SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE

SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2003

Commission file number 1-3677

ALCAN INC.

(Exact name of registrant as specified in its charter)

CANADA

Inapplicable

(State or Other Jurisdiction of
Incorporation or Organization)

(I.R.S. Employer Identification No.)

1188 Sherbrooke Street West, Montreal, Quebec, Canada H3A 3G2

(Address of Principal Executive Offices and Postal Code)

(514) 848-8000

(Registrant's Telephone Number, including Area Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes

No

Indicate by check mark whether the registrant is an accelerated filer (as defined in Rule 12b-2 of the Exchange Act).

Yes No

At March 31, 2003, the registrant had 321,642,094 shares of common stock (without nominal or par value) outstanding.

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2003

(Unaudited)

(in millions of US\$, except per share amounts)

1. ACCOUNTING POLICIES

The unaudited interim consolidated financial statements are based upon accounting policies and methods of their application consistent with those used and described in the Company's annual financial statements, except for the recently adopted accounting policies described below. The interim financial statements do not include all of the financial statement disclosures included in the annual financial statements prepared in accordance with Canadian generally accepted accounting principles (GAAP) and therefore should be read in conjunction with the most recent annual financial statements.

Recently Adopted Accounting Policies

Impairment of Long-lived Assets

On January 1, 2003, the Company prospectively adopted the Canadian Institute of Chartered Accountants (CICA) section 3063, Impairment of Long-lived Assets. Under this standard, an impairment loss is recognized when the carrying amount of a long-lived asset is not recoverable and exceeds its fair value. No significant impairment losses for long-lived assets were recorded in the first quarter of 2003.

Disposal of Long-lived Assets and Discontinued Operations

On January 1, 2003, the Company prospectively adopted the CICA section 3475, Disposal of Long-lived Assets and Discontinued Operations. Under this standard, a long-lived asset to be disposed of by sale is measured at the lower of its carrying amount or fair value less cost to sell and is not amortized while classified as held for sale. For a long-lived asset to be disposed of other than by sale, such as by abandonment, before

the end of its previously estimated useful life, depreciation estimates are revised to reflect the use of the asset over its shortened useful life. Also, the standard requires that the results of operations of a component of an enterprise that has been disposed of either by sale or abandonment be reported as discontinued operations. A component of an enterprise comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the enterprise. There were no disposal activities relating to long-lived assets initiated by the Company in the first quarter of 2003.

1. ACCOUNTING POLICIES (cont'd)

Guarantees

On January 1, 2003, the Company adopted the CICA accounting guideline AcG-14, disclosure of guarantees, which addresses disclosure requirements for a guarantor that issues a guarantee. See note 10 - Commitments and contingencies.

Recently Issued Accounting Policies

Asset Retirement Obligations

The CICA issued section 3110, Asset Retirement Obligations, which will be effective for the Company's fiscal year beginning on January 1, 2004. This standard establishes accounting standards for the recognition, measurement and disclosure of liabilities and the associated asset retirement cost for legal obligations associated with the retirement of a tangible long-lived asset. Under this standard, a liability would generally be recognized for such an obligation at its fair value when incurred and a corresponding asset retirement cost would be added to the carrying amount of the related asset.

2. ACCOUNTING CHANGE

Goodwill and Other Intangible Assets

On January 1, 2002, the Company adopted the CICA standard concerning goodwill and other intangible assets. Under this standard, goodwill and other intangible assets with an indefinite life are no longer amortized but are carried at the lower of carrying value and fair value. Goodwill and other intangible assets with an indefinite life are tested for impairment on an annual basis. An impairment of \$748 was identified in the goodwill balance as at January 1, 2002, and was charged to opening retained earnings in 2002 upon adoption of the accounting standard. Any further impairment arising subsequent to January 1, 2002, will be taken as a charge against income. As a result of the new standard, the Company no longer amortizes goodwill.

3. NET INCOME PER COMMON SHARE - BASIC AND DILUTED

Basic and diluted net income per common share are based on the weighted average number of shares outstanding during the period. The treasury stock method for calculating the dilutive impact of stock options is used. The following table outlines the calculation of basic and diluted net income per common share.

Edgar Filing: ALCAN INC - Form 10-Q

Three months ended March 31

2003

2002

Numerator for basic and diluted net income per common share:

Net income attributable to common shareholders

-

2

Denominator for diluted net income per common

share - adjusted weighted average of outstanding shares

322

323

Net income per common share - basic and diluted

0.04

0.26

In the first quarter, options to purchase 6,231,283 common shares (2002: 353,000) at a weighted average price of CAN\$48.79 per share (2002: CAN\$64.25) were outstanding during the period but were not included in the computation of diluted earnings per share because the options' exercise price was greater than the average price of the common shares.

