UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

☐ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended September 30, 2015

or

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 001-08007

REAL INDUSTRY, INC.

(Exact Name of Registrant as Specified in its Charter)

Delaware
(State or Other Jurisdiction of

Incorporation or Organization)

15301 Ventura Boulevard, Suite 400

Sherman Oaks, California 91403
(Address of Principal Executive Offices)(Zip Code)

46-3783818
(I.R.S. Employer

Identification Number)

(805) 435-1255

(Registrant's Telephone Number, including Area Code)

Edgar Filing: Real Industry, Inc. - Form 10-Q

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by checkmark whether the Registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Securities Exchange Act of 1934.

Large Accelerated Filer

Accelerated Filer

Non-Accelerated Filer (Do not check if a smaller reporting company) Smaller Reporting Company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes No

Indicate by check mark whether the Registrant has filed all documents and reports required to be filed by Section 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court. Yes No

As of November 1, 2015, there were 28,891,766 shares of the Registrant’s common stock outstanding.

REAL INDUSTRY, INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1—BUSINESS AND OPERATIONS

Real Industry, Inc. (“Real Industry,” the “Company,” “we,” “us” or “our”), formerly known as Signature Group Holding, Inc., a holding company that owns all of the outstanding interests of its two primary operating companies, Real Alloy Intermediate Holding, LLC (“Real Alloy Parent”) and SGGH, LLC (“SGGH”). Management expects to grow the Company through acquisitions, as well as through organic efforts within existing operations described below. Our current business strategy seeks to leverage our public company status, considerable federal net operating tax loss carryforwards (“NOLs”) and the experience of our executive management team to acquire operating businesses at prices and on terms that are aligned with our growth plans.

During the first quarter of 2015, the Company underwent a considerable transformation. On January 9, 2015, we completed the sale of North American Breaker Co., LLC (“NABCO”), previously the primary business within SGGH. On February 27, 2015, we acquired the global recycling and specification alloys business (the “Real Alloy Business”) of Aleris Corporation (“Aleris”) (the “Real Alloy Acquisition”). A portion of the proceeds of the sale of NABCO were used to fund the Real Alloy Acquisition.

The Real Alloy Business, operating under Real Alloy Parent through its wholly owned subsidiary Real Alloy Holding, Inc. (“Real Alloy”), is a global leader in third-party aluminum recycling, which includes the processing of scrap aluminum and by-products and the manufacturing of wrought, cast and specification or foundry alloys. Real Alloy offers a broad range of products and services to wrought alloy processors, automotive original equipment manufacturers, and foundries and casters. Real Alloy’s customers include companies that participate in or sell to the automotive, consumer packaging, steel and durable goods, aerospace, and building and construction industries. Real Alloy processes scrap aluminum and by-products and delivers recycled metal in liquid or solid form according to customer specifications. Real Alloy’s facilities are capable of processing industrial (new) scrap, post-consumer (old/obsolete) scrap, and various aluminum by-products, providing a great degree of flexibility in reclaiming high-quality recycled aluminum. Real Alloy currently operates twenty-four facilities strategically located throughout North America and Europe and, as of September 30, 2015, had approximately 1,700 employees.

The closing of the Real Alloy Acquisition was the culmination of a series of equity and debt financing transactions that began in the fourth quarter of 2014, raising the capital required to fund the Real Alloy Acquisition and pay transaction costs as summarized below (collectively, the “Financings”):

- In October 2014, Real Industry issued 0.3 million shares of common stock at \$10.00 per share to accredited investors in a private placement exempt from registration under the Securities Act of 1933, as amended (the “Securities Act”), providing gross proceeds of \$3.0 million, which were used to fund a portion of the Real Alloy Acquisition;
- In December 2014, Real Industry issued approximately 4.4 million shares of common stock at \$6.50 per share in an underwritten public offering providing gross proceeds of \$28.5 million, which were used to fund a portion of the Real Alloy Acquisition;
- In January 2015, Real Alloy, as successor to SGH Escrow Corporation (“SGH Escrow”), issued \$305.0 million in senior secured notes due January 15, 2019 (the “Senior Secured Notes”) at a price of 97.206% of the principal amount, providing gross proceeds of \$296.5 million, which were used to fund a portion of the Real Alloy Acquisition;
- In February 2015, Real Industry issued approximately 9.8 million shares of common stock to existing common stockholders in a stapled rights offering (the “Rights Offering”), providing gross proceeds of \$55.0 million, of which \$50.0 million was used to fund a portion of the Real Alloy Acquisition;

- In February 2015, the U.S., Canadian and German operating subsidiaries of Real Alloy entered into new credit facilities, including a \$110.0 million asset-based lending facility (the “Asset-Based Facility”) secured by assets of certain of Real Alloy’s North American subsidiaries, and a €50.0 million factoring facility (the “Factoring Facility”) for the purchase of eligible accounts receivable of Real Alloy’s German operations. The initial draws on the Asset-Based Facility and Factoring Facility provided gross proceeds of \$59.5 million and €25.0 million (\$28.0 million), respectively, of which \$73.5 million was used to fund a portion of the Real Alloy Acquisition and approximately \$14.0 million was drawn for operating purposes; and
- In February 2015, Real Industry issued 25,000 shares, at a \$1,000 liquidation preference per share, of a new series of non-participating preferred stock (the “Redeemable Preferred Stock”) to Aleris, as a portion of the purchase price for the Real Alloy Acquisition.

Additionally, Real Industry issued approximately 0.8 million shares of common stock to existing holders of warrants to purchase common stock in April 2015, as the final component of the Rights Offering launched in January 2015, which provided gross proceeds of \$4.8 million.

Edgar Filing: Real Industry, Inc. - Form 10-Q

On April 21, 2015, our common stock began trading on the Nasdaq Stock Exchange (“NASDAQ”) under the symbol “RELY” as part of the NASDAQ Global Select Market. On May 28, 2015, our stockholders approved an amendment to our charter to change our name to Real Industry, Inc. In June 2015, Real Industry became a member of the Russell Global®, Russell 3000® and Russell Microcap® indexes.

In June 2015, Real Industry commenced a controlled equity offering program, pursuant to which it issued approximately 0.2 million shares and 0.5 million shares of common stock in June and July, respectively, providing gross proceeds of \$2.7 million and \$5.5 million, respectively.

As a result of the transformative nature of the acquisition, divestiture and financing activities described above, our operations in 2015 have been and will be substantially different from that reported in the previous periods covered by this Quarterly Report on Form 10-Q (the “Report”). See Note 13—Segment Information for additional information about our reportable segments.

The assets and liabilities and results of operations of NABCO are included in discontinued operations for all periods presented as a result of its sale in the first quarter of 2015. Discontinued operations also includes certain assets and liabilities related to the former businesses of SGGH, then known as Fremont General Corporation (“Fremont”) and its primary operating subsidiary, Fremont Investment & Loan (“FIL”).

NOTE 2—FINANCIAL STATEMENT PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

The accompanying unaudited condensed consolidated financial statements comprise the accounts of Real Industry, its wholly owned and majority owned subsidiaries, and have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments, consisting of normal recurring adjustments considered necessary for a fair presentation, have been included. The Company evaluates subsequent events through the date of filing with the Securities and Exchange Commission (“SEC”). Operating results for the three and nine months ended September 30, 2015 are not indicative of the results that may be expected for the year ending December 31, 2015, as a result of the gain on sale associated with the NABCO sale, only seven months of operating performance of Real Alloy in the nine months ended September 30, 2015, the effects of purchase accounting, and acquisition costs associated with the Real Alloy Acquisition. These interim period unaudited condensed consolidated financial statements should be read in conjunction with the Company’s audited consolidated financial statements as of and for the year ended December 31, 2014, which are included in the Company’s Annual Report on Form 10-K, as filed with the SEC on March 16, 2015 (the “Annual Report”) and the Company’s recast 2014 audited consolidated financial statements (reflecting NABCO as a discontinued operation), which are included in the Company’s Current Report on Form 8-K filed with the SEC on October 6, 2015.

Certain amounts in the accompanying unaudited condensed consolidated financial statements have been reclassified to conform to the current presentation, including the classification of NABCO as a discontinued operation.

The Company’s significant accounting policies are disclosed in the consolidated financial statements included in Part IV, Item 15 of the Annual Report, which, as a result of the Real Alloy Acquisition, now include the following new and modified significant accounting policies.

Revenue recognition and shipping and handling costs

Revenues are recognized when title transfers and the risk of loss passes to the customer. This typically occurs when the goods reach their destination, depending on individual shipping terms. For customer-owned toll material, revenue is recognized upon the performance of the tolling service for the customers. For material that is consigned, revenue is not recognized until the product is used by the customer. Shipping and handling costs are included within cost of sales in the unaudited condensed consolidated statements of operations included elsewhere in this Report.

Accounts receivable allowances and credit risk

Credit is extended to our customers based on an evaluation of their financial condition; generally, collateral is not required. We maintain an allowance against our accounts receivable for the estimated probable losses on uncollectible accounts and sales returns and allowances. The allowance is based upon our historical loss experience, current economic conditions within the industries we serve as well as our determination of the specific risk related to certain customers. Accounts receivable are charged off against the reserve when, in management's estimation, further collection efforts would not result in a reasonable likelihood of receipt, or later as proscribed by statutory regulations.

Financing receivable

A subsidiary of Real Alloy has an agreement to sell certain of its accounts receivable in Europe. Agreements that result in true sales of the transferred receivables, as defined in Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 860, Transfers and Servicing, which occur when receivables are transferred to a purchaser, without recourse to the Company, are reported as financing receivable in the unaudited condensed consolidated balance sheets until proceeds from such sales are received from the counterparty, and represents a Level 2 measurement in the fair value hierarchy. Cash proceeds received from such sales are included in operating cash flows.

The transferred receivables are isolated from the Real Alloy subsidiary’s accounts, as debtors pay into a segregated escrow account maintained by the counterparty. The subsidiary maintains continuing involvement with the transferred receivables through limited servicing obligations, primarily related to recordkeeping. The subsidiary retains no right to the receivables, or associated collateral, and does not collect a servicing fee. Following transfer, the Company has no further rights to receive any cash flows or other benefits from the transferred receivables and has no further obligations to provide additional cash flows or other assets to any party related to the transfer.

Real Alloy transferred \$117.6 million and \$336.9 million of receivables during the three and nine months ended September 30, 2015, respectively. Administrative fees under the Factoring Facility associated with the transferred receivables were \$0.2 million and \$0.6 million during the three and nine months ended September 30, 2015, respectively, and are classified as selling, general and administrative expenses in the unaudited condensed consolidated statements of operations.

Inventories

Inventories are stated at the lower of cost or market. Cost is determined primarily on the average cost or specific identification method and includes material, labor and overhead related to the manufacturing process. The cost of inventories acquired in business combinations is recorded at fair value.

Property, plant and equipment

Property, plant and equipment is stated at cost, net of asset impairments and depreciation. The cost of property, plant and equipment acquired in business combinations represents the fair value of the acquired assets at the time of acquisition.

The estimated fair value of asset retirement obligations incurred after the Real Alloy Acquisition are capitalized to the related long-lived asset at the time the obligations are incurred and are depreciated over the estimated remaining useful life of the related asset.

Major renewals and improvements that extend an asset’s useful life are capitalized to property, plant and equipment. Major repair and maintenance projects are expensed over periods not exceeding twenty-four months, while normal maintenance and repairs are expensed as incurred. Depreciation is primarily computed using the straight-line method over the estimated useful lives of the related assets, as follows:

| | Estimated Useful Lives |
|---------------------------------------|------------------------|
| Building and improvements | 5 - 33 years |
| Production equipment and machinery | 2 - 25 years |
| Office furniture, equipment and other | 3 - 10 years |

The construction costs of landfills used to store by-products of the recycling process are depreciated as space in the landfills is used based on the unit of production method. Additionally, used space in the landfill is determined periodically either by aerial photography or engineering estimates.

Goodwill

Goodwill is tested for impairment as of October 1 of each year and may be tested more frequently if changes in circumstances or the occurrence of events indicates that a potential impairment exists. We evaluate goodwill based upon our reporting units, which are defined as operating segments or, in certain situations, one level below the operating segment. As the purchase price allocation for the Real Alloy Acquisition is not yet finalized, the allocation of goodwill to our reporting units has not yet been finalized.

The impairment test is a two-step process, which requires us to make judgments in determining what assumptions to use in the calculations. The first step of the process consists of estimating the fair value of each reporting unit based on discounted cash flow models and guideline Company information, using revenue and profit forecasts, and comparing those estimated fair values with the carrying values, which include allocated goodwill. These projections include assumptions about prices, margins and other operating costs. Other key assumptions included in the fair value of our reporting units include estimated cash flow periods, terminal values based on our anticipated growth rate and the discount rate used, which is based on our current cost of capital, adjusted for the risks associated with our operations. If the determined fair value is less than the carrying value, a second step is performed to compute the amount of the impairment by determining an “implied fair value” of goodwill, which is compared to the corresponding carrying value.

Deferred financing costs

Costs related to the issuance of long-term debt are capitalized and classified as a reduction of the associated debt and amortized over the term of the related debt agreements as interest expense using the effective interest method. Costs related to the issuance of revolving credit facilities are capitalized and classified as other assets in the unaudited condensed consolidated balance sheets and are amortized over the term of the related credit facility on a straight-line basis as interest expense.

