PART I – Financial Information

Item 1. Financial Statements

The following condensed consolidated balance sheet as of December 31, 2013, which has been derived from audited financial statements, and the unaudited interim condensed consolidated financial statements, consisting of the condensed consolidated balance sheet as of June 30, 2014, and the condensed consolidated statements of operations and statements of comprehensive income (loss) for the three and six months ended June 30, 2014 and 2013, and the condensed consolidated statements of cash flows for the six months ended June 30, 2014 and 2013, have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission ("SEC"). Certain information and disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to those rules and regulations, although the Company believes that the disclosures made are adequate to make the information not misleading.

The following condensed consolidated balance sheet as of December 31, 2013, which has been derived from audited financial statements, does not include all of the information and footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013. It is suggested that these condensed financial statements be read in conjunction with the financial statements and the notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ materially from those estimates.

In the opinion of management, these unaudited statements contain all adjustments (consisting of normal recurring adjustments, except as otherwise indicated) necessary for a fair presentation for the periods presented as required by Regulation S-X, Rule 10-01.

In addition, operating results for the three and six months ended June 30, 2014 and 2013 are not necessarily indicative of the results that may be expected for any subsequent period or for the year ending December 31, 2014.

MAXWELL TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Unless the context otherwise requires, all references to "Maxwell," the "Company," "we," "us," and "our," refer to Maxwell Technologies, Inc. and its subsidiaries; all references to "Maxwell SA" refer to the Company's Swiss subsidiary, Maxwell Technologies, SA.

Note 1 – Description of Business and Basis of Presentation

Description of Business

Maxwell Technologies, Inc. is a Delaware corporation originally incorporated in 1965 under the name Maxwell Laboratories, Inc. In 1983, the Company completed an initial public offering, and in 1996, changed its name to Maxwell Technologies, Inc. The Company is headquartered in San Diego, California, and has three manufacturing facilities located in San Diego, California; Rossens, Switzerland; and Peoria, Arizona. In addition, the Company has two contract manufacturers located in China. Maxwell operates as one operating segment called High Reliability, which is comprised of three product lines:

Ultracapacitors: The Company's primary focus, ultracapacitors, are energy storage devices that possess a unique combination of high power density, extremely long operational life and the ability to charge and discharge very rapidly. The Company's ultracapacitor cells and multi-cell packs and modules provide highly reliable energy storage and power delivery solutions for applications in multiple industries, including transportation, automotive, information technology, renewable energy and industrial electronics.

High-Voltage Capacitors: The Company's CONDIS® high-voltage capacitors are designed and manufactured to perform reliably for decades in all climates. These products include grading and coupling capacitors and capacitive voltage dividers that are used to ensure the safety and reliability of electric utility infrastructure and other applications involving transport, distribution and measurement of high-voltage electrical energy.

Radiation-Hardened Microelectronic Products: The Company's radiation-hardened microelectronic products for satellites and spacecraft include single board computers and components, such as high-density memory and power modules. Many of these products incorporate our proprietary RADPAK® packaging and shielding technology and novel architectures that enable them to withstand the effects of environmental radiation and perform reliably in space. The Company's products are designed to perform reliably for the life of the products and systems into which they are integrated. The Company achieves high reliability through the application of proprietary technologies and rigorously controlled design, development, manufacturing and test processes.

Financial Statement Presentation

The accompanying condensed consolidated financial statements include the accounts of Maxwell Technologies, Inc. and its subsidiaries and have been prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP"). All intercompany transactions and account balances have been eliminated in consolidation. The Company has prepared the accompanying unaudited interim condensed consolidated financial statements in accordance with the instructions to Form 10-Q and the standards of accounting measurement set forth in the Interim Reporting Topic of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC"). Consequently, the Company has not necessarily included in this Form 10-O all information and footnotes required for audited financial statements. In the opinion of the Company's management, the accompanying unaudited condensed consolidated financial statements in this Form 10-O contain all adjustments (consisting only of normal recurring adjustments, except as otherwise indicated) necessary to present fairly the financial position, results of operations, and cash flows of Maxwell Technologies, Inc. for all periods presented. The results reported in these condensed consolidated financial statements should not be regarded as necessarily indicative of results that may be expected for any subsequent period or for the entire year. These unaudited condensed consolidated financial statements and notes thereto should be read in conjunction with the Company's audited financial statements and the notes thereto included in the Company's latest Annual Report on Form 10-K. Certain information and footnote disclosures normally included in the annual financial statements prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP") have been condensed or omitted in the accompanying interim consolidated financial statements. The year-end condensed balance sheet data was derived from audited financial statements, but does not include all

disclosures required by U.S. GAAP.

Reclassifications

Certain prior period amounts in the consolidated statement of cash flows for the six months ended June 30, 2013 have been reclassified to conform to the current period presentation. These reclassifications do not impact reported net income (loss) and do not otherwise have a material impact on the presentation of the overall financial statements. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts and related disclosures. These estimates include, but are not limited to, assessing the collectability of accounts receivable, applied and unapplied production costs, production capacities, the usage and recoverability of inventories and long-lived assets, including deferred income taxes, the incurrence of warranty obligations, impairment of goodwill and other intangible assets, estimation of the cost to complete certain projects, accruals for estimated losses from legal matters, and estimation of the value of stock-based compensation awards, including the probability that the performance criteria of restricted stock awards will be met.

Valuation Allowance on Deferred Tax Asset

At June 30, 2014, the Company has a cumulative valuation allowance recorded offsetting its worldwide net deferred tax assets of \$59.5 million, of which the significant majority represents the valuation allowance on its U.S. net deferred tax asset. The Company has established a valuation allowance against its U.S. federal and state deferred tax assets due to the uncertainty surrounding the realization of such assets. Management periodically evaluates the recoverability of the deferred tax assets and at such time as it is determined that it is more likely than not that U.S. deferred tax assets are realizable, the valuation allowance will be reduced accordingly. Any such release would result in recording a tax benefit that would increase net income in the period the valuation is released.

The Company evaluates positive and negative evidence in connection with its assessment of the recoverability of the deferred tax assets. The key objective negative evidence, which is generally difficult to overcome, is a cumulative loss over the past three years. Based on financial projections through 2018, the cumulative three-year position may shift from a loss to an income position as soon as 2018. While other factors will need to be considered during the Company's assessment of the U.S. valuation allowance, three-years cumulative income is considered significant positive evidence to support realization of all or a portion of the net deferred tax assets. However, the Company will also need to consider whether it expects to be in a cumulative loss position in the near future. Based on the Company's current financial projections, the Company may begin releasing the U.S. valuation allowance as soon as 2018. Warranty Obligation

The Company provides warranties on all product sales. The majority of the Company's warranties are for one to four years in the normal course of business. The Company accrues for the estimated warranty costs at the time of sale based on historical warranty experience plus any known or expected changes in warranty exposure.

Revenue Recognition

Revenue is derived primarily from the sale of manufactured products directly to customers. Product revenue is recognized, according to the guidelines of the Securities and Exchange Commission ("SEC") Staff Accounting Bulletin ("SAB") Numbers 101, Revenue Recognition in Financial Statements, and 104, Revenue Recognition, when all of the following criteria are met: (1) persuasive evidence of an arrangement exists (upon contract signing or receipt of an authorized purchase order from a customer); (2) title passes to the customer at either shipment from the Company's facilities or receipt at the customer facility, depending on shipping terms; (3) customer payment is deemed fixed or determinable and free of contingencies or significant uncertainties; and (4) collectability is reasonably assured. This policy has been consistently applied from period to period.

Beginning in the fourth quarter of 2011, for three distributors of the Company's products, the Company offered extended payment terms which allowed these distributors to pay the Company after they received payment from their customer, with respect to certain sales transactions. Also beginning in the fourth quarter of 2011, for one other distributor of the Company's products, the Company offered return rights and profit margin protection with respect to certain sales transactions. Therefore, for these four distributors, the Company determined that the revenue recognition criteria of SAB 101 and 104 were not met at the time of shipment, as there was no fixed or determinable price, nor was collection reasonably assured, at least with respect to certain sales transactions. As a result, for the three distributors provided with extended payment terms, which did not provide for a fixed or determinable price, the

Company deferred the recognition of revenue on all sales beginning in the fourth quarter of 2011 to the period in which cash is received. For the one distributor provided with return rights and profit margin protection, for which the Company could not estimate exposure, the Company deferred the recognition of revenue on all sales beginning in

the fourth quarter of 2011 until the distributor confirmed to the Company that it was not entitled to any further returns or credits. During the third quarter of 2013, this distributor confirmed to the Company that it was not entitled to any further returns or credits, therefore, previously unrecognized revenue related to this distributor was recognized in the quarter ended September 30, 2013. Although the Company had deferred revenue recognition for a significant amount of sales to these four distributors through the quarter ended September 30, 2013, subsequent to this date the amount of deferred revenue related to these distributors has been insignificant.

In addition to the deferred revenue arrangements discussed in the preceding paragraph, revenue is not recognized for sales that do not meet the revenue recognition criteria at the time of sale. Revenue is recognized once all of the criteria for revenue recognition are determined to have been met. For example, if the Company does not believe that collection of the sales price is reasonably assured at the time of sale, it defers revenue recognition until cash is received.

As of June 30, 2014 and December 31, 2013, cumulative sales totaling \$2.6 million and \$4.5 million, respectively, had not yet been recognized as revenue. The Company has recorded the cost basis of inventory shipped to customers prior to the achievement of the revenue recognition criteria of approximately \$1.6 million and \$2.5 million at June 30, 2014 and December 31, 2013, respectively, in "inventory" in the consolidated balance sheets.

If the Company receives cash payment from the customer prior to the achievement of the revenue recognition criteria, the amount received from the customer is recorded as deferred revenue in the consolidated balance sheets. Total deferred revenue and customer deposits in the consolidated balance sheets as of June 30, 2014 and December 31, 2013 of \$3.2 million and \$1.0 million, respectively, relates to cash received from customers on sales for which the revenue recognition criteria had not been achieved, customer advances, as well as other less significant customer arrangements requiring the deferral of revenue.

