For the quarterly period ended September 30, 2014
OR
o TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from to
Commission File No.: 0-50231
Federal National Mortgage Association
(Exact name of registrant as specified in its charter)
Fannie Mae

Federally chartered corporation	52-0883107
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)
3900 Wisconsin Avenue, NW Washington, DC	20016 (Zip Code)

(Address of principal executive offices)
Registrant's telephone number, including area code:
(202) 752-7000
Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes þ No o
Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes þ No o
Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer þ	Accelerated filer o
Non-accelerated filer o (Do not check if a smaller reporting company)	Smaller reporting company o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No þ
As of September 30, 2014, there were 1,158,082,750 shares of common stock of the registrant outstanding.

PART I—FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

We have been under conservatorship, with the Federal Housing Finance Agency ("FHFA") acting as conservator, since September 6, 2008. As conservator, FHFA succeeded to all rights, titles, powers and privileges of the company, and of any shareholder, officer or director of the company with respect to the company and its assets. The conservator has since delegated specified authorities to our Board of Directors and has delegated to management the authority to conduct our day-to-day operations. Our directors do not have any fiduciary duties to any person or entity except to the conservator and, accordingly, are not obligated to consider the interests of the company, the holders of our equity or debt securities or the holders of Fannie Mae MBS unless specifically directed to do so by the conservator. We describe the rights and powers of the conservator, key provisions of our agreements with the U.S. Department of the Treasury ("Treasury"), and their impact on shareholders in our Annual Report on Form 10-K for the year ended December 31, 2013 ("2013 Form 10-K") in "Business—Conservatorship and Treasury Agreements."

You should read this Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") in conjunction with our unaudited condensed consolidated financial statements and related notes and the more detailed information in our 2013 Form 10-K.

This report contains forward-looking statements that are based on management's current expectations and are subject to significant uncertainties and changes in circumstances. Please review "Forward-Looking Statements" for more information on the forward-looking statements in this report. Our actual results may differ materially from those reflected in our forward-looking statements due to a variety of factors including, but not limited to, those discussed in "Risk Factors" and elsewhere in this report and in "Risk Factors" in our 2013 Form 10-K.

You can find a "Glossary of Terms Used in This Report" in the "MD&A" of our 2013 Form 10-K.

INTRODUCTION

Fannie Mae is a government-sponsored enterprise ("GSE") that was chartered by Congress in 1938. We serve an essential role in the functioning of the U.S. housing market and are investing in improvements to the U.S. housing finance system. Our public mission is to support liquidity and stability in the secondary mortgage market, where existing mortgage-related assets are purchased and sold, and to increase the supply of affordable housing. Our charter does not permit us to originate loans or lend money directly to consumers in the primary mortgage market.

Fannie Mae provides reliable, large-scale access to affordable mortgage credit and indirectly enables families to buy, refinance or rent homes. We securitize mortgage loans originated by lenders into Fannie Mae mortgage-backed securities that we guarantee, which we refer to as Fannie Mae MBS. One of our key functions is to evaluate, price and manage the credit risk on the loans and securities that we guarantee. We also purchase mortgage loans and mortgage-related securities for securitization and sale at a later date and, to a declining extent, for our retained mortgage portfolio. We use the term "acquire" in this report to refer to both our securitizations and our purchases of mortgage-related assets. We obtain funds to support our business activities by issuing a variety of debt securities in the domestic and international capital markets, which attracts global capital to the United States housing market.

Our conservatorship has no specified termination date, and we do not know when or how the conservatorship will terminate, whether we will continue to exist following conservatorship, what changes to our business structure will be made during or following the conservatorship, or what ownership interest, if any, our current common and preferred stockholders will hold in us after the conservatorship is terminated. In addition, our agreements with Treasury that provide for financial support include covenants that significantly restrict our business activities and provide for dividends to accrue at a rate equal to our net worth less a capital reserve amount, allowing us to retain only a limited and decreasing amount of our net worth. We provide additional information on the conservatorship, the provisions of our agreements with Treasury, and their impact on our business in our 2013 Form 10-K in "Business—Conservatorship and Treasury Agreements" and "Risk Factors." We discuss the uncertainty of our future in "Executive Summary—Outlook" and "Risk Factors" in this report. We discuss proposals for housing finance reform that could materially affect our business in "Legislative and Regulatory Developments" in this report, in our quarterly report on Form 10-Q for the quarter ended June 30, 2014 ("Second Quarter 2014 Form 10-Q") and in our quarterly report on Form 10-Q for the quarter ended March 31, 2014 ("First Quarter 2014 Form 10-Q"), and in "Business—Housing Finance Reform" in our 2013 Form 10-K.

1

Although Treasury owns our senior preferred stock and a warrant to purchase 79.9% of our common stock, and has made a commitment under a senior preferred stock purchase agreement to provide us with funds to maintain a positive net worth under specified conditions, the U.S. government does not guarantee our securities or other obligations. Our common stock is traded in the over-the-counter market and quoted on the OTC Bulletin Board under the symbol "FNMA." Our debt securities are actively traded in the over-the-counter market.

EXECUTIVE SUMMARY

Our Strategy and Progress

We are focused on:

- achieving strong financial performance and strengthening our book of business;
- supporting the housing recovery by providing reliable, large-scale access to affordable mortgage credit and helping struggling homeowners; and
- helping to build a sustainable housing finance system.

Achieving strong financial performance and strengthening our book of business

Our actions to accomplish these goals have had a positive impact:

- Financial Performance. We reported net income of $3.9 billion for the third quarter of 2014, compared with net income of $8.7 billion for the third quarter of 2013. See "Summary of Our Financial Performance" below for an overview of our financial performance for the third quarter and first nine months of 2014, compared with the third quarter and first nine months of 2013. We expect to remain profitable for the foreseeable future. For more information regarding our expectations for our future financial performance, see "Outlook—Financial Results" and "Outlook—Revenues" below.
- Dividend Payments to Treasury. With our expected December 2014 dividend payment to Treasury, we will have paid a total of $134.5 billion in dividends to Treasury on our senior preferred stock. The aggregate amount of draws we have received from Treasury to date under the senior preferred stock purchase agreement is $116.1 billion. Under the terms of the senior preferred stock purchase agreement, dividend payments do not offset prior Treasury draws. See "Outlook—Dividend Obligations to Treasury" below for more information regarding our dividend payments to Treasury.
- Book of Business. Changes we have made beginning in 2008 to strengthen our underwriting and eligibility standards have improved the credit quality of our single-family guaranty book of business. Single-family loans we have acquired since the beginning of 2009 (referred to as our "new single-family book of business") comprised 80% of our single-family guaranty book of business as of September 30, 2014, while the single-family loans we acquired prior to 2009 (referred to as our "legacy book of business") comprised 20% of our single-family guaranty book of business. As described below in "Strengthening Our Book of Business—New Book of Business," we expect that our new single-family book of business will be profitable over its lifetime.
- Credit Performance. Our single-family serious delinquency rate, which has decreased each quarter since the first quarter of 2010, was 1.96% as of September 30, 2014, compared with 2.38% as of December 31, 2013. See "Improving the Credit Performance of our Book of Business" below for additional information on the credit performance of the mortgage loans in our single-family guaranty book of business for each of the last seven quarters, and for a description of our strategies for reducing credit losses.

Although we have improved our financial performance and the quality of our book of business since entering into conservatorship in 2008, we remain under conservatorship and subject to the restrictions of the senior preferred stock purchase agreement with Treasury. As a result of the senior preferred stock purchase agreement and directives from our conservator, we are not permitted to retain our net worth (other than a limited amount that will decrease to zero by 2018), rebuild our capital position or pay dividends or other distributions to stockholders other than Treasury. See "Business—Conservatorship and Treasury Agreements" in our 2013 Form 10-K for more information regarding our conservatorship and our senior preferred stock purchase agreement with Treasury. In addition, the future of our company remains uncertain. Congress continues to consider options for reform of the housing finance system, including the GSEs, and we cannot predict the prospects for the enactment, timing or final content of housing finance reform legislation. See "Legislative and Regulatory Developments" in this report, in our Second Quarter 2014 Form 10-Q and in our First Quarter 2014 Form 10-Q,

2

and “Business—Housing Finance Reform” in our 2013 Form 10-K for information on recent proposals for housing finance reform.

Supporting the housing recovery by providing reliable, large-scale access to affordable mortgage credit and helping struggling homeowners

We continued our efforts to support the housing recovery in the third quarter of 2014. We remained the largest single issuer of mortgage-related securities in the secondary market during the third quarter of 2014 and a continuous source of liquidity in the multifamily market. We also continued to help struggling homeowners. In the third quarter of 2014, we provided approximately 39,000 loan workouts to help homeowners stay in their homes or otherwise avoid foreclosure. We discuss our activities to support the housing and mortgage markets in “Contributions to the Housing and Mortgage Markets” below.

Helping to build a sustainable housing finance system

We also continued our efforts to help lay the foundation for a safer, transparent and sustainable housing finance system, including pursuing the strategic goals identified by our conservator, as well as investing in improvements to our business and infrastructure. We discuss these efforts, as well as FHFA’s 2014 Strategic Plan for the Conservatorships of Fannie Mae and Freddie Mac and FHFA’s related 2014 conservatorship scorecard, in our Second Quarter 2014 Form 10-Q in “MD&A—Executive Summary—Helping to Build a Sustainable Housing Finance System” and in “MD&A—Legislative and Regulatory Developments—Housing Finance Reform and the Role of the GSEs—Conservator Developments.”

Summary of Our Financial Performance

Comprehensive Income

Quarterly Results

We recognized comprehensive income of $4.0 billion in the third quarter of 2014, consisting of net income of $3.9 billion and other comprehensive income of $95 million. In comparison, we recognized comprehensive income of $8.6 billion in the third quarter of 2013, consisting of net income of $8.7 billion and other comprehensive loss of $134 million. The decrease in our comprehensive income was primarily due to a decline in credit-related income and a shift to fair value losses from fair value gains.

The decline in credit-related income was mainly attributable to home prices increasing at a slower pace in the third quarter of 2014 as compared with the third quarter of 2013. In addition, the third quarter of 2013 benefited from foreclosed property income primarily due to the recognition of income related to our compensatory fee agreement with Bank of America. We recognized fair value losses in the third quarter of 2014 primarily due to increases in shorter-term swap rates. We recognized fair value gains in the third quarter of 2013 as longer-term swap rates increased.

Year-to-Date Results

We recognized comprehensive income of $13.4 billion in the first nine months of 2014, consisting of net income of $12.9 billion and other comprehensive income of $512 million. In comparison, we recognized comprehensive income of $78.2 billion in the first nine months of 2013, consisting of net income of $77.5 billion and other comprehensive income of $686 million. The decrease in comprehensive income was primarily driven by a provision for federal income taxes in the first nine months of 2014 compared with a benefit for federal income taxes in the first nine months of 2013 primarily due to the release of our valuation allowance against our deferred tax assets in the first quarter of 2013. For a discussion of the release of our valuation allowance against our deferred tax assets in 2013, see “Critical Accounting Policies and Estimates—Deferred Tax Assets” in our 2013 Form 10-K.

Our pre-tax income was $19.0 billion in the first nine months of 2014 compared with $30.3 billion in the first nine months of 2013. The decrease in our pre-tax income was primarily due to a decrease in credit-related income and a shift to fair value losses from fair value gains.

The decline in credit-related income was primarily due to the same factors that impacted the third quarters of 2014 and 2013, as discussed above. We recognized fair value losses in the first nine months of 2014 primarily due to declines in longer-term swap rates. We recognized fair value gains in the first nine months of 2013 as longer-term swap rates increased.

We expect volatility from period to period in our financial results from a number of factors, particularly changes in market conditions that result in periodic fluctuations in the estimated fair value of the financial instruments that we mark to market through our earnings. These instruments include derivatives and securities. The estimated fair value of our derivatives and securities may fluctuate substantially from period to period because of changes in interest rates, the yield curve, mortgage spreads and implied volatility, as well as activity related to these financial instruments. While the estimated fair value of our

derivatives that serve to mitigate certain risk exposures may fluctuate, some of the financial instruments that generate these exposures are not recorded at fair value in our condensed consolidated financial statements. In addition, our credit-related income or expense can vary substantially from period to period primarily due to changes in home prices, borrower payment behavior and economic conditions.

See "Consolidated Results of Operations" for more information on our results.

Net Worth

Our net worth decreased to $6.4 billion as of September 30, 2014 from $9.6 billion as of December 31, 2013 primarily due to our payments to Treasury of $16.6 billion in senior preferred stock dividends, partially offset by our comprehensive income of $13.4 billion during the first nine months of 2014. Our expected dividend payment of $4.0 billion for the fourth quarter of 2014 is calculated based on our net worth of $6.4 billion as of September 30, 2014 less the applicable capital reserve amount of $2.4 billion.

Strengthening Our Book of Business

New Book of Business

Beginning in 2008, we took actions to significantly strengthen our underwriting and eligibility standards and change our pricing to promote sustainable homeownership and stability in the housing market. These actions have improved the credit quality of our book of business. Given their strong credit risk profile and based on their performance so far, we expect that in the aggregate the loans we have acquired since January 1, 2009, which comprised 80% of our single-family guaranty book of business as of September 30, 2014, will be profitable over their lifetime, by which we mean that we expect our guaranty fee income on these loans to exceed our credit losses and administrative costs for them. In contrast, we expect that the single-family loans we acquired from 2005 through 2008, in the aggregate, will not be profitable over their lifetime. See "Outlook—Factors that Could Cause Actual Results to be Materially Different from Our Estimates and Expectations" in this report and "Risk Factors" in both this report and our 2013 Form 10-K for a discussion of factors that could cause our expectations regarding the performance of the loans in our single-family book of business to change. For information on certain credit characteristics of our new single-family book of business as compared with our legacy book of business, see "Table 29: Selected Credit Characteristics of Single-Family Conventional Loans Held, by Acquisition Period." For more information on the credit risk profile of our single-family guaranty book of business, see "Risk Management—Credit Risk Management—Single-Family Mortgage Credit Risk Management," including "Table 30: Risk Characteristics of Single-Family Conventional Business Volume and Guaranty Book of Business" in that section.

Our new single-family book of business includes loans that are refinancings of loans that were in our legacy book of business, including loans acquired under our Refi Plus™ initiative, which has provided refinancing flexibility to eligible Fannie Mae borrowers since 2009. Our Refi Plus initiative includes loans acquired under the Obama Administration's Home Affordable Refinance Program ("HARP®"). As of September 30, 2014, 61% of the loans in our single-family guaranty book of business were non-Refi Plus loans acquired since the beginning of 2009, 19% were Refi Plus loans, and the remaining 20% were acquired prior to 2009. Information about the impact of HARP and Refi Plus on the credit characteristics of our new single-family book of business appears in "Risk Management—Credit Risk Management—Single-Family Mortgage Credit Risk Management—Credit Profile Summary—HARP and Refi Plus Loans" and in "Table 29: Selected Credit Characteristics of Single-Family Conventional Loans Held, by Acquisition Period."

Recently Acquired Single-Family Loans

Table 1 below displays information regarding our average charged guaranty fee on and specified risk characteristics of the single-family loans we acquired in each of the last seven quarters. Table 1 also displays the volume of our single-family Fannie Mae MBS issuances for these periods, which is indicative of the volume of single-family loans we acquired for these periods.

Table 1: Single-Family Acquisitions Statistics

	2014			2013			
	Q3	Q2	Q1	Q4	Q3	Q2	Q1
Single-family average charged guaranty fee on new acquisitions (in basis points)[1][2]	63.5	62.6	63.0	61.2	58.7	56.9	54.4
Single-family Fannie Mae MBS issuances (in millions)[3]	$105,563	$84,096	$76,972	$117,809	$186,459	$206,978	$221,865

Purchase	57%	54%	45%	49%	38%	25%	17%
Refinance	43%	46%	55%	51%	62%	75%	83%

____

(1) Includes the impact of a 10 basis point guaranty fee increase implemented pursuant to the Temporary Payroll Tax Cut Continuation Act of 2011 (the “TCCA”), the incremental revenue from which must be remitted to Treasury. The resulting revenue is included in guaranty fee income and the expense is recognized as “TCCA fees.”

(2) Calculated based on the average contractual fee rate for our single-family guaranty arrangements entered into during the period plus the recognition of any upfront cash payments ratably over an estimated average life, expressed in basis points.

(3) Consists of unpaid principal balance of Fannie Mae MBS issued and guaranteed by the Single-Family segment during the period.

(4) Calculated based on unpaid principal balance of single-family loans for each category at time of acquisition. Single-family business volume refers to both single-family mortgage loans we purchase for our retained mortgage portfolio and single-family mortgage loans we guarantee.

(5) The original loan-to-value (“LTV”) ratio generally is based on the original unpaid principal balance of the loan divided by the appraised property value reported to us at the time of acquisition of the loan. Excludes loans for which this information is not readily available.

(6) We purchase loans with original LTV ratios above 80% as part of our mission to serve the primary mortgage market and provide liquidity to the housing finance system. Except as permitted under HARP, our charter generally requires primary mortgage insurance or other credit enhancement for loans that we acquire that have an LTV ratio over 80%.

The increase in our average charged guaranty fee on newly acquired single-family loans in the third quarter of 2014 as compared with the third quarter of 2013 was driven primarily by an increase in loan level price adjustments charged on our acquisitions in the third quarter of 2014, as these acquisitions included a higher proportion of loans with higher loan-to-value (“LTV”) ratios and a higher proportion of loans with lower FICO credit scores. Loan level price adjustments refer to one-time cash fees that we charge at the time we initially acquire a loan based on the credit characteristics of the loan. See “Legislative and Regulatory Developments—Potential Changes to Our Single-Family Guaranty Fee Pricing” in our Second Quarter 2014 Form 10-Q for information on potential future changes to our

guaranty fee pricing.
The increase in our acquisitions of loans with higher LTV ratios in the third quarter of 2014 as compared with the third quarter of 2013 was primarily due to a decline in the percentage of our acquisitions consisting of refinance loans and a corresponding increase in the percentage of our acquisitions consisting of home purchase loans, which typically have higher LTV ratios than non-HARP refinance loans. In the third quarter of 2014, refinancings comprised approximately 43% of our single-family conventional business volume, compared with approximately 62% in the third quarter of 2013. In addition, we experienced a decline in the average FICO credit scores of our acquisitions in the third quarter of 2014 as compared with the third quarter of 2013. Despite this shift in the credit risk profile of our acquisitions, the single-family loans we acquired in the third quarter of 2014 continued to have a strong credit profile, with a weighted average original LTV ratio of 77% and a weighted average FICO credit score of 744. For more information on the credit risk profile of our single-family conventional

---

loan acquisitions in the third quarter of 2014, see "Risk Management—Credit Risk Management—Single-Family Mortgage Credit Risk Management," including "Table 30: Risk Characteristics of Single-Family Conventional Business Volume and Guaranty Book of Business" in that section.

We expect refinancings to constitute a smaller portion of our single-family business volume in 2014 than in 2013. As a result, we expect to acquire a higher proportion of loans with higher LTV ratios in 2014 than in 2013. Overall mortgage originations also declined significantly in the first nine months of 2014 as compared with the first nine months of 2013, and we expect mortgage originations in 2014 to be lower overall than in 2013.

Pursuant to FHFA's 2014 conservatorship scorecard and our statutory mission, we are continuing to work to increase access to mortgage credit for creditworthy borrowers, consistent with the full extent of our applicable credit requirements and risk management practices. As part of this effort, we are encouraging lenders to originate loans to the full extent of our applicable credit requirements. Some actions we are taking in this regard include: providing additional clarity regarding seller and servicer representations and warranties and remedies for poor performance; making new quality control tools available to lenders, such as Collateral Underwriter™; conducting increased outreach to lenders and other industry stakeholders to increase awareness of our available products and programs; and conducting consumer research to provide industry partners with information to support their efforts to reach underserved market segments. We also plan to offer a 97% LTV ratio product to all customers in 2015. To the extent we are able to encourage lenders to increase access to mortgage credit, we may acquire a greater number of single-family loans with higher risk characteristics than we have acquired in recent periods; however, we believe our single-family acquisitions will continue to have a strong overall credit risk profile given our current underwriting and eligibility standards and product design.