Derivatives and hedging

Real Alloy is engaged in activities that expose it to various market risks, including changes in the prices of aluminum alloys, scrap aluminum, copper, zinc and natural gas, as well as changes in currency exchange rates. Certain of these financial exposures are managed as an integral part of its risk management program, which seeks to reduce the potentially adverse effects that the volatility of the markets may have on operating results. Real Alloy may enter into forward contracts or swaps to manage the exposure to market risk. The fair value of these instruments is reflected in the unaudited condensed consolidated balance sheets and the impact of these instruments is reflected in the unaudited condensed consolidated statements of operations. Real Alloy does not hold or issue derivative financial instruments for trading purposes.

The estimated fair values of derivative financial instruments are recognized as assets or liabilities as of the balance sheet date. Fair values for metal and natural gas derivative financial instruments are determined based on the differences between contractual and forward rates of identical hedge positions as of the balance sheet date. In developing these fair values, Real Alloy includes an estimate of the risk associated with nonperformance by either its counterparty or itself.

Real Alloy does not account for its derivative financial instruments as hedges. The changes in fair value of derivative financial instruments and the associated gains and losses realized upon settlement are recorded in losses on derivative financial instruments in the unaudited condensed consolidated statements of operations. All realized gains and losses are included within net cash provided by operating activities in the unaudited condensed consolidated statements of cash flows. Real Alloy is exposed to losses in the event of nonperformance by its derivative counterparties. The counterparties' creditworthiness is monitored on an ongoing basis, and credit levels are reviewed to ensure appropriate concentrations of credit outstanding to any particular counterparty. Although nonperformance by counterparties is possible, we do not currently anticipate nonperformance by any of these parties.

Currency translation

Certain of Real Alloy's international subsidiaries use the local currency as their functional currency. Real Alloy translates all of the amounts included in the unaudited condensed consolidated statements of operations from its international subsidiaries into U.S. dollars at average monthly exchange rates, which management believes is representative of the actual exchange rates on the dates of the transactions. Additionally, Real Alloy maintains

intercompany, long-term loans between its U.S. and foreign jurisdiction entities, which were established in the subsidiaries' functional currency and due to their long-term nature, any currency related effects are recorded as a component of accumulated other comprehensive loss. Adjustments resulting from the translation of the assets and liabilities into U.S. dollars at the balance sheet date exchange rates are reflected as a separate component of the Company's stockholders' equity. Currency translation adjustments accumulate in the Company's stockholders' equity until the disposition or liquidation of the international entities. Currency transactional gains and losses associated with receivables and payables denominated in currencies other than the functional currency are included within other, net in the unaudited condensed consolidated statements of operations. The translation of accounts receivables and payables denominated in currencies other than U.S. dollars resulted in transactional gains of \$0.5 million and \$0.4 million for the three and nine months ended September 30, 2015, respectively.

Environmental and asset retirement obligations

Environmental obligations that are not legal or contractual asset retirement obligations and that relate to existing conditions caused by past operations with no benefit to future operations are expensed, while expenditures that extend the life, increase the capacity or improve the safety of an asset, or mitigate or prevent future environmental contamination are capitalized in property, plant and equipment. Obligations are recorded when their occurrence is probable and the associated costs can be reasonably estimated. While accruals are based on management's current best estimate of the future costs of remedial action, these liabilities can change substantially due to factors such as the nature and extent of contamination, changes in the required remedial actions and technological advancements. Existing environmental liabilities are not discounted to their present values, as the amount and timing of the expenditures are not fixed or reliably determinable.

Asset retirement obligations represent the present value of estimated future obligations associated with the retirement of tangible long-lived assets. Our asset retirement obligations relate primarily to capping our three landfills, as well as costs related to the future removal of asbestos and removal of underground storage tanks. The estimated fair value of such legal obligations is recognized in the period in which the obligations are incurred, and capitalized as part of the carrying amount of the associated long-lived asset. These estimated fair values are based upon the present value of future cash flows expected to be required to satisfy the obligations. Determining the estimated fair value of asset retirement obligations requires judgment, including estimates of the credit adjusted interest rate and estimates of future cash flows. Estimates of future cash flows are obtained primarily from engineering consulting firms. The present value of the obligations is accreted over time while the capitalized costs are depreciated over the estimated remaining useful life of the related asset.

Pension benefits

Pension benefit costs are accrued based on annual analyses performed by actuaries. These analyses are based on assumptions including a discount rate and the expected rate of return on plan assets. Both the discount rate and expected rate of return on plan assets require estimates and projections by management and can fluctuate from period to period. Real Alloy's objective in selecting a discount rate is to select the best estimate of the rate at which the benefit obligations could be effectively settled. In making this estimate, projected cash flows are developed and matched with a yield curve based on an appropriate universe of high-quality corporate bonds. Assumptions for long-term rates of return on plan assets are based upon historical returns and future expectations for returns. See Note 3—Business Combinations for more information about the assumptions used to determine the pension benefit obligation as of the date of the Real Alloy Acquisition.

Management believes these assumptions are appropriate; however, the actuarial assumptions used to determine pension benefits may differ from actual results due to changing market and economic conditions, higher or lower withdrawal rates, or longer or shorter life spans of participants. Management does not believe differences in actual experience or reasonable changes in assumptions will materially affect the Company's financial position or results of operations.

Recent accounting pronouncements

In September 2015, the FASB issued Accounting Standards Update ("ASU") 2015-16, Business Combinations (Topic 805) ("ASU 2015-16"), which provides that an acquirer recognize adjustments to provisional amounts during the measurement period in which the adjustments are identified. ASU 2015-16 requires that an acquirer record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. ASU 2015-16 requires an entity to present separately on the face of the statements of operations, or disclose in the notes, the portion of the amount recorded in current period earnings, by line item, that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been

recognized as of the acquisition date. ASU 2015-16 is effective for fiscal years beginning after December 15, 2015, and interim periods beginning after December 31, 2017. ASU 2015-16 will be applied prospectively to adjustments to provisional amounts that occur after the effective date, with earlier application permitted for financial statements that have not yet been made available for issuance. We do not anticipate that ASU 2015-16 will have a material impact on the Company's financial statements.

In August 2015, the FASB issued ASU 2015-15, Interest—Imputation of Interest (Topic 835-30) (“ASU 2015-15”), which clarifies the SEC staff position on the presentation and recognition of debt issuance costs associated with line-of-credit arrangements. ASU 2015-15 provides that given the absence of authoritative guidance within ASU 2015-03, Interest—Interest Imputation (Subtopic 835-30) for debt issuance costs related to line-of-credit arrangements, the SEC staff would not object to an entity deferring and presenting the debt issuance costs as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. The Company's presentation of debt issuance costs associated with line-of-credit arrangements follows the guidance of ASU 2015-15.

In July 2015, the FASB issued ASU 2015-11, Inventory (Topic 330) (“ASU 2015-11”), which provides that an entity measure inventory at the lower of cost or net realizable value. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. ASU 2015-11 will be effective for the Company on January 1, 2017, will be applied prospectively, and early adoption is permitted as of the beginning of an interim or annual period. We do not believe that the application of ASU 2015-11 will have a material impact on the Company’s financial statements or disclosures.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606) (“ASU 2014-09”), which was the result of a joint project by the FASB and the International Accounting Standards Board to clarify the principles for recognizing revenue and to develop a common revenue standard for GAAP and International Financial Reporting Standards. The issuance of a comprehensive and converged standard on revenue recognition is expected to enable financial statement users to better understand and consistently analyze an entity’s revenue across industries, transactions and geographies. The standard will require additional disclosures to help financial statement users better understand the nature, amount, timing, and potential uncertainty of the revenue that is recognized. ASU 2014-09 will be effective for the Company on January 1, 2018, and will require either retrospective application to each prior reporting period presented or retrospective application with the cumulative effect of initially applying the standard recognized at the date of adoption. We are currently evaluating the impact the application of ASU 2014-09 will have on the Company’s financial statements and disclosures.

NOTE 3—BUSINESS COMBINATIONS

On February 27, 2015, Real Industry, through its indirect wholly owned subsidiary, Real Alloy, acquired 100% of the voting interests of the Real Alloy Business from Aleris, under a purchase agreement (the “Real Alloy Purchase Agreement”). Upon closing, we paid \$496.2 million to Aleris, and an additional \$5.0 million of cash and the Redeemable Preferred Stock were placed into escrow to satisfy the indemnification obligations of Aleris under the Real Alloy Purchase Agreement, in which Aleris has agreed to indemnify Real Alloy and its affiliates for certain claims and losses. During the second quarter, we paid an additional \$31.3 million of the purchase price representing the initial working capital adjustment under the Real Alloy Purchase Agreement. The final working capital adjustment totaled \$2.4 million and was paid on September 3, 2015.

In addition, Real Alloy and Aleris have entered into a transition services agreement, under which Aleris will provide certain customary post-closing transition services, including information technology services, treasury services, accounts payable, cash management and payroll, credit/collection services, environmental services and human resource services, to Real Alloy, for periods ranging from three to twenty-four months following the acquisition date.

We incurred acquisition and financing-related costs and expenses associated with the Real Alloy Acquisition totaling approximately \$14.8 million during the nine months ended September 30, 2015, which are classified as nonoperating expenses in the unaudited condensed consolidated statements of operations. Acquisition and financing-related costs and expenses associated with the Real Alloy Acquisition recognized in 2014 totaled \$3.4 million.

The acquisition was accounted for as a business combination, with the purchase price allocated based on the estimated fair values of the assets acquired and liabilities assumed. The purchase price allocation remains preliminary as management continues to evaluate the assumptions and methodology used in the valuation of acquired inventories, property, plant and equipment, intangible assets, accrued pension benefits, environmental liabilities, asset retirement obligations, and the resultant deferred income tax adjustments.

Edgar Filing: Real Industry, Inc. - Form 10-Q

(In millions)

| | |
|---|---------|
| Purchase consideration: | |
| Consideration paid at closing | \$501.2 |
| Redeemable Preferred Stock issued | 19.6 |
| Initial working capital adjustment | 31.3 |
| Final working capital adjustment | 2.4 |
| Total purchase consideration | \$554.5 |
| Purchase price allocation: | |
| Assets: | |
| Cash | \$10.2 |
| Trade accounts receivable | 150.1 |
| Inventories | 173.8 |
| Property, plant and equipment | 326.4 |
| Deferred income taxes | 6.1 |
| Other | 4.0 |
| Identifiable intangible assets | 21.1 |
| Total assets | 691.7 |
| Liabilities: | |
| Trade payables | 112.4 |
| Accrued liabilities | 26.9 |
| Accrued pension liabilities | 46.0 |
| Environmental liabilities | 18.4 |
| Other | 13.7 |
| Deferred income taxes | 4.8 |
| Total liabilities | 222.2 |
| Estimated fair value of net assets acquired | \$469.5 |
| Total purchase consideration | \$554.5 |
| Estimated fair value of net assets acquired | 469.5 |
| Goodwill | \$85.0 |

The estimated fair value of trade accounts receivable is based on the undiscounted receivables management expected to receive from the \$150.4 million of total trade accounts receivable at the acquisition date. Due to the short-term nature of the receivables, the undiscounted receivables expected to be collected are estimated to approximate fair value.

Inventories include the estimated fair value of finished goods, work in process, raw material and supplies. The estimated fair value of finished goods was based on analyses of future selling prices and the profit associated with the manufacturing effort. The estimated fair value of work in process considered costs to complete to finished goods and was based on analyses of future selling prices and the profit associated with the manufacturing effort. The estimated fair value of raw materials and supplies was based on replacement cost. The \$173.8 million of estimated fair value of inventories includes \$10.6 million in fair value adjustments, of which \$1.3 million and \$8.5 million was amortized as noncash charges in cost of sales during the three and nine months ended September 30, 2015, respectively.

Property, plant and equipment includes land, site improvements, buildings and building improvements, and machinery, equipment, furniture and fixtures. The estimated fair value of property, plant and equipment was based on appraisals and replacement cost analyses.

The fair value of property, plant and equipment acquired was estimated as follows:

| (In millions) | Estimated Fair Value |
|--|----------------------------|
| Land | \$ 63.6 |
| Buildings | 57.0 |
| Machinery, equipment, furniture and fixtures | 193.8 |
| Construction work in progress | 12.0 |
| Property, plant and equipment | \$ 326.4 |

Identifiable intangible assets represent the estimated fair value of customer relationships and have an estimated useful life of 20 years. The valuation of the intangible assets acquired was based on management’s estimates, available information, and reasonable and supportable assumptions. The fair value of these assets was estimated using the income approach. An excess earnings approach was used to estimate the fair value of the customer relationships. Significant assumptions used include forecasted revenues, customer retention rates and profit margins, a discount rate of 13.5% based on our overall cost of equity, adjusted for perceived business risks related to these customer relationships, and an estimated economic useful life of 20 years.

The fair value of trade payables was estimated to approximate carrying value due to the short-term nature of the liabilities. The fair value of accrued liabilities was estimated to approximate carrying value due to the short-term nature of the liabilities.

Accrued pension liabilities include defined benefit pension plans for the German employees. The plans are based on final pay and service, but some senior officers are entitled to receive enhanced pension benefits. Benefit payments are financed, in part, by contributions to a relief fund which establishes a life insurance contract to secure future pension payments. Based on statutory pension contributions calculations proscribed under German law, the plans are substantially underfunded. The unfunded accrued pension costs are covered under a pension insurance association under German law should Real Alloy, or its subsidiaries, be unable to fulfill their pension obligations.

