STIFEL FINANCIAL CORP.

Notes to Consolidated Financial Statements

(Unaudited)

NOTE 1 – Nature of Operations and Basis of Presentation

Nature of Operations

Stifel Financial Corp. (the “Parent”), through its wholly owned subsidiaries, is principally engaged in retail brokerage; securities trading; investment banking; investment advisory; retail, consumer, and commercial banking; and related financial services. We have offices throughout the United States and several European cities. Our major geographic area of concentration is throughout the United States, with a growing presence in the United Kingdom and Europe. Our company’s principal customers are individual investors, corporations, municipalities, and institutions.

Basis of Presentation

The consolidated financial statements include Stifel Financial Corp. and its wholly owned subsidiaries, principally Stifel, Nicolaus & Company, Incorporated (“Stifel”) and Stifel Bank & Trust (“Stifel Bank”). All material intercompany balances and transactions have been eliminated. Unless otherwise indicated, the terms “we,” “us,” “our,” or “our company” in this report refer to Stifel Financial Corp. and its wholly owned subsidiaries.

We have prepared the accompanying unaudited consolidated financial statements pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). Pursuant to these rules and regulations, we have omitted certain information and footnote disclosures we normally include in our annual consolidated financial statements prepared in accordance with U.S. generally accepted accounting principles. In management’s opinion, we have made all adjustments (consisting only of normal, recurring adjustments, except as otherwise noted) necessary to fairly present our financial position, results of operations and cash flows. Our interim period operating results do not necessarily indicate the results that may be expected for any other interim period or for the full fiscal year. These financial statements and accompanying notes should be read in conjunction with the consolidated financial statements and the notes thereto in our Annual Report on Form 10-K for the year ended December 31, 2014 on file with the SEC.

Certain amounts from prior periods have been reclassified to conform to the current period’s presentation. The effect of these reclassifications on our company’s previously reported consolidated financial statements was not material.

There have been no material changes in our significant accounting policies, as compared to the significant accounting policies described in our Annual Report on Form 10-K for the year ended December 31, 2014.

NOTE 2 – Recently Issued Accounting Guidance

Business Combinations

In September 2015, the Financial Accounting Standards Board (“FASB”) issued Accounting Standard Update (“ASU”) No. 2015-16, Business Combinations (Topic 805): “Simplifying the Accounting for Measurement-Period Adjustments” (“ASU 2015-16”), which eliminates the requirement for an acquirer in a business combination to account for measurement-period adjustments retrospectively. Under this ASU, acquirers must recognize measurement-period adjustments in the period in which they determine the amounts, including the effect on earnings of any amounts they would have recorded in previous periods if the accounting had been completed at the acquisition date. This guidance is effective for fiscal years beginning after December 15, 2016, with early adoption permitted. We elected to early adopt this ASU in the third quarter of 2015. The adoption of ASU 2015-16 did not have a material impact on our consolidated financial statements.

Disclosures for Investments in Certain Entities that Calculate Net Asset Value per Share

In May 2015, the FASB issued ASU No. 2015-07, “Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent).” The guidance removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. The guidance also removes the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the net asset value per share practical expedient. Rather, those disclosures are limited to investments for which the entity has elected to measure the fair value using that practical expedient. The guidance is effective for fiscal years beginning after December 15, 2015 and for interim periods within those years. The guidance shall be applied retrospectively for all periods presented. Early application is permitted. The guidance is not expected to have a material impact on our consolidated financial statements.

Interest - Imputation of Interest

In April 2015, the FASB issued ASU No. 2015-03, "Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs" ("ASU 2015-03"). The guidance in ASU 2015-03 requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. ASU 2015-03 is effective for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption is permitted, and a retrospective approach is required. The guidance is not expected to have a material impact on our consolidated financial statements.

Consolidation

In February 2015, the FASB issued ASU No. 2015-02, "Consolidation (Topic 810): Amendments to the Consolidation Analysis" that amends the criteria for determining whether limited partnerships and similar entities are VIEs, clarifies when a general partner or asset manager should consolidate an entity and eliminates the indefinite deferral of certain aspects of VIE accounting guidance for investments in certain investment funds. Money market funds registered under Rule 2a-7 of the Investment Company Act and similar funds are exempt from consolidation under the new guidance. The new accounting guidance is effective beginning on January 1, 2016. Early adoption is permitted. The guidance is not expected to have a material impact on our consolidated financial statements.

Repurchase Agreements

In June 2014, the FASB issued ASU No. 2014-11, "Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures," ("ASU 2014-11") amending FASB Accounting Standards Codification Topic 860, "Transfers and Servicing." The amended guidance changes the accounting for repurchase-to-maturity transactions and repurchase financing arrangements. The guidance also requires new disclosures for certain transfers accounted for as sales and collateral supporting transactions that are accounted for as secured borrowings. ASU 2014-11 is effective for annual and interim periods beginning after December 15, 2014, except for the disclosures related to secured borrowings, which are effective for annual periods beginning after December 15, 2014, and for interim periods beginning after March 15, 2015. The adoption of ASU 2014-11 did not have a material impact on our results of operations or financial position.

Revenue Recognition

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)," ("ASU 2014-09") which supersedes current revenue recognition guidance, including most industry-specific guidance. ASU 2014-09 requires a company to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods and services. The guidance also requires additional disclosures regarding the nature, amount, timing and uncertainty of revenue that is recognized. The FASB has approved a one year deferral of this standard, and this pronouncement is now effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period and is to be applied using one of two retrospective application methods, with early application not permitted. We are currently evaluating the impact the new guidance will have on our consolidated financial statements.

Discontinued Operations

In April 2014, the FASB issued ASU No. 2014-08, "Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity," ("ASU 2014-08") amending FASB ASC Topic 205-20, "Discontinued Operations," ("ASC 205-20"). The

amended guidance changes the criteria for reporting discontinued operations and requires new disclosures. ASU 2014-08 is effective for annual and interim periods beginning on or after December 15, 2014, and will be applied prospectively. The adoption of ASU 2014-08 did not have a material impact on our consolidated financial statements.

Note 3 – Acquisition of Sterne Agee Group, Inc.

On June 5, 2015, we completed the purchase of all of the outstanding shares of common stock of Sterne Agee Group, Inc. (“Sterne Agee”), a financial services firm that offers comprehensive wealth management and investment services to a diverse client base including corporations, municipalities and individual investors. The purchase was completed pursuant to the merger agreement dated February 23, 2015.

The acquisition was accounted for under the acquisition method of accounting in accordance with ASC 805 (“Topic 805”), “Business Combinations.” Accordingly, goodwill was measured as the excess of the acquisition-date fair value of the consideration transferred over the amount of acquisition-date identifiable assets acquired net of assumed liabilities. We recorded \$90.1 million of goodwill and

intangible assets in the consolidated statement of financial condition, which has been allocated to our company's Global Wealth Management and Institutional Group segments. The allocation of the purchase price is preliminary and will be finalized upon completion of the analysis of the fair values of the net assets of Sterne Agee at closing and the identified intangible assets. The final goodwill and intangible assets recorded on the consolidated statement of financial condition may differ from that reflected herein as a result of future measurement period adjustments. In management's opinion, the goodwill represents the value expected from the synergies created through the operational enhancement benefits that will result from the integration of Sterne Agee's business and the reputation and expertise of Sterne Agee in the financial services sector.

On June 5, 2015, certain employees were granted restricted stock units of our company as retention. The fair value of the awards issued as retention was \$23.8 million. The fair value of the awards is based upon the closing price of our company's common stock on the date of grant. There are no continuing service requirements associated with these restricted stock units, and accordingly were expensed at date of grant. This charge is included in compensation and benefits in the consolidated statement of operations for nine months ended September 30, 2015. In addition, we have paid \$33.8 million in the form of notes to associates for retention. These notes will be forgiven by a charge to compensation and benefits over a five- to ten-year period if the individual satisfies certain conditions, usually based on continued employment and certain performance standards.

Sterne, Agee & Leach, Inc. was a defendant in the Canyon Ridge, et al. matter and, prior to being acquired by Stifel, received an adverse jury verdict of \$35.6 million. Prior to the closing date, Sterne Agee had established adequate reserves for various claims that were included the opening balance sheet. During the third quarter of 2015, this matter was settled and paid, and the excess reserves associated with the Canyon Ridge matter were distributed to Sterne Agee Group, Inc. shareholders. Under the terms of the agreements governing the acquisition, we have withheld a portion of the purchase price of Sterne Agee Group, Inc. pending the resolution of currently existing or subsequently arising liabilities relating to the operation of the Sterne Agee Group Inc. business prior to the closing of the acquisition. Based upon currently available information and review with counsel, we believe the amounts which we are allowed to withhold will be adequate to fully indemnify us from any losses related to the pre-closing operations of Sterne Agee Group, Inc.

Pro forma information is not presented, because the acquisition is not considered to be material, as defined by the SEC. The results of operations of Sterne Agee have been included in our results prospectively from the date of acquisition.

NOTE 4 – Discontinued Operations

(in thousands)	Three Months Ended		Nine Months Ended	
	September 30, 2015	2014	September 30, 2015	2014
Net revenues	\$ —	\$ (44)	\$ —	\$ (75)
Restructuring expense	—	—	—	217
Operating expenses	—	110	—	3,664
Total non-interest expenses	—	110	—	3,881
Loss from discontinued operations before income	—	(154)	—	(3,956)

tax expense				
Income tax expense/(benefit)	—	36	—	(1,199)
Loss from discontinued operations, net of tax	\$ —	\$ (190)	\$ —	\$ (2,757)

NOTE 5 – Receivables From and Payables to Brokers, Dealers, and Clearing Organizations

Amounts receivable from brokers, dealers, and clearing organizations at September 30, 2015 and December 31, 2014, included (in thousands):

	September 30, 2015	December 31, 2014
Deposits paid for securities borrowed	\$ 333,348	\$ 445,542
Receivables from clearing organizations	295,856	198,079
Securities failed to deliver	22,070	7,453
	\$ 651,274	\$ 651,074

Amounts payable to brokers, dealers, and clearing organizations at September 30, 2015 and December 31, 2014, included (in thousands):

	September 30,	December 31,
	2015	2014
Deposits received from securities loaned	\$ 47,495	\$ 4,215
Payable to clearing organizations	31,136	2,443
Securities failed to receive	28,172	7,365
	\$ 106,803	\$ 14,023

Deposits paid for securities borrowed approximate the market value of the securities. Securities failed to deliver and receive represent the contract value of securities that have not been delivered or received on settlement date.

NOTE 6 – Fair Value Measurements

We measure certain financial assets and liabilities at fair value on a recurring basis, including cash equivalents, financial instruments owned, available-for-sale securities, investments, financial instruments sold, but not yet purchased, and derivatives.

We generally utilize third-party pricing services to value Level 1 and Level 2 available-for-sale investment securities, as well as certain derivatives designated as cash flow hedges. We review the methodologies and assumptions used by the third-party pricing services and evaluate the values provided, principally by comparison with other available market quotes for similar instruments and/or analysis based on internal models using available third-party market data. We may occasionally adjust certain values provided by the third-party pricing service when we believe, as the result of our review, that the adjusted price most appropriately reflects the fair value of the particular security.

Following are descriptions of the valuation methodologies and key inputs used to measure financial assets and liabilities recorded at fair value. The descriptions include an indication of the level of the fair value hierarchy in which the assets or liabilities are classified.

Cash Equivalents

Cash equivalents include highly liquid investments with original maturities of three months or less. Due to their short-term nature, the carrying amount of these instruments approximates the estimated fair value. Actively traded money market funds are measured at their reported net asset value, which approximates fair value. As such, we classify the estimated fair value of these instruments as Level 1.

Financial Instruments Owned and Available-For-Sale Securities

When available, the fair value of financial instruments is based on quoted prices in active markets and reported in Level 1. Level 1 financial instruments include highly liquid instruments with quoted prices, such as equity securities listed in active markets, corporate fixed income securities, and U.S. government securities.

If quoted prices are not available for identical instruments, fair values are obtained from pricing services, broker quotes, or other model-based valuation techniques with observable inputs, such as the present value of estimated cash flows, and reported as Level 2. The nature of these financial instruments include instruments for which quoted prices are available but traded less frequently, instruments whose fair value has been derived using a model where inputs to the model are directly observable in the market, or can be derived principally from or corroborated by observable market data, and instruments that are fair valued using other financial instruments, the parameters of which can be directly observed. Level 2 financial instruments include U.S. government agency securities, mortgage-backed securities, corporate fixed income securities infrequently traded, state and municipal securities, asset-backed securities, and equity securities not actively traded.

We have identified Level 3 financial instruments to include certain corporate fixed income securities with unobservable pricing inputs and certain state and municipal securities, which include auction rate securities (“ARS”). Level 3 financial instruments have little to no pricing observability as of the report date. These financial instruments do not have active two-way markets and are measured using management’s best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation. ARS are valued based upon our expectations of issuer redemptions and using internal discounted cash flow models that utilize unobservable inputs.

Investments

Investments carried at fair value primarily include corporate equity securities, ARS, investments in mutual funds, U.S. government securities, and investments in public companies, private equity securities, and partnerships, which are classified as other in the following tables.

Corporate equity securities, mutual funds, and U.S. government securities are valued based on quoted prices in active markets and reported in Level 1.

ARS for which the market has been dislocated and largely ceased to function are reported as Level 3 assets. The methods used to value ARS are discussed above.

Investments in partnerships and other investments include our general and limited partnership interests in investment partnerships and direct investments in non-public companies. The net assets of investment partnerships consist primarily of investments in non-marketable securities. The value of these investments is at risk to changes in equity markets, general economic conditions, and a variety of other factors. We estimate fair value for private equity investments based on our percentage ownership in the net asset value of the entire fund, as reported by the fund or on behalf of the fund, after indication that the fund adheres to applicable fair value measurement guidance.

The valuation of these investments requires significant management judgment due to the absence of quoted market prices, inherent lack of liquidity, and long-term nature of these assets. As a result, these values cannot be determined with precision, and the calculated fair value estimates may not be realizable in a current sale or immediate settlement of the instrument.

For those funds where the net asset value is not reported by the fund, we derive the fair value of the fund by estimating the fair value of each underlying investment in the fund. In addition to using qualitative information about each underlying investment, as provided by the fund, we give consideration to information pertinent to the specific nature of the debt or equity investment, such as relevant market conditions, offering prices, operating results, financial conditions, exit strategy, and other qualitative information, as available. The lack of an independent source to validate fair value estimates, including the impact of future capital calls and transfer restrictions, is an inherent limitation in the valuation process. Commitments to fund additional investments in nonmarketable equity securities recorded at fair value were \$11.4 million and \$11.5 million at September 30, 2015 and December 31, 2014, respectively.

Financial Instruments Sold, But Not Yet Purchased

Financial instruments sold, but not purchased, recorded at fair value based on quoted prices in active markets and other observable market data include highly liquid instruments with quoted prices, such as U.S. government securities, corporate fixed income securities, and equity securities listed in active markets, which are reported as Level 1.

If quoted prices are not available, fair values are obtained from pricing services, broker quotes, or other model-based valuation techniques with observable inputs, such as the present value of estimated cash flows, and reported as Level 2. The nature of these financial instruments include instruments for which quoted prices are available but traded less frequently, instruments whose fair value has been derived using a model where inputs to the model are directly observable in the market, or can be derived principally from or corroborated by observable market data, and instruments that are fair valued using other financial instruments, the parameters of which can be directly observed. Level 2 financial instruments include U.S. government agency securities, mortgage-backed securities not actively traded, and corporate fixed income securities.

Derivatives

Derivatives are valued using quoted market prices for identical instruments when available or pricing models based on the net present value of estimated future cash flows. The valuation models used require market observable inputs, including contractual terms, market prices, yield curves, credit curves, and measures of volatility. We manage credit risk for our derivative positions on a counterparty-by-counterparty basis and calculate credit valuation adjustments, included in the fair value of these instruments, on the basis of our relationships at the counterparty portfolio/master netting agreement level. These credit valuation adjustments are determined by applying a credit spread for the counterparty to the total expected exposure of the derivative after considering collateral and other master netting arrangements. We have classified our interest rate swaps as Level 2.

Assets and liabilities measured at fair value on a recurring basis as of September 30, 2015, are presented below (in thousands):

The results included in the table above are only a component of the overall investment strategies of our company. The table above does not present Level 1 or Level 2 valued assets or liabilities. The changes to our company's Level 3 classified instruments were principally a result of sales of private equity investments and ARS, offset by ARS purchases during the nine months ended September 30, 2015. The changes in unrealized gains/(losses) recorded in earnings for the three and nine months ended September 30, 2015, relating to Level 3 assets still held at September 30, 2015, were immaterial.

The following table summarizes quantitative information related to the significant unobservable inputs utilized in our company's Level 3 recurring fair value measurements as of September 30, 2015.

	Valuation	Unobservable	Weighted
	technique	input	average
Investments:			
Auction rate securities:			
Equity securities	Discounted cash flow	Discount rate	2.3% - 13.5% 7.7%
		Workout period	1 - 3 years 2.5 years
Municipal securities	Discounted cash flow	Discount rate	0.3% - 8.8% 7.1%

Workout period 1 - 4 years 2.8 years

The fair value of certain Level 3 assets was determined using various methodologies, as appropriate, including net asset values (“NAVs”) of underlying investments, third-party pricing vendors and broker quotes. These inputs are evaluated for reasonableness through various procedures, including due diligence reviews of third-party pricing vendors, variance analyses, consideration of current market environment, and other analytical procedures.

The fair value for our auction rate securities was determined using an income approach based on an internally developed discounted cash flow model. The discounted cash flow model utilizes two significant unobservable inputs: discount rate and workout period. The discount rate was calculated using credit spreads of the underlying collateral or similar securities. The workout period was based on an assessment of publicly available information on efforts to re-establish functioning markets for these securities and our company’s own redemption

experience. Significant increases in any of these inputs in isolation would result in a significantly lower fair value. On an ongoing basis, management verifies the fair value by reviewing the appropriateness of the discounted cash flow model and its significant inputs.

General and limited partnership interests in investment partnerships totaled \$36.6 million and \$42.1 million at September 30, 2015 and December 31, 2014, respectively. The general and limited partnership interests in investment partnerships were primarily valued based upon NAVs received from third-party fund managers. The various partnerships are investment companies, which record their underlying investments at fair value based on fair value policies established by management of the underlying fund. Fair value policies at the underlying fund generally require the funds to utilize pricing/valuation information, including independent appraisals, from third-party sources. However, in some instances, current valuation information for illiquid securities or securities in markets that are not active may not be available from any third-party source or fund management may conclude that the valuations that are available from third-party sources are not reliable. In these instances, fund management may perform model-based analytical valuations that may be used as an input to value these investments.

Direct investments in private equity companies totaled \$18.0 million and \$21.2 million at September 30, 2015 and December 31, 2014, respectively. Direct investments in private equity companies may be valued using the market approach and were valued based on an assessment of each underlying investment, incorporating evaluation of additional significant third-party financing, changes in valuations of comparable peer companies, the business environment of the companies, market indices, assumptions relating to appropriate risk adjustments for nonperformance, and legal restrictions on disposition, among other factors. The fair value derived from the methods used are evaluated and weighted, as appropriate, considering the reasonableness of the range of values indicated. Under the market approach, fair value may be determined by reference to multiples of market-comparable companies or transactions, including earnings before interest, taxes, depreciation, and amortization (“EBITDA”) multiples. For securities utilizing the market comparable companies valuation technique, a significant increase (decrease) in the EBITDA multiple in isolation could result in a significantly higher (lower) fair value measurement.

Transfers Within the Fair Value Hierarchy

We assess our financial instruments on a quarterly basis to determine the appropriate classification within the fair value hierarchy. Transfers between fair value classifications occur when there are changes in pricing observability levels. Transfers of financial instruments among the levels are deemed to occur at the beginning of the reporting period. Transfers of financial assets from Level 1 to Level 2 during the three months ended September 30, 2015 were immaterial. There were \$5.6 million of transfers of financial assets from Level 1 to Level 2 during the nine months ended September 30, 2015, primarily related to corporate fixed income securities for which there were low volumes of recent trade activity observed. There were no transfers of financial assets out of Level 3 during the three months ended September 30, 2015. There were \$5.9 million of transfers of financial assets out of Level 3 during the nine months ended September 30, 2015, primarily related to other investments for which market trades were observed that provided transparency into the valuation of these assets.

Fair Value of Financial Instruments

The following reflects the fair value of financial instruments as of September 30, 2015 and December 31, 2014, whether or not recognized in the consolidated statements of financial condition at fair value (in thousands).

	September 30, 2015		December 31, 2014

The following, as supplemented by the discussion above, describes the valuation techniques used in estimating the fair value of our financial instruments as of September 30, 2015 and December 31, 2014.

Financial Assets

Securities Purchased Under Agreements to Resell

Securities purchased under agreements to resell are collateralized financing transactions that are recorded at their contractual amounts plus accrued interest. The carrying values at September 30, 2015 and December 31, 2014 approximate fair value due to their short-term nature.

Held-to-Maturity Securities

Securities held to maturity are recorded at amortized cost based on our company's positive intent and ability to hold these securities to maturity. Securities held to maturity include agency mortgage-backed securities, asset-backed securities, consisting of corporate obligations, collateralized debt obligation securities, and corporate fixed income securities. The estimated fair value, included in the above table, is determined using several factors; however, primary weight is given to discounted cash flow modeling techniques that incorporated an estimated discount rate based upon recent observable debt security issuances with similar characteristics.

Loans Held for Sale

Loans held for sale consist of fixed-rate and adjustable-rate residential real estate mortgage loans intended for sale. Loans held for sale are stated at lower of cost or fair value. Fair value is determined based on prevailing market prices for loans with similar characteristics or on sale contract prices.

Bank Loans

The fair values of mortgage loans and commercial loans were estimated using a discounted cash flow method, a form of the income approach. Discount rates were determined considering rates at which similar portfolios of loans would

be made under current conditions and considering liquidity spreads applicable to each loan portfolio based on the secondary market.

Financial Liabilities

Securities Sold Under Agreements to Repurchase

Securities sold under agreements to repurchase are collateralized financing transactions that are recorded at their contractual amounts plus accrued interest. The carrying values at September 30, 2015 and December 31, 2014 approximate fair value due to the short-term nature.

Bank Deposits

The fair value of interest-bearing deposits, including certificates of deposits, demand deposits, savings, and checking accounts, was calculated by discounting the future cash flows using discount rates based on the replacement cost of funding of similar structures and terms.