Net Income (Loss) per Share

In accordance with the Earnings Per Share Topic of the FASB ASC, basic net income (loss) per share is calculated using the weighted average number of common shares outstanding during the period. Diluted net income per share includes the impact of additional common shares that would have been outstanding if potentially dilutive common shares were issued. Potentially dilutive securities are not considered in the calculation of diluted net loss per share, as their inclusion would be anti-dilutive. The following table sets forth the computation of basic and diluted net income per share (in thousands, except per share data):

	Three Mont	hs Ended	Six Months Ended		
	June 30,		June 30,		
	2014	2013	2014	2013	
Numerator					
Net income (loss)	\$(1,181)	\$3,405	\$(862)	\$3,127	
Denominator					
Weighted-average common shares outstanding	29,206	28,858	29,127	28,842	
Effect of potentially dilutive securities:					
Options to purchase common stock				12	
Restricted stock awards		2		5	
Weighted-average common shares outstanding, assuming	29,206	28,860	29,127	28,859	
dilution	29,200	20,000	29,127	20,039	
Net income (loss) per share					
Basic	\$(0.04)	\$0.12	\$(0.03)	\$0.11	
Diluted	\$(0.04)	\$0.12	\$(0.03)	\$0.11	

The following table summarizes instruments that may be convertible into common shares that are not included in the denominator used in the diluted net income (loss) per share calculation because to do so would be anti-dilutive (in thousands):

	Three Mo	Three Months Ended		ths Ended
	June 30,		June 30,	
	2014	2013	2014	2013
Outstanding options to purchase common stock	758	895	758	807

Unvested restricted stock awards	600	428	600	426
Unvested restricted stock unit awards	203	57	203	57

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2014-09, Revenue from Contracts with Customers ("ASU 2014-09"). The standard provides companies with a single model for accounting for revenue arising from contracts with customers and supersedes current revenue recognition guidance, including industry-specific revenue guidance. The core principle of the model is to recognize revenue when control of the goods or services transfers to the customer, as opposed to recognizing revenue when the risks and rewards transfer to the customer under the existing revenue guidance. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2016. Early adoption is not permitted. The guidance permits companies to either apply the requirements retrospectively to all prior periods presented, or apply the requirements in the year of adoption, through a cumulative adjustment. The Company is in the process of evaluating the impact of adoption on its consolidated financial statements.

Note 2 Credit Facility						

Note 3 – Credit Facility

In December 2011, the Company obtained a secured credit facility in the form of a revolving line of credit up to a maximum of \$15.0 million (the "Revolving Line of Credit") and an equipment term loan (the "Equipment Term Loan") (together, the "Credit Facility"). In general, amounts borrowed under the Credit Facility are secured by a lien on all of the Company's assets other than its intellectual property. In addition, under the credit agreement, the Company is required to pledge 65% of its equity interests in its Swiss subsidiary. The Company has also agreed not to encumber any of its intellectual property. The agreement contains certain restrictive covenants that limit the Company's ability to, amongst other things; (i) incur additional indebtedness or guarantees; (ii) create liens or other encumbrances on its property; (iii) enter into a merger or similar transaction; (iv) invest in another entity; (v) declare or pay dividends; and (vi) invest in fixed assets in excess of a defined dollar amount. Repayment of amounts owed pursuant to the Credit Facility may be accelerated in the event that the Company is in violation of the representations, warranties and covenants made in the credit agreement, including certain financial covenants. The financial covenants that the Company must meet during the term of the credit agreement include quarterly minimum liquidity ratios, minimum quick ratios and EBITDA targets and an annual net income target. Borrowings under the Credit Facility bear interest, payable monthly, at either (i) the bank's prime rate or (ii) LIBOR plus 2.25%, at the Company's option subject to certain limitations. Further, the Company incurs an unused commitment fee, payable quarterly, equal to 0.25% per annum of the average daily unused amount of the Revolving Line of Credit.

The Equipment Term Loan was available to finance 80% of eligible equipment purchases made between April 1, 2011 and April 30, 2012. During this period, the Company borrowed \$5.0 million under the Equipment Term Loan. In March 2014, the Company borrowed \$3.0 million under the Revolving Line of Credit, and no other amounts have been borrowed to date under the Revolving Line of Credit.

As of December 31, 2013, the Company was not in compliance with the financial covenant pertaining to the quarterly EBITDA target for the quarter ended December 31, 2013. As a result of this noncompliance, borrowings outstanding

under the Credit Facility were classified as a current obligation in the consolidated balance sheet as of December 31, 2013.

During the quarter ended March 31, 2014, the Company was in violation with respect to the requirement to maintain a minimum liquidity ratio at all times. On February 27, 2014, the Company entered into a forbearance agreement with the bank wherein the bank agreed to forbear from further exercise of its rights and remedies under the credit agreement to call the Company's outstanding debt obligation in connection with this event of default for a period terminating on the earlier of April 30, 2014 or the occurrence of any additional events of default. The forbearance agreement also required the Company to

maintain at least \$1.0 million in its account maintained at the bank until the amount outstanding under the Revolving Line of Credit is repaid. On April 30, 2014, the Company entered into another forbearance agreement with the bank which extended the forbearance period from April 30, 2014 to June 30, 2014, or the occurrence of any additional events of default, and removed the requirement for the Company to maintain at least \$1.0 million in its account maintained at the bank.

During the quarter ended June 30, 2014, the Company was in violation with respect to the requirement to maintain a minimum liquidity ratio at all times and the failure to maintain the required EBITDA for the quarter ended June 30, 2014. On June 30, 2014, the Company entered into another forbearance agreement with the bank which extended the forbearance period from June 30, 2014 to August 31, 2014, or the occurrence of any additional events of default. As a result of this noncompliance, the bank's obligation to extend any further credit ceased and terminated, and borrowings outstanding under the Credit Facility have been classified as a current obligation in the consolidated balance sheet as of June 30, 2014.

As of June 30, 2014, \$1.4 million was outstanding under the Equipment Term Loan and the applicable interest rate was LIBOR plus 2.25% (2.5% as of June 30, 2014). If the bank does not exercise its right to accelerate repayment of this balance after the forbearance period discussed above, under the original terms of the Credit Facility, principal and interest under the Equipment Term Loan are payable in 36 equal monthly installments such that the Equipment Term Loan is fully repaid by the maturity date of April 30, 2015, but may be prepaid in whole or in part at any time. As of June 30, 2014, \$3.0 million was outstanding under the Revolving Line of Credit and the applicable interest rate was LIBOR plus 2.25% (2.5% as of June 30, 2014). The amount outstanding under the Revolving Line of Credit is scheduled to be repaid by August 31, 2014.

Note 4 – Fair Value Measurements

The Company records certain financial instruments at fair value in accordance with the Fair Value Measurements and Disclosures Topic of the FASB ASC. As of June 30, 2014, the financial instruments to which this topic applied were foreign currency forward contracts. As of June 30, 2014, the fair value of these foreign currency forward contracts was an asset of \$66,000 which is recorded in "prepaid expenses and other current assets" in the consolidated balance sheet. The fair value of these derivative instruments is measured using models following quoted market prices in active markets for identical instruments, which is a Level 2 input under the fair value hierarchy of the Fair Value Measurements and Disclosures Topic of the FASB ASC. All forward contracts as of June 30, 2014 have approximately a one-month maturity term and mature on July 2, 2014 or August 4, 2014.

The carrying value of short-term and long-term borrowings approximates fair value because of the relative short maturity of these instruments and the interest rates the Company could currently obtain.

Note 5 – Foreign Currency Derivative Instruments

Maxwell uses forward contracts to hedge certain monetary assets and liabilities, primarily receivables and payables, denominated in foreign currencies. The change in fair value of these forward contracts represents a natural hedge as gains and losses on these instruments partially offset the changes in the fair value of the underlying monetary assets and liabilities due to movements in currency exchange rates. These forward contracts generally expire in one month. These contracts are considered economic hedges but are not designated as hedges under the Derivatives and Hedging Topic of the FASB ASC, therefore, the change in the fair value of the instrument is recognized each period in the consolidated statement of operations.

The net gains and losses on foreign currency forward contracts included in cost of revenue and selling, general and administrative expense are as follows (in thousands):

	Three Months Ended June 30,		Six Months	s Ended	
			June 30,		
	2014	2013	2014	2013	
Cost of revenue	\$	\$18	\$5	\$30	
Selling, general and administrative	(405)	8	(344) (1,379)
Total gain (loss)	\$(405)	\$26	\$(339) \$(1,349)

The net gains and losses on foreign currency forward contracts were partially offset by net gains and losses on the underlying monetary assets and liabilities. Foreign currency gains and losses on those underlying monetary assets and liabilities included in cost of revenue and selling, general and administrative expense are as follows (in thousands):

	I hree Months Ended		S1X M	onths Ended	
	June 30,		June 3	30,	
	2014	2013	2014	2013	
Cost of revenue	\$3	\$(17) \$5	\$(25)
Selling, general and administrative	136	(205) (220) 1,041	
Total gain (loss)	\$139	\$(222) \$(215) \$1,016	

As of June 30, 2014, the total notional amount of foreign currency forward contracts not designated as hedges was \$31.5 million.

The following table presents gross amounts, amounts offset and net amounts presented in the condensed consolidated balance sheets for the Company's derivative instruments measured at fair value (in thousands):

	Julie 50,	Decembe	zı 51,
	2014	2013	
Gross amounts of recognized assets	\$230	\$472	
Gross amounts offset in the condensed consolidated balance sheets	(164) (90)
Net amount of recognized asset presented in the condensed consolidated balance sheets	\$66	\$ 382	

The Company has the legal right to offset these recognized assets and liabilities upon settlement of the derivative instruments. For additional information, refer to Note 4 – Fair Value Measurements.