Whether the loans we acquire in the future will exhibit an overall credit profile and performance similar to our more recent acquisitions will depend on a number of factors, including our future pricing and eligibility standards and those of mortgage insurers, the Federal Housing Administration ("FHA") and the Department of Veterans Affairs ("VA"), the percentage of loan originations representing refinancings, changes in interest rates, our future objectives and activities in support of those objectives, including actions we may take to reach additional underserved creditworthy borrowers, government policy, market and competitive conditions, and the volume and characteristics of HARP loans we acquire in the future. In addition, if our lender customers retain more of the higher-quality loans they originate, it could negatively affect the credit risk profile of our new single-family acquisitions.

Improving the Credit Performance of our Book of Business

We continue our efforts to improve the credit performance of our book of business. In addition to acquiring loans with strong credit profiles, as we discuss above in "Strengthening Our Book of Business," we continue to execute on our strategies for reducing credit losses, such as helping eligible Fannie Mae borrowers with high LTV ratio loans refinance into more sustainable loans through HARP, offering borrowers loan modifications that can significantly reduce their monthly payments, pursuing foreclosure alternatives and managing our real estate owned ("REO") inventory to minimize costs and maximize sales proceeds. As we work to reduce credit losses, we also seek to assist struggling homeowners, help stabilize communities and support the housing market.

Table 2 presents information for each of the last seven quarters about the credit performance of mortgage loans in our single-family guaranty book of business and our workouts. The term "workouts" refers to both home retention solutions (loan modifications and other solutions that enable a borrower to stay in his or her home) and foreclosure alternatives (short sales and deeds-in-lieu of foreclosure). The workout information in Table 2 does not reflect repayment plans and forbearances that have been initiated but not completed, nor does it reflect trial modifications that have not become permanent.

Table 2: Credit Statistics, Single-Family Guaranty Book of Business[1]

	2014				2013				
	Q3 YTD	Q3	Q2	Q1	Full Year	Q4	Q3	Q2	Q1
	(Dollars in millions)								
As of the end of each period:									
Serious delinquency rate[2]	1.96%	1.96%	2.05%	2.19%	2.38%	2.38%	2.55%	2.77%	3.02%
Seriously delinquent loan count	340,897	340,897	357,267	383,810	418,837	418,837	447,840	483,253	527,52
Troubled debt restructurings on accrual status[3]	$144,802	$144,802	$144,911	$144,077	$140,512	$140,512	$138,165	$136,558	$134,3
Nonaccrual loans[4]	66,673	66,673	69,550	73,972	81,355	81,355	86,848	93,883	102,60

Loan workouts as a percentage of the average balance of delinquent loans in our guaranty book of business[13]	24.09 %	22.46 %	24.69 %	25.70 %	26.01 %	26.59 %	25.32 %	26.93 %	25.88

(1) Our single-family guaranty book of business consists of (a) single-family mortgage loans of Fannie Mae, (b) single-family mortgage loans underlying Fannie Mae MBS, and (c) other credit enhancements that we provide on single-family mortgage assets, such as long-term standby commitments. It excludes non-Fannie Mae mortgage-related securities held in our retained mortgage portfolio for which we do not provide a guaranty.

(2) Calculated based on the number of single-family conventional loans that are 90 days or more past due or in the foreclosure process, divided by the number of loans in our single-family conventional guaranty book of business. We include single-family conventional loans that we own and those that back Fannie Mae MBS in the calculation of the single-family serious delinquency rate.

(3) A troubled debt restructuring (“TDR”) is a modification to the contractual terms of a loan in which a concession is granted to a borrower experiencing financial difficulty.

7

(4) We generally classify single-family loans as nonaccrual when the payment of principal or interest on the loan is two or more months past due according to its contractual terms. Excludes off-balance sheet loans in unconsolidated Fannie Mae MBS trusts that would meet our criteria for nonaccrual status if the loans had been on-balance sheet.

(5) Includes acquisitions through deeds-in-lieu of foreclosure. Also includes held for use properties, which are reported in our condensed consolidated balance sheets as a component of "Other assets."

(6) Consists of the allowance for loan losses for single-family loans recognized in our condensed consolidated balance sheets and the reserve for guaranty losses related to both loans backing Fannie Mae MBS that we do not consolidate in our condensed consolidated balance sheets and loans that we have guaranteed under long-term standby commitments. For additional information on the change in our loss reserves see "Consolidated Results of Operations—Credit-Related Income—Benefit for Credit Losses."

(7) Consists of (a) the combined loss reserves, (b) allowance for accrued interest receivable and (c) allowance for preforeclosure property taxes and insurance receivables.

(8) Consists of (a) the benefit for credit losses and (b) foreclosed property (expense) income.

(9) Consists of (a) charge-offs, net of recoveries and (b) foreclosed property (expense) income, adjusted to exclude the impact of fair value losses resulting from credit-impaired loans acquired from MBS trusts.

(10) Calculated as the amount of sale proceeds received on disposition of REO properties during the respective period, excluding those subject to repurchase requests made to our sellers or servicers, divided by the aggregate unpaid principal balance of the related loans at the time of foreclosure. Net sales price represents the contract sales price less selling costs for the property and other charges paid by the seller at closing.

(11) Calculated as the amount of sale proceeds received on properties sold in short sale transactions during the respective period divided by the aggregate unpaid principal balance of the related loans. Net sales price represents the contract sales price less the selling costs for the property and other charges paid by the seller at the closing, including borrower relocation incentive payments and subordinate lien(s) negotiated payoffs.

(12) Consists of (a) modifications, which do not include trial modifications, loans to certain borrowers who have received bankruptcy relief that are classified as TDRs, or repayment plans or forbearances that have been initiated but not completed and (b) repayment plans and forbearances completed. See "Table 34: Statistics on Single-Family Loan Workouts" in "Risk Management—Credit Risk Management—Single-Family Mortgage Credit Risk Management—Problem Loan Management—Loan Workout Metrics" for additional information on our various types of loan workouts.

(13) Calculated based on annualized problem loan workouts during the period as a percentage of the average balance of delinquent loans in our single-family guaranty book of business.

We provide additional information on our credit-related expense or income in "Consolidated Results of Operations—Credit-Related Income" and on the credit performance of mortgage loans in our single-family book of business in "Risk Management—Credit Risk Management—Single-Family Mortgage Credit Risk Management."

We provide more information on our efforts to reduce our credit losses in "Risk Management—Credit Risk Management—Single-Family Mortgage Credit Risk Management" and "Risk Management—Credit Risk Management—Institutional Counterparty Credit Risk Management" in both this report and our 2013 Form 10-K. See also "Risk Factors" in our 2013 Form 10-K, where we describe factors that may adversely affect the success of our efforts, including our reliance on third parties to service our loans, conditions in the foreclosure environment, and risks relating to our mortgage insurer counterparties.

Contributions to the Housing and Mortgage Markets

Liquidity and Support Activities

As the largest provider of residential mortgage credit in the United States, we indirectly enable families to buy, refinance or rent homes. During the third quarter of 2014, we continued to provide critical liquidity and support to the U.S. mortgage market in a number of important ways:

- We serve as a stable source of liquidity for purchases of homes and financing of multifamily rental housing, as well as for refinancing existing mortgages. We provided approximately $123 billion in liquidity to the mortgage market in the third quarter of 2014 through our purchases and guarantees of loans and securities. This liquidity enabled borrowers to complete approximately 228,000 mortgage refinancings and approximately 265,000 home purchases, and provided

financing for approximately 124,000 units of multifamily housing.

- Our role in the market enables borrowers to have reliable access to affordable mortgage credit, including a variety of conforming mortgage products such as the prepayable 30-year fixed-rate mortgage that protects homeowners from fluctuations in interest rates.

8

- We provided approximately 39,000 loan workouts in the third quarter of 2014 to help homeowners stay in their homes or otherwise avoid foreclosure. Our loan workout efforts have helped to stabilize neighborhoods, home prices and the housing market.
- We helped borrowers refinance loans, including through our Refi Plus initiative. We acquired over 68,000 Refi Plus loans in the third quarter of 2014. Refinancings delivered to us through Refi Plus in the third quarter of 2014 reduced borrowers' monthly mortgage payments by an average of $159. Some borrowers' monthly payments increased as they took advantage of the ability to refinance through Refi Plus to reduce the term of their loan, to switch from an adjustable-rate mortgage to a fixed-rate mortgage or to switch from an interest-only mortgage to a fully amortizing mortgage.
- We support affordability in the multifamily rental market. Over 85% of the multifamily units we financed in the third quarter of 2014 were affordable to families earning at or below the median income in their area.
- In addition to purchasing and guaranteeing loans, we provide funds to the mortgage market through short-term financing and other activities. These activities are described in more detail in our 2013 Form 10-K in "Business—Business Segments—Capital Markets."

2014 Market Share

We remained the largest single issuer of mortgage-related securities in the secondary market during the third quarter of 2014, with an estimated market share of new single-family mortgage-related securities issuances of 38%, compared with 39% in the second quarter of 2014 and 48% in the third quarter of 2013. See "Outlook—Revenues" for a discussion of the impact on our market share of the decline in originations that are refinancings.

We remained a continuous source of liquidity in the multifamily market in the third quarter and first nine months of 2014. We owned or guaranteed approximately 19% of the outstanding debt on multifamily properties as of June 30, 2014 (the latest date for which information is available).

Housing and Mortgage Market and Economic Conditions

Economic growth slowed in the third quarter of 2014 compared with the second quarter of 2014. According to the U.S. Bureau of Economic Analysis advance estimate, the inflation-adjusted U.S. gross domestic product, or GDP, rose by 3.5% on an annualized basis in the third quarter of 2014, compared with an increase of 4.6% in the second quarter of 2014. The overall economy gained an estimated 671,000 non-farm jobs in the third quarter of 2014. According to the U.S. Bureau of Labor Statistics, over the 12 months ending in September 2014, the economy created an estimated 2.7 million non-farm jobs. The unemployment rate was 5.9% in September 2014, compared with 6.1% in June 2014.

According to the Federal Reserve, total U.S. residential mortgage debt outstanding, which includes $9.86 trillion of single-family debt outstanding, was estimated to be approximately $10.81 trillion as of June 30, 2014 (the latest date for which information is available), compared with $10.80 trillion as of March 31, 2014.

Housing activity increased during the third quarter of 2014 as compared with the second quarter of 2014. Total existing home sales averaged 5.1 million units annualized in the third quarter of 2014, a 5.2% increase from the second quarter of 2014, according to data from the National Association of REALTORS®. Sales of foreclosed homes and preforeclosure, or "short," sales (together, "distressed sales") accounted for 10% of existing home sales in September 2014, compared with 11% in June 2014 and 14% in September 2013. According to the U.S. Census Bureau, new single-family home sales increased during the third quarter of 2014, averaging an annualized rate of 446,000 units, a 4.5% increase from the second quarter of 2014.

The number of months' supply, or the inventory/sales ratio, of available existing homes and of new homes each decreased in the third quarter of 2014. According to the U.S. Census Bureau, the number of months' supply of new homes was 5.3 months as of September 30, 2014, compared with 5.8 months as of June 30, 2014. According to data from the National Association of REALTORS®, the months' supply of existing unsold homes was 5.3 months as of September 30, 2014, compared with a 5.5 months' supply as of June 30, 2014.

The overall mortgage market serious delinquency rate, which has trended down since peaking in the fourth quarter of 2009, remained historically high at 4.8% as of June 30, 2014 (the latest date for which information is available), according to the Mortgage Bankers Association National Delinquency Survey, compared with 5.0% as of March 31, 2014. We provide information about Fannie Mae's serious delinquency rate, which also decreased in the second quarter of 2014, in "Improving the Credit Performance of our Book of Business."

Based on our home price index, we estimate that home prices on a national basis increased by 1.2% in the third quarter of 2014 and by 5.3% in the first nine months of 2014, following increases of 8.2% in 2013 and 4.1% in 2012. Despite the recent

increases in home prices, we estimate that, through September 30, 2014, home prices on a national basis remained 9.5% below their peak in the third quarter of 2006. Our home price estimates are based on preliminary data and are subject to change as additional data become available.

Many homeowners continue to have "negative equity" in their homes as a result of declines in home prices since 2006, which means their principal mortgage balance exceeds the current market value of their home. This increases the likelihood that borrowers will abandon their mortgage obligations and that the loans will become delinquent and proceed to foreclosure. According to CoreLogic, Inc. the number of residential properties with mortgages in a negative equity position in the second quarter of 2014 was approximately 5.3 million, down from 6.3 million in the first quarter of 2014 and from 7.2 million in the second quarter of 2013. The percentage of properties with mortgages in a negative equity position in the second quarter of 2014 was 10.7%, down from 12.7% in the first quarter of 2014 and from 14.9% in the second quarter of 2013.

Thirty-year mortgage rates ended the quarter at 4.20% for the week of September 25, 2014, up from 4.14% for the week of June 26, 2014, according to Freddie Mac.

During the third quarter of 2014, the multifamily sector continued to exhibit solid fundamentals, according to preliminary third-party data, with flat vacancy levels and increasing rent growth. The national multifamily vacancy rate for institutional investment-type apartment properties remained at an estimated 4.75% as of September 30, 2014, unchanged from June 30, 2014, and compared with 5.10% as of September 30, 2013.

National asking rents increased by an estimated 1.00% during the third quarter of 2014, compared with an increase of 0.75% during the second quarter of 2014. Continued demand for multifamily rental units was reflected in the estimated positive net absorption (that is, the net change in the number of occupied rental units during the time period) of approximately 37,000 units during the third quarter of 2014, according to preliminary data from Reis, Inc., compared with approximately 35,000 units during the second quarter of 2014.

As a result of the continued demand for multifamily rental units over the past few years, there has been an increase in the amount of new multifamily construction development nationally. Approximately 264,000 new multifamily units are expected to be completed this year. The bulk of this new supply is concentrated in a limited number of metropolitan areas. As a result, multifamily fundamentals could be impacted in certain localized areas, producing a temporary slowdown in net absorption rates, occupancy levels and effective rents in those areas during the remainder of 2014 and into early 2015.

Outlook

Uncertainty Regarding our Future Status. We expect continued significant uncertainty regarding the future of our company and the housing finance system, including how long the company will continue to be in its current form, the extent of our role in the market, what form we will have, what ownership interest, if any, our current common and preferred stockholders will hold in us after the conservatorship is terminated and whether we will continue to exist following conservatorship.

We cannot predict the prospects for the enactment, timing or final content of housing finance reform legislation. See "Legislative and Regulatory Developments" in this report, in our Second Quarter 2014 Form 10 Q and in our First Quarter 2014 Form 10-Q, and "Business—Housing Finance Reform" in our 2013 Form 10-K, for discussion of proposals for reform of the housing finance system, including the GSEs, that could materially affect our business, including proposed federal legislation that, among other things, would require the wind down of Fannie Mae and Freddie Mac. See "Risk Factors" in both this report and in our 2013 Form 10-K for a discussion of the risks to our business relating to the uncertain future of our company.

Financial Results. Our financial results continued to be strong in the third quarter of 2014, with net income of $3.9 billion. We expect to remain profitable for the foreseeable future. While we expect our annual net income to remain strong over the next few years, we expect our annual net income to be substantially lower than our net income for 2013. We discuss the reasons for this expectation, and note our expectation that certain factors that contributed to a large portion of our 2013 net income will not contribute as significantly or at all to our earnings in 2014 or future years, in "Business—Executive Summary—Outlook—Financial Results" in our 2013 Form 10-K. Our earnings will be affected by a number of factors, including: changes in interest rates; changes in home prices; our guaranty fee rates; the volume of single-family mortgage originations in the future; the size, composition and quality of our retained

mortgage portfolio and guaranty book of business; and economic and housing market conditions. Some of these factors, such as changes in interest rates or home prices, could result in significant variability in our earnings from quarter to quarter or year to year. Our expectations for our future financial results do not take into account the impact on our business of potential future legislative or regulatory changes, which could have a material impact on our financial results, particularly the enactment of housing finance reform legislation as noted in "Uncertainty Regarding our Future Status" above.

Revenues. We currently have two primary sources of revenues: (1) the difference between interest income earned on the assets in our retained mortgage portfolio and the interest expense associated with the debt that funds those assets; and (2) the guaranty fees we receive for managing the credit risk on loans underlying Fannie Mae MBS held by third parties. Our "retained mortgage portfolio" refers to the mortgage-related assets we own (which excludes the portion of assets held by consolidated MBS trusts that back mortgage-related securities owned by third parties). Historically, we have generated the majority of our revenues from the difference between the interest income earned on the assets in our retained mortgage portfolio and the interest expense associated with the debt that funds those assets. As we discuss in our 2013 Form 10-K in "Business—Conservatorship and Treasury Agreements—Treasury Agreements—Covenants under Treasury Agreements," we are required to reduce the size of our retained mortgage portfolio each year until we hold no more than $250 billion in mortgage assets by the end of 2018. In addition, as described in "Legislative and Regulatory Developments—Housing Finance Reform and the Role of the GSEs—Conservator Developments," our conservator recently requested that we further cap our retained mortgage portfolio each year at 90% of the annual limit under our senior preferred stock purchase agreement with Treasury.

As a result of both the shrinking of our retained mortgage portfolio and the impact of guaranty fee increases, an increasing portion of our revenues in recent years has been derived from guaranty fees rather than from interest income earned on our retained mortgage portfolio assets. We recognize almost all of our guaranty fee revenue in net interest income in our condensed consolidated statement of operations and comprehensive income due to the consolidation of the substantial majority of our MBS trusts on our condensed consolidated balance sheet. The percentage of our net interest income derived from guaranty fees on loans underlying our Fannie Mae MBS has increased in recent periods. We estimate that approximately half of our net interest income for the first nine months of 2014 was derived from guaranty fees on loans underlying our Fannie Mae MBS, compared with approximately one-third of our net interest income for the first nine months of 2013. We expect that guaranty fees will continue to account for an increasing portion of our revenues.

The decrease in the balance of mortgage assets held in our retained mortgage portfolio contributed to a decline in our net interest income and revenues in the third quarter of 2014 as compared with the third quarter of 2013. We expect continued decreases in the size of our retained mortgage portfolio, which will continue to negatively impact our net interest income and revenues; however, we also expect increases in our guaranty fee revenues will at least partially offset the negative impact of the decline in our retained mortgage portfolio. We expect our guaranty fee revenues to increase over the long term, as loans with lower guaranty fees liquidate from our book of business and are replaced with new loans with higher guaranty fees. The extent to which the positive impact of increased guaranty fee revenues will offset the negative impact of the decline in the size of our retained mortgage portfolio will depend on many factors, including: changes to guaranty fee pricing we may make in the future; the size, composition and quality of our guaranty book of business; the life of the loans in our guaranty book of business; the size, composition and quality of our retained mortgage portfolio, including the pace at which we are required by our conservator to reduce the size of our portfolio and the types of assets we are required to sell; economic and housing market conditions, including changes in interest rates; our market share; and legislative and regulatory changes.

Although our single-family acquisition volume declined significantly in the first nine months of 2014 as compared with the first nine months of 2013, liquidations of loans from our single-family guaranty book of business also declined. Accordingly, the size of our single-family guaranty book of business remained relatively flat during the first nine months of 2014, and our single-family guaranty fee revenues continued to increase. The decline in our single-family acquisition volume reflects a decrease in originations of single-family mortgages that are refinancings. The decrease in refinancings as a percentage of originations has reduced our market share. See "Contributions to the Housing and Mortgage Markets—2014 Market Share" above for information on our market share and "Overall Market Conditions" below for information on our expectations for refinancing originations.

We expect our single-family acquisition volumes this year to continue to remain lower than prior year volumes; however, we also expect liquidations of loans from our single-family guaranty book of business to remain lower. As a result, we do not expect these lower volumes to have a material adverse effect on the size of our single-family guaranty book of business or on our single-family guaranty fee revenues in the near term. However, if the current reduction in our acquisition volume accelerates or remains ongoing for a significant period of time or if the rate of

liquidations of loans from our single-family guaranty book increases without a corresponding increase in our acquisitions, it could adversely affect the size of our single-family guaranty book of business and our single-family guaranty fee revenues over the long term.

Dividend Obligations to Treasury. We expect to retain only a limited amount of any future net worth because we are required by the dividend provisions of the senior preferred stock and quarterly directives from our conservator to pay Treasury each quarter the amount, if any, by which our net worth as of the end of the immediately preceding fiscal quarter exceeds an applicable capital reserve amount. This capital reserve amount is $2.4 billion for each quarter of 2014 and then decreases by $600 million annually until it reaches zero in 2018.