Borrowings

The carrying amount of borrowings approximates fair value due to the relative short-term nature of such borrowings, some of which are day-to-day. The portion of borrowings which are not “day-to-day” are primarily comprised of Stifel Bank’s borrowings from the FHLB which, by their nature, reflect terms that approximate current market rates for similar borrowings.

Senior Notes

The fair value of our senior notes is estimated based upon quoted market prices.

Debentures to Stifel Financial Capital Trusts

The fair value of our trust preferred securities is based on the discounted value of contractual cash flows. We have assumed a discount rate based on the coupon achieved in our 5.375% senior notes due 2022.

These fair value disclosures represent our best estimates based on relevant market information and information about the financial instruments. Fair value estimates are based on judgments regarding future expected losses, current economic conditions, risk characteristics of the various instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in the above methodologies and assumptions could significantly affect the estimates.

NOTE 7 – Financial Instruments Owned and Financial Instruments Sold, But Not Yet Purchased

The components of financial instruments owned and financial instruments sold, but not yet purchased, at September 30, 2015 and December 31, 2014 are as follows (in thousands):

	September 30, 2015	December 31, 2014
Financial instruments owned:		
U.S. government securities	\$ 15,750	\$ 58,992
U.S. government agency securities	124,292	101,439
Mortgage-backed securities:		

Edgar Filing: STIFEL FINANCIAL CORP - Form 10-Q

Agency	202,480	159,057
Non-agency	18,704	13,366
Corporate securities:		
Fixed income securities	251,416	245,909
Equity securities	25,641	77,548
State and municipal securities	174,693	130,544
	\$ 812,976	\$ 786,855
Financial instruments sold, but not yet purchased:		
U.S. government securities	\$ 217,648	\$ 146,592
U.S. government agency securities	—	10,029
Mortgage-backed securities:		
Agency	38,927	28,067
Non-agency	—	4,556
Corporate securities:		
Fixed income securities	234,429	293,008
Equity securities	21,089	105,013
State and municipal securities	230	—
	\$ 512,323	\$ 587,265

At September 30, 2015 and December 31, 2014, financial instruments owned in the amount of \$586.1 million and \$425.1 million, respectively, were pledged as collateral for our repurchase agreements and short-term borrowings.

Financial instruments sold, but not yet purchased, represent obligations of our company to deliver the specified security at the contracted price, thereby creating a liability to purchase the security in the market at prevailing prices in future periods. We are obligated to acquire the securities sold short at prevailing market prices in future periods, which may exceed the amount reflected in the consolidated statements of financial condition.

NOTE 8 – Available-for-Sale and Held-to-Maturity Securities

The following tables provide a summary of the amortized cost and fair values of the available-for-sale securities and held-to-maturity securities at September 30, 2015 and December 31, 2014 (in thousands):

	September 30, 2015

	\$1,177,565	\$ 38,338	\$ (3,927)	\$1,211,976

¹Unrealized gains/(losses) related to available-for-sale securities are reported in accumulated other comprehensive income.

²Held-to-maturity securities are carried in the consolidated statements of financial condition at amortized cost, and the changes in the value of these securities, other than impairment charges, are not reported on the consolidated financial statements.

For the three and nine months ended September 30, 2015 we received proceeds of \$89.0 million and \$641.6 million, respectively, from the sale of available-for-sale securities, which resulted in net realized gains of \$0.1 million and \$3.2 million, respectively.

During the three months ended September 30, 2015 and 2014, unrealized losses, net of deferred tax benefit, of \$0.6 million and \$3.9 million, respectively, were recorded in accumulated other comprehensive income in the consolidated statements of financial condition. During the nine months ended September 30, 2015 and 2014, unrealized gains, net of deferred taxes, of \$5.3 million and \$1.7 million, respectively, were recorded in accumulated other comprehensive income in the consolidated statements of financial condition.

The table below summarizes the amortized cost and fair values of debt securities by contractual maturity (in thousands). Expected maturities may differ significantly from contractual maturities, as issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

¹Due to the immaterial amount of income recognized on tax-exempt securities, yields were not calculated on a tax-equivalent basis.

At September 30, 2015 and December 31, 2014, securities and loans of \$908.2 million and \$1.2 billion, respectively, were pledged at the Federal Home Loan Bank as collateral for borrowings and letters of credit obtained to secure public deposits. At September 30, 2015, securities of \$388.5 million were pledged with the Federal Reserve discount window.

The following table shows the gross unrealized losses and fair value of the Company's investment securities with unrealized losses, aggregated by investment category and length of time the individual investment securities have been in continuous unrealized loss positions, at September 30, 2015 (in thousands):

	Less than 12		12 months or more		Total

At September 30, 2015, the amortized cost of 48 securities classified as available for sale exceeded their fair value by \$6.9 million, of which \$4.6 million related to investment securities that had been in a loss position for 12 months or longer. The total fair value of these investments at September 30, 2015, was \$387.3 million, which was 58.7% of our available-for-sale portfolio.

At September 30, 2015, the carrying value of 21 securities held to maturity exceeded their fair value by \$3.1 million, of which \$3.0 million related to securities held to maturity that have been in a loss position for 12 months or longer. As discussed in more detail below, we conduct periodic reviews of all securities with unrealized losses to assess whether the impairment is other-than-temporary.

Other-Than-Temporary Impairment

We evaluate all securities in an unrealized loss position quarterly to assess whether the impairment is other-than-temporary. Our other-than-temporary impairment (“OTTI”) assessment is a subjective process requiring the use of judgments and assumptions. There was no credit-related OTTI recognized during the three and nine months ended September 30, 2015 and 2014.

We believe the gross unrealized losses related to all other securities of \$9.9 million as of September 30, 2015, are attributable to issuer-specific credit spreads and changes in market interest rates and asset spreads. We, therefore, do not expect to incur any credit losses related to these securities. In addition, we have no intent to sell these securities with unrealized losses, and it is not more likely than not that we will be required to sell these securities prior to recovery of the amortized cost. No OTTI charge was recorded during the three and nine months ended September 30, 2015 related to these securities. Accordingly, we have concluded that the impairment on these securities is not other-than-temporary.

NOTE 9 – Bank Loans

The following table presents the balance and associated percentage of each major loan category in our bank loan portfolio at September 30, 2015 and December 31, 2014 (in thousands, except percentages):

	September 30, 2015		December 31, 2014	
	Balance	Percent	Balance	Percent

Edgar Filing: STIFEL FINANCIAL CORP - Form 10-Q

Bank loans, net	\$2,409,399	\$2,065,420
-----------------	-------------	-------------

¹Includes securities-based loans of \$ 1.0 billion and \$732.8 million at September 30, 2015 and December 31, 2014, respectively.

At September 30, 2015 and December 31, 2014, Stifel Bank had loans outstanding to its executive officers, directors, and their affiliates in the amount of \$1.9 million and \$0.6 million, respectively, and loans outstanding to other Stifel Financial Corp. executive officers, directors, and their affiliates in the amount of \$9.6 million and \$5.3 million, respectively.

At September 30, 2015 and December 31, 2014, we had mortgage loans held for sale of \$179.6 million and \$121.9 million, respectively. For the three months ended September 30, 2015 and 2014, we recognized gains of \$3.3 million and \$2.2 million, respectively, from the sale of originated loans, net of fees and costs. For the nine months ended September 30, 2015 and 2014, we recognized gains of \$9.4 million and \$5.8 million, respectively, from the sale of originated loans, net of fees and costs.

During the three months ended September 30, 2015, the Bank reclassified \$227.6 million of residential mortgages to held for sale. In September 2015, Stifel Bank sold \$184.4 million in unpaid principal balance. As these loans carried a significant portion on the unamortized loan discount at the time of sale, we recognized a \$14.7 million gain which is reflected in other income on the consolidated statements of operations. At September 30, 2015, \$33.9 million remains in held for sale.

The following table details activity in the allowance for loan losses by portfolio segment for the three and nine months ended September 30, 2015 (in thousands).

In determining the amount of our allowance, we rely on an analysis of our loan portfolio, our experience and our evaluation of general economic conditions, as well as the requirements of the written agreement and other regulatory input. If our assumptions prove to be incorrect, our current allowance may not be sufficient to cover future loan losses and we may experience significant increases to our provision.

There are two components of the allowance for loan losses: the inherent allowance component and the specific allowance component.

The inherent allowance component of the allowance for loan losses is used to estimate the probable losses inherent in the loan portfolio and includes non-homogeneous loans that have not been identified as impaired and portfolios of smaller balance homogeneous loans. The Company maintains methodologies by loan product for calculating an allowance for loan losses that estimates the inherent losses in the loan portfolio. Qualitative and environmental factors such as economic and business conditions, nature and volume of the portfolio and lending terms, and volume and severity of past due loans may also be considered in the

calculations. The allowance for loan losses is maintained at a level reasonable to ensure that it can adequately absorb the estimated probable losses inherent in the portfolio.

The specific allowance component of the allowance for loan losses is used to estimate probable losses for non-homogeneous exposures, including loans modified in a Troubled Debt Restructuring (“TDR”), which have been specifically identified for impairment analysis by the Company and determined to be impaired. At September 30, 2015, we had \$0.6 million of non-accrual loans, net of discounts, which included \$0.2 million in troubled debt restructurings, for which there was a specific allowance of \$0.2 million. At December 31, 2014, we had \$4.9 million of non-accrual loans, net of discounts, which included \$1.0 million in troubled debt restructurings, for which there was a specific allowance of \$0.3 million. The gross interest income related to impaired loans, which would have been recorded had these loans been current in accordance with their original terms, and the interest income recognized on these loans during the three and nine months ended September 30, 2015 and 2014, were insignificant to the consolidated financial statements.

The tables below present loans that were individually evaluated for impairment by portfolio segment at September 30, 2015 and December 31, 2014, included the average recorded investment balance (in thousands):

Credit quality indicators

As of September 30, 2015, bank loans were primarily extended to non-investment grade borrowers. Substantially all of these loans align with the U.S. Federal bank regulatory agencies' definition of Pass. Loans meet the definition of Pass when they are performing and/or do not demonstrate adverse characteristics that are likely to result in a credit

loss. A loan is determined to be impaired when principal or interest becomes 90 days past due or when collection becomes uncertain. At the time a loan is determined to be impaired, the accrual of interest and amortization of deferred loan origination fees is discontinued (“non-accrual status”), and any accrued and unpaid interest income is reversed.

We closely monitor economic conditions and loan performance trends to manage and evaluate our exposure to credit risk. Trends in delinquency ratios are an indicator, among other considerations, of credit risk within our loan portfolios. The level of nonperforming assets represents another indicator of the potential for future credit losses. Accordingly, key metrics we track and use in evaluating the credit quality of our loan portfolio include delinquency and nonperforming asset rates, as well as charge-off rates and our internal risk ratings of the loan portfolio. In general, we are a secured lender. At September 30, 2015 and December 31, 2014, 96.4 % and 95.8% of our loan portfolio was collateralized, respectively. Collateral is required in accordance with the normal credit evaluation process based upon the creditworthiness of the customer and the credit risk associated with the particular transaction. The Company uses the following definitions for risk ratings:

Pass. A credit exposure rated pass has a continued expectation of timely repayment, all obligations of the borrower are current, and the obligor complies with material terms and conditions of the lending agreement.

Special Mention. Extensions of credit that have potential weakness that deserve management's close attention, and if left uncorrected may, at some future date, result in the deterioration of the repayment prospects or collateral position.

Substandard. Obligor has a well-defined weakness that jeopardizes the repayment of the debt and has a high probability of payment default with the distinct possibility that the Company will sustain some loss if noted deficiencies are not corrected.

Doubtful. Inherent weakness in the exposure makes the collection or repayment in full, based on existing facts, conditions and circumstances, highly improbable, and the amount of loss is uncertain.

Doubtful loans are considered impaired. Substandard loans are regularly reviewed for impairment. When a loan is impaired the impairment is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or as a practical expedient the observable market price of the loan or the fair value of the collateral if the loan is collateral dependent.

Portfolio segments:

Commercial and industrial (C&I). C&I loans primarily include commercial and industrial lending used for general corporate purposes, working capital and liquidity, and "event-driven." "Event-driven" loans support client merger, acquisition or recapitalization activities. C&I lending is structured as revolving lines of credit, letter of credit facilities, term loans and bridge loans. Risk factors considered in determining the allowance for corporate loans include the borrower's financial strength, seniority of the loan, collateral type, leverage, volatility of collateral value, debt cushion, and covenants.

Consumer. Consumer loans primarily include securities-based lending that allows clients to borrow money against the value of qualifying securities for any suitable purpose other than purchasing, trading, or carrying securities or refinancing margin debt. The majority of consumer loans are structured as revolving lines of credit and letter of credit facilities and are primarily offered through Stifel's Pledged Asset ("SPA") program. The allowance methodology for securities-based lending considers the collateral type underlying the loan.

Real Estate. Real estate loans include commercial real estate, residential real estate non-conforming loans, residential real estate conforming loans and home equity lines of credit. The allowance methodology real estate loans considers several factors, including, but not limited to, loan-to-value ratio, FICO score, home price index, delinquency status, credit limits, and utilization rates.

Based on the most recent analysis performed, the risk category of our loan portfolio was as follows: (in thousands):

	As of September 30, 2015				
	Pass	Special Mention	Substandard	Doubtful	Total
Commercial and industrial	\$1,108,067	\$ 12,052	\$ 1,524	\$ —	\$1,121,643

NOTE 10 – Fixed Assets

The following is a summary of fixed assets as of September 30, 2015 and December 31, 2014 (in thousands):

	September 30, 2015	December 31, 2014
Furniture and equipment	\$238,315	\$194,521
Building and leasehold improvements	155,528	124,390
Property on operating leases	21,164	—
	415,007	318,911
Less accumulated depreciation and amortization	(231,987)	(194,665)
	\$183,020	\$124,246

For the three months ended September 30, 2015 and 2014, depreciation and amortization of furniture and equipment, and leasehold improvements totaled \$12.5 million and \$7.4 million, respectively. For the nine months ended September 30, 2015 and 2014, depreciation and amortization of furniture and equipment, and leasehold improvements totaled \$27.4 million and \$21.7 million, respectively.

NOTE 11 – Goodwill and Intangible Assets

Our annual goodwill impairment testing was completed as of July 31, 2015, with no impairment identified.

The carrying amount of goodwill and intangible assets attributable to each of our reporting segments is presented in the following table (in thousands):

	December 31, 2014	Net Additions	Impairment Losses	September 30, 2015
Goodwill				
Global Wealth Management	\$ 177,171	\$ 83,971	\$ —	\$ 261,142
Institutional Group	617,855	5,796	—	623,651
	\$795,026	\$ 89,767	\$ —	\$ 884,793

	December 31, 2014	Net Additions	Amortization	September 30, 2015
Intangible assets				
Global Wealth Management	\$ 23,503	\$ 9,868	\$ (3,244)	\$ 30,127
Institutional Group	31,060	—	(2,708)	28,352

\$ 54,563 \$ 9,868 \$ (5,952) \$ 58,479

The additions to goodwill and intangible assets during the nine months ended September 30, 2015, are primarily attributable to the acquisition of Sterne Agee, which closed on June 5, 2015, and Merchant Capital, which closed on December 31, 2014. The allocation of the purchase price for these acquisitions is preliminary and will be finalized upon completion of the analysis of the fair values of the net assets of the acquisitions as of the respective acquisition dates and the identified intangible assets. The final goodwill recorded on the consolidated statement of financial condition may differ from the preliminary estimate reflected herein. Goodwill for certain of our acquisitions is deductible for tax purposes.

Amortizable intangible assets consist of acquired customer relationships, trade name, investment banking backlog, and non-compete agreements that are amortized over their contractual or determined useful lives. Intangible assets subject to amortization as of September 30, 2015 and December 31, 2014 were as follows (in thousands):

	September 30, 2015		December 31, 2014	
	Gross		Gross	
	Carrying Value	Accumulated Amortization	Carrying Value	Accumulated Amortization
Customer relationships	\$71,649	\$ 33,624	\$63,661	\$ 29,636
Trade name	23,303	6,426	21,423	5,322
Investment banking backlog	7,388	7,388	7,388	7,388
Core deposits	5,447	5,237	5,447	4,657
Non-compete agreements	1,484	235	1,484	120
	\$109,271	\$ 52,910	\$99,403	\$ 47,123

Amortization expense related to intangible assets was \$1.9 million and \$1.6 million for the three months ended September 30, 2015 and 2014, respectively. Amortization expense related to intangible assets was \$6.0 million and \$9.8 million for the nine months ended September 30, 2015 and 2014, respectively.

The weighted-average remaining lives of the following intangible assets at September 30, 2015, are: customer relationships, 7.2 years; core deposits, .3 years; trade name, 11.1 years; and non-compete agreements, 2.5 years. As of September 30, 2015, we expect amortization expense in future periods to be as follows (in thousands):

Fiscal year	
Remainder of 2015	\$1,974
2016	6,639
2017	6,066
2018	5,578
2019	5,372
Thereafter	30,732
	\$56,361

NOTE 12 – Borrowings

Our short-term financing is generally obtained through short-term bank line financing on an uncommitted, secured basis, committed bank line financing on an unsecured basis, advances from the Federal Home Loan Bank, term loans, and securities lending arrangements. We borrow from various banks on a demand basis with company-owned and customer securities pledged as collateral. The value of customer-owned securities used as collateral is not reflected in the consolidated statements of financial condition.

The following table details the components of borrowings (in thousands):

	September 30, 2015	December 31, 2014
Borrowings on secured lines of credit	\$ 238,600	\$ —
Federal Home Loan Bank advances	96,000	—
Term loans	63,738	—
	\$ 398,338	\$ —

Our uncommitted secured lines of credit at September 30, 2015, totaled \$780.0 million with four banks and are dependent on having appropriate collateral, as determined by the bank agreements, to secure an advance under the line. The availability of our uncommitted lines is subject to approval by the individual banks each time an advance is requested and may be denied. Our peak daily borrowing on our uncommitted secured lines was \$465.6 million during the nine months ended September 30, 2015. There are no compensating balance requirements under these arrangements. Any borrowings on secured lines of credit are day-to-day and are generally utilized to finance certain fixed income securities. At September 30, 2015, our uncommitted secured lines of credit were collateralized by company-owned securities valued at \$624.0 million.

Our committed bank line financing at September 30, 2015, consisted of a \$100.0 million revolving credit facility. The credit facility expires in December 2017. The applicable interest rate under the revolving credit facility is calculated as a per annum rate equal to the London Interbank Offered Rate (“LIBOR”) plus 2.00%, as defined in the revolving credit facility. At September 30, 2015, we had no advances on our revolving credit facility and were in compliance with all covenants.

The Federal Home Loan advances as of September 30, 2015 are floating-rate advances. The weighted average interest rates during the three months ended September 30, 2015 on these advances is 0.28%. The advances are secured by Stifel Bank’s residential mortgage loan portfolio and investment portfolio. The interest rates reset on a daily basis. Stifel Bank has the option to prepay these advances without penalty on the interest reset date.

As of September 30, 2015, a subsidiary of the Parent was a party to two Term Loans (“Term Loans”) with Regions Bank. The Term Loans mature on June 3, 2016. The interest rate under the Amended and Restated Credit Agreement is calculated as per annum rate equal to LIBOR, as defined. During the three months ended September 30, 2015, interest rates ranged from 1.68% to 1.72%.

NOTE 13 – Senior Notes

The following table summarizes our senior notes as of September 30, 2015 and December 31, 2014 (in thousands):

	September 30,	December 31,
	2015	2014
6.70% senior notes, due 2022 ¹	\$ —	\$ 175,000
5.375% senior notes, due 2022 ²	150,000	150,000
4.250% senior notes, due 2024 ³	300,000	300,000
	\$ 450,000	\$ 625,000

¹In January 2012, we sold in a registered underwritten public offering, \$175.0 million in aggregate principal amount of 6.70% senior notes due January 2022. Interest on these senior notes is payable quarterly in arrears. On January 15, 2015, we redeemed 100% of our company’s outstanding 6.70% senior notes.

²In December 2012, we sold in a registered underwritten public offering, \$150.0 million in aggregate principal amount of 5.375% senior notes due December 2022. Interest on these senior notes is payable quarterly in arrears. On or after December 31, 2015, we may redeem some or all of the senior notes at any time at a redemption price equal to 100% of the principal amount of the notes being redeemed plus accrued interest thereon to the redemption date.

³In July 2014, we sold in a registered underwritten public offering, \$300.0 million in aggregate principal amount of 4.250% senior notes due July 2024. Interest on these senior notes is payable semi-annually in arrears. We may redeem the notes in whole or in part, at our option, at a redemption price equal to 100% of their principal amount, plus a “make-whole” premium and accrued and unpaid interest, if any, to the date of redemption.

Our senior notes mature as follows, based upon contractual terms:

2015	\$—
2016	—
2017	—
2018	—
2019	—
Thereafter	450,000
	\$450,000

NOTE 14 – Bank Deposits

Deposits consist of money market and savings accounts, certificates of deposit, and demand deposits. Deposits at September 30, 2015 and December 31, 2014 were as follows (in thousands):

	September 30, 2015	December 31, 2014
Money market and savings accounts	\$4,021,029	\$4,600,757
Demand deposits (interest-bearing)	58,399	101,652
Certificates of deposit	24,198	77,197
Demand deposits (non-interest-bearing)	13,185	10,475
	\$4,116,811	\$4,790,081

The weighted-average interest rate on deposits was 0.17% and 0.19% at September 30, 2015 and December 31, 2014, respectively.

Scheduled maturities of certificates of deposit at September 30, 2015 and December 31, 2014 were as follows (in thousands):

	September 30, 2015	December 31, 2014
Certificates of deposit, less than \$100:		
Within one year	\$ 7,597	\$ 26,769
One to three years	2,614	6,874
Three to five years	332	1,268
Over five years	—	—
	\$ 10,543	\$ 34,911
Certificates of deposit, \$100 and greater:		
Within one year	\$ 11,139	\$ 33,784
One to three years	1,733	7,520
Three to five years	783	723
Over five years	—	259
	13,655	42,286
	\$ 24,198	\$ 77,197

At September 30, 2015 and December 31, 2014, the amount of deposits includes related party deposits, primarily brokerage customers' deposits from Stifel of \$4.1 billion and \$4.7 billion, respectively, and interest-bearing and time deposits of executive officers, directors, and their affiliates of \$0.2 million and \$0.3 million, respectively.