Note 6 – Stock Plans

The Company has two active stock-based compensation plans as of June 30, 2014: the 2004 Employee Stock Purchase Plan and the 2013 Omnibus Equity Incentive Plan under which incentive stock options, non-qualified stock options, restricted stock awards and restricted stock units can be granted to employees and non-employee directors. Stock Options

Compensation expense recognized from employee stock options for the three months ended June 30, 2014 and 2013 was \$43,000 and \$154,000, respectively and \$41,000 and \$331,000, respectively, for the six months ended June 30, 2014 and 2013. Beginning in 2011, the Company ceased granting stock options to employees as part of its annual equity incentive award program. However, during the three months ended June 30, 2013, the Company granted total stock options of 75,000 to its new chief operating officer upon his initial engagement. These options vest in equal annual installments over four years from the date of grant. The Company may determine to grant stock options in the future to employees as part of its annual equity incentive award program.

Restricted Stock Awards

During the three months ended June 30, 2014 and 2013, the Company did not grant any restricted stock awards. During the six months ended June 30, 2014 and 2013 the Company issued 255,600 and 305,143 shares, respectively, under restricted stock awards, which had an average grant date fair value per share of \$14.20 and \$10.58, respectively. Beginning in the second quarter of 2014, the Company ceased granting restricted stock awards and began granting restricted stock units to employees as part of its annual equity incentive award program. The following table summarizes the amount of compensation expense recognized for restricted stock awards for the three and six months ended June 30, 2014 and 2013 (in thousands):

	Three Months Ended		Six Month	s Ended
	June 30,		June 30,	
	2014	2013	2014	2013
Service-based restricted stock awards	\$716	\$621	\$1,149	\$1,270
Performance-based restricted stock awards	7	25	13	43
Total compensation expense recognized for restricted stock awards	\$723	\$646	\$1,162	\$1,313

Restricted Stock Units

Non-employee director restricted stock units

Non-employee directors receive an annual restricted stock unit award, normally in February of each year, as part of their annual retainer compensation, which vests one year from the date of grant. Each restricted stock unit represents the right to receive one unrestricted share of the Company's common stock upon vesting. During the three months ended June 30, 2014 and 2013, no restricted stock units were granted to non-employee directors. During the six months ended June 30, 2014 and 2013, non-employee directors were granted a total of 65,891 and 56,616 restricted stock units, respectively, with an average grant date fair value per share of \$9.03 and \$10.51, respectively. Compensation expense recognized for non-employee director restricted stock units for the three months ended June 30, 2014 and 2013 was \$145,000 and \$139,000, respectively, and \$321,000 and \$253,000, respectively, for the six months ended June 30, 2014 and 2013.

Employee restricted stock units

Beginning in the second quarter of 2014 the Company ceased granting employees restricted stock awards and began granting restricted stock units as part of its annual equity incentive award program. Each restricted stock unit represents the right to receive one unrestricted share of the Company's common stock upon vesting. During the three months ended June 30, 2014, the Company granted 137,000 restricted stock units of which 67,000 were service-based restricted stock units vesting in equal installments over four years of continuous service with an average grant date value of \$15.17 per share and 70,000 were market-condition restricted stock units vesting upon the achievement of certain stock price thresholds and the completion of three years of continuous employment from the date of grant with an average grant date fair value of \$7.71 per share. Since the vesting of the market-condition restricted stock units is dependent on stock price performance, the fair values of these awards were estimated using a Monte-Carlo valuation model with the following weighted-average assumptions:

Market price at grant per share	\$15.03
Expected dividends	\$—
Expected volatility	65 %
Risk-free interest rate	0.86 %
Fair value per unit	\$7.71

The following table summarizes the amount of compensation expense recognized for employee restricted stock units for the three and six months ended June 30, 2014 and 2013 (in thousands):

	Three Months Ended		Six Mont	hs Ended
	June 30,		June 30,	
	2014	2013	2014	2013
Service-based restricted stock units	\$32	\$	\$32	\$
Market-condition restricted stock units	22	_	22	_
Total compensation expense recognized for employee restricted stock units	\$54	\$ —	\$54	\$

Employee Stock Purchase Plan

The 2004 Employee Stock Purchase Plan ("ESPP") permits substantially all employees to purchase common stock through payroll deductions, at 85% of the lower of the trading price of the stock at the beginning or at the end of each six month offering period commencing on January 1 and July 1. The number of shares purchased is based on participants' contributions made during the offering period.

Compensation expense recognized for the ESPP for the three months ended June 30, 2014 was \$201,000 and \$343,000 for the six months ended June 30, 2014. For the three and six months ended June 30, 2013, no compensation expense was recognized for the ESPP as the plan had been temporarily suspended. The fair value of the ESPP shares for the three and six months ended June 30, 2014 was estimated using the Black-Scholes valuation model for a call and a put option with the following weighted-average assumptions:

Expected dividends	\$
Exercise price	\$7.77
Expected volatility	71 %
Risk-free interest rate	0.07 %
Expected life/term (in years)	0.5
Fair value per share	\$7.65

Stock-based Compensation Expense

Compensation cost for restricted stock awards, restricted stock units, stock options and the ESPP included in cost of revenue; selling, general and administrative expense; and research and development expense is as follows (in thousands):

	Three Mor	Six Month	s Ended	
	June 30,		June 30,	
	2014	2013	2014	2013
Cost of revenue	\$190	\$261	\$442	\$535
Selling, general and administrative	733	507	988	1,004
Research and development	243	178	491	365
Total stock-based compensation expense	\$1,166	\$946	\$1,921	\$1,904

Note 7 – Shelf Registration Statement

On June 3, 2014, the Company filed a shelf registration statement on Form S-3 with the U.S. Securities and Exchange Commission ("SEC") to, from time to time, sell up to an aggregate of \$125 million of any combination of its common stock, warrants, debt securities or units. On June 30, 2014, the registration statement was declared effective by the SEC, which will allow the Company to access the capital markets for the three year period following this effective date. As of June 30, 2014, no securities have been issued under the Company's shelf registration statement. Net proceeds, terms and pricing of each offering of securities issued under the shelf registration statement will be determined at the time of such offerings.

Note 8 – Defined Benefit Plan

Maxwell SA, the Company's Swiss subsidiary, has a retirement plan that is classified as a defined benefit pension plan. The employee pension benefit is based on compensation, length of service and credited investment earnings. The plan guarantees both a minimum rate of return as well as minimum annuity purchase rates. The Company's funding policy with respect to the pension plan is to contribute the amount required by Swiss law, using the required percentage applied to the employee's compensation. In addition, participating employees are required to contribute to the pension plan. This plan has a measurement date of December 31.

Components of net periodic pension (benefit) cost are as follows (in thousands):

	Three Mont	hs Ended	Six Month	s Ended
	June 30,			
	2014	2013	2014	2013
Service cost	\$217	\$204	\$434	\$411
Interest cost	179	124	357	249
Expected return on plan assets	(458) (379) (915) (762
Prior service cost amortization	36	11	72	22
Deferred loss amortization		44		89
Net periodic pension cost (benefit)	\$(26) \$4	\$(52) \$9

Employer contributions of \$184,000 and \$178,000 were paid during the three months ended June 30, 2014 and 2013, respectively. Employer contributions of \$371,000 and \$361,000 were paid during the six months ended June 30, 2014 and 2013, respectively. Additional employer contributions of approximately \$334,000 are expected to be paid during the remainder of fiscal 2014.

Note 9 – Legal Proceedings

Although the Company expects to incur significant legal fees in connection with the below legal proceedings, the Company is unable to estimate the amount of such legal fees and therefore, such fees will be expensed in the period the legal services are performed.

FCPA Matter

As a result of being publicly traded in the U.S., the Company is subject to the U.S. Foreign Corrupt Practices Act ("FCPA"), which prohibits companies from making improper payments to foreign officials for the purpose of obtaining or retaining business. Beginning in 2009, the Company conducted an internal review into payments made to its former independent sales agent in China with respect to sales of its high voltage capacitor products produced by its Swiss subsidiary. In January 2011, the Company reached settlements with the SEC and the U.S. Department of Justice ("DOJ") with respect to charges asserted by the SEC and DOJ relating to the anti-bribery, books and records, internal controls, and disclosure provisions of the FCPA and other securities laws violations. The Company settled civil charges with the SEC, agreeing to an injunction against further violations of the FCPA. Under the terms of the settlement with the SEC, the Company agreed to pay a total of approximately \$6.4 million in profit disgorgement and prejudgment interest. The Company settled civil and criminal charges with the DOJ by entering into a three-year deferred prosecution agreement ("DPA") and agreeing to pay a total of \$8.0 million in penalties. Further, under the terms of each agreement, the Company has submitted periodic reports to the SEC and DOJ on its internal compliance program concerning anti-bribery. As of January 25, 2013, all monetary penalties have been paid in full for each settlement described above and, in early February 2014, the DPA expired on its own terms. A judgment of dismissal was issued by the District Judge for the matter in the U.S. District Court for the Southern District of California on March 28, 2014.

On October 15, 2013, the Company received an informal notice from the DOJ that an indictment against the former Senior Vice President and General Manager of its Swiss subsidiary had been filed in the United States District Court for the Southern District of California. The indictment is against the individual, a former officer, and not against the Company and the Company does not foresee that further penalties or fines could be assessed against it as a corporate entity for this matter. However, the Company may be required throughout the term of the action to advance the legal fees and costs incurred by the individual defendant and to incur other financial obligations. While the Company maintains directors' and officers' insurance policies which are intended to cover legal expenses related to its indemnification obligations in situations such as these, the Company cannot determine if and to what extent the insurance policy will cover the legal fees for this matter. Accordingly, the legal fees that may be incurred by the Company in defending this former officer could have a material impact on its financial condition and results of operation.