The following assumptions were utilized to measure the accrued pension liabilities:

| | |
|------------------|------|
| Discount rate | 1.7% |
| Salary increase | 3.0% |
| Pension increase | 1.8% |
| Turnover | 2.0% |

Environmental liabilities represent estimated reserves for environmental remediation costs, which have been recognized based on the guidance in FASB ASC 450, Contingencies, and FASB ASC 410, Asset Retirement and Environmental Obligations. Real Alloy is subject to various environmental laws and regulations governing, among other things, the handling, disposal and remediation of hazardous substances and wastes and employee safety. Given the changing nature of environmental legal requirements, Real Alloy may be required to take environmental control measures at some of its facilities to meet future requirements.

The estimated fair value of the Redeemable Preferred Stock was determined based on a discounted cash flow using estimates of market rates and redemption probabilities. For more information on the Redeemable Preferred Stock, refer to Note 5—Debt, Other Financing Arrangements and Redeemable Preferred Stock and Note 12—Derivative and Other Financial Instruments and Fair Value Measurements.

Deferred income taxes represent the differences between the book and tax bases of the assets acquired. As a result of an election under section 338(h)(10) of the Internal Revenue Code of 1986, as amended (the “Tax Code”), the tax bases of U.S. assets acquired were adjusted to the acquisition date fair values.

Other liabilities assumed include asset retirement obligations, which represent obligations associated with the retirement of tangible long-lived assets. Assumed asset retirement obligations relate primarily to the requirement of capping three landfills, as well as costs related to the future removal of asbestos and costs to remove underground storage tanks. The estimated fair value is based upon the present value of the future cash flows expected to be required to satisfy the obligation using discount rates ranging from 6.7% to 13.2%. Determining the fair value of asset retirement obligations requires judgment, including estimates of the credit adjusted interest rate and estimates of

future cash flows. The present value of the obligations is accreted over time.

12

Edgar Filing: Real Industry, Inc. - Form 10-Q

Based on the estimated fair value of assets acquired and liabilities assumed, goodwill of \$85.0 million is attributable to Real Alloy's strong management team, assembled workforce and its defensible market share. As the purchase price allocation for the Real Alloy Acquisition has not yet been finalized, the allocation of goodwill to our reporting units has not yet been finalized.

The following table reflects the activity associated with goodwill during the nine months ended September 30, 2015:

(In millions)

| | |
|--|--------|
| Balance at beginning of period | \$— |
| Preliminary purchase price allocation for the Real Alloy Acquisition reported as of March 31, 2015 | 102.3 |
| Adjustments to preliminary purchase price allocation for the Real Alloy Acquisition recorded in the quarter ended June 30, 2015 | (17.8) |
| Adjustments to preliminary purchase price allocation for the Real Alloy Acquisition recorded in the quarter ended September 30, 2015 | 0.5 |
| Balance at end of period | \$85.0 |

The operating results of Real Alloy are included in the Company's unaudited condensed consolidated financial statements from the acquisition date. For the period from the acquisition date to September 30, 2015, Real Alloy's total revenues and loss from continuing operations before income taxes were \$845.0 million and \$20.4 million, respectively.

The following selected unaudited pro forma results of operations of the Company for the three and nine months ended September 30, 2015 and 2014, give effect to this business combination as though the transaction occurred on January 1, 2014:

| (In millions) | Three Months Ended September 30, | | Nine Months Ended September 30, | |

| Current portion of long-term debt | (1.8) | — |
| Total long-term debt, net | \$ 347.9 | \$ — |

Long-term debt

Senior Secured Notes

On January 8, 2015, Real Alloy, as successor to SGH Escrow, completed a private placement of \$305.0 million aggregate principal of 10% Senior Secured Notes at a price of 97.206% of the principal amount thereof to qualified institutional purchasers in accordance with Rule 144A and Regulation S under the Securities Act. The Senior Secured Notes were issued pursuant to an indenture, dated as of January 8, 2015 (the "Indenture") between Real Alloy, as successor to SGH Escrow, Real Alloy Parent, and Wilmington Trust, National Association ("Wilmington"), as trustee and notes collateral trustee.

Under the terms of the Pledge and Security Agreement, dated as of February 27, 2015, by and between each of Real Alloy, Real Alloy Parent and the other parties signatory thereto and Wilmington as notes collateral trustee, the Senior Secured Notes and related guarantees are secured by first priority security interests in the fixed assets of Real Alloy, Real Alloy Parent and the Subsidiary Guarantors (as defined in the Pledge and Security Agreement) and by second priority security interests in certain other collateral of Real Alloy, Real Alloy Parent and the Subsidiary Guarantors.

The Indenture, among other things, limits Real Alloy and its restricted subsidiaries' (as defined in the Indenture) ability to: incur additional indebtedness or issue certain preferred stock; pay dividends or make other distributions on capital stock or prepay subordinated indebtedness; purchase or redeem any equity interests; make investments; create liens; sell assets; enter into agreements that restrict dividends or other payments by restricted subsidiaries; consolidate, merge or transfer all or substantially all of its assets; engage in transactions with Real Alloy's affiliates; or enter into any sale and leaseback transactions. These covenants are subject to important exceptions and qualifications. As of September 30, 2015, Real Alloy was in compliance with all such covenants.

The Senior Secured Notes mature on January 15, 2019 and interest is payable on January 15 and July 15 of each year, commencing on July 15, 2015, through the date of maturity. For the three and nine months ended September 30, 2015, interest expense associated with the Senior Secured Notes was \$8.7 million and \$25.2 million, respectively, including \$1.1 million and \$3.2 million of noncash expense related to the amortization of the original issue discount

and debt issuance costs, respectively, for the three and nine months ended September 30, 2015.

Asset-Based Facility

On February 27, 2015, a wholly owned domestic subsidiary of Real Alloy and an affiliate of Real Alloy entered into the \$110.0 million Asset-Based Facility that matures on October 15, 2018. The Asset-Based Facility is secured by a first priority lien on the borrowers and, to the extent no adverse tax impact would be incurred, Real Alloy's foreign subsidiaries' accounts receivable, inventory, instruments representing receivables, guarantees and other credit enhancements related to receivables, and bank accounts into which receivables are deposited, among other related assets. The Asset-Based Facility is also secured by a second priority lien on the assets that secure the Senior Secured Notes. The borrowing base under the Asset-Based Facility is determined based on eligible accounts receivable and eligible inventory. U.S. dollar denominated loans under the U.S. Sub-facility will bear interest, at the borrowers' option, either (i) at 1, 2, 3 or 6-month interest periods at LIBOR, or (ii) the Base Rate (as defined below), in each case plus a margin based on the amount of the

excess availability under the Asset-Based Facility. The “Base Rate” is equal to the greater of (a) the U.S. prime rate, (b) the U.S. Federal Funds Rate plus 50 basis points, and (c) the sum of LIBOR plus a margin based on the amount of the excess availability under the Asset-Based Facility. Canadian dollar denominated loans under the Canadian Sub-facility will bear interest, at the borrowers’ option, either (i) at 1, 2, 3 or 6-month interest periods at an average Canadian interbank rate, or (ii) floating at the greater of the Canadian prime rate or the average 30-day Canadian interbank rate plus 1.35%, in each case plus a margin based on the amount of the excess availability under the Asset-Based Facility. Events of default will trigger an increase of 2.0% in all interest rates. Interest is payable monthly in arrears, except for LIBOR loans and Canadian interbank rate loans, for which interest is payable at the end of each relevant interest period. On the initial funding date, the borrowers paid a 1.0% funding fee. For the three and nine months ended September 30, 2015, interest expense associated with the Asset-Based Facility was \$0.5 million and \$1.1 million, respectively, including \$0.2 million and \$0.5 million related to the amortization of debt issuance costs, respectively. As of September 30, 2015, the borrowers were in compliance with all applicable covenants under the Asset-Based Facility.

Capital Leases

As part of the Real Alloy Acquisition, existing capital leases of the Real Alloy Business, primarily mobile and office equipment, were assumed. In the normal course of operations, Real Alloy enters into capital leases to finance office and other equipment for its operations. As of September 30, 2015, \$1.8 million of the \$4.5 million in capital lease obligations are due within the next twelve months.

Factoring Facility

On February 27, 2015, an indirect wholly owned German subsidiary of Real Alloy, entered into the €50 million Factoring Facility, which provides for nonrecourse sales of certain of its accounts receivables to a financial institution, subject to certain limitations and eligibility requirements. The Factoring Facility has a termination date of January 15, 2019.

Prior to the collection of proceeds from the transferred receivables, advances against such proceeds are available to the Real Alloy subsidiary, subject to certain limitations and eligibility requirements. Such advances, which totaled \$4.4 million as of September 30, 2015, are recorded as a reduction to the financing receivable in the unaudited condensed consolidated balance sheets, due to the counterparty’s right of set off.

The interest rate applicable to advances under the Factoring Facility is the three-month EURIBOR (daily rate) fixed on the last business day of a month for the following month, plus 1.65%. Interest expense on advances was \$0.1 million for the nine months ended September 30, 2015.

Redeemable Preferred Stock

The Redeemable Preferred Stock was issued to Aleris on February 27, 2015 as a portion of the purchase price for the Real Alloy Acquisition. The Redeemable Preferred Stock pays quarterly dividends at a rate of 7% for the first 18 months after the date of issuance, 8% for the next 12 months, and 9% thereafter. Dividends may be paid in kind for the first two years, and thereafter will be paid in cash. All accrued and accumulated dividends on the Redeemable Preferred Stock will be prior and in preference to any dividend on any of the Company’s common stock or other junior securities.

The shares of Redeemable Preferred Stock are generally non-voting, however the consent of the holders of a majority of the outstanding shares of Redeemable Preferred Stock are required, among other requirements, (i) until the second anniversary of issuance, to (x) declare or pay cash dividends on Real Industry common stock; or (y) purchase, redeem or acquire shares of Real Industry common stock, other than, among others, certain shares of common stock issued to employees; (ii) so long as at least \$10.0 million in aggregate principal amount of Redeemable Preferred Stock is

outstanding, to make acquisitions valued at more than 5% of the consolidated assets of the Company and its subsidiaries; (iii) to take actions that would adversely affect the rights of the holders of the Redeemable Preferred Stock; and (iv) to undertake certain merger activities unless the Redeemable Preferred Stock remains outstanding or is purchased at the liquidation preference.

The Company may generally redeem the shares of Redeemable Preferred Stock at any time at the liquidation preference, and the holders may require the Company to redeem their shares of Redeemable Preferred Stock at the liquidation preference upon a change of control under the Senior Secured Notes (or any debt facility that replaces or redeems the Senior Secured Notes) to the extent that the change of control does not provide for such redemption at the liquidation preference. A holder of Redeemable Preferred Stock may require the Company to redeem all, but not less than all, of such holder's Redeemable Preferred Stock sixty-six months after the issuance date. In addition, the Company may redeem shares of Redeemable Preferred Stock to the extent Aleris is required to indemnify the Company under the Real Alloy Purchase Agreement for the Real Alloy Acquisition. The Redeemable Preferred Stock held by Aleris and its subsidiaries has a liquidation preference of \$26.0 million, as of September 30, 2015, and is not transferrable (other than to another subsidiary of Aleris) for eighteen months following issuance (or such longer period in connection with any ongoing indemnity claims under the Real Alloy Purchase Agreement).

The carrying value of Redeemable Preferred Stock is based on the estimated fair value of the instrument as of the issuance date. The difference between the redemption value and the estimated fair value as of the issuance date is being accreted to the redemption value over the period preceding the holder's right to redeem the instrument, or sixty-six months, using the effective interest method.

The following table presents the activity related to the carrying value of Redeemable Preferred Stock during the nine months ended September 30, 2015:

| | |
|--|--------|
| (In millions) | |
| Balance at beginning of period | \$— |
| Issuance of Redeemable Preferred Stock | 19.6 |
| Dividends and accretion | 1.6 |
| Balance at end of period | \$21.2 |

NOTE 6—COMMON STOCK WARRANT LIABILITY

On June 11, 2010, warrants to purchase an aggregate of 1.5 million shares of Real Industry's common stock were issued (the "Warrants"). The aggregate purchase price for the Warrants was \$0.3 million, due in equal installments as the Warrants vested, 20% upon issuance and, thereafter, 20% annually on the anniversary of the issuance date and, as of June 30, 2015, the Warrants are 100% vested. The Warrants expire in June 2020 and had an original exercise price of \$10.30 per share. The Warrants were issued without registration in reliance on the exemption set forth in Section 4(a)(2) of the Securities Act.

The Warrants include customary terms that provide for certain adjustments of the exercise price and the number of shares of common stock to be issued upon the exercise of the Warrants in the event of stock splits, stock dividends, pro rata distributions and certain other fundamental transactions. Additionally, the Warrants are subject to pricing protection provisions. During the term of the Warrants, the pricing protection provisions provide that certain issuances of new shares of common stock at prices below the current exercise price of the Warrants automatically reduce the exercise price of the Warrants to the lowest per share purchase price of common stock issued. In February 2015, the Company issued shares of common stock in the Rights Offering at \$5.64 per share, thereby reducing the exercise price of the Warrants to \$5.64 per share as of September 30, 2015.