NOTE 15 – Derivative Instruments and Hedging Activities

We use interest rate swaps as part of our interest rate risk management strategy. Interest rate swaps generally involve the exchange of fixed and variable rate interest payments between two parties, based on a common notional principal amount and maturity date with no exchange of underlying principal amounts. Interest rate swaps designated as cash flow hedges involve the receipt of variable amounts from a counterparty in exchange for our company making fixed payments. Our policy is not to offset fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral arising from derivative instruments recognized at fair value executed with the same counterparty under master netting arrangements.

36

The following table provides the notional values and fair values of our derivative instruments as of September 30, 2015 and December 31, 2014 (in thousands):

	September 30, 2015			
	Asset Derivatives		Liability Derivatives	
	Balance Sheet	Positive	Balance Sheet	Negative
	Notional Value	Fair Value	Location	Fair Value
Derivatives designated as hedging instruments under Topic 815:				
Cash flow interest rate contracts			Accounts payable and accrued expenses	
	\$186,835	Other assets \$ —		accrued expenses \$ (4,652)
	December 31, 2014			
	Asset Derivatives		Liability Derivatives	
	Balance Sheet	Positive	Balance Sheet	Negative
	Notional Value	Fair Value	Location	Fair Value
Derivatives designated as hedging instruments under Topic 815:				
Cash flow interest rate contracts			Accounts payable and accrued expenses	
	\$272,967	Other assets \$ —		accrued expenses \$ (5,641)

Cash Flow Hedges

We have entered into interest rate swap agreements that effectively modify our exposure to interest rate risk by converting floating rate debt to a fixed rate debt over the next ten years.

Any unrealized gains or losses related to cash flow hedging instruments are reclassified from accumulated other comprehensive loss into earnings in the same period the hedged forecasted transaction affects earnings and are recorded in interest expense on the accompanying consolidated statements of operations. The ineffective portion of the cash flow hedging instruments is recorded in other income or other operating expense. The loss recognized during the three and nine months ended September 30, 2015, related to ineffectiveness was insignificant.

Amounts reported in accumulated other comprehensive loss related to derivatives will be reclassified to interest expense as interest payments are made on our variable rate deposits. During the next twelve months, we estimate that \$2.4 million will be reclassified as an increase to interest expense.

Edgar Filing: STIFEL FINANCIAL CORP - Form 10-Q

The following table shows the effect of our company's derivative instruments in the consolidated statements of operations for the three and nine months ended September 30, 2015 and 2014 (in thousands):

		Three Months Ended September 30, 2015

We maintain a risk management strategy that incorporates the use of derivative instruments to minimize significant unplanned fluctuations in earnings caused by interest rate volatility. Our goal is to manage sensitivity to changes in rates by hedging the maturity characteristics of variable rate affiliated deposits, thereby limiting the impact on earnings. By using derivative instruments, we are exposed to credit and market risk on those derivative positions. We manage the market risk associated with interest rate contracts by establishing and monitoring limits as to the types and degree of risk that may be undertaken. Credit risk is equal to the extent of the fair value gain in a derivative if the counterparty fails to perform. When the fair value of a derivative contract is positive, this generally indicates that the counterparty owes our company and, therefore, creates a repayment risk for our company. When the fair value of a derivative contract is negative, we owe the counterparty and, therefore, have no repayment risk. See Note 5 in the notes to our consolidated financial statements for further discussion on how we determine the fair value of our financial instruments. We minimize the credit (or repayment) risk in derivative instruments by entering into transactions with high-quality counterparties that are reviewed periodically by senior management.

Credit Risk-Related Contingency Features

We have agreements with our derivative counterparties containing provisions where if we default on any of our indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then we could also be declared in default on our derivative obligations.

We have agreements with certain of our derivative counterparties that contain provisions where if our shareholders' equity declines below a specified threshold or if we fail to maintain a specified minimum shareholders' equity, then we

could be declared in default on our derivative obligations.

Certain of our agreements with our derivative counterparties contain provisions where if a specified event or condition occurs that materially changes our creditworthiness in an adverse manner, we may be required to fully collateralize our obligations under the derivative instrument.

Regulatory Capital-Related Contingency Features

Certain of our derivative instruments contain provisions that require us to maintain our capital adequacy requirements. If we were to lose our status as “adequately capitalized,” we would be in violation of those provisions, and the counterparties of the derivative instruments could request immediate payment or demand immediate and ongoing full overnight collateralization on derivative instruments in net liability positions.

As of September 30, 2015, the fair value of derivatives in a net liability position, which includes accrued interest but excludes any adjustment for nonperformance risk, related to these agreements was \$4.7 million (termination value). We have minimum collateral posting thresholds with certain of our derivative counterparties and have posted cash collateral of \$12.7 million against our obligations under these agreements. If we had breached any of these provisions at September 30, 2015, we would have been required to settle our obligations under the agreements at the termination value.

Counterparty Risk

In the event of counterparty default, our economic loss may be higher than the uncollateralized exposure of our derivatives if we were not able to replace the defaulted derivatives in a timely fashion. We monitor the risk that our uncollateralized exposure to each of our

counterparties for interest rate swaps will increase under certain adverse market conditions by performing periodic market stress tests. These tests evaluate the potential additional uncollateralized exposure we would have to each of these derivative counterparties assuming changes in the level of market rates over a brief time period.

NOTE 16 – Debentures to Stifel Financial Capital Trusts

The following table summarizes our debentures to Stifel Financial Capital Trusts as of September 30, 2015 and December 31, 2014 (in thousands):

	September 30,	December 31,
	2015	2014
Debenture to Stifel Financial Capital Trust II ¹	\$ 35,000	\$ 35,000
Debenture to Stifel Financial Capital Trust III ²	35,000	35,000
Debenture to Stifel Financial Capital Trust IV ³	12,500	12,500
	\$ 82,500	\$ 82,500

¹ On August 12, 2005, we completed a private placement of \$35.0 million of 6.38% Cumulative Trust Preferred Securities. The trust preferred securities were offered by Stifel Financial Capital Trust II (the "Trust II"), a non-consolidated wholly owned subsidiary of our company. The trust preferred securities mature on September 30, 2035, but may be redeemed by our company, and in turn, the Trust II would call the debenture beginning September 30, 2010. The Trust II requires quarterly distributions of interest to the holders of the trust preferred securities. Distributions will be payable at a floating interest rate equal to three-month LIBOR plus 1.70% per annum.

² On March 30, 2007, we completed a private placement of \$35.0 million of 6.79% Cumulative Trust Preferred Securities. The trust preferred securities were offered by Stifel Financial Capital Trust III (the "Trust III"), a non-consolidated wholly owned subsidiary of our company. The trust preferred securities mature on June 6, 2037, but may be redeemed by our company, and in turn, Trust III would call the debenture beginning June 6, 2012. Trust III requires quarterly distributions of interest to the holders of the trust preferred securities. Distributions will be payable at a floating interest rate equal to three-month LIBOR plus 1.85% per annum.

³ On June 28, 2007, we completed a private placement of \$35.0 million of 6.78% Cumulative Trust Preferred Securities. The trust preferred securities were offered by Stifel Financial Capital Trust IV (the "Trust IV"), a non-consolidated wholly owned subsidiary of our company. The trust preferred securities mature on September 6, 2037, but may be redeemed by our company, and in turn, Trust IV would call the debenture beginning September 6, 2012. Trust IV requires quarterly distributions of interest to the holders of the trust preferred securities. Distributions will be payable at a floating interest rate equal to three-month LIBOR plus 1.85% per annum.

NOTE 17 – Disclosures About Offsetting Assets and Liabilities

The following table provides information about financial assets and derivative assets that are subject to offset as of September 30, 2015 and December 31, 2014 (in thousands):

	Gross Amounts Recognized Assets	Offset in the Statement of Financial Condition	Net Amounts Presented in the Statement of Financial Condition	Collateral Received Instruments	Net Amount
As of September 30, 2015:					
Securities borrowing ¹	\$ 333,348	\$ —	\$ 333,348	\$—\$(323,125)	\$10,223
Reverse repurchase agreements ²	88,467	—	88,467	— (88,467)	—
	\$ 421,815	\$ —	\$ 421,815	\$—\$(411,592)	\$10,223
As of December 31, 2014:					
Securities borrowing ¹	\$ 445,542	\$ —	\$ 445,542	\$—\$(431,301)	\$14,241
Reverse repurchase agreements ²	55,078	—	55,078	— (54,955)	123
	\$ 500,620	\$ —	\$ 500,620	\$—\$(486,256)	\$14,364

¹ Securities borrowing transactions are included in receivables from brokers, dealers, and clearing organizations on the consolidated statements of financial condition. See Note 3 in the notes to consolidated financial statements for additional information on receivables from brokers, dealers, and clearing organizations.

² Collateral received includes securities received by our company from the counterparty. These securities are not included on the consolidated statements of financial condition unless there is an event of default.

The following table provides information about financial liabilities and derivative liabilities that are subject to offset as of September 30, 2015 and December 31, 2014 (in thousands):

	\$ (49,036)	\$ —	\$ (49,036)	\$—	\$48,622	\$(414)

³Securities lending transactions are included in payables to brokers, dealers, and clearing organizations on the consolidated statements of financial condition. See Note 3 in the notes to consolidated financial statements for additional information on payables to brokers, dealers, and clearing organizations.

⁴Collateral pledged includes the fair value of securities pledged by our company to the counter party. These securities are included on the consolidated statements of financial condition unless we default.

NOTE 18 – Commitments, Guarantees, and Contingencies

Broker-Dealer Commitments and Guarantees

In the normal course of business, we enter into underwriting commitments. Settlement of transactions relating to such underwriting commitments, which were open at September 30, 2015, had no material effect on the consolidated financial statements.

In connection with margin deposit requirements of The Options Clearing Corporation, we pledged customer-owned securities valued at \$57.1 million to satisfy the minimum margin deposit requirement at September 30, 2015.

In connection with margin deposit requirements of the National Securities Clearing Corporation, we deposited \$57.0 million in cash to satisfy the minimum margin deposit requirement at September 30, 2015.

We also provide guarantees to securities clearinghouses and exchanges under their standard membership agreement, which requires members to guarantee the performance of other members. Under the agreement, if another member becomes unable to satisfy its obligations to the clearinghouse, other members would be required to meet shortfalls. Our liability under these agreements is not quantifiable and may exceed the cash and securities we have posted as collateral. However, the potential requirement for us to make payments under these arrangements is considered remote. Accordingly, no liability has been recognized for these arrangements.

Other Commitments

In the ordinary course of business, Stifel Bank has commitments to extend credit in the form of commitments to originate loans, standby letters of credit, and lines of credit. See Note 23 in the notes to consolidated financial statements for further details.

We have committed capital to certain entities, and these commitments generally have no specified call dates. We had \$26.7 million of commitments outstanding at September 30, 2015, of which \$15.3 million relate to commitments to certain strategic relationships with Business Development Corporations.

Concentration of Credit Risk

We provide investment, capital-raising, and related services to a diverse group of domestic customers, including governments, corporations, and institutional and individual investors. Our exposure to credit risk associated with the non-performance of customers in fulfilling their contractual obligations pursuant to securities transactions can be directly impacted by volatile securities markets, credit markets, and regulatory changes. This exposure is measured on an individual customer basis and on a group basis for customers that share similar attributes. To reduce the potential for risk concentrations, counterparty credit limits have been implemented for certain products and are continually monitored in light of changing customer and market conditions. As of September 30, 2015 and December 31, 2014, we did not have significant concentrations of credit risk with any one customer or counterparty, or any group of customers or counterparties.

NOTE 19 – Legal Proceedings

Our company and its subsidiaries are named in and subject to various proceedings and claims arising primarily from our securities business activities, including lawsuits, arbitration claims, class actions, and regulatory matters. Some of these claims seek substantial compensatory, punitive, or indeterminate damages. Our company and its subsidiaries are also involved in other reviews, investigations, and proceedings by governmental and self-regulatory organizations regarding our business, which may result in adverse judgments, settlements, fines, penalties, injunctions, and other relief. We are contesting the allegations in these claims, and we believe that there are meritorious defenses in each of these lawsuits, arbitrations, and regulatory investigations. In view of the number and diversity of claims against our company, the number of jurisdictions in which litigation is pending, and the inherent difficulty of predicting the outcome of litigation and other claims, we cannot state with certainty what the eventual outcome of pending litigation or other claims will be.

We have established reserves for potential losses that are probable and reasonably estimable that may result from pending and potential legal actions, investigations, and regulatory proceedings. In many cases, however, it is inherently difficult to determine whether any loss is probable or even possible or to estimate the amount or range of any potential loss, particularly where proceedings may be in relatively early stages or where plaintiffs are seeking substantial or indeterminate damages. Matters frequently need to be more developed before a loss or range of loss can reasonably be estimated.

In our opinion, based on currently available information, review with outside legal counsel, and consideration of amounts provided for in our consolidated financial statements with respect to these matters, including the matters described below, the ultimate resolution of

these matters will not have a material adverse impact on our financial position and results of operations. However, resolution of one or more of these matters may have a material effect on the results of operations in any future period, depending upon the ultimate resolution of those matters and depending upon the level of income for such period. For matters where a reserve has not been established and for which we believe a loss is reasonably possible, as well as for matters where a reserve has been recorded but for which an exposure to loss in excess of the amount accrued is reasonably possible, based on currently available information, we believe that such losses will not have a material effect on our consolidated financial statements.

SEC/Wisconsin Lawsuit

We have previously disclosed the civil lawsuit filed against our company in U.S. District Court for the Eastern District of Wisconsin on August 10, 2011. The action has been set for trial commencing on April 11, 2016 and we believe, based upon currently available information and review with outside counsel, that we have meritorious defenses to the SEC's lawsuit and intend to vigorously defend the SEC's claims.

EDC Bond Issuance Matter

We have previously disclosed the various claims asserted by LDF Acquisition LLC, a special purpose vehicle created by Saybrook Tax Exempt Investors LLC (collectively "Saybrook") and by the Lac Du Flambeau Band of Lake Superior Chippewa Indians and its Lake of the Torches Economic Development Corporation (the "Tribe") in which, among other things, Saybrook seeks repayment from the Tribe for the proceeds from a 2008 bond offering and in which the Tribe seeks to avoid repayment. The claims are not yet set for trial. While there can be no assurance that we will be successful, based upon currently available information and review with outside counsel, we believe that we have meritorious legal and factual defenses to the matter, and we intend to vigorously defend the claims.

NOTE 20 – Regulatory Capital Requirements

We operate in a highly regulated environment and are subject to capital requirements, which may limit distributions to our company from its subsidiaries. Distributions from our broker-dealer subsidiaries are subject to net capital rules. A broker-dealer that fails to comply with the SEC's Uniform Net Capital Rule (Rule 15c3-1) may be subject to disciplinary actions by the SEC and self-regulatory organizations, such as FINRA, including censures, fines, suspension, or expulsion. Stifel has chosen to calculate its net capital under the alternative method, which prescribes that their net capital shall not be less than the greater of \$1.0 million or two percent of aggregate debit balances (primarily receivables from customers) computed in accordance with the SEC's Customer Protection Rule (Rule 15c3-3). Our other broker-dealer subsidiaries calculate their net capital under the aggregate indebtedness method, whereby their aggregate indebtedness may not be greater than fifteen times their net capital (as defined).

At September 30, 2015, Stifel had net capital of \$333.4 million, which was 50.6% of aggregate debit items and \$320.2 million in excess of its minimum required net capital. At September 30, 2015, all of our other broker-dealer subsidiaries' net capital exceeded the minimum net capital required under the SEC rule.

Our international subsidiaries are subject to the regulatory supervision and requirements of the Financial Conduct Authority ("FCA") in the United Kingdom. At September 30, 2015, our international subsidiaries' capital and reserves were in excess of the financial resources requirement under the rules of the FCA.

Our company, as a bank holding company, and Stifel Bank are subject to various regulatory capital requirements administered by the Federal and state banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on our company's and Stifel Bank's financial results. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, our company and Stifel Bank must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Our company's and Stifel Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Effective January 1, 2015, our company and Stifel Bank became subject to Basel III. Under the Basel III rules, the quantity and quality of regulatory capital increases, a capital conservation buffer was established, selected changes were made to the calculation of risk-weighted assets, and a new ratio, common equity Tier 1 was introduced, all of which are applicable to both our company and Stifel Bank. Various aspects of Basel III will be subject to multi-year transition periods through December 31, 2018.

Our company and Stifel Bank are required to maintain minimum amounts and ratios of Total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined), Tier 1 capital to average assets (as defined), and under rules defined in Basel III, Common equity Tier 1 capital to risk-weighted assets. Our company and Stifel Bank each calculate these ratios in order to assess

compliance with both regulatory requirements and their internal capital policies. At current capital levels, our company and Stifel Bank are each categorized as “well capitalized” under the regulatory framework for prompt corrective action.

To be categorized as “well capitalized,” our company and Stifel Bank must maintain total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the tables below (in thousands, except ratios).

Stifel Financial Corp. – Federal Reserve Capital Amounts
September 30, 2015

	Actual		Adequacy Purposes		Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Common equity tier 1 capital	\$1,431,187	29.4 %	\$219,095	4.5 %	\$316,471	6.5 %

Other	5,847	6,772	15,162	19,776
	\$ 43,376	\$ 52,096	\$ 129,964	\$ 141,035
Interest expense:				
Senior notes	\$ 5,408	\$ 7,831	\$ 19,364	\$ 18,158
Bank deposits	1,783	1,743	5,945	5,438
Other	2,605	1,654	7,605	5,105
	\$ 9,796	\$ 11,228	\$ 32,914	\$ 28,701

NOTE 22 – Employee Incentive, Deferred Compensation, and Retirement Plans

We maintain several incentive stock award plans that provide for the granting of stock options, stock appreciation rights, restricted stock, performance award, stock units and debentures to our employees. We are permitted to issue new shares under all stock award plans approved by shareholders or to reissue our treasury shares. Awards under our company's incentive stock award plans are granted at market value at the date of grant. The awards generally vest ratably over a three- to eight-year vesting period.

All stock-based compensation plans are administered by the Compensation Committee of the Board of Directors ("Compensation Committee"), which has the authority to interpret the plans, determine to whom awards may be granted under the plans, and determine the terms of each award. According to these plans, we are authorized to grant an additional 2.1 million shares at September 30, 2015.

Stock-based compensation expense included in compensation and benefits expense in the consolidated statements of operations for our company's incentive stock award plans was \$29.6 million and \$30.7 million for the three months ended September 30, 2015 and 2014, respectively. The tax benefit related to stock-based compensation recognized in shareholders' equity was \$3.8 million and \$1.0 million for the three months ended September 30, 2015 and 2014, respectively.

Stock-based compensation expense included in compensation and benefits expense in the consolidated statements of operations for our company's incentive stock award plans was \$107.6 million and \$79.2 million for the nine months ended September 30, 2015 and 2014, respectively. The tax benefit related to stock-based compensation recognized in shareholders' equity was \$17.0 million and \$18.2 million for the nine months ended September 30, 2015 and 2014, respectively.

On June 5, 2015, certain employees were granted restricted stock units of our company as retention. The fair value of the awards issued as retention was \$23.8 million. The fair value of the awards is based upon the closing price of our company's common stock on the date of grant. There are no continuing service requirements associated with these restricted stock units, and accordingly were expensed at date of grant. This charge is included in compensation and benefits in the consolidated statement of operations for the three and nine months ended September 30, 2015.

Stock Options

We have substantially eliminated the use of stock options as a form of compensation. During the three and nine months ended September 30, 2015, no options were granted.

At September 30, 2015, all outstanding options were exercisable. Cash proceeds from the exercise of stock options, including the tax benefits realized from the exercise of stock options, were immaterial for the three and nine months ended September 30, 2015 and 2014.

Stock Units

A stock unit represents the right to receive a share of common stock from our company at a designated time in the future without cash payment by the employee and is issued in lieu of cash incentive, principally for deferred compensation and employee retention plans. The restricted stock units vest on an annual basis over the next one to eight years and are distributable, if vested, at future specified dates. At September 30, 2015, the total number of stock units outstanding was 18.3 million, of which 13.2 million were unvested.

At September 30, 2015, there was unrecognized compensation cost for stock units of \$315.5 million, which is expected to be recognized over a weighted-average period of 2.7 years.

Deferred Compensation Plans

The Wealth Accumulation Plan (the "Plan") is provided to certain revenue producers, officers, and key administrative employees, whereby a certain percentage of their incentive compensation is deferred as defined by the Plan into company stock units and debentures. Participants may elect to defer a portion of their incentive compensation. Deferred awards generally vest over a three- to seven-year period and are distributable upon vesting or at future specified dates. Deferred compensation costs are amortized on a straight-line basis over the vesting period. Elective deferrals are 100% vested.

Additionally, the Plan allows Stifel Nicolaus' financial advisors who achieve certain levels of production, the option to defer a certain percentage of their gross commissions. As stipulated by the Plan, the financial advisors will defer 4%

of their gross commissions. They have the option to: 1) defer 4% of their gross commissions into company stock units with a 25% matching contribution and may elect to defer an additional 1% of gross commissions into company stock units with a 25% matching contribution, or 2) defer up to 2% in mutual funds, which earn a return based on the performance of index mutual funds as designated by our company or a fixed income option. The mutual fund deferral option does not include a company match. Financial advisors have no ownership in the mutual funds. Included in the investments in the consolidated statements of financial condition are investments in mutual funds of \$14.8 million and \$18.1 million at September 30, 2015 and December 31, 2014, respectively, that were purchased by our company to economically hedge, on an after-tax basis, its liability to the financial advisors who choose to base the performance of their return on the index mutual fund option. At September 30, 2015 and December 31, 2014, the deferred compensation liability related to the mutual fund option of \$11.9 million and \$15.7 million, respectively, is included in accrued compensation in the consolidated statements of financial condition.

In addition, certain financial advisors, upon joining our company, may receive company stock units in lieu of transition cash payments. Deferred compensation related to these awards generally vests over a five- to eight-year period. Deferred compensation costs are amortized on a straight-line basis over the deferral period.

NOTE 23 – Off-Balance Sheet Credit Risk

In the normal course of business, we execute, settle, and finance customer and proprietary securities transactions. These activities expose our company to off-balance sheet risk in the event that customers or other parties fail to satisfy their obligations.

In accordance with industry practice, securities transactions generally settle within three business days after trade date. Should a customer or broker fail to deliver cash or securities as agreed, we may be required to purchase or sell securities at unfavorable market prices.