Swiss Bribery Matter

In August 2013, the Company's Swiss subsidiary was served with a search warrant from the Swiss federal prosecutor's office. At the end of the search, the Swiss federal prosecutor presented the Company with a listing of the materials gathered by the representatives and then removed the materials from its premises for keeping at the prosecutor's office. By reviewing the items to be seized on the search warrant presented by the Swiss prosecutor's office, the Company believes this action to be related to the same or similar facts and circumstances as the FCPA action previously settled with the SEC and the DOJ. During initial discussions, the Swiss prosecutor has acknowledged both the existence of the Company's DPA with the DOJ and its cooperation efforts thereunder, both of which should have a positive impact on discussions going forward. Additionally, other than the activities previously reviewed in conjunction with the SEC and DOJ matters under the FCPA, the Company has no reason to believe that additional facts or circumstances are under review by the Swiss authorities. At such an early stage in the investigation, the Company is currently unable to determine the extent to which it will be subject to fines in accordance with Swiss bribery laws and what additional expenses will be incurred in order to defend this matter. As such, the Company cannot determine whether there is a reasonable possibility that a loss will be incurred nor can it estimate the range of any such potential loss. Accordingly,

the Company has not accrued an amount for any potential loss associated with this action, but an adverse result could have a material adverse impact on its financial condition and results of operation.

Securities Matter

In early 2013, the Company voluntarily provided information to the United States Attorney's Office for the Southern District of California and the U.S. Securities and Exchange Commission related to its announcement that it intended to file restated financial statements for fiscal years 2011 and 2012. The Company is currently cooperating with the US authorities in connection with these investigations. At this preliminary stage, the Company cannot predict the ultimate outcome of this action, nor can it estimate the range of potential loss. Accordingly, the Company has not accrued an amount for any potential loss associated with this action, but an adverse result could have a material adverse impact on its financial condition and results of operation.

Securities Class Action Matter

From March 13, 2013 through April 19, 2013, four purported shareholder class actions were filed in the United States District Court for the Southern District of California against the Company and certain of its current and former officers. These actions were entitled Foster v. Maxwell Technologies, Inc., et al., Case No. 13-cv-0580 (S.D. Cal. filed March 13, 2013), Weinstein v. Maxwell Technologies, Inc., et al., No. 13-cv-0686 (S.D. Cal. filed March 21, 2013), Abanades v. Maxwell Technologies, Inc., et al., No. 13-cv-0867 (S.D. Cal. filed April 11, 2013), and Mebarak v. Maxwell Technologies, Inc., et al., No. 13-cv-0942 (S.D. Cal. filed April 19, 2013). The complaints alleged that the defendants made false and misleading statements regarding its financial performance and business prospects and overstated the Company's reported revenue. The complaints purport to assert claims for violations of Section 10(b) and 20(a) of the Securities Exchange Act of 1934 and SEC Rule 10b-5 on behalf of all persons who purchased the Company's common stock between April 28, 2011 and March 7, 2013, inclusive. The complaints seek unspecified monetary damages and attorneys' fees and costs. On May 13, 2013, four prospective lead plaintiffs filed motions to consolidate the four actions and to be appointed lead plaintiff and, on October 24, 2013, the court issued a written order consolidating the case under the heading In re Maxwell Technologies, Inc., Securities Litigation. On January 16, 2014, the lead plaintiff filed a consolidated and amended complaint which slightly adjusted the class period to April 29, 2011 to March 19, 2013, and removed a former officer as a defendant. In response, the Company and the individual defendants filed a motion to dismiss the complaint, which the lead plaintiff opposed. On May 5, 2014, the court granted the Company's motion to dismiss but granted the lead plaintiff leave to amend its complaint. The lead plaintiff filed an amended complaint on June 4, 2014, and the Company then filed another motion to dismiss on July 10, 2014. The lead plaintiffs and the Company are each expected to file additional responses on the issues raised in the motion to dismiss before the court rules on the matter at a hearing scheduled for October 14, 2014. At this preliminary stage, the Company cannot determine whether there is a reasonable possibility that a loss will be incurred nor can it estimate the range of potential loss. Accordingly, the Company has not accrued an amount for any potential loss associated with this action, but an adverse result could have a material adverse impact on its financial condition and results of operation.

Federal Shareholder Derivative Matter

On April 23, 2013 and May 7, 2013, two shareholder derivative actions were filed in the United States District Court for the Southern District of California, entitled Kienzle v. Schramm, et al., Case No. 13-cv-0966 (S.D. Cal. filed April 23, 2013) and Agrawal v. Cortes, et al., Case No. 13-cv-1084 (S.D. Cal. filed May 7, 2013). The complaints name as defendants certain of the Company's current and former officers and directors and name the Company as a nominal defendant. The complaints allege that the individual defendants caused or allowed the Company to issue false and misleading statements about its financial condition, operations, management, and internal controls and falsely represented that it maintained adequate controls. The complaints assert causes of action for breach of fiduciary duty, abuse of control, gross mismanagement, waste of corporate assets and unjust enrichment. The lawsuits seek unspecified damages, an order directing the Company to take all necessary actions to reform and improve its corporate governance and internal procedures, restitution and disgorgement of profits, benefits, and other compensation, attorneys' and experts' fees, and costs and expenses. On June 10, 2013, the parties filed a joint motion to consolidate the two actions. On September 26, 2013, the plaintiffs filed a motion to stay this case until the resolution of the similar derivative action pending in the California Superior Court for the County of San Diego. The Company opposed this motion to stay. On October 30, 2013, the court issued two orders consolidating the two cases under the heading In re Maxwell Technologies, Inc. Derivative Litigation, which had been mutually agreed upon by all parties, and denying the plaintiffs' motion to stay their own federal derivative case. The lead plaintiff filed its consolidated and amended

complaint on January 30, 2014. In response, the Company and the individual defendants filed a motion to dismiss the complaint, which the lead plaintiff opposed. On May 28, 2014, the court granted the Company's motion to dismiss but granted the lead plaintiff leave to amend its complaint. The lead plaintiff filed an amended complaint on July 11, 2014, to which the Company expects to respond by filing another motion to dismiss the action. The lead plaintiffs and the Company are each expected to file additional responses on the issues raised in the motion to dismiss before the court rules on the matter at a hearing which is not yet formally scheduled with the court. Because this action is derivative in nature, it does not seek monetary damages from the Company. However, the Company may be required throughout the term of the action to advance the legal fees and costs incurred by the individual defendants and to incur other financial obligations. At this preliminary stage, the Company cannot

predict the ultimate outcome of this action, nor can it estimate the range of potential loss. Accordingly, the Company has not accrued an amount for any potential costs associated with this action, but an adverse result could have a material adverse impact on its financial condition and results of operation.

State Shareholder Derivative Matter

On April 11, 2013 and April 18, 2013, two shareholder derivative actions were filed in California Superior Court for the County of San Diego, entitled Warsh v. Schramm, et al., Case No. 37-2013-00043884 (San Diego Sup. Ct. filed April 11, 2013) and Neville v. Cortes, et al., Case No. 37-2013-00044911-CU-BT-CTL (San Diego Sup. Ct. filed April 18, 2013). The complaints name as defendants certain of the Company's current and former officers and directors as well as its former auditor McGladrey LLP. The Company is named as a nominal defendant. The complaints allege that the individual defendants made or caused the Company to make false and/or misleading statements regarding its financial condition, and failed to disclose material adverse facts about its business, operations and prospects. The complaints assert causes of action for breaches of fiduciary duty for disseminating false and misleading information, failing to maintain internal controls, and failing to properly oversee and manage the Company, as well as for unjust enrichment, abuse of control, gross mismanagement, professional negligence and accounting malpractice, and aiding and abetting breaches of fiduciary duty. The lawsuits seek unspecified damages, an order directing the Company to take all necessary actions to reform and improve its corporate governance and internal procedures, restitution and disgorgement of profits, benefits and other compensation, attorneys' and experts' fees, and costs and expenses. On May 7, 2013, the Court consolidated the two actions. The Company filed a motion to stay the consolidated action on July 2, 2013. On September 27, 2013, the Court heard oral arguments on the motion to stay and continued the hearing on this motion until the resolution of the motion to stay pending in the federal derivative action referenced above. Given the outcome of the above detailed federal derivative lawsuit, the Company informed the state court of the federal court order denying the federal plaintiffs' motion to stay. Consequently, on November 1, 2013, the state court stayed the state derivative action pending before it until the resolution of the federal derivative case. Because this action is derivative in nature, it does not seek monetary damages from the Company. However, the Company may be required throughout the term of the action to advance the legal fees and costs incurred by the individual defendants and to incur other financial obligations. At this preliminary stage, the Company cannot predict the ultimate outcome of this action, nor can it estimate the range of potential loss. Accordingly, the Company has not accrued an amount for any potential costs associated with this action, but an adverse result could have a material adverse impact on its financial condition and results of operation.

Shareholder Demand Letter Matter

On April 9, 2013, Stephen Neville, a purported shareholder of the Company, sent a demand letter to the Company to inspect its books and records pursuant to California Corporations Code Section 1601. The demand sought inspection of documents related to the Company's March 7, 2013 announcement that it would be restating its previously-issued financial statements for 2011 and 2012, board minutes and committee materials, and other documents related to its board or management discussions regarding revenue recognition from January 1, 2011 to the present. The Company responded by letter dated April 19, 2013, explaining why it believed that the demand did not appear to be proper. Following receipt of a second letter from Mr. Neville dated April 23, 2013, the Company explained by letter dated April 29, 2013 why it continues to believe that the inspection demand appears improper. The Company has not received a further response from Mr. Neville regarding the inspection demand. In conjunction with the state court derivative action referenced above, Mr. Neville filed two motions to compel production of the documents and materials originally sought in the demand letter. On September 27, 2013, the Court heard oral arguments on the motions to compel and, in line with the continuance on the motion to stay in the state shareholder derivative matter referenced above, likewise continued the hearing on the motions to compel, pending resolution of the motions to stay in both the federal and state derivative actions referenced above. On November 15, 2013, the purported shareholder, Mr. Neville, filed a petition for writ of mandate requesting that the state court order the Company to comply with the inspection demand. The Company responded to this writ on January 15, 2014, claiming that the inspection demand is improper on numerous grounds and simultaneously filing a demurrer for the shareholder inspection demand action in its entirety. On July 18, 2014, the court ruled against the Company's motion to dismiss but left open issues pertaining to the documents to be provided, if any, under the purported shareholder inspection demand. Accordingly, the Company is expected to address the nature and scope of the inspection demand through procedural filings with the

court. At this preliminary stage, the Company cannot predict the ultimate outcome of this action, nor can it estimate the range of potential loss. Accordingly, the Company has not accrued an amount for any potential costs associated with this action, but an adverse result could have a material adverse impact on its financial condition and results of operation.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations Unless the context otherwise requires, all references to "Maxwell," "the Company," "we," "us," and "our" refer to Maxwell Technologies, Inc. and its subsidiaries. All references to "Maxwell SA" refer to our Swiss subsidiary, Maxwell Technologies, SA.