As at March 31, 2003, there were 321,642,094 (2002 : 321,104,209) common shares outstanding.

4. DIFFERENCES BETWEEN CANADIAN AND UNITED STATES GENERALLY ACCEPTED ACCOUNTING PRINCIPLES

Differences relate principally to accounting for foreign currency translation, derivatives, post-retirement benefits, "available-for-sale" securities, asset retirement obligations and goodwill impairment identified as at January 1, 2002. Refer to the Company's 2002 Annual Report for an explanation of these differences.

On January 1, 2003, the Company adopted, in certain circumstances, the optional hedge accounting provisions contained in the FASB Statements Nos. 133 and 138, Accounting for Derivative Instruments and Hedging Activities. If certain conditions are met, a derivative may be specifically designated as (a) a hedge of the exposure to changes in the fair value of a recognized asset or liability or an unrecognized firm commitment, (b) a hedge of the exposure to variable cash flows of a forecasted transaction, or (c) a hedge of the foreign currency exposure of a net investment in a foreign operation, an unrecognized firm commitment, an available-for-sale security, or a foreign-currency denominated forecasted transaction. Under this statement, when the Company elects to apply hedge accounting, it is required to establish at the inception of the hedge the method it will use for assessing the effectiveness of the hedging derivative and the measurement approach for determining the ineffective aspect of the hedge. Those methods must be consistent with the Company's approach to managing risk.

Recently Adopted Accounting Standards

On January 1, 2003, the Company adopted the FASB Statement No. 143, Accounting for Asset Retirement Obligations. This statement establishes accounting standards for the recognition, measurement and disclosure of liabilities for legal obligations associated with the retirement of a tangible long-lived asset that result from its acquisition, construction, development or normal operation. Under this standard, a liability is generally recognized for such an obligation at its fair value when incurred and a corresponding asset retirement cost is added to the carrying amount of the related asset. In subsequent periods, the carrying amount of the liability is adjusted to reflect the passage of time and any changes in the timing or amount of the underlying future cash flows. The asset retirement cost is amortized to expense over the asset's useful life.

Under the FASB Statement No. 143, the Company recognized, for U.S. GAAP reporting only, additional liabilities, at fair value, of approximately \$106 as at January 1, 2003, for existing legal asset retirement obligations. Such liabilities are adjusted for accretion costs. The related asset retirement costs are capitalized as increases to the carrying amount of the associated long-lived assets and accumulated depreciation on these capitalized costs recognized. These liabilities consist primarily of environmental remediation costs, resulting from normal operations, associated with certain bauxite residue disposal sites at its alumina refineries and the disposal of certain of its spent potlining associated with smelter facilities.

As a result of the new standard, as at January 1, 2003, Property, plant and equipment - cost has been increased by \$140, Property, plant and equipment - accumulated depreciation has been increased by \$90, Deferred credits and other liabilities have been increased by \$106, Deferred income taxes have been reduced by \$17 and an after-tax charge of \$39 recorded in Net income for the cumulative effect of accounting change. The cumulative effect of accounting change related primarily to costs for spent potlining disposal for pots currently in operation. Net income for the year ended December 31, 2002 would not have been materially different if this standard had been adopted effective January 1, 2002. For the three months ended March 31, 2003, net income was reduced by \$10 due to the adoption of the standard, resulting principally from higher balance sheet translation exchange losses of \$8 relating to Deferred credits and other liabilities.

The following is a reconciliation of the aggregate carrying amount of liabilities for asset retirement obligations and the pro forma impact for the year ended December 31, 2002, as if the standard had been adopted effective January 1, 2002.

For the period ended	March 31, 2003	(pro forma) December 31, 2002
Balance - beginning of period	389	363
Liabilities incurred	3	12
Liabilities settled	(4)	(12)
Accretion expense	5	17
Exchange	27	9
Balance - end of period	420	389

On January 1, 2003, the Company prospectively adopted the FASB Statement No. 146, Accounting for Costs Associated with Exit or Disposal Activities. This standard requires that a liability associated with an exit or disposal activity be recognized when the liability is incurred rather than at the date of the Company's commitment to an exit plan.