We borrow and lend securities to facilitate the settlement process and finance transactions, utilizing customer margin securities held as collateral. We monitor the adequacy of collateral levels on a daily basis. We periodically borrow from banks on a collateralized basis, utilizing firm and customer margin securities in compliance with SEC rules. Should the counterparty fail to return customer securities pledged, we are subject to the risk of acquiring the securities at prevailing market prices in order to satisfy our customer obligations. We control our exposure to credit risk by continually monitoring our counterparties' positions, and where deemed necessary, we may require a deposit of additional collateral and/or a reduction or diversification of positions. Our company sells securities it does not currently own (short sales) and is obligated to subsequently purchase such securities at prevailing market prices. We are exposed to risk of loss if securities prices increase prior to closing the transactions. We control our exposure to price risk from short sales through daily review and setting position and trading limits.

We manage our risks associated with the aforementioned transactions through position and credit limits and the continuous monitoring of collateral. Additional collateral is required from customers and other counterparties when appropriate.

We have accepted collateral in connection with resale agreements, securities borrowed transactions, and customer margin loans. Under many agreements, we are permitted to sell or repledge these securities held as collateral and use these securities to enter into securities lending arrangements or to deliver to counterparties to cover short positions. At September 30, 2015 and December 31, 2014, the fair value of securities accepted as collateral where we are permitted to sell or repledge the securities was \$1.1 billion and \$1.2 billion, respectively, and the fair value of the collateral that had been sold or repledged was \$106.9 million and \$39.2 million, respectively.

We enter into interest rate derivative contracts to manage exposures that arise from business activities that result in the receipt or payment of future known and uncertain cash amounts, the value of which are determined by interest rates. Our derivative financial instruments are principally used to manage differences in the amount, timing, and duration of our known or expected cash payments related to certain variable-rate affiliated deposits. Interest rate swaps designated as cash flow hedges involve the receipt of variable-rate amounts from a counterparty in exchange for us making fixed-rate payments. Our interest rate hedging strategies may not work in all market environments and, as a result, may not be effective in mitigating interest rate risk.

Derivatives' notional contract amounts are not reflected as assets or liabilities in the consolidated statements of financial condition. Rather, the market or fair value of the derivative transactions are reported in the consolidated statements of financial condition as other assets or accounts payable and accrued expenses, as applicable.

For a complete discussion of our activities related to derivative instruments, see Note 15 in the notes to consolidated financial statements.

In the ordinary course of business, Stifel Bank has commitments to originate loans, standby letters of credit, and lines of credit. Commitments to originate loans are agreements to lend to a customer as long as there is no violation of any condition established by the contract. These commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since a portion of the commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash commitments. Each customer's creditworthiness is evaluated on a case-by-case basis. The amount of collateral obtained, if necessary, is based on the credit evaluation of the counterparty. Collateral held varies, but may include accounts receivable, inventory, property, plant and equipment, commercial real estate, and residential real estate.

At September 30, 2015 and December 31, 2014, Stifel Bank had outstanding commitments to originate loans aggregating \$178.0 million and \$122.8 million, respectively. The commitments extended over varying periods of time, with all commitments at September 30, 2015, scheduled to be disbursed in the following three months.

Through Stifel Bank, in the normal course of business, we originate residential mortgage loans and sell them to investors. We may be required to repurchase mortgage loans that have been sold to investors in the event there are breaches of certain representations and

warranties contained within the sales agreements. We may be required to repurchase mortgage loans that were sold to investors in the event that there was inadequate underwriting or fraud, or in the event that the loans become delinquent shortly after they are originated. We also may be required to indemnify certain purchasers and others against losses they incur in the event of breaches of representations and warranties and in various other circumstances, and the amount of such losses could exceed the repurchase amount of the related loans. Consequently, we may be exposed to credit risk associated with sold loans.

Standby letters of credit are irrevocable conditional commitments issued by Stifel Bank to guarantee the performance of a customer to a third party. Financial standby letters of credit are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing, and similar transactions. Performance standby letters of credit are issued to guarantee performance of certain customers under non-financial contractual obligations. The credit risk involved in issuing standby letters of credit is essentially the same as that involved in extending loans to customers. Should Stifel Bank be obligated to perform under the standby letters of credit, it may seek recourse from the customer for reimbursement of amounts paid. At September 30, 2015 and December 31, 2014, Stifel Bank had outstanding letters of credit totaling \$10.2 million and \$10.4 million, respectively. A majority of the standby letters of credit commitments at September 30, 2015, have expiration terms that are less than one year.

Lines of credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Lines of credit generally have fixed expiration dates. Stifel Bank uses the same credit policies in granting lines of credit as it does for on-balance sheet instruments. At September 30, 2015 and December 31, 2014, Stifel Bank had granted unused lines of credit to commercial and consumer borrowers aggregating \$476.0 million and \$368.7 million, respectively.

NOTE 24 – Segment Reporting

We currently operate through the following three business segments: Global Wealth Management, Institutional Group, and various corporate activities combined in the Other segment.

Our Global Wealth Management segment consists of two businesses, the Private Client Group and Stifel Bank. The Private Client Group includes branch offices and independent contractor offices of our broker-dealer subsidiaries located throughout the United States. These branches provide securities brokerage services, including the sale of equities, mutual funds, fixed income products, and insurance, as well as offering banking products to their clients through Stifel Bank. Stifel Bank segment provides residential, consumer, and commercial lending, as well as FDIC-insured deposit accounts to customers of our broker-dealer subsidiaries and to the general public.

The Institutional Group segment includes institutional sales and trading. It provides securities brokerage, trading, and research services to institutions, with an emphasis on the sale of equity and fixed income products. This segment also includes the management of and participation in underwritings for both corporate and public finance (exclusive of sales credits generated through the private client group, which are included in the Global Wealth Management segment), merger and acquisition, and financial advisory services.

The Other segment includes interest income from stock borrow activities, unallocated interest expense, interest income and gains and losses from investments held, compensation expense associated with the expensing of restricted stock awards with no continuing service requirements in conjunction with recent acquisitions, and all unallocated overhead cost associated with the execution of orders; processing of securities transactions; custody of client

securities; receipt, identification, and delivery of funds and securities; compliance with regulatory and legal requirements; internal financial accounting and controls; and general administration and acquisition charges.

¹No individual client accounted for more than 10 percent of total net revenues for the three and nine months ended September 30, 2015 or 2014.

The following table presents our company's total assets on a segment basis at September 30, 2015 and December 31, 2014 (in thousands):

	September 30, December 31,	
	2015	2014
Global Wealth Management	\$ 5,719,140	\$ 5,816,284
Institutional Group	3,418,526	3,476,592
Other	221,513	225,275
	\$ 9,359,179	\$ 9,518,151

We have operations in the United States, United Kingdom, and Europe. The Company's foreign operations are conducted through its wholly owned subsidiary, SNEL. Substantially all long-lived assets are located in the United States.

Revenues, classified by the major geographic areas in which they are earned for the three and nine months ended September 30, 2015 and 2014, were as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
United States	\$ 567,153	\$ 491,860	\$ 1,654,500	\$ 1,532,196
United Kingdom	22,174	29,073	88,022	89,665
Other European	2,248	2,522	7,786	8,487

\$ 591,575 \$ 523,455 \$ 1,750,308 \$ 1,630,348

NOTE 25 – Earnings Per Share (“EPS”)

Basic EPS is computed by dividing earnings available to common shareholders by the weighted-average number of common shares outstanding. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the entity. Diluted earnings per share include dilutive stock options and stock units under the treasury stock method.

The following table sets forth the computation of basic and diluted earnings per share for the three and nine months ended September 30, 2015 and 2014 (in thousands, except per share data):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Income from continuing operations	\$ 17,179	\$ 40,093	\$ 81,164	\$ 133,643
Loss from discontinued operations, net of tax	—	(190)	—	(2,757)
Net income	\$ 17,179	\$ 39,903	\$ 81,164	\$ 130,886
Shares for basic and diluted calculation:				
Average shares used in basic computation	69,633	66,691	68,675	66,344
Dilutive effect of stock options and units ⁽¹⁾	10,126	9,990	9,651	9,667
Average shares used in diluted computation	79,759	76,681	78,326	76,011
Earnings per basic common share:				
Income from continuing operations	\$ 0.25	\$ 0.60	\$ 1.18	\$ 2.01
Loss from discontinued operations	—	—	—	(0.04)
Earnings per basic common share	\$ 0.25	\$ 0.60	\$ 1.18	\$ 1.97
Earnings per diluted common share:				
Income from continuing operations	\$ 0.22	\$ 0.52	\$ 1.04	\$ 1.76
Loss from discontinued operations	—	—	—	(0.04)
Earnings per diluted common share	\$ 0.22	\$ 0.52	\$ 1.04	\$ 1.72

¹Diluted earnings per share is computed on the basis of the weighted-average number of shares of common stock plus the effect of dilutive potential common shares outstanding during the period using the treasury stock method. Diluted earnings per share include stock options and units.

For the three and nine months ended September 30, 2015 and 2014, the anti-dilutive effect from restricted stock units was immaterial.

NOTE 26 – Shareholders' Equity

Share Repurchase Program

We have an ongoing authorization from the Board of Directors to repurchase our common stock in the open market or in negotiated transactions. At September 30, 2015, the maximum number of shares that may yet be purchased under this plan was 2.1 million. The repurchase program has no expiration date. These purchases may be made on the open market or in privately negotiated transactions, depending upon market conditions and other factors. Repurchased shares may be used to meet obligations under our employee benefit plans and for general corporate purposes. During the three and nine months ended September 30, 2015, we repurchased \$65.9 million, or 1.5 million shares, using existing Board authorizations at an average price of \$45.17 per share to meet obligations under our company's employee benefit plans and for general corporate purposes.

Issuance of Common Stock

On June 5, 2015, we issued 1.4 million shares related to the purchase of Sterne Agee Group, Inc. See Note 3 in the notes to consolidated financial statements for additional information regarding the acquisition.

NOTE 27 – Variable Interest Entities

Our company's involvement with VIEs is limited to entities used as investment vehicles and private equity funds, the establishment of Stifel Financial Capital Trusts, and our issuance of a convertible promissory note.

We have formed several non-consolidated investment funds with third-party investors that are typically organized as limited liability companies ("LLCs") or limited partnerships. These partnerships and LLCs have assets of \$278.5 million at September 30, 2015. For those funds where we act as the general partner, our company's economic interest is generally limited to management fee arrangements as stipulated by the fund operating agreements. We have generally provided the third-party investors with rights to terminate the funds or to remove us as the general partner. Management fee revenue earned by our company was insignificant during the three and nine months ended September 30, 2015 and 2014. In addition, our direct investment interest in these entities is insignificant at September 30, 2015 and December 31, 2014.

Thomas Weisel Capital Management LLC, a subsidiary of our company, acts as the general partner of a series of investment funds in venture capital and fund of funds and manages investment funds that are active buyers of secondary interests in private equity funds, as well as portfolios of direct interests in venture-backed companies. These partnerships have combined assets of \$271.5 million at September 30, 2015. We hold variable interests in these funds as a result of our company's rights to receive management fees. Our company's investment in and additional capital commitments to the private equity funds are also considered variable interests. The additional capital commitments are subject to call at a later date and are limited in amount. Our exposure to loss is limited to our investments in, advances and commitments to, and receivables due from these funds, and that exposure is insignificant at September 30, 2015. Management fee revenue earned by our company was insignificant during the three and nine months ended September 30, 2015 and 2014.

For the entities noted above that were determined to be VIEs, we have concluded that we are not the primary beneficiary, and therefore, we are not required to consolidate these entities. Additionally, for certain other entities, we reviewed other relevant accounting guidance, which states the general partner in a limited partnership is presumed to control that limited partnership. The presumption may be overcome if the limited partners have either: (1) the substantive ability to dissolve the limited partnership or otherwise remove the general partner without cause, or (2) substantive participating rights, which provide the limited partners with the ability to effectively participate in significant decisions that would be expected to be made in the ordinary course of the limited partnership's business and thereby preclude the general partner from exercising unilateral control over the partnership. If the criteria are not met, the consolidation of the partnership or limited liability company is required. Based on our evaluation of these entities, we determined that these entities do not require consolidation.

Debenture to Stifel Financial Capital Trusts

We have completed private placements of cumulative trust preferred securities through Stifel Financial Capital Trust II, Stifel Financial Capital Trust III, and Stifel Financial Capital Trust IV (collectively, the "Trusts"). The Trusts are non-consolidated wholly owned business trust subsidiaries of our company and were established for the limited purpose of issuing trust securities to third parties and lending the proceeds to our company.

The trust preferred securities represent an indirect interest in junior subordinated debentures purchased from our company by the Trusts, and we effectively provide for the full and unconditional guarantee of the securities issued by the Trusts. We make timely payments of interest to the Trusts as required by contractual obligations, which are sufficient to cover payments due on the securities issued by the Trusts, and believe that it is unlikely that any circumstances would occur that would make it necessary for our company to make payments related to these Trusts other than those required under the terms of the debenture agreements and the trust preferred securities agreements. The Trusts were determined to be VIEs because the holders of the equity investment at risk do not have adequate decision-making ability over the Trust's activities. Our investment in the Trusts is not a variable interest, because equity interests are variable interests only to the extent that the investment is considered to be at risk. Because our investment was funded by the Trusts, it is not considered to be at risk.

Interest in FSI Group, LLC ("FSI")

We have provided financing of \$18.0 million in the form of a convertible promissory note to FSI, a limited liability company specializing in investing in banks, thrifts, insurance companies, and other financial services firms. In February 2013, the convertible promissory note was amended and restated. The convertible promissory note matures in April 2018; however, FSI has three five-year extension options. The note is convertible at our election into a 49.9% interest in FSI only after the last extension option. The convertible promissory note has a minimum coupon rate equal to 8% per annum plus additional interest related to certain defined cash flows of the business, not to exceed 18% per annum. As we do not hold the power to direct the activities of FSI nor to absorb a majority of the expected losses, or

receive a majority of the expected benefits, it was determined that we are not required to consolidate this entity.

Our company's exposure to loss is limited to the carrying value of the note with FSI at September 30, 2015, of \$18.0 million, which is included in other assets in the consolidated statements of financial condition. Our company had no liabilities related to this entity at September 30, 2015. We have the discretion to make additional capital contributions. We have not provided financial or other support to FSI that we were not previously contractually required to provide as of September 30, 2015. Our company's involvement with FSI has not had a material effect on our consolidated financial position, operations, or cash flows.

NOTE 28 – Subsequent Events

We evaluate subsequent events that have occurred after the balance sheet date but before the financial statements are issued. There are two types of subsequent events: (1) recognized, or those that provide additional evidence about conditions that existed at the date of

the balance sheet, including the estimates inherent in the process of preparing financial statements, and (2) non-recognized, or those that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Based on the evaluation, we identified the following non-recognized subsequent event:

Share Repurchase

We have an ongoing authorization, as amended, from the Board to repurchase our common stock in the open market or in negotiated transactions. On November 3, 2015, the Board authorized the repurchase of an additional 5.0 million shares. The share repurchase program will manage our equity capital relative to the growth of our business and help to meet obligations under our employee benefit plans.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of the financial condition and results of operations of our company should be read in conjunction with the consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2014, and the accompanying consolidated financial statements and notes thereto contained in this Quarterly Report on Form 10-Q.

Certain statements in this report may be considered forward-looking. Statements that are not historical or current facts, including statements about beliefs and expectations, are forward-looking statements. These forward-looking statements cover, among other things, statements made about general economic and market conditions, the investment banking industry, our objectives and results, and also may include our belief regarding the effect of various legal proceedings, management expectations, our liquidity and funding sources, counterparty credit risk, or other similar matters. Forward-looking statements involve inherent risks and uncertainties, and important factors could cause actual results to differ materially from those anticipated, including those factors discussed below under "External Factors Impacting Our Business" as well as the factors identified under "Risk Factors" in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2014, as updated in our subsequent reports filed with the SEC. These reports are available at our web site at www.stifel.com and at the SEC web site at www.sec.gov.

Because of these and other uncertainties, our actual future results may be materially different from the results indicated by these forward-looking statements. In addition, our past results of operations do not necessarily indicate our future results. Forward-looking statements speak only as of the date they are made, and we undertake no obligation to update them in light of new information or future events, unless we are obligated to do so under federal securities laws.

Unless otherwise indicated, the terms "we," "us," "our" or "our company" in this report refer to Stifel Financial Corp. and its wholly owned subsidiaries.

Executive Summary

We operate as a financial services and bank holding company. We have built a diversified business serving private clients, institutional investors, and investment banking clients located across the United States and in Europe. Our principal activities are: (i) private client services, including securities transaction and financial planning services; (ii) institutional equity and fixed income sales, trading and research, and municipal finance; (iii) investment banking services, including mergers and acquisitions, public offerings, and private placements; and (iv) retail and commercial banking, including personal and commercial lending programs. Our major geographic area of concentration is throughout the United States, with a growing presence in the United Kingdom and Europe. Our company's principal customers are individual investors, corporations, municipalities, and institutions.

Our core philosophy is based upon a tradition of trust, understanding, and studied advice. We attract and retain experienced professionals by fostering a culture of entrepreneurial, long-term thinking. We provide our private, institutional and corporate clients quality, personalized service, with the theory that if we place clients' needs first, both our clients and our company will prosper. Our unwavering client and employee focus have earned us a reputation as one of the leading brokerage and investment banking firms off Wall Street. We have grown our business both organically and through opportunistic acquisitions. These acquisitions have positively impacted our results.

We plan to maintain our focus on revenue growth with a continued appreciation for the development of quality client relationships. Within our private client business, our efforts will be focused on recruiting experienced financial advisors with established client relationships. Within our capital markets business, our focus continues to be on providing quality client management and product diversification. In executing our growth strategy, we will continue to seek out opportunities that allow us to take advantage of the consolidation among middle-market firms, whereby allowing us to increase market share in our Global Wealth Management and Institutional Group businesses.

Our ability to attract and retain highly skilled and productive employees is critical to the success of our business. Accordingly, compensation and benefits comprise the largest component of our expenses, and our performance is dependent upon our ability to attract, develop and retain highly skilled employees who are motivated and committed to providing the highest quality of service and guidance to our clients.

On January 15, 2015 (the “redemption date”), we redeemed 100% of our company’s outstanding 6.70% Senior Notes due 2022. The redemption price was equal to the sum of the principal amount of the Notes outstanding and accrued and unpaid interest on the Notes up to, but not including, the redemption date.

On June 5, 2015, we completed the purchase of all of the outstanding shares of common stock of Sterne Agee Group, Inc. (“Sterne Agee”), a financial services firm that offers comprehensive wealth management and investment services to a diverse client base including corporations, municipalities and individual investors. The purchase was completed pursuant to the merger agreement dated February 23, 2015. We issued 1.4 million shares related to the purchase of Sterne Agee Group, Inc.

Upon the close of the acquisition, certain employees were granted restricted stock units of our company as retention. The fair value of the awards issued as retention was \$23.8 million. The fair value of the awards is based upon the closing price of our company’s common stock on the date of grant. There are no continuing service requirements associated with these restricted stock units, and accordingly were expensed at date of grant. This charge is included in compensation and benefits in the consolidated statement of operations for the nine months ended September 30, 2015. In addition, we have paid \$33.8 million in the form of notes to associates for retention. These notes will be forgiven by a charge to compensation and benefits over a five- to ten-year period if the individual satisfies certain conditions, usually based on continued employment and certain performance standards.

On June 8, 2015, we entered into a definitive purchase agreement to acquire Barclays’ Wealth and Investment Management, Americas franchise in the U.S. The transaction is expected to close in the fourth quarter of 2015.

Results for the three and nine months ended September 30, 2015

For the three months ended September 30, 2015, net revenues from continuing operations increased 13.0% to \$591.6 million compared to \$523.5 million during the comparable period in 2014. Net income, including continuing and discontinued operations, decreased 56.9% to \$17.2 million, or \$0.22 per diluted common share for the three months ended September 30, 2015, compared to \$39.9 million, or \$0.52 per diluted common share during the comparable period in 2014. Net income from continuing operations decreased 57.2% to \$17.2 million, or \$0.22 per diluted common share for the three months ended September 30, 2015 compared to \$40.1 million, or \$0.52 per diluted common share during the comparable period in 2014.

For the nine months ended September 30, 2015, net revenues from continued operations increased 7.4% to \$1,750.3 million compared to \$1,630.3 million during the comparable period in 2014. Net income, including continuing and discontinued operations, decreased 38.0% to \$81.2 million, or \$1.04 per diluted common share for the nine months ended September 30, 2015, compared to \$130.9 million, or \$1.72 per diluted common share during the comparable period in 2014. Net income from continuing operations decreased 39.3% to \$81.2 million, or \$1.04 per diluted common share for the nine months ended September 30, 2015 compared to \$133.6 million, or \$1.76 per diluted common share during the comparable period in 2014.

Our revenue growth for the three months ended September 30, 2015 was primarily attributable to the growth in asset management and service fees as a result of increased assets under management; higher commission revenues; and an increase in other revenues, offset by lower net interest income.

Our revenue growth for the nine months ended September 30, 2015 was primarily attributable to the growth in asset management and service fees as a result of increased assets under management; higher commission revenues; an increase in other revenues; and a growth in investment banking revenues, offset by a decline in principal transaction revenues and lower net interest income.

External Factors Impacting our Business

Performance in the financial services industry in which we operate is highly correlated to the overall strength of economic conditions and financial market activity. Overall market conditions are a product of many factors, which are beyond our control and mostly unpredictable. These factors may affect the financial decisions made by investors, including their level of participation in the financial markets. In turn, these decisions may affect our business results. With respect to financial market activity, our profitability is sensitive to a variety of factors, including the demand for investment banking services as reflected by the number and size of equity and debt financings and merger and acquisition transactions, the volatility of the equity and fixed income markets, the level and shape of various yield curves, the volume and value of trading in securities, and the value of our customers' assets under management. The municipal underwriting market is challenging as state and local governments reduce their debt levels. Investors are showing a lack of demand for longer-dated municipals and are reluctant to take on credit or liquidity risks.

Our overall financial results continue to be highly and directly correlated to the direction and activity levels of the United States equity and fixed income markets. At September 30, 2015, the key indicators of the markets' performance, the Dow Jones Industrial Average and S&P 500 closed (4.4%) and (2.6%) lower than their September 30, 2014 closing prices, respectively and the NASDAQ closed 2.8% higher than their September 30, 2014 closing price.