FORWARD-LOOKING STATEMENTS

Some of the statements contained in this document and incorporated herein by reference discuss our plans and strategies for our business or make other forward-looking statements, as this term is defined in the Private Securities Litigation Reform Act. The words "anticipates," "believes," "estimates," "expects," "plans," "intends," "may," "could," "will," "seek," "should," "would" and similar expressions are intended to identify these forward-looking statements, but are not the exclusive means of identifying them. These forward-looking statements reflect the current views and beliefs of our management; however, various risks, uncertainties and contingencies could cause our actual results, performance or achievements to differ materially from those expressed in, or implied by, our statements. Such risks, uncertainties and contingencies include, but are not limited to, the following:

our ability to remain competitive and stimulate customer demand through successful introduction of new products, and to educate our prospective customers on the products we offer;

dependence upon the sale of products to a small number of customers and vertical markets, some of which are heavily dependent on government funding or government subsidies which may or may not continue in the future; dependence upon the sale of products into Asia and Europe, where macroeconomic factors outside our control may adversely affect our sales;

risks related to our international operations including, but not limited to, our ability to adequately comply with the changing rules and regulations in countries where our business is conducted, our ability to oversee and control our foreign subsidiaries and their operations, our ability to effectively manage foreign currency exchange rate fluctuations arising from our international operations, and our ability to continue to comply with the U.S. Foreign Corrupt Practices Act as well as the anti-bribery laws of foreign jurisdictions and the terms and conditions of our settlement agreements with the Securities and Exchange Commission and the Department of Justice;

successful acquisition, development and retention of key personnel;

our ability to effectively manage our reliance upon certain suppliers of key component parts, specialty equipment and logistical services;

our ability to match production volume to actual customer demand;

our ability to manage product quality problems;

our ability to protect our intellectual property rights and to defend claims against us;

our ability to effectively identify, enter into, manage and benefit from strategic alliances;

occurrence of a catastrophic event at any of our facilities;

occurrence of a technology systems failure, network disruption, or breach in data security;

our ability to obtain sufficient capital to meet our operating or other needs; and,

our ability to manage and minimize the impact of unfavorable legal proceedings.

Many of these factors are beyond our control. Additionally, there can be no assurance that we will not incur new or additional unforeseen costs in connection with the ongoing conduct of our business. Accordingly, any forward-looking statements included herein do not purport to be predictions of future events or circumstances and may not be realized.

For a discussion of important risks associated with an investment in our securities, including factors that could cause actual results to differ materially from expectations referred to in the forward-looking statements, see Risk Factors in Part II, Item 1A, of this document and Part I, Item 1A, of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013. We do not have any obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

Overview

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is designed to provide a reader of our financial statements with a narrative from the perspective of our management on our financial condition, results of operations, liquidity and certain other factors that may affect our future results. Our MD&A is presented in the following sections:

Executive Overview

Highlights of the Six Months Ended June 30, 2014

Results of Operations

Liquidity and Capital Resources

Critical Accounting Policies and Estimates

Off Balance Sheet Arrangements

Executive Overview

Maxwell is a global leader in developing, manufacturing and marketing energy storage and power delivery products for transportation, industrial, information technology and other applications and microelectronic products for space and satellite applications. Our products are designed and manufactured to perform reliably with minimal maintenance for the life of the applications into which they are integrated. We believe that this "life-of-the-application" reliability gives our products a competitive advantage and enables them to command higher profit margins than commodity products. We have three product lines: ultracapacitors with applications in multiple industries, including transportation, automotive, information technology, renewable energy and consumer and industrial electronics; high-voltage capacitors applied mainly in electrical utility infrastructure; and radiation-hardened microelectronic products for space and satellite applications.

Our primary objective is to grow revenue and profit margins by creating and satisfying demand for ultracapacitor-based energy storage and power delivery solutions. We are focusing on establishing and expanding market opportunities for ultracapacitors and being the preferred supplier for ultracapacitor products worldwide. We believe that the transportation industry represents the largest market opportunity for ultracapacitors, primarily for applications related to engine starting, electrical system augmentation, and braking energy recuperation and hybrid electric drive systems for transit buses, trucks and autos, and electric rail vehicles. Backup power and power quality applications, including instantly available power for uninterruptible power supply systems, and stabilizing the output of renewable energy generation systems may also represent significant market opportunities.

We also seek to expand market opportunities and revenue for our high-voltage capacitors and radiation-hardened microelectronic products. The market for high-voltage capacitors consists mainly of expansion, upgrading and maintenance of existing electrical utility infrastructure and new infrastructure installations in developing countries. Such installations are capital-intensive and frequently are subject to regulation, availability of government funding and general economic conditions. Although the market for microelectronics products for space and satellite applications is relatively small, the specialized nature of these products and the requirement for failure-free reliability allows us to generate profit margins significantly higher than those for commodity electronic components.

In the second quarter of 2014, revenues were \$46.1 million, representing a decrease of 17% compared with the same period one year ago. The decrease is primarily attributable to lower revenue for our ultracapacitor products, for which revenue decreased by 14% to \$33.9 million in the second quarter of 2014 from \$39.3 million in the second quarter of 2013. This decrease in revenues for our ultracapacitor products is primarily attributable to reduced sales in the hybrid transit vehicle market, partially offset by increases in the wind energy and heavy transportation markets.

Revenues for our high voltage capacitor products decreased by \$2.8 million to \$10.0 million for the second quarter of 2014 compared with \$12.8 million for the same period in the prior year, as we are currently experiencing reduced global demand for these products. Revenues for our microelectronics products, which often vary widely quarter to quarter, were \$2.2 million for the second quarter of 2014 compared with \$3.6 million for the same period in 2013. Overall gross profit margin during the quarter decreased to 36% compared with 39% in the second quarter of 2013 primarily due to the lower sales volume and higher production costs for our new manufacturing facility in Peoria, Arizona. Operating expenses in the second quarter of 2014 were 37% of revenue, compared with 31% of revenue in the same period one year ago.

As of June 30, 2014, we had cash and cash equivalents of \$30.7 million. Management believes that this available cash balance, combined with cash we expect to generate from operations, will be sufficient to fund our operations, obligations as they become due, and capital investments for at least the next twelve months. In the future, we may decide to supplement

Table of Contents

existing cash and planned cash flow from operations by borrowing additional funds from under credit facilities, or by issuing additional debt or equity.

Going forward, we will continue to focus on growing our business and strengthening our market leadership and brand recognition through further penetration of existing markets, entry into new markets and development of new products. Our primary focus will be to grow our ultracapacitor business by increasing sales into primary applications, including automotive, transportation, renewable energy and backup power. In order to achieve our growth objectives, we will need to overcome risks and challenges facing our business.

A significant challenge we face is our ability to manage dependence on a small number of vertical markets, including some that are driven by government policies and subsidy programs. For example, a large portion of our current ultracapacitor business is concentrated in the Chinese hybrid transit bus and wind energy markets, which are heavily dependent on government regulation and subsidy. These markets may decline or experience slower rates of growth when there are changes or delays in government policies and subsidy programs. In mid-2013, the Chinese government subsidy program for diesel-electric hybrid buses concluded, and has not been renewed. However, our Chinese bus customers are now receiving significant orders for subsidized plug-in hybrid buses that incorporate ultracapacitor content similar to that for diesel-electric hybrid buses. We are focused on supporting this plug-in hybrid demand, which we expect to continue to contribute to sales of our ultracapacitor products. The current subsidy program is scheduled to expire at the end of 2015, although it may be renewed or replaced.

Although we believe the long-term prospects for the automotive, wind and hybrid bus markets remain positive, we are pursuing growth opportunities for our products in other vertical markets, including applications for back-up power, power quality and heavy vehicle engine starting in order to further diversify our market presence and augment our long-term growth prospects.

Other significant risks and challenges we face include the ability to achieve profitability; the ability to develop our management team, product development infrastructure and manufacturing capacity to facilitate growth; competing technologies that may capture market share and interfere with our planned growth; and hiring, developing and retaining key personnel critical to the execution of our strategy. We will be attentive to these risks and will focus on developing new products and promoting the value proposition of our products versus competing technologies and trying to grow our revenues and profits in the years to come.

Highlights of Six Months Ended June 30, 2014

During the six months ended June 30, 2014, we continued to focus on introducing new products, winning new customers, new product applications, increasing production capacity to meet anticipated future demand, reducing product costs, making capital investments to facilitate growth, and improving production processes. Some of these efforts are described below:

In February, we announced that we supplied seven powerful single board computers that are providing processing power for the European Space Agency's Gaia Satellite, which lifted off on December 19, 2013.

Also in February, we announced that we are supplying ultracapacitor-based Engine Start Modules to Idle Free Systems, Inc., a leader in anti-idling solutions for the trucking industry, to provide cranking power for a new anti-idling system into vocational markets across North America.

In March, we introduced our ultracapacitor-based Engine Start Module for medium duty diesel trucks. Consistent with the current Engine Start Module, the new product provides the same benefits to class 3 through 6 medium duty trucks. In April, we announced that we are supplying ultracapacitors to ABB, the global leader in power and automation solutions. ABB will incorporate Maxwell ultracapacitors in a new hybrid version of its high-efficiency energy recovery and storage system for the light rail system serving the greater Philadelphia area.

In June, we introduced our new 2.85 volt, 3400-farad ultracapacitor cell which incorporates our DuraBlue Shock and Vibration Technology, and is our newest innovation in ultracapacitor reliability and performance.