Recently Adopted Accounting Standards (cont'd)

On January 1, 2003, the Company adopted the recognition and measurement provisions of the FASB Interpretation No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. The provisions are applied on a prospective basis to guarantees issued or modified after December 31, 2002. There were no significant guarantees issued or modified after December 31, 2002.

Recently Issued Accounting Standards

In January 2003, the FASB issued Interpretation No. 46, Consolidation of Variable Interest Entities, which applies in the first fiscal year or interim period beginning after June 15, 2003, to variable interest entities in which the Company holds a variable interest that it acquired before February 1, 2003. This Interpretation requires existing unconsolidated variable interest entities to be consolidated by their primary beneficiaries if the entities do not effectively disperse risks among parties involved. An entity that holds a significant variable interest but is not the primary beneficiary is subject to specific disclosure requirements. The Company is studying this Interpretation and has not yet determined its impact.

5. RESTRUCTURING, IMPAIRMENT AND OTHER SPECIAL CHARGES

In 2001, the Company implemented a restructuring program aimed at safeguarding its competitiveness, resulting in a series of plant sales, closures and divestments throughout the organization.

Restructuring and asset impairment charges

A schedule is provided below showing details of the provision balances and related cash payments for the restructuring and asset impairment charges relating to the 2001 restructuring program:

	Severance costs	Asset Impairment provisions	Other	Total
2001				
Charges	112	269	30	411
Cash payments - net	(7)	-	(7)	(14)
Non-cash charges	-	(269)	-	(269)

2002				
Charges	36	26	27	89
Cash payments - net	(64)	-	(1)	(65)
Non-cash charges	(6)	(26)	(7)	(39)
Provision balance as at December 31	71	-	42	113
2003				
Charges	-	1	1	2
Cash payments - net	(15)	-	(15)	(30)
Non-cash charges	-	(1)	-	(1)
Provision balance as at March 31	56	-	28	84

In the first quarter of 2003, the Company recorded charges of \$1 pre-tax for asset write-downs (Engineered Products) and \$1 pre-tax for other costs (Packaging).

In 2002, the Company recorded charges of \$89 pre-tax related to the restructuring program, which consisted of severance costs of \$36 related to workforce reductions of approximately 960 employees (Q1; nil, Q2; 300 employees, Q3; 320 employees, Q4; 340 employees), impairment of long-lived assets of \$26 and other exit costs related to the shutdown of facilities of \$27. Severance charges of \$36 (Q1; nil, Q2; 14, Q3; 6, Q4; 16) related primarily to the closure of the Burntisland facility, U.K. (Bauxite, Alumina and Specialty Chemicals, certain cable operations in North America (Engineered Products) and extrusion operations in Malaysia and light-gauge operations in Fairmont, West Virginia (Rolled Products Americas and Asia). Asset impairment charges of \$26 (Q1; 9, Q2; nil, Q3; 13, Q4; 4) related primarily to the extrusion operations in Pieve, Italy (Engineered Products) and the Borgofranco plant in Italy (Rolled Products Europe). Other exit costs of \$27 (Q1; 5, Q2; (3), Q3; (4), Q4; 29) consisted principally of closure costs of \$19 for the Burntisland facility, U.K., a loss of \$5 on the sale of the extrusion operations in Thailand that arose from the realization of deferred translation losses (Rolled Products Americas and Asia), a loss of \$4 on the sale of the rolled products circles production unit at Pieve, Italy (Rolled Products Europe), other costs of \$3 and was offset in part by income of \$4 from the write-back of excess contract loss provisions upon settlement with a customer (Engineered Products).

5. RESTRUCTURING, IMPAIRMENT AND OTHER SPECIAL CHARGES (cont'd)

In 2001, Restructuring, impairment and other special charges of \$657 pre-tax were recorded, which included restructuring and asset impairment charges of \$411 and other special charges of \$246. The charges of \$411 included severance costs of \$112, which related to workforce reductions of approximately 2,200 employees, impairment of long-lived assets of \$269 and other exit costs related to the shutdown facilities of \$30. Other special charges of \$246 related to environmental provisions for treatment costs of \$150 for stored spent potlining in Canada as well as remediation costs of \$96 for bauxite residue disposal sites in Canada and the U.K.