As a participant in the financial services industry, we are subject to complicated and extensive regulation of our business. The recent economic and political environment has led to legislative and regulatory initiatives, both enacted and proposed, that could substantially intensify the regulation of the financial services industry and may significantly impact us.

RESULTS OF OPERATIONS

Three Months Ended September 30, 2015 Compared with Three Months Ended September 30, 2014

The following table presents consolidated financial information for the periods indicated (in thousands, except percentages):

	Three Months Ended September 30,		%	As a Percentage of Net Revenues For the Three Months Ended September 30,	
	2015	2014		2015	2014
Revenues:					
Commissions	\$194,083	\$167,601	15.8	32.8 %	32.0 %
Principal transactions	95,593	94,828	0.8	16.2	18.1
Investment banking	118,753	118,717	*	20.1	22.7
Asset management and service fees	130,636	96,638	35.2	22.1	18.5
Interest	43,376	52,096	(16.7)	7.3	9.9
Other income	18,930	4,803	294.1	3.2	0.9
Total revenues	601,371	534,683	12.5	101.7	102.1
Interest expense	9,796	11,228	(12.8)	1.7	2.1
Net revenues	591,575	523,455	13.0	100.0	100.0
Non-interest expenses:					
Compensation and benefits	404,205	331,440	22.0	68.3	63.3

*Percentage not meaningful.

Except as noted in the following discussion of variances, the underlying reasons for the increase in revenue can be attributed principally to the increased number of private client group offices and financial advisors in our Global Wealth Management segment and the increased number of revenue producers in our Institutional Group segment.

Commissions – Commission revenues are primarily generated from agency transactions in OTC and listed equity securities, insurance products and options. In addition, commission revenues also include distribution fees for promoting and distributing mutual funds.

For the three months ended September 30, 2015, commission revenues increased 15.8% to \$194.1 million from \$167.6 million in the comparable period in 2014. The increase is primarily attributable to an increase in agency transactions from the comparable period in 2014.

For the nine months ended September 30, 2015, commission revenues increased 10.2% to \$562.2 million from \$510.1 million in the comparable period in 2014. The increase is primarily attributable to an increase in agency transactions from the comparable period in 2014.

Principal transactions – For the three months ended September 30, 2015, principal transactions revenues increased 0.8% to \$95.6 million from \$94.8 million in the comparable period in 2014. The decrease is primarily attributable to a decrease in fixed income institutional brokerage revenues as a result of lower trading volumes.

For the nine months ended September 30, 2015, principal transactions revenues decreased 11.5% to \$281.8 million from \$318.3 million in the comparable period in 2014. The decrease is primarily attributable to a decrease in fixed income institutional brokerage revenues as a result of lower trading volumes.

Investment banking – Investment banking revenues include: (i) capital raising revenues representing fees earned from the underwriting of debt and equity securities, and (ii) advisory fees related to corporate debt and equity offerings, municipal debt offerings, merger and acquisitions, private placements and other investment banking advisory fees.

For the three months ended September 30, 2015, investment banking revenues remained consistent with the comparable period in 2014 at \$118.8 million.

Capital raising revenues increased 1.8% to \$69.0 million for the three months ended September 30, 2015 from \$67.8 million in the comparable period in 2014. For the three months ended September 30, 2015, fixed income capital raising revenues increased 101.7% to \$32.4 million from \$16.1 million in the comparable period in 2014. During the third quarter of 2015, equity capital raising revenues decreased 29.2% to \$36.6 million from \$51.7 million in the comparable period in 2014.

For the nine months ended September 30, 2015, investment banking revenues increased 2.4%, to \$400.3 million from \$390.8 million in the comparable period in 2014.

Capital raising revenues increased 7.6% to \$237.5 million for the nine months ended September 30, 2015 from \$220.8 million in the comparable period in 2014. For the nine months ended September 30, 2015, fixed income capital raising revenues increased 97.8% to \$100.5 million from \$50.8 million in the comparable period in 2014. During the nine months ended September 30, 2015, equity capital raising revenues decreased 19.4% to \$137.0 million from \$170.0 million in the comparable period in 2014.

Advisory fee revenues decreased 2.3% to \$49.8 million for the three months ended September 30, 2015 from \$50.9 million in the comparable period in 2014. Advisory fee revenues decreased 4.3% to \$162.8 million for the nine months ended September 30, 2015 from \$170.1 million in the comparable period in 2014. The decrease is primarily attributable to a decrease in the number of advisory transactions over the comparable period in 2014.

Asset management and service fees – Asset management and service fees include fees for asset-based financial services provided to individuals and institutional clients. Investment advisory fees are charged based on the value of assets in

fee-based accounts. Asset management and service fees are affected by changes in the balances of client assets due to market fluctuations and levels of net new client assets.

For the three months ended September 30, 2015, asset management and service fee revenues increased 35.2% to \$130.6 million from \$96.6 million in the comparable period in 2014. For the nine months ended September 30, 2015, asset management and service fee revenues increased 30.1% to \$364.4 million from \$280.0 million in the comparable period in 2014. The increase is primarily a result of an increase in the number and value of fee-based accounts. See “Asset management and service fees” in the Global Wealth Management segment discussion for information on the changes in asset management and service fees revenues.

Other income – For the three months ended September 30, 2015, other income increased 294.1% to \$18.9 million from \$4.8 million during the comparable period in 2014. For the nine months ended September 30, 2015, other income increased 137.2% to \$44.5 million from \$18.7 million during the comparable period in 2014. Other income primarily includes gain on the sale of a portion of the Acacia loan portfolio and loan originations fees from Stifel Bank.

NET INTEREST INCOME

The following tables present average balance data and operating interest revenue and expense data, as well as related interest yields for the periods indicated (in thousands, except rates):

Senior notes (Stifel Financial)	477,222	19,364	5.41 %	404,836	18,158	5.98 %	
Stifel Capital Trusts	82,500	1,286	2.08 %	82,500	1,268	2.05 %	
Other		5,579			2,424		

Total interest expense	32,914	28,701
Net interest income	\$97,050	\$112,334

Net interest income – Net interest income is the difference between interest earned on interest-earning assets and interest paid on funding sources. Net interest income is affected by changes in the volume and mix of these assets and liabilities, as well as by fluctuations in interest rates and portfolio management strategies. For the three months ended September 30, 2015, net interest income decreased to \$33.6 million from \$40.9 million during the comparable period in 2014. For the nine months ended September 30, 2015, net interest income decreased to \$97.1 million from \$112.3 million during the comparable period in 2014.

For the three months ended September 30, 2015, interest revenue decreased 16.7% to \$43.4 million from \$52.1 million in the comparable period in 2014, principally as a result of a decrease in interest revenue generated from the interest-earning assets of Stifel Bank and a decrease in other interest income and higher margin interest. The average interest-earning assets of Stifel Bank decreased to \$4.8 billion during the three months ended September 30, 2015 compared to \$5.0 billion during the comparable period in 2014 at average interest rates of 2.66% and 3.24%, respectively.

For the nine months ended September 30, 2015, interest revenue decreased 7.8% to \$130.0 million from \$141.0 million in the comparable period in 2014, principally as a result of decrease in interest revenue generated from the interest-earning assets of Stifel Bank and a decrease in other interest income and higher margin interest. The average interest-earning assets of Stifel Bank increased to \$5.0 billion during the nine months ended September 30, 2015 compared to \$4.9 billion during the comparable period in 2014 at average interest rates of 2.65% and 2.90%, respectively.

For the three months ended September 30, 2015, interest expense decreased 12.8% to \$9.8 million from \$11.2 million during the comparable period in 2014. The decrease is primarily attributable to the redemption of our \$175.0 million 6.70% senior notes in January 2015, offset by interest expense associated with our July 2014 issuance of \$300.0 million of 4.250% senior notes.

For the nine months ended September 30, 2015, interest expense increased 14.7% to \$32.9 million from \$28.7 million during the comparable period in 2014. The increase is primarily attributable to interest expense associated with our July 2014 issuance of \$300.0 million of 4.250% senior notes, offset by the redemption of our \$175.0 million 6.70% senior notes in January 2015.

NON-INTEREST EXPENSES

The following table presents consolidated non-interest expenses for the periods indicated (in thousands, except percentages):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2015	2014	% Change	2015	2014	% Change
Non-interest expenses:						
Compensation and benefits	\$404,205	\$331,440	22.0	\$1,169,896	\$1,033,478	13.2
Occupancy and equipment rental	53,282	41,611	28.0	145,798	125,110	16.5
Communications and office supplies	35,678	27,464	29.9	96,026	78,151	22.9
Commissions and floor brokerage	12,430	9,971	24.7	31,623	28,247	12.0
Other operating expenses	63,632	47,203	34.8	176,480	143,945	22.6
Total non-interest expenses	\$569,227	\$457,689	24.4	\$1,619,823	\$1,408,931	15.0

Except as noted in the following discussion of variances, the underlying reasons for the increase in non-interest expenses can be attributed principally to our continued expansion, both organically and through acquisitions, and increased administrative overhead to support the growth in our segments.

Compensation and benefits – Compensation and benefits expenses, which are the largest component of our expenses, include salaries, bonuses, transition pay, benefits, amortization of stock-based compensation, employment taxes and other employee-related costs. A significant portion of compensation expense is comprised of production-based variable compensation, including discretionary bonuses, which fluctuates in proportion to the level of business activity, increasing with higher revenues and operating profits. Other compensation costs, including base salaries, stock-based compensation amortization, and benefits, are more fixed in nature.

For the three months ended September 30, 2015, compensation and benefits expense increased 22.0% to \$404.2 million from \$331.4 million during the comparable period in 2014. For the nine months ended September 30, 2015, compensation and benefits expense increased 13.2% to \$1,169.9 million from \$1,033.5 million during the comparable period in 2014. The increase is principally due to the following: 1) increased variable compensation as a result of increased revenue production; and 2) an increase in fixed compensation for the additional administrative support staff.

Compensation and benefits expense as a percentage of net revenues was 68.3% and 66.8% for the three and nine months ended September 30, 2015, respectively, compared to 63.3% and 63.4% for the three and nine months ended September 30, 2014, respectively.

A portion of compensation and benefits expenses includes transition pay, principally in the form of upfront notes, signing bonuses and retention awards in connection with our continuing expansion efforts, of \$28.9 million (4.9% of net revenues) and \$84.1 million (4.8% of net revenues) for the three and nine months ended September 30, 2015, respectively, compared to \$27.1 million (5.2% of net revenues) and \$77.4 million (4.8% of net revenues) for the comparable periods in 2014, respectively. The upfront notes are amortized over a five to ten year period.

Occupancy and equipment rental – For the three months ended September 30, 2015, occupancy and equipment rental expense increased 28.0% to \$53.3 million from \$41.6 million during the three months ended September 30, 2014. For the nine months ended September 30, 2015, occupancy and equipment rental expense increased 16.5% to \$145.8 million from \$125.1 million during the nine months ended September 30, 2014. The increase is primarily due to the increase in rent expense as a result of the growth of our office

locations from the comparative period in 2014. As of September 30, 2015, we have 391 locations compared to 368 at September 30, 2014.

Communications and office supplies – Communications expense includes costs for telecommunication and data communication, primarily for obtaining third-party market data information. For the three months ended September 30, 2015, communications and office supplies expense increased 29.9% to \$35.7 million from \$27.5 million during the third quarter of 2014. For the nine months ended September 30, 2015, communications and office supplies expense increased 22.9% to \$96.0 million from \$78.2 million during the nine months ended September 30, 2014. The increase is primarily attributable to our continued expansion and the addition of revenue producers and support staff through acquisitions.

Commissions and floor brokerage – For the three months ended September 30, 2015, commissions and floor brokerage expense increased 24.7% to \$12.4 million from \$10.0 million during the comparable period in 2014. For the nine months ended September 30, 2015, commissions and floor brokerage expense increased 12.0% to \$31.6 million from \$28.2 million during the comparable period in 2014. The increase is primarily attributable to an increase in clearing fees as a result of an increase in volume of transactions.

Other operating expenses – Other operating expenses primarily include license and registration fees, litigation-related expenses, which consist of amounts we reserve and/or pay out related to legal and regulatory matters, travel and entertainment, promotional expenses and expenses for professional services.

For the three months ended September 30, 2015, other operating expenses increased 34.8% to \$63.6 million from \$47.2 million during the three months ended September 30, 2014. For the nine months ended September 30, 2015, other operating expenses increased 22.6% to \$176.5 million from \$143.9 million during the nine months ended September 30, 2014. The increase is primarily attributable to an increase in professional service fees as a result of maintaining compliance with regulatory requirements, travel and promotion, and subscriptions expenses.

Provision for income taxes – For the three and nine months ended September 30, 2015, our provision for income taxes was \$5.2 million and \$49.3 million, representing an effective tax rate of 23.1% and 37.8%, respectively, compared to \$25.7 million and \$87.8 million for the comparable periods in 2014, representing an effective tax rate of 39.0% and 39.6%, respectively. The effective tax rate for the third quarter of 2015 was positively impacted by a decrease in the Company's FIN 48 reserve and adjustments associated with the filing of the 2014 Corporate tax return.

SEGMENT ANALYSIS

Our reportable segments include Global Wealth Management, Institutional Group, and Other.

Our Global Wealth Management segment consists of two businesses, the Private Client Group and Stifel Bank. The Private Client Group includes branch offices and independent contractor offices of our broker-dealer subsidiaries located throughout the United States, primarily in the Midwest and Mid-Atlantic regions with a growing presence in the Northeast, Southeast and Western United States. These branches provide securities brokerage services, including the sale of equities, mutual funds, fixed income products, and insurance, as well as offering banking products to their private clients through Stifel Bank, which provides residential, consumer, and commercial lending, as well as Federal Depository Insurance Corporation ("FDIC")-insured deposit accounts to customers of our broker-dealer subsidiaries and to the general public.

The Institutional Group segment includes institutional sales and trading. It provides securities brokerage, trading, and research services to institutions with an emphasis on the sale of equity and fixed income products. This segment also includes the management of and participation in underwritings for both corporate and public finance (exclusive of

sales credits generated through the private client group, which are included in the Global Wealth Management segment), merger and acquisition, and financial advisory services.

The Other segment includes interest income from stock borrow activities, unallocated interest expense, interest income and gains and losses from investments held, and all unallocated overhead cost associated with the execution of orders; processing of securities transactions; custody of client securities; receipt, identification, and delivery of funds and securities; compliance with regulatory and legal requirements; internal financial accounting and controls; and general administration.

We evaluate the performance of our segments and allocate resources to them based on various factors, including prospects for growth, return on investment, and return on revenues.

Results of Operations – Global Wealth Management

Three Months Ended September 30, 2015 Compared with Three Months Ended September 30, 2014

The following table presents consolidated financial information for the Global Wealth Management segment for the periods indicated (in thousands, except percentages):

	Three Months Ended September 30,			As a Percentage of Net Revenues For the Three Months Ended September 30,

NET REVENUES

For the three months ended September 30, 2015, Global Wealth Management net revenues increased 12.6% to a record \$357.3 million from \$317.2 million for the comparable period in 2014. For the nine months ended September 30, 2015, Global Wealth Management net revenues increased 11.8% to a record \$1,030.1 million from \$921.7 million for the comparable period in 2014. The increase in net revenues for the three and nine months ended September 30, 2015 over the comparable periods in 2014 is primarily attributable to growth in asset management and service fees; an increase in commission revenues; an increase in other revenues, offset by a decrease in principal transaction revenues, net interest revenues, and lower investment banking revenues.

Commissions – For the three months ended September 30, 2015, commission revenues increased 18.8% to \$134.5 million from \$113.2 million in the comparable period in 2014. For the nine months ended September 30, 2015,

commission revenues increased 11.1% to \$375.8 million from \$338.4 million in the comparable period in 2014. The increase is primarily attributable to an increase in agency transactions in mutual funds, equities and insurance products.

Principal transactions – For the three months ended September 30, 2015, principal transactions revenues decreased 21.5% to \$34.8 million from \$44.4 million in the comparable period in 2014. For the nine months ended September 30, 2015, principal transactions revenues decreased 21.1% to \$110.5 million from \$140.0 million in the comparable period in 2014. The decrease is primarily attributable to a decrease in fixed income activity from the third quarter of 2014.

Asset management and service fees – For the three months ended September 30, 2015, asset management and service fees increased 33.9% to \$129.0 million from \$96.4 million in the comparable period in 2014. For the nine months ended September 30, 2015, asset management and service fees increased 29.6% to \$362.4 million from \$279.7 million in the comparable period in 2014. The increase is primarily a result of an increase in assets under management in our fee-based accounts. Fee-based account revenues for the three months ended September 30, 2015 and 2014 are billed in arrears based on values as of June 30, 2015 and 2014, respectively.

The increase is primarily due to the higher value of fee-based accounts, as a result of market appreciation and new client assets as a result of our continued expansion in the asset management business with the acquisition of 1919 Investment Counsel in the fourth quarter of 2014.

A significant portion of our asset management and service fee revenues are fee-based account revenues, which are billed in arrears based on values as of the beginning of the reporting period. The value of assets in fee-based accounts at June 30, 2015 increased 16.1% from June 30, 2014 to \$37.2 billion, of which 62.0% is attributable to net inflows and 38.0% is attributable to market appreciation. The number of fee-based accounts at June 30, 2015 increased 12.7% from June 30, 2014 to \$111,144 (actual).

Investment banking – Investment banking, which represents sales credits for investment banking underwritings, decreased 24.8% to \$10.1 million for the three months ended September 30, 2015 from \$13.5 million during the comparable period in 2014. For the nine months ended September 30, 2015, investment banking revenues decreased 1.1% to \$35.4 million from \$35.8 million during the comparable period in 2014. See “Investment banking” in the Institutional Group segment discussion for information on the changes in net revenues.

Interest revenue – For the three months ended September 30, 2015, interest revenue decreased 14.8% to \$39.2 million from \$46.1 million in the comparable period in 2014. For the nine months ended September 30, 2015, interest revenue decreased 3.4% to \$119.2 million from \$123.4 million during the comparable period in 2014. The decrease is primarily due to a decline of the interest-earning assets of Stifel Bank. See “Net Interest Income – Stifel Bank” below for a further discussion of the changes in net revenues.

Other income – For the three months ended September 30, 2015, other income increased 92.3% to \$12.5 million from \$6.5 million during the comparable period in 2014. For the nine months ended September 30, 2015, other income increased 155.5% to \$34.2 million from \$13.4 million during the comparable period in 2014. The increase is primarily attributable to the sale of a portion of the Acacia loan portfolio and an increase in mortgage fees from loan originations at Stifel Bank, offset by investment losses.

Interest expense – For the three months ended September 30, 2015, interest expense increased 7.2% to \$2.9 million from \$2.7 million during the comparable period in 2014. For the nine months ended September 30, 2015, interest expense decreased 16.4% to \$7.5 million from \$8.9 million during the comparable period in 2014.

NET INTEREST INCOME – STIFEL BANK

The following tables present average balance data and operating interest revenue and expense data for Stifel Bank, as well as related interest yields for the periods indicated (in thousands, except rates):

	\$(225)	\$265	\$40	\$33	\$474	\$507

Increases and decreases in interest revenue and interest expense result from changes in average balances (volume) of interest-earning bank assets and liabilities, as well as changes in average interest rates. The effect of changes in volume is determined by multiplying the change in volume by the previous year's average yield/cost. Similarly, the effect of rate changes is calculated by multiplying the change in average yield/cost by the previous year's volume. Changes applicable to both volume and rate have been allocated proportionately.

Net interest income – Net interest income is the difference between interest earned on interest-earning assets and interest paid on funding sources. Net interest income is affected by changes in the volume and mix of these assets and liabilities, as well as by fluctuations in interest rates and portfolio management strategies.

For the three months ended September 30, 2015, interest revenue of \$31.6 million was generated from average interest-earning assets of \$4.8 billion at an average interest rate of 2.66%. Interest revenue of \$40.6 million for the comparable period in 2014 was generated from average interest-earning assets of \$5.0 billion at an average interest rate of 3.24%.

For the nine months ended September 30, 2015, interest revenue of \$99.8 million was generated from average interest-earning assets of \$5.0 billion at an average interest rate of 2.65%. Interest revenue of \$107.3 million for the comparable period in 2014 was generated from average interest-earning assets of \$4.9 billion at an average interest rate of 2.90%. Interest-earning assets principally consist of residential, consumer, and commercial loans, securities, and federal funds sold.

Interest expense represents interest on customer money market accounts, interest on time deposits and other interest expense. The average balance of interest-bearing liabilities during the three months ended September 30, 2015 was \$4.4 billion at an average interest rate of 0.16%. The average balance of interest-bearing liabilities for the comparable period in 2014 was \$4.7 billion at an average interest rate of 0.15%. The average balance of interest-bearing liabilities during the nine months ended September 30, 2015 was \$4.6 billion at an average interest rate of 0.17%. The average balance of interest-bearing liabilities for the comparable period in 2014 was \$4.6 billion at an average interest rate of 0.16%.

The growth in Stifel Bank has been primarily driven by the growth in deposits associated with brokerage customers of Stifel Nicolaus. At September 30, 2015, the balance of Stifel Nicolaus brokerage customer deposits at Stifel Bank was \$4.1 billion compared to \$4.4 billion at September 30, 2014.

See “Net Interest Income – Stifel Bank” above for more information regarding average balances, interest income and expense, and average interest rate yields.

NON-INTEREST EXPENSES

For the three months ended September 30, 2015, Global Wealth Management non-interest expenses increased 16.5% to \$260.1 million from \$223.2 million for the comparable period in 2014. For the nine months ended September 30, 2015, Global Wealth Management non-interest expenses increased 12.3% to \$740.0 million from \$658.9 million for the comparable period in 2014.

The fluctuations in non-interest expenses, discussed below, were primarily attributable to the continued growth of our Private Client Group. As of September 30, 2015, we have 351 branch offices compared to 326 at September 30, 2014. In addition, since September 30, 2014, we have added 208 financial advisors and 235 support staff.

Compensation and benefits – For the three months ended September 30, 2015, compensation and benefits expense increased 15.0% to \$204.0 million from \$177.3 million during the three months ended September 30, 2014. For the nine months ended September 30, 2015, compensation and benefits expense increased 11.5% to \$583.4 million from \$523.2 million during the nine months ended September 30, 2014. The increase is principally due to increased variable compensation as a result of increased production due to the growth in financial advisors and fixed compensation for the additional administrative support staff. Compensation and benefits expense as a percentage of net revenues was 57.1% and 56.6% for the three and nine months ended September 30, 2015, respectively, compared to 55.9% and 56.8% for the comparable periods in 2014, respectively.