Table of Contents

Results of Operations

The Second Quarter of 2014 Compared with the Second Quarter of 2013

The following table presents certain unaudited statement of operations data expressed as a percentage of revenue for the periods indicated:

	Quarter Ended				
	June 30,				
	2014		2013		
Revenue	100	%	100	%	
Cost of revenue	64	%	61	%	
Gross profit	36	%	39	%	
Operating expenses:					
Selling, general and administrative	24	%	21	%	
Research and development	13	%	10	%	
Total operating expenses	37	%	31	%	
Income (loss) from operations	(1)%	8	%	
Interest expense, net	_	%	1	%	
Income (loss) from operations before income taxes	(1)%	7	%	
Income tax provision	2	%	1	%	
Net income (loss)	(3)%	6	%	

Net loss reported for the three months ended June 30, 2014 was \$1.2 million, or \$0.04 per share, compared with net income of \$3.4 million, or \$0.12 per diluted share, in the same quarter one year ago. This decrease was primarily driven by a decrease in revenue of 17% for the three months ended June 30, 2014 compared with the same period of the prior year, and a decline in gross profit as a percent of revenue to 36%, compared with 39% in the same quarter of the prior year. Operating expenses decreased 1% to \$17.2 million for the three months ended June 30, 2014 from \$17.4 million in the same period of the prior year.

Revenue and Gross Profit

The following table presents a comparison of revenue, cost of revenue and gross profit for the quarters ended June 30, 2014 and 2013 (in thousands, except percentages):

	Quarter En	Quarter Ended June 30, 2014		Quarter En						
	June 30, 20			June 30, 2013						
	Amount	% of	A		% of		Daamaaaa	%	%	
	Amount	Revenue		Amount	Revenue		Decrease		Change	
Revenue	\$46,074	100	%	\$55,610	100	%	\$(9,536)	(17)%
Cost of revenue	29,474	64	%	34,034	61	%	(4,560)	(13)%
Gross profit	\$16,600	36	%	\$21,576	39	%	\$(4,976)	(23)%

Revenue. In the second quarter of 2014, revenue decreased 17% to \$46.1 million, compared with \$55.6 million in the same quarter one year ago. The decrease in revenue was influenced primarily by lower revenues for our ultracapacitor product line which decreased by 14% to \$33.9 million in the second quarter of 2014 from \$39.3 million in the second quarter of 2013. This decline in revenue is associated with reduced sales in the Chinese hybrid transit bus market primarily related to the expiration of a Chinese government subsidy program for diesel-electric hybrid buses in the middle of 2013, which was replaced with a subsidy program for plug-in hybrid buses. Under the new subsidy program, plug-in hybrid bus manufacturers are incorporating our ultracapacitor products, for which demand has been lower to date than under the previous subsidy program for diesel-electric hybrid buses. This decline in revenues for the hybrid transit bus market was partially offset by increases in the wind energy and heavy transportation markets. Revenues for our high voltage products decreased by \$2.8 million to \$10.0 million for the second quarter of 2014, compared with \$12.8 million in the same quarter one year ago as we are currently experiencing reduced global demand for these products. Revenues for our microelectronics products, which tend to vary widely from period to period, decreased by \$1.4 million with total revenues of \$2.2 million in the second quarter of 2014 compared with total revenues of \$3.6 million for the second quarter of 2013.

Table of Contents

A substantial amount of our revenue is generated through our Swiss subsidiary which has a functional currency of the Swiss Franc. As such, reported revenue can be materially impacted by the changes in exchange rates between the Swiss Franc and the U.S. Dollar, our reporting currency. Due to the weakening of the U.S. Dollar against the Swiss Franc during the quarter ended June 30, 2014 compared with the same period one year ago, revenue was positively impacted by \$488,000.

Gross Profit. In the second quarter of 2014, gross profit decreased \$5.0 million or 23% compared with the second quarter of 2013. Of the decrease in gross profit in absolute dollars, \$4.2 million related to a decrease in sales and \$825,000 related to an increase in product costs, primarily associated with the opening of our new manufacturing facility in Peoria, Arizona.

As a percentage of revenue, gross profit margin decreased to 36% in the second quarter of 2014 compared with 39% in the same quarter one year ago. This decrease in gross profit as a percentage of revenue was primarily related to higher per unit costs associated with lower production volume and higher production costs associated with our new manufacturing facility, as noted above.

Selling, General and Administrative Expense

The following table presents selling, general and administrative expense for the second quarter of 2014 and 2013 (in thousands, except percentages):

	Quarter Ended			Quarter Ended						
	June 30, 2014			June 30, 2013						
	Amount	% of Revenue		Amount	% of Revenue		Decrease		% Change	
Selling, general and administrative	\$10,944	24	%	\$11,988	21	%	\$(1,044)	(9)%

Selling, general and administrative expenses were 24% of revenue for the second quarter of 2014, up from 21% in the same quarter in 2013, while total expenses decreased by \$1.0 million, or 9%. The decrease in absolute dollars was primarily attributable to higher legal, audit, tax and consulting fees of \$1.9 million in the second quarter of 2013, mainly related to the audit committee's investigation, our internal review and the restatement of previously issued financial statements. Offsetting this impact, labor expenses increased by \$281,000 in the second quarter of 2014 compared with the same quarter one year ago, primarily related to additional headcount for sales and marketing, and travel expenses increased by \$281,000 during this period, mainly related to increased customer relations and sales efforts. In addition, recruiting expenses increased by \$272,000 to support planned growth in headcount. Despite the decline in absolute dollars, selling, general and administrative expenses increased to 24% of revenue for the second quarter of 2014, up from 21% for the same quarter in 2013, as revenues were lower for the second quarter of 2014. Research and Development Expense

The following table presents research and development expense for the second quarter of 2014 and 2013 (in thousands, except percentages):

	Quarter End	Quarter Ended June 30, 2014			Quarter Ended							
	June 30, 20				June 30, 2013							
	Amount	% of Revenue		Amount	% of Revenue		Increase	% Change				
Research and development	\$6,223	13	%	\$5,378	10	%	\$845	16	%			

Research and development expenses were 13% of revenue for the second quarter of 2014, up from 10% in the same quarter in 2013, while total expenses increased by \$845,000. The increase in absolute dollars was primarily driven by an increase of \$355,000 in labor expenses related to increased headcount to support efforts to improve manufacturing processes and to develop and enhance products, as well as \$200,000 incurred in the second quarter of 2014 for outsourced services to develop next-generation ultracapacitor products. In addition to the increase in absolute dollars, research and development expenses increased to 13% of revenue for the second quarter of 2014, up from 10% for the same quarter in 2013, as both expenses were higher and revenues were lower for the second quarter of 2014.

Provision for Income Taxes

The effective tax rate differs from the statutory U.S. federal income tax rate of 34% primarily due to foreign income tax and the valuation allowance against the Company's domestic deferred tax assets.

We recorded an income tax provision of \$581,000 for the second quarter of 2014 compared with \$749,000 for the same quarter in 2013. This provision is primarily related to taxes on income generated by our Swiss subsidiary. The decline in the

Table of Contents

income tax provision is due to lower income generated by our Swiss subsidiary for the second quarter of 2014 compared with the second quarter of 2013. Unremitted earnings of foreign subsidiaries have been included in the consolidated financial statements without giving effect to the United States taxes that may be payable as it is not anticipated such earnings will be remitted to the United States. The Company has established a valuation allowance against its U.S. federal and state deferred tax assets, as well as the deferred tax asset of a foreign subsidiary, due to the uncertainty surrounding the realization of such assets as evidenced by the cumulative losses from operations through June 30, 2014. Management periodically evaluates the recoverability of the deferred tax assets and at such time as it is determined that it is more likely than not that deferred assets are realizable, the valuation allowance will be reduced accordingly.

At June 30, 2014, we have a cumulative valuation allowance recorded offsetting our worldwide net deferred tax assets of \$59.5 million, of which the significant majority represents the valuation allowance on our U.S. net deferred tax asset. We have established a valuation allowance against our U.S. federal and state deferred tax assets due to the uncertainty surrounding the realization of such assets. Management periodically evaluates the recoverability of the deferred tax assets and at such time as it is determined that it is more likely than not that U.S. deferred tax assets are realizable, the valuation allowance will be reduced accordingly.

The Six Months Ended June 30, 2014 Compared with the Six Months Ended June 30, 2013

The following table presents certain unaudited statement of operations data expressed as a percentage of revenue for the periods indicated:

•	Six Months Ended June 30,		
	2014	2013	
Revenue	100	% 100	%
Cost of revenue	63	% 61	%
Gross profit	37	% 39	%
Operating expenses:			
Selling, general and administrative	24	% 23	%
Research and development	13	% 11	%
Total operating expenses	37	% 34	%
Income (loss) from operations		% 5	%
Interest expense, net		% —	%
Income (loss) from operations before income taxes		% 5	%
Income tax provision	1	% 2	%
Net income (loss)	(1)% 3	%

Net loss reported for six months ended June 30, 2014 was \$862,000, or \$0.03 per share, compared with net income of \$3.1 million, or \$0.11 per diluted share, in the same period one year ago. This decrease was primarily driven by a decrease in revenue of 11% for six months ended June 30, 2014 compared with the same period of the prior year, and a decline in gross profit as a percent of revenue to 37%, compared with 39% in the same six months of the prior year. Operating expenses decreased 2% to \$34.3 million for the six months ended June 30, 2014 from \$34.9 million in the same period of the prior year.

Revenue and Gross Profit

The following table presents a comparison of revenue, cost of revenue and gross profit for six months ended June 30, 2014 and 2013 (in thousands, except percentages):

,		07.								
	Six Months Ended June 30, 2014			Six Months E						
			June 30, 2013							
	A	% of	Amount	A	% of Revenue		Decrease	%		
	Amount	Revenue		Amount					Change	
Revenue	\$92,075	100	%	\$103,358	100	%	\$(11,283)	(11)%
Cost of revenue	57,605	63	%	63,552	61	%	(5,947)	(9)%
Gross profit	\$34,470	37	%	\$39,806	39	%	\$(5,336)	(13)%

Revenue. In the six months ended June 30, 2014, revenue decreased 11% to \$92.1 million, compared with \$103.4 million in the same period one year ago. The decrease in revenue was influenced primarily by lower revenues for our ultracapacitor

Table of Contents

product line which decreased by 10% to \$65.9 million in the first six months of 2014 from \$73.0 million in the same period in the prior year. This decline in revenue is associated with reduced ultracapacitor sales in the Chinese hybrid transit bus market primarily related to the expiration of a Chinese government subsidy program for diesel-electric hybrid buses in the middle of 2013, which was replaced with a subsidy program for plug-in hybrid buses. Under the new subsidy program, plug-in hybrid bus manufacturers are incorporating our ultracapacitor products, for which demand has been lower to date than under the previous subsidy program for diesel-electric hybrid buses. This decline in revenues for the hybrid transit bus market was partially offset by increased revenues for the wind energy, automotive and heavy transportation markets.