From 2009 through the first quarter of 2012, we received a total of $116.1 billion from Treasury under the senior preferred stock purchase agreement. This funding provided us with the capital and liquidity needed to fulfill our mission of providing liquidity and support to the nation's housing finance markets and to avoid a trigger of mandatory receivership under the Federal Housing Finance Regulatory Reform Act of 2008 (the "2008 Reform Act"). In addition, a portion of the $116.1 billion we received from Treasury was drawn to pay dividends to Treasury because, prior to 2013, our dividend payments on the senior preferred stock accrued at an annual rate of 10%, and we were directed by our conservator to pay these dividends to Treasury each quarter even when we did not have sufficient income to pay the dividend. We have not received funds from Treasury under the agreement since the first quarter of 2012. From 2008 through the third quarter of 2014, we paid a total of $130.5 billion in dividends to Treasury on the senior preferred stock. Under the terms of the senior preferred stock purchase agreement, dividend payments do not offset prior Treasury draws, and we are not permitted to pay down draws we have made under the agreement except in limited circumstances. Accordingly, the current aggregate liquidation preference of the senior preferred stock is $117.1 billion, due to the initial $1.0 billion liquidation preference of the senior preferred stock (for which we did not receive cash proceeds) and the $116.1 billion we have drawn from Treasury.

The Director of FHFA directs us to make dividend payments on the senior preferred stock on a quarterly basis. In December 2014, we expect to pay Treasury additional senior preferred stock dividends of $4.0 billion for the fourth quarter of 2014.

Overall Market Conditions. We expect that single-family mortgage loan serious delinquency and severity rates will continue their downward trend, but at a slower pace than in recent years. We expect that single-family serious delinquency and severity rates will remain high compared with pre-housing crisis levels because it will take some time for the remaining delinquent loans with high mark-to-market LTV ratios originated prior to 2009 to work their way through the foreclosure process. Despite steady demand and stable fundamentals at the national level, the multifamily sector may continue to exhibit below average fundamentals in certain local markets and with certain properties.

The increase in mortgage rates since the first half of 2013 has resulted in a decline in single-family mortgage originations, driven by a decline in refinancings. We forecast that total originations in the U.S. single-family mortgage market in 2014 will decrease from 2013 levels by approximately 41%, from an estimated $1.87 trillion in 2013 to $1.10 trillion in 2014, and that the amount of originations in the U.S. single-family mortgage market that are refinancings will decrease from an estimated $1.12 trillion in 2013 to $425.6 billion in 2014. We forecast that the amount of total single-family mortgage debt outstanding will remain relatively flat in 2014, ending the year at an estimated $9.91 trillion as of December 31, 2014, compared with $9.89 trillion as of December 31, 2013.

In recent years, the Federal Reserve has purchased a significant amount of mortgage-backed securities issued by us, Freddie Mac and Ginnie Mae. The Federal Reserve began to taper these purchases in January 2014. In October 2014, the Federal Reserve announced that it will conclude its asset purchase program by the end of October; however, it stated that it is maintaining its existing policy of reinvesting principal payments from its holdings of agency debt and agency mortgage-backed securities in agency mortgage-backed securities. Any change in the Federal Reserve's policy towards the reinvestment of principal payments of mortgage-backed securities, or possible future sales of mortgage-backed securities by the Federal Reserve, could result in increases in mortgage interest rates and adversely affect our single-family business volume, which could adversely affect our results of operations and financial condition. See "Risk Factors" in our 2013 Form 10-K for a description of the potential risks to our business as a result of increases in mortgage interest rates.

Home Prices. Based on our home price index, we estimate that home prices on a national basis increased by 1.2% in the third quarter of 2014 and by 5.3% in the first nine months of 2014. We expect that home prices on a national basis will be relatively flat in the fourth quarter of 2014. Future home price changes may be very different from our expectations as a result of significant inherent uncertainty in the current market environment, including uncertainty about the effect of recent and future changes in mortgage rates; actions the federal government has taken and may take with respect to fiscal policies, mortgage finance programs and policies, and housing finance reform; the Federal Reserve's purchases and sales of mortgage-backed securities; the impact of those actions on and changes generally in unemployment and the general economic and interest rate environment; and the impact on the U.S. economy of global economic and political conditions. We also expect significant regional variation in the timing and rate of home price

growth.

Credit Losses. Our credit losses, which include our charge-offs, net of recoveries, reflect our realization of losses on our loans. We currently realize losses on loans, through our charge-offs, at the time of foreclosure or when we accept short sales or deeds-in-lieu of foreclosure. Our credit losses were $1.7 billion in the third quarter of 2014, compared with $1.1 billion in the third quarter of 2013, and $4.3 billion in the first nine months of 2014, compared with $4.2 billion in the first nine months of 2013. Although our credit losses have declined in recent years, we expect our credit losses in 2014 and 2015 will be higher than in 2013. The amounts we recognized in 2013 pursuant to a number of repurchase and compensatory fee resolution agreements reduced our 2013 credit losses from what they otherwise would have been. Moreover, we expect our approach to implementing the charge-off provisions of FHFA's Advisory Bulletin AB 2012-02 in 2015 will increase our credit losses for

2015 from what they otherwise would be. We expect our credit losses to resume their downward trend beginning in 2016. See "Legislative and Regulatory Developments—FHFA Advisory Bulletin Regarding Framework for Adversely Classifying Loans" for further information about this Advisory Bulletin.

Loss Reserves. Our total loss reserves consist of (1) our allowance for loan losses, (2) our allowance for accrued interest receivable, (3) our allowance for preforeclosure property taxes and insurance receivables and (4) our reserve for guaranty losses. Our total loss reserves were $39.7 billion as of September 30, 2014, down from $47.3 billion as of December 31, 2013. We expect the overall decline in our loss reserves in 2014 will be lower than the decline in 2013. We expect our approach to charging off the population of loans subject to FHFA's Advisory Bulletin AB 2012-02 in the first quarter of 2015 will contribute to a decline in our loss reserves during the period, as the corresponding allowance is removed on the loans that are subject to charge off. Although our loss reserves have declined substantially from their peak and are expected to decline further, we expect our loss reserves will remain elevated relative to the levels experienced prior to the 2008 housing crisis for an extended period because (1) we expect future defaults on loans that we acquired prior to 2009 and the resulting charge-offs will occur over a period of years and (2) a significant portion of our reserves represents concessions granted to borrowers upon modification of their loans and our reserves will continue to reflect these concessions until the loans are fully repaid or default.

Factors that Could Cause Actual Results to be Materially Different from Our Estimates and Expectations. We present a number of estimates and expectations in this executive summary regarding our future performance, including estimates and expectations regarding our future financial results and profitability, the level and sources of our revenues, our future dividend payments to Treasury, the profitability and performance of single-family loans we have acquired, the level and credit characteristics of our future acquisitions, future liquidations of loans from our single-family guaranty book of business, the size of our single-family guaranty book of business in the future, our future credit losses and our future loss reserves. We also present a number of estimates and expectations in this executive summary regarding future housing market conditions, including expectations regarding future delinquency and severity rates, future mortgage originations, future refinancings, future single-family mortgage debt outstanding, future home prices and future conditions in the multifamily market. These estimates and expectations are forward-looking statements based on our current assumptions regarding numerous factors. Our future estimates of our performance and housing market conditions, as well as the actual results, may differ materially from our current estimates and expectations as a result of: the timing and level of, as well as regional variation in, home price changes; changes in interest rates, unemployment rates and other macroeconomic and housing market variables; our future guaranty fee pricing and the impact of that pricing on our competitive environment; our future serious delinquency rates; our future objectives and activities in support of those objectives, including actions we may take to reach additional underserved creditworthy borrowers; future legislative or regulatory requirements that have a significant impact on our business, such as a requirement that we implement a principal forgiveness program; future legislative or regulatory changes that have a significant impact on our business, such as the enactment of housing finance reform legislation; actions we may be required to take by FHFA, as our conservator or as our regulator, such as changes in the type of business we do; future updates to our models relating to our loss reserves, including the assumptions used by these models; future changes to our accounting policies; significant changes in modification and foreclosure activity; changes in borrower behavior, such as an increasing number of underwater borrowers who strategically default on their mortgage loans; the effectiveness of our loss mitigation strategies, management of our REO inventory and pursuit of contractual remedies; whether our counterparties meet their obligations in full; resolution or settlement agreements we may enter into with our counterparties; changes in the fiscal and monetary policies of the Federal Reserve, including any change in the Federal Reserve's policy towards the reinvestment of principal payments of mortgage-backed securities or any future sales of such securities; changes in the fair value of our assets and liabilities; impairments of our assets; changes in generally accepted accounting principles ("GAAP"); credit availability; global political risks; natural disasters, terrorist attacks, pandemics or other major disruptive events; information security breaches; and other factors, including those discussed in "Forward-Looking Statements," "Risk Factors" and elsewhere in this report and in our 2013 Form 10-K. Due to the large size of our guaranty book of business, even small changes in these factors could have a significant impact on our financial results for a particular period.

LEGISLATIVE AND REGULATORY DEVELOPMENTS

The information in this section updates and supplements information regarding legislative and regulatory developments set forth in “Business—Housing Finance Reform” and “Business—Our Charter and Regulation of Our Activities” in our 2013 Form 10-K and in “MD&A—Legislative and Regulatory Developments” in our First Quarter 2014 Form 10-Q and in our Second Quarter 2014 Form 10-Q. Also see “Risk Factors” in this report and in our 2013 Form 10-K for a discussion of risks relating to legislative and regulatory matters.

Housing Finance Reform and the Role of the GSEs

Legislative Developments

Policymakers and others have focused significant attention in recent years on how to reform the nation's housing finance system, including what role, if any, Fannie Mae and Freddie Mac should play in that system. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), which was signed into law in July 2010, called for enactment of meaningful structural reforms of Fannie Mae and Freddie Mac. See "Business—Housing Finance Reform" in our 2013 Form 10-K and "MD&A—Legislative and Regulatory Developments" in our First Quarter 2014 Form 10-Q and in our Second Quarter 2014 Form 10-Q for a description of activities relating to GSE reform that occurred from 2011 through the second quarter of 2014, including descriptions of: the Administration's housing policy priorities, which include winding down Fannie Mae and Freddie Mac through a responsible transition; the Administration's February 2011 report on GSE reform, which discusses potential options for a new long-term structure for the housing finance system following the wind-down of Fannie Mae and Freddie Mac; and legislation considered in the current Congress relating to housing finance system reform and the terms of Fannie Mae's and Freddie Mac's senior preferred stock purchase agreements with Treasury.

Congress has continued to consider housing finance reform and the future of the GSEs this year. On May 15, 2014, the Senate Banking Committee approved the Housing Finance Reform and Taxpayer Protection Act of 2014, which is also known as the Johnson-Crapo bill. This bill, if enacted in its current form, would result in the wind-down and eventual liquidation of Fannie Mae and Freddie Mac and would materially affect our business prior to our eventual liquidation. Despite activity at the committee level, neither the full Senate nor the full House of Representatives has considered the Johnson-Crapo bill or any other housing finance reform bill in the current Congress.

We expect Congress to continue to consider housing finance reform legislation. We cannot predict the prospects for the enactment, timing or final content of housing finance reform legislation. As a result, there continues to be significant uncertainty regarding the future of our company. See "Risk Factors" in this report and our 2013 Form 10-K for discussions of the risks to our business relating to the uncertain future of our company and of how the uncertain future of our company may adversely affect our ability to retain and recruit well-qualified employees, including senior management.

Conservator Developments

In addition to the legislative debate, actions taken by our conservator have an impact on the role of the GSEs in the nation's housing finance system now and in the future. See "MD&A—Executive Summary—Helping to Build a Sustainable Housing Finance System" and "MD&A—Legislative and Regulatory Developments—Housing Finance Reform and the Role of the GSEs—Conservator Developments" in our Second Quarter 2014 Form 10-Q for a discussion of FHFA's 2014 Strategic Plan for the Conservatorships of Fannie Mae and Freddie Mac, and FHFA's related 2014 conservatorship scorecard.

Single GSE Security. FHFA's 2014 Strategic Plan for the Conservatorships of Fannie Mae and Freddie Mac includes the goal of developing a single GSE mortgage-backed security. In August 2014, FHFA published a request for public input on a proposed structure for a single security that would be issued and guaranteed by Fannie Mae or Freddie Mac. FHFA's request for public input states that development of the single security will be a multi-year initiative, and that FHFA's goal for the proposed single security structure is for legacy Fannie Mae MBS and legacy Freddie Mac PCs to be fungible with the new single security for purposes of fulfilling "to-be-announced" ("TBA") contracts. Many of the proposed features of the single security are similar to those of current Fannie Mae MBS. We believe the development of a single common security would likely reduce, and could eliminate, the trading advantage Fannie Mae mortgage-backed securities have over Freddie Mac mortgage-backed securities. If this occurs, we believe it would negatively impact our ability to compete for mortgage assets in the secondary market, and therefore could adversely affect our results of operations. See "Risk Factors" for a discussion of the risks to our business associated with a single common security for Fannie Mae and Freddie Mac, as well as other risks associated with FHFA's 2014 strategic plan.

FHFA Strategic Plan. In August 2014, FHFA also issued a Strategic Plan: Fiscal Years 2015-2019 for public input. Like FHFA's 2014 Strategic Plan for the Conservatorships of Fannie Mae and Freddie Mac, FHFA's Strategic Plan for 2015-2019 identifies as important priorities for FHFA the ongoing work to develop a common securitization infrastructure, improve the liquidity of GSE securities and build more accurate and uniform mortgage data standards.

Common Securitization Platform. In October 2013, Fannie Mae and Freddie Mac established Common Securitization Solutions, LLC ("CSS"), a jointly owned limited liability company formed to design, develop, build and ultimately operate a common securitization platform. The intended purpose of the common securitization platform is to replace certain elements of Fannie Mae's and Freddie Mac's proprietary systems for securitizing mortgages and performing associated back office and administrative functions. Fannie Mae and Freddie Mac recently took further steps to develop CSS's capabilities with the execution of three agreements on November 3, 2014. Fannie Mae and Freddie Mac entered into an Amended and Restated

Limited Liability Company Agreement with CSS that provides further detail regarding the rights, obligations and understandings between the companies with respect to CSS, including the governance of CSS. In connection with the agreement, the companies appointed a chief executive officer and four members of the CSS Board of Managers, two each from Fannie Mae and Freddie Mac. Fannie Mae, Freddie Mac and CSS also entered into a contribution agreement providing for, among other things, the contribution by Fannie Mae and Freddie Mac of intellectual property and cash resources to CSS, as well as the assignment of various agreements necessary for CSS's development and operation of securitization functions. In addition, Fannie Mae and Freddie Mac each entered into a separate agreement with CSS with respect to the administrative support services the companies will provide to CSS until CSS has the capabilities to provide these services on its own. Although these are important steps towards the further development of the common securitization platform, we expect it will be several years before CSS will have sufficient operational capabilities to serve its intended purpose as a common securitization platform for us and Freddie Mac.

Portfolio Reduction Plan. Under our senior preferred stock purchase agreement with Treasury, by December 31 of each year, we are required to reduce our mortgage assets to 85% of the maximum allowable amount that we were permitted to own as of December 31 of the immediately preceding calendar year, until the amount of our mortgage assets reaches $250 billion in 2018. FHFA's 2014 conservatorship scorecard required us to submit a portfolio plan to FHFA outlining how we will meet, even under adverse conditions, the reductions in our portfolio required by our senior preferred stock purchase agreement with Treasury. We initially submitted this plan to FHFA in July 2014. In October 2014, FHFA requested that we revise our plan to cap the portfolio each year at 90% of the annual limit under our senior preferred stock purchase agreement with Treasury. FHFA's request noted that we may seek FHFA permission to increase this cap to 95% of the annual limit under our senior preferred stock purchase agreement with Treasury upon written request and with a documented basis for exception, such as changed market conditions. We submitted a revised portfolio plan to FHFA in October 2014 that complies with FHFA's request to cap our portfolio at 90% of the annual limit under our senior preferred stock purchase agreement with Treasury. Accordingly, under our revised portfolio plan, we plan to reduce our mortgage portfolio to no more than $422.7 billion as of December 31, 2014, in compliance with both our senior preferred stock purchase agreement with Treasury and FHFA's request. See "Business Segment Results—Capital Markets Group Results—The Capital Markets Group's Mortgage Portfolio" for more information about our mortgage portfolio.

2013 Housing Goals Performance

We are subject to housing goals, which establish specified requirements for our mortgage acquisitions relating to affordability or location. Our single-family performance is measured against the lower of benchmarks established by FHFA or goals-qualifying originations in the primary mortgage market. Multifamily goals are established as a number of units to be financed. In our 2013 Form 10-K, we reported that we believed we met all of the FHFA-established single-family benchmarks for 2013 except for the single-family very low-income families home purchase goal benchmark, as well as both of our 2013 multifamily goals, and that FHFA would issue a final determination on our 2013 housing goals performance after the release of data reported under the Home Mortgage Disclosure Act ("HMDA"). In October 2014, FHFA notified us that it had preliminarily determined that we met all of our single-family and multifamily housing goals for 2013, except for the single-family very low-income families home purchase goal. FHFA preliminarily determined that our performance for this goal, which was 6% of our 2013 acquisitions of single-family owner-occupied purchase money mortgage loans, failed to meet both the applicable benchmark of 7% and the overall market level for 2013 of 6.3%. See "Business—Our Charter and Regulation of Our Activities—The GSE Act—Housing Goals and Duty to Serve Undeserved Markets—Housing Goals" in our 2013 Form 10-K for a more detailed discussion of our housing goals.

Proposed Housing Goals for 2015 to 2017

In August 2014, FHFA published a proposed rule that would establish single-family and multifamily housing goals for Fannie Mae and Freddie Mac for 2015 to 2017. Comments on the proposed rule were due in October 2014. FHFA will issue a final rule after considering the comments received on the proposed rule.

Proposed Single-Family Housing Goals

FHFA's proposed rule requests comment on three alternative approaches for measuring Fannie Mae and Freddie Mac's performance on the single-family housing goals for 2015 to 2017:

- Alternative 1 would use the current two-step process, which measures performance by comparing it to both (1) benchmark levels that are set prospectively and (2) actual market levels that are determined retrospectively based on HMDA data;
- Alternative 2 would measure performance against prospective benchmark levels only; and

15

- Alternative 3 would measure performance against retrospective market levels only.

FHFA has proposed the following single-family home purchase and refinance housing goal benchmarks for 2015 to 2017 under Alternative 1. A home purchase mortgage may be counted toward more than one home purchase benchmark.

- Low-Income Families Home Purchase Benchmark: At least 23% of our acquisitions of single-family owner-occupied purchase money mortgage loans must be affordable to low-income families (defined as income equal to or less than 80% of area median income). This is the same benchmark currently applicable for 2014.
- Very Low-Income Families Home Purchase Benchmark: At least 7% of our acquisitions of single-family owner-occupied purchase money mortgage loans must be affordable to very low-income families (defined as income equal to or less than 50% of area median income). This is the same benchmark currently applicable for 2014.
- Low-Income Areas Home Purchase Goal Benchmark: The benchmark level for our acquisitions of single-family owner-occupied purchase money mortgage loans for families in low-income areas is set annually by notice from FHFA, based on the benchmark level for the low-income areas home purchase subgoal (below), plus an adjustment factor reflecting the additional incremental share of mortgages for moderate-income families (defined as income equal to or less than 100% of area median income) in designated disaster areas.
- Low-Income Areas Home Purchase Subgoal Benchmark: At least 14% of our acquisitions of single-family owner-occupied purchase money mortgage loans must be affordable to families in low-income census tracts or to moderate-income families in high-minority census tracts. This is an increase from the benchmark of 11% currently applicable for 2014.
- Low-Income Families Refinancing Benchmark: At least 27% of our acquisitions of single-family owner-occupied refinance mortgage loans must be affordable to low-income families. This is an increase from the benchmark of 20% currently applicable for 2014.

Under Alternative 1, if we do not meet these benchmarks, we may still meet our goals. Our single-family housing goals performance would be measured against both these benchmarks and against goals-qualifying originations in the primary mortgage market after the release of HMDA data, which is typically released each year in the fall. We would be in compliance with the housing goals if we meet either the benchmarks or market share measures.

FHFA's proposed rule noted that, if it were to adopt Alternative 2, it would consider adopting single-family benchmark levels that are lower than the proposed levels for Alternative 1 described above. Alternative 3 would not involve setting prospective benchmark levels.