In May 2015, 15,000 Warrants were exercised, including 7,500 on a cashless basis, resulting in the issuance of 9,360 shares of common stock and gross proceeds of \$0.1 million. In September 2015, 16,667 Warrants were exercised on a cashless basis, resulting in the issuance of 6,969 shares of common stock. Upon exercise, the fair value of the Warrants exercised are reclassified to additional paid-in capital. As of September 30, 2015, 1,468,333 Warrants remain outstanding.

The Company utilizes a Monte Carlo simulation to estimate the fair value of the common stock warrant liability as of September 30, 2015 and December 31, 2014. See Note 12—Derivative and Other Financial Instruments and Fair Value Measurements for a discussion about the estimated fair values determined using the Monte Carlo simulation option pricing model. A decrease in the common stock warrant liability results in other nonoperating income, while an increase in the common stock warrant liability results in other nonoperating expense. The following table presents changes in the fair value of the common stock warrant liability during the three and nine months ended September 30, 2015 and 2014:

Edgar Filing: Real Industry, Inc. - Form 10-Q

| (In millions) | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|--------------------------------------|--|-------|--|-------|
| | 2015 | 2014 | 2015 | 2014 |
| Balance at beginning of period | \$11.1 | \$8.3 | \$5.6 | \$9.3 |
| Warrants exercised | (0.1) | — | (0.2) | — |
| Change in fair value of common stock | | | | |
| warrant liability | (3.4) | (2.4) | 2.2 | (3.4) |
| Balance at end of period | \$7.6 | \$5.9 | \$7.6 | \$5.9 |

NOTE 7—STOCKHOLDERS' EQUITY AND NONCONTROLLING INTEREST

The following table summarizes the activity within stockholders' equity and noncontrolling interest for the nine months ended September 30, 2015:

| (In millions) | Equity Attributable to Real Industry, Inc. | Noncontrolling Interest | Total Equity |
|--|--|----------------------------|-----------------|
| Balance at beginning of period | \$ 85.7 | \$ (0.1) | \$85.6 |
| Net earnings (loss) | (3.3) | 0.3 | (3.0) |
| Dividends and accretion on Redeemable Preferred Stock | (1.6) | — | (1.6) |
| Exercise of common stock options | 1.1 | — | 1.1 |
| Issuance of common stock, net of issuance costs | 63.3 | — | 63.3 |
| Share-based compensation expense | 1.0 | — | 1.0 |
| Proceeds from Warrant exercises | 0.1 | — | 0.1 |
| Reclassification of common stock warrant liability | | | |
| on Warrant exercises | 0.2 | — | 0.2 |
| Treasury shares acquired, net of reissuances | (0.1) | — | (0.1) |
| Noncontrolling interest acquired in business combination | — | 0.8 | 0.8 |
| Change in accumulated other comprehensive loss | (2.6) | — | (2.6) |
| Balance at end of period | \$ 143.8 | \$ 1.0 | \$144.8 |

The following table reflects changes in the number of outstanding shares of common stock during the nine months ended September 30, 2015:

| | Shares of Common Stock Outstanding |
|--|---|
| Balance at beginning of the period | 17,099,882 |
| Common stock issued | 11,304,673 |
| Restricted common stock awards granted, net of forfeitures | 240,990 |
| Common stock options exercised, net of share repurchases | 229,892 |
| Common stock issued from Warrant exercises | 26,027 |
| Treasury shares acquired, net of reissuance | (9,698) |
| Balance at end of the period | 28,891,766 |

NOTE 8—ACCUMULATED OTHER COMPREHENSIVE LOSS

The following table summarizes the activity within accumulated other comprehensive loss for the nine months ended September 30, 2015:

| (In millions) | Currency Translation |
|---|-------------------------|
| Balance at beginning of period | \$ — |
| Current period currency translation adjustments | (2.6) |
| Balance at end of period | \$ (2.6) |

NOTE 9—INCOME TAXES

At the end of each reporting period, Real Industry makes an estimate of its annual effective income tax rate. The estimate used for the nine months ended September 30, 2015 may change in subsequent periods. The effective tax rate for the three and nine months ended September 30, 2015 differed from the federal statutory rate applied to earnings and losses before income taxes primarily as a result of the mix of earnings and losses and tax rates between tax jurisdictions and changes in valuation allowances.

As of December 31, 2014, the Company had estimated federal and California NOLs of \$933.6 million and \$994.7 million, respectively. The federal NOLs have a 20-year life and begin to expire after the 2027 tax year, while the California NOLs have either a 10-year or

20-year life and begin to expire after the 2017 tax year. In order to preserve these tax attributes, restrictions are included in Real Industry’s Amended and Restated Bylaws on transfers of its common stock (the “Tax Benefit Preservation Provision”). Unless approved by the board of directors (the “Board”), any attempted transfer of Real Industry common stock is prohibited and void to the extent that, as a result of such transfer (or any series of transfers) (i) any person or group of persons owning 4.9% of the then-outstanding shares of Real Industry common stock, whether directly or indirectly (a “4.9-percent holder”); or (ii) the ownership interests of any “five-percent holder” (as defined in Section 1.382-2T(g) of the Tax Code) shall be increased or decreased, unless such decrease is the result of a transfer to a public group through the facilities of a national exchange. Persons wishing to become a 4.9-percent holder (or existing five-percent holders wishing to increase or decrease their percentage ownership, unless the decrease relates to a transfer to a public group) must request a waiver of the restriction from Real Industry, and the Board may grant a waiver in its sole discretion. The Tax Benefit Preservation Provision is meant to reduce the potential for a “change of control” event, which, if it were to occur, would have the effect of limiting the amount of NOLs available in a particular year.

Real Industry has valuation allowances recorded to reduce certain deferred tax assets to amounts that are more likely than not to be realized. The valuation allowances relate to the potential inability to realize our deferred tax assets associated with net operating loss carryforwards in the United States and certain other foreign jurisdictions. Real Industry intends to maintain its valuation allowances until sufficient positive evidence exists to support their reversal.

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction, various state and local jurisdictions, as well as foreign jurisdictions located in Canada, Mexico, Germany, Norway, and the United Kingdom. With few exceptions, the 2010 through 2014 tax years remain open to examination.

NOTE 10—EMPLOYEE BENEFIT PLANS

The following table presents the components of the net periodic benefit expense under the German defined benefit pension plans for the three and nine months ended September 30, 2015:

| | Three | Nine |
|------------------------------|-----------|-----------|
| | Months | Months |
| | Ended | Ended |
| | September | September |
| | 30, | 30, |
| (In millions) | 2015 | 2015 |
| Service cost | \$ 0.2 | \$ 0.6 |
| Interest cost | 0.2 | 0.5 |
| Net periodic benefit expense | \$ 0.4 | \$ 1.1 |

NOTE 11—EARNINGS (LOSS) PER SHARE

The Company computes earnings (loss) per share using the two-class method, as unvested restricted common stock contains nonforfeitable rights to dividends and meets the criteria of a participating security. Under the two-class method, earnings are allocated between common stock and participating securities. The presentation of basic and diluted earnings per share is required only for each class of common stock and not for participating securities. As such, the Company presents basic and diluted earnings per share for its one class of common stock.

The two-class method includes an earnings allocation formula that determines earnings per share for each class of common stock according to dividends declared and undistributed earnings for the period. The Company's reported net earnings is reduced by the amount allocated to participating securities to arrive at the earnings allocated to common stockholders for purposes of calculating earnings per share.

Basic earnings per share is computed by dividing net earnings attributable to Real Industry, Inc. by the weighted average number of common shares outstanding for the reporting period. In connection with the Rights Offering, the Company distributed subscription rights to all of its existing stockholders as of January 28, 2015, and the subscription rights price represented a discount to the market value of the Company's common stock upon the closing of the Rights Offering on February 27, 2015, with respect to the common stockholders. The discount in the Rights Offering with respect to common stockholders represents an implied stock dividend, which requires retroactive adjustment of the weighted average shares outstanding reported in reporting periods prior to February 27, 2015. Adjustments to the weighted average shares outstanding in all reporting periods prior to December 31, 2014 disclosed in this Report reflect an 8.3% increase from previously reported weighted average shares outstanding, based on the fair value per share immediately preceding the closing of the Rights Offering, with respect to common stockholders, and the fair value of the common stock as of February 27, 2015. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue

Edgar Filing: Real Industry, Inc. - Form 10-Q

common stock were exercised or converted into common stock. For the calculation of diluted earnings per share, the basic weighted average number of common shares outstanding is increased by the dilutive effect of unvested restricted common stock awards, common stock options, unvested performance shares and the Warrants, determined using the treasury stock method.

The following table sets forth the computation of basic and diluted earnings (loss) per share for the three and nine months ended September 30, 2015 and 2014:

| (In millions, except share and per share amounts) | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|--|-------------------------------------|------------|------------------------------------|------------|
| | 2015 | 2014 | 2015 | 2014 |
| Earnings (loss) from continuing operations | \$2.0 | \$(0.7) | \$(29.5) | \$(4.2) |
| Earnings (loss) from discontinued operations, net of income taxes | (0.7) | 1.5 | 26.5 | 4.6 |
| Net earnings (loss) | 1.3 | 0.8 | (3.0) | 0.4 |
| Earnings from continuing operations attributable to noncontrolling interest | 0.1 | — | 0.3 | — |
| Net earnings (loss) attributable to Real Industry, Inc. | 1.2 | 0.8 | (3.3) | 0.4 |
| Dividends and accretion on Redeemable Preferred Stock | (0.7) | — | (1.6) | — |
| Numerator for basic and diluted earnings per share—Net earnings (loss) available to common stockholders | \$0.5 | \$0.8 | \$(4.9) | \$0.4 |
| Denominator for basic earnings per share— Weighted average shares outstanding | 28,556,383 | 13,162,987 | 25,993,660 | 13,151,059 |
| Effect of dilutive securities | 1,257,090 | — | — | — |
| Denominator for diluted earnings per share— Weighted average shares outstanding | 29,813,473 | 13,162,987 | 25,993,660 | 13,151,059 |
| Basic earnings (loss) per share: Continuing operations | \$0.04 | \$(0.05) | \$(1.21) | \$(0.32) |
| Discontinued operations | (0.02) | 0.11 | 1.02 | 0.35 |
| Basic earnings (loss) per share | \$0.02 | \$0.06 | \$(0.19) | \$0.03 |
| Diluted earnings (loss) per share: Continuing operations | \$0.04 | \$(0.05) | \$(1.21) | \$(0.32) |
| Discontinued operations | (0.02) | 0.11 | 1.02 | 0.35 |
| Diluted earnings (loss) per share | \$0.02 | \$0.06 | \$(0.19) | \$0.03 |

Unvested restricted common stock, common stock options, unvested performance shares and the Warrants are antidilutive and excluded from the computation of diluted earnings per share if the assumed proceeds upon exercise or vesting are greater than the cost to reacquire the same number of shares at the average market price during the period. The dilutive impact of these securities is reflected in the weighted average diluted shares outstanding for the three months ended September 30, 2015. For the nine months ended September 30, 2015 and 2014, and the three months

Edgar Filing: Real Industry, Inc. - Form 10-Q

ended September 30, 2014, the impact of all outstanding unvested shares of restricted common stock, common stock options, unvested performance shares and the Warrants are excluded from diluted earnings (loss) per share as their impact would be antidilutive. The following table provides details on the average market price of Real Industry common stock and the weighted average number of outstanding shares of unvested restricted common stock, common stock options, unvested performance shares and Warrants that were potentially dilutive for each of the periods presented:

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|--|--|-----------|------------------------------------|-----------|
| | 2015 | 2014 | 2015 | 2014 |
| Average market price of Real Industry | | | | |
| common stock | \$10.63 | \$8.77 | \$9.18 | \$9.93 |
| Potentially dilutive common stock equivalents: | | | | |
| Unvested restricted common stock | — | 109,319 | 224,526 | 105,381 |
| Common stock options | — | 1,205,743 | 850,707 | 1,213,671 |
| Unvested performance shares | — | — | 116,190 | — |
| Warrants | — | 1,500,000 | 1,491,874 | 1,500,000 |
| Total potentially dilutive common | | | | |
| stock equivalents | — | 2,815,062 | 2,683,297 | 2,819,052 |

NOTE 12—DERIVATIVE AND OTHER FINANCIAL INSTRUMENTS AND FAIR VALUE MEASUREMENTS

Derivatives

Real Alloy may use forward contracts and options, as well as contractual price escalators, to reduce the risks associated with its metal, natural gas and certain currency exposures. Generally, we enter into master netting arrangements with our counterparties and offset net derivative positions with the same counterparties against amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral under those arrangements in our condensed consolidated balance sheets. For classification purposes, Real Alloy records the net fair value of each type of derivative position expected to settle in less than one year (by counterparty) as a net current asset or liability and each type of long-term position as a net long-term asset or liability.

Metal hedging

As metal is purchased to fill fixed-price customer sales orders at Real Alloy, London Metal Exchange (“LME”) future swaps or forward contracts are sold. As sales orders are priced, LME future or forward contracts may be purchased. These derivatives generally settle within six months. Real Alloy can also buy put option contracts for managing metal price exposures. Option contracts require the payment of a premium, which is recorded as a realized loss upon settlement or expiration of the option contract. Upon settlement of put option contracts, Real Alloy receives cash and recognizes a related gain if the LME closing price is less than the strike price of the put option. If the put option strike price is less than the LME closing price, no amount is paid and the option expires. As of September 30, 2015, Real Alloy had 30.7 thousand metric tons of metal buy and sell derivative contracts.

