson's M&A practice during his ten years in London is engaged in providing investment banking and business development services to growth oriented, emerging companies throughout the United States and Europe. Altos was retained by the Company to act as its business advisor, but that contract was concluded to coincide with the acquisition of RWT. Mr. Nielson is also a director of Advanced Communications Technologies, Inc. Mr. Nielson is the founder, sole director, and chief executive officer of E-Waste Systems, Inc.

JOHN C. KROON became our Director in April 2007 and became our Chairman of the Board in September 2010. Dr. Kroon was born in the Netherlands and his family emigrated from Amsterdam to Ottawa, Canada in 1957. He is a dual citizen of the US and Canada. He is a Life Senior Member of the Institute of Electrical & Electronics Engineers (IEEE). Dr. Kroon began his career in 1958 in Ottawa as a Tech. and then Chemist for Eldorado Mining & Refining (now Cameco Corp.), engaged in Uranium mining and processing. Dr. Kroon received both his B.Sc. (1966) and PhD degrees (1972) in Nuclear Physics from the University of Ottawa in Canada. From 1971 he worked as a Research Scientist in Candu Reactor Instrumentation at Atomic Energy of Canada in Chalk River, Ontario, Canada and joined a start-up company Reuter Stokes Canada in Cambridge, Ontario in 1972. In 1974, Dr. Kroon transferred to Reuter-Stokes Electronic Components in Cleveland, Ohio as the VP of Applied Technology developing radiation sensor systems for oil-well logging, thickness gauging and in-core sensors for commercial and government nuclear reactors. General Electric acquired Reuter-Stokes in 1984 and Dr. Kroon became the President of Reuter-Stokes in 1986. This position led to a varied 17-year career with GE as a Senior Executive that included a 4-year assignment as President of GEFanuc Europe's Industrial Automation Business in 1991, headquartered in Frankfurt and Luxembourg. He became Vice-President of Corporate Strategies and Business Development in 1995 for GEFanuc North America in Charlottesville, Virginia and laid the groundwork for several acquisitions to further product diversification and top line growth. From June 2002 to May 2004, Dr. Kroon was the President of ImageGuide, Inc., a medical device start-up company in Baltimore, Maryland.

SHANNA GERRARD has been with CoroWare since 2010 and assumed the position of Corporate Secretary in April 2011. She has over 20 years of management experience and is certified in product management and marketing. Before coming to CoroWare, she worked in product management positions with The Church of Jesus Christ of Latter-day Saints and Intel, managing product launch and deployment of various conferencing and collaboration solutions. She has worked with information technology in a variety of industries including non-profit, semi-conductor, medical and medical technology, and legal. She has her Masters Degree in Management from Worcester Polytechnic Institute and her Bachelor's Degree from Dartmouth College.

Our directors will serve until the next annual meeting of stockholders. Our executive officers are appointed by our Board of Directors and serve at the discretion of the Board of Directors. We expect our Board, in the future, to appoint an audit committee, nominating committee and compensation committee—none of which now exist--and to adopt a charter relative to each such committee. We intend to appoint such persons to committees of the Board as are expected to be required to meet the corporate governance requirements imposed by a national securities exchange, although we are not required to comply with such requirement until we elect to seek listing on a national securities exchange

Section 16(a) of the Securities and Exchange Act of 1934

Section 16 (a) of the Securities and Exchange Act of 1934 requires the Company's officers and directors and persons who beneficially own more than 10% of the Company's common stock (collectively, "Reporting Persons") to file reports of beneficial ownership and changes in beneficial ownership with the SEC. Reporting Persons are required by SEC regulations to furnish the Company with copies of all Section 16(a) forms they file. We believe that all Reporting Persons complied with all applicable reporting requirements, except for the late filings of Form 3 (Initial Statement of

Beneficial Ownership of Securities), and 4 (Statement of Changes of Beneficial Ownership of Securities) filings of John Kroon, Lloyd Spencer, Shanna Gerrard, and Martin Nielson.

CODE OF ETHICS DISCLOSURE COMPLIANCE

CoroWare has adopted a Code of Ethics that applies to our principal executive officer, principal financial officer, principal accounting officer and other employees performing similar functions. The Code of Ethics was revised and updated in 2007 and approved by the board on December 6, 2007. The Code of Ethics is in the investor section of our website at www.coroware.com.

19

ITEM 11. EXECUTIVE COMPENSATION**Summary Compensation Table**

The following table sets forth the cash compensation (including cash bonuses) paid or accrued and equity awards granted by CoroWare for years ended December 31, 2012 and 2011 to our Chief Executive Officer and our two most highly compensated officers other than the Chief Executive Officer at December 31, 2012 whose total compensation exceeded \$100,000.

Name & Principal Position	Year	Salary	Bonus	Stock Awards	Option Awards	Non-equity Incentive Plan Compensation	Change in Pension Value and Non-Qualified Deferred Compensation Earnings	All other Compensation	Totals
Lloyd Spencer (1)	2012	\$26,639	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —	\$26,639
	2011	\$59,542							\$59,542
David Hyams (2)	2012	\$62,374							\$62,374
	2011	\$98,372							\$98,372

Notes:

- Lloyd Spencer has served as CEO since January 28, 2008 and interim CFO since November 17, 2008. Prior to that, he was Vice President of Business Development and Director. Mr. Spencer is President of our subsidiary, CoroWare Technologies, Inc. with an annual salary of \$150,000. On May 16, 2006, Mr. Spencer entered into an employment agreement which granted him 1,667 stock options to purchase restricted shares of CoroWare's common stock at \$54 which were cancelled on December 31, 2007 and converted into restricted common stock one-for-one and issued in lieu thereof by action of the Board of Directors. Mr. Spencer was granted 1,667 options to purchase restricted shares of CoroWare common stock at \$12 on May 16, 2006. These options have a ten year term and vest ratably over three years. On December 31, 2007 the options were re-priced from \$12 to \$3. In February 2008, these options were converted to 1,667 shares of CoroWare common stock. On September 12, 2007, Mr. Spencer was granted options to purchase restricted shares of the CoroWare common stock at \$12 per share. On December 31, 2007, the options were re-priced from \$12 to \$3. As of December 31, 2010, all 5,000 of these options have vested.
- (2) David Hyams is Chief Technology Officer with a salary of \$150,000. On May 16, 2006, Mr. Hyams entered into an employment agreement which granted him 1,667 stock options to purchase restricted shares of CoroWare's common stock at \$54 which were cancelled on December 31, 2007 and converted into restricted common stock one-for-one and issued in lieu thereof by action of the Board of Directors. Mr. Hyams was granted 1,667 options to purchase restricted shares of CoroWare common stock at \$12 on May 16, 2006. These options have a ten year term and vest ratably over three years. On December 31, 2007 the options were re-priced from \$12 to \$3. In February 2008, these options were converted to 1,667 shares of CoroWare common stock. On September 12, 2007, Mr. Hyams was granted options to purchase restricted shares of the CoroWare common stock at \$12 per

share. On December 31, 2007, the options were re-priced from \$12 to \$3. As of December 31, 2010, all 5,000 of these options have vested. In 2011, Mr. Hyams agreed to a modification of his employment contract which changed his salary to an hourly rate resulting in gross income of \$126,000 per year of which a portion is paid in cash as noted in the table above and a portion is deferred.

Stock Option Plans

CoroWare's 2005 Stock Option Plan was ratified by the Stockholders of the Corporation at a Special Meeting of the Stockholders on November 3, 2006. The plan is presently administered by our board of directors, which selects the eligible persons to whom options shall be granted, determines the number of common shares subject to each option, the exercise price therefore and the periods during which options are exercisable, interprets the provisions of the plan and, subject to certain limitations, may amend the plan. Each option granted under the plan shall be evidenced by a written agreement between the company and the optionee. Options may be granted to employees (including officers) and directors and certain consultants and advisors. Options granted under the plan are not transferable, except by will and the laws of descent and distribution.

Name	Number of Shares Underlying Options	% of Total Options Granted to Employees	Exercise Price	Expiration Date
Lloyd Spencer (See Note 1)	25	14.2 %	\$600.00	9/12/2017
David Hyams (see Note2)	25	14.2 %	\$600.00	9/12/2017

Notes:

(1) Lloyd Spencer has served as CEO since January 28, 2008 and interim CFO since November 17, 2008. Prior to that, he was Vice President of Business Development and Director. Mr. Spencer is President of our subsidiary, CoroWare Technologies, Inc. with an annual salary of \$150,000. On May 16, 2006, Mr. Spencer entered into an employment agreement which granted him 1,667 stock options to purchase restricted shares of CoroWare, Inc.'s common stock at \$54 which were cancelled on December 31, 2007 and converted into restricted common stock one-for-one and issued in lieu thereof by action of the Board of Directors. Mr. Spencer was granted 1,667 options to purchase restricted shares of our common stock at \$12 on May 16, 2006. These options have a ten year term and vest ratably over three years. On December 31, 2007 the options were re-priced from \$12 to \$3. In February 2008, these options were converted to 1,667 shares of our common stock. On September 12, 2007, Mr. Spencer was granted options to purchase restricted shares of our common stock at \$12 per share. On December 31, 2007, the options were re-priced from \$12 to \$3. As of December 31, 2012, all 5,000 of these options have vested.

(2) Mr. Hyams entered into an employment agreement and was granted 1,667 options to purchase restricted shares of the Company's common stock at a purchase price of \$54, expiring in ten years, and vesting ratably over three years. The Board of Directors voted to re-price these options to \$12 at September 12, 2007 and again to \$3 at December 31, 2007. On February 4, 2008 these options were converted into 1,667 share of the Company's common stock as per a directive from our board of directors. On September 12, 2007 Mr. Hyams was granted 5,000 options to

purchase restricted shares of CoroWare common stock at \$12 per share. On December 31, 2007 the options were re-priced \$3. At December 31, 2012, all 5,000 of those options are vested.

Except as described above no other equity awards were made in 2012 and 2011 to any of the Executive Officers.

Outstanding Equity Awards at Year End

The following table sets forth information for the named executive officers regarding the number of options and stock awards, as well as the exercise prices and expiration dates thereof, as of December 31, 2012.

Name	Option Awards				Stock Awards				
	Number of Securities Underlying Unexercised Options (#) Exercisable	Number of Securities Underlying Unexercised Options (1)	Equity Incentive Plan Awards: Number of Securities Underlying Unearned Options (#)	Option Exercise Price (\$)	Option Expiration Date	Number of Shares or Units of Stock That Have Not Vested (#)	Market Value of Shares or Units of Stock That Have Not Vested (\$)	Equity Incentive Plan Awards: Number of Unearned Shares, Units or Rights That Have Not Vested (#)	Equity Incentive Plan Awards: Market or Payout Value of Unearned Shares, Units or Rights That Have Not Vested (\$)
Lloyd Spencer	5,000	—	—	\$ 3	9/2017	—	—	—	—
David Hyams	5,000	—	—	\$ 3	9/2017	—	—	—	—

(1) These awards rest ratably over three years from the date of grant and are exercisable for ten years.