Revenues for our high voltage products decreased by \$4.5 million to \$20.1 million for the first six months of 2014, compared with \$24.6 million in the same period one year ago as we are currently experiencing reduced global demand for these products. Revenues for our microelectronics products, which tend to vary widely from period to period, increased by \$386,000 with total revenues of \$6.1 million in the first six months of 2014 compared with total revenues of \$5.7 million for the first six months of 2013.

A substantial amount of our revenue is generated through our Swiss subsidiary which has a functional currency of the Swiss Franc. As such, reported revenue can be materially impacted by the changes in exchange rates between the Swiss Franc and the U.S. Dollar, our reporting currency. Due to the weakening of the U.S. Dollar against the Swiss Franc during the six months ended June 30, 2014 compared with the same period one year ago, revenue was positively impacted by \$991,000.

Gross Profit. In the first six months of 2014, gross profit decreased \$5.3 million compared with the first six months of 2013. Of the decrease in gross profit in absolute dollars, \$4.5 million related to a decrease in sales, and \$780,000 related to an increase in product costs, primarily associated with the opening of our new manufacturing facility in Peoria, Arizona, as well as provisions taken for certain excess or obsolete inventory items.

As a percentage of revenue, gross profit margin decreased to 37% for the first six months of 2014 compared with 39% in the same period one year ago. This decrease in gross profit as a percentage of revenue was primarily related to higher per unit costs associated with lower production volume and higher production costs associated with our new manufacturing facility, as noted above.

Selling, General and Administrative Expense

The following table presents selling, general and administrative expense for first six months of 2014 and 2013 (in thousands, except percentages):

	Six Months Ended June 30, 2014		Six Months June 30, 20				
	Amount	% of Revenue	Amount	% of Revenue	Decrease	% Change	
Selling, general and	\$21,883	24	% \$23,490	23	% \$(1,607) (7)%

Selling, general and administrative expenses were 24% of revenue for the first six months of 2014, up from 23% in the same period one year ago, while total expenses decreased by \$1.6 million, or 7%. The decrease in absolute dollars was primarily attributable to higher legal, audit, tax and consulting fees of \$4.0 million in the first six months of 2013, mainly related to the audit committee's investigation, our internal review and the restatement of previously issued financial statements. Offsetting this impact, labor expenses increased by \$804,000 in the first six months of 2014 compared with 2013, primarily related to additional headcount for sales and marketing, and recruiting expenses increased by \$494,000 primarily due to the search for our new chief executive officer and additional staff for our San Diego and Asia facilities. In addition, travel expenses increased by \$287,000 mainly related to customer relations and sales efforts, and information technology and facilities expenses increased by a total of \$251,000 in support of the increase in headcount. Further, there was an increase in net foreign exchange losses of \$226,000. Despite the decline in absolute dollars, selling, general and administrative expenses increased to 24% of revenue for the first six months of 2014, up from 23% for the same period in 2013, as revenues were lower for the first six months of 2014.

Table of Contents

Research and Development Expense

The following table presents research and development expense for the first six months of 2014 and 2013 (in thousands, except percentages):

	June 30, 2014		S1x Months				
			June 30, 2013				
	Amount	% of Revenue	Amount	% of Revenue	Increase	% Change	
Research and development	\$12,394	13	% \$11,401	11	% \$993	9	%

Research and development expenses were 13% of revenue for the first six months of 2014, up from 11% in the same period one year ago, while total expenses increased by \$993,000, or 9%. The increase in absolute dollars was primarily driven by increases of \$670,000 in labor expenses related to increased headcount to support efforts to improve manufacturing processes and to develop and enhance products, as well as \$250,000 in outsourced services incurred in the first six months of 2014 to develop next-generation ultracapacitor products. In addition to the increase in absolute dollars, research and development expenses increased to 13% of revenue for the first six months of 2014, up from 11% for the same period in 2013, as both expenses were higher and revenues were lower for the first six months of 2014.

Provision for Income Taxes

The effective tax rate differs from the statutory U.S. federal income tax rate of 34% primarily due to foreign income tax and the valuation allowance against the Company's domestic deferred tax assets.

We recorded an income tax provision of \$978,000 for the first six months of 2014 compared with \$1.7 million for the same period in 2013. This provision is primarily related to taxes on income generated by our Swiss subsidiary. The decline in the income tax provision is due to lower income generated by our Swiss subsidiary for the first six months of 2014 compared with the first six months of 2013. Unremitted earnings of foreign subsidiaries have been included in the consolidated financial statements without giving effect to the United States taxes that may be payable as it is not anticipated such earnings will be remitted to the United States. The Company has established a valuation allowance against its U.S. federal and state deferred tax assets, as well as the deferred tax asset of a foreign subsidiary, due to the uncertainty surrounding the realization of such assets as evidenced by the cumulative losses from operations through June 30, 2014. Management periodically evaluates the recoverability of the deferred tax assets and at such time as it is determined that it is more likely than not that deferred assets are realizable, the valuation allowance will be reduced accordingly.

At June 30, 2014, we have a cumulative valuation allowance recorded offsetting our worldwide net deferred tax assets of \$59.5 million, of which the significant majority represents the valuation allowance on our U.S. net deferred tax asset. We have established a valuation allowance against our U.S. federal and state deferred tax assets due to the uncertainty surrounding the realization of such assets. Management periodically evaluates the recoverability of the deferred tax assets and at such time as it is determined that it is more likely than not that U.S. deferred tax assets are realizable, the valuation allowance will be reduced accordingly.

Liquidity and Capital Resources

Changes in Cash Flow

The following table summarizes our cash flows from operating, investing and financing activities for the six months ended June 30, 2014 and 2013 (in thousands):

	Six Months Ended June 30,		
	2014	2013	
Total cash provided by (used in):			
Operating activities	\$(627) \$18,043	
Investing activities	(2,876) (8,827	
Financing activities	3,237	(2,255)	
Effect of exchange rate changes on cash and cash equivalents	367	(1,129)	
Increase in cash and cash equivalents	\$101	\$5,832	

Net cash used in operating activities was \$627,000 for the six months ended June 30, 2014. Operating cash flows related primarily to a net loss of \$862,000, which included non-cash charges of \$8.4 million. In addition, there was an increase in accounts receivable of \$10.0 million. The increase in accounts receivable was primarily due to shipment linearity patterns,

where shipments were heavily weighted to the end of the quarter, as well as timing of payments at the end of the quarter. Net cash provided by operating activities was \$18.0 million for the six months ended June 30, 2013, which related primarily to net income of \$3.1 million, which included non-cash charges of \$7.9 million, and an increase in accounts payable and accrued liabilities \$4.4 million. The increase in accounts payable and accrued liabilities was primarily due to the timing of payments at the end of the period.

The decrease in operating cash flows for the six months ended June 30, 2014 compared with the six months ended June 30, 2013 relates primarily to an increase in accounts receivable of \$10.0 million for the six months ended June 30, 2014 versus an increase of only \$2.2 million for the six months ended June 30, 2013. In addition, there were substantially smaller increases in accounts payable, accrued liabilities and accrued employee compensation in the six months ended June 30, 2014 as compared with the same period in the prior year. Finally, operating cash flows for the six months ended June 30, 2014 included a net loss of \$862,000, with non-cash charges of \$8.4 million, compared with the same period in 2013 where operating cash flows included net income of \$3.1 million, with non-cash charges of \$7.9 million.

Net cash used in investing activities was \$2.9 million and \$8.8 million for the six months ended June 30, 2014 and 2013, respectively, and related primarily to capital expenditures. Capital expenditures in the six months ended June 30, 2014 and 2013 were primarily focused on investments in increased production capacity, including equipment for our manufacturing facility in San Diego, California, our contract manufacturing operations in Shenzhen, China, and our new manufacturing facility in Peoria, Arizona, as well as investments in our corporate research and development center in San Diego, California. In addition, we had an increase in restricted cash of \$2.3 million in the six months ended June 30, 2013 related to a standby letter of credit that provided financial assurance for contractual obligations. Net cash provided by financing activities was \$3.2 million for the six months ended June 30, 2014, compared with \$2.3 million used in financing activities for the same period in 2013. Net cash provided by financing activities in the six months ended June 30, 2014 primarily resulted from net proceeds on short term borrowings of \$2.1 million and cash proceeds from our stock-based compensation plans of \$1.1 million. Net cash used in financing activities in the six months ended June 30, 2013 primarily resulted from net payments on long term and short term borrowings of \$742,000, and an increase in restricted cash of \$1.8 million related to a compensating balance with the bank as collateral for the forbearance agreement.

Liquidity

As of June 30, 2014, we had approximately \$30.7 million in cash and cash equivalents, and working capital of \$68.4 million. We have a credit facility providing for a \$15.0 million revolving line of credit, of which \$3.0 million has been drawn upon and is outstanding as of June 30, 2014. Based on the events of default discussed below, the bank's obligation to extend any further credit has ceased and terminated. We currently owe \$1.4 million under the equipment term loan provided by the same credit facility.

As of June 30, 2014, the amount of cash and short-term investments held by foreign subsidiaries was \$26.7 million. If these funds are needed for our operations in the U.S. in the future, we may be required to accrue and pay taxes to repatriate these funds at a rate of approximately 5%. We intend to permanently reinvest earnings of our foreign subsidiaries.