Proposed Multifamily Housing Goals

FHFA's proposed rule also includes benchmark levels for a multifamily special affordable housing goal and subgoal, and establishes a new subgoal for small multifamily properties (defined as those with 5 to 50 units) affordable to low-income families. FHFA's proposed multifamily benchmark levels for Fannie Mae for 2015 to 2017 would be the same levels currently applicable to Fannie Mae for 2014: 250,000 units per year must be affordable to low-income families and 60,000 units per year must be affordable to very low-income families. FHFA's proposed new subgoal for Fannie Mae for small multifamily properties affordable to low-income families increases each year: 20,000 units in 2015; 25,000 units in 2016; and 30,000 units in 2017. There is no market-based alternative measurement for the multifamily goal or subgoals.

The Dodd-Frank Act: Margin and Capital Requirements for Covered Swap Entities

In September 2014, the Federal Reserve Board, the Federal Deposit Insurance Corporation ("FDIC"), FHFA, the Farm Credit Administration and the Office of the Comptroller of the Currency issued new proposed rules under the Dodd-Frank Act governing margin and capital requirements applicable to entities that are subject to their oversight. These proposed rules would require that, for all trades that have not been submitted to a derivatives clearing organization, we collect from and provide to our counterparties collateral in excess of the amounts we have historically collected or provided relative to our level of activity. We continue to evaluate the potential impact of this rule on our business.

The Dodd-Frank Act: Final Risk Retention Rule

In October 2014, the Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, the FDIC, the Securities and Exchange Commission ("SEC"), FHFA and the Department of Housing and Urban

Development issued a final rule requiring securitizers to retain a portion of the credit risk in assets transferred, sold or conveyed through the issuance of asset-backed securities, with certain exceptions. This rule was mandated by Section 941 of the Dodd-Frank Act. The final rule requires securitizers to retain at least 5% of the credit risk of the assets they securitize. The rule offers

several compliance options, one of which is to have either Fannie Mae or Freddie Mac (so long as they are in conservatorship or receivership) securitize and fully guarantee the assets, in which case no further retention of credit risk is required. In addition, securities backed solely by mortgage loans meeting the definition of a "qualified residential mortgage" are exempt from the risk retention requirements of the rule. The rule defines qualified residential mortgage to have the same meaning as the term "qualified mortgage" as defined by the Consumer Financial Protection Bureau ("CFPB") in connection with its "ability to repay" rule under Regulation Z. Generally, a loan will be a qualified mortgage under the CFPB's ability to repay rule if, among other things, (1) the points and fees paid in connection with the loan do not exceed 3% of the total loan amount, (2) the loan term does not exceed 30 years, (3) the loan is fully amortizing with no negative amortization, interest-only or balloon features and (4) the debt-to-income ratio on the loan does not exceed 43% at origination. The CFPB also defined a special class of conventional mortgage loans that will be qualified mortgages if they (1) meet the points and fees, term and amortization requirements of qualified mortgages generally and (2) are eligible for sale to Fannie Mae or Freddie Mac. This class of qualified mortgages expires on the earlier of January 10, 2021 or when the GSEs cease to be in conservatorship or receivership. The final risk retention rule will become effective one year after publication in the Federal Register for single-family mortgage loans and two years after publication in the Federal Register for multifamily mortgage loans. We continue to evaluate the potential impact of this rule on our business.

Final Bank Minimum Liquidity Standards

In September 2014, U.S. banking regulators issued a final regulation setting minimum liquidity standards for large U.S. banks generally in accordance with Basel III standards. Although we are not subject to banking regulations, U.S. banks currently hold large amounts of our outstanding debt and Fannie Mae MBS securities and, as a result, our business may be affected by these new minimum liquidity standards.

Under the final rule, U.S. banks subject to the standards are required to hold a minimum level of high-quality liquid assets based on projections of their short-term cash needs. The debt and mortgage-related securities of Fannie Mae and Freddie Mac are permitted to count toward only up to 40% of the banks' high-quality liquid asset requirement, and then only after applying a 15% discount to the market value of those securities. The final rule becomes effective January 1, 2015 and provides for a transition period. Banks subject to the rule are required to maintain a minimum liquidity coverage ratio of 80% beginning on January 1, 2015, 90% beginning on January 1, 2016 and 100% beginning on January 1, 2017.

Prior U.S. banking regulations did not limit the amount of Fannie Mae or Freddie Mac debt and mortgage-related securities that banks were permitted to count toward their liquidity requirements. Accordingly, the implementation of this rule could materially adversely affect demand by banks for Fannie Mae debt securities and MBS, which could adversely affect the price of those securities and could have a material adverse effect on our business, results of operations, financial condition, liquidity and net worth.

Dismissal of Lawsuit Relating to Conservatorship Operations

In June 2011, FHFA issued a final rule establishing a framework for conservatorship and receivership operations for the GSEs, which became effective in July 2011. The rule includes a provision that FHFA, as conservator, will not pay securities litigation claims against us during conservatorship, unless the Director of FHFA determines it is in the interest of the conservatorship. In August 2011, an action was brought in the U.S. District Court for the District of Columbia against FHFA and FHFA's Director by the Ohio Public Employees Retirement System and the State Teachers Retirement System of Ohio challenging the rule's provisions regarding nonpayment of securities litigation claims. In October 2014, the plaintiffs voluntarily dismissed this action without prejudice.

FHFA Advisory Bulletin Regarding Framework for Adversely Classifying Loans

In April 2012, FHFA issued Advisory Bulletin AB 2012-02, "Framework for Adversely Classifying Loans, Other Real Estate Owned, and Other Assets and Listing Assets for Special Mention" (the "Advisory Bulletin"). The Advisory Bulletin requires, among other things, that we classify the portion of an outstanding single-family loan balance in excess of the fair value of the underlying property, less costs to sell and adjusted for any credit enhancements, as a "loss" no later than when the loan becomes 180 days delinquent, except in certain specified circumstances (such as those involving properly secured loans with an LTV ratio equal to or less than 60%). The Advisory Bulletin also requires us to charge off the portion of the loan classified as a "loss." Our current analytics and historical data do not support

charging off loans at 180 days delinquent. As a result, for the vast majority of our delinquent single-family loans, we expect to continue to charge off the loan at the date of foreclosure or other liquidation event (such as a deed-in-lieu of foreclosure or a short sale). For a small subset of delinquent loans deemed to be uncollectible prior to foreclosure by our historical data, we will classify them as “loss” and charge off the portion of the loan classified as “loss” prior to the date of foreclosure or other liquidation event, which given our current credit analytics and historical data, will be when the loans are excessively delinquent and the outstanding loan balance

exceeds the fair value of the underlying property. Under our approach to adopting the charge-off provisions of the Advisory Bulletin in the first quarter of 2015, our allowance for loan losses on the charged-off loans will be eliminated and the corresponding recorded investment in the loans will be reduced by the amounts that are charged off. We do not expect that the adoption of the Advisory Bulletin will have a material impact on our financial position or results of operations.

For information on the risks presented by our adoption of the Advisory Bulletin, see "Risk Factors" in our 2013 Form 10-K. See "Executive Summary—Outlook" for a discussion of the expected impact of our implementation of the charge-off provisions of the Advisory Bulletin on our credit losses and loss reserves.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements in accordance with GAAP requires management to make a number of judgments, estimates and assumptions that affect the reported amount of assets, liabilities, income and expenses in the condensed consolidated financial statements. Understanding our accounting policies and the extent to which we use management judgment and estimates in applying these policies is integral to understanding our financial statements. We describe our most significant accounting policies in "Note 1, Summary of Significant Accounting Policies" in this report and in our 2013 Form 10-K.

We evaluate our critical accounting estimates and judgments required by our policies on an ongoing basis and update them as necessary based on changing conditions. Management has discussed any significant changes in judgments and assumptions in applying our critical accounting policies with the Audit Committee of our Board of Directors. See "Risk Factors" in our 2013 Form 10-K for a discussion of the risks associated with the need for management to make judgments and estimates in applying our accounting policies and methods. We have identified four of our accounting policies as critical because they involve significant judgments and assumptions about highly complex and inherently uncertain matters, and the use of reasonably different estimates and assumptions could have a material impact on our reported results of operations or financial condition. These critical accounting policies and estimates are as follows:

- Fair Value Measurement;
- Total Loss Reserves;
- Other-Than-Temporary Impairment of Investment Securities; and
- Deferred Tax Assets.

See "MD&A—Critical Accounting Policies and Estimates" in our 2013 Form 10-K for a discussion of these critical accounting policies and estimates. We describe below significant changes we made in the third quarter of 2014 to the model and the assumptions used in estimating our allowance for loan losses, which is a component of our total loss reserves.

Total Loss Reserves

Our total single-family and multifamily loss reserves consist of the following components:

- Allowance for loan losses;
- Allowance for accrued interest receivable;
- Reserve for guaranty losses; and
- Allowance for preforeclosure property tax and insurance receivable.

We continually monitor prepayment, delinquency, modification, default and loss severity trends and periodically make changes in our historically developed assumptions to better reflect present conditions of loan performance. In the third quarter of 2014, we updated the model and the assumptions used to estimate cash flows for individually impaired single-family loans within our allowance for loan losses. In addition to incorporating recent loan performance, this update better captures regional variations in expected future cash flows, particularly with respect to expectations of future home prices. This update resulted in a decrease to our allowance for loan losses as of September 30, 2014 and an incremental benefit for credit losses of approximately $600 million for the third quarter of 2014.

CONSOLIDATED RESULTS OF OPERATIONS

This section provides a discussion of our condensed consolidated results of operations for the periods indicated and should be read together with our condensed consolidated financial statements, including the accompanying notes.
Table 3 displays a summary of our condensed consolidated results of operations for the periods indicated.

Table 3: Summary of Condensed Consolidated Results of Operations

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Variance	2014	2013	Variance
	(Dollars in millions)					
Net interest income	$5,184	$5,582	$(398)	$14,826	$17,553	$(2,727)
Fee and other income	826	741	85	5,564	1,794	3,770

Total comprehensive income attributable to Fannie Mae	$4,000	$8,603	$(4,603)	$13,408	$78,192	$(64,784)

____
(1) Consists of net other-than-temporary impairments; debt extinguishment gains, net; TCCA fees and other expenses, net.

Net Interest Income

We currently have two primary sources of net interest income: (1) the difference between interest income earned on the assets in our retained mortgage portfolio and the interest expense associated with the debt that funds those assets; and (2) the guaranty fees we receive for managing the credit risk on loans underlying Fannie Mae MBS held by third parties, which we refer to as mortgage loans of consolidated trusts.

Table 4 displays an analysis of our net interest income, average balances, and related yields earned on assets and incurred on liabilities for the periods indicated. For most components of the average balances, we use a daily weighted average of amortized cost. When daily average balance information is not available, such as for mortgage loans, we use monthly averages. Table 5 displays the change in our net interest income between periods and the extent to which that variance is attributable to: (1) changes in the volume of our interest-earning assets and interest-bearing liabilities or (2) changes in the interest rates of these assets and liabilities.

19

---

(1) Average balance includes mortgage loans on nonaccrual status. Interest income on nonaccrual mortgage loans is recognized when cash is received. Interest income not recognized for loans on nonaccrual status was $436 million and $1.4 billion for the third quarter and first nine months of 2014, respectively, compared with $688 million and $2.2 billion for the third quarter and first nine months of 2013, respectively.

(2) Includes cash equivalents.

(3) Includes federal funds purchased and securities sold under agreements to repurchase.

(4) Data from IntercontinentalExchange Group, Inc., Thomson Reuters and Bloomberg L.P.

____
(1) Combined rate/volume variances are allocated to both rate and volume based on the relative size of each variance.
(2) Includes cash equivalents.
(3) Includes federal funds purchased and securities sold under agreements to repurchase.

Net interest income decreased in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013, primarily due to a decline in the average balance of our retained mortgage portfolio. The average balance of our retained mortgage portfolio was 17% lower in the third quarter of 2014 than in the third quarter of 2013 and was 20% lower in the first nine months of 2014 than in the first nine months of 2013. In addition, net amortization income related to mortgage loans and debt of consolidated trusts declined compared with the prior year periods due to a decline in prepayments. The decrease in net interest income was partially offset by increased guaranty fee revenue, as loans with higher guaranty fees have become a larger part of our guaranty book of business. We recognize almost all of our guaranty fee revenue in net interest income due to the consolidation of the substantial majority of loans underlying our MBS trusts on our balance sheet.

Net interest yield decreased in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013 due to the decline in the percentage of net interest income from our retained mortgage portfolio, which has a higher net interest yield than the net interest yield from guaranty fees.

Fee and Other Income

Fee and other income includes transaction fees, technology fees, multifamily fees and other miscellaneous income. Fee and other income increased in the first nine months of 2014 compared with the first nine months of 2013, primarily as a result of $4.8 billion recognized as income in the first nine months of 2014 compared with $561 million in the first nine months of 2013, both resulting from settlement agreements resolving certain lawsuits relating to PLS sold to us. See "Legal Proceedings—FHFA Private-Label Mortgage-Related Securities Litigation" for additional

information.

Investment Gains, Net

Investment gains, net include gains and losses recognized from the sale of available-for-sale ("AFS") securities, gains and losses recognized on the securitization of loans and securities from our retained mortgage portfolio and gains and losses recognized on the consolidation and deconsolidation of securities. Investment gains decreased in the third quarter of 2014 compared with the third quarter of 2013 primarily due to fewer sales of non-agency mortgage-related securities in the third quarter of 2014 compared with the third quarter of 2013. Investment gains decreased in the first nine months of 2014 compared with the first nine months of 2013 primarily due to an increase in losses on the consolidation and deconsolidation of securities.

Fair Value (Losses) Gains, Net

Table 6 displays the components of our fair value gains and losses.

Table 6: Fair Value (Losses) Gains, Net

As of September 30	2.64 %	2.77 %

(1) Consists of debt fair value gains (losses), net; debt foreign exchange gains (losses), net; and mortgage loans fair value gains (losses), net.

Risk Management Derivatives Fair Value (Losses) Gains, Net

Risk management derivative instruments are an integral part of our interest rate risk management strategy. We supplement our issuance of debt securities with derivative instruments to further reduce interest rate risk. We recognized risk management derivative fair value losses in the third quarter of 2014 primarily due to increases in shorter-term swap rates. We recognized risk management derivative fair value losses for the first nine months of 2014 primarily as a result of decreases in the fair value of our pay-fixed derivatives due to declines in longer-term swap rates during the period. We recognized risk management derivative fair value gains in the third quarter and first nine months of 2013 primarily as a result of increases in the fair value of our pay-fixed derivatives as longer-term swap rates increased during the periods.

23

We present, by derivative instrument type, the fair value gains and losses, net on our derivatives for the three and nine months ended September 30, 2014 and 2013 in "Note 9, Derivative Instruments."

Mortgage Commitment Derivatives Fair Value (Losses) Gains, Net

We recognized fair value losses on our mortgage commitments in the third quarter and first nine months of 2014 primarily due to losses on commitments to sell mortgage-related securities driven by an increase in prices as interest rates decreased during the commitment period. We recognized fair value losses on our mortgage commitments in the third quarter of 2013 primarily due to losses on commitments to sell mortgage-related securities driven by higher prices as interest rates decreased during the commitment period. We recognized fair value gains on our mortgage commitments in the first nine months of 2013 primarily due to gains on commitments to sell mortgage-related securities driven by lower prices as interest rates increased during the commitment period.

Trading Securities Gains (Losses), Net

Gains from trading securities in the third quarter and first nine months of 2014 were driven by higher prices on securities primarily due to a decrease in interest rates, in addition to a narrowing of credit spreads on PLS.

Losses from trading securities in the third quarter of 2013 were primarily driven by lower prices on commercial mortgage-backed securities ("CMBS") and PLS due to a widening of credit spreads. Gains from trading securities in the first nine months of 2013 were primarily driven by gains from higher prices on Alt-A and subprime PLS, due to the narrowing of credit spreads on these securities as well as improvements in the credit outlook of certain financial guarantors of these securities in the first quarter of 2013. These gains were partially offset by the losses on CMBS in the second and third quarters of 2013.

Credit-Related Income

We refer to our benefit for loan losses and (benefit) provision for guaranty losses collectively as our "benefit for credit losses." Credit-related income consists of our benefit for credit losses and foreclosed property expense (income).

Benefit for Credit Losses

Table 7 displays the components of our total loss reserves and our total fair value losses previously recognized on loans purchased out of unconsolidated MBS trusts reflected in our condensed consolidated balance sheets. Because these fair value losses lowered our recorded loan balances, we have fewer inherent losses in our guaranty book of business and consequently require lower total loss reserves. For these reasons, we consider these fair value losses as an "effective reserve," apart from our total loss reserves, to the extent that we expect to realize these amounts as credit losses on the acquired loans in the future. The fair value losses shown in Table 7 represent credit losses we expect to realize in the future or amounts that will eventually be recovered, either through net interest income for loans that cure or through foreclosed property income for loans where the sale of the collateral exceeds our recorded investment in the loan. We exclude these fair value losses from our credit loss calculation as described in "Credit Loss Performance Metrics."

Table 7: Total Loss Reserves

	As of	
	September 30, 2014	December 31, 2013
	(Dollars in millions)	
Allowance for loan losses	$36,931	$43,846
Reserve for guaranty losses[1]	1,324	1,449
Combined loss reserves	38,255	45,295
Allowance for accrued interest receivable	764	1,156
Allowance for preforeclosure property taxes and insurance receivable[2]	718	839
Total loss reserves	39,737	47,290
Fair value losses previously recognized on acquired credit-impaired loans[3]	10,211	11,316
Total loss reserves and fair value losses previously recognized on acquired credit-impaired loans	$49,948	$58,606

(1) Amount included in "Other liabilities" in our condensed consolidated balance sheets.

(2) Amount included in "Other assets" in our condensed consolidated balance sheets.
(3) Represents the fair value losses on loans purchased out of unconsolidated MBS trusts reflected in our condensed consolidated balance sheets.

Table 8 displays changes in the total allowance for loan losses, reserve for guaranty losses and the total combined loss reserves for the periods indicated.

Table 8: Allowance for Loan Losses and Reserve for Guaranty Losses (Combined Loss Reserves)

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2014	2013	2014	2013
	(Dollars in millions)

Recoveries	—	—	(5)	1
Ending balance	$1,324	$1,193	$1,324	$1,193
Combined loss reserves:				
Beginning balance	$40,451	$50,873	$45,295	$60,026
Benefit for credit losses	(1,085)	(2,609)	(3,498)	(8,949)
Charge-offs[1]	(1,587)	(2,353)	(5,174)	(7,386)
Recoveries	275	294	1,119	2,139
Other[2]	201	157	513	532
Ending balance	$38,255	$46,362	$38,255	$46,362

	As of September 30, 2014		December 31, 2013	
	(Dollars in millions)			
Allocation of combined loss reserves:				
Balance at end of each period attributable to:				
Single-family	$37,854		$44,705	
Multifamily	401		590	
Total	$38,255		$45,295	
Single-family and multifamily combined loss reserves as a percentage of applicable guaranty book of business:				
Single-family	1.33	%	1.55	%
Multifamily	0.20		0.29	
Combined loss reserves as a percentage of:				
Total guaranty book of business	1.25	%	1.47	%
Recorded investment in nonaccrual loans[3]	56.26		54.20	

(1) Includes accrued interest of $72 million and $100 million for the three months ended September 30, 2014 and 2013, respectively, and $241 million and $337 million for the nine months ended September 30, 2014 and 2013, respectively.

(2) Amounts represent the net activity recorded in our allowances for accrued interest receivable and preforeclosure property taxes and insurance receivable from borrowers. The benefit for credit losses, charge-offs and recoveries activity included in this table reflects all changes for both the allowance for loan losses and the valuation allowances for accrued interest and preforeclosure property taxes and insurance receivable that relate to the mortgage loans.

(3) Excludes off-balance sheet loans in unconsolidated Fannie Mae MBS trusts that would meet our criteria for nonaccrual status if the loans had been on-balance sheet.

The amount of our benefit or provision for credit losses varies from period to period based on changes in actual and expected home prices, borrower payment behavior, the types and volumes of loss mitigation activities and foreclosures completed, and actual and estimated recoveries from our lender and mortgage insurer counterparties. See “Risk Management—Credit Risk Management—Institutional Counterparty Credit Risk Management” for information on mortgage insurers and outstanding mortgage seller and servicer repurchase obligations. In addition, our benefit or provision for credit losses and our loss reserves can be impacted by updates to the models, assumptions and data used in determining our allowance for loan losses.