Director's Compensation

CoroWare, Inc. has not paid and does not presently propose to pay cash compensation to any director for acting in such capacity. For 2012 and 2011 services, each director was awarded 4,500,000 restricted shares of our common stock. In addition, the chairman was awarded 2,250,000 shares. Neither director has received his shares for 2011, nor for 2012 services. A liability has been established for \$14,249 for the remaining board fees that have yet to be paid.

The directors received the following common stock issuances for their service in 2012 and 2011:

Director	Restricted Value Common	Restricted Value Common
----------	-------------------------	-------------------------

	Stock Issued in 2012 for services		Stock Issued in 2011 for services	
Martin Nielson	-	\$ -	-	\$ -
John Kroon	-	-	-	-
Total	-	\$ -	-	\$ -

Employment Agreements with Executive Officers

Currently there is an employment agreement with Lloyd Spencer, CEO and interim CFO of CoroWare, Inc., and President and CEO of CoroWare Technologies, Inc. We entered into a five year employment agreement with Mr. Spencer on May 16, 2006. Under the terms of this agreement, Mr. Spencer is to serve as the President of CoroWare and to provide services as needed. His salary is \$150,000 per annum. During 2011, Mr. Spencer reduced his annual salary to \$59,541, of which \$40,000 was deferred. During 2012, an additional \$17,650 was deferred. An annual bonus may be awarded at the discretion of the board of directors. At the inception of the agreement, Mr. Spencer was awarded 16,667 stock options to purchase CoroWare, Inc. common stock at \$5.40 per share. These options vest annually over three years and terminate on the tenth anniversary of the date of grant.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table sets forth certain information regarding the beneficial ownership of our common stock as of April 2, 2013 by each person or entity known by us to be the beneficial owner of more than 5% of any class of our voting securities, each of our directors and named executive officers, and all of our directors and executive officers as a group. Beneficial ownership has been determined in accordance with Rule 13d-3 of the Securities Exchange Act of 1934, as amended. Generally, a person is deemed to be the beneficial owner of a security if he has the right to acquire voting or investment power within 60 days.

Percentage ownership in the following table is based on 2,202,838,008 shares of common stock outstanding and 100,000 shares of Series D Convertible Preferred Stock outstanding as of April 11, 2013. A person is deemed to be the beneficial owner of securities that can be acquired by that person within 60 days from April 11, 2013 upon the exercise of options, warrants or convertible securities, or other rights. Each beneficial owner's percentage ownership is determined by dividing the number of shares beneficially owned by that person by the base number of outstanding shares, increased to reflect the shares underlying options, warrants, convertible securities, or other rights included in that person's holdings, but not those underlying shares held by any other person.

Name and Address of Beneficial Owner	Amount and Nature of Common Stock Beneficial Ownership	Percent of Class
Lloyd Spencer 18529 NE 184 th Street Woodinville, WA 98072	54,216	0.003%
Shanna Gerrard 131 Wildwood Dr	5,000	0.000%

Edgar Filing: CoroWare, Inc, - Form 10-K

Prescott AZ 86305 Martin Nielsen 12111 Hilltop Drive Los Altos, CA 94024	11,589	0.000%
John Kroon PO Box 3846 Rancho Santa Fe, CA 92067	144	0.000%
Directors and Officers as a Group (4 persons)	70,949	0.003%
Panache Capital 303 Merrick Road Suite 504 Lynbrook, NY 11563	118,720,000	5.389%

Name of Series D Stockholder	Number of Shares of Common Stock Held	Number of Series D Preferred held(1)	Number of Votes held by such Series D Stockholder	Number of Votes	Percentage of the Voting Equity
Lloyd Spencer	54,216	60,000	x 100,000	6,000,054,216	50.3 %
Shanna Gerrard	5,000	20,000	x 100,000	2,000,005,000	16.8 %
Jared Robert	9,536,197	20,000	x 100,000	2,009,536,197	16.8 %

Each share of Series D Convertible Preferred Stock (“Series D Preferred”) has the equivalent of one hundred thousand (100,000) votes of common stock. Currently, there are 3 holders of Series D Preferred Stock, namely (1) Lloyd Spencer (60,000 shares), Shanna Gerrard (20,000 shares) and Jared Robert (20,000 shares) (together, the “Series D Stockholders”), collectively holding 100,000 shares of Series D Preferred, resulting in the Series D Stockholders holding in the aggregate a majority of the total voting power of all issued and outstanding voting shares of the Company.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

No director, executive officer or nominee for election as a director of our company, and no owner of five percent or more of our outstanding shares or any member of their immediate family has entered into or proposed any transaction in which the amount involved exceeds \$60,000 except as set forth below.

During October 2007, several current directors and officers invested \$35,000 in Series C preferred stock, which is described in Note 12 in the notes to financial statements. In April 2008, all of the Series C preferred shareholders converted their investments into CoroWare common stock.

We also entered into short-term debt obligations other than in the ordinary course of business. The following table sets forth the pertinent information relating to the obligations:

Lender	Interest Rate	Original Amount of Loan	Outstanding Balance at December 31, 2012	Date of Loan	Due Date
Rick Wynns	5 %	\$27,500	\$—	Jul 22, 2005	Dec 31, 2007
Rick Wynns	21 %	\$25,000	\$25,000	Jul 27, 2010	Jan 23, 2011
Amy Spencer	18 %	\$50,000	\$50,000	Jul 3, 2008	Dec 20, 2008

Edgar Filing: CoroWare, Inc, - Form 10-K

Raphael Cariou	18 %	\$87,900	\$—	Jul 3–Dec 19, 2008	Various dates thru April, 2011
John Kroon	18 %	\$10,000	\$10,000	Mar 17, 2010	Sep 13, 2010
Lloyd Spencer	18 %	\$223,629	\$118,913	Feb 2 – Aug 14, 2009	Various dates thru Mar 16, 2010

On July 22, 2005 CoroWare borrowed \$30,000 from a beneficial shareholder and then-director, Rick Wynns, and entered into a short term note requiring interest at the annual rate of 5%, maturing in six months, and principal and accrued interest are convertible into CoroWare common stock at \$0.15 per share. A payment of \$2,500 was made during the 4th quarter of 2006. The due date of the note was extended to December 31, 2008. To date there have been no conversions. In addition in October 2005 we entered into a second short-term obligation with Mr. Wynns for \$30,000. The note bears interest at 10% and matured in April 2006. A \$20,000 principal payment was made on this note in May 2006. The due date of the note was extended to December 31, 2007. In October 2005, we entered into a third short-term obligation with Mr. Wynns for \$30,000. This note bears interest at 10% and also matured in April 2006. This note was also extended through December 31, 2007. During the 4 th quarter of 2010, Mr. Wynns sold \$40,000 of these notes to an outside third party and then made an additional loan to the Company of \$25,000 bearing interest at 21% and maturing January 23, 2011. That note is currently in default.

In July 2008 CTI entered into a short-term debt obligation totaling \$50,000 with Amy Spencer. The entire balance of the loan plus accrued interest at 1.5% per month was due on December 20, 2008. The note was not paid at maturity and is currently accruing late fees of 0.5% per month in addition to the interest.

During 2008, CoroWare borrowed an aggregate \$62,900 from Raphael Cariou, a shareholder and employee of CoroWare. The notes bear interest at 18% and mature on various dates beginning December 20, 2008 and running through June 30, 2009. Cash payments of \$6,200 were made during 2010. All of the notes are currently in default and accruing late fees of 0.5% per month in addition to the interest.

During 2009, CoroWare borrowed an aggregate \$223,629 from Lloyd Spencer, our CEO and a shareholder. The notes bear interest at 18% and mature on various dates from July 2009 through March 2010. During 2010, the Company made cash payments of \$40,018 towards these loans and issued 10,000,000 shares of stock valued at \$50,000. All of the remaining notes are currently in default and accruing late fees of 0.5% per month in addition to the interest.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

(1) Audit Fees

The aggregate fees billed for professional services rendered by Lake & Associates CPAs LLC for the audit of the Registrant's annual financial statements and review of the financial statements included in the Registrant's Forms 10-Q or services that are normally provided by the accountant in connection with statutory and regulatory filings or engagements for fiscal years 2012 and 2011, were \$50,700 and \$70,848, respectively.

(2) Tax Fees

The aggregate fees billed for professional services rendered by Lake & Associates CPAs LLC for the preparation of the Registrant's tax returns, including tax planning for fiscal years 2012 and 2011 were \$0 and \$0, respectively.

(3) All Other Fees

No other fees were paid to Lake & Associates CPAs LLC for fiscal years 2012 and 2011.

(4) Audit Committee Policies and Procedures

The Registrant does not have an audit committee. The Board of Directors of the Registrant approved all of the services rendered to the Registrant by Lake & Associates for fiscal years 2012 and 2011.

(5) Audit Work Attributed to Persons Other Lake & Associates CPAs LLC

Not applicable.

COROWARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2012 and 2011

NOTE 1 - NATURE OF THE COMPANY, BASIS OF PRESENTATION, AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation and consolidation policy:

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, CoroWare Technologies, Inc. ("CTI"), Innova Robotics, Inc. ("IR"), Robotic Workspace Technologies, Inc. ("RWT"), and Robotics Software Services, Inc. ("RSS") (Herein are referred to as the "Subsidiaries"). The Company also consolidates its 51% interest in Aricon, LLC. All significant inter-company balances and transactions have been eliminated in the consolidated financial statements.

Nature of the Company:

CoroWare, Inc ("CoroWare" or "the Company") is a public holding company whose principal subsidiary, CoroWare Technologies, Inc. ("CTI"), has expertise in information technology consulting, mobile robotics, and affordable collaboration. Through its subsidiary, the Company delivers custom engineering services, hardware and software products, and subscription services that benefit customers in North America, Europe, Australia, Asia and the Middle East. Their customers span multiple industry sectors and comprise universities, software and hardware product development companies, and non-profit organizations. The company also maintains a Near Shore practice which is comprised of multiple subcontracting companies with whom the company maintains close working relationships. Through these relationships, the Company is able to provide services in South America.

COROWARE TECHNOLOGIES, INC.

CTI is a software professional services company with a strong focus on Information Technology integration and robotics integration, business automation solutions, and unmanned systems solutions to its customers in North America and Europe.