A portion of compensation and benefits expenses includes transition pay, principally in the form of upfront notes, signing bonuses and retention awards in connection with our continuing expansion efforts, of \$14.9 million (4.2% of net revenues) and \$45.5 million (4.4% of net revenues) for the three and nine months ended September 30, 2015, respectively, compared to \$16.1 million (5.1% of net revenues) and \$49.2 million (5.3% of net revenues) for the three and nine months ended September 30, 2014, respectively. The upfront notes are amortized over a five to ten year period.

Occupancy and equipment rental – For the three months ended September 30, 2015, occupancy and equipment rental expense increased 17.5% to \$20.8 million from \$17.7 million during the comparable period in 2014. For the nine months ended September 30, 2015, occupancy and equipment rental expense increased 12.5% to \$59.5 million from \$52.9 million during the comparable period in 2014. The increase is primarily due to the increase in office locations.

Communications and office supplies – For the three months ended September 30, 2015, communications and office supplies expense increased 24.5% to \$12.4 million from \$10.0 million during the comparable period in 2014. For the nine months ended September 30, 2015, communications and office supplies expense increased 22.9% to \$35.9 million from \$29.2 million during the comparable period in 2014. The increase is primarily attributable to an increase in office supplies expense.

Commissions and floor brokerage – For the three months ended September 30, 2015, commissions and floor brokerage expense increased 29.4% to \$5.3 million from \$4.1 million during the comparable period in 2014. For the nine months ended September 30, 2015, commissions and floor brokerage expense increased 15.5% to \$12.7 million from \$11.0 million during the comparable period in 2014. The increase is consistent with the increase in commission revenues.

Other operating expenses – For the three months ended September 30, 2015, other operating expenses increased 24.4% to \$17.7 million from \$14.2 million during the comparable period in 2014. For the nine months ended September 30, 2015, other operating expenses increased 13.9% to \$48.5 million from \$42.6 million during the comparable period in

2014. The increase in other operating expenses is primarily attributable to an increase in professional service fees.

INCOME BEFORE INCOME TAXES

For the three months ended September 30, 2015, income before income taxes increased 3.4% to \$97.2 million from \$94.0 million during the comparable period in 2014. For the nine months ended September 30, 2015, income before income taxes increased 10.4% to \$290.0 million from \$262.8 million during the comparable period in 2014. Profit margins (income before income taxes as a percent of net revenues) have decreased to 27.2% and 28.2% for the three and nine months ended September 30, 2015, respectively, from 29.6% and 28.5% during the comparable periods in 2014, respectively, as a result of an increase in operating expenses.

Results of Operations – Institutional Group

Three Months Ended September 30, 2015 Compared with Three Months Ended September 30, 2014

NET REVENUES

For the three months ended September 30, 2015, Institutional Group net revenues increased 7.9% to \$232.1 million from \$215.2 million for the comparable period in 2014. For the nine months ended September 30, 2015, Institutional Group net revenues increased 1.2% to \$729.3 million from \$720.8 million during the comparable period in 2014.

The increase in net revenues for the three months ended September 30, 2015 over the comparable periods in 2014 was primarily attributable to an increase in fixed income capital raising revenues; fixed income brokerage revenues; and equity brokerage revenues, offset by decreases in equity capital raising revenues; and advisory fee revenues.

The increase in net revenues for the nine months ended September 30, 2015 over the comparable period in 2014 was primarily attributable to an increase in fixed income capital raising revenues; fixed income brokerage revenues, offset by decreases in equity capital raising revenues; advisory fee revenues; and equity brokerage revenues.

Commissions – For the three months ended September 30, 2015, commission revenues increased 14.6% to \$59.6 million from \$52.0 million in the comparable period in 2014. For the nine months ended September 30, 2015, commission revenues increased 11.1% to \$182.6 million from \$164.4 million in the comparable period in 2014.

Principal transactions – For the three months ended September 30, 2015, principal transactions revenues increased 14.9% to \$60.8 million from \$52.9 million in the comparable period in 2014. For the nine months ended September 30, 2015, principal transactions revenues decreased 5.7% to \$175.1 million from \$185.6 million in the comparable period in 2014.

For the three months ended September 30, 2015, fixed income institutional brokerage revenues increased 27.6% to \$60.6 million from \$47.5 million in the comparable period in 2014. For the nine months ended September 30, 2015, fixed income brokerage revenues increased 6.1% to \$177.4 million from \$167.1 million in the comparable period in 2014. The increase is primarily attributable to an improvement in fixed income trading volumes from the comparable period in 2014.

For the three months ended September 30, 2015, equity institutional brokerage revenues increased 4.1% to \$59.8 million from \$57.4 million during the comparable period in 2014. The increase is primarily attributable to market volatility.

For the nine months ended September 30, 2015, equity brokerage revenues decreased 1.4% to \$180.3 million from \$182.8 million during the comparable period in 2014. The decrease is primarily attributable to lower trading volumes.

Investment banking – For the three months ended September 30, 2015, investment banking revenues increased 3.2% to \$108.6 million from \$105.2 million during the comparable period in 2014, which is attributable to an increase in fixed income capital raising revenues and advisory fees, offset by a decrease in equity capital raising revenues from the comparable period in 2014. For the nine months ended September 30, 2015, investment banking revenues increased 2.8% to \$364.9 million from \$355.1 million during the comparable period in 2014.

For the three months ended September 30, 2015, capital raising revenues increased 9.5% to \$59.5 million from \$54.3 million in the comparable period in 2014. For the nine months ended September 30, 2015, capital raising revenues increased 9.8% to \$203.2 million from \$185.0 million in the comparable period in 2014.

For the three months ended September 30, 2015, fixed income capital raising revenues increased 104.6% to \$26.1 million from \$12.8 million during the comparable period in 2014. For the nine months ended September 30, 2015, fixed income capital raising revenues increased 109.9% to \$80.0 million from \$38.1 million during the comparable period in 2014. The increase is primarily attributable to an increase in the municipal bond origination business, primarily as a result of our acquisition of Sterne Agee in June 2015.

For the three months ended September 30, 2015, equity capital raising revenues decreased 19.7% to \$33.3 million from \$41.5 million during the comparable period in 2014. For the nine months ended September 30, 2015, equity capital raising revenues decreased 16.2% to \$123.2 million from \$146.9 million during the comparable period in 2014. The decrease was primarily attributable to a decrease in the number of transactions over the comparable periods in 2014.

For the three months ended September 30, 2015, advisory fees decreased 3.5% to \$49.1 million from \$50.9 million in the comparable period in 2014. For the nine months ended September 30, 2015, advisory fees decreased 4.9% to \$161.8 million from \$170.1 million in the comparable period in 2014. The decrease is primarily attributable to a decrease in the number of advisory transactions over the comparable periods in 2014.

Other income – For the three months ended September 30, 2015, other income decreased 47.5% to \$0.8 million from \$1.6 million in the comparable period in 2014. For the nine months ended September 30, 2015, other income decreased 68.9% to \$1.7 million from \$5.5 million in the comparable period in 2014.

NON-INTEREST EXPENSES

For the three months ended September 30, 2015, Institutional Group non-interest expenses increased 11.1% to \$206.3 million from \$185.7 million for the comparable period in 2014. For the nine months ended September 30, 2015, Institutional Group non-interest expenses increased 4.3% to \$629.1 million from \$603.0 million during the comparable period in 2014.

Unless specifically discussed below, the fluctuations in non-interest expenses were primarily attributable to the continued growth of our Institutional Group segment. We have added 287 revenue producers and 69 support staff since September 30, 2014.

Compensation and benefits – For the three months ended September 30, 2015, compensation and benefits expense increased 9.4% to \$143.9 million from \$131.6 million during the comparable period in 2014. For the nine months ended September 30, 2015, compensation and benefits expense increased 2.3% to \$453.4 million from \$443.1 million during the comparable period in 2014. The increase is principally due to an increase in variable compensation as a result of higher revenues and an increase in fixed compensation as a result of our continued expansion. Compensation and benefits expense as a percentage of net revenues was 62.0% for the three and 62.2% for the nine months ended September 30, 2015, respectively, compared to 61.2% and 61.5% for the three and nine months ended the comparable periods in 2014, respectively.

Occupancy and equipment rental – For the three months ended September 30, 2015, occupancy and equipment rental expense increased 2.9% to \$13.1 million from \$12.7 million during the comparable period in 2014. The increase is primarily due to an increase in rent expense. For the nine months ended September 30, 2015, occupancy and equipment rental expense decreased 2.4% to \$36.1 million from \$36.9 million during the comparable period in 2014.

Communications and office supplies – For the three months ended September 30, 2015, communications and office supplies expense increased 17.0% to \$17.3 million from \$14.8 million during the comparable period in 2014. For the nine months ended September 30,

2015, communications and office supplies expense increased 20.1% to \$48.8 million from \$40.6 million during the comparable period in 2014. The increase is primarily attributable to the growth of the business, which has resulted in an increase in communication and quote equipment.

Commissions and floor brokerage – For the three months ended September 30, 2015, commissions and floor brokerage expense increased 21.4% to \$7.2 million from \$5.9 million during the comparable period in 2014. For the nine months ended September 30, 2015, commissions and floor brokerage expense increased 9.7% to \$18.9 million from \$17.2 million during the comparable period in 2014. The increase is primarily attributable to an increase in clearing expense.

Other operating expenses – For the three months ended September 30, 2015, other operating expenses increased 20.0% to \$24.8 million from \$20.7 million during the comparable period in 2014. For the nine months ended September 30, 2015, other operating expenses increased 10.5% to \$72.0 million from \$65.1 million during the comparable period in 2014. The increase is primarily attributable to an increase in travel and promotion expenses and professional service fees.

INCOME BEFORE INCOME TAXES

For the three months ended September 30, 2015, income before income taxes for the Institutional Group segment decreased 12.4% to \$25.9 million from \$29.5 million during the comparable period in 2014. For the nine months ended September 30, 2015, income before income taxes for the Institutional Group segment decreased 15.0% to \$100.1 million from \$117.8 million during the comparable period in 2014. Profit margins (income before income taxes as a percentage of net revenues) have declined to 11.1% and 13.7% for the three months and nine months ended September 30, 2015, respectively, from 13.7% and 16.3% during the comparable periods in 2014 as a result of an increase in operating expenses.

Results of Operations – Other Segment

Three and Nine Months Ended September 30, 2015 Compared with Three and Nine Months Ended September 30, 2014

The following table presents consolidated financial information for the Other segment for the periods presented (in thousands, except percentages):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2015	2014	% Change	2015	2014	% Change
Net revenues	\$2,144	\$(8,946)	124.0	\$(9,058)	\$(12,172)	25.6
Non-interest expenses:						
Compensation and benefits	56,335	22,555	149.8	133,061	67,186	98.0
Other operating expenses	46,541	26,259	77.2	117,569	79,837	47.3
Total non-interest expenses	102,876	48,814	110.8	250,630	147,023	70.5
Loss before income taxes	\$(100,732)	\$(57,760)	74.4	\$(259,688)	\$(159,195)	63.1

Compensation and benefits – For the three months ended September 30, 2015, compensation and benefits expense increased 149.8% to \$56.3 million from \$22.6 million for the comparable period in 2014. For the nine months ended

September 30, 2015, compensation and benefits expense increased 98.0% to \$133.1 million from \$67.2 million during the comparable period in 2014. The increase is primarily attributable to an increase in fixed compensation associated with our continued back-office expansion to support the growth of the firm.

Upon the close of the Sterne Agee acquisition, certain employees were granted restricted stock units of our company as retention. The fair value of the awards issued as retention was \$23.8 million. The fair value of the awards is based upon the closing price of our company's common stock on the date of grant. There are no continuing service requirements associated with these restricted stock units, and accordingly were expensed at date of grant.

Other operating expenses – For the three months ended September 30, 2015, other operating expenses increased 77.2% to \$46.5 million from \$26.3 million for the comparable period in 2014. For the nine months ended September 30, 2015, other operating expenses increased 47.3% to \$117.6 million from \$79.8 million during the comparable period in 2014. The increase is primarily attributable to non-recurring non-compensation operating expenses (including merger-related expenses) associated with our recent acquisitions. These expenses include rent and professional services fees.

Analysis of Financial Condition

Our company's consolidated statements of financial condition consist primarily of cash and cash equivalents, receivables, financial instruments owned, bank loans, investments, goodwill, loans and advances to financial advisors, bank deposits, and payables. As of September 30, 2015, our total assets decreased 1.7% to \$9.4 billion from \$9.5 billion at December 31, 2014. The decrease is attributed to a decrease in investment portfolio at Stifel Bank which consists of available-for-sale and held-to-maturity securities and a decrease in financial investments owned, at fair value, offset by an increase in the loan portfolio at Stifel Bank and an increase in growth attributable to acquired assets. Our broker-dealer subsidiary's gross assets and liabilities, including financial instruments owned, stock loan/borrow, receivables and payables from/to brokers, dealers, and clearing organizations and clients, fluctuate with our business levels and overall market conditions.

As of September 30, 2015, our liabilities were comprised primarily of short-term borrowings of \$398.3 million, senior notes of \$450.0 million, trust preferred securities of \$82.5 million, deposits of \$4.1 billion at Stifel Bank, and payables to customers of \$423.8 million at our broker-dealer subsidiaries, as well as accounts payable and accrued expenses, and accrued employee compensation of \$599.0 million. To meet our obligations to clients and operating needs, we had \$607.1 million in cash and cash equivalents at September 30, 2015. We also had client brokerage receivables of \$708.1 million and \$2.6 billion in loans at Stifel Bank.

Cash Flow

Cash and cash equivalents decreased \$82.7 million to \$607.1 million at September 30, 2015, from \$689.8 million at December 31, 2014. Operating activities used \$1.4 million of cash primarily due to an increase in operating assets and a decrease in operating liabilities, offset by the net effect of non-cash items and net income recognized during the nine months ended September 30, 2015. Investing activities provided cash of \$553.4 million due to the proceeds from the sale and maturity of securities in our investment portfolio and the sale of investments, offset by the growth of the loan portfolio, fixed asset purchases, and investment purchases. Financing activities used cash of \$633.2 million principally due to a decrease in bank deposits, the redemption of 100% of the outstanding 6.70% senior notes, repurchases of our common stock, and contingent consideration payments, offset by proceeds received from short-term borrowings and FHLB advances.

Liquidity and Capital Resources

The Company's senior management establishes the liquidity and capital policies of our company. The Company's senior management reviews business performance relative to these policies, monitors the availability of alternative sources of financing, and oversees the liquidity and interest rate sensitivity of our company's asset and liability position.

Our assets, consisting mainly of cash or assets readily convertible into cash, are our principal source of liquidity. The liquid nature of these assets provides for flexibility in managing and financing the projected operating needs of the business. These assets are financed primarily by our equity capital, corporate debt, debentures to trusts, client credit balances, short-term bank loans, proceeds from securities lending, and other payables. We currently finance our client accounts and firm trading positions through ordinary course borrowings at floating interest rates from various banks on a demand basis, securities lending, and repurchase agreements, with company-owned and client securities pledged as collateral. Changes in securities market volumes, related client borrowing demands, underwriting activity, and levels of securities inventory affect the amount of our financing requirements.

Our bank assets consist principally of available-for-sale and held-to-maturity securities, retained loans, and cash and cash equivalents. Stifel Bank's current liquidity needs are generally met through deposits from brokerage clients and

equity capital. We monitor the liquidity of Stifel Bank daily to ensure its ability to meet customer deposit withdrawals, maintain reserve requirements, and support asset growth.

70

Edgar Filing: STIFEL FINANCIAL CORP - Form 10-Q

As of September 30, 2015, we had \$9.4 billion in assets, \$4.0 billion of which consisted of cash or assets readily convertible into cash as follows (in thousands, except average days to conversion):

	September 30, 2015	December 31, 2014	Average Conversion
Cash and cash equivalents	\$607,100	\$689,782	
Receivables from brokers, dealers, and clearing organizations	651,274	651,074	3 days
Securities purchased under agreements to resell	88,467	55,078	1 day
Financial instruments owned at fair value	811,957	782,912	12 days
Available-for-sale securities at fair value	659,832	1,513,478	3 days
Held-to-maturity securities at amortized cost	1,095,793	1,177,565	3 days
Investments	102,792	131,425	5 days
Total cash and assets readily convertible to cash	\$4,017,215	\$5,001,314	

As of September 30, 2015 and December 31, 2014, the amount of collateral by asset class is as follows (in thousands):

	September 30, 2015		December 31, 2014	
	Contractual	Contingent	Contractual	Contingent
Cash and cash equivalents	\$69,724	—	\$37,134	\$—
Financial instruments owned at fair value	106,937	586,104	39,180	425,108
Available-for-sale securities at fair value	—	1,296,703	—	1,210,193
Investments	—	37,925	—	41,150
	\$176,661	\$1,920,732	\$76,314	\$1,676,451

Capital Management

We have an ongoing authorization from the Board of Directors to repurchase our common stock in the open market or in negotiated transactions. At September 30, 2015, the maximum number of shares that may yet be purchased under this plan was 2.1 million. Since September 30, 2015, we have repurchased \$12.6 million, or 0.3 million shares. On November 3, 2015, the Board of Directors authorized the repurchase of an additional 5.0 million shares. Under existing Board authorizations at November 4, 2015, the Company is permitted to buy an additional 6.8 million shares. We utilize the share repurchase program to manage our equity capital relative to the growth of our business and help to meet obligations under our employee benefit plans. We currently do not pay cash dividends on our common stock.

Liquidity Risk Management

Our businesses are diverse, and our liquidity needs are determined by many factors, including market movements, collateral requirements, and client commitments, all of which can change dramatically in a difficult funding environment. During a liquidity crisis, credit-sensitive funding, including unsecured debt and some types of secured financing agreements, may be unavailable, and the terms (e.g., interest rates, collateral provisions, and tenor) or availability of other types of secured financing may change. We manage liquidity risk by diversifying our funding sources across products and among individual counterparties within those products.

As a holding company, whereby all of our operations are conducted through our subsidiaries, our cash flow and our ability to service our debt, including the notes, depend upon the earnings of our subsidiaries. Our subsidiaries are separate and distinct legal entities. Our subsidiaries have no obligation to pay any amounts due on the notes or to provide us with funds to pay our obligations, whether by dividends, distributions, loans, or other payments.

Our liquidity requirements may change in the event we need to raise more funds than anticipated to increase inventory positions, support more rapid expansion, develop new or enhanced services and products, acquire technologies, or respond to other unanticipated liquidity requirements. We primarily rely on financing activities and distributions from our subsidiaries for funds to implement our business and growth strategies and repurchase our shares. Net capital rules, restrictions under our borrowing arrangements of our subsidiaries, as well as the earnings, financial condition, and cash requirements of our subsidiaries, may each limit distributions to us from our subsidiaries.

The availability of outside financing, including access to the capital markets and bank lending, depends on a variety of factors, such as market conditions, the general availability of credit, the volume of trading activities, the overall availability of credit to the financial services sector, and our credit rating. Our cost and availability of funding may be adversely affected by illiquid credit markets and

wider credit spreads. As a result of any future concerns about the stability of the markets generally and the strength of counterparties specifically, lenders may from time to time curtail, or even cease to provide, funding to borrowers.

Our liquidity management policies are designed to mitigate the potential risk that we may be unable to access adequate financing to service our financial obligations without material business impact. The principal elements of our liquidity management framework are: (a) daily monitoring of our liquidity needs at the holding company and significant subsidiary level, (b) stress testing the liquidity positions of Stifel and Stifel Bank, and (c) diversification of our funding sources.

Monitoring of liquidity – Senior management establishes our liquidity and capital policies. These policies include senior management’s review of short- and long-term cash flow forecasts, review of monthly capital expenditures, the monitoring of the availability of alternative sources of financing, and the daily monitoring of liquidity in our significant subsidiaries. Our decisions on the allocation of capital to our business units consider, among other factors, projected profitability and cash flow, risk, and impact on future liquidity needs. Our treasury department assists in evaluating, monitoring, and controlling the impact that our business activities have on our financial condition, liquidity, and capital structure as well as maintains our relationships with various lenders. The objectives of these policies are to support the successful execution of our business strategies while ensuring ongoing and sufficient liquidity.

Liquidity stress testing (Firm-wide) –A liquidity stress test model is maintained by the Company that measures liquidity outflows across multiple scenarios at the major operating subsidiaries and details the corresponding impact to our holding company and the overall consolidated firm. Liquidity stress tests are utilized to ensure that current exposures are consistent with the Company’s established liquidity risk tolerance and, more specifically, to identify and quantify sources of potential liquidity strain. Further, the stress tests are utilized to analyze possible impacts on the Company’s cash flows, liquidity position, profitability, and solvency. The outflows are modeled over a 30-day liquidity stress timeframe and include the impact of idiosyncratic and macro-economic stress events.

The assumptions utilized in the Company’s liquidity stress tests include, but are not limited to, the following:

- No government support
- No access to equity and unsecured debt markets within the stress horizon
- Higher haircuts and significantly lower availability of secured funding
- Additional collateral that would be required by trading counter-parties, certain exchanges, and clearing organizations related to credit rating downgrades
- Additional collateral that would be required due to collateral substitution, collateral disputes, and uncalled collateral
- Drawdowns on unfunded commitments provided to third parties
- Client cash withdrawals and reduction in customer short positions that fund long positions
- Return of securities borrowed on an uncollateralized basis
- Maturity roll-off of outstanding letters of credit with no further issuance

At September 30, 2015, the Company maintained sufficient liquidity to meet current and contingent funding obligations as modeled in its liquidity stress test model.

Liquidity stress testing (Stifel Bank) – Stifel Bank performs three primary stress tests on its liquidity position. These stress tests are based on the following company-specific stresses: (1) the amount of deposit run-off that Stifel Bank could withstand over a one-month period of time based on its on-balance sheet liquidity and available credit, (2) Stifel Bank’s ability to fund operations if all available credit were to be drawn immediately, with no additional available credit, and (3) Stifel Bank’s ability to fund operations under a regulatory prompt corrective action. The goal of these stress tests is to determine Stifel Bank’s ability to fund continuing operations under significant pressures on both assets and liabilities.

Under all stress tests, Stifel Bank considers cash and highly liquid investments as available to meet liquidity needs. In its analysis, Stifel Bank considers Agency mortgage-backed securities, Corporate Bonds, and Commercial mortgage-backed securities as highly liquid. In addition to being able to be readily financed at modest haircut levels, Stifel Bank estimates that each of the individual securities within each of the asset classes described above could be sold into the market and converted into cash within three business days under normal market conditions, assuming that the entire portfolio of a given asset class was not simultaneously liquidated. At September 30, 2015, available cash and highly liquid investments comprised approximately 25% of Stifel Bank's assets, which was well in excess of its internal target.