We recognized a benefit for credit losses in the third quarter and first nine months of 2014 primarily due to increases in home prices of 1.2% in the third quarter of 2014 and 5.3% in the first nine months of 2014. Higher home prices decrease the likelihood that loans will default and reduce the amount of credit loss on loans that do default, which impacts our estimate of losses and ultimately reduces our total loss reserves and provision for credit losses. In addition, in the third quarter of 2014, we updated the model and the assumptions used to estimate cash flows for individually impaired single-family loans within our allowance for loan losses, which resulted in a decrease to our allowance for loan losses and an incremental benefit for credit losses of approximately $600 million for the third quarter and first nine months of 2014. For additional information, see “Critical Accounting Policies and Estimates—Total Loss Reserves.”

We recognized a benefit for credit losses in the third quarter and first nine months of 2013 primarily due to increases in home prices, including the sales prices of our REO properties as a result of strong demand in the first nine months of 2013. Home prices increased by 2.1% in the third quarter of 2013 and 8.3% in the first nine months of 2013. In addition, in the first nine months of 2013, we updated the assumptions and data used to estimate our allowance for loan losses for individually impaired single-family loans, which resulted in a decrease to our allowance for loan losses and an incremental benefit for credit losses of approximately $2.2 billion for the first nine months of 2013.

We discuss our expectations regarding our future loss reserves in “Executive Summary—Outlook—Loss Reserves.”

Troubled Debt Restructurings and Nonaccrual Loans

Table 9 displays the composition of loans restructured in a troubled debt restructuring ("TDR") that are on accrual status and loans on nonaccrual status. The table includes held-for-investment and held-for-sale mortgage loans. For information on the impact of TDRs and other individually impaired loans on our allowance for loan losses, see "Note 3, Mortgage Loans."

Table 9: Troubled Debt Restructurings and Nonaccrual Loans

	As of September 30, 2014	As of December 31, 2013
	(Dollars in millions)	
TDRs on accrual status:		
Single-family	$144,802	$140,512
Multifamily	1,124	715
Total TDRs on accrual status	$145,926	$141,227
Nonaccrual loans:		
Single-family	$66,673	$81,355
Multifamily	1,325	2,209
Total nonaccrual loans	$67,998	$83,564
Accruing on-balance sheet loans past due 90 days or more[1]	$616	$719

	For the Nine Months Ended September 30, 2014	For the Nine Months Ended September 30, 2013
	(Dollars in millions)	
Interest related to on-balance sheet TDRs and nonaccrual loans:		
Interest income forgone[2]	$4,628	$5,291
Interest income recognized for the period[3]	4,628	4,527

(1) Recorded investment in loans that, as of the end of each period, are 90 days or more past due and continuing to accrue interest. The majority of this amount consists of loans insured or guaranteed by the U.S. government and loans for which we have recourse against the seller in the event of a default.

(2) Represents the amount of interest income we did not recognize, but would have recognized during the period for nonaccrual loans and TDRs on accrual status as of the end of each period had the loans performed according to their original contractual terms.

(3) Represents interest income recognized during the period for loans classified as either nonaccrual loans or TDRs on accrual status as of the end of each period. Includes primarily amounts accrued while the loans were performing and cash payments received on nonaccrual loans.

Foreclosed Property (Expense) Income

We recognized foreclosed property expense in the third quarter of 2014 compared with foreclosed property income in the third quarter of 2013. Foreclosed property income decreased in the first nine months of 2014 compared with the first nine months of 2013. These changes were primarily due to a decrease in the amount of compensatory fee income recognized related to servicing matters. In the third quarter of 2013, we recognized compensatory fee income received in connection with our compensatory fee agreement with Bank of America which had previously been deferred until we substantially completed the loan review process related to the agreement. Compensatory fees are amounts we charge our primary servicers for servicing delays within their control when they fail to comply with established loss mitigation and foreclosure timelines as required by our Servicing Guide, which sets forth our policies and procedures related to servicing our single-family mortgages.

Credit Loss Performance Metrics

Our credit-related income should be considered in conjunction with our credit loss performance metrics. Our credit loss performance metrics, however, are not defined terms within GAAP and may not be calculated in the same manner

as similarly titled measures reported by other companies. Because management does not view changes in the fair value of our mortgage loans as credit losses, we adjust our credit loss performance metrics for the impact associated with our acquisition

of credit-impaired loans from unconsolidated MBS trusts. We also exclude interest forgone on nonaccrual loans and TDRs, other-than-temporary impairment losses resulting from deterioration in the credit quality of our mortgage-related securities and accretion of interest income on acquired credit-impaired loans from credit losses. We believe that credit loss performance metrics may be useful to investors as the losses are presented as a percentage of our book of business and have historically been used by analysts, investors and other companies within the financial services industry. Moreover, by presenting credit losses with and without the effect of fair value losses associated with the acquisition of credit-impaired loans, investors are able to evaluate our credit performance on a more consistent basis among periods. Table 10 displays the components of our credit loss performance metrics as well as our single-family and multifamily initial charge-off severity rates.

Table 10: Credit Loss Performance Metrics

	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2014		2013		2014		2013	
	Amount	Ratio[1]	Amount	Ratio[1]	Amount	Ratio[1]	Amount	Ratio[1]
	(Dollars in millions)							
Charge-offs, net of recoveries	$1,312	17.2 bps	$2,059	26.9 bps	$4,055	17.6 bps	$5,247	22.9 bps
Foreclosed property expense (income)	249	3.3	(1,165)	(15.2)	(227)	(1.0)	(1,757)	(7.7)
Credit losses including the effect of fair value losses on acquired credit-impaired loans	1,561	20.5	894	11.7	3,828	16.6	3,490	15.2
Plus: Impact of acquired credit-impaired loans on charge-offs and foreclosed property expense (income)[2]	158	2.1	248	3.2	493	2.1	754	3.3
Credit losses and credit loss ratio	$1,719	22.6 bps	$1,142	14.9 bps	$4,321	18.7 bps	$4,244	18.5 bps
Credit losses attributable to:								
Single-family	$1,738		$1,083		$4,362		$4,127	
Multifamily[3]	(19)		59		(41)		117	
Total	$1,719		$1,142		$4,321		$4,244	
Single-family initial charge-off severity rate[4]		19.24 %		22.16 %		19.50 %		24.78 %
Multifamily initial charge-off severity rate[4]		28.21 %		21.00 %		24.18 %		24.49 %

(1) Basis points are based on the annualized amount for each line item presented divided by the average guaranty book of business during the period.

(2) Includes fair value losses from acquired credit-impaired loans.

(3) Negative credit losses are the result of recoveries on previously charged-off amounts.

(4) Single-family and multifamily rates exclude fair value losses on credit-impaired loans acquired from MBS trusts and any costs, gains or losses associated with REO after initial acquisition through final disposition. Single-family rate excludes charge-offs from short sales and third-party sales. Multifamily rate is net of risk-sharing agreements.

Credit losses increased in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013 primarily due to the recognition of compensatory fees received in connection with our compensatory fee agreement with Bank of America in the third quarter of 2013. This increase in our credit losses was partially offset by lower REO acquisitions in the third quarter and first nine months of 2014, driven by lower delinquencies and the slow pace of foreclosures in certain areas of the country. For additional information, refer to "Risk Management—Credit

Risk Management—Single-Family Mortgage Credit Risk Management—Problem Loan Management.” The increase in credit losses in the third quarter and first nine months of 2014 was also partially offset by the recovery of previously charged off loans resulting from a settlement agreement reached in the first quarter of 2014 with Lehman Brothers Holdings, Inc. (“Lehman Brothers”) related to representation and warranty matters. For more information on this agreement, see “Risk Management—Credit Risk Management—Institutional Counterparty Credit Risk Management—Other.” We discuss our expectations regarding our future credit losses in “Executive Summary—Outlook—Credit Losses.”

Regulatory Hypothetical Credit Loss Sensitivities

Under a September 2005 agreement with FHFA's predecessor, the Office of Federal Housing Enterprise Oversight, we are required to disclose on a quarterly basis the present value of the change in future expected credit losses from our existing single-family guaranty book of business from an immediate 5% decline in single-family home prices for the entire United States followed by a return to the average of the possible growth rate paths used in our internal credit pricing models. The sensitivity results represent the difference between future expected credit losses under our base case scenario, which is derived from our internal home price path forecast, and a scenario that assumes an instantaneous nationwide 5% decline in home prices.

Table 11 displays the credit loss sensitivities as of the dates indicated for first-lien single-family loans that are in our retained mortgage portfolio or underlying Fannie Mae MBS, before and after consideration of projected credit risk sharing proceeds, such as private mortgage insurance claims and other credit enhancements.

Table 11: Single-Family Credit Loss Sensitivity[1]

	As of	
	September 30, 2014	December 31, 2013
	(Dollars in millions)	
Gross single-family credit loss sensitivity	$7,980	$9,109
Less: Projected credit risk sharing proceeds	(726)	(1,062)
Net single-family credit loss sensitivity	$7,254	$8,047
Single-family loans in our retained mortgage portfolio and loans underlying Fannie Mae MBS	$2,797,842	$2,828,395
Single-family net credit loss sensitivity as a percentage of outstanding single-family loans in our retained mortgage portfolio and Fannie Mae MBS	0.26%	0.28%

____

(1) Represents total economic credit losses, which consist of credit losses and forgone interest. Calculations are based on 98% of our total single-family guaranty book of business as of September 30, 2014 and December 31, 2013. The mortgage loans and mortgage-related securities that are included in these estimates consist of: (a) single-family Fannie Mae MBS (whether held in our retained mortgage portfolio or held by third parties), excluding certain whole loan Real Estate Mortgage Investment Conduits ("REMICs") and private-label wraps; (b) single-family mortgage loans, excluding mortgages secured only by second liens, subprime mortgages, manufactured housing chattel loans and reverse mortgages; and (c) long-term standby commitments. We expect the inclusion in our estimates of the excluded products may impact the estimated sensitivities set forth in this table.

Because these sensitivities represent hypothetical scenarios, they should be used with caution. Our regulatory stress test scenario is limited in that it assumes an instantaneous uniform 5% nationwide decline in home prices, which is not representative of the historical pattern of changes in home prices. Changes in home prices generally vary on a regional, as well as a local, basis. In addition, these stress test scenarios are calculated independently without considering changes in other interrelated assumptions, such as unemployment rates or other economic factors, which are likely to have a significant impact on our future expected credit losses.

Other Non-Interest Expenses

Other non-interest expenses increased in the first nine months of 2014 compared with the first nine months of 2013 primarily due to an increase in TCCA fees. TCCA fees increased in the first nine months of 2014 compared with the first nine months of 2013 due to an increase in the percentage of loans in our single-family book of business subject to the TCCA. We expect the guaranty fees collected and expenses incurred under the TCCA to continue to increase in the future.

Federal Income Taxes

We recognized a provision for federal income taxes of $1.8 billion for the third quarter of 2014 and $6.1 billion for the first nine months of 2014. We recognized a provision for federal income taxes of $1.4 billion for the third quarter of 2013 and a benefit for federal income taxes of $47.2 billion for the first nine months of 2013. In calculating our interim provision for federal income taxes, we use an estimate of our annual effective tax rate, which we update each

quarter based on actual financial results and forward-looking estimates. In the first quarter of 2013, we released the substantial majority of the valuation allowance against our deferred tax assets, which fully offset the calculation of tax expense and resulted in the $50.6 billion benefit reported in the first quarter of 2013. See “MD&A—Critical Accounting Policies and Estimates—Deferred Tax

Assets” in our 2013 Form 10-K for a discussion of the factors that led us to release our valuation allowance against our deferred tax assets in 2013.

BUSINESS SEGMENT RESULTS

Results of our three business segments are intended to reflect each segment as if it were a stand-alone business. Under our segment reporting structure, the sum of the results for our three business segments does not equal our condensed consolidated results of operations as we separate the activity related to our consolidated trusts from the results generated by our three segments. In addition, because we apply accounting methods that differ from our condensed consolidated results for segment reporting purposes, we include an eliminations/adjustments category to reconcile our business segment results and the activity related to our consolidated trusts to our condensed consolidated results of operations. We describe the management reporting and allocation process used to generate our segment results in “Note 13, Segment Reporting” in our 2013 Form 10-K.

In this section, we summarize our segment results for the third quarter and first nine months of 2014 and 2013 in the tables below and provide a comparative discussion of these results. This section should be read together with our comparative discussion of our condensed consolidated results of operations in “Consolidated Results of Operations.” See “Note 12, Segment Reporting” for a reconciliation of our segment results to our condensed consolidated results.

Single-Family Business Results

Table 12 displays the financial results of our Single-Family business for the periods indicated. For a discussion of Single-Family credit risk management, including information on serious delinquency rates and loan workouts, see “Risk Management—Credit Risk Management—Single-Family Mortgage Credit Risk Management.” The primary source of revenue for our Single-Family business is guaranty fee income. Other items that impact income or loss primarily include credit-related income (expense), net interest income (loss), TCCA fees and administrative expenses.

Table 12: Single-Family Business Results[1]

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Variance	2014	2013	Variance
	(Dollars in millions)					
Net interest income (loss)[2]	$19	$(152)	$171	$(24)	$318	$(342)
Guaranty fee income[3][4]	2,945	2,719	226	8,708	7,638	1,070
Credit-related income[5]	748	3,642	(2,894)	3,531	10,357	(6,826)
TCCA fees[4]	(351)	(276)	(75)	(1,008)	(695)	(313)
Other expenses[6]	(462)	(437)	(25)	(1,445)	(1,253)	(192)
Income before federal income taxes	2,899	5,496	(2,597)	9,762	16,365	(6,603)
(Provision) benefit for federal income taxes[7]	(837)	(751)	(86)	(2,897)	29,777	(32,674)
Net income attributable to Fannie Mae	$2,062	$4,745	$(2,683)	$6,865	$46,142	$(39,277)
Other key performance data:						
Securitization Activity/New Business						
Single-family Fannie Mae MBS issuances[8]	$105,563	$186,459		$266,631	$615,302	
Credit Guaranty Activity						
Average single-family guaranty book of business[9]	$2,858,362	$2,860,103		$2,871,507	$2,847,297	
Single-family effective guaranty fee rate (in basis points)[4][10]	41.2	38.0		40.4	35.8	
Single-family average charged guaranty fee on new acquisitions (in basis points)[4][11]	63.5	58.7		63.0	56.6	
Single-family serious delinquency rate, at end of period[12]	1.96%	2.55%		1.96%	2.55%	
Market						
Single-family mortgage debt outstanding, at end of period (total U.S. market)[13]	$9,855,419	$9,921,552		$9,855,419	$9,921,552	
30-year mortgage rate, at end of period[14]	4.20%	4.32%		4.20%	4.32%	

____

(1) Certain prior period amounts have been reclassified to conform to our current period presentation.

(2) Includes the cost to reimburse the Capital Markets group for interest income not recognized for loans in our retained mortgage portfolio on nonaccrual status, the cost to reimburse MBS trusts for interest income not recognized for loans in consolidated trusts on nonaccrual status and income from cash payments received on loans that have been placed on nonaccrual status.

(3) Guaranty fee income related to unconsolidated Fannie Mae MBS trusts and other credit enhancement arrangements is included in fee and other income in our condensed consolidated statements of operations and comprehensive income.

(4) Includes the impact of a 10 basis point guaranty fee increase implemented pursuant to the TCCA, the incremental revenue from which must be remitted to Treasury. The resulting revenue is included in guaranty fee income and the expense is recognized as "TCCA fees."

(5) Consists of the benefit for credit losses and foreclosed property (expense) income.

(6) Consists of investment (losses) gains, net, fair value losses, net, fee and other income, administrative expenses and other expenses.

(7) The benefit for the first nine months of 2013 primarily represented the release in the first quarter of 2013 of the substantial majority of our valuation allowance against the portion of our deferred tax assets that we attribute to our Single-Family segment based on the nature of the item.

(8) Consists of unpaid principal balance of Fannie Mae MBS issued and guaranteed by the Single-Family segment during the period.

(9) Our single-family guaranty book of business consists of (a) single-family mortgage loans of Fannie Mae, (b) single-family mortgage loans underlying Fannie Mae MBS, and (c) other credit enhancements that we provide on single-family mortgage assets, such as long-term standby commitments. It excludes non-Fannie Mae mortgage-related securities held in our retained mortgage portfolio for which we do not provide a guaranty.

(10) Calculated based on annualized Single-Family segment guaranty fee income divided by the average single-family guaranty book of business, expressed in basis points.

(11) Calculated based on the average contractual fee rate for our single-family guaranty arrangements entered into during the period plus the recognition of any upfront cash payments ratably over an estimated average life, expressed in basis points.

(12) Calculated based on the number of single-family conventional loans that are 90 days or more past due or in the foreclosure process, divided by the number of loans in our single-family conventional guaranty book of business. We include single-family conventional loans that we own and those that back Fannie Mae MBS in the calculation of the single-family serious delinquency rate.

(13) Information labeled as of September 30, 2014 is as of June 30, 2014 and is based on the Federal Reserve's September 2014 mortgage debt outstanding release, the latest date for which the Federal Reserve has estimated mortgage debt outstanding for single-family residences. Prior period amounts may have been changed to reflect revised historical data from the Federal Reserve.

(14) Based on Freddie Mac's Primary Mortgage Market Survey® rate for the last week in the period, which represents the national average mortgage commitment rate to a qualified borrower exclusive of any fees and points required by the lender.

Pre-tax income decreased in the third quarter of 2014 compared with the third quarter of 2013 primarily due to a decrease in credit-related income, which was partially offset by an increase in guaranty fee income and the recognition of net interest income in the third quarter of 2014 compared with a net interest loss recognized in the third quarter of 2013. Pre-tax income decreased in the first nine months of 2014 compared with the first nine months of 2013 primarily due to a decrease in credit-related income and the recognition of a net interest loss in the first nine months of 2014 compared with net interest income recognized in the first nine months of 2013, partially offset by an increase in guaranty fee income.

Our single-family credit-related income decreased in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013 primarily due to home prices increasing at a slower pace in the third quarter and first nine months of 2014 as compared with the third quarter and first nine months of 2013. In addition, the third quarter and first nine months of 2013 benefited from foreclosed property income primarily due to the recognition of income related to our compensatory fee agreement with Bank of America. Our single-family credit-related income represents the substantial majority of our consolidated credit-related income reflected on our condensed consolidated statements of operations and comprehensive income. See "Consolidated Results of Operations—Credit-Related Income" for more information on the drivers of our credit-related income.

Guaranty fee income and our effective guaranty fee rate increased in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013 as loans with higher guaranty fees have become a larger part of our single-family guaranty book of business due to the cumulative impact of guaranty fee price increases implemented in 2012.

TCCA fees increased in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013, as single-family loans acquired since the implementation of the TCCA-related guaranty fee increase constituted a larger portion of our single-family guaranty book of business in the third quarter and first nine months of 2014.

We recognized net interest income in the third quarter of 2014 compared with a net interest loss in the third quarter of 2013 primarily due to the reduction in the amount of interest income not recognized for nonaccrual mortgage loans as the population of delinquent loans declined. We recognized a net interest loss in the first nine months of 2014 compared with net interest income in the first nine months of 2013. While there was a decline in the amount of interest income not recognized for nonaccrual mortgage loans in the first nine months of 2014 as compared with the first nine months of 2013, during the first quarter of 2013 we recognized a significant amount of interest income related to unamortized cost basis adjustments on the loans repurchased by Bank of America relating to our resolution agreement with Bank of America.

We recognized a provision for federal income taxes in the first nine months of 2014 compared with a benefit for federal income taxes in the first nine months of 2013. The benefit for federal income taxes in the first nine months of

2013 primarily represented the release in the first quarter of 2013 of the substantial majority of the valuation allowance against the portion of our deferred tax assets that we attributed to our Single-Family segment.

Our single-family acquisition volume and single-family Fannie Mae MBS issuances decreased significantly in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013; however, liquidations of loans from our single-family guaranty book of business also declined due to lower refinance activity. Accordingly, the size of our single-family guaranty book of business has remained relatively flat.

Our average charged guaranty fee on newly acquired single-family loans increased in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013 primarily as the result of an increase in loan level price adjustments charged on our acquisitions in the third quarter and first nine months of 2014, as these acquisitions included a higher proportion of loans with higher LTV ratios or lower FICO credit scores than our acquisitions in the third quarter and first nine months of 2013.

Multifamily Business Results

Multifamily business results primarily reflect our multifamily guaranty business. Our multifamily business results also include activity relating to our low-income housing tax credit ("LIHTC") investments and equity investments. Although we are not currently making new LIHTC or equity investments, we continue to make contractually required contributions for our legacy investments. Activity from multifamily products is also reflected in the Capital Markets group results, which include net interest income related to multifamily loans and securities held in our retained mortgage portfolio, gains and losses from the sale of multifamily Fannie Mae MBS, mortgage loans and re-securitizations, and other miscellaneous income.