CTI's expertise includes the deployment and integration of computing platforms and applications, as well as the development of unmanned vehicle software and solutions for customers in the research, commercial, and homeland

security market segments. CTI shall continue to offer its high value software systems development and integration services that complement the growing trend in outsourced software development services in Asia, Latin America, and Eastern Europe.

CoroWare Technologies comprises three separately managed lines of business:

CoroWare Business Solutions : IT and lab management; business intelligence, software architecture, design and development; content delivery; partner and program management.

Robotics and Automation : Custom engineering such as visualization, simulation and software development; and mobile robot platforms for university, government and corporate researchers.

Enhanced Collaboration Solution : Collaboration and conferencing products, solutions and subscription services.

The Company's revenues are principally derived from standing contracts that include Microsoft (partner management and IT professional services), a European auto manufacturer (simulation software custom development), and other customers whose product development groups require custom software development and consulting companies. Existing contract revenues vary month by month based on the demands of the clients. The Company's collaboration effort is in the early stages of growth and will require additional working capital to compete effectively against new entrants in this rapidly growing market.

NOTE 1 - NATURE OF THE COMPANY, BASIS OF PRESENTATION, AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Summary of significant accounting policies:

Cash and cash equivalents:

Cash and cash equivalents include cash and all highly liquid financial instruments with original purchased maturities of three months or less.

Accounts receivable:

The Company's accounts receivable are exposed to credit risk. During the normal course of business, the Company extends unsecured credit to its customers with normal and traditional trade terms. Typically credit terms require payments to be made by the thirtieth day following the sale. The Company regularly evaluates and monitors the creditworthiness of each customer. The Company provides an allowance for doubtful accounts based on our continuing evaluation of its customers' credit risk and its overall collection history. At December 31, 2012 and December 31, 2011, no allowance was deemed necessary.

Property and equipment:

Property and equipment are stated at cost less accumulated depreciation. Major renovations, renewals and improvements are capitalized; minor replacements, maintenance and repairs are charged to current operations. Depreciation is computed by applying the straight-line method over the estimated useful lives which are generally five to ten years.

Intangible assets:

The Company's intangible assets, which are recorded at cost, consist primarily of the unamortized cost basis of employment contracts and customer lists. These assets were amortized on a straight line basis over the estimated

useful lives ranging from 3 to 5 years and are fully amortized as of December 31, 2012.

Impairment of long-lived assets:

The Company evaluates the carrying value and recoverability of its long-lived assets when circumstances warrant such evaluation by applying the provisions of FASB ASC 360-35, Property, Plant and Equipment, Subsequent Measurement. FASB ASC 360-35 requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable through the estimated undiscounted cash flows expected to result from the use and eventual disposition of the assets. Whenever any such impairment exists, an impairment loss will be recognized for the amount by which the carrying value exceeds the fair value.

Deferred finance costs:

Deferred finance costs are associated with the convertible debenture financings (see Note 9) and are being amortized on a straight line basis over the term of the underlying debt instrument. Upon conversion, the deferred finance cost associated with the converted amount is amortized.

NOTE 1 - NATURE OF THE COMPANY, BASIS OF PRESENTATION, AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Income taxes:

Income taxes are computed using the asset and liability method. Under the asset and liability method, deferred income tax assets and liabilities are determined based on the differences between the financial reporting and tax bases of assets and liabilities and are measured using the currently enacted tax rates and laws. A valuation allowance is provided for the amount of deferred tax assets that, based on available evidence, are not expected to be realized. Additionally, taxes are calculated and expensed in accordance with applicable tax code.

Financial instruments:

Financial instruments, as defined in FASB ASC 825, Financial Instruments, consist of cash, accounts receivable, accounts payable, accrued expenses, notes payable, derivative financial instruments, and debt.

The Company carries cash, accounts receivable, accounts payable and accrued expenses at historical costs; their respective estimated fair values approximate carrying values due to their current nature. The Company also carries notes payable and convertible debt. The fair values of these notes payable and convertible debt instruments approximate carrying values based on the comparable market interest rates applicable to similar instruments.

Derivative financial instruments, as defined in FASB ASC 815, Derivatives and Hedging, consist of financial instruments or other contracts that contain a notional amount and one or more underlying variables (e.g. interest rate, security price or other variable), require no initial net investment and permit net settlement. The caption Derivative Liability consists of (i) the fair values associated with derivative features embedded in the convertible debt financings and (ii) the fair values of the detachable warrants that were issued in connection with those financing arrangements.

The Company generally does not use derivative financial instruments to hedge exposures to cash-flow, market or foreign-currency risks. However, the Company has entered into certain other financial instruments and contracts, such as debt financing arrangements and freestanding warrants with features that are either (i) not afforded equity classification, (ii) embody risks not clearly and closely related to host contracts, or (iii) may be net-cash settled by the counterparty. As required by FASB ASC 815, these instruments are required to be carried as derivative liabilities, at fair value, in its financial statements.

Share-based payments :

Stock based compensation expense is recorded in accordance with FASB ASC 718, Compensation – Stock Compensation, for stock and stock options awarded in return for services rendered. The expense is measured at the grant-date fair value of the award and recognized as compensation expense on a straight line basis over the service period, which is the vesting period. The Company estimates forfeitures that it expects will occur and records expense based upon the number of awards expected to vest. There were no options granted during the years ending December 31, 2011 and 2011.

F-10

NOTE 1 - NATURE OF THE COMPANY, BASIS OF PRESENTATION, AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Revenue recognition:

The Company derives its software system integration services revenue from short-duration, time and material contracts. Generally, such contracts provide for an hourly-rate and a stipulated maximum fee. Revenue is recorded only on executed arrangements as time is incurred on the project and as materials, which are insignificant to the total contract value, are expended. Revenue is not recognized in cases where customer acceptance of the work product is necessary, unless sufficient work has been performed to ascertain that the performance specifications are being met and the customer acknowledges that such performance specifications are being met. We periodically review contractual performance and estimate future performance requirements. Losses on contracts are recorded when estimable. No contractual losses were identified during the periods presented.

The Company recognizes revenue for its software and software professional services when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collectability is probable. Product sales are recognized by us generally at the time product is shipped. Shipping and handling costs are included in cost of goods sold.

The Company accounts for arrangements that contain multiple elements in accordance with FASB ASC 605-25, Revenue Recognition, Multiple Element Arrangements. When elements such as hardware, software and consulting services are contained in a single arrangement, or in related arrangements with the same customer, we allocate revenue to each element based on its relative fair value, provided that such element meets the criteria for treatment as a separate unit of accounting. The price charged when the element is sold separately generally determines fair value. In the absence of fair value for a delivered element, we allocate revenue first to the fair value of the underlying elements and allocate the residual revenue to the delivered elements. In the absence of fair value for an undelivered element, the arrangement is accounted for as a single unit of accounting, resulting in a delay of revenue recognition for the delivered elements until the undelivered elements are fulfilled.

The Company limits the amount of revenue recognition for delivered elements to the amount that is not contingent on future delivery of products or services or subject to customer-specified return of refund privileges. The Company recognizes revenue from the sale of manufacturer's maintenance and extended warranty contracts in accordance with FASB ASC 605-45, Revenue Recognition, Principal Agent Considerations, net of its costs of purchasing the related contracts.

The Company's collaboration revenue is comprised of both services and products. Collaboration service revenues are generated through the sale of CoroCall TM , a managed collaboration service. Our contracts provide for usage pricing or when paid for pre-paid service. The Company recognizes this revenue in the period that the services or minutes are

used and prepaid. Product revenues are realized partly through the sale of Vidyo's product line, including room systems and back-end infrastructure, and partly through the sale of CoroWare collaboration products, including CoroWare Usage Reporter for Vidyo, a software package that provides usage statistics for Vidyo brand high-definition video conferencing systems, and partly through sales of accessories. Revenues for these products are recognized when the product is delivered to the customer.

Research and development:

Research and development costs relate to the development of new products, including significant improvements and refinements to existing products, and are expensed as incurred. Research and development expenses from continuing operations for the years ended December 31, 2012 and 2011 were \$58,948 and \$122,221 respectively.

NOTE 1 - NATURE OF THE COMPANY, BASIS OF PRESENTATION, AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Advertising expense:

The Company expenses advertising costs as they are incurred. Advertising expense for the years ending December 31, 2012 and 2011 were \$664 and \$7,400, respectively.

Concentration of Credit Risk:

Financial instruments which potentially expose the Company to concentrations of credit risk are cash and cash equivalents and trade accounts receivable. The Company maintains its cash and cash equivalents in deposit accounts with high quality, credit-worthy financial institutions.

At December 31, 2012 and 2011, the Company's revenues and receivables were comprised of the following customer concentrations:

	2012		2011	
	% of Revenue	% of Receivables	% of Revenue	% of Receivables
Customer 1	59 %	24 %	23 %	24 %
Customer 2	-%	-%	51 %	24 %
Customer 3	-%	-%	-%	-%

Basic and diluted loss per share:

The Company is required to provide basic and dilutive earnings (loss) per common share information. The basic net loss per common share is computed by dividing the net loss applicable to common stockholders by the weighted average number of common shares outstanding.

Diluted net loss per common share is computed by dividing the net loss applicable to common stockholders, adjusted on an "as if converted" basis, by the weighted average number of common shares outstanding plus potential dilutive securities. For the years ended December 2012 and 2011, potential dilutive securities had an anti-dilutive effect and were not included in the calculation of diluted net loss per common share.

F-12

NOTE 1 - NATURE OF THE COMPANY, BASIS OF PRESENTATION, AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Dividend Policy

The Company has never declared or paid any cash dividends on its common stock. The Company anticipates that any earnings will be retained for development and expansion of its business and does not anticipate paying any cash dividends in the foreseeable future. Additionally, as of December 31, 2012 and 2011 the Company has issued and has outstanding shares of Series B Preferred Stock which are entitled, prior to the declaration of any dividends on common stock, to earn a 5% dividend, payable in either cash or common stock of the Company. The Board of Directors has sole discretion to declare dividends based on the Company's financial condition, results of operations, capital requirements, contractual obligations and other relevant factors. At December 31, 2012 and 2011, there were cumulative undeclared dividends to Preferred Series B shareholders of \$47,900 and \$39,917, respectively, the obligation for which is contingent on declaration by the board of directors. At December 31, 2012 and 2011, there were accrued unpaid dividends of \$15,969, respectively. This balance is part of accounts payable and accrued expenses.

Recent Accounting Pronouncements:

Management does not expect the impact of any other recently issued accounting pronouncements to have a material impact on its financial condition or results of operations.

Use of Estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Among the more significant estimates included in the Company's financial statements are the following:

- estimating future bad debts on accounts receivable that are carried at net realizable values;
- estimating the fair value of its financial instruments that are required to be carried at fair value; and
- estimating the recoverability of its long-lived assets.