Natural gas hedging

To manage the price exposure for natural gas purchases, Real Alloy may fix the future price of a portion of its natural gas requirements by entering into financial hedge agreements. Under these swap agreements, payments are made or received based on the differential between the monthly closing price on the New York Mercantile Exchange (“NYMEX”) and the contractual hedge price. Natural gas cost can also be managed through the use of cost escalators included in some long-term supply contracts with customers, which limits exposure to natural gas price risk. As of September 30, 2015, Real Alloy had 2.1 trillion British thermal unit forward buy contracts.

Currency exchange hedging

From time to time, Real Alloy may enter into currency forwards, futures, call options and similar derivative financial instruments to limit its exposure to fluctuations in currency exchange rates. As of September 30, 2015, no currency derivative contracts were outstanding.

Credit risk

Real Alloy is exposed to losses in the event of nonperformance by the counterparties to the derivative financial instruments discussed above; however, management does not anticipate any nonperformance by the counterparties. The counterparties are evaluated for creditworthiness and risk assessment prior to initiating trading activities with the brokers and periodically throughout each year while actively trading. As of September 30, 2015, no cash collateral was posted or held.

Edgar Filing: Real Industry, Inc. - Form 10-Q

The table below presents gross amounts of recognized assets and liabilities, the amounts offset in the unaudited condensed consolidated balance sheets and the net amounts of assets and liabilities presented therein. As of September 30, 2015, there were no amounts subject to an enforceable master netting arrangement or similar agreement that have not been offset in the unaudited condensed consolidated balance sheets.

| (In millions) | Fair Value of Derivatives as of September 30, 2015 | |
|---|--|-----------|
| | Asset | Liability |
| Metal | \$0.6 | \$ (1.1) |
| Natural gas | — | (0.3) |
| Total | 0.6 | (1.4) |
| Effect of counterparty netting arrangements | (0.6) | 0.6 |
| Net derivatives as classified in the condensed consolidated balance sheet | \$— | \$ (0.8) |

The following table presents details of the fair value of Real Alloy's derivative financial instruments as of September 30, 2015, as recorded in the unaudited condensed consolidated balance sheets:

| (In millions) | Balance Sheet Location | September 30, |
|-------------------------------|------------------------|---------------|
| | | 2015 |
| Derivative liabilities | | |
| Metal | Accrued liabilities | \$ 0.5 |
| Natural gas | Accrued liabilities | 0.3 |
| Total | | \$ 0.8 |

Common stock warrant liability

Common stock warrant liability is a derivative liability related to the anti-dilution and pricing protection provisions of the Warrants. The fair value of the common stock warrant liability is based on a Monte Carlo simulation that utilizes various assumptions, including estimated volatility of 50% and an expected term of 4.7 years as of September 30, 2015, and 52% volatility and an expected term of 5.8 years as of December 31, 2014, along with a 25% equity raise probability assumption and a 15% equity raise price discount assumption in the periods following December 31, 2015. Significant decreases in the expected term or the equity raise probability and related assumptions would result in a decrease in the estimated fair value of the common stock warrant liability, while significant increases in the expected term or the equity raise probability and related assumptions would result in an increase in the estimated fair value of the common stock warrant liability. However, the most significant input in determining the fair value of the common stock warrant liability is the price of our common stock on the measurement date. A 10% increase or decrease in any or all of the unobservable inputs would not have a material impact on the estimated fair value of the common stock warrant liability.

Fair values

Derivative contracts are recorded at fair value using quoted market prices and significant other observable inputs. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

Level 1—Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2—Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates); and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3—Inputs that are both significant to the fair value measurement and unobservable.

Edgar Filing: Real Industry, Inc. - Form 10-Q

We endeavor to utilize the best available information in measuring fair value. Where appropriate, valuations are adjusted for various factors such as liquidity, bid/offer spreads, and credit considerations. Such adjustments are generally based on available market evidence and unobservable inputs. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The following tables set forth financial assets and liabilities and their level in the fair value hierarchy that are accounted for at fair value on a recurring basis as of September 30, 2015 and December 31, 2014:

| (In millions) | Fair Value Hierarchy | Estimated Fair Value | |
|--------------------------------|----------------------|----------------------|-------------------|
| | | September 30, 2015 | December 31, 2014 |
| Derivative assets | Level 2 | \$0.6 | \$ — |
| Derivative liabilities | Level 2 | (1.4) | — |
| Net derivative liabilities | | \$(0.8) | \$ — |
| Common stock warrant liability | Level 3 | \$(7.6) | \$ (5.6) |

The common stock warrant liability is the only asset or liability measured at fair value on a recurring basis using significant unobservable inputs (Level 3) as of September 30, 2015 and 2014. Please see Note 6—Common Stock Warrant Liability for a reconciliation from the beginning balance to the ending balance of the common stock warrant liability for the three and nine months ended September 30, 2015 and 2014.

Both realized and unrealized gains and losses on derivative financial instruments are included within losses on derivative financial instruments in the unaudited condensed consolidated statements of operations. The following table presents realized losses on derivative financial instruments during the three and nine months ended September 30, 2015:

| (In millions) | Three | Nine |
|---------------|--------------------|--------------------|
| | Months | Months |
| | Ended | Ended |
| | September 30, 2015 | September 30, 2015 |
| Metal | \$ 1.5 | \$ 2.2 |
| Natural gas | — | — |
| Total | \$ 1.5 | \$ 2.2 |

Other Financial Instruments

The following tables present the carrying values and fair value estimates of other financial instruments as of September 30, 2015 and December 31, 2014:

September 30,
2015

Estimated

| (In millions) | Fair Value Hierarchy | Carrying Amount | Fair Value |
|---|----------------------|-----------------|------------|
| Assets | | | |
| Cash and cash equivalents | Level 1 | \$44.9 | \$ 44.9 |
| Restricted cash held in escrow (other current assets) | Level 1 | 3.9 | 3.9 |
| Loans receivable, net (other noncurrent assets) | Level 3 | 1.2 | 1.2 |
| Liabilities | | | |
| Long-term debt: | | | |
| Senior Secured Notes | Level 1 | \$290.3 | \$ 315.7 |
| Asset-Based Facility | Level 2 | 54.9 | 54.9 |
| Capital leases | Level 3 | 4.5 | 4.5 |
| Redeemable Preferred Stock | Level 3 | \$21.2 | \$ 20.5 |

December 31,
2014
Estimated

| (In millions) | Fair Value Hierarchy | Carrying Amount | Fair Value |
|---|----------------------|-----------------|------------|
| Assets | | | |
| Continuing operations: | | | |
| Cash and cash equivalents | Level 1 | \$62.0 | \$ 62.0 |
| Loans receivable, net (other noncurrent assets) | Level 3 | 1.2 | 1.2 |
| Discontinued operations: | | | |
| Cash and cash equivalents | Level 1 | 1.0 | 1.0 |
| Liabilities | | | |
| Discontinued operations: | | | |
| Line of credit | Level 3 | \$1.0 | \$ 1.0 |
| Long-term debt | Level 3 | 13.6 | 13.6 |

The Company used the following methods and assumptions to estimate the fair value of each financial instrument as of September 30, 2015 and December 31, 2014:

Cash and cash equivalents and restricted cash held in escrow

Cash and cash equivalents and restricted cash held in escrow are recorded at historical cost. The carrying value is a reasonable estimate of fair value as these instruments have short-term maturities and market interest rates.

Loans receivable, net

Loans receivable, net, consists of commercial real estate loans. The estimated fair value considers the collateral coverage of assets securing the loans and estimated credit losses, as well as variable interest rates, which approximate market interest rates.

Long-term debt – Senior Secured Notes

The estimated fair value of the Senior Secured Notes as of September 30, 2015 is based on observable market prices.

Long-term debt – Asset-Based Facility

The estimated fair value of the Asset-Based Facility as of September 30, 2015 is based on market characteristics, including interest rates and maturity dates generally consistent with market terms.

Long-term debt – Capital leases

The estimated fair value of the capital leases as of September 30, 2015 is based on market characteristics of the equipment leases, including interest rates and payment terms generally consistent with market terms.

Redeemable Preferred Stock

The carrying value of Redeemable Preferred Stock is based on the estimated fair value of the instrument at issuance, calculated using a discounted cash flow analysis using the Hull & White model, with a term of sixty-six months, assuming either the holder will put or the issuer will call at the redemption date. The cash dividend yield and the

Redeemable Preferred Stock, including the payment-in-kind Redeemable Preferred Stock, were discounted at the spot rate plus a 14.2% credit spread adjustment to a zero coupon yield curve, which is being accreted to redemption value over the period preceding the holder's right to mandatorily redeem the instrument, or sixty-six months from issuance, using the effective interest method. An increase in the discount rate would result in a decrease in the estimated fair value of the redeemable preferred stock, while a decrease in the discount rate would result in an increase in the estimated fair value of the redeemable preferred stock. There have been no significant changes in the fair value of the Redeemable Preferred Stock subsequent to issuance.

NOTE 13—SEGMENT INFORMATION

Segment information is prepared on the same basis that our chief operating decision-maker ("CODM"), who is our chief executive officer, manages the segments, evaluates financial results, and makes key operating decisions, and for which discrete financial information is available. As of September 30, 2015, the Company had two reportable segments: Real Alloy North America ("RANA") and Real Alloy Europe ("RAEU").

Measurement of segment income or loss and segment assets and liabilities

The accounting policies of the reportable segments are the same as those described in Note 2—Financial Statement Presentation and Significant Accounting Policies. Our measure of profitability for our reportable segments is earnings before interest, taxes, depreciation and amortization and excludes certain other items (“Adjusted EBITDA”). Certain of the Company’s assets and liabilities have not been allocated to our reportable segments, including corporate cash, the common stock warrant liability, deferred income taxes, intangible assets, including goodwill, and long-term debt, none of which our CODM uses to evaluate the performance of our reportable segments. Additionally, certain of the Company’s corporate administrative expenses are not allocated to the reportable segments.

Reportable segment information

The following tables show segment revenues and Adjusted EBITDA for the three and nine months ended September 30, 2015 and a reconciliation from Adjusted EBITDA to operating profit. For the three and nine months ended September 30, 2014, there were no reportable segments.

| | Three Months Ended September 30, 2015 | | |
|-----------------|--|---------|---------|
| (In millions) | RANA | RAEU | Total |
| Revenues | \$205.2 | \$133.4 | \$338.6 |
| Adjusted EBITDA | \$15.4 | \$7.4 | \$22.8 |

| | Nine Months Ended September 30, 2015 | | |
|-----------------|---|---------|---------|
| (In millions) | RANA | RAEU | Total |
| Revenues | \$521.7 | \$323.3 | \$845.0 |
| Adjusted EBITDA | \$36.3 | \$16.9 | \$53.2 |

| | Three Months Ended September 30, 2015 | Nine Months Ended September 30, 2015 |
|---|--|---|
| (In millions) | | |
| Adjusted EBITDA | \$ 22.8 | \$ 53.2 |
| Unrealized losses (gains) on derivative financial instruments | (0.5) | 0.8 |
| Depreciation and amortization—excludes Corporate and Other | 10.3 | 24.2 |
| Impact of recording inventory at fair value through purchase accounting | 1.3 | 8.5 |
| Operating loss of Corporate and Other | 3.2 | 10.5 |
| Other | 1.1 | 2.2 |
| Operating profit | \$ 7.4 | \$ 7.0 |

The following tables present summarized balance sheet information for each of our reportable segments and a reconciliation to consolidated assets and liabilities as of September 30, 2015:

24

| (In millions) | RANA | RAEU |
|------------------------------------|---------|---------|
| Segment Assets | | |
| Current assets: | | |
| Cash and cash equivalents | \$5.2 | \$16.4 |

NOTE 14—DISCONTINUED OPERATIONS

The following table presents the assets and liabilities, as of September 30, 2015 and December 31, 2014, of the components of the Company designated as discontinued operations as of September 30, 2015:

| (In millions) | September 30, 2015 | December 31, 2014 |
|---|--------------------------|-------------------------|
| Current assets: | | |
| Cash and cash equivalents | \$ 0.1 | \$ 1.0 |
| Trade accounts receivable, net | — | 4.5 |
| Inventories | — | 11.4 |
| Other current assets | — | 1.1 |
| Total current assets of discontinued operations | \$ 0.1 | \$ 18.0 |
| Noncurrent assets: | | |
| Property, plant and equipment | \$ — | \$ 0.3 |
| Intangible assets, net | — | 1.6 |
| Goodwill | — | 17.8 |
| Other noncurrent assets | — | 0.3 |
| Total noncurrent assets of discontinued operations | \$ — | \$ 20.0 |
| Current liabilities: | | |
| Trade payables | \$ — | \$ 2.9 |
| Accrued liabilities | 0.6 | 0.3 |
| Line of credit | — | 1.0 |
| Long-term debt due within one year | — | 3.9 |
| Total current liabilities of discontinued operations | \$ 0.6 | \$ 8.1 |
| Noncurrent liabilities: | | |
| Long-term debt | \$ — | \$ 9.7 |
| Repurchase reserve | 0.7 | 5.5 |
| Total noncurrent liabilities of discontinued operations | \$ 0.7 | \$ 15.2 |

On January 9, 2015, we sold all of our interests in NABCO (previously reported as the Industrial Supply segment) for \$77.9 million, including a final working capital adjustment of \$0.1 million. As a result of the sale, the gain on sale of NABCO, along with the assets, liabilities and results of operations of NABCO are included in discontinued operations for all periods presented.