Table 13 displays the financial results of our Multifamily business for the periods indicated. The primary sources of revenue for our Multifamily business are guaranty fee income and fee and other income. Other items that impact income or loss primarily include credit-related income (expense) and administrative expenses.

Table 13: Multifamily Business Results

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Variance	2014	2013	Variance
	(Dollars in millions)					
Guaranty fee income[(1)]	$332	$311	$21	$960	$902	$58
Fee and other income	32	26	6	87	115	(28)
Gains from partnership investments[(2)]	52	121	(69)	131	284	(153)
Credit-related income[(3)]	88	132	(44)	194	349	(155)
Other expenses[(4)]	(83)	(104)	21	(245)	(257)	12
Income before federal income taxes	421	486	(65)	1,127	1,393	(266)
(Provision) benefit for federal income taxes[(5)]	(37)	(8)	(29)	(37)	7,970	(8,007)
Net income attributable to Fannie Mae	$384	$478	$(94)	$1,090	$9,363	$(8,273)
Other key performance data:						
Securitization Activity/New Business						
Multifamily new business volume[(6)]	$9,090	$5,810		$17,253	$21,791	
Multifamily units financed from new business volume	124,000	103,000		289,000	386,000	
Multifamily Fannie Mae MBS issuances[(7)]	$9,689	$6,373		$20,087	$23,648	
Multifamily Fannie Mae structured securities issuances (issued by Capital Markets group)	$3,074	$1,671		$9,497	$7,879	
Multifamily Fannie Mae MBS outstanding, at end of period[(8)]	$159,707	$143,224		$159,707	$143,224	
Credit Guaranty Activity						
Average multifamily guaranty book of business[(9)]	$198,888	$204,601		$199,358	$205,200	
Multifamily effective guaranty fee rate (in basis points)[(10)]	66.8	60.8		64.2	58.6	
Multifamily credit loss ratio (in basis points)[(11)]	(3.8)	11.5		(2.7)	7.6	
Multifamily serious delinquency rate, at end of period	0.09%	0.18%		0.09%	0.18%	
Percentage of multifamily guaranty book of business with credit enhancement, at end of period	92%	91%		92%	91%	
Fannie Mae percentage of total multifamily mortgage debt outstanding, at end of period[(12)]	19%	20%		19%	20%	
Portfolio Data						
Additional net interest income earned on Fannie Mae multifamily mortgage loans and MBS (included in Capital Markets group's results)[(13)]	$120	$167		$377	$543	
Average Fannie Mae multifamily mortgage loans and Fannie Mae MBS in Capital Markets group's portfolio[(14)]	$46,930	$70,629		$51,578	$78,328	

(1) Guaranty fee income related to unconsolidated Fannie Mae MBS trusts and other credit enhancement arrangements is included in fee and other income in our condensed consolidated statements of operations and comprehensive income.

(2) Gains from partnership investments are included in other expenses in our condensed consolidated statements of operations and comprehensive income. Gains from partnership investments are reported using the equity method of accounting. As a result, net income attributable to noncontrolling interest from partnership investments is not included in income for the Multifamily segment.

(3) Consists of the benefit for credit losses and foreclosed property income (expense).

(4) Consists of net interest loss, investment gains, net, administrative expenses and other income (expenses).

(5) The benefit for the first nine months of 2013 primarily represented the release in the first quarter of 2013 of the substantial majority of our valuation allowance against the portion of our deferred tax assets that we attribute to our Multifamily segment based on the nature of the item.

(6) Reflects unpaid principal balance of multifamily Fannie Mae MBS issued (excluding portfolio securitizations) and multifamily loans purchased during the period.

(7) Reflects unpaid principal balance of multifamily Fannie Mae MBS issued during the period. Includes (a) issuances of new MBS, (b) Fannie Mae portfolio securitization transactions of $597 million and $632 million for the three months ended September 30, 2014 and 2013, respectively, and $2.9 billion and $2.1 billion for the nine months ended September 30, 2014 and 2013, respectively, and (c) conversions of adjustable-rate loans to fixed-rate loans and discount MBS ("DMBS") to MBS of $3 million and $24 million for the three months ended September 30, 2014 and 2013, respectively, and $3 million and $68 million for the nine months ended September 30, 2014 and 2013, respectively.

(8) Includes $18.8 billion and $23.5 billion of Fannie Mae multifamily MBS held in the retained mortgage portfolio, the vast majority of which have been consolidated to loans in our condensed consolidated balance sheets, as of September 30, 2014 and 2013, respectively, and $1.2 billion of Fannie Mae MBS collateralized by bonds issued by state and local housing finance agencies as of September 30, 2014 and 2013.

(9) Our Multifamily guaranty book of business consists of (a) multifamily mortgage loans of Fannie Mae, (b) multifamily mortgage loans underlying Fannie Mae MBS, and (c) other credit enhancements that we provide on multifamily mortgage assets. It excludes non-Fannie Mae mortgage-related securities held in our retained mortgage portfolio for which we do not provide a guaranty.

(10) Calculated based on annualized Multifamily segment guaranty fee income divided by the average multifamily guaranty book of business, expressed in basis points.

(11) Calculated based on annualized Multifamily segment credit losses divided by the average multifamily guaranty book of business, expressed in basis points. Negative credit losses are the result of recoveries on previously charged-off amounts.

(12) Includes mortgage loans and Fannie Mae MBS guaranteed by the Multifamily segment. Information labeled as of September 30, 2014 is as of June 30, 2014 and is based on the Federal Reserve's September 2014 mortgage debt outstanding release, the latest date for which the Federal Reserve has estimated mortgage debt outstanding for multifamily residences. Prior period amounts may have been changed to reflect revised historical data from the Federal Reserve.

(13) Interest expense estimate is based on allocated duration-matched funding costs. Net interest income was reduced by guaranty fees allocated to Multifamily from the Capital Markets group on multifamily loans in our retained mortgage portfolio.

(14) Based on unpaid principal balance.

Pre-tax income decreased in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013 primarily due to decreases in credit-related income and gains on partnership investments, partially offset by an increase in guaranty fee income.

Credit-related income decreased in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013 primarily as a result of smaller improvements in both defaults and property valuations.

Guaranty fee income increased in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013 as loans with higher guaranty fees have become a larger part of our multifamily guaranty book of business, while loans with lower guaranty fees continue to liquidate.

Gains from partnership investments decreased in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013 primarily as a result of lower sales activity.

We recognized a provision for federal income taxes in the first nine months of 2014 compared with a benefit for federal
income taxes in the first nine months of 2013. The benefit for federal income taxes in the first nine months of 2013 primarily represented the release in the first quarter of 2013 of the substantial majority of the valuation allowance against the portion of our deferred tax assets that we attributed to our Multifamily segment.

Capital Markets Group Results

Table 14 displays the financial results of our Capital Markets group for the periods indicated. Following the table we discuss the Capital Markets group's financial results and describe the Capital Markets group's retained mortgage portfolio. For a discussion of the debt issued by the Capital Markets group to fund its investment activities, see "Liquidity and Capital Management." For a discussion of the derivative instruments that the Capital Markets group uses to manage interest rate risk,

see "Risk Management—Market Risk Management, Including Interest Rate Risk Management—Measurement of Interest Rate Risk" in our 2013 Form 10-K and "Note 9, Derivative Instruments" in this report and our 2013 Form 10-K. The primary sources of revenue for our Capital Markets group are net interest income and fee and other income. Other items that impact income or loss primarily include fair value gains and losses, investment gains and losses, other-than-temporary impairments, allocated guaranty fee expense and administrative expenses.

Table 14: Capital Markets Group Results[1]

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Variance	2014	2013	Variance
	(Dollars in millions)					
Net interest income[2]	$1,845	$2,311	$(466)	$5,592	$7,733	$(2,141)
Investment gains, net[3]	1,516	1,590	(74)	4,500	3,837	663
Fair value (losses) gains, net[4]	(335)	371	(706)	(2,770)	2,087	(4,857)
Fee and other income	579	525	54	4,848	1,129	3,719
Other expenses[5]	(410)	(402)	(8)	(1,315)	(1,271)	(44)
Income before federal income taxes	3,195	4,395	(1,200)	10,855	13,515	(2,660)
(Provision) benefit for federal income taxes[6]	(913)	(596)	(317)	(3,189)	9,484	(12,673)
Net income attributable to Fannie Mae	$2,282	$3,799	$(1,517)	$7,666	$22,999	$(15,333)

____

(1) Certain prior period amounts have been reclassified to conform to our current period presentation.

(2) Includes contractual interest income, excluding recoveries, on nonaccrual loans received from the Single-Family segment of $627 million and $895 million for the three months ended September 30, 2014 and 2013, respectively, and $2.0 billion and $3.0 billion for the nine months ended September 30, 2014 and 2013, respectively. The Capital Markets group's net interest income is reported based on the mortgage-related assets held in the segment's retained mortgage portfolio and excludes interest income on mortgage-related assets held by consolidated MBS trusts that are owned by third parties and the interest expense on the corresponding debt of such trusts.

(3) We include the securities that we own regardless of whether the trust has been consolidated in reporting of gains and losses on securitizations and sales of available-for-sale securities.

(4) Includes fair value gains or losses on derivatives and trading securities that we own, regardless of whether the trust has been consolidated.

(5) Includes allocated guaranty fee expense, debt extinguishment (losses) gains, net, administrative expenses, net other-than-temporary impairments and other (expenses) income. Gains or losses related to the extinguishment of debt issued by consolidated trusts are excluded from the Capital Markets group's results because purchases of securities are recognized as such.

(6) The benefit for the nine months of 2013 primarily represented the release in the first quarter of 2013 of the substantial majority of our valuation allowance against the portion of our deferred tax assets that we attribute to our Capital Markets group based on the nature of the item.

Pre-tax income decreased in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013 primarily due to the recognition of fair value losses in the third quarter and first nine months of 2014 compared with fair value gains recognized in the third quarter and first nine months of 2013 and a decrease in net interest income. The decrease in pre-tax income in the first nine months of 2014 compared with the first nine months of 2013 was partially offset by increases in fee and other income and investment gains.

Fair value losses in the third quarter and first nine months of 2014 were primarily due to fair value losses on our risk management derivatives. The derivatives fair value gains and losses that are reported for the Capital Markets group are consistent with the gains and losses reported in our condensed consolidated statements of operations and comprehensive income. We discuss our derivatives fair value gains and losses in "Consolidated Results of

Operations—Fair Value (Losses) Gains, Net."

The decrease in net interest income in the third quarter and first nine months of 2014 compared with the third quarter and first nine months of 2013 was primarily due to a decline in the average balance of our retained mortgage portfolio as we continued to reduce this portfolio pursuant to the requirements of our senior preferred stock purchase agreement with Treasury.

We supplement our issuance of debt securities with derivative instruments to further reduce interest rate risk. The effect of these derivatives, in particular the periodic net interest expense accruals on interest rate swaps, is not reflected in the Capital

Markets group's net interest income but is included in our results as a component of "Fair value (losses) gains, net" and is displayed in "Table 6: Fair Value (Losses) Gains, Net."

Fee and other income increased in the first nine months of 2014 compared with the first nine months of 2013, primarily as a result of $4.8 billion recognized as income in the first nine months of 2014 compared with $561 million in the first nine months of 2013, both resulting from settlement agreements resolving certain lawsuits relating to PLS sold to us. See "Legal Proceedings—FHFA Private-Label Mortgage-Related Securities Litigation" for additional information.

Investment gains increased in the first nine months of 2014 compared with the first nine months of 2013 primarily due to higher gains on the sale of Fannie Mae MBS AFS securities as a result of a decline in interest rates in the first nine months of 2014. During the first nine months of 2013, we had lower gains on the sale of Fannie Mae MBS AFS securities due to an increase in interest rates in the first nine months of 2013.

We recognized a provision for federal income taxes in the first nine months of 2014 compared with a benefit for federal income taxes in the first nine months of 2013. The benefit for federal income taxes in the first nine months of 2013 primarily represented the release in the first quarter of 2013 of the substantial majority of the valuation allowance against the portion of our deferred tax assets that we attributed to our Capital Markets group.

The Capital Markets Group's Mortgage Portfolio

The Capital Markets group's mortgage portfolio, which we also refer to as our retained mortgage portfolio, consists of mortgage loans and mortgage-related securities that we own. Mortgage-related securities held by the Capital Markets group include Fannie Mae MBS and non-Fannie Mae mortgage-related securities. The Fannie Mae MBS that we own are maintained as securities on the Capital Markets group's balance sheets. The portion of assets held by consolidated MBS trusts that back mortgage-related securities owned by third parties are not included in the Capital Markets group's mortgage portfolio.

The amount of mortgage assets that we may own is restricted by our senior preferred stock purchase agreement with Treasury. By December 31 of each year, we are required to reduce our mortgage assets to 85% of the maximum allowable amount that we were permitted to own as of December 31 of the immediately preceding calendar year, until the amount of our mortgage assets reaches $250 billion in 2018. Under the agreement, the maximum allowable amount of mortgage assets we are permitted to own as of December 31, 2014 is $469.6 billion.

FHFA's 2014 conservatorship scorecard required us to submit a portfolio plan to FHFA outlining how we will meet, even under adverse conditions, the reductions in our portfolio required by our senior preferred stock purchase agreement with Treasury. We initially submitted this plan to FHFA in July 2014. In October 2014, FHFA requested that we revise our plan to cap the portfolio each year at 90% of the annual limit under our senior preferred stock purchase agreement with Treasury. FHFA's request noted that we may seek FHFA permission to increase this cap to 95% of the annual limit under our senior preferred stock purchase agreement with Treasury upon written request and with a documented basis for exception, such as changed market conditions. We submitted a revised portfolio plan to FHFA in October 2014 that complies with FHFA's request to cap our portfolio at 90% of the annual limit under our senior preferred stock purchase agreement with Treasury. Accordingly, under our revised portfolio plan, we plan to reduce our mortgage portfolio to no more than $422.7 billion as of December 31, 2014, in compliance with both our senior preferred stock purchase agreement with Treasury and FHFA's request.

As we reduce the size of our retained mortgage portfolio, our revenues generated by our retained mortgage portfolio will decrease. As of September 30, 2014, we owned $438.1 billion in mortgage assets, compared with $490.7 billion as of December 31, 2013. For additional information on the terms of the senior preferred stock purchase agreement with Treasury, see "Business—Conservatorship and Treasury Agreements—Treasury Agreements" in our 2013 Form 10-K.

Table 15 displays our Capital Markets group's mortgage portfolio activity for the periods indicated.

Table 15: Capital Markets Group's Mortgage Portfolio Activity[1]

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2014	2013	2014	2013
	(Dollars in millions)			
Mortgage loans:				
Beginning balance	$298,683	$343,742	$314,664	$371,708
Purchases	42,021	51,882	109,267	191,813

Liquidations and sales[3]	(12,680)	(18,253)	(38,766)	(64,603)
Mortgage loans, ending balance	292,543	328,405	292,543	328,405
Mortgage securities:				
Beginning balance	154,089	221,456	176,037	261,346
Purchases[4]	8,818	8,259	16,864	27,443
Securitizations[2]	35,481	48,966	92,622	170,513
Sales	(45,992)	(78,299)	(119,079)	(229,359)
Liquidations[3]	(6,839)	(12,528)	(20,887)	(42,089)
Mortgage securities, ending balance	145,557	187,854	145,557	187,854
Total Capital Markets group's mortgage portfolio	$438,100	$516,259	$438,100	$516,259

(1) Based on unpaid principal balance.

(2) Includes portfolio securitization transactions that do not qualify for sale treatment under GAAP.

(3) Includes scheduled repayments, prepayments, foreclosures, and lender repurchases.

(4) Includes purchases of Fannie Mae MBS issued by consolidated trusts.

Table 16 displays the composition of the Capital Markets group's mortgage portfolio as of September 30, 2014 and December 31, 2013.

Table 16: Capital Markets Group's Mortgage Portfolio Composition[1]

	As of September 30, 2014	December 31, 2013
	(Dollars in millions)	
Capital Markets group's mortgage loans:		
Single-family loans:		
Government insured or guaranteed	$37,140	$39,399
Conventional:		
Long-term, fixed-rate	209,797	215,945
Intermediate-term, fixed-rate	8,014	8,385
Adjustable-rate	10,664	13,171
Total single-family conventional	228,475	237,501
Total single-family loans	265,615	276,900
Multifamily loans:		
Government insured or guaranteed	248	267
Conventional:		
Long-term, fixed-rate	2,006	2,687
Intermediate-term, fixed-rate	19,213	27,325
Adjustable-rate	5,461	7,485
Total multifamily conventional	26,680	37,497
Total multifamily loans	26,928	37,764
Total Capital Markets group's mortgage loans	292,543	314,664
Capital Markets group's mortgage-related securities:		
Fannie Mae	108,460	129,841
Freddie Mac	6,767	8,124
Ginnie Mae	740	899
Alt-A private-label securities	8,612	11,153
Subprime private-label securities	9,214	12,322
CMBS	3,758	3,983
Mortgage revenue bonds	4,873	6,319
Other mortgage-related securities	3,133	3,396
Total Capital Markets group's mortgage-related securities[2]	145,557	176,037
Total Capital Markets group's mortgage portfolio	$438,100	$490,701

(1) Based on unpaid principal balance.

(2) The fair value of these mortgage-related securities was $151.8 billion as of September 30, 2014 and $179.5 billion as of December 31, 2013.

The Capital Markets group's mortgage portfolio decreased as of September 30, 2014 compared with December 31, 2013, primarily due to sales and liquidations outpacing purchases in the first nine months of 2014. Purchase activity declined in the first nine months of 2014 compared with the first nine months of 2013 primarily due to fewer loan purchases as a result of lower origination volume driven by higher mortgage interest rates in 2014 compared with 2013. We continue to reduce the size of our retained mortgage portfolio to comply with the requirement of our senior preferred stock purchase agreement with Treasury.

The loans we purchased in the first nine months of 2014 included $13.8 billion in delinquent loans we purchased from our single-family MBS trusts. As a result of purchasing delinquent loans from MBS trusts as they become four or more consecutive monthly payments delinquent and decreasing our retained mortgage portfolio to meet the requirements of the senior preferred stock purchase agreement, an increasing portion of the Capital Markets group's mortgage portfolio is comprised of loans restructured in a TDR and nonaccrual loans. Table 17 displays the composition of loans restructured in a TDR that were on accrual status, loans on nonaccrual status and all other mortgage-related assets in our Capital Markets group's mortgage portfolio as of September 30, 2014 and December 31, 2013.

Table 17: Capital Markets Group's Mortgage Portfolio

	As of					
	September 30, 2014			December 31, 2013		
	Unpaid Principal Balance	Percent of total		Unpaid Principal Balance	Percent of total	
	(Dollars in millions)					
TDRs on accrual status	$141,470	32	%	$136,237	28	%
Nonaccrual loans	61,357	14		75,006	15	
All other mortgage-related assets	235,273	54		279,458	57	
Total Capital Markets group's mortgage portfolio	$438,100	100	%	$490,701	100	%

CONSOLIDATED BALANCE SHEET ANALYSIS

This section provides a discussion of our condensed consolidated balance sheets as of the dates indicated and should be read together with our condensed consolidated financial statements, including the accompanying notes.

Table 18 displays a summary of our condensed consolidated balance sheets as of the dates indicated.

Table 18: Summary of Condensed Consolidated Balance Sheets

	As of September 30, 2014	As of December 31, 2013	Variance
	(Dollars in millions)		
Assets			
Cash and cash equivalents and federal funds sold and securities purchased under agreements to resell or similar arrangements	$45,779	$ 58,203	$(12,424)
Restricted cash	28,518	28,995	(477)
Investments in securities[1]	62,943	68,939	(5,996)
Mortgage loans:			
Of Fannie Mae	279,305	300,508	(21,203)
Of consolidated trusts	2,767,829	2,769,578	(1,749)
Allowance for loan losses	(36,931)	(43,846)	6,915
Mortgage loans, net of allowance for loan losses	3,010,203	3,026,240	(16,037)
Deferred tax assets, net	42,757	47,560	(4,803)
Other assets[2]	40,116	40,171	(55)
Total assets	$3,230,316	$ 3,270,108	$(39,792)
Liabilities and equity			
Debt:			
Of Fannie Mae	$474,952	$ 529,434	$(54,482)
Of consolidated trusts	2,726,528	2,705,089	21,439
Other liabilities[3]	22,437	25,994	(3,557)
Total liabilities	3,223,917	3,260,517	(36,600)
Total equity[4]	6,399	9,591	(3,192)
Total liabilities and equity	$3,230,316	$ 3,270,108	$(39,792)

____

(1) Includes $17.8 billion as of September 30, 2014 and $16.3 billion as of December 31, 2013 of non-mortgage-related securities that are included in our other investments portfolio, which we present in "Table 26: Cash and Other Investments Portfolio."