The Company uses all available information and appropriate techniques to develop its estimates. However, actual results could differ from its estimates.

NOTE 2 - FINANCIAL CONDITION AND GOING CONCERN

The Company has incurred losses for the years ended December 31, 2012 and 2011 of \$7,760,728 and \$2,028,596, respectively. Because of these losses and the Company's working capital deficit, the Company will require additional working capital to develop its business operations.

The Company intends to raise additional working capital through the use of private placements, public offerings and/or bank financing.

NOTE 2 - FINANCIAL CONDITION AND GOING CONCERN (Continued)

There are no assurances that the Company will be able to either (1) achieve a level of revenues adequate to generate sufficient cash flow from operations; or (2) obtain additional financing through either private placements, public offerings and/or bank financing necessary to support the Company's working capital requirements. To the extent that funds generated from operations, any private placements, public offerings and/or bank financing are insufficient, the Company will have to raise additional working capital. No assurance can be given that additional financing will be available, or if available, will be on terms acceptable to the Company.

These conditions raise substantial doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments relating to the recoverability and classification of asset carrying amounts or the amount and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

NOTE 3 – ACCOUNTS RECEIVABLE FACTORING

On March 21, 2010, the Company established a \$200,000 factoring line with an asset-based lender, CapeFirst Funding, LLC (“Capefirst”) that is secured by accounts receivable that the Lender may accept and purchase from the Company. The agreement calls for Capefirst to advance up to 80% of the net face amount of each assigned account or up to 50% of eligible assigned purchase orders. The agreement calls for a maximum facility amount of \$200,000 with a purchase fee of 2% of the net face amount of each assigned account and a collection fee of 0.1% compounded daily. In the event of a dispute or in the event of fraud, misrepresentation, willful misconduct or negligence on the part of the Company, Capefirst may require the Company to immediately repurchase the assigned accounts at a purchase price that includes the amount of the assigned account plus the discount fee, interest and collection fee and may include a processing fee of 10%. The combined balance due to factors as of December 31, 2012 and 2011 was \$177,455 and \$107,730. Factor expense charged to operations for the years ended December 31, 2012 and 2011 amounted to, \$38,157 and \$44,155, respectively.

We have adopted the FASB’s amended authoritative guidance which was issued in June 2009 and which became effective January 1, 2010 as it relates to distinguishing between transfers of financial assets that are sales from transfers that are secured borrowings. Under this new guidance as adopted by the Company effective January 1, 2010, the reporting of the sale of accounts receivable is treated as a secured borrowing rather than as a sale. As a result, affected accounts receivable are reported under Current Assets within the Company’s balance sheet as “Trade receivables” subject to reserves for doubtful accounts, returns and other allowances. Similarly, the net liability owing to Capefirst appears as “Obligations collateralized by receivables” within the Current Liabilities section of the Company’s balance sheet. Net proceeds received from the sale of accounts receivable appear as cash provided or used by financing activities within the Company’s Consolidated Statements of Cash Flows. Early adoption of this amended guidance was not permitted. Under the authoritative guidance in effect prior to the amended guidance noted above, after a transfer of financial assets, an entity recognizes the financial and servicing assets it controls and liabilities it has

incurred, derecognizes financial assets when control has been surrendered, and derecognizes liabilities when extinguished.

NOTE 4 - PROPERTY AND EQUIPMENT

Property and equipment consists of the following at December 31, 2012 and 2011:

	2012	2011
Computer equipment	\$85,381	\$82,260
Furniture and fixtures	7,862	7,862
	93,243	90,122
Less: accumulated depreciation	(77,789)	(65,789)
	\$15,454	\$24,333

Depreciation expense for the years ended December 31, 2012 and 2011 was \$12,000 and \$10,684, respectively.

NOTE 5 - INTANGIBLE ASSETS

Intangible assets, which arose during the Company's business acquisitions activities, consisted of the following at December 31, 2012 and 2011:

	2012	2011	Life
Employment contracts	\$ —	\$132,977	5 Years
Customer lists	—	605,242	3 Years
	—	738,219	
Less: accumulated amortization	—	(738,219)	
	\$ —	\$—	

Amortization expense amounting to \$0- and \$11,081 during the years ended December 31, 2012 and 2011, respectively is reflected as a component of operating expenses in the accompanying consolidated financial statements.

NOTE 6 - NOTES PAYABLE

Notes payable consist of the following at December 31, 2012 and 2011:

		2012		2011	
		Related Party	Other	Related Party	Other
Notes payable – Merger	6(a)	\$	\$100,000	\$	\$100,000
Notes payable – Shareholders	6(b)	202,612		208,913	
Notes payable – Yorkville	6(c)		37,500		37,500
Other notes payable	6(d)	-	19,832		19,732
		\$202,612	\$232,332	\$208,913	\$202,232

(a) Notes payable - Merger:

In February 2003, the Company issued \$230,000 of notes payable which matured in June 2003. The notes earn interest at 8% per annum unless they are in default, in which case they earn default interest at a rate of 15%; the notes are currently in default. Additionally, the notes had warrants attached to purchase 11,500 shares of common stock at

\$15.00 per share and were exercisable through February 12, 2005. None of these warrants were exercised prior to their expiration. This instrument is in default. During the 4th quarter of 2010, one of these notes with an outstanding balance of \$75,000 was sold to a third party by the original investor. The terms of the note were changed such that the note became a convertible debenture. See the \$75,000 Collins financing in Note 9(d). During 2011, two additional merger notes aggregating \$55,000 were sold to third parties by the original investors and simultaneously converted to convertible debentures. See the \$25,000 Tangiers financing in Note 9(k) and the \$65,000 Panache financing in Note 9(n).

F-15

NOTE 6 - NOTES PAYABLE (continued)

(b) Notes payable - Shareholders:

During September through December 2005, the Company entered into short-term debt obligations totaling \$257,000. These notes bore interest at rates ranging from 5 to 10% per annum and were due between ninety and one hundred twenty days. All of the lenders were shareholders of the Company. During the 4th quarter of 2010, the remaining \$40,000 of these notes was sold to a third party by the original investor. That third party subsequently converted those notes along with the accrued interest of \$7,509 into 15,560,455 shares of common stock of the Company.

Additionally, during 2011 and 2010, the Company entered into various unsecured notes with shareholders aggregating \$5,000 and \$45,000, respectively. The notes bear interest at 18% and matured at various dates through June 2011. Repayments of \$14,699 and \$106,218 (\$60,000 in stock) were made during 2011 and 2010, respectively. During 2011, \$74,200 of these notes were sold to third parties and simultaneously re-stated as convertible debentures. See Note 9(e) and 9(j).

(c) Notes payable – Yorkville:

During August 2008, the Company entered into 2 short-term notes with Yorkville that bear interest at 18% and matured in December 2008. This transaction was recorded as an inducement expense of \$3,750 during the year ended December 31, 2008. These instruments are in default.

(d) Other notes payable

Other notes payable consist of two notes to third parties. The note bear interest at rates ranging from 0.8% to 21% and matured through December 31, 2011. Both of these notes are in default.

NOTE 7 – LINES OF CREDIT

The Company has numerous unsecured lines of credit with various financial institutions bearing annual interest at rates ranging from 4.75% to 36.00%. At December 31, 2012 and 2011 the company had aggregate outstanding balances on these lines of \$121,369 and \$125,456, respectively. These lines of credit have no collateral and are

payable monthly.

NOTE 8 - LONG-TERM DEBT

On April 17, 2002, the Company borrowed \$989,100 under a note agreement with the Small Business Administration. The note bears interest at 4% and is secured by the equipment and machinery assets of the Company. The balance outstanding at December 31, 2012 and 2011 was \$980,450 and \$980,450, respectively. The note calls for monthly installments of principal and interest of \$4,813 beginning September 17, 2002 and continuing until April 17, 2032. The Company and the Small Business Administration reached an agreement in November 2010 whereby the Small Business Administration would accept \$500 per month for 12 months with payment reverting back to \$4,813 in November 2011. The Company only made four payments under the modification agreement. The Company continues to carry the loan as a current term liability because current payments are not being made, resulting in a default. Contractual maturities of long term debt are as follows:

For the year ending December 31,	Small business administration loan	Convertible debt (1)	Combined
2012	\$ 980,450	\$2,206,247	\$3,186,697
2013	—	149,107	149,107
	\$ 980,450	\$2,355,354	\$3,335,804

(1) Carried at face value, net of discount. See Note 9.

NOTE 9 - CONVERTIBLE DEBT

The following table illustrates the carrying value of convertible debt at December 31, 2012 and 2011:

Financing	Note	2012	2011
\$2,825,000 Yorkville financing	9(a)	\$ 471,453	\$ 478,258
\$ 600,000 Yorkville financing	9(b)	600,000	600,000
\$ 300,000 Yorkville financing	9(c)	300,000	300,000
\$ 75,000 Collins financing	9(d)	39,169	34,679
\$ 17,500 Asher financing	9(w)	2,499	-
\$ 20,000 Asher financing	9(x)	18,695	-
\$ 27,500 Asher financing	9(e)	18,102	19,951
\$ 10,750 Barclay financing	9(f)	10,750	10,750
\$ 9,750 Mackie financing	9(g)	3,059	8,524
\$ 170,562 Ratzker financing	9(h)	118,655	79,319
\$ 67,042 Harvey financing	9(i)	67,043	62,675
\$ 89,383 Cariou financing	9(j)	54,838	83,077
\$ 10,000 Tangiers financing	9(l)	-	7,895
\$ 15,000 Tangiers financing	9(m)	-	10,764
\$ 65,000 Panache financing	9(n)	47,388	29,602
\$ 15,000 Panache financing	9(o)	15,000	5,612
\$ 567,200 Westmount financing	9(p)	537,318	537,318
\$ 170,561 Redwood financing	9(q)	77,146	69,788
\$ 21,962 Premier financing	9(r)	21,805	17,142
\$ 21,000 Tangiers financing	9(s)	6,043	-
\$ 5,474 Tangiers financing	9(t)	2,500	-
\$ 10,000 Magna financing	9(u)	10,000	-
\$ 54,060 Ridge Point financing	9(v)	4,962	-
		2,426,515	2,355,354
Less: Current portion of convertible debt		(2,204,710)	(2,206,247)
Long-term portion of convertible debt		\$ 221,805	\$ 149,107

(a) \$2,825,000 Convertible debenture financing:

The Company is party to a convertible debenture with Yorkville which provided for the sale of its 14% secured convertible debentures in the original aggregate principal amount of \$2,825,000, net of deferred financing costs of \$263,143. The note was originally executed in three tranches as follows: Tranche 1 for \$1,250,000 on July 21, 2006, Tranche 2 for \$575,000 on August 21, 2006 and Tranche 3 for \$1,000,000 on December 7, 2006.