Workforce reductions relating to the 2001 restructuring program and subsequent terminations are as follows:

	2001	2002	First Quarter 2003	Total
Bauxite, Alumina and Specialty Chemicals	-	380	-	380
Primary Metal	500	-	-	500
Rolled Products Americas and Asia	200	250	-	450
Rolled Products Europe	400	-	-	400
Engineered Products	-	200	-	200
Packaging	800	130	-	930
Other	300	-	-	300
Planned workforce reductions	2,200	960	-	3,160
Terminations in period	400	2,500	135	3,035
Total remaining employees				125

In the context of the Company's objective of value maximization, a detailed business portfolio review was undertaken in 2001 to identify high cost operations, excess capacity and non-core products. Impairment charges arose as a result of negative projected cash flows and recurring losses, and related principally to buildings, machinery and equipment and some previously capitalized project costs.

15

16

5. RESTRUCTURING, IMPAIRMENT AND OTHER SPECIAL CHARGES (cont'd)

In 2002, the Company completed the sale of certain glass packaging operations located in Park Hills, Missouri, and Mays Landing, Williamstown and Millville, New Jersey for proceeds of \$15 equal to book value. As well, the company sold its rolled product circles production unit at its Pieve plant in Italy for proceeds of \$14 and its two Pharmatech rubber stopper and aluminum seals operations located in Salisbury, Maryland, U.S. for proceeds of \$9 equal to book value.

The restructuring program was completed in 2002, with the exception of the closure of facilities at Glasgow, U.K., which is expected to be completed in mid-2003, the shut-down of one of the two cold mills at the Fairmont, West Virginia plant in the second half of 2003, and the sales of the extrusion operations in Malaysia and the recycling operations at the Borgofranco plant in Italy, which are planned to be completed in 2003, as scheduled per the Company's plans. The closure plans include the orderly shutdown of facilities after existing customer requirements have been satisfied and in some situations, the transfer of production operations to other facilities. The provision balance of \$84 at March 31, 2003 is expected to be largely paid out in 2003.

6. INTERIM INFORMATION BY OPERATING SEGMENT

The following presents selected information by operating segment, viewed on a stand-alone basis. The operating management structure is comprised of six operating segments; Bauxite, Alumina and Specialty Chemicals; Primary Metal; Rolled Products Americas and Asia; Rolled Products Europe; Engineered Products; and Packaging. Transactions between operating segments are conducted on an arm's-length basis and reflect market prices. Thus, earnings from the Primary Metal group represent mainly profit on metal produced by the Company, whether sold to third parties or used in the Company's Rolled Products, Engineered Products and Packaging groups. Earnings from the Rolled Products, Engineered Products and Packaging groups represent only the fabricating profit on their respective products. The accounting principles used to prepare the information by operating segment are the same as those used to prepare the consolidated

financial statements of the Company except that the pension costs for the operating segments are based on the normal current service cost with all actuarial gains, losses and other adjustments being included in Intersegment and other. Some corporate office and certain other costs have been allocated to the respective operating segments. The operating segments are described below.

Bauxite, Alumina and Specialty Chemicals

Headquartered in Montreal, Canada comprising the Company's worldwide activities related to bauxite mining, alumina refining and the production of specialty chemicals. The Bauxite, Alumina and Specialty Chemicals Business Group operates and/or owns seven bauxite mines and deposits in five countries and five alumina plants in three countries.

Primary Metal

Also headquartered in Montreal, comprising smelting operations, power generation and production of primary value-added ingot in the form of sheet ingot, extrusion billet, rod and foundry ingot, as well as engineering services and trading operations for alumina and aluminum, operating or having interests in 16 smelters in seven countries.

17

6. INTERIM INFORMATION BY OPERATING SEGMENT (cont'd)

Rolled Products Americas and Asia

Headquartered in Cleveland, U.S.A. encompassing aluminum sheet and light gauge products, operating 16 plants in six countries.

Rolled Products Europe

Headquartered in Zurich, Switzerland comprising aluminum sheet, including automotive, can and lithographic sheet, plate and foil stock operating 11 plants in four countries.

Engineered Products

Headquartered in Neuhausen, Switzerland producing fabricated aluminum products, including wire and cable, components for the mass transportation, automotive, building, display, electromechanical and other industrial markets, as well as sales and service centres throughout Europe, operating 47 plants in 17 countries.

Packaging

Headquartered in Zurich, consisting of the Company's worldwide food flexible, foil, specialty, pharmaceutical and cosmetics packaging businesses, operating 76 plants in 14 countries.

Intersegment and other

This classification includes the deferral or realization of profits on intersegment sales of aluminum and alumina as well as other non-operating items.