Repurchase reserve

Through the first quarter of 2015, SGGH maintained a repurchase reserve that represented estimated losses from repurchase claims, both known and unknown, based on claimed breaches of certain representations and warranties provided by FIL to counterparties that purchased residential real estate loans, predominantly from 2002 through 2007. Management estimated the likely range of the loan repurchase liability based on a number of factors, including, but not limited to, the timing of such claims relative to the loan origination date, the quality of the documentation supporting such claims, the number and involvement of cross-defendants, if any, related to such claims, and a time and expense estimate if a claim were to result in litigation. The estimate was based on then-currently available information and was subject to known and unknown uncertainties using multiple assumptions requiring significant judgment.

In June 2015, the New York State Court of Appeals affirmed the decision of the New York State Supreme Court, Appellate Division in ACE Securities Corp v. DB Structured Products, Inc. (the “ACE Securities Case”), whereby the New York state six-year statute of limitations on loan repurchase demands begins to run as of the closing date on which the representations were made, which, in the ACE Securities Case, was the date of the mortgage loan purchase agreements. Based on the final decision in the ACE Securities Case, management has reassessed its exposure to losses from repurchase demands and believes a repurchase reserve of \$0.7 million is adequate as of September 30, 2015.

Edgar Filing: Real Industry, Inc. - Form 10-Q

The Company did not settle or receive any repurchase claims during the nine months ended September 30, 2015 or the year ended December 31, 2014. The repurchase reserve liability was \$0.7 million and \$5.5 million as of September 30, 2015 and December 31, 2014, respectively. As a result of the decision in the ACE Securities Case, we reassessed the estimates for losses associated with repurchase claims and, consequently, reduced the allowance for repurchase reserves by \$4.3 million in the quarter ended June 30, 2015. During the three months ended September 30, 2015 and 2014, the repurchase reserve was reduced by zero and \$0.2 million, respectively, and \$4.8 million and \$0.7 million in the nine months ended September 30, 2015 and 2014, respectively. As a result of the change in estimate as a result of the ACE Securities Case, the nonrecurring increase in earnings increased earnings per share from discontinued operations by \$0.17 per share for the nine months ended September 30, 2015.

The following table presents the operating results, for the three and nine months ended September 30, 2015 and 2014, for the components of the Company designated as discontinued operations as of September 30, 2015:

| (In millions) | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|--|--|--------|---------------------------------------|--------|
| | 2015 | 2014 | 2015 | 2014 |
| Revenues | \$— | \$11.0 | \$0.7 | \$29.3 |
| Cost of sales | — | 6.9 | 0.4 | 18.7 |
| Gross profit | — | 4.1 | 0.3 | 10.6 |
| Selling, general and administrative expenses | — | 1.7 | 0.6 | 4.9 |
| Amortization of intangibles | — | 0.3 | — | 0.8 |
| Other operating expense, net | — | — | 0.1 | — |
| Operating profit (loss) | — | 2.1 | (0.4) | 4.9 |
| Nonoperating income | — | (0.4) | (44.6) | (2.1) |
| Earnings before income taxes | — | 2.5 | 44.2 | 7.0 |
| Income tax expense | 0.7 | 1.0 | 17.7 | 2.4 |
| Earnings (loss) from discontinued operations, net of income taxes | \$(0.7) | \$1.5 | \$26.5 | \$4.6 |

The nonoperating income for the nine months ended September 30, 2015 is primarily related to the \$39.7 million gain on sale of NABCO and the \$4.8 million reduction of the repurchase reserve, including \$4.3 million as a result of the ACE Securities Case. Income tax expense for the three months ended September 30, 2015 results from a revised estimate of the gain on sale of NABCO, for income tax purposes, and the allocation of income tax expense between continuing and discontinued operations for the nine months ended September 30, 2015.

NOTE 15—COMMITMENTS AND CONTINGENCIES

Environmental Matters

Real Alloy's operations are subject to environmental laws and regulations governing air emissions, wastewater discharges, the handling, disposal and remediation of hazardous substances and wastes, and employee health and safety. These laws can impose joint and several liabilities for releases or threatened releases of hazardous substances upon statutorily defined parties, including us, regardless of fault or the lawfulness of the original activity or disposal. Given the changing nature of environmental legal requirements, we may be required, from time to time, to take

environmental control measures at some of our facilities to meet future requirements. Real Alloy is under regulatory consent orders or directives to perform environmental remediation by agencies in two states and one foreign country.

Real Alloy's reserves for environmental remediation liabilities totaled \$21.3 million as of September 30, 2015. Of the total remediation liability, \$2.9 million is classified in accrued liabilities in the unaudited condensed consolidated balance sheets, with the remaining portion classified as environmental liabilities.

In addition to environmental liabilities, Real Alloy has asset retirement obligations associated with legal requirements related primarily to the normal operation of its landfills and the retirement of the related assets. Real Alloy's total asset retirement obligations were \$7.3 million as of September 30, 2015, of which \$0.3 million are classified as accrued liabilities and \$7.0 million as other noncurrent liabilities, which represents the most probable costs of remedial actions.

Legal Proceedings

Real Industry, Real Alloy and SGGH have been named as a defendant in or as a party to a number of legal actions or proceedings that arose in the ordinary course of business. In some of these actions and proceedings, claims for monetary damages are asserted. In view of the inherent difficulty of predicting the outcome of such legal actions and proceedings, management generally cannot predict what the

eventual outcome of the pending matters will be, what the timing of the ultimate resolution of these matters will be, or what the eventual loss related to each pending matter may be, if any.

In accordance with applicable accounting guidance, management establishes an accrued liability for litigation when those matters present loss contingencies that are both probable and reasonably estimable. In such cases, there may be an exposure to loss in excess of any amounts accrued. The estimated loss is based upon currently available information and is subject to significant judgment, a variety of assumptions, and known and unknown uncertainties. The matters underlying the estimated loss may change from time to time, and actual results may vary significantly from the current estimate. Therefore, an estimate of loss represents what management believes to be an estimate of loss only for certain matters meeting these criteria. It does not represent the Company's maximum loss exposure.

Based on management's current understanding of these pending legal actions and proceedings, it does not believe that judgments or settlements arising from pending or threatened legal matters, individually or in the aggregate, would have a material adverse effect on the consolidated financial position, results of operations or cash flows of the Company. However, in light of the inherent uncertainties involved in these matters, some of which are beyond the Company's control, and the very large or indeterminate damages sought in some of these matters, an adverse outcome in one or more of these matters could be material to the Company's results of operations or cash flows for any particular reporting period.

The legal proceedings summarized below include material matters that were resolved or concluded since December 31, 2014, as well as ongoing matters that may have an adverse effect on our business and future financial results.

SGGH Matters

Colburn Matter. Gwyneth Colburn, the former Executive Vice President of Fremont's Commercial Real Estate group, filed both a lawsuit and a bankruptcy proof of claim seeking in excess of \$2.5 million under a contract known as a management continuity agreement ("MCA"). The Company prevailed on Ms. Colburn's lawsuit and the bankruptcy court disallowed her proof of claim. With appeals from those rulings pending, in October 2015, SGGH and Ms. Colburn entered into a settlement and release agreement whereby Ms. Colburn dismissed her claims and all pending appeals in exchange for a waiver of SGGH's rights to recover costs. This matter is now concluded with SGGH prevailing in full.

Walker Matter. Kyle Walker, the former Chief Executive Officer and President of FIL, filed both a lawsuit and a bankruptcy proof of claim seeking in excess of \$3.5 million under an MCA. The Company prevailed on Mr. Walker's lawsuit and the bankruptcy court disallowed his proof of claim. With an appeal from the disallowance of the bankruptcy proof of claim pending (all appeals from the judgment in the lawsuit having been exhausted) in October 2015, SGGH and Mr. Walker entered into a settlement and release agreement whereby Mr. Walker dismissed his claims and the bankruptcy appeal in exchange for a waiver of SGGH's rights to recover costs. This matter is now concluded with SGGH prevailing in full.

RMBS Defense, Indemnity and Contribution Matters. In connection with residential mortgage-backed securities offerings ("RMBS Offerings") involving loans originated by FIL, either or both of FIL and its subsidiary entered into loan purchase agreements, underwriting agreements and indemnification and contribution agreements, which contained or incorporated various representations and warranties relating to the loans. Investment banks involved in these RMBS Offerings have been sued in a number of actions concerning their activities related to subprime mortgages ("RMBS Actions"), where SGGH or its former businesses is not a named defendant. SGGH has received demands for defense, indemnity and contribution from defendants in various RMBS Actions. SGGH has rejected each of these demands on several grounds. There is no assurance that SGGH or its former businesses will not be named as defendants in additional RMBS Actions, be sued to enforce claimed rights to defense, indemnity and contribution, or receive additional demands for defense, indemnity and contribution. It is SGGH's intention to vigorously defend any such claims, but SGGH cannot presently predict whether such claims will be pursued or what the outcome would be.

Subpoenas for Information and Documents. In addition to the above-described RMBS Actions, SGGH has received and responded to a number of subpoenas for information from federal agencies and other third parties in civil litigation matters in which SGGH is not a defendant, but which concern home mortgage transactions involving the Fremont's origination and sale of whole loans, and certain RMBS Offerings.

Remaining Bankruptcy Claims. As of September 30, 2015, there remained two open claims filed with the United States Bankruptcy Court for the Central District of California, comprised of the disputed Colburn and Walker claims totaling \$5.1 million. As described above, in October 2015, both the Colburn and Walker bankruptcy claims were settled, with SGGH prevailing in full.

NOTE 16—SUBSEQUENT EVENT

On October 6, 2015, the Company filed a \$700.0 million shelf registration statement on Form S-3, which the SEC declared effective on October 22, 2015. This shelf registration statement replaces our Form S-3 declared effective by the SEC on September 26, 2013. Under the new shelf registration statement, the Company can issue up to \$700.0 million of debt and/or equity securities.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This Item 2 contains certain non-GAAP financial information. See "Non-GAAP Financial Measures" below for important information regarding the non-GAAP financial information included in this Item 2 and the unaudited condensed consolidated financial statements contained in Part I, Item 1 of this Report, together with a reconciliation of such non-GAAP financial information presented to the most comparable GAAP financial information.

Certain statements in this Report, including, without limitation, matters discussed in this "Management's Discussion and Analysis of Financial Condition and Results of Operations" ("MD&A"), should be read in conjunction with the unaudited condensed consolidated financial statements, related notes, and other detailed information included in Part I, Item 1 of this Report, with our audited consolidated financial statements, related notes thereto, and other detailed information included in Part IV, Item 15A of our Annual Report, our reclassified audited consolidated financial statements and other detailed information included in our Current Report on Form 8-K filed with the SEC on October 6, 2015, and "Risk Factors" included in Part I, Item 1A of our Annual Report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including, but not limited to, those set forth under "Risk Factors" in this Report and in our Annual Report. We undertake no obligation to update or revise the information contained herein including, without limitation, any forward-looking statements or such risk factors whether as a result of new information, subsequent events or circumstances, or otherwise, unless otherwise required by law.

We are including this cautionary statement to make applicable and take advantage of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Certain statements that are not historical fact are forward-looking statements, and include statements with respect to our beliefs, plans, objectives, goals, expectations, anticipations, assumptions, estimates, intentions, and future performance. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors, which may be beyond our control, and that could cause actual results, performance or achievements to differ materially from those expressed or implied by such forward-looking statements. These forward-looking statements are based on our current beliefs, intentions and expectations. These statements are neither guarantees nor indicative of future performance.

Overview

Real Industry is a Delaware holding company that owns all of the outstanding interests of its primary operating companies, Real Alloy Parent and SGGH. In 2014, the Company's principal activities were in the former Industrial Supply operating segment. Following the NABCO Sale and the Real Alloy Acquisition, both of which occurred in the first quarter of 2015, our principal activities are now related to our aluminum recycling and specification alloys business. The Real Alloy Acquisition was a transformative event for the Company, both in terms of size and substance. We are devoting significant time and attention to integrating and incorporating the Real Alloy Business into the Company, even as a largely stand-alone operating entity. For more information on the details of the Real Alloy Acquisition and the Financings for such transaction, please see Note 1—Business and Operations and Note 3—Business Combinations in the Notes to Unaudited Condensed Consolidated Financial Statements in Part I, Item 1 of this Report.

Real Alloy is a global leader in third-party aluminum recycling, which includes the processing of scrap aluminum and by-products and the manufacturing of wrought, cast and specification or foundry alloys. Real Alloy offers a broad range of products and services to wrought alloy processors, automotive original equipment manufacturers, and foundries and casters. Real Alloy delivers recycled metal in liquid or solid form according to its customers' specifications. Its facilities are capable of processing industrial (new) scrap, post-consumer (old/obsolete) scrap, and

various aluminum by-products, giving Real Alloy a great degree of flexibility in reclaiming high-quality recycled aluminum for its customers.