The Debenture matures on the third anniversary of the date of issuance (see Note 8 for debt maturity schedule). The holder of the Debenture may, at any time, convert amounts outstanding under the Debentures into shares of common stock of the Company at the lesser of \$6.00 or 85% of the 30-day VWAP. The Company's obligations under the Purchase Agreement are secured by substantially all of the assets of the Company and those of its wholly owned subsidiary, CoroWare Technologies, Inc.

Under the Purchase Agreement, the Company also issued to Yorkville five-year warrants to purchase 3,333 and 5,000 shares of Common Stock at prices equal to \$150 and \$300, respectively, together with three-year warrants to purchase 7,667, 6,667 and 8,333 shares of Common Stock at prices equal to \$75, \$195 and \$225, respectively. All of these warrants have expired unexercised.

F-17

NOTE 9 - CONVERTIBLE DEBT (Continued)

The Company has the right to redeem a portion or all amounts outstanding under the Debenture prior to the Maturity Date at a 10% redemption premium plus accrued interest provided that the closing bid price of the Common Stock is less than the Conversion Price and there is an effective Registration Statement covering the shares of Common Stock issuable upon conversion of the Debentures and exercise of the Warrants (as defined below). In addition, beginning on the earlier of: (i) the first trading day following the day which the Registration Statement is declared effective by the Commission, or (ii) December 1, 2006, and continuing on the first trading day of each calendar month thereafter, Yorkville may require the Company to redeem up to \$500,000 of the remaining principal amount of the Debentures per calendar month. However, Yorkville may not require the Company to redeem the Debentures if the closing bid price of the Common Stock exceeds the Conversion Price for each of the five consecutive trading days immediately prior to the redemption date, and the Registration Statement has been declared effective and remains effective on the redemption date. The Company has the option, in its sole discretion, to settle any requested redemptions by either paying cash and a 10% redemption premium plus accrued interest or issuing the number of shares of the Company's common stock equal to the cash amount owed divided by a stock price equal to 95% of the 30 day VWAP (lowest daily volume weighted average price of the Company's common stock during the thirty (30) trading days immediately preceding the date of the redemption). The following redemptions have occurred in conjunction with this debenture financing:

Date of Redemption	Principal Redeemed	Number of shares issued
2006	\$25,000	629
2007	\$930,000	59,946
2008	\$280,051	925,794
2009	\$30,000	573,220
2010	\$137,300	20,360,857
2011	\$50,170	55,536,746

In the Company's evaluation of this instrument in accordance with FASB ASC 815, Derivatives and Hedging (pre-codification FAS 133 "Accounting for Derivative Financial Instruments and Hedging Activities"), based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: Effective Term (using the remaining term of the host instrument); Effective Volatility (89.08% - 123.72%); and Effective Risk Adjusted Yield (15.97% - 33.59%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$1,798,350 at inception. The Company also determined that the warrants did not meet the conditions for equity classification because share settlement and maintenance of an effective registration statement are not within its control. The fair value allocated to the warrants instruments was \$637,700 at inception. The remaining \$388,950 was allocated to the carrying value of the debenture.

On December 31, 2010, Yorkville assigned 46.3% of Tranche 1 (aggregating \$341,123 principal and \$227,140 interest) to an unrelated third party (“Ratzker”). See discussion below in Note 9(h). On January 12, 2011, Yorkville assigned 100% of Tranche 2 (aggregating \$567,200 in principal and \$317,510 in interest) to an unrelated third party (“Westmount”). See discussion below in Note 9(p).

The remaining portions of Tranche 1 (\$395,628 principal) and Tranche 3 (\$82,630 principal) remain with Yorkville and are currently in default. Management is working with Yorkville to develop a plan for repayment of this debt. In order to estimate a value for the embedded conversion feature for financial statement presentation at December 31, 2011, management needed to make certain assumptions about the estimated maturity date of this debt. It was estimated that this debt would not be called prior to November 1, 2012.

NOTE 9 - CONVERTIBLE DEBT (Continued)

(b) \$600,000 Convertible debenture financing:

The Company is party to a convertible debenture with Yorkville which provided for the sale of its 14% secured convertible debentures in the aggregate principal amount of \$600,000, net of deferred financing costs of \$75,000.

The holder of the Debentures may, at any time, convert amounts outstanding under the Debentures into shares of common stock of the Company at the lesser of \$6.00 or 85% of the 30-day VWAP. The Company's obligations under the Purchase Agreement are secured by substantially all of the assets of the Company and those of its wholly owned subsidiary, CoroWare Technologies, Inc.

The Company had the right to redeem a portion or all amounts outstanding under the Debenture prior to the Maturity Date at a 12% redemption premium plus accrued interest provided that the closing bid price of the Common Stock is less than the Conversion Price and there is an effective Registration Statement covering the shares of Common Stock issuable upon conversion of the Debentures and exercise of the Warrants (as defined below). In addition, beginning on the issuance date, Yorkville may require the Company to convert any amounts owed. However, Yorkville may not require the Company to redeem the Debentures if the closing bid price of the Common Stock exceeds the Conversion Price for each of the five consecutive trading days immediately prior to the redemption date, and the Registration Statement has been declared effective and remains effective on the redemption date. The Company has the option, in its sole discretion, to settle any requested conversions by either paying cash and a 12% redemption premium plus accrued interest or issuing the number of shares of the Company's common stock equal to the cash amount owed divided by a stock price equal to 85% of the 30 day VWAP.

In the Company's original evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: Effective Term (using the remaining term of the host instrument); Effective Volatility (89.08% - 123.72%); and Effective Risk Adjusted Yield (15.97% - 33.59%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$706,800 at inception.

This convertible debenture matured in 2009 and is currently in default. Management is working with Yorkville to develop a plan for repayment of this debt. In order to estimate a value for the embedded conversion feature for financial statement presentation at December 31, 2011, management needed to make certain assumptions about the estimated maturity date of this debt. It was estimated that this debt would not be called prior to November 1, 2012.

(c) \$300,000 Convertible debenture financing:

On March 19, 2008, the Company consummated a Securities Purchase Agreement dated March 19, 2008 with Y.A. Global Investments (“Yorkville”) for the sale by the Company to Yorkville of its 14% secured convertible debentures in the aggregate principal amount of \$300,000, net of deferred financing costs of \$60,000 which was advanced immediately in March 2008.

The holder of the Debentures may, at any time, convert amounts outstanding under the Debentures into shares of common stock of the Company at a fixed conversion price per share equal to \$6.00. The Company's obligations under the Purchase Agreement are secured by substantially all of the assets of the Company and those of its wholly owned subsidiary, CoroWare Technologies, Inc. Under the Purchase Agreement, the Company also issued to Yorkville five-year warrants to purchase 33,333 shares of Common Stock at a price equal to \$6.

NOTE 9 - CONVERTIBLE DEBT (Continued)

The Company has the right to redeem a portion or all amounts outstanding under the Debenture prior to the Maturity Date at a 14% redemption premium plus accrued interest provided that the closing bid price of the Common Stock is less than the Conversion Price and there is an effective Registration Statement covering the shares of Common Stock issuable upon conversion of the Debentures and exercise of the Warrants (as defined below). In addition, beginning on the issuance date, Yorkville may require the Company to convert any amounts owed. However, Yorkville may not require the Company to redeem the Debentures if the closing bid price of the Common Stock exceeds the Conversion Price for each of the five consecutive trading days immediately prior to the redemption date, and the Registration Statement has been declared effective and remains effective on the redemption date. The Company has the option, in its sole discretion, to settle any requested conversions by either paying cash and a 14% redemption premium plus accrued interest or issuing the number of shares of the Company's common stock equal to the cash amount owed divided by a stock price equal to 85% of the 30 day VWAP.

In the Company's original evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior.

Significant assumptions underlying this methodology were: Effective Term (using the remaining term of the host instrument); Effective Volatility (89.08% - 123.72%); and Effective Risk Adjusted Yield (15.97% - 33.59%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$150,000 at inception. The Company also determined that the warrants did not meet the conditions for equity classification because share settlement and maintenance of an effective registration statement are not within its control. The fair value allocated to the warrants instruments was \$50,000 at inception. The remaining \$100,000 was allocated to the carrying value of the debenture.

This convertible debenture matured in 2010 and is currently in default. Management is working with Yorkville to develop a plan for repayment of this debt. In order to estimate a value for the embedded conversion feature for financial statement presentation at December 31, 2011, management needed to make certain assumptions about the estimated maturity date of this debt. It was estimated that this debt would not be called prior to November 1, 2012.

(d) \$75,000 Collins financing:

On December 9, 2010, the Company amended a note payable that has been outstanding from February 11, 2003. The amended terms of the note call for a variable conversion price of 70% of the market price. The market price is defined

as the average of the lowest three trading prices for the common stock during the 10 trading day period prior to the date the conversion notice is sent by the holder. The Debenture matured on June 27, 2003 and remains in default.

In the Company's evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion feature was bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instrument using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were:

Effective Term (using the estimated remaining term of the host instrument); Effective Volatility (141.39%); and Effective Risk Adjusted Yield (12.5%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$61,039 at inception. The remaining \$13,961 was allocated to the carrying value of the debenture. As of December 31, 2010, this note carried a discount of \$53,341 which is being amortized using the effective interest method over the estimated life of 10 months.

F-20

NOTE 9 - CONVERTIBLE DEBT (Continued)

During December 2010, the original holder of the note sold it to a third party investor (“Collins”) with all of the terms remaining the same. Collins subsequently made the following conversions:

Date of Redemption	Principal Redeemed	Number of shares issued
2010	\$ 9,300	3,100,000
2011	\$ 20,290	21,500,000

(e) \$27,500 Asher financing:

On February 1, 2011, the Company consummated an unsecured Securities Purchase Agreement with an unrelated third party for the sale by the Company of its 8% secured convertible debentures in the aggregate principal amount of \$27,500, net of deferred financing costs of \$2,500.

The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal to 51% of the market price, which is defined as the lowest 3 trading prices for the Company’s common stock during the 10 trading days prior to conversion.

In the Company’s original evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: effective term (using the remaining term of the host instrument); effective volatility (145.01% - 130.17%); and effective risk adjusted yield (12.5%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$36,729 at inception. Derivative expense of \$9,229 was recognized at inception.

This convertible debenture matured in November 2011 and is currently in default. In order to estimate a value for the embedded conversion feature for financial statement presentation at December 31, 2011, management needed to make certain assumptions about the estimated maturity date of this debt. It was estimated that this debt would not be called prior to November 1, 2012.