(2) Consists of accrued interest receivable, net; acquired property, net; and other assets.

(3) Consists of accrued interest payable and other liabilities.

(4) Consists of senior preferred stock, preferred stock, common stock, accumulated deficit, accumulated other comprehensive income, treasury stock, and noncontrolling interest.

Cash and Other Investments Portfolio

Our cash and other investments portfolio consists of cash and cash equivalents, federal funds sold and securities purchased under agreements to resell or similar arrangements, and investments in non-mortgage-related securities. See "Liquidity and Capital Management—Liquidity Management—Cash and Other Investments Portfolio" for additional information on our cash and other investments portfolio.

Investments in Mortgage-Related Securities

Our investments in mortgage-related securities are classified in our condensed consolidated balance sheets as either trading or available-for-sale and are measured at fair value. Table 19 displays the fair value of our investments in mortgage-related securities, including trading and available-for-sale securities, as of the dates indicated. We classify PLS as Alt-A, subprime or CMBS if the securities were labeled as such when issued. We have also invested in subprime private-label mortgage-related securities that we have resecuritized to include our guaranty (which we refer to as "wraps").

Table 19: Summary of Mortgage-Related Securities at Fair Value

	As of	
	September 30, 2014	December 31, 2013
	(Dollars in millions)	
Mortgage-related securities:		
Fannie Mae	$11,227	$12,443
Freddie Mac	7,312	8,681
Ginnie Mae	821	995
Alt-A private-label securities	7,304	8,865
Subprime private-label securities	6,702	8,516
CMBS	4,017	4,324
Mortgage revenue bonds	4,959	5,821
Other mortgage-related securities	2,844	2,988
Total	$45,186	$52,633

The decrease in mortgage-related securities at fair value from December 31, 2013 to September 30, 2014 was primarily driven by a decrease in PLS due to the sale of certain PLS as a result of our settlement agreements in the first nine months of 2014, in addition to the sale of other PLS and agency securities during the first nine months of 2014.

Mortgage Loans

The decrease in mortgage loans from December 31, 2013 to September 30, 2014 was primarily due to liquidations outpacing acquisition volumes. For additional information on our mortgage loans, see "Note 3, Mortgage Loans." For additional information on the mortgage loan purchase and sale activities reported by our Capital Markets group, see "Business Segment Results—Capital Markets Group Results."

The decrease in our allowance for loan losses from December 31, 2013 to September 30, 2014 was primarily due to the recognition of a benefit for credit losses in the first nine months of 2014 and a decline in the number of seriously delinquent single-family loans. The number of our seriously delinquent single-family loans declined 19% to approximately 341,000 as of September 30, 2014 from approximately 419,000 as of December 31, 2013. The reduction in the number of delinquent loans was due to home retention solutions, foreclosure alternatives and completed foreclosures. For information on our benefit for credit losses, see "Consolidated Results of Operations—Credit-Related Income—Benefit for Credit Losses."

Debt

Debt of Fannie Mae is the primary means of funding our mortgage investments. The decrease in debt of Fannie Mae from December 31, 2013 to September 30, 2014 was primarily driven by lower funding needs. We provide a summary of the activity of the debt of Fannie Mae and a comparison of the mix between our outstanding short-term and long-term debt in "Liquidity and Capital Management—Liquidity Management—Debt Funding." Also see "Note 8, Short-Term Borrowings and Long-Term Debt" for additional information on our outstanding debt.

Debt of consolidated trusts represents the amount of Fannie Mae MBS issued from consolidated trusts and held by third-party certificateholders. The increase in debt of consolidated trusts from December 31, 2013 to September 30, 2014 was primarily driven by sales of Fannie Mae MBS, which are accounted for as reissuances of debt of consolidated trusts in our condensed consolidated balance sheets, since the MBS certificate ownership is transferred

from us to a third party.

Total Equity

Total equity decreased as of September 30, 2014 compared with December 31, 2013 due to our payment of senior preferred stock dividends to Treasury during the first nine months of 2014, partially offset by comprehensive income recognized during the first nine months of 2014.

SUPPLEMENTAL NON-GAAP INFORMATION—FAIR VALUE BALANCE SHEETS

As part of our disclosure requirements with FHFA, we disclose on a quarterly basis supplemental non-GAAP consolidated fair value balance sheets, which reflect our assets and liabilities at estimated fair value.

Table 20 summarizes changes in our stockholders' equity reported in our GAAP condensed consolidated balance sheets and in the estimated fair value of our net assets in our non-GAAP consolidated fair value balance sheets for the nine months ended September 30, 2014. The estimated fair value of our net assets is calculated based on the difference between the fair value of our assets and the fair value of our liabilities, adjusted for noncontrolling interests. We use various valuation techniques to estimate fair value, some of which incorporate internal assumptions that are subjective and involve a high degree of management judgment. We describe the specific valuation techniques used to determine fair value and disclose the carrying value and fair value of our financial assets and liabilities in "Note 16, Fair Value."

Table 20: Comparative Measures—GAAP Change in Stockholders' Equity and Non-GAAP Change in Fair Value of Net Assets

	For the Nine Months Ended September 30, 2014 (Dollars in millions)
GAAP condensed consolidated balance sheets:	
Fannie Mae stockholders' equity as of December 31, 2013[1]	$9,541
Total comprehensive income	13,409
Senior preferred stock dividend paid	(16,594)
Other	(7)
Fannie Mae stockholders' equity as of September 30, 2014[1]	$6,349
Non-GAAP consolidated fair value balance sheets:	
Estimated fair value of net assets as of December 31, 2013	$(33,368)
Senior preferred stock dividends paid on June 28 and September 30, 2014	(9,404)
Senior preferred stock dividends payable[2]	(3,999)
Change in estimated fair value of net assets excluding the senior preferred stock dividend	30,393
Increase in estimated fair value of net assets, net	16,990
Estimated fair value of net assets as of September 30, 2014	$(16,378)

____

(1) Our net worth, as defined under the senior preferred stock purchase agreement, is equivalent to the "Total equity" amount reported in our condensed consolidated balance sheets, which consists of "Total Fannie Mae stockholders' equity" and "Noncontrolling interest."

(2) Represents the dividend we expect to pay Treasury in the fourth quarter of 2014 on the senior preferred stock, which, for purposes of our non-GAAP fair value balance sheets, we present as a liability. Under the terms of the senior preferred stock, effective January 1, 2013, we are required to pay Treasury each quarter a dividend, when, as and if declared, equal to the excess of our net worth as of the end of the immediately preceding fiscal quarter over an applicable capital reserve amount. The applicable capital reserve amount is $2.4 billion for all quarterly dividend periods in 2014 and will be reduced by $600 million each year until it reaches zero on January 1, 2018. The Director of FHFA directs us to make dividend payments on the senior preferred stock on a quarterly basis.

During the first nine months of 2014, the estimated fair value of our net assets (excluding the senior preferred stock dividend) increased by approximately $30 billion. This increase was primarily due to improvement in credit-related items, as well as income from the interest spread between our mortgage assets and associated debt and derivatives. The improvement in credit-related items was primarily driven by an increase in the fair value of nonperforming loans due to improving property values and continued limited supply.

Cautionary Language Relating to Supplemental Non-GAAP Financial Measures

In reviewing our non-GAAP consolidated fair value balance sheets, there are a number of important factors and limitations to consider. The estimated fair value of our net assets is calculated as of a particular point in time based on our existing assets and liabilities. It does not incorporate other factors that may have a significant impact on our long-term fair value, including revenues generated from future business activities in which we expect to engage, the value from our foreclosure and loss mitigation efforts or the impact that legislation or potential regulatory actions may have on us. As a result, the estimated fair value of our net assets presented in our non-GAAP consolidated fair value balance sheets does not represent an estimate of our net realizable value, liquidation value or our market value as a whole. Amounts we ultimately realize from the disposition of assets or settlement of liabilities may vary materially from the estimated fair values presented in our non-GAAP consolidated fair value balance sheets.

In addition, the fair value of our net assets presented in our fair value balance sheet does not represent an estimate of the value we expect to realize from operating the company, primarily because:

- The estimated fair value of our guaranty obligations on mortgage loans significantly exceeds the projected credit losses we would expect to incur, as fair value takes into account certain assumptions about liquidity and required rates of return that a market participant may demand in assuming a credit obligation, and
- The fair value of our net assets reflects a point in time estimate of the fair value of our existing assets and liabilities, and does not incorporate the value associated with new business that may be added in the future.

The fair value of our net assets is not a measure defined within GAAP and may not be comparable to similarly titled measures reported by other companies.

Supplemental Non-GAAP Consolidated Fair Value Balance Sheets

We display our non-GAAP fair value balance sheets as of the dates indicated in Table 21.

Table 21: Supplemental Non-GAAP Consolidated Fair Value Balance Sheets

____
Explanation and Reconciliation of Non-GAAP Measures to GAAP Measures

(1) Each of the amounts listed as a "fair value adjustment" represents the difference between the carrying value included in our GAAP condensed consolidated balance sheets and our best judgment of the estimated fair value of the listed item.

(2) Fair value of consolidated trust loans is impacted by credit risk, which has no corresponding impact on the consolidated trust debt.

(3) Includes the estimated fair value of our liability to Treasury for TCCA-related guaranty fee payments over the expected life of the loans.

(4) Performing loans had a fair value and an unpaid principal balance of $2.9 trillion as of September 30, 2014 and as of December 31, 2013. Nonperforming loans, which for the purposes of our non-GAAP fair value balance sheets consists of loans that are delinquent by one or more payments, had a fair value of $99.4 billion and an unpaid principal balance of $127.1 billion as of September 30, 2014, compared with a fair value of $103.8 billion and an unpaid principal balance of $149.3 billion as of December 31, 2013. See "Note 16, Fair Value" for additional information on valuation techniques for performing and nonperforming loans.

(5) "Other assets" include (a) Accrued interest receivable, net and (b) Acquired property, net as reported in our GAAP consolidated balance sheets. "Other assets" in our GAAP condensed consolidated balance sheets include the following: (a) Advances to lenders; (b) Derivative assets at fair value; (c) Guaranty assets and buy-ups, net; and (d) Credit enhancements. The carrying value of these items totaled $6.9 billion and $6.6 billion as of September 30, 2014 and December 31, 2013, respectively.

(6) We estimated the fair value of these financial instruments in accordance with the fair value accounting guidance as described in "Note 16, Fair Value."

(7) The amount included in "estimated fair value" of deferred tax assets, net represents the GAAP carrying value and does not reflect fair value.

(8) "Other liabilities" include Accrued interest payable as reported in our GAAP consolidated balance sheets. "Other liabilities" in our GAAP condensed consolidated balance sheets include the following: (a) Derivative liabilities at fair value and (b) Guaranty obligations. The carrying value of these items totaled $847 million and $2.0 billion as of September 30, 2014 and December 31, 2013, respectively.

(9) Represents the dividend we expect to pay to Treasury in the subsequent quarter on the senior preferred stock, which, for purposes of our non-GAAP fair value balance sheets, we present as a liability.

(10) The amount included in "estimated fair value" of the senior preferred stock is the liquidation preference, which is the same as the GAAP carrying value and does not reflect fair value.

LIQUIDITY AND CAPITAL MANAGEMENT

Liquidity Management

Our business activities require that we maintain adequate liquidity to fund our operations. Liquidity risk is the risk that we will not be able to meet our funding obligations in a timely manner. Our liquidity risk management framework is designed to address our liquidity risk. Liquidity risk management involves forecasting funding requirements, maintaining sufficient capacity to meet our needs based on our ongoing assessment of financial market liquidity and adhering to our regulatory requirements.

Our treasury function is responsible for implementing our liquidity and contingency planning strategies. We hold a portfolio of highly liquid investments and maintain access to alternative sources of liquidity which are designed to provide near term availability of cash in the event that our access to the debt markets becomes limited. While our liquidity contingency planning attempts to address stressed market conditions, we believe that our liquidity contingency plan may be difficult or impossible to execute for a company of our size and in our circumstances.

Our liquidity position could be adversely affected by many factors, both internal and external to our business, including: actions taken by our conservator, the Federal Reserve, U.S. Treasury or other government agencies; legislation relating to us or our business; a U.S. government payment default on its debt obligations; a downgrade in the credit ratings of our senior unsecured debt or the U.S. government's debt from the major ratings organizations; a systemic event leading to the withdrawal of liquidity from the market; an extreme market-wide widening of credit

spreads; public statements by key policy makers; a significant decline in our net worth; potential investor concerns about the adequacy of funding available to us under the senior preferred stock purchase agreement; loss of demand for our debt, or certain types of our debt, from a major group of investors; a significant credit event involving one of our major institutional counterparties; a sudden catastrophic operational failure in the financial sector; or elimination of our GSE status.

This section supplements and updates information regarding liquidity risk management contained in our 2013 Form 10-K. See "MD&A—Liquidity and Capital Management—Liquidity Management" and "Risk Factors" in our 2013 Form 10-K for additional information, including discussions of our primary sources and uses of funds, our liquidity risk management

practices and liquidity contingency planning, factors that influence our debt funding activity, factors that may impact our access to or the cost of our debt funding, and factors that could adversely affect our liquidity.

Debt Funding

We fund our business primarily through the issuance of short-term and long-term debt securities in the domestic and international capital markets. Because debt issuance is our primary funding source, we are subject to “roll over,” or refinancing, risk on our outstanding debt.

Our debt funding needs may vary from quarter to quarter depending on market conditions and are influenced by anticipated liquidity needs, the size of our retained mortgage portfolio and our dividend payment obligations to Treasury. Under the senior preferred stock purchase agreement, we are required to reduce our retained mortgage portfolio to $469.6 billion by December 31, 2014 and, by December 31 of each year thereafter, to 85% of the maximum allowable amount that we were permitted to own under the senior preferred stock purchase agreement as of December 31 of the immediately preceding calendar year, until the amount of our mortgage assets reaches $250 billion. In October 2014, FHFA requested that we further cap our portfolio each year at 90% of the annual limit under our senior preferred stock purchase agreement with Treasury. See “Business Segment Results—Capital Markets Group Results—The Capital Markets Group’s Mortgage Portfolio” for more information about FHFA’s request.

Fannie Mae Debt Funding Activity

Table 22 displays the activity in debt of Fannie Mae for the periods indicated. This activity excludes the debt of consolidated trusts and intraday loans. The reported amounts of debt issued and paid off during the period represent the face amount of the debt at issuance and redemption, respectively. Activity for short-term debt of Fannie Mae relates to borrowings with an original contractual maturity of one year or less while activity for long-term debt of Fannie Mae relates to borrowings with an original contractual maturity of greater than one year.

Table 22: Activity in Debt of Fannie Mae

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2014	2013	2014	2013
	(Dollars in millions)			
Issued during the period:				
Short-term:				
Amount	$66,584	$50,759	$161,296	$182,624
Weighted-average interest rate	0.10 %	0.07 %	0.08 %	0.11 %
Long-term:				
Amount	$18,821	$24,164	$31,981	$125,461
Weighted-average interest rate	2.00 %	1.18 %	1.90 %	1.05 %
Total issued:				
Amount	$85,405	$74,923	$193,277	$308,085
Weighted-average interest rate	0.52 %	0.43 %	0.38 %	0.49 %
Paid off during the period:[1]				
Short-term:				
Amount	$60,098	$75,755	$136,196	$210,015
Weighted-average interest rate	0.09 %	0.11 %	0.09 %	0.13 %
Long-term:				
Amount	$27,793	$37,551	$112,192	$149,511
Weighted-average interest rate	1.85 %	1.52 %	1.80 %	1.82 %
Total paid off:				
Amount	$87,891	$113,306	$248,388	$359,526
Weighted-average interest rate	0.65 %	0.58 %	0.86 %	0.83 %

(1) Consists of all payments on debt, including regularly scheduled principal payments, payments at maturity, payments resulting from calls and payments for any other repurchases. Repurchases of debt and early retirements of zero-coupon debt are reported at original face value, which does not equal the amount of actual cash payment.

Debt issuances decreased during the first nine months of 2014 compared with the first nine months of 2013 primarily due to lower funding needs as our retained mortgage portfolio decreased. Redemptions of callable debt decreased during the first nine months of 2014 compared with the first nine months of 2013 due to higher interest rates.

Outstanding Debt

Total outstanding debt of Fannie Mae includes short-term and long-term debt, excluding debt of consolidated trusts. Short-term debt of Fannie Mae consists of borrowings with an original contractual maturity of one year or less and, therefore, does not include the current portion of long-term debt. Long-term debt of Fannie Mae consists of borrowings with an original contractual maturity of greater than one year.

Our outstanding short-term debt, as a percentage of our total outstanding debt, was 21% as of September 30, 2014 compared with 14% as of December 31, 2013. The weighted-average interest rate on our long-term debt increased to 2.22% as of September 30, 2014 from 2.14% as of December 31, 2013.

Pursuant to the terms of the senior preferred stock purchase agreement, we are prohibited from issuing debt without the prior consent of Treasury if it would result in our aggregate indebtedness exceeding our outstanding debt limit, which is 120% of the amount of mortgage assets we were allowed to own on December 31 of the immediately preceding calendar year. Our debt limit under the senior preferred stock purchase agreement was reduced to $663.0 billion in 2014. As of September 30, 2014, our aggregate indebtedness totaled $479.0 billion, which was $184.0 billion below our debt limit. The calculation of our indebtedness for purposes of complying with our debt limit reflects the unpaid principal balance and excludes debt basis adjustments and debt of consolidated trusts. Because of our debt limit, we may be restricted in the amount of debt we issue to fund our operations.

Table 23 displays information as of the dates indicated on our outstanding short-term and long-term debt based on its original contractual terms.

Table 23: Outstanding Short-Term Borrowings and Long-Term Debt[1]

---

(1) Outstanding debt amounts and weighted-average interest rates reported in this table include the effects of discounts, premiums and other cost basis adjustments. Reported amounts include fair value gains and losses associated with debt that we elected to carry at fair value. Reported amounts for total debt of Fannie Mae include unamortized discounts and premiums, other cost basis adjustments and fair value adjustments of $4.2 billion and $4.9 billion as of September 30, 2014 and December 31, 2013, respectively. The unpaid principal balance of outstanding debt of Fannie Mae, which excludes unamortized discounts and premiums, other cost basis adjustments, fair value adjustments and debt of consolidated trusts, totaled $479.1 billion and $534.3 billion as of September 30, 2014 and December 31, 2013, respectively.

(2) Includes long-term debt with an original contractual maturity of greater than 1 year and up to 10 years, excluding zero-coupon debt.

(3) Includes a portion of structured debt instruments that is reported at fair value.

(4) Includes credit risk sharing securities issued under our Connecticut Avenue Securities series, which transfers some of the credit risk on our mortgage loans to the investors in these securities.

(5) Represents remaining liability resulting from the transfer of financial assets from our condensed consolidated balance sheets that did not qualify as a sale.

(6) Consists of the unpaid principal balance of long-term callable debt of Fannie Mae that can be paid off in whole or in part at our option or the option of the investor at any time on or after a specified date.

Maturity Profile of Outstanding Debt of Fannie Mae

Table 24 displays the maturity profile, as of September 30, 2014, of our outstanding debt maturing within one year, including the current portion of our long-term debt and amounts we have announced for early redemption. Our outstanding debt maturing within one year, as a percentage of our total outstanding debt, excluding debt of consolidated trusts, was 35% as of September 30, 2014 and 31% as of December 31, 2013. The weighted-average maturity of our outstanding debt that is maturing within one year was 134 days as of September 30, 2014, compared with 151 days as of December 31, 2013.

Table 24: Maturity Profile of Outstanding Debt of Fannie Mae Maturing Within One Year[1]

____

(1) Includes unamortized discounts and premiums and other cost basis adjustments of $60 million as of September 30, 2014. Excludes debt of consolidated trusts maturing within one year of $4.2 billion as of September 30, 2014.

Table 25 displays the maturity profile, as of September 30, 2014, of the portion of our long-term debt that matures in more than one year, on a quarterly basis for one year and on an annual basis thereafter, excluding amounts we have announced for early redemption within one year. The weighted-average maturity of our outstanding debt maturing in more than one year was approximately 60 months as of September 30, 2014 and approximately 59 months as of December 31, 2013.