Real Industry's focus is on the growth of the Real Alloy Business, as well as acquisitions of additional operating companies. We seek to acquire controlling interests in businesses with talented and experienced management teams, strong margins, and defensible market positions. We regularly consider acquisitions of businesses that operate in undervalued industries, as well as businesses that we believe are in transition or are otherwise misunderstood by the marketplace. Post-acquisition, we plan to operate our businesses as autonomous subsidiaries. We anticipate that we will continue to use our securities to pursue value-enhancing acquisitions and leverage our considerable tax assets, as well as support the growth needs of our existing operating segments, as necessary.

A key element to our business strategy is utilizing our federal NOLs, primarily generated by SGGH's former businesses, then known as Fremont and its primary operating subsidiary, FIL. As of December 31, 2014, our federal and California NOLs were approximately \$933.6 million and \$994.7 million, respectively. The NOLs are further discussed in Note 9—Income Taxes in the Notes to Unaudited Condensed Consolidated Financial Statements included in Part I, Item 1 of this Report.

The Company's consolidated financial statements included in this Report and MD&A present the Company's financial condition and results of operations by reportable segment, Corporate and Other, and discontinued operations.

Our Segments

We have two reportable segments based on the organizational structure that our CODM currently uses to evaluate performance, make decisions on resource allocations and perform business reviews of financial results. One additional line of business, a specialty cosmetics company, does not meet the criteria of a reportable segment and is included in Corporate and Other. The Company's reportable segments are Real Alloy North America ("RANA") and Real Alloy Europe ("RAEU"), as further described below. We are only reporting the results of these reportable segments for the period from February 27, 2015 to September 30, 2015, or approximately seven months, under the captions "for the nine months ended September 30, 2015."

In addition to analyzing our consolidated operating performance based on revenues, our CODM measures the performance of our reportable segments utilizing Adjusted EBITDA, discussed further below in "Critical Measures of Our Financial Performance." Adjusted EBITDA is a non-GAAP financial measure that has limitations as an analytical tool and should be considered in addition to, and not in isolation, or as a substitute for, or as superior to, our measures of financial performance prepared in accordance with GAAP. Management, including our CODM, uses Adjusted EBITDA in managing and assessing the performance of our business segments and overall business, and believes that Adjusted EBITDA provides investors and other users of our financial information with additional useful information regarding the ongoing performance of the underlying business activities of our segments, as well as comparisons between our current results and results in prior periods. For additional information regarding non-GAAP financial measures, see "Non-GAAP Financial Measures."

Real Alloy North America

Our RANA segment includes aluminum melting, processing, recycling, and alloying activities conducted in eighteen facilities located in the United States, Canada and Mexico. This segment's operations convert aluminum scrap and dross (a by-product of melting aluminum) in combination with other alloying agents, hardeners, or other additives, as needed, to produce recycled aluminum alloys with chemical compositions and specific properties, including increased strength, formability and wear resistance, as specified by customers for their particular applications. RANA services customers serving end-uses related to automotive, consumer packaging, construction, transportation and steel. Similar to the second quarter of 2015, we estimate that approximately 58% of RANA's invoiced sales volume was used in automotive applications in the third quarter of 2015. A significant percentage of this segment's volume is sold through tolling arrangements, in which RANA converts customer-owned aluminum scrap and dross and returns the recycled metal in ingot or molten form to these same customers for a fee. The remainder of RANA's volume is supplied under "buy/sell" arrangements with our customers whereby scrap aluminum is purchased from third parties and we convert that material to our customers' specifications and deliver it in ingot or molten form. The "buy/sell" portion of RANA's business has a much more significant impact on reported revenue and cost of sales compared to tolling arrangements, as the metal cost of the third party purchases of scrap are included in the figures. For the three and nine months ended September 30, 2015, RANA reported \$205.2 million and \$521.7 million of revenues, respectively, which represented 60.6% and 61.7% of the Company's consolidated revenue.

Real Alloy Europe

We are a leading European recycler of aluminum scrap and magnesium through our RAEU segment. Similar to RANA, this segment's operations primarily convert aluminum scrap, dross and other alloying agents as needed and deliver the recycled metal in ingot or molten form to our customers from six facilities located in Germany, Norway and Wales. Our RAEU segment supplies the European automobile industry, which we estimate represented approximately 72% of this segment's invoiced sales volume in the second and third quarters of 2015, and other aluminum producers and manufacturers serving other European aluminum industries. Also similar to RANA, RAEU services its customer via tolling and "buy/sell" arrangements. For the three and nine months ended September 30, 2015, RAEU reported \$133.4 million and \$323.3 million in revenues, respectively, which represented 39.4% and 38.3% of the Company's consolidated revenue.

Corporate and Other

Operating costs in Corporate and Other relate to administrative, financial and human resource activities related to the oversight of our operating segments, implementation of our acquisition and growth strategies, management of our discontinued operations, and maintaining our public company status. We do not allocate such costs to specific segments and are therefore excluded from segment results of operations, as management excludes such costs when assessing segment performance. Corporate and Other also includes the results of operating entities that do not meet the threshold of a reportable segment.

Discontinued Operations

Discontinued operations presents the financial condition and results of operations of the businesses and operations of our subsidiary SGGH that have been sold, or have been discontinued, including NABCO and certain of Fremont's former operations where SGGH is still engaged in various legal proceedings. During the first quarter of 2015, NABCO was sold for a pretax gain of \$39.7 million and its results of operations have been reclassified to discontinued operations for all periods presented. See "Legal Proceedings" in Note 15—Commitments and Contingencies in the Notes to Unaudited Condensed Consolidated Financial Statements in Part I, Item 1 of this Report for more information about the material legal proceedings in which SGGH is involved, which are all related to Fremont's former operations.

Critical Measures of Our Financial Performance

The financial performance of our operating segments is the result of several factors, the most critical of which are as follows:

- Volumes invoiced;
- Tolling and Buy/Sell percentages;
- Revenues; and
- Adjusted EBITDA

The financial performance of Real Alloy is determined, in part, by the volume of metal processed and invoiced. Increased production volume will normally result in lower per unit costs, while higher invoiced volumes will normally result in additional revenue and associated margins. A significant component of our revenue is derived from scrap aluminum prices, which is a commodity that changes based on both macro and microeconomic supply and demand conditions, and we generally pass through this price volatility to our customers. Revenues and margin percentages are also subject to fluctuations based upon the percentage of customer-owned metal tolled or processed. Increased processing under such tolling agreements results in lower revenues and generally also results in higher gross profit and net earnings margins compared to our buy/sell arrangements. Tolling agreements reduce our exposure to the risk of changing metal prices and reduce our working capital requirements. Although tolling agreements are beneficial to us in these ways, the percentage of our capacity we process under these agreements is limited by the amount of metal our customers own and their willingness to enter into such arrangements.

In addition to focusing on tolling relationships and carefully managing the size of our commercial inventory position related to our Buy/Sell business, Real Alloy also utilizes various derivative financial instruments designed to reduce the impact of changing aluminum prices on these net physical purchases and sales, particularly in our European operations. A portion of our Buy/Sell business is done based on published indices, which often do not correlate with the LME and, therefore, are not hedged. Real Alloy's risk management practices reduce but do not eliminate exposure to changing aluminum prices. While these practices limit exposure to unfavorable aluminum price changes, they also limit Real Alloy's ability to benefit from favorable price changes. Further, counterparties may require the posting of cash collateral if the fair value of derivative liabilities exceeds the amount of credit granted by each counterparty, thereby reducing liquidity. As of September 30, 2015, no cash collateral was posted with counterparties.

Margins are impacted by the fees we charge our customers to process their metal, by "scrap spreads," which represent the difference between the purchase price of the scrap aluminum we buy and our selling prices, and by conversion costs. Scrap prices tend to be determined regionally and are typically impacted by supply and demand dynamics. While scrap prices may trend in a similar direction as primary aluminum prices, the extent of price movements is not highly correlated and can cause unpredictable movements in metal spreads of scrap versus primary aluminum. Our operations are more significantly impacted by "scrap spreads," which we strive to maximize by utilizing all grades of scrap and optimizing our metal blends and plant loadings. Additionally, our operations are labor intensive and require a significant amount of energy (primarily natural gas and electricity) to melt scrap or primary aluminum, which we refer to as conversion costs.

Our measure of profitability for our operating segments is Adjusted EBITDA, or earnings before interest, taxes, depreciation and amortization and excludes items of a nonoperational nature that may include unrealized and certain realized gains and losses on derivative financial instruments, charges and expenses related to acquisitions, and certain other gains and losses. See “Non-GAAP Financial Measures” below for a further discussion of our use of non-GAAP financial measures.

Critical Accounting Policies and Estimates

Our accounting and reporting policies conform to GAAP and are fundamental to understanding our unaudited condensed consolidated financial statements and this MD&A. Several of our policies are critical as they require management to make difficult, subjective and complex judgments about matters that are inherently uncertain and affect the reported amount of assets, liabilities, and operating revenues and costs included in the unaudited condensed consolidated financial statements. Circumstances and events that differ significantly from those underlying our estimates, assumptions and judgments could cause the actual amounts reported to differ significantly from these estimates. Prior to the Real Alloy Acquisition, these policies governed the repurchase reserve; deferred tax asset valuation; and goodwill and intangible assets, each of which is described in Part II, Item 7 of the Annual Report. As a result of the Real Alloy Acquisition and the NABCO Sale, we identified additional critical accounting policies or estimates including: business combinations; discontinued operations; revenue recognition and shipping and handling costs; inventories; derivative financial instruments; currency translation; environmental and asset retirement obligations; and pension benefits, each of which is described in Part I, Item 2 of the Company's quarterly report on Form 10-Q for the quarterly period ended March 31, 2015, filed with the SEC on May 12, 2015.

On an ongoing basis, we evaluate our estimates and assumptions used in these policies based on historical experience and various other factors and circumstances. We believe our estimates and assumptions are reasonable under the circumstances; however, actual results may differ significantly from these estimates and assumptions, which could have a material impact on the carrying value of assets and liabilities as of the balance sheet dates and our results of operations for the reporting periods presented.

Results of Operations

The following table presents selected components of our unaudited condensed consolidated statements of operations for the three and nine months ended September 30, 2015 and 2014:

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---|--|--------|---------------------------------------|--------|
| (In millions, except per share amounts) | 2015 | 2014 | 2015 | 2014 |
| Revenues | \$338.6 | \$— | \$845.1 | \$0.1 |
| Cost of sales | 313.2 | — | 793.5 | 0.4 |
| Gross profit (loss) | 25.4 | — | 51.6 | (0.3) |
| Operating costs | 18.0 | 3.8 | 44.6 | 8.9 |

Edgar Filing: Real Industry, Inc. - Form 10-Q

Consolidated Results of Operations for the Three and Nine Months Ended September 30, 2015

As a result of the transformation of our business in the first quarter of 2015 from the Real Alloy Acquisition and the NABCO Sale, historical comparisons of our operating results are limited in value and we have elected not to make any comparisons that management deems could be misleading.

Net earnings for the three months ended September 30, 2015 was \$1.2 million, or \$0.02 per basic and diluted earnings per share. Net loss for the nine months ended September 30, 2015 was \$3.3 million, or \$0.19 per basic and diluted loss per share. Our consolidated results for the nine months ended September 30, 2015 only include the results of operation of Real Alloy from the acquisition date through September 30, 2015, or approximately seven months. In both the three and nine months ended September 30, 2015, our consolidated results include a number of one-time expenses or events that may be considered obscuring underlying operating results. The following events are particularly noteworthy for these reporting periods:

- We incurred zero and \$14.8 million of transaction and financing-related costs and expenses associated with the Real Alloy Acquisition during the three and nine month periods, respectively;
- We reported \$1.3 million and \$8.5 million in noncash cost of sales related to the amortization of the fair value adjustment of inventories under purchase accounting during the three and nine month periods, respectively;
- There was approximately \$4.9 million of interest expense (including amortization of issuance discount and debt issuance costs) associated with the Senior Secured Notes for the fifty days from funding on January 8, 2015 to the closing date of the Real Alloy Acquisition on February 27, 2015 where we had no offsetting operations from Real Alloy;
- We reported \$3.4 million of other noncash nonoperating income and \$2.2 million of other noncash nonoperating expense from the change in fair value of common stock warrant liability during the three and nine month periods, respectively. The nonoperating income recognized in the three months ended September 30, 2015 was primarily driven by the decrease in the price of our common stock during the quarter, while the nonoperating expense recognized in the nine months ended September 30, 2015 was primarily driven by the increase in the price of our common stock from December 31, 2014; and
- We recorded a \$39.7 million pretax gain on sale of NABCO during the nine month period, as well as \$4.8 million of recovery on allowance for repurchase reserve, reported in discontinued operations.

Segments' Results of Operations for the Three and Nine Months Ended September 30, 2015

The following tables present our segment results of operations for the three and nine months ended September 30, 2015, and a reconciliation of Adjusted EBITDA to operating profit. As previously discussed, as a result of the transformative transactions completed in the first quarter of 2015 our segments did not exist in the comparable period for the prior year, so we are not reporting comparable results of operations. The results of operations of Real Alloy are included from the acquisition date, February 27, 2015, through September 30, 2015. See "Non-GAAP Financial Measures" below for more information about Adjusted EBITDA.

| (Dollars in millions, tons in thousands) | Three Months Ended September 30, 2015 | | |
|--|--|---------|---------|

RANA Segment

For the three months ended September 30, 2015, RANA generated \$15.4 million of Adjusted EBITDA on \$205.2 million of total revenues. During the period, buy/sell arrangements with our customers represented 44% of total invoiced volume, while tolling arrangements represented 56%, compared to 46% buy/sell and 54% tolling arrangements in the second quarter. Adjusted EBITDA per metric ton invoiced decreased to \$77 in the three months ended September 30, 2015, as compared to \$78 in the second quarter, as metal spreads remained relatively constant.