On August 2, 2012, Cariou sold \$20,000 of his convertible note to Asher. In connection with the sale, the Company restated the interest rate on the note from 15% to 10% and changed the conversion rate from the 5 day average closing price using the 5 trading days prior to conversion to 40% of the Market Price (defined as the average of the (1) lowest trading price for common stock during the 30 day trading period ending one trading day prior to the date of conversion). Additionally, the beneficial ownership limit was increased from 4.99% to 9.99%

During year ending December 31, 2012, Asher converted \$3,600 of the convertible debenture into 8,780,488 shares of the Company's common stock. The Company recognized a loss on redemption of \$4,141.

F-21

NOTE 9 - CONVERTIBLE DEBT (Continued)

(f) \$10,750 Barclay financing:

On January 28, 2011, the Company consummated an unsecured convertible promissory note with an unrelated third party for \$10,750, net of deferred financing costs of \$2,500.

The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal to 50% of the fair market value, but not to exceed \$0.05/share or be less than \$0.0001/share. Fair market value is defined as the lower of i) the closing bid price for the date immediately preceding the date of conversion (excluding trades that are not arms-length) or ii) the average of last 5 trading days volume weighted average price. The Company's obligations under the convertible promissory note are secured by substantially all of the assets of the Company and those of its wholly owned subsidiary, CoroWare Technologies, Inc.

In the Company's original evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: effective term (using the remaining term of the host instrument); effective volatility (155.39% - 117.57%); and effective risk adjusted yield (12.5%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$12,369 at inception. Derivative expense of \$1,619 was recognized at inception.

This convertible debenture matured July 28, 2011 and is currently in default. In order to estimate a value for the embedded conversion feature for financial statement presentation at December 31, 2011, management needed to make certain assumptions about the estimated maturity date of this debt. It was estimated that this debt would not be called prior to November 1, 2012.

As of December 31, 2012, there have been no conversions on this convertible debenture.

(g) \$9,750 Mackie financing:

On February 3, 2011, the Company consummated an unsecured convertible promissory note with an unrelated third party for \$9,750.

The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal to 85% of the 5 day average closing price using the 5 trading days prior to the conversion date.

F-22

NOTE 9 - CONVERTIBLE DEBT (Continued)

In the Company's evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: effective term (using the remaining term of the host instrument); effective volatility (155.39% - 117.57%); and effective risk adjusted yield (12.5%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$3,491 at inception. The remaining balance of \$6,259 was allocated to the carrying value of the debenture.

This convertible debenture matured February 18, 2011 and is currently in default. In order to estimate a value for the embedded conversion feature for financial statement presentation at December 31, 2011, management needed to make certain assumptions about the estimated maturity date of this debt. It was estimated that this debt would not be called prior to November 1, 2012.

(h) \$ 170,562 Ratzker financing:

Yorkville Advisors transferred a 46.3% portion of Tranche 1 of the \$2,825,000 debenture to a third party ("Ratzker") effective December 31, 2010. The assignment aggregated \$568,263, representing \$341,123 of unpaid principal and \$227,140 of accrued interest. At that time, there was no accounting impact for CoroWare as it was merely an assignment between debt holders. On March 18, 2011, Ratzker modified the terms of the debenture such that the interest rate was lowered from 14% to 5% and the maturity date was extended until March 18, 2013. Simultaneously, the conversion rate on the debenture was modified from 85% of the 30 day Volume Weighted Average Price ("VWAP") to 65% of the 30 day VWAP.

The modification was analyzed in accordance with current accounting standards and was determined not to be a troubled debt restricting or an extinguishment of debt. As such, it was accounted for as a modification and no gain or loss was recognized on the transaction. A debt discount of \$236,779 was recognized for the difference in the fair value of the embedded conversion feature before and after the modification date. A new effective rate was calculated for the new debenture and the related debt discount is being amortized using the effective interest rate over the new 2 year term of the underlying loan. Amortization for the year ended December 31, 2011 was \$32,864. On March 21, 2011, Ratzker transferred 50% of his ownership interest in this debenture to another unrelated party ("Redwood"). The terms of the debenture did not change with that transfer. As such, this transfer was also considered an assignment

between debt holders and did not have an accounting impact on the Company. See discussion below in Note 9(q) for Redwood financing.

With the extension of the maturity date, this debenture is no longer in default and has been reclassified to long-term liabilities on the accompanying balance sheet.

As of December 31, 2012, \$3,900 of principal was converted into 300,000 shares of the Company's common stock. The company recognized a loss of \$2,531.

F-23

NOTE 9 - CONVERTIBLE DEBT (Continued)

(i) \$67,042 Harvey financing:

On April 2, 2011, the Company entered into an unsecured convertible promissory note with a vendor. The vendor converted \$67,042 of outstanding payables into this convertible note. The note calls for interest at 10% through the maturity date of May 2, 2011 and default interest at 15% thereafter.

The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal to the average closing bid price for the 5 trading days prior to, but not including, the conversion date. The number of shares of common stock to be issued upon each conversion shall be determined by dividing that portion of the principal to be converted by the conversion price then multiplying by 115%.

In the Company's evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: effective term (using the remaining term of the host instrument); effective volatility (132.38%); and effective risk adjusted yield (12.5%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$30,011 at inception.

This convertible debenture matured May 2, 2011 and is currently in default. In order to estimate a value for the embedded conversion feature for financial statement presentation at December 31, 2011, management needed to make certain assumptions about the estimated maturity date of this debt. It was estimated that this debt would not be called prior to November 1, 2012.

As of December 31, 2012, there have been no conversions on this convertible debenture.

(j) \$89,383 Cariou financing:

On April 4, 2011, the Company entered into unsecured convertible promissory note with an employee. The employee converted \$56,700 of outstanding principal on related party notes payable and \$32,683 of accrued interest into this convertible note. The note calls for interest at 10% through the maturity date of May 4, 2011 and default interest at 15% thereafter.

The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal to the average closing bid price for the 5 trading days prior to, but not including, the conversion date. The number of shares of common stock to be issued upon each conversion shall be determined by dividing that portion of the principal to be converted by the conversion price then multiplying by 115%.

In the Company's original evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: effective term (using the remaining term of the host instrument); effective volatility (132.38%); and effective risk adjusted yield (12.5%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$44,720 at inception.

NOTE 9 - CONVERTIBLE DEBT (Continued)

(l,m) \$25,000 Tangiers financing:

In May and June 2011, an unrelated third party (“Tangiers”) purchased a \$25,000 note payable from one of CoroWare’s note holders. The transaction was completed in 2 Tranches of \$10,000 and \$15,000. The terms of the note were changed such that the conversion rate was changed from a fixed \$1 per share to a variable rate of 65% of the lowest trading price during the 7 days prior to conversion. The interest rate was changed from 8% to 10% and the maturity date was extended from June 2003 to March 19, 2012, thus taking the note out of default.

The modification was analyzed in accordance with current accounting standards and was determined not to be a troubled debt restricting but rather an extinguishment of debt as there was a substantial difference in terms on the new debt. As the old debt was being carried at face value, there was no gain or loss recognized on the extinguishment.

In the Company’s evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: effective term (using the remaining term of the host instrument); effective volatility (132.38%); and effective risk adjusted yield (12.5%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$11,662 and \$10,800, respectively, at inception for the \$10,000 tranche and the \$15,000 tranche.

During 2012, the entire \$25,000 was converted into 96,153,846 shares of CoroWare common stock. CoroWare recognized a loss of \$16,923 and \$13,846, respectively, on the conversion of the \$10,000 tranche and the \$15,000 tranche.

(n) \$65,000 Panache financing:

On June 2, 2011, an unrelated third party (“Panache”) purchased an aggregate \$65,000 (representing \$30,000 of outstanding principal and \$35,000 accrued interest) from one of CoroWare’s note holders. The terms of the note were

changed such that the conversion rate was changed from a fixed \$1 per share to a variable rate of an agreed to discount to market not to fall below a 50% discount to the average of the 3 lowest trading prices during the 20 days prior to conversion. The interest rate was changed from 8% to 15% and the maturity date was extended from June 2003 to June 1, 2012, thus taking the note out of default.

The modification was analyzed in accordance with current accounting standards and was determined not to be a troubled debt restructuring but rather an extinguishment of debt as there was a substantial difference in terms on the new debt. As the old debt was being carried at face value, there was no gain or loss recognized on the extinguishment.

F-25

NOTE 9 - CONVERTIBLE DEBT (Continued) In the Company's evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: effective term (using the remaining term of the host instrument); effective volatility (132.38%); and effective risk adjusted yield (12.5%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$100,880 at inception. Derivative expense of \$35,880 was recognized at inception.

During 2012, Panache converted \$8,980 of principal into 3,675,000 shares of the Company's common stock. The company recognized a gain of \$7,536 on the transaction.

(o) \$15,000 Panache financing:

On April 2, 2011, the Company entered into a \$15,000 Convertible Note Agreement with an unrelated third party ("Panache"). The note calls for interest at 8% through the maturity date of June 29, 2012. The note can be renewed for an additional 10 years under 6 month extensions at \$100 per extension.

The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal to an agreed to discount to market not to fall below a 15% discount to the average of the 3 lowest trading prices during the 20 days prior to conversion.

In the Company's evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: effective term (using the remaining term of the host instrument); effective volatility (132.38%); and effective risk adjusted yield (12.5%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$13,500 at inception.

As of December 31, 2012, there have been no conversions on this convertible debenture.

F-26

NOTE 9 - CONVERTIBLE DEBT (Continued)

(p) \$567,200 Westmount financing:

On January 12, 2011, Yorkville assigned 100% of Tranche 2 of its \$2,825,000 debenture (aggregating \$567,200 in principal and \$317,510 in interest) to an unrelated third party (“Westmount”). The terms of the note did not change. As such, there was no accounting impact for CoroWare as it was merely an assignment between debt holders. The note calls for interest at 14%. This note matured August 22, 2009 and is currently in default.

The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal to the lower of \$0.02 per share or 85% of the lowest volume weighted average price in the 30 days prior to the conversion date. The Company's obligations under the purchase agreement are secured by substantially all of the assets of the Company and those of its wholly owned subsidiary, CoroWare Technologies, Inc.

In order to estimate a value for the embedded conversion feature for financial statement presentation at December 31, 2011, management needed to make certain assumptions about the estimated maturity date of this debt. It was estimated that this debt would not be called prior to November 1, 2012.

During 2012, there were no conversions on this note.

(q) \$170,561 Redwood financing:

On March 21, 2011, Ratzker (see Note 9(h)) transferred 50% of his ownership interest in his convertible debenture to another unrelated party (“Redwood”). The terms of the note did not change. As such, there was no accounting impact for CoroWare as it was merely an assignment between debt holders. The note calls for interest at 5% through the maturity date of March 18, 2013.