In addition to these stress tests, Stifel Bank management performs a daily liquidity review. The daily analysis provides Stifel Bank management with all major fluctuations in liquidity. The analysis also tracks the proportion of deposits that Stifel Bank is sweeping from its affiliated broker-dealer, Stifel. On a monthly basis, liquidity key performance indicators and compliance with liquidity policy limits are reported to the Board of Directors. Stifel Bank has not violated any internal liquidity policy limits.

Funding Sources

The Company pursues a strategy of diversification of secured and unsecured funding sources (by product and by investor) and attempts to ensure that the tenor of the Company's liabilities equals or exceeds the expected holding period of the assets being financed. The Company funds its balance sheet through diverse sources. These sources may include the Company's equity capital, long-term debt, repurchase agreements, securities lending, deposits, committed and uncommitted credit facilities, FHLB advances, and federal funds agreements. At September 30, 2015, we have \$57.5 million of ARS. Any redemptions by issuers of the ARS will create liquidity during the period in which the redemption occurs. ARS redemptions have been at par, and we believe will continue to be at par.

Cash and Cash Equivalents – We held \$607.1 million of cash and cash equivalents at September 30, 2015, compared to \$689.8 million at December 31, 2014. Cash and cash equivalents provide immediate sources of funds to meet our liquidity needs.

Securities Available-for-Sale – We held \$659.8 million in available-for-sale investment securities at September 30, 2015, compared to \$1.50 billion at December 31, 2014. As of September 30, 2015, the weighted-average life of the investment securities portfolio was approximately 2.6 years. These investment securities provide increased liquidity and flexibility to support our company's funding requirements.

We monitor the available-for-sale investment portfolio for other-than-temporary impairment based on a number of criteria, including the size of the unrealized loss position, the duration for which the security has been in a loss position, credit rating, the nature of the investments, and current market conditions. For debt securities, we also consider any intent to sell the security and the likelihood we will be required to sell the security before its anticipated recovery. We continually monitor the ratings of our security holdings and conduct regular reviews of our credit-sensitive assets.

Deposits – Deposits have become one of our largest funding sources. Deposits provide a stable, low-cost source of funds that we utilize to fund loan and asset growth and to diversify funding sources. We have continued to expand our deposit-gathering efforts through our existing private client network and through expansion. These channels offer a broad set of deposit products that include demand deposits, money market deposits, and certificates of deposit ("CDs").

As of September 30, 2015, we had \$4.10 billion in deposits compared to \$4.80 billion at December 31, 2014. The growth in deposits is primarily attributable to the increase in brokerage deposits held by the bank. Our core deposits are comprised of non-interest-bearing deposits, money market deposit accounts, savings accounts, and CDs.

Short-term borrowings – Our short-term financing is generally obtained through short-term bank line financing on an uncommitted, secured basis, committed bank line financing on an unsecured basis, advances from the Federal Home Loan Bank, term loans, and securities lending arrangements. We borrow from various banks on a demand basis with company-owned and customer securities pledged as collateral. The value of customer-owned securities used as collateral is not reflected in the consolidated statements of financial condition.

Our uncommitted secured lines of credit at September 30, 2015, totaled \$780.0 million with four banks and are dependent on having appropriate collateral, as determined by the bank agreements, to secure an advance under the

line. The availability of our uncommitted lines is subject to approval by the individual banks each time an advance is requested and may be denied. Our peak daily borrowing on our uncommitted secured lines was \$465.6 million during the nine months ended September 30, 2015. There are no compensating balance requirements under these arrangements. Any borrowings on secured lines of credit are day-to-day and are generally utilized to finance certain fixed income securities. At September 30, 2015, our uncommitted secured lines of credit were collateralized by company-owned securities valued at \$459.6 million.

The Federal Home Loan advances as of September 30, 2015 are floating-rate advances. The weighted average interest rates during the three months ended September 30, 2015 on these advances is 0.29%. The advances are secured by Stifel Bank's residential mortgage loan portfolio and investment portfolio. The interest rates reset on a daily basis. Stifel Bank has the option to prepay these advances without penalty on the interest reset date.

As of September 30, 2015, a subsidiary of the Parent was a party to two Term Loans (“Term Loans”) with Regions Bank. The Term Loans mature on June 3, 2016. The interest rate under the Amended and Restated Credit Agreement is calculated as per annum rate equal to LIBOR, as defined. During the three months ended September 30, 2015, interest rates ranged from 1.68% to 1.72%.

Unsecured borrowings – Our committed bank line financing at September 30, 2015, consisted of a \$100.0 million revolving credit facility. The credit facility expires in December 2017. The applicable interest rate under the revolving credit facility is calculated as a per annum rate equal to LIBOR plus 2.00%, as defined in the revolving credit facility.

We can draw upon this line as long as certain restrictive covenants are maintained. Under our revolving credit facility, we are required to maintain compliance with a minimum consolidated tangible net worth covenant, as defined, and a maximum consolidated total capitalization ratio covenant, as defined. At September 30, 2015, we had no advances on our revolving credit facility and were in compliance with all covenants. Our revolving credit facility contains customary events of default, including, without limitation, payment defaults, breaches of representations and warranties, covenant defaults, cross-defaults to similar obligations, certain events of bankruptcy and insolvency, and judgment defaults. In addition, Stifel, our broker-dealer subsidiary, is required to maintain compliance with a minimum regulatory net capital covenant of not less than 10% of aggregate debits, as defined in the revolving credit facility.

Federal Home Loan Bank Advances and other secured financing – Stifel Bank has borrowing capacity with the Federal Home Loan Bank of \$966.4 million at September 30, 2015 and a \$25.0 million federal funds agreement, for the purpose of purchasing short-term funds should additional liquidity be needed. Stifel Bank is eligible to participate in the Fed’s discount window program; however, Stifel Bank does not view borrowings from the Fed as a primary means of funding. The credit available in this program is subject to periodic review, may be terminated or reduced at the discretion of the Fed, and is secured by securities. Stifel Bank has borrowing capacity of \$0.3 million with the Fed’s discount window at September 30, 2015. Stifel Bank receives overnight funds from excess cash held in Stifel brokerage accounts, which are deposited into a money market account. These balances totaled \$4.0 billion at September 30, 2015.

Public Offering of Senior Notes – On December 18, 2012, we issued \$150.0 million principal amount of 5.375% Senior Notes due 2022 (the “December 2012 Notes”). Interest on the December 2012 Notes accrue from December 21, 2012, and will be paid quarterly in arrears on January 15, April 15, July 15, and October 15 of each year, commencing on April 15, 2013. The December 2012 Notes will mature on December 31, 2022. We may redeem the December 2012 Notes in whole or in part on or after December 31, 2015, at our option, at a redemption price equal to 100% of their principal amount, plus accrued and unpaid interest to the date of redemption. Proceeds from the December 2012 Notes issuance of \$146.1 million, after discounts, commissions, and expenses, were used for general corporate purposes. In January 2013, we received a BBB- rating on the December 2012 Notes.

On July 15, 2014, we sold in a registered underwritten public offering, \$300.0 million in aggregate principal amount of 4.250% senior notes due July 2024 (the “2014 Notes”). Interest on the 2014 Notes is payable semi-annually in arrears. We may redeem the 2014 Notes in whole or in part, at our option, at a redemption price equal to 100% of their principal amount, plus a “make-whole” premium and accrued and unpaid interest, if any, to the date of redemption. Proceeds from the 2014 Notes issuance of \$295.3 million, after discounts, commissions, and expenses, were used for general corporate purposes. In July 2014, we received a BBB- rating on the 2014 Notes.

Credit Rating

We believe our current rating depends upon a number of factors, including industry dynamics, operating and economic environment, operating results, operating margins, earnings trends and volatility, balance sheet composition,

liquidity and liquidity management, our capital structure, our overall risk management, business diversification, and our market share and competitive position in the markets in which we operate. Deteriorations in any of these factors could impact our credit rating. A reduction in our credit rating could adversely affect our liquidity and competitive position, increase our incremental borrowing costs, limit our access to the capital markets, or trigger our obligations under certain financial agreements. As such, we may not be able to successfully obtain additional outside financing to fund our operations on favorable terms, or at all.

We believe our existing assets, most of which are liquid in nature, together with the funds from operations, available informal short-term credit arrangements, and our ability to raise additional capital will provide sufficient resources to meet our present and anticipated financing needs.

Use of Capital Resources – On January 15, 2015 (the “redemption date”), we redeemed 100% of our company’s outstanding 6.70% Senior Notes due 2022. The redemption price was equal to the sum of the principal amount of the Notes outstanding and accrued and unpaid interest on the Notes up to, but not including, the redemption date.

On June 5, 2015, we completed the purchase of all of the outstanding shares of common stock of Sterne Agee Group, Inc. (“Sterne Agee”), a financial services firm that offers comprehensive wealth management and investment services to a diverse client base including financing corporations, municipalities and individual investors. The purchase was completed pursuant to the merger agreement dated February 23, 2015. We issued 1.4 million shares related to the purchase of Sterne Agee Group, Inc.

Upon the close of the acquisition, certain employees were granted restricted stock units of our company as retention. The fair value of the awards issued as retention was \$23.8 million. The fair value of the awards is based upon the closing price of our company’s common stock on the date of grant. There are no continuing service requirements associated with these restricted stock units, and accordingly were expensed at date of grant. This charge is included in compensation and benefits in the consolidated statement of operations for nine months ended September 30, 2015. In addition, we have paid \$33.8 million in the form of notes to associates for retention. These notes will be forgiven by a charge to compensation and benefits over a five- to ten-year period if the individual satisfies certain conditions, usually based on continued employment and certain performance standards.

On June 8, 2015, we entered into a definitive purchase agreement to acquire Barclays’ Wealth and Investment Management, Americas franchise in the U.S. The transaction is expected to close in the fourth quarter of 2015.

During the three months ended September 30, 2015, we repurchased \$65.9 million, or 1.5 million shares, at an average price of \$45.17 per share.

We have paid \$68.5 million in the form of upfront notes to financial advisors for transition pay through September 30, 2015. As we continue to take advantage of the opportunities created by market displacement and as competition for skilled professionals in the industry increases, we may decide to devote more significant resources to attracting and retaining qualified personnel. In addition, we have paid \$35.0 million in the form of notes to associates of acquired companies for retention during the nine months ended September 30, 2015.

We utilize transition pay, principally in the form of upfront demand notes, to aid financial advisors, who have elected to join our firm, to supplement their lost compensation while transitioning their customers’ accounts to the Stifel platform. The initial value of the notes is determined primarily by the financial advisors’ trailing production and assets under management. These notes are generally forgiven over a five- to ten-year period based on production. The future estimated amortization expense of the upfront notes, assuming current-year production levels and static growth for the remaining nine months in 2015 and the years ended December 31, 2016, 2017, 2018, 2019, and thereafter are \$16.3 million, \$56.1 million, \$43.5 million, \$35.7 million, \$28.7 million, and \$49.9 million, respectively. These estimates could change if we continue to grow our business through expansion or experience increased production levels.

We maintain several incentive stock award plans that provide for the granting of stock options, stock appreciation rights, restricted stock, performance awards, and stock units to our employees. Historically, we have granted stock units to our employees as part of our retention program. A stock unit represents the right to receive a share of common stock from our company at a designated time in the future without cash payment by the employee and is issued in lieu of cash incentive, principally for deferred compensation and employee retention plans. The restricted stock units generally vest over the next one to eight years after issuance and are distributed at predetermined future payable dates once vesting occurs. At September 30, 2015, the total number of stock units outstanding was 18.3 million, of which 13.2 million were unvested. At September 30, 2015, there was unrecognized compensation cost for stock units of \$315.5 million, which is expected to be recognized over a weighted-average period of 2.7 years.

The future estimated compensation expense of the unvested units, assuming current year forfeiture levels and static growth for the remaining three months in 2015 and the years ended December 31, 2016, 2017, 2018, 2019, and thereafter are \$23.7 million, \$83.9 million, \$71.1 million, \$55.7 million, \$37.1 million, and \$44.0 million,

respectively. These estimates could change if our forfeitures change from historical levels.

Net Capital Requirements – We operate in a highly regulated environment and are subject to capital requirements, which may limit distributions to our company from our subsidiaries. Distributions from our broker-dealer subsidiaries are subject to net capital rules. These subsidiaries have historically operated in excess of minimum net capital requirements. However, if distributions were to be limited in the future due to the failure of our subsidiaries to comply with the net capital rules or a change in the net capital rules, it could have a material and adverse effect to our company by limiting our operations that require intensive use of capital, such as underwriting or trading activities, or limit our ability to implement our business and growth strategies, pay interest on and repay the principal of our debt, and/or repurchase our common stock. Our non-broker-dealer subsidiary, Stifel Bank, is also subject to various regulatory capital requirements administered by the federal banking agencies. Our broker-dealer subsidiaries and Stifel Bank have consistently operated in excess of their capital adequacy requirements.

75

At September 30, 2015, Stifel had net capital of \$333.4 million, which was 50.6% of aggregate debit items and \$320.2 million in excess of its minimum required net capital. At September 30, 2015, all of our other broker-dealer subsidiaries' net capital exceeded the minimum net capital required under the SEC rule. At September 30, 2014, our international subsidiaries' capital and reserves were in excess of the financial resources requirement under the rules of the FCA. At September 30, 2015, Stifel Bank was considered well capitalized under the regulatory framework for prompt corrective action. See Note 20 of the Notes to Consolidated Financial Statements for details of our regulatory capital requirements.

Critical Accounting Policies and Estimates

In preparing our consolidated financial statements in accordance with U.S. generally accepted accounting principles and pursuant to the rules and regulations of the SEC, we make assumptions, judgments, and estimates that affect the reported amounts of assets, liabilities, revenues, and expenses, and related disclosures of contingent assets and liabilities. We base our assumptions, judgments, and estimates on historical experience and various other factors that we believe to be reasonable under the circumstances. Actual results could differ materially from these estimates under different assumptions or conditions. On a regular basis, we evaluate our assumptions, judgments, and estimates. We also discuss our critical accounting policies and estimates with the Audit Committee of the Board of Directors.

We believe that the assumptions, judgments, and estimates involved in the accounting policies described below have the greatest potential impact on our consolidated financial statements. These areas are key components of our results of operations and are based on complex rules that require us to make assumptions, judgments, and estimates, so we consider these to be our critical accounting policies. Historically, our assumptions, judgments, and estimates relative to our critical accounting policies and estimates have not differed materially from actual results.

For a full description of these and other accounting policies, see Note 2 of the Notes to Consolidated Financial Statements.

Valuation of Financial Instruments

We measure certain financial assets and liabilities at fair value on a recurring basis, including cash equivalents, trading securities owned, available-for-sale securities, investments, trading securities sold, but not yet purchased, and derivatives.

Trading securities owned and pledged and trading securities sold, but not yet purchased, are carried at fair value on the consolidated statements of financial condition, with unrealized gains and losses reflected on the consolidated statements of operations.

The fair value of a financial instrument is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, or an exit price. The degree of judgment used in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Financial instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices in active markets generally have more pricing observability and less judgment used in measuring fair value. Conversely, financial instruments rarely traded or not quoted have less pricing observability and are measured at fair value using valuation models that require more judgment. Pricing observability is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction, and overall market conditions generally.

When available, we use observable market prices, observable market parameters, or broker or dealer quotes (bid and ask prices) to derive the fair value of financial instruments. In the case of financial instruments transacted on recognized exchanges, the observable market prices represent quotations for completed transactions from the exchange on which the financial instrument is principally traded.

A substantial percentage of the fair value of our trading securities and other investments owned, trading securities pledged as collateral, and trading securities sold, but not yet purchased, are based on observable market prices, observable market parameters, or derived from broker or dealer prices. The availability of observable market prices and pricing parameters can vary from product to product. Where available, observable market prices and pricing or market parameters in a product may be used to derive a price without requiring significant judgment. In certain markets, observable market prices or market parameters are not available for all products, and fair value is determined using techniques appropriate for each particular product. These techniques involve some degree of judgment.

For investments in illiquid or privately held securities that do not have readily determinable fair values, the determination of fair value requires us to estimate the value of the securities using the best information available. Among the factors we consider in determining the fair value of investments are the cost of the investment, terms and liquidity, developments since the acquisition of the investment, the sales price of recently issued securities, the financial condition and operating results of the issuer, earnings trends and consistency

of operating cash flows, the long-term business potential of the issuer, the quoted market price of securities with similar quality and yield that are publicly traded, and other factors generally pertinent to the valuation of investments. In instances where a security is subject to transfer restrictions, the value of the security is based primarily on the quoted price of a similar security without restriction but may be reduced by an amount estimated to reflect such restrictions. The fair value of these investments is subject to a high degree of volatility and may be susceptible to significant fluctuation in the near term, and the differences could be material.

We have categorized our financial instruments measured at fair value into a three-level classification in accordance with Topic 820, "Fair Value Measurement and Disclosures." Fair value measurements of financial instruments that use quoted prices in active markets for identical assets or liabilities are generally categorized as Level 1, and fair value measurements of financial instruments that have no direct observable levels are generally categorized as Level 3. All other fair value measurements of financial instruments that do not fall within the Level 1 or Level 3 classification are considered Level 2. The lowest level input that is significant to the fair value measurement of a financial instrument is used to categorize the instrument and reflects the judgment of management.

Level 3 financial instruments have little to no pricing observability as of the report date. These financial instruments do not have active two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation. We have identified Level 3 financial instruments to include certain asset-backed securities, consisting of collateral loan obligation securities, that have experienced low volumes of executed transactions, certain corporate bonds and equity securities where there was less frequent or nominal market activity, investments in private equity funds, and auction rate securities for which the market has been dislocated and largely ceased to function. Our Level 3 asset-backed securities are valued using cash flow models that utilize unobservable inputs. Level 3 corporate bonds are valued using prices from comparable securities. Equity securities with unobservable inputs are valued using management's best estimate of fair value, where the inputs require significant management judgment. Auction rate securities are valued based upon our expectations of issuer redemptions and using internal models.

At September 30, 2015, Level 3 assets for which we bear economic exposure were \$116.3 million or 6.7% of the total assets measured at fair value.

At September 30, 2015, Level 3 assets included the following: \$57.5 million of auction rate securities and \$58.8 million of private equity, municipal securities, and other fixed income securities.

Investments in Partnerships

Investments in partnerships and other investments include our general and limited partnership interests in investment partnerships and direct investments in non-public companies. These interests are carried at estimated fair value. The net assets of investment partnerships consist primarily of investments in non-marketable securities. The underlying investments held by such partnerships and direct investments in non-public companies are valued based on estimated fair value ultimately determined by us in our capacity as general partner or investor and, in the case of an investment in an unaffiliated investment partnership, are based on financial statements prepared by an unaffiliated general partner. Due to the inherent uncertainty of valuation, fair values of these non-marketable investments may differ from the values that would have been used had a ready market existed for these investments, and the differences could be material. Increases and decreases in estimated fair value are recorded based on underlying information of these non-public company investments, including third-party transactions evidencing a change in value, market comparable, operating cash flows and financial performance of the companies, trends within sectors and/or regions, underlying business models, expected exit timing and strategy, and specific rights or terms associated with the investment, such as conversion features and liquidation preferences. In cases where an estimate of fair value is determined based on financial statements prepared by an unaffiliated general partner, such financial statements are generally unaudited

other than audited year-end financial statements. Upon receipt of audited financial statements from an investment partnership, we adjust the fair value of the investments to reflect the audited partnership results if they differ from initial estimates. We also perform procedures to evaluate fair value estimates provided by unaffiliated general partners. At September 30, 2015, we had commitments to invest in affiliated and unaffiliated investment partnerships of \$11.4 million. These commitments are generally called as investment opportunities are identified by the underlying partnerships. These commitments may be called in full at any time.

The investment partnerships in which we are general partner may allocate carried interest and make carried interest distributions, which represent an additional allocation of net realized and unrealized gains to the general partner if the partnerships' investment performance reaches a threshold as defined in the respective partnership agreements. These allocations are recognized in revenue as realized and unrealized gains and losses on investments in partnerships. Our recognition of allocations of carried interest gains and losses from the investment partnerships in revenue is not adjusted to reflect expectations about future performance of the partnerships.

As the investment partnerships realize proceeds from the sale of their investments, they may make cash distributions as provided for in the partnership agreements. Distributions that result from carried interest may subsequently become subject to claw back if the fair

value of private equity partnership assets subsequently decreases in fair value. To the extent these decreases in fair value and allocated losses exceed our capital account balance, a liability is recorded by us. These liabilities for claw back obligations are not required to be paid to the investment partnerships until the dissolution of such partnerships, and are only required to be paid if the cumulative amounts actually distributed exceed the amount due based on the cumulative operating results of the partnerships.

We earn fees from the investment partnerships that we manage or of which we are a general partner. Such management fees are generally based on the net assets or committed capital of the underlying partnerships. We have agreed, in certain cases, to waive management fees, in lieu of making a cash contribution, in satisfaction of our general partner investment commitments to the investment partnerships. In these cases, we generally recognize our management fee revenues at the time when we are allocated a special profit interest in realized gains from these partnerships.

Contingencies

We are involved in various pending and potential legal proceedings related to our business, including litigation, arbitration, and regulatory proceedings. Some of these matters involve claims for substantial amounts, including claims for punitive damages. We have, after consultation with outside legal counsel and consideration of facts currently known by management, recorded estimated losses in accordance with Topic 450 (“Topic 450”), “Contingencies,” to the extent that claims are probable of loss and the amount of the loss can be reasonably estimated. The determination of these reserve amounts requires us to use significant judgment, and our final liabilities may ultimately be materially different. This determination is inherently subjective, as it requires estimates that are subject to potentially significant revision as more information becomes available and due to subsequent events. In making these determinations, we consider many factors, including, but not limited to, the loss and damages sought by the plaintiff or claimant, the basis and validity of the claim, the likelihood of a successful defense against the claim, and the potential for, and magnitude of, damages or settlements from such pending and potential litigation and arbitration proceedings, and fines and penalties or orders from regulatory agencies. See Item 3, “Legal Proceedings,” in Part I of this report for information on our legal, regulatory, and arbitration proceedings.