Table 25: Maturity Profile of Outstanding Debt of Fannie Mae Maturing in More Than One Year[1]

---

(1) Includes unamortized discounts and premiums, other cost basis adjustments and fair value adjustments of $4.1 billion as of September 30, 2014. Excludes debt of consolidated trusts of $2.7 trillion as of September 30, 2014.

We intend to repay our short-term and long-term debt obligations as they become due primarily through proceeds from the issuance of additional debt securities. We also may use proceeds from our mortgage assets to pay our debt obligations.

Cash and Other Investments Portfolio

Our cash and other investments portfolio decreased from December 31, 2013 to September 30, 2014. This decrease was primarily driven by lower liquidity needs as our retained mortgage portfolio decreased. The balance of our cash and other investments portfolio fluctuates based on changes in our cash flows, overall liquidity in the fixed income markets and our liquidity risk management policies and practices. See “Risk Management—Credit Risk Management—Institutional Counterparty Credit Risk Management—Issuers of Investments Held in our Cash and Other Investments Portfolio” for additional information on the risks associated with the assets in our cash and other investments portfolio.

Table 26 displays information on the composition of our cash and other investments portfolio as of the dates indicated.

Table 26: Cash and Other Investments Portfolio

	As of	
	September 30, 2014	December 31, 2013
	(Dollars in millions)	
Cash and cash equivalents	$16,329	$19,228
Federal funds sold and securities purchased under agreements to resell or similar arrangements	29,450	38,975
U.S. Treasury securities[1]	17,757	16,306
Total cash and other investments	$63,536	$74,509

---

(1) Excludes U.S. Treasury securities that had a maturity at the date of acquisition of three months or less and would therefore be included in cash and cash equivalents.

Credit Ratings

Our credit ratings from the major credit ratings organizations, as well as the credit ratings of the U.S. government, are primary factors that could affect our ability to access the capital markets and our cost of funds. In addition, our credit ratings are important when we seek to engage in certain long-term transactions, such as derivative transactions.

Standard & Poor's Ratings Services ("S&P"), Moody's Investors Service ("Moody's") and Fitch Ratings Ltd. ("Fitch") have all indicated that, if they were to lower the sovereign credit ratings on the U.S., they would likely lower their ratings on the debt of Fannie Mae and certain other government-related entities. We cannot predict whether one or more of these ratings agencies will lower our debt ratings in the future. See "Risk Factors" in our 2013 Form 10-K for a discussion of the risks to our business relating to a decrease in our credit ratings, which could include an increase in our borrowing costs, limits on our ability to issue debt, and additional collateral requirements under our derivatives contracts.

Table 27 displays the credit ratings issued by the three major credit rating agencies as of October 30, 2014.

Table 27: Fannie Mae Credit Ratings

	As of October 30, 2014		
	S&P	Moody's	Fitch
Long-term senior debt	AA+	Aaa	AAA
Short-term senior debt	A-1+	P-1	F1+
Subordinated debt	AA-	Aa2	AA-
Preferred stock	D	Ca	C/RR6
Outlook	Stable	Stable	Stable
	(for Long-Term Senior Debt and Subordinated Debt)	(for Long-Term Senior Debt and Preferred Stock)	(for AAA rated Long-Term Issuer Default Rating)

In March 2014, Fitch removed the Rating Watch Negative that was previously placed on our long-term senior debt, short-term senior debt, and subordinated debt ratings, following a similar action on the debt ratings of the U.S. government. Fitch also affirmed our 'AAA' Long-term Issuer Default Ratings (IDRs) and the rating outlook is Stable.

Cash Flows

Nine Months Ended September 30, 2014. Cash and cash equivalents decreased by $2.9 billion from $19.2 billion as of December 31, 2013 to $16.3 billion as of September 30, 2014. The decrease in the balance was primarily driven by cash outflows from (1) the redemption of funding debt, which outpaced issuances, due to lower funding needs, (2) the payment of dividends to Treasury under our senior preferred stock purchase agreement and (3) the acquisition of delinquent loans out of MBS trusts.

Partially offsetting these cash outflows were cash inflows from (1) the sale of Fannie Mae MBS, (2) proceeds from repayments of loans of Fannie Mae, (3) the sale of our REO inventory, (4) proceeds from the sale and liquidation of mortgage-related securities and (5) proceeds from resolution and settlement agreements related to PLS matters.

Nine Months Ended September 30, 2013. Cash and cash equivalents increased by $9.7 billion from $21.1 billion as of December 31, 2012 to $30.8 billion as of September 30, 2013. This increase in the balance was primarily driven by cash provided by (1) the sale of Fannie Mae MBS, (2) proceeds from repayments of loans of Fannie Mae, (3) proceeds from the sale and liquidation of mortgage-related securities, (4) the sale of our REO inventory and (5) proceeds from resolution and settlement agreements related to representation and warranty, compensatory fee, and PLS matters.

Partially offsetting these cash inflows were cash outflows from (1) the payment of dividends to Treasury under our senior preferred stock purchase agreement, (2) payments to redeem debt, which outpaced issuances due to lower funding needs as we reduced our retained mortgage portfolio and (3) the acquisition of delinquent loans out of MBS trusts.

Capital Management

Regulatory Capital

FHFA has announced that, during the conservatorship, our existing statutory and FHFA-directed regulatory capital requirements will not be binding and that FHFA will not issue quarterly capital classifications. We submit capital reports to FHFA and FHFA monitors our capital levels. The deficit of our core capital over statutory minimum capital

was $139.7 billion as of September 30, 2014 and $137.3 billion as of December 31, 2013.

Under the terms of the senior preferred stock, starting January 1, 2013, we are required to pay Treasury each quarter a dividend, when, as and if declared, equal to the excess of our net worth as of the end of the preceding quarter over an applicable capital reserve amount. Therefore, we do not expect to eliminate our deficit of core capital over statutory minimum capital. We expect to pay Treasury a dividend of $4.0 billion by December 31, 2014.

Senior Preferred Stock Purchase Agreement

As a result of the covenants under the senior preferred stock purchase agreement, Treasury's ownership of the warrant to purchase up to 79.9% of the total shares of our common stock outstanding and the significant uncertainty regarding our future, we effectively no longer have access to equity funding except through draws under the senior preferred stock purchase agreement.

Under the senior preferred stock purchase agreement, Treasury made a commitment to provide funding, under certain conditions, to eliminate deficiencies in our net worth. We have received a total of $116.1 billion from Treasury pursuant to the senior preferred stock purchase agreement as of September 30, 2014. The aggregate liquidation preference of the senior preferred stock, including the initial aggregate liquidation preference of $1.0 billion, remains at $117.1 billion.

While we had a positive net worth as of September 30, 2014 and have not received funds from Treasury under the agreement since the first quarter of 2012, we will be required to obtain additional funding from Treasury pursuant to the senior preferred stock purchase agreement if we have a net worth deficit in future periods. As of the date of this filing, the amount of remaining available funding under the senior preferred stock purchase agreement is $117.6 billion. For additional information, see "Business—Conservatorship and Treasury Agreements—Treasury Agreements—Senior Preferred Stock Purchase Agreement and Related Issuance of Senior Preferred Stock and Common Stock Warrant—Senior Preferred Stock Purchase Agreement" in our 2013 Form 10-K.

Our third quarter 2014 dividend of $3.7 billion was declared by FHFA and subsequently paid by us on September 30, 2014. For each dividend period from January 1, 2013 through and including December 31, 2017, when, as and if declared, the dividend amount will be the amount, if any, by which our net worth as of the end of the immediately preceding fiscal quarter exceeds an applicable capital reserve amount. The capital reserve amount is $2.4 billion for dividend periods in 2014 and will be reduced by $600 million each year until it reaches zero on January 1, 2018. For each dividend period beginning in 2018, the dividend amount will be the entire amount of our net worth, if any, as of the end of the immediately preceding fiscal quarter. Based on the terms of the senior preferred stock, we expect to pay Treasury a dividend for the fourth quarter of 2014 of $4.0 billion by December 31, 2014. The Director of FHFA directs us to make dividend payments on the senior preferred stock on a quarterly basis.

See "Risk Factors" in our 2013 Form 10-K for a discussion of the risks relating to our dividend obligations to Treasury on the senior preferred stock. See "Business—Conservatorship and Treasury Agreements—Treasury Agreements" in our 2013 Form 10-K for more information on the terms of the senior preferred stock and our senior preferred stock purchase agreement with Treasury.

OFF-BALANCE SHEET ARRANGEMENTS

Our maximum potential exposure to credit losses relating to our outstanding and unconsolidated Fannie Mae MBS and other financial guarantees is primarily represented by the unpaid principal balance of the mortgage loans underlying outstanding and unconsolidated Fannie Mae MBS and other financial guarantees of $36.1 billion as of September 30, 2014 and $44.3 billion as of December 31, 2013.

For a description of our off-balance sheet arrangements, see "MD&A—Off-Balance Sheet Arrangements" in our 2013 Form 10-K.

RISK MANAGEMENT

Our business activities expose us to the following three major categories of financial risk: credit risk, market risk (including interest rate and liquidity risk) and operational risk. We seek to actively monitor and manage these risks by using an established risk management framework. In addition to our exposure to credit, market and operational risks, there is significant uncertainty regarding the future of our company, including how long we will continue to be in existence, which we discuss in more detail in "Legislative and Regulatory Developments—Housing Finance Reform and the Role of the GSEs" and "Risk Factors" in this report and in our Second Quarter 2014 Form 10-Q, in "MD&A—Legislative Regulatory Developments—Housing Finance Reform" in our First Quarter 2014 Form 10-Q and in "Business—Housing Finance Reform" in our 2013 Form 10-K. This uncertainty, along with limitations on our employee compensation arising from our conservatorship, could affect our ability to retain and hire qualified employees.

We are also subject to a number of other risks that could adversely impact our business, financial condition, earnings and cash flow, including human capital, model, legal, regulatory and compliance, reputational, strategic and execution risks. These risks may arise due to a failure to comply with laws, regulations or ethical standards and codes of conduct applicable to our business activities and functions.

In this section we provide an update on our management of our major risk categories. For a more complete discussion of the primary risks we face and how we manage credit risk, market risk and operational risk, see "MD&A—Risk Management" in our 2013 Form 10-K and "Risk Factors" in this report and our 2013 Form 10-K.

Credit Risk Management

We are generally subject to two types of credit risk: mortgage credit risk and institutional counterparty credit risk. Mortgage credit risk is the risk that a borrower will fail to make required mortgage payments. Institutional counterparty credit risk is the risk that our institutional counterparties may fail to fulfill their contractual obligations to us.

Mortgage Credit Risk Management

We are exposed to credit risk on our mortgage credit book of business because we either hold mortgage assets, have issued a guaranty in connection with the creation of Fannie Mae MBS backed by mortgage assets or provided other credit enhancements on mortgage assets. While our mortgage credit book of business includes all of our mortgage-related assets, both on- and off-balance sheet, our guaranty book of business excludes non-Fannie Mae mortgage-related securities held in our retained mortgage portfolio for which we do not provide a guaranty. We provide information on the performance of non-Fannie Mae mortgage-related securities held in our retained mortgage portfolio, including the impairment that we have recognized on these securities, in "Note 5, Investments in Securities."

Mortgage Credit Book of Business

Table 28 displays the composition of our mortgage credit book of business as of the dates indicated. Our single-family mortgage credit book of business accounted for 93% of our mortgage credit book of business as of September 30, 2014 and December 31, 2013.

Table 28: Composition of Mortgage Credit Book of Business[1]

	As of					
	September 30, 2014			December 31, 2013

____

(1) Based on unpaid principal balance.

(2) Consists of mortgage loans and Fannie Mae MBS recognized in our condensed consolidated balance sheets. The principal balance of resecuritized Fannie Mae MBS is included only once in the reported amount.

(3) Reflects unpaid principal balance of unconsolidated Fannie Mae MBS, held by third-party investors. The principal balance of resecuritized Fannie Mae MBS is included only once in the reported amount.

(4) Consists of single-family and multifamily credit enhancements that we have provided and that are not otherwise reflected in the table.

(5) Consists of mortgage-related securities issued by Freddie Mac and Ginnie Mae.

(6) Consists primarily of mortgage revenue bonds, Alt-A and subprime private-label securities and CMBS.

(7) Refers to mortgage loans and mortgage-related securities that are not guaranteed or insured, in whole or in part, by the U.S. government or one of its agencies.

(8) Refers to mortgage loans and mortgage-related securities guaranteed or insured, in whole or in part, by the U.S. government or one of its agencies.

In the following sections, we discuss the mortgage credit risk of the single-family and multifamily loans in our guaranty book of business. The credit statistics reported below, unless otherwise noted, pertain generally to the portion of our guaranty book of business for which we have access to detailed loan-level information, which constituted approximately 99% of each of our single-family conventional guaranty book of business and our multifamily guaranty book of business, excluding defeased loans, as of September 30, 2014 and December 31, 2013. We typically obtain this data from the sellers or servicers of the mortgage loans in our guaranty book of business and receive representations and warranties from them as to the accuracy of the information. While we perform various quality assurance checks by sampling loans to assess compliance with our underwriting and eligibility criteria, we do not independently verify all reported information and we rely on lender representations regarding the accuracy of the characteristics of loans in our guaranty book of business. See "Risk Factors" in our 2013 Form 10-K for a discussion of the risk that we could experience mortgage fraud as a result of this reliance on lender representations.

Single-Family Mortgage Credit Risk Management

Our strategy in managing single-family mortgage credit risk consists of four primary components: (1) our acquisition and servicing policies along with our underwriting and servicing standards, including the use of credit enhancements; (2) portfolio diversification and monitoring; (3) management of problem loans; and (4) REO management. These

approaches may increase our expenses and may not be effective in reducing our credit-related expense or credit losses. We provide information on our credit-related income (expense) and credit losses in “Consolidated Results of Operations—Credit-Related Income.” For information on how we evaluate and factors that affect our single-family mortgage credit risk, see “MD&A—Risk Management—Credit Risk Management—Single-Family Mortgage Credit Risk Management” in our 2013 Form 10-K.

The single-family credit statistics we focus on and report in the sections below generally relate to our single-family conventional guaranty book of business, which represents the substantial majority of our total single-family guaranty book of business.

Single-Family Acquisition and Servicing Policies and Underwriting and Servicing Standards

Our Single-Family business, with the oversight of our Enterprise Risk Management division, is responsible for pricing and managing credit risk relating to the portion of our single-family mortgage credit book of business consisting of single-family mortgage loans and Fannie Mae MBS backed by single-family mortgage loans (whether held in our portfolio or held by third parties). Desktop Underwriter®, our proprietary automated underwriting system which measures credit risk by assessing the primary risk factors of a mortgage, is used to evaluate the majority of the loans we purchase or securitize. For information on our single-family acquisition and servicing policies and on our underwriting and servicing standards, see "MD&A—Risk Management—Credit Risk Management—Single-Family Mortgage Credit Risk Management—Single-Family Acquisition and Servicing Policies and Underwriting and Servicing Standards" in our 2013 Form 10-K.

Table 29 below displays information regarding the credit characteristics of the loans in our single-family conventional guaranty book of business as of September 30, 2014 by acquisition period, which illustrates the improvement in the credit risk profile of loans we acquired beginning in 2009 compared with loans we acquired in 2005 through 2008. We initiated underwriting and eligibility changes that became effective for deliveries in late 2008 and 2009 that focused on strengthening our underwriting and eligibility standards to promote sustainable homeownership.

Table 29: Selected Credit Characteristics of Single-Family Conventional Loans Held, by Acquisition Period

____

* Represents less than 0.5%

(1) Calculated based on the aggregate unpaid principal balance of single-family loans for each category divided by the aggregate unpaid principal balance of loans in our single-family conventional guaranty book of business as of September 30, 2014.

(2) The aggregate estimated mark-to-market LTV ratio is based on the unpaid principal balance of the loans as of the end of the period divided by the estimated current value of the properties, which we calculate using an internal valuation model that estimates periodic changes in home value. Excludes loans for which this information is not readily available.

(3) The serious delinquency rates for loans acquired in more recent years will be higher after the loans have aged, but we do not expect them to approach the levels of the September 30, 2014 serious delinquency rates of loans in our legacy book of business. The serious delinquency rate as of September 30, 2014 for loans we acquired in 2009, the oldest vintage in our new book of business, was 1.04%.

(4) HARP loans have LTV ratios at origination in excess of 80%. In the fourth quarter of 2012, we revised our presentation of the data to reflect all loans under our Refi Plus program with LTV ratios at origination in excess of 80% as HARP loans. Previously we did not reflect loans that were backed by second homes or investor properties as HARP loans.

(5) Other Refi Plus includes all other Refi Plus loans that are not HARP loans.

(6) Includes other refinancings and home purchase mortgages.

(7) Refers to single-family mortgage loans we have acquired since the beginning of 2009.

As part of our credit risk management process, we review discretionary and random samples of performing loans soon after acquisition in order to identify loans that may not have met our underwriting or eligibility requirements. We statistically derive an eligibility defect rate from our random reviews, which represents the proportion of loans in the sample population with underwriting defects that would make them potentially ineligible for delivery to us. The eligibility defect rate does not necessarily indicate how well the loans will ultimately perform. Instead, we use it to estimate the percentage of loans we acquired that potentially had a significant error in the underwriting process.

As of September 30, 2014, the eligibility defect rate for our single-family non-Refi Plus loan acquisitions during the first nine months of 2013 was 1.58%. Because of enhancements to the sampling methodology of our random reviews that we implemented in 2013, the eligibility defect rate for our 2013 loan acquisitions is not directly comparable to the "significant findings rate" we reported on our acquisitions in prior periods. We continue to work with lenders to reduce the number of defects identified. As of September 30, 2014, we have issued repurchase requests on approximately

0.32% of the $612.9 billion of unpaid principal balance of single-family loans delivered to us in the first nine months of 2013, for which reviews have been substantially completed.

In May 2014, at FHFA's direction, we and Freddie Mac announced changes to our representation and warranty framework effective for conventional loan settlements on or after July 1, 2014. The primary change to the framework includes relaxing the 36-month timely payment history requirement for relief from certain selling representations and warranties to permit two instances of 30-day delinquency. These loans may also qualify for relief from certain selling representations and warranties after a satisfactory conclusion of a quality control review. We continue to work with FHFA to identify opportunities to enhance our framework, providing the mortgage finance industry with more certainty and transparency regarding selling representation and warranty obligations. For example, in the fourth quarter of 2014, we expect to make revisions to certain

life-of-loan exclusions currently included in our representation and warranty framework. For a description of the changes in our quality control process and our representation and warranty framework, see “MD&A—Risk Management—Credit Risk Management—Single-Family Mortgage Credit Risk Management—Single-Family Acquisition and Servicing Policies and Underwriting and Servicing Standards” in our 2013 Form 10-K.

FHFA’s 2014 conservatorship scorecard includes an objective to transact credit risk transfers on single-family mortgages with at least $90 billion of unpaid principal balance, adjusted for the amount of credit risk transferred. Our primary method of achieving this objective has been through the issuance of our Connecticut Avenue Securities (“CAS”), which transfers some of the credit risk associated with losses on the underlying mortgage loans to investors in these securities, in exchange for sharing a portion of the guaranty fee payments. During the first nine months of 2014, we issued $4.4 billion in CAS securities, transferring some of the credit risk on single-family mortgages with an unpaid principal balance of $168.6 billion. Some 2014 transactions include loans with LTV ratios of up to 97% in the reference pool. In addition to our CAS offerings, we are also entering into several alternative credit risk transfer transactions related to our 2014 conservatorship scorecard.

Single-Family Portfolio Diversification and Monitoring

Diversification within our single-family mortgage credit book of business by product type, loan characteristics and geography is an important factor that influences credit quality and performance and may reduce our credit risk. We monitor various loan attributes, in conjunction with housing market and economic conditions, to determine if our pricing, eligibility and underwriting criteria accurately reflect the risk associated with loans we acquire or guarantee. For additional information on key loan attributes, see “MD&A—Risk Management—Credit Risk Management—Single-Family Mortgage Credit Risk Management—Single-Family Portfolio Diversification and Monitoring” in our 2013 Form 10-K.

Table 30 displays our single-family conventional business volumes and our single-family conventional guaranty book of business for the periods indicated, based on certain key risk characteristics that we use to evaluate the risk profile and credit quality of our single-family loans.