The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal to 65% of the volume weighted average price for the

Company's stock for the 30 trading days prior to conversion. The Company's obligations under the purchase agreement are secured by substantially all of the assets of the Company and those of its wholly owned subsidiary, CoroWare Technologies, Inc.

During 2012, \$4,485 was converted into 6,208.390 shares of the Company's common stock. The company realized a loss of \$19,547.

(r) \$21,962 Premier financing:

On October 5, 2011, the Company entered into a \$21,962 Convertible Note Agreement with an unrelated third party ("Premier"). The note calls for interest at 10% through the maturity date of March 5, 2012.

F-27

NOTE 9 - CONVERTIBLE DEBT (Continued)

The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal the average closing bid prices for the Company's common stock for the 5 trading days prior to but not including the date of conversion. In the Company's evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: effective term (using the remaining term of the host instrument); effective volatility (288.54%); and effective risk adjusted yield (6.25%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$10,844 at inception. As of December 31, 2012, there have been no conversions on this convertible debenture.

(s) \$21,000 Tangiers financing:

On March 8, 2012, the Company entered into a \$21,000 Convertible Note Agreement with an unrelated third party ("Tangiers"). The note calls for interest at 7% through the maturity date of March 8, 2018.

The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal to 50% of the lowest trading price during the 7 days prior to conversion.

In the Company's evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: effective term (using the remaining term of the host instrument); effective volatility (234.41%); and effective risk adjusted yield (15%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$39,480 at inception.

During 2012, \$5,245 of principal was converted into 13,221,424 shares of the Company common stock. The company recognized a gain of \$1,106.

(t) \$5,474 Tangiers financing:

On March 7, 2012, a third party ("Tangiers") purchased a \$5,000 portion of the Cariou Convertible Note including \$474 of accrued interest. The Company issued to Tangiers a new Convertible Note which calls for interest at 10% through the new maturity date of March 7, 2013. In addition, the conversion rate was changed 50% of the lowest trading price

during the 7 days prior to conversion. Upon default, the interest rate increases to 20% and the conversion rate changes to 40% of the lowest trading price during the 7 days prior to conversion.

The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal to 50% of the lowest trading price for the Company's common stock during the 7 days prior to the conversion date. Upon default, the interest rate increases to 20% and the conversion rate changes to 40% of the lowest trading price for the Company's common stock during the 7 days prior to the conversion date.

F-28

NOTE 9 - CONVERTIBLE DEBT (Continued)

In the Company's evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair

value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: effective term (using the remaining term of the host instrument); effective volatility (234.41%); and effective risk adjusted yield (15%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$9,417 at inception.

\$2,500 of principal was converted into 500,000 shares of the Company common stock. The Company realized a loss of \$13,267.

(u) \$10,000 Magna financing:

On August 20, 2012, Cariou sold \$10,000 of his convertible note to Magna Group, LLC ("Magna"). In connection with the sale, the maturity date was extended from May 4, 2011 to April 20, 2013, the Company restated the interest rate on the note from 15% to 12% and changed the conversion rate from the 5 day average closing price using the 5 trading days prior to conversion to 60% of the lowest trading price for common stock during the 3 trading days prior to the date of conversion. Additionally, if the stock is chilled by the DTC at any point in which this agreement is outstanding, the discount increases by an additional 8%.

There were no conversions on this instrument during the year ending December 31, 2012.

(v) \$54,060 Ridge Point financing:

On August 30, 2012, the Company entered into a \$54,060 convertible note with LBB & Associates ("LBB"). The note bears interest at 10% and matures March 24, 2013. The note is convertible into common stock of the Company at a conversion rate equal to 65% of the average of the lowest two trading price for common stock during the 5 day trading period prior to the date of conversion. On September 21, 2012, LBB sold this note to Ridge Point Capital. During the year ending December 31, 2012, there were no conversions on this debenture.

(w) \$17,500 Asher financing:

On August 9, 2012, the Company consummated an unsecured Securities Purchase Agreement with an unrelated third party for the sale by the Company of its 8% secured convertible debentures in the aggregate principal amount of \$17,500, net of deferred financing costs of \$2,500.

The debenture matures on May 13, 2013, nine months from the date of issuance. The holder of the debenture may, at any time, convert amounts outstanding under the debenture into shares of common stock of the Company at a conversion rate equal to 50% of the market price, which is defined as the average of the lowest 3 trading prices for the Company's common stock during the 30 trading days prior to conversion.

F-29

NOTE 9 - CONVERTIBLE DEBT (Continued)

In the Company's evaluation of this instrument in accordance with ASC 815 Derivatives and Hedging, based on the variable conversion price and lack of authorized shares, it was determined that the conversion feature was not afforded the exemption as a conventional convertible instrument and did not otherwise meet the conditions for equity classification. As such, the conversion and other features were compounded into one instrument, bifurcated from the debt instrument and carried as a derivative liability, at fair value. The Company estimated the fair value of the bifurcated derivative instruments using the Monte Carlo valuation model because this methodology provides for all of the necessary assumptions necessary for fair value determination; including assumptions for credit risk, interest risk and conversion/redemption behavior. Significant assumptions underlying this methodology were: effective term (using the remaining term of the host instrument); effective volatility (222.71% - 212.43%); and effective risk adjusted yield (12.5%). As a result of these estimates, the valuation model resulted in a compound derivative balance of \$15,452 at inception. There was no derivative expense recognized at inception.

During 2012, \$15,000 was converted into 750,000 shares of the Company common stock. The company realized a gain of \$2,033.

(x) *\$20,000 Asher financing:*

On August 2, 2012, Cariou sold \$20,000 of his convertible note to Asher. In connection with the sale, the Company restated the interest rate on the note from 15% to 10% and changed the conversion rate from the 5 day average closing price using the 5 trading days prior to conversion to 40% of the Market Price (defined as the average of the (1) lowest trading price for common stock during the 30 day trading period ending one trading day prior to the date of conversion). Additionally, the beneficial ownership limit was increased from 4.99% to 9.99%.

\$ 27,500 Asher convertible note financing	3,600	8,780,488	87,320
\$ 21,000 Tangiers convertible note financing	5,245	13,221,424	1,106
	\$101,650	37,538,635	\$71,069

Changes in the fair value of the compound derivative and, therefore, derivative income (expense) related to the compound derivative is significantly affected by changes in the Company's trading stock price and the credit risk associated with its financial instruments. The fair value of the warrant derivative is significantly affected by changes in the Company's trading stock prices.

During the years ended December 31, 2012 and 2011, the Company incurred gains/(losses) in conjunction with the applicable redemptions of the convertible debt of \$71,069 and \$75,517, respectively.

NOTE 10 - INCOME TAXES

The Company follows ASC 740, "Income Taxes". Deferred income taxes reflect the net effect of (a) temporary difference between carrying amounts of assets and liabilities for financial purposes and the amounts used for income tax reporting purposes, and (b) net operating loss carry forwards. No net provision for refundable Federal income tax has been made in the accompanying statements of operations because no recoverable taxes were paid previously. Similarly, no deferred tax asset attributable to the net operating loss carry forward has been recognized, as it is not deemed likely to be realized.

The current year provision for refundable Federal income tax consists of the following at December 31, 2012 and 2011:

	2012	2011
Refundable income tax attributable to:		
Current operations	\$384,000	\$723,000
Less, change in valuation allowance	(384,000)	(723,000)
Net refundable amount	\$—	\$—

The cumulative tax effect at the expected rate of 34% of significant items comprising the Company's net deferred tax amount is as follows at December 31, 2011 and 2010:

	2012	2011
Deferred tax asset attributable to:		
Net operating loss carryover	\$9,754,000	\$9,370,000
Less, valuation allowance	(9,754,000)	(9,370,000)
Net deferred tax asset	\$—	\$—

At December 31, 2012, the Company had an unused net operating loss carryover approximating \$ 26,500,000 that, subject to certain utilization limitations, is available to offset future taxable income, if any. The net operating losses expire from 2024 through 2031.

NOTE 11 - STOCK BASED COMPENSATION

Employee stock options:

The Company has a 2005 Stock Option Plan which is authorized to issue 66,667 options. There are currently 34,831 options outstanding under this plan.

Compensation cost of \$-0- and \$20,134 was recognized during the years ended December 31, 2012 and 2011, respectively, for grants under the 2005 Stock Option Plan.

During 2012 and 2011, -0- and 364 unvested options were forfeited by employees upon termination.

No options were issued during 2012 or 2011.

Nonemployee stock options:

During 2008 there were 3,333 options granted to nonemployees to purchase shares of the Company's common stock at \$3. These options expire in ten years and vested immediately.

The following table summarizes stock option activity for the years ending December 31, 2012 and 2011:

	Number	Weighted Average Exercise Price	Weighted Average Life (years)
Outstanding, January 1, 2011	-	\$ 2.97	
Granted	-		
Forfeited	-		
Exercised	-		

Outstanding, December 31, 2011	38,164	\$ 2.97	6.47
Granted	-		
Forfeited	-		
Exercised	-		
Outstanding, December 31, 2012	38,164	\$ 2.97	5.47
Warrants exercisable at December 31, 2012	38,164	\$ 2.97	5.47

Directors' compensation:

The Company has not paid and does not presently propose to pay cash compensation to any director for acting in such capacity. For 2012 and 2011 services, each director is to be compensated with 15,000 shares of the Company's restricted common stock. In addition, the chairman is to be awarded 7,500 shares. Neither director has received his shares for 2012 services. A liability has been established for \$9,374 for the remaining board fees that have yet to be paid.

NOTE 11 - STOCK BASED COMPENSATION (Continued)

The directors received the following common stock issuances for their service in 2012 and 2011:

Director	Restricted Common Stock Issued in 2012 for 2011 services	Value	Restricted Common Stock Issued in 2011 for 2010 services	Value
Martin	—	\$—	—	\$—
Nielson	—	—	—	—
John Kroon	—	—	—	—
Total	—	\$—	—	\$—

The following table summarizes stock based compensation for services during the years ended December 31, 2012 and 2011:

	2012		2011	
	Shares	Value	Shares	Value
Employee bonus	85,787,184	\$32,194	1,000,000	\$3,300
Professional fees	—	—	—	—
	85,787,184	\$32,194	1,000,000	\$3,300

NOTE 12 - OTHER STOCKHOLDERS' EQUITY*a) Preferred stock Series A:*

The Company has authorized 125,000 shares of Series A Preferred Stock. Each share of Series A Preferred Stock i) pays a dividend of 5%, payable at the discretion of the Company in cash or common stock (ii) is convertible immediately after issuance into the Company's common stock at the lesser of \$.005 per share or 75% of the average closing bid prices over the 20 trading days immediately preceding the date of conversion (iii) has a liquidation preference of \$1.00 per share, (iv) may be redeemed by the Company at any time up to five years after the issuance date for \$1.30 per share plus accrued and unpaid dividends, (v) has no voting rights except when mandated by

Delaware law.