Allowance for Loan Losses

We regularly review the loan portfolio and have established an allowance for loan losses for inherent losses estimated to have occurred in the loan portfolio through a provision for loan losses charged to income. In providing for the allowance for loan losses, we consider historical loss experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower’s ability to repay, estimated value of any underlying collateral, and prevailing economic conditions. This evaluation is inherently subjective, as it requires estimates that are susceptible to significant revision as more information becomes available.

A loan is considered impaired when, based on current information and events, it is probable that the scheduled payments of principal or interest when due, according to the contractual terms of the loan agreement, will not be collectible. Factors considered in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. We determine the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower’s prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Once a loan is determined to be impaired, when principal or interest becomes 90 days past due or when collection becomes uncertain, the accrual of interest and amortization of deferred loan origination fees is discontinued

(“non-accrual status”), and any accrued and unpaid interest income is reversed. Loans placed on non-accrual status are returned to accrual status when all delinquent principal and interest payments are collected and the collectability of future principal and interest payments is reasonably assured. Loan losses are charged against the allowance when we believe the uncollectibility of a loan balance is certain. Subsequent recoveries, if any, are credited to the allowance for loan loss.

Large groups of smaller balance homogenous loans are collectively evaluated for impairment. Accordingly, we do not separately identify individual consumer and residential loans for impairment measurements. Impairment is measured on a loan-by-loan basis for non-homogeneous loans, and a specific allowance is established for individual loans determined to be impaired. Impairment is measured by comparing the carrying value of the impaired loan to the present value of its expected cash flow discounted at the loan’s effective interest rate, the loan’s observable market price, or the fair value of the collateral if the loan is collateral dependent.

Derivative Instruments and Hedging Activities

Our derivative instruments are carried on the consolidated statement of financial condition at fair value. We utilize these derivative instruments to minimize significant unplanned fluctuations in earnings caused by interest rate volatility. Our company’s goal is to manage sensitivity to changes in rates by offsetting the repricing or maturity characteristics of certain assets and liabilities, thereby

limiting the impact on earnings. The use of derivative instruments does expose our company to credit and market risk. We manage credit risk through strict counterparty credit risk limits and/or collateralization agreements. At inception, we determine if a derivative instrument meets the criteria for hedge accounting under Topic 815, “Derivatives and Hedging.” Ongoing effectiveness evaluations are made for instruments that are designated and qualify as hedges. If the derivative does not qualify for hedge accounting, no assessment of effectiveness is needed.

Income Taxes

The provision for income taxes and related tax reserves is based on our consideration of known liabilities and tax contingencies for multiple taxing authorities. Known liabilities are amounts that will appear on current tax returns, amounts that have been agreed to in revenue agent revisions as the result of examinations by the taxing authorities, and amounts that will follow from such examinations but affect years other than those being examined. Tax contingencies are liabilities that might arise from a successful challenge by the taxing authorities taking a contrary position or interpretation regarding the application of tax law to our tax return filings. Factors considered in estimating our liability are results of tax audits, historical experience, and consultation with tax attorneys and other experts.

Topic 740 (“Topic 740”), “Income Taxes,” clarifies the accounting for uncertainty in income taxes recognized in an entity’s financial statements and prescribed recognition threshold and measurement attributes for financial statement disclosure of tax positions taken or expected to be taken on a tax return. The impact of an uncertain income tax position on the income tax return must be recognized at the largest amount that is more likely than not to be sustained upon audit by the relevant taxing authority. An uncertain income tax position will not be recognized if it has less than a 50% likelihood of being sustained. Additionally, Topic 740 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

Goodwill and Intangible Assets

Under the provisions of Topic 805, “Business Combinations,” we record all assets and liabilities acquired in purchase acquisitions, including goodwill and other intangible assets, at fair value. Determining the fair value of assets and liabilities requires certain estimates.

In accordance with Topic 350, “Intangibles – Goodwill and Other,” indefinite-life intangible assets and goodwill are not amortized. Rather, they are subject to impairment testing on an annual basis, or more often if events or circumstances indicate there may be impairment. This test involves assigning tangible assets and liabilities as well as identified intangible assets and goodwill to reporting units and comparing the fair value of each reporting unit to its carrying amount. If the fair value is less than the carrying amount, a further test is required to measure the amount of the impairment. We have elected to test for goodwill impairment in the third quarter of each calendar year.

We test goodwill for impairment on an annual basis and on an interim basis when certain events or circumstances exist. We test for impairment at the reporting unit level, which is generally at the level of or one level below our company’s business segments. For both the annual and interim tests, we have the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, we determine it is more likely than not that the fair value of a reporting unit is greater than its carrying amount, then performing the two-step impairment test is not required. However, if we conclude otherwise, we are then required to perform the first step of the two-step impairment test. Goodwill impairment is determined by comparing the estimated fair value of a reporting unit with its respective carrying value. If the estimated fair value exceeds the carrying value, goodwill at the reporting unit level is not deemed to be impaired. If the estimated fair value is below carrying value, however, further analysis is required to determine the amount of the impairment. Additionally, if the carrying value of a reporting unit is zero or a negative value and it is determined that it is more

likely than not the goodwill is impaired, further analysis is required. The estimated fair values of the reporting units are derived based on valuation techniques we believe market participants would use for each of the reporting units. Our annual goodwill impairment testing was completed as of July 31, 2015, with no impairment identified.

The goodwill impairment test requires us to make judgments in determining what assumptions to use in the calculation. Assumptions, judgments, and estimates about future cash flows and discount rates are complex and often subjective. They can be affected by a variety of factors, including, among others, economic trends and market conditions, changes in revenue growth trends or business strategies, unanticipated competition, discount rates, technology, or government regulations. In assessing the fair value of our reporting units, the volatile nature of the securities markets and industry requires us to consider the business and market cycle and assess the stage of the cycle in estimating the timing and extent of future cash flows. In addition to discounted cash flows, we consider other information, such as public market comparables and multiples of recent mergers and acquisitions of similar businesses. Although we believe the assumptions, judgments, and estimates we have made in the past have been reasonable and appropriate, different assumptions, judgments, and estimates could materially affect our reported financial results.

Identifiable intangible assets, which are amortized over their estimated useful lives, are tested for potential impairment whenever events or changes in circumstances suggest that the carrying value of an asset or asset group may not be fully recoverable.

Recent Accounting Pronouncements

See Note 2 of the Notes to Consolidated Financial Statements for information regarding the effect of new accounting pronouncements on our consolidated financial statements.

Off-Balance Sheet Arrangements

Information concerning our off-balance sheet arrangements is included in Note 23 of the Notes to Consolidated Financial Statements. Such information is hereby incorporated by reference.

Contractual Obligations

Our contractual obligations have not materially changed from those reported in our Annual Report on Form 10-K for the year ended December 31, 2014.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Risk Management

Risks are an inherent part of our business and activities. Management of these risks is critical to our soundness and profitability. Risk management at our company is a multi-faceted process that requires communication, judgment, and knowledge of financial products and markets. Our senior management group takes an active role in the risk management process and requires our business units to assist in the identification, assessment, monitoring, and control of various risks. The principal risks involved in our business activities are: market (interest rates and equity prices), credit, operational, and regulatory and legal.

We have adopted policies and procedures concerning Enterprise Risk Management. The Corporate Governance Committee of the Board of Directors, in exercising its oversight of management's activities, conducts periodic reviews and discussions with management regarding the guidelines and policies governing the processes by which risk assessment and risk management are handled.

Market Risk

The potential for changes in the value of financial instruments owned by our company resulting from changes in interest rates and equity prices is referred to as "market risk." Market risk is inherent to financial instruments, and accordingly, the scope of our market risk management procedures includes all market risk-sensitive financial instruments.

We trade tax-exempt and taxable debt obligations, including U.S. treasury bills, notes, and bonds; U.S. government agency and municipal notes and bonds; bank certificates of deposit; mortgage-backed securities; and corporate obligations. We are also an active market maker in over-the-counter equity securities. In connection with these activities, we may maintain inventories in order to ensure availability and to facilitate customer transactions.

Changes in value of our financial instruments may result from fluctuations in interest rates, credit ratings, equity prices, and the correlation among these factors, along with the level of volatility.

We manage our trading businesses by product and have established trading departments that have responsibility for each product. The trading inventories are managed with a view toward facilitating client transactions, considering the risk and profitability of each inventory position. Position limits in trading inventory accounts are established by our ERM department and monitored on a daily basis within the business units. We monitor inventory levels and results of the trading departments, as well as inventory aging, pricing, concentration, securities ratings, and risk sensitivities.

We are also exposed to market risk based on our other investing activities. These investments consist of investments in private equity partnerships, start-up companies, venture capital investments, and zero coupon U.S. government securities and are included under the caption "Investments" on the consolidated statements of financial condition.

Interest Rate Risk

We are exposed to interest rate risk as a result of maintaining inventories of interest rate-sensitive financial instruments and from changes in the interest rates on our interest-earning assets (including client loans, stock borrow activities, investments, inventories, and resale agreements) and our funding sources (including client cash balances, stock lending activities, bank borrowings, and repurchase agreements), which finance these assets. The collateral underlying financial instruments at the broker-dealer is repriced daily, thus requiring collateral to be delivered as necessary. Interest rates on client balances and stock borrow and lending produce a positive spread to our company, with the rates generally fluctuating in parallel.

We manage our inventory exposure to interest rate risk by setting and monitoring limits and, where feasible, hedging with offsetting positions in securities with similar interest rate risk characteristics. While a significant portion of our securities inventories have contractual maturities in excess of five years, these inventories, on average, turn over several times per year.

Additionally, we monitor, on a daily basis, the Value-at-Risk (“VaR”) in our trading portfolios using a ten-day horizon and report VaR at a 99% confidence level. VaR is a statistical technique used to estimate the probability of portfolio losses based on the statistical analysis of historical price trends and volatility. This model assumes that historical changes in market conditions are representative of future changes, and trading losses on any given day could exceed the reported VaR by significant amounts in unusually volatile markets. Further, the model involves a number of assumptions and inputs. While we believe that the assumptions and inputs we use in our risk model are reasonable, different assumptions and inputs could produce materially different VaR estimates.

The following table sets forth the high, low, and daily average VaR for our trading portfolios during the three months ended September 30, 2015, and the daily VaR at September 30, 2015 and December 31, 2014 (in thousands):

	Three Months Ended September 30,			VAR Calculation at	
			Daily	December September 30,	December 31,
	High	Low	Average	2015	2014
Daily VaR	\$7,530	\$4,319	\$5,774	\$5,231	\$3,340

Stifel Bank’s interest rate risk is principally associated with changes in market interest rates related to residential, consumer, and commercial lending activities, as well as FDIC-insured deposit accounts to customers of our broker-dealer subsidiaries and to the general public.

Our primary emphasis in interest rate risk management for Stifel Bank is the matching of assets and liabilities of similar cash flow and repricing time frames. This matching of assets and liabilities reduces exposure to interest rate movements and aids in stabilizing positive interest spreads. Stifel Bank has established limits for acceptable interest rate risk and acceptable portfolio value risk. To ensure that Stifel Bank is within the limits established for net interest margin, an analysis of net interest margin based on various shifts in interest rates is prepared each quarter and presented to Stifel Bank’s Board of Directors. Stifel Bank utilizes a third-party model to analyze the available data.

The following table illustrates the estimated change in net interest margin at September 30, 2015, based on shifts in interest rates of up to positive 200 basis points and negative 200 basis points:

	Projected change in net interest margin	
Hypothetical change in interest rates		
+200	10.1	%
+100	5.4	%
0	0.00	%
-100	-14.99	%
-200	-26.06	%

The following GAP Analysis table indicates Stifel Bank's interest rate sensitivity position at September 30, 2015 (in thousands):

	Repricing Opportunities			
	Repricing Opportunities	7-12 Months	1-5 Years	5+ Years
Interest-earning assets:				
Loans	\$1,804,375	\$632,508	\$250,007	\$54,416
Securities	793,595	86,273	559,593	345,346
Interest-bearing cash	9,067	-	-	-
	\$2,607,037	\$718,781	\$809,600	\$399,762
Interest-bearing liabilities:				
Transaction accounts and savings	3,358,536	127,995	575,885	27,745
Certificates of deposit	11,900	6,839	4,462	-
Borrowings	96,000	-	-	16,527
	\$3,466,436	\$134,834	\$580,347	\$44,272
GAP	\$(859,399)	\$583,947	\$229,253	\$355,490
Cumulative GAP	\$(859,399)	\$(275,452)	\$(46,199)	\$309,291

We maintain a risk management strategy that incorporates the use of derivative instruments to minimize significant unplanned fluctuations in earnings caused by interest rate volatility. Our goal is to manage sensitivity to changes in rates by hedging the maturity characteristics of Fed funds-based affiliated deposits, thereby limiting the impact on earnings. By using derivative instruments, we are exposed to credit and market risk on those derivative positions. We manage the market risk associated with interest rate contracts by establishing and monitoring limits as to the types and degree of risk that may be undertaken. Our interest rate hedging strategies may not work in all market environments and, as a result, may not be effective in mitigating interest rate risk.

Equity Price Risk

We are exposed to equity price risk as a consequence of making markets in equity securities. We attempt to reduce the risk of loss inherent in our inventory of equity securities by monitoring those security positions constantly throughout each day.

Our equity securities inventories are repriced on a regular basis, and there are no unrecorded gains or losses. Our activities as a dealer are client-driven, with the objective of meeting clients' needs while earning a positive spread.

Credit Risk

We are engaged in various trading and brokerage activities, with the counterparties primarily being broker-dealers. In the event counterparties do not fulfill their obligations, we may be exposed to risk. The risk of default depends on the creditworthiness of the counterparty or issuer of the instrument. We manage this risk by imposing and monitoring position limits for each counterparty, monitoring trading counterparties, conducting regular credit reviews of financial counterparties, reviewing security concentrations, holding and marking to market collateral on certain transactions, and conducting business through clearing organizations, which guarantee performance.

Our client activities involve the execution, settlement, and financing of various transactions on behalf of our clients. Client activities are transacted on either a cash or margin basis. Credit exposure associated with our private client business consists primarily of customer margin accounts, which are monitored daily and are collateralized. We monitor exposure to industry sectors and individual securities and perform analyses on a regular basis in connection with our margin lending activities. We adjust our margin requirements if we believe our risk exposure is not appropriate based on market conditions.

We have accepted collateral in connection with resale agreements, securities borrowed transactions, and customer margin loans. Under many agreements, we are permitted to sell or repledge these securities held as collateral and use these securities to enter into securities lending arrangements or to deliver to counterparties to cover short positions. At September 30, 2015, the fair value of securities accepted as collateral where we are permitted to sell or repledge the securities was \$1.1 billion, and the fair value of the collateral that had been sold or repledged was \$106.9 million.

By using derivative instruments, we are exposed to credit and market risk on those derivative positions. Credit risk is equal to the fair value gain in a derivative, if the counterparty fails to perform. When the fair value of a derivative contract is positive, this generally indicates that the counterparty owes our company and, therefore, creates a repayment risk for our company. When the fair value of a derivative contract is negative, we owe the counterparty and, therefore, have no repayment risk. We minimize the credit (or repayment) risk in derivative instruments by entering into transactions with high-quality counterparties that are reviewed periodically by senior management.

Stifel Bank extends credit to individual and commercial borrowers through a variety of loan products, including residential and commercial mortgage loans, home equity loans, construction loans, and non-real-estate commercial and consumer loans. Bank loans are generally collateralized by real estate, real property, or other assets of the borrower. Stifel Bank's loan policy includes criteria to adequately underwrite, document, monitor, and manage credit risk. Underwriting requires reviewing and documenting the fundamental characteristics of credit, including character, capacity to service the debt, capital, conditions, and collateral. Benchmark capital and coverage ratios are utilized, which include liquidity, debt service coverage, credit, working capital, and capital to asset ratios. Lending limits are established to include individual, collective, committee, and board authority. Monitoring credit risk is accomplished through defined loan review procedures, including frequency and scope.

We are subject to concentration risk if we hold large positions, extend large loans to, or have large commitments with a single counterparty, borrower, or group of similar counterparties or borrowers (i.e., in the same industry). Securities purchased under agreements to resell consist of securities issued by the U.S. government or its agencies. Receivables from and payables to clients and stock borrow and lending activities, both with a large number of clients and counterparties, and any potential concentration is carefully monitored. Stock borrow and lending activities are executed under master netting agreements, which gives our company right of offset in the event of counterparty default. Inventory and investment positions taken and commitments made, including underwritings, may involve exposure to individual issuers and businesses. We seek to limit this risk through careful review of counterparties and borrowers and the use of limits established by our senior management group, taking into consideration factors including the financial strength of the counterparty, the size of the position or commitment, the expected duration of the position or commitment, and other positions or commitments outstanding.

Operational Risk

Operational risk generally refers to the risk of loss resulting from our operations, including, but not limited to, improper or unauthorized execution and processing of transactions, deficiencies in our technology or financial operating systems, and inadequacies or breaches in our control processes. We operate different businesses in diverse markets and are reliant on the ability of our employees and systems to process a large number of transactions. These risks are less direct than credit and market risk, but managing them is critical, particularly in a rapidly changing environment with increasing transaction volumes. In the event of a breakdown or improper operation of systems or improper action by employees, we could suffer financial loss, regulatory sanctions, and damage to our reputation. In order to mitigate and control operational risk, we have developed policies and procedures that are designed to identify and manage operational risk at appropriate levels throughout the organization and within such departments as Accounting, Operations, Information Technology, Legal, Compliance, and Internal Audit. These control mechanisms attempt to ensure that operational policies and procedures are being followed and that our various businesses are operating within established corporate policies and limits. Business continuity plans exist for critical systems, and redundancies are built into the systems as deemed appropriate.

Regulatory and Legal Risk

Legal risk includes the risk of private client group customer claims for sales practice violations. While these claims may not be the result of any wrongdoing, we do, at a minimum, incur costs associated with investigating and

defending against such claims. See further discussion on our legal reserves policy under “Critical Accounting Policies and Estimates” in Item 7, Part II and “Legal Proceedings” in Item 3, Part I of this report. In addition, we are subject to potentially sizable adverse legal judgments or arbitration awards, and fines, penalties, and other sanctions for non-compliance with applicable legal and regulatory requirements. We are generally subject to extensive regulation by the SEC, FINRA, and state securities regulators in the different jurisdictions in which we conduct business. As a bank holding company, we are subject to regulation by the Federal Reserve. Stifel Bank is subject to regulation by the FDIC. As a result, we are subject to a risk of loss resulting from failure to comply with banking laws. Our international subsidiaries, SNEL and Oriel, are subject to the regulatory supervision and requirements of the FCA in the United Kingdom. We have comprehensive procedures addressing issues such as regulatory capital requirements, sales and trading practices, use of and safekeeping of customer funds, the extension of credit, including margin loans, collection activities, money laundering, and record keeping. We act as an underwriter or selling group member in both equity and fixed income product offerings. Particularly when acting as lead or co-lead manager, we have potential legal exposure to claims relating to these securities offerings. To manage this exposure, a committee of senior executives review proposed underwriting commitments to assess the quality of the offering and the adequacy of due diligence investigation.

Our company, as a bank and financial holding company, is subject to regulation, including capital requirements, by the Federal Reserve. Stifel Bank is subject to various regulatory capital requirements administered by the Federal Deposit Insurance Corporation ("FDIC") and state banking authorities. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on our company's and Stifel Bank's financial statements.

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, an evaluation was carried out by Stifel Financial Corp.'s management with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and procedures were effective as of the end of the period covered by this report. In addition, no change in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended) occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Please see our discussion set forth under Item 3. "Legal Proceedings" in our Annual Report on Form 10-K for the year ended December 31, 2014 and Item 1. in our Form 10-Q for the quarter ended March 31, 2015.

ITEM 1A. RISK FACTORS

The discussion of our business and operations should be read together with the risk factors contained in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2014 filed with the SEC. These risk factors describe various risks and uncertainties to which we are or may become subject. These risks and uncertainties have the potential to affect our business, financial condition, results of operations, cash flows, strategies or prospects in a material and adverse manner.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following tables sets forth information with respect to purchases made by or on behalf of Stifel Financial Corp. or any "affiliated purchaser" (as defined in Rule 10b-10(a)(3) under the Securities Exchange Act of 1934, as amended), of our common stock during the quarter ended September 30, 2015.

Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publically	Maximum Number of Shares That May Yet be Purchased
---	--	--	---

Edgar Filing: STIFEL FINANCIAL CORP - Form 10-Q

			Announced Plans	Under the Plan or Program
July 1 - 31, 2015	-	-	-	3,527,235
August 1 - 31, 2015	237,000	45.88	237,000	3,290,235
September 1 - 30, 2015	1,221,000	45.03	1,221,000	2,069,235
	1,458,000	45.17	1,458,000	

We have on ongoing authorization from the Board of Directors to repurchase our common stock in the open market or in negotiated transactions. At September 30, 2015, the maximum number of shares that may yet be purchased under this plan was 2.1 million. On November 3, 2015, the Board of Directors authorized the repurchase of an additional 5.0 million shares.

ITEM 6. EXHIBITS

Exhibit No.	Description
11.1	Statement Re: Computation of per Share Earnings (The calculation of per share earnings is included in Part I, Item 1 in the Notes to Consolidated Financial Statements (Earnings Per Share) and is omitted here in accordance with Section (b)(11) of Item 601 of Regulation S-K).
31.1	Rule 13a-14(a) Certification of Chief Executive Officer.
31.2	Rule 13a-14(a) Certification of Chief Financial Officer.
32.1	Section 1350 Certification of Chief Executive Officer.*
32.2	Section 1350 Certification of Chief Financial Officer.*
101.INS	Interactive Data Files Pursuant to Rule 405 of Regulation S-T: (i) Consolidated Statements of Financial Condition as of September 30, 2015 and December 31, 2014; (ii) Consolidated Statements of Operations for the three and nine months ended September 30, 2015 and 2014; (iii) Consolidated Statements of Comprehensive Income for the three and nine months ended September 30, 2015 and 2014; (v) Consolidated Statements of Cash Flows for the nine months ended September 30, 2015 and 2014; and (vi) Notes to Consolidated Financial Statements.

*The certifications attached as Exhibits 32.1 and 32.2 that accompany this Quarterly Report on Form 10-Q, are not deemed filed with the Securities and Exchange Commission and are not to be incorporated by reference into any filing of Stifel Financial Corp. under the Securities Act of 1933, as amended, or the Securities Act of 1934, as amended, whether made before or after the date of this Form 10-Q, irrespective of any general incorporation language contained in such filing.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
