Item 7.01 Regulation FD Disclosure

On October 30, 2018, EMC Insurance Group Inc. (the "Company") issued a press release announcing that third quarter 2018 results were positively impacted by an overall decline in catastrophe and storm losses and an increase in the amount of favorable development experienced on prior years' reserves. As a result, the Company expects to report net income in the range of \$0.87 to \$0.91 per share, non-GAAP operating income* in the range of \$0.46 to \$0.50 per share, and a GAAP combined ratio of approximately 100.0 percent for the third quarter of 2018.

The Company also announced an increase in 2018 non-GAAP operating income guidance from the previous range of \$0.95 to \$1.15 per share to a revised range of \$1.30 to \$1.50 per share. The press release is furnished as Exhibit 99.

*Non-GAAP operating income: One of the primary non-GAAP financial measures utilized by management for evaluating the Company's performance is operating income. Non-GAAP operating income is calculated by excluding net realized investment gains/losses and, beginning in 2018, the change in net unrealized investment gains/losses on equity investments from net income/loss. While realized investment gains/losses are integral to the Company's insurance operations over the long term, the decision to realize investment gains or losses in any particular period is subject to changing market conditions and management's discretion, and is independent of the Company's insurance operations. Prior to 2018, investments in equity investments were classified as available-for-sale and changes in unrealized investment gains/losses on equity investments were recognized in other comprehensive income. Effective January 1, 2018, the Company adopted the updated financial instruments guidance issued by the FASB, which requires changes in the unrealized investment gains/losses on equity investments to be recognized in net income/loss rather than other comprehensive income. Changes in unrealized investment gains/losses on equity investments are not predictable due to changing market conditions and are therefore also excluded from the calculation of non-GAAP operating income.