There were no shares of Series A Preferred Shares outstanding at any time during the years ended December 31, 2012 and 2011.

b) Preferred stock Series B:

The Company has authorized 525,000 shares of Series B Preferred Stock. Each share of Series B Preferred Stock i) pays a dividend of 5%, payable at the discretion of the Company in cash or common stock, (ii) is convertible immediately after issuance into the Company's common stock at the lesser of \$15 per share or 75% of the average closing bid prices over the 20 trading days immediately preceding the date of conversion (iii) has a liquidation preference of \$1.00 per share, (iv) may be redeemed by the Company at any time up to five years

F-37

NOTE 12 - OTHER STOCKHOLDERS' EQUITY (Continued)

There were no conversions of Series B stock during the years ended December 31, 2012 and 2011.

Based upon the Company's evaluation of the terms and conditions of the Series B Preferred Stock, the Company concluded that their features are more akin to a debt instrument than an equity instrument, which means that the Company's accounting conclusions are generally based upon standards related to a traditional debt security. The Company's evaluation concluded that the embedded conversion feature was not afforded the exemption as a conventional convertible instrument due to certain variability in the conversion price, and it further did not meet the conditions for equity classification. Therefore, the Company is required to bifurcate the embedded conversion feature and carry it as a liability.

The Company estimated the fair value of the compound derivative using a common stock equivalent and the current share price of the Company's common stock. As a result of this estimate, the Company's valuation model resulted in a compound derivative balance associated with the Series B preferred stock of \$397,390 and \$106,443 as of December 31, 2012 and 2011, respectively. This amount is included in mandatorily redeemable preferred stock as a liability on the Company's balance sheet. Fair value adjustments of \$397,390 and \$106,443 were charged to derivative income (expense) for the years ended December 31, 2012 and 2011, respectively.

c) Preferred stock Series C:

The Company has authorized 500,000 shares of Series C Preferred Stock. During 2007 the Company initiated a private offering under Regulation D of the Securities Act of 1933 (the "Private Offering"), of an aggregate 500,000 units (collectively referred to as the "Units") at a price of \$1,00 (one dollar) per unit, with each unit consisting of one share of Series C Convertible Preferred Stock at the lesser of eighty five Percent (85%) of the average closing bid price of the Common Stock over the twenty (20) trading days immediately preceding the date of conversion or \$0.04 and stock purchase warrants equal to the number of shares of common stock converted from the Series C Convertible Preferred Stock, exercisable at \$0.06 per share and which expire five (5) years from the conversion date.

d) Preferred stock Series D:

On November 10, 2011 the Board approved by unanimous written consent an amendment to the Corporation's Certificate of Incorporation to designate the rights and preferences of Series D Preferred Stock. There are 500,000 shares of Series D Preferred Stock authorized with a par value of \$0.001. Each share of Series D Preferred Stock has

a stated value equal to \$1.00. These preferred shares rank higher than all other securities. Each outstanding share of Series D Preferred Stock shall be convertible into the number of shares of the Corporation's common stock determined by dividing the Stated Value by the Conversion Price which is defined as eighty five percent (85%) of the average closing bid price of the Common Stock over the twenty (20) trading days immediately preceding the date of conversion, (ii) but no less than Par Value of the Common Stock. Mandatory conversion can be demanded by the Company prior to October 1, 2013. Each one share of the Series D Preferred Stock shall have voting rights equal to 100,000 votes of Common Stock.

There were no conversions of Series D stock during the years ended December 31, 2012.

Based upon the Company's evaluation of the terms and conditions of the Series D Preferred Stock, the Company concluded that their features are more akin to a debt instrument than an equity instrument, which means that the Company's accounting conclusions are generally based upon standards related to a traditional debt security. The Company's evaluation concluded that the embedded conversion feature was not afforded the exemption as a conventional convertible instrument due to certain variability in the conversion price, and it further did not meet the conditions for equity classification. Therefore, the Company is required to bifurcate the embedded conversion feature and carry it as a liability.

NOTE 12 - OTHER STOCKHOLDERS' EQUITY (Continued)

The Company estimated the fair value of the compound derivative using a common stock equivalent and the current share price of the Company's common stock. As a result of this estimate, the Company's valuation model resulted in a compound derivative balance associated with the Series D preferred stock of \$75,901 as of December 31, 2011. This amount is included in mandatorily redeemable preferred stock as a liability on the Company's balance sheet. Fair value adjustments of \$98,391 were charged to derivative income (expense) for the year ended December 31, 2011.

e) Preferred stock Series E:

On March 9, 2012, the Corporation filed the Certificate of Designation of the Rights and Preferences of Series E Convertible Preferred Stock of CoroWare, Inc. with the Delaware Secretary of the State pursuant to which the Corporation set forth the designation, powers, rights, privileges, preferences and restrictions of 1,000,000 authorized shares of Series E Convertible Preferred Stock, par value \$.001 per share.

Issuance of Preferred Stock, Series E:

In April 2012, the Company entered into a subscription agreement to sell 10,000 shares of Preferred stock, Series E for proceeds of \$10,000.

There were no conversions of Series E stock during the years ended December 31, 2012.

f) Outstanding warrants:

At December 31, 2012, the Company had the following warrants outstanding:

	Grant Date	Expiration Date	Warrants Granted	Exercise Price
\$ 300,000 financing	9(b) 03/19/08	3/19/13	33,333	\$ 1,200
			33,333	

Edgar Filing: CoroWare, Inc, - Form 10-K

The following table summarizes warrant activity for the years ending December 31, 2012 and 2011:

	Number	Weighted Average Exercise Price	Weighted Average Life (years)
Outstanding, January 1, 2011	209	\$ 1,200	
Granted	—		
Forfeited	-42		
Exercised	—		
Outstanding, December 31, 2011	167	\$ 1,200	1.25
Granted	—		
Forfeited	—		
Exercised	—		
Outstanding, December 31, 2012	167	\$ 1,200	0.25
Warrants exercisable at December 31, 2012	167	\$ 1,200	0.25

On July 6, 2012, the Company effected a one-for-two hundred (1:200) reverse split of the Company's Common Stock. All common share amounts within this document have been adjusted to reflect this change.

NOTE 13 – INVESTMENT IN JOINT VENTURE

On September 27, 2012, the Company partnered with a private investor to launch a joint venture – Aricon,LLC to develop and market mobile robot platforms, applications, and solutions for the construction industry.

The joint venture is currently comprised of CoroWare (51% ownership), who agreed to contribute 38,000,000 shares of restricted CoroWare common stock, (1) mobile robot for prototype development, \$10,000 cash, and mobile robotics development expertise; and Lucas Snyder (49% ownership), a private investor who agreed to contribute \$50,000 cash, construction industry expertise, and customer relationships.

Through its combined expertise in construction and robotics, ARiCON intends to address the growing need for Computer Aided Production (CAP) solutions, with its initial focus on the development of robotic layout systems.

NOTE 13 - COMMITMENTS

Lease Agreements:

As of May 30, 2010 and July 31, 2010, the Company ended its lease agreements with PS Business Park for the properties at 4074 148 th Avenue NE and 4056 Avenue NE in Redmond, Washington. In July 2010, The Company entered into a five year term lease from August 1, 2010 to July 31, 2015.

Future minimum rentals on non-cancelable leases are as follows:

For the year ending December 31,	
2013	\$52,041
2014	55,029
2015	33,117
2016	-
	\$189,240

Employment Agreements:

On May 16, 2006, Mr. Spencer entered into an employment agreement and was granted 1,667 options to purchase restricted shares of CoroWare, Inc. common stock at a purchase price of \$54, expiring in ten years, and vesting ratably over three years. Our board of directors voted to re-price these options to \$12 at September 12, 2007 and again to \$3 at December 31, 2007. On February 4, 2008 these options were converted into 1,667 share of the Company's common stock as per a directive from the Board of Directors. On September 12, 2007, Mr. Spencer was granted 5,000 options to purchase restricted shares of our common stock at \$12. On December 31, 2007 the options were re-priced to \$3. As of December 31, 2012, all 5,000 of these options are vested.

Mr. Hyams entered into an employment agreement and was granted 1,667 options to purchase restricted shares of CoroWare, Inc. common stock at a purchase price of \$54, expiring in ten years, and vesting ratably over three years. The Board of Directors voted to re-price these options to \$12 at September 12, 2007 and again to \$3 at December 31, 2007. On February 4, 2008 these options were converted into 1,667 share of our common stock as per a directive from our board of directors. On September 12, 2007 Mr. Hyams was granted 5,000 options to purchase restricted shares of our common stock at \$12 per share. On December 31, 2007 the options were re-priced \$3. At December 31, 2012, all 5,000 of those options are vested.

NOTE 13 – COMMITMENTS (Continued)

Mr. Mandrell was employed as Director and then Vice President of CoroWare, Inc. from January 29, 2007, until his resignation November 12, 2010. Mr. Mandrell entered into an employment agreement and was granted 1,667 options to purchase restricted shares of our common stock at a purchase price of \$51, expiring in ten years, and vesting ratably over three years. Our board of directors voted to re-price these options to \$12 at September 12, 2007 and again to \$3 at December 31, 2007. At December 31, 2011, all of these options are vested. On September 12, 2007 Mr. Mandrell was granted 2,000 options to purchase restricted shares of our common stock at \$12 per share. On December 31, 2007 the options were re-priced to \$3. At March 31, 2010, all 2,000 of those options are vested.

Walter K. Weisel was employed as our CEO from August 25, 2004, until his resignation August 21, 2007 and from all other positions in December 2007. On April 12, 2005, Mr. Weisel was granted 5,000 options to purchase restricted shares of our common stock at an exercise price of \$30, expiring in ten years and vesting ratably over three years. Upon his termination on December 13, 2007, 3,333 of the 5,000 options had vested and remain exercisable until their termination date.

In February 2008, Mr. Gartlan was granted 10,040 shares of restricted common stock in exchange for 10,040 common stock options that were outstanding. Subsequent to his passing, the Company granted fully vested, ten-year options to Mr. Gartlan's surviving spouse to buy up to 3,333 restricted shares of our common stock at \$3 per share.

NOTE 14- SUBSEQUENT EVENTS

On, February 22, 2013, the majority stockholders of the Company authorized an increase in the number of authorized shares of common stock from three billion (3,000,000,000) shares of common stock to thirteen billion (13,000,000,000) shares of common stock. This increase was effective April 15, 2013.