For the nine months ended September 30, 2015, RANA generated \$36.3 million of Adjusted EBITDA on \$521.7 million of total revenues. During the period, buy/sell arrangements with our customers represented 44% of total invoiced volume. Adjusted EBITDA per metric ton invoiced was \$76 in the nine months ended September 30, 2015.

Gross profit for RANA was \$16.2 million for the three months ended September 30, 2015, representing a margin of 7.9% of total revenues. Cost of sales consists primarily of metal costs and conversion costs. During the quarter, RANA's cost of sales includes \$0.7 million in noncash expenses associated with purchase accounting resulting from the amortization of the fair value adjustment of acquired inventories. Excluding this amount, gross profit would have been \$16.9 million during the period or a gross margin of 8.2%. Cost of sales per metric ton invoiced for the three months ended September 30, 2015 was \$943, as compared to \$1,073 in the period from February 27 to June 30, 2015, primarily from lower metal costs. During the three months ended September 30, 2015, gross profit was positively impacted by lower maintenance costs as a result of purchase accounting adjustments to property, plant and equipment.

Gross profit was \$34.1 million for the period from February 27, 2015 to September 30, 2015, representing a margin of 6.5% of total revenues. Cost of sales includes \$4.5 million in expenses associated with purchase accounting due to the amortization of the fair value adjustment of acquired inventories. Excluding this amount, gross profit would have been \$38.6 million during the period or a gross margin of 7.4%. Cost of sales per metric ton invoiced for the nine months ended September 30, 2015 was \$1,019.

Selling, general and administrative (“SG&A”) expenses, excluding depreciation and amortization, were \$8.8 million and \$18.9 million for the three months ended September 30, 2015 and the nine months ended September 30, 2015, respectively. Approximately 25% of the SG&A expenses RANA incurred during the three months ended September 30, 2015 relate to transition services expenses for support received from Aleris for information technology services, treasury services, accounts payable, cash management and payroll, credit/collection services, environmental services and human resource services. As Real Alloy continues to implement its separation from Aleris, management anticipates that expenses related to the transition services agreement with Aleris will decrease, and such costs and expenses will be replaced directly at Real Alloy as it builds out its own stand-alone infrastructure. We expect the

ongoing expenses as a stand-alone operation to be lower than the expenses associated with the transition services provided by Aleris.

RANA recognized \$0.3 million and \$0.3 million of losses on derivative financial instruments in the three and nine months ended September 30, 2015, respectively. All of the losses were unrealized as of September 30, 2015. Generally, realized gains or losses represent the cash paid or received upon settlement of our derivative financial instruments, which offsets the corresponding loss or gain realized on the physical material included in cost of sales. Unrealized gains or losses reflect the change in the fair value of derivative financial instruments from the later of the end of the prior period or our entering into the derivative instrument, as well as the reversal of previously recorded unrealized gains or losses for derivatives that settled during the period.

Depreciation and amortization was \$7.2 million and \$17.0 million for the three and nine months ended September 30, 2015, respectively. Capital expenditures were \$15.9 million during the nine months ended September 30, 2015.

RAEU Segment

For the three months ended September 30, 2015, RAEU generated \$7.4 million of Adjusted EBITDA on \$133.4 million of total revenues. During the period, buy/sell arrangements with our customers represented 47% of total invoiced volume, while tolling arrangements represented 53%, compared to 50% buy/sell and 50% toll in the second quarter. Adjusted EBITDA per metric ton invoiced increased to \$74 in the three months ended September 30, 2015 as compared to \$70 in the second quarter, driven primarily by more favorable metal spreads.

For the period from February 27, 2015 to September 30, 2015, Adjusted EBITDA was \$16.9 million on \$323.3 million of total revenues. During the period, buy/sell arrangements with our customers represented 48% of total invoiced volume, while tolling arrangements represented 52%. Adjusted EBITDA per metric ton invoiced was \$71 in the nine months ended September 30, 2015.

Gross profit for RAEU was \$7.7 million for the three months ended September 30, 2015, representing a margin of 5.8% of total revenues. During the quarter, RAEU's cost of sales includes \$0.6 million in expenses associated with purchase accounting due to the amortization of the fair value adjustment of acquired inventory. Excluding this amount, gross profit would have been \$8.3 million during the period, or a gross margin of 6.2%. Cost of sales per metric ton invoiced was \$1,263 during the three months ended September 30, 2015, as compared to \$1,323 during the three months ended June 30, 2015.

Gross profit was \$15.2 million for the period from February 27, 2015 to September 30, 2015, representing a margin of 4.7% of total revenues. During the period, cost of sales includes \$4.1 million in expenses associated with purchase accounting due to the amortization of the fair value adjustment of acquired inventory, which will not be significant in the future. Excluding this amount, gross profit would have been \$19.3 million during the period, or a gross margin of 6.0%. Cost of sales per metric ton invoiced was \$1,299 during the nine months ended September 30, 2015. In addition, during the nine months ended September 30, 2015, RAEU's gross profit was positively impacted by lower maintenance costs as a result of purchase accounting adjustments to property, plant and equipment.

SG&A expenses, excluding depreciation and amortization, were \$4.5 million and \$10.4 million for the three months ended September 30, 2015 and the period from February 27, 2015 to September 30, 2015, respectively. Approximately 16% of the SG&A expenses RAEU incurred during the three months ended September 30, 2015 relate to transition services expenses for support received from Aleris, primarily for information technology services. As Real Alloy implements its separation from Aleris, management expects expenses related to the transition services agreement with Aleris to decrease over the remainder of the year, but such costs and expenses will be replaced directly at Real Alloy as the business builds out its own stand-alone infrastructure. We expect the ongoing expenses as a stand-alone operation to be lower than the expenses associated with Aleris' transition services.

RAEU recognized \$0.7 million and \$2.7 million of losses on derivative financial instruments in the three and nine months ended September 30, 2015, respectively, including \$1.5 million and \$2.2 million of realized losses, respectively, and unrealized gains of \$0.8 million in the three months ended September 30, 2015 and \$0.5 million of unrealized losses in the nine months ended September 30, 2015.

Depreciation and amortization was \$3.1 million and \$7.2 million for the three months ended September 30, 2015 and the period from February 27, 2015 to September 30, 2015, respectively. Capital expenditures were \$2.7 million for the nine months ended September 30, 2015.

Operating costs outside of segments

Operating costs outside of our reportable segments, included in Corporate and Other, relate to administrative, financial and human resource activities related to the oversight of our operating segments, implementation of our acquisition and growth strategies, management of our discontinued operations, and maintaining our public company status. We do

not allocate such costs to specific segments and exclude them from segment results of operations, as management excludes such costs when assessing segment performance. For the three and nine months ended September 30, 2015, operating costs in Corporate and Other were \$3.2 million and \$10.5 million, respectively.

Corporate and Other also includes the results of Cosmedicine, a small specialty cosmetics business owned by the Company, as it does not meet the threshold of a reportable segment. The operations of Cosmedicine, which re-launched its branded skin care product line during the second quarter, incurred operating costs of \$0.5 million and \$1.3 million in the three and nine months ended September 30, 2015, respectively.

Nonoperating expenses and income

Interest expense, net

Interest expense for the three and nine months ended September 30, 2015 was \$9.2 million and \$26.6 million, respectively, related to debt and the Factoring Facility. Included in interest expense are the amortization of debt issuance costs, which represent original issue discounts, placement and advisory fees, legal, accounting and other costs associated with issuing such debt. The amortization of debt issuance costs included in interest expense in the three and nine months ended September 30, 2015 was \$1.3 million and \$3.7 million, respectively. For the nine months ended September 30, 2015, interest expense, including amortization of original issue discount and debt issuance costs, associated with the Senior Secured Notes was recorded in the period January 8, 2015 through September 30, 2015, while the interest expense, including amortization of debt issuance costs, associated with the Factoring Facility and Asset-Based Facility was recorded in the period February 27, 2015 through September 30, 2015.

Acquisition and financing-related costs and expenses

Acquisition and financing-related costs and expenses in the three and nine months ended September 30, 2015 were zero and \$14.8 million, respectively, and relate to the Real Alloy Acquisition.

Other

We reported \$3.4 million of other noncash nonoperating income and \$2.2 million of other noncash nonoperating expense from the change in fair value of common stock warrant liability during the three and nine month periods, respectively. Additionally, during the three months ended September 30, 2015, the Company recognized a \$0.9 million gain on the sale of a trademark owned by Cosmedicine.

Provision for income taxes

At the end of each reporting period, we make an estimate of the Company's annual effective consolidated income tax rate. The estimate used for the period ended September 30, 2015 may change in subsequent periods. Income tax expense for the three months ended September 30, 2015 was \$0.5 million and the income tax benefit for the nine months ended September 30, 2015 was \$6.7 million. The effective tax rate for the three and nine months ended September 30, 2015 and 2014 differed from the federal statutory rate applied to earnings and losses before income taxes primarily as a result of the mix of earnings and losses and tax rates between tax jurisdictions and valuation allowances.

Real Industry has valuation allowances recorded to reduce certain deferred tax assets to amounts that are more likely than not to be realized. The valuation allowances relate to the potential inability to realize our deferred tax assets associated with NOLs in the United States and certain other foreign jurisdictions. Real Industry intends to maintain its valuation allowances until sufficient positive evidence exists to support their reversal.

Discontinued Operations

Discontinued operations presents the financial condition and results of operations of SGGH's former businesses, specifically, NABCO and certain of Fremont's former operations. Earnings from discontinued operations, net of income taxes decreased \$2.2 million to a \$0.7 million loss for the three months ended September 30, 2015, as compared to earnings of \$1.5 million for the three months ended September 30, 2014. The decrease was due primarily to the earnings from NABCO in 2014.

Earnings from discontinued operations, net of income taxes increased \$21.9 million to \$26.5 million for the nine months ended September 30, 2015, as compared to \$4.6 million for the nine months ended September 30, 2014. The

earnings of discontinued operations, net of income taxes in 2015 primarily represents the \$39.7 million pretax gain on sale of NABCO and the \$4.8 million recovery of the reserve for repurchase reserve, partially offset by a \$15.3 million increase in income tax expense in 2015 and the reduction of NABCO's earnings in 2014.

FINANCIAL CONDITION

The following table presents selected components of the Company's unaudited condensed consolidated balance sheets as of September 30, 2015 and December 31, 2014:

| (In millions) | September 30, 2015 | December 31, 2014 |

General

Edgar Filing: Real Industry, Inc. - Form 10-Q

As a result of the transformation of our business in the first quarter of 2015 from the Real Alloy Acquisition and the NABCO Sale, historical comparisons of our financial condition are limited in value and we have elected not to make any comparisons that management deems could be misleading.

As discussed further below, total assets increased \$641.3 million to \$763.2 million as of September 30, 2015, from \$121.9 million as of December 31, 2014; total liabilities increased \$560.9 million to \$597.2 million as of September 30, 2015, from \$36.3 million as of December 31, 2014; and total stockholders' equity increased to \$144.8 million as of September 30, 2015, from \$85.6 million as of December 31, 2014.

Edgar Filing: Real Industry, Inc. - Form 10-Q

Changes in stockholders' equity reflect net earnings during the period, increased by equity issuances, share-based compensation expense, dividends and accretion on Redeemable Preferred Stock, and changes in accumulated other comprehensive loss. See the Note 7—Stockholders' Equity and Noncontrolling Interest in the Notes to Unaudited Condensed Consolidated Financial Statements included in Part I, Item 1 of this Report for more details on changes in stockholders' equity.

The following table presents the assets and liabilities of our reportable segments as of September 30, 2015:

| (In millions) | RANA | RAEU |
|------------------------------------|----------------|----------------|
| Segment Assets | | |
| Current assets: | | |
| Cash and cash equivalents | \$5.2 | \$16.4 |
| Trade accounts receivable, net | 86.4 | 15.2 |
| Financing receivable | — | 47.6 |
| Inventories | 72.9 | 45.2 |
| Other current assets | 5.1 | 2.8 |
| Total current assets | 169.6 | 127.2 |
| Property, plant and equipment, net | 215.4 | 104.6 |
| Other noncurrent assets | 4.8 | 2.0 |
| Total segment assets | \$389.8 | \$233.8 |
| Segment Liabilities | | |
| Current liabilities: | | |
| Trade payables | \$65.0 | \$55.3 |
| Accrued liabilities | 22.3 | 13.1 |
| Total current liabilities | 87.3 | 68.4 |
| Accrued pension benefits | — | 46.3 |
| Environmental liabilities | 18.4 | — |
| Other noncurrent liabilities | 6.9 | 1.7 |
| Total segment liabilities | \$112.6 | \$116.4 |

The following table provides a reconciliation of allocated segment assets and liabilities to consolidated assets and liabilities as of September 30, 2015. Unallocated assets and liabilities consist primarily of corporate cash and cash equivalents, deferred income taxes, intangible assets, goodwill, and long-term debt, none of which our CODM uses in the evaluation of operating performance of the reportable segments.