On June 3, 2014, we filed a shelf registration statement on Form S-3 with the SEC to, from time to time, sell up to \$125 million of our common stock, warrants, debt securities or units. To date, we have not raised any funds under this shelf registration statement. In the future, we may decide to supplement existing cash and planned cash flow from operations by borrowing additional funds under existing credit facilities, or by issuing additional debt or equity.

Credit Facility

In December 2011, we obtained a secured credit facility in the form of a revolving line of credit up to a maximum of \$15.0 million (the "Revolving Line of Credit") and an equipment term loan (the "Equipment Term Loan") (together, the "Credit Facility"). In general, amounts borrowed under the Credit Facility are secured by a lien on all of our assets other than our intellectual property. In addition, under the credit agreement, we are required to pledge 65% of our equity interests in our Swiss subsidiary. We have also agreed not to encumber any of our intellectual property. The agreement contains certain restrictive covenants that limit our ability to, amongst other things; (i) incur additional indebtedness or guarantees; (ii) create liens or other encumbrances on our property; (iii) enter into a merger or similar transaction; (iv) invest in another entity; (v) declare or pay dividends; and (vi) invest in fixed assets in excess of a defined dollar amount. Repayment of amounts owed pursuant to the Credit Facility may be accelerated in the event that we are in violation of the representations, warranties and covenants made in the credit agreement, including certain financial covenants. The financial covenants that we must meet during the term of the credit agreement include quarterly minimum liquidity ratios, minimum quick ratios and EBITDA targets and an annual net income target. Borrowings under the Credit Facility bear interest, payable monthly, at either (i) the bank's prime rate or (ii) LIBOR plus 2.25%, at our option subject to certain limitations. Further, we incur an unused commitment fee, payable quarterly, equal to 0.25% per annum of the average daily unused amount of the Revolving Line of Credit. The Equipment Term Loan was available to finance 80% of eligible equipment purchases made between April 1, 2011 and April 30, 2012. During this period, we borrowed \$5.0 million under the Equipment Term Loan. In March 2014, the Company borrowed \$3.0 million under the Revolving Line of Credit, and no other amounts have been borrowed to date under the Revolving Line of Credit.

As of December 31, 2013, we were not in compliance with the financial covenant pertaining to the quarterly EBITDA target for the quarter ended December 31, 2013. As a result of this noncompliance, borrowings outstanding under the Credit Facility were classified as a current obligation in the consolidated balance sheet as of December 31, 2013. During the quarter ended March 31, 2014, we were in violation with respect to the requirement to maintain a minimum liquidity ratio at all times. On February 27, 2014, we entered into a forbearance agreement with the bank wherein the bank agreed to forbear from further exercise of its rights and remedies under the credit agreement to call our outstanding debt obligation in connection with this event of default for a period terminating on the earlier of April 30, 2014 or the occurrence of any additional events of default. The forbearance agreement also required the us to maintain at least \$1.0 million in our account maintained at the bank until the amount outstanding under the Revolving Line of Credit is repaid. On April 30, 2014, we entered into another forbearance agreement with the bank which extended the forbearance period from April 30, 2014 to June 30, 2014, or the occurrence of any additional events of default, and removed the requirement for us to maintain at least \$1.0 million in our account maintained at the bank. During the quarter ended June 30, 2014, the Company was in violation with respect to the requirement to maintain a minimum liquidity ratio at all times and the failure to maintain the required EBITDA for the quarter ended June 30, 2014. On June 30, 2014, the Company entered into another forbearance agreement with the bank which extended the forbearance period from June 30, 2014 to August 31, 2014, or the occurrence of any additional events of default. As a result of this noncompliance, the bank's obligation to extend any further credit ceased and terminated, and borrowings outstanding under the Credit Facility have been classified as a current obligation in the consolidated balance sheet as of June 30, 2014.

As of June 30, 2014, \$1.4 million was outstanding under the Equipment Term Loan and the applicable interest rate was LIBOR plus 2.25% (2.5% as of June 30, 2014). If the bank does not exercise its right to accelerate repayment of this balance after the forbearance period discussed above, under the original terms of the Credit Facility, principal and interest under the Equipment Term Loan are payable in 36 equal monthly installments such that the Equipment Term Loan is fully repaid by the maturity date of April 30, 2015, but may be prepaid in whole or in part at any time. As of June 30, 2014, \$3.0 million was outstanding under the Revolving Line of Credit and the applicable interest rate was LIBOR plus 2.25% (2.5% as of June 30, 2014). The amount outstanding under the Revolving Line of Credit is scheduled to be repaid by August 31, 2014.

Short-term and Long-term Borrowings Short-term borrowings

Maxwell's Swiss subsidiary, Maxwell SA, has a 3.0 million Swiss Franc-denominated (approximately \$3.4 million as of June 30, 2014) credit agreement with a Swiss bank, which renews semi-annually and bears interest at 1.6%. Borrowings under the short-term loan agreement are unsecured and as of June 30, 2014 and December 31, 2013, the full amount of the loan was drawn.

Maxwell SA also has a 2.0 million Swiss Franc-denominated (approximately \$2.3 million as of June 30, 2014) credit agreement with a Swiss bank, which renews annually and bears interest at 1.7%. Borrowings under the credit agreement are unsecured and as of June 30, 2014 and December 31, 2013, the full amount available under the credit line was drawn.

Maxwell SA also has a 1.0 million Swiss Franc-denominated (approximately \$1.1 million as of June 30, 2014) credit agreement with another Swiss bank, and the available balance of the line can be withdrawn or reduced by the bank at any time. As of June 30, 2014 and December 31, 2013, no amounts were drawn under the credit line. Interest rates applicable to any draws on the line will be determined at the time of draw.

Long-term borrowings

The Company has various financing agreements for vehicles. These agreements are for up to a five year repayment period with interest rates ranging from 1.9% to 5.1%. At June 30, 2014 and December 31, 2013, \$136,000 and \$179,000, respectively, was outstanding under these financing agreements.

Critical Accounting Estimates

We describe our significant accounting policies in Note 1, Description of Business and Summary of Significant Accounting Policies, of the notes to consolidated financial statements included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2013. We discuss our critical accounting estimates in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our Annual Report on Form 10-K for the fiscal year ended December 31, 2013. There have been no significant changes in our significant accounting policies or critical accounting estimates since the end of fiscal 2013.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2014-09, Revenue from Contracts with Customers ("ASU 2014-09"). The standard provides companies with a single model for accounting for revenue arising from contracts with customers and supersedes current revenue recognition guidance, including industry-specific revenue guidance. The core principle of the model is to recognize revenue when control of the goods or services transfers to the customer, as opposed to recognizing revenue when the risks and rewards transfer to the customer under the existing revenue guidance. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2016. Early adoption is not permitted. The guidance permits companies to either apply the requirements retrospectively to all prior periods presented, or apply the requirements in the year of adoption, through a cumulative adjustment. The Company is in the process of evaluating the impact of adoption on its consolidated financial statements.

Off Balance Sheet Arrangements None.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We face exposure to financial market risks, including adverse movements in foreign currency exchange rates and changes in interest rates. These exposures may change over time and could have a material adverse impact on our financial results. We have not entered into or invested in any instruments that are subject to market risk, except as follows:

Foreign Currency Risk

Our primary foreign currency exposure is related to our subsidiary in Switzerland, Maxwell SA. Maxwell SA has Euro and local currency (Swiss Franc) revenue and operating expenses, as well as local currency loans. Changes in these currency exchange rates impact the reported amount (U.S. dollar) of revenue, expenses and debt. As part of our risk management strategy, we use forward contracts to hedge certain foreign currency exposures. Our objective is to offset gains and losses resulting from these exposures with gains and losses on the forward contracts, thereby reducing volatility of earnings. We use the forward contracts to hedge certain monetary assets and liabilities, primarily receivables and payables, denominated in a foreign currency. The change in fair value of these instruments represents a natural hedge as their gains and losses partially offset the changes in the fair value of the underlying monetary assets and liabilities due to movements in currency exchange rates. As of June 30, 2014, the impact of a theoretical detrimental change in foreign currency exchange rates of 10% on the foreign currency forward contracts would result in a hypothetical loss of \$3.2 million, however, considering the offsetting impact of such a theoretical change in exchange rates on the underlying assets and liabilities being hedged, the hypothetical loss is only \$9,000, which would be recorded in income from continuing operations in the consolidated statement of operations. For local currency debt carried by our Swiss subsidiary, the impact of a hypothetical 10% detrimental change in foreign currency exchange rates would result in a hypothetical loss of \$641,000, which would be recorded in accumulated other comprehensive income on the consolidated balance sheet.

Interest Rate Risk

At June 30, 2014, we had approximately \$10.2 million in debt, \$65,000 of which is classified as long-term debt. Changes in interest rates may affect the consolidated balance sheet and statement of operations. The impact on earnings or cash flow during the next fiscal year from a change of 100 basis points (or 1%) in the interest rate would have a \$102,000 effect on interest expense.

Fair Value Risk

We had a net pension asset of \$11.1 million and \$10.6 million at June 30, 2014 and December 31, 2013, respectively. As of the last fair value measurement date of December 31, 2013, the net pension asset included plan assets with a fair value of \$43.1 million. The plan assets consisted of 57% debt and equity securities, 40% real estate and 3% of cash and cash equivalents. The fair values of debt and equity securities are determined based on quoted prices in active markets for identical assets and are subject to interest rate risk. The fair value measurement of the real estate is subject to the real estate market forces in Switzerland. We manage our risk by having a diversified portfolio.

Item 4. Controls and Procedures

We are committed to maintaining disclosure controls and procedures designed to ensure that information required to be disclosed in our periodic reports filed under the Securities and Exchange Act of 1934 (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Principal Executive Officer and Principal Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. Under the supervision and with the participation of our management, including our Principal Executive Officer and Principal Financial Officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of June 30, 2014, as such term is defined under Rule 13a-15(e) promulgated under the Exchange Act. Based on this evaluation, our Principal Executive Officer and Principal Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this Quarterly Report on Form 10-Q.

There have been no changes in our internal control over financial reporting during the quarter ended June 30, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