7. STOCK OPTIONS AND OTHER STOCK-BASED COMPENSATION

The Company does not recognize compensation expense in earnings for options granted under the share option plan for employees as stock options are granted at an exercise price equal to the market price of the underlying stock on the grant date. For pro forma income purposes, the fair value of options granted is being amortized over their respective vesting periods. Pro forma net income and net income per common share - basic and diluted, as if the Company had elected to recognize compensation expense using the fair value method for all stock options is presented below:

Three months ended March 31	2003	2002
Net income as reported	13	86
Compensation expense if the fair value method was used	2	6
Pro forma net income	11	80
Net income per common share - basic and diluted - as reported	0.04	0.26
Pro forma net income per common share - basic and diluted	0.03	0.23

The compensation cost for stock-based employee compensation awards that can be settled in cash, which is based on the change in the share price during the period, is recognized in income. For the first quarter of 2003 total compensation cost for such awards was \$2 (2002: \$3).

8. INCOME TAXES

	First Quarter	
	2003	2002
Current	117	75
Deferred	24	3
	141	78

The composite of the applicable statutory corporate income tax rates in Canada is 39.1% (39.4% for 2002). In 2003, the difference between income taxes calculated at the Canadian composite rate and the amounts reported is primarily attributable to exchange. In 2002, the difference is primarily attributable to exchange and the impact of potential future tax benefits that were not recognized since their realization is not likely.

9. SUPPLEMENTARY INFORMATION

	2003	2002
Interest paid	57	57
Income taxes paid (recovered)	34	(47)
	20	

10. COMMITMENTS AND CONTINGENCIES

In 1997, as part of the claim settlement arrangements related to the British Columbia Government's cancellation of the Kemano Completion Project, the Company obtained the right to transfer a portion of a power supply contract with BC Hydro to a third party. The Company sold the right to supply this portion to Enron Power Marketing Inc. (PMI), a subsidiary of Enron Corporation (Enron) for cash consideration. In order to obtain the consent of BC Hydro to this sale, the Company was required to retain residual liability for EPMI's obligation arising from the supply contract, including in the event that EPMI became unable to perform. This contingent liability is subject to a maximum aggregate amount of \$100, with mitigation and subrogation rights. On December 2, 2001, EPMI and Enron filed for protection under Chapter 11 of the U.S. Bankruptcy Code. Powerex, the BC Hydro affiliate which now holds the rights to the power supply contract, maintains that it has terminated the power supply contract and as a result filed a claim for \$100 against Enron on March 15, 2002 as a necessary step prior to making the same claim against the Company. Enron did not respond to that claim and the Company received, on March 22, 2002, a demand for payment in the amount of \$100 from Powerex. On January 17, 2003, the Company received a decision following arbitration hearings held in December 2002, on a contractual dispute between Powerex and Alcan. The arbitrator confirmed Powerex's claim for \$100. A standstill agreement, which had been in effect, has now expired. The parties remain in discussions while taking steps to preserve their respective rights. To this end, Alcan is pursuing an application before the courts of the State of Oregon for the judicial review of the arbitrator's decision. Alcan has been advised that Powerex cannot enforce the arbitrator's decision while this application is pending. The judicial review is not expected to take place before August 2003. A provision of \$100 pre tax was recorded in the fourth quarter of 2002.

The Company has guaranteed the repayment of approximately \$6 of indebtedness by third parties. Alcan believes that none of these guarantees is likely to be invoked. These guarantees are primarily for employee housing loans and potential environmental remediation at former Alcan sites.

Alcan, in the course of its operations, is subject to environmental and other claims, lawsuits and contingencies. The Company has environmental contingencies relating to approximately 29 existing and former Alcan sites and third-party sites. Accruals have been made in specific instances where it is probable that liabilities will be incurred and where such liabilities can be reasonably estimated.

Although it is possible that liabilities may arise in other instances for which no accruals have been made, the Company does not believe that such an outcome will significantly impair its operations or have a material adverse effect on its financial position.

11. CAPITALIZATION OF INTEREST COSTS

Total interest costs in the first quarter were \$50 (2002: \$50) of which \$1 (2002: nil) was capitalized.

12. PROPOSED ACQUISITIONS

Agreements to acquire Baltek Corporation

On March 5, 2003, the Company announced that it has entered into agreements to acquire Baltek Corporation (Baltek) for approximately \$35. Under the agreements, the Company will acquire Baltek on the basis of \$15.17 per share. This reflects a premium of approximately 77% based on the 20-day average trading price to March 5, 2003. With corporate head offices in New Jersey, Baltek, the world leader in balsa-based composite materials, has production and sales facilities around the world. Baltek has operated balsa plantations in Ecuador, one of the world's largest sources of balsa wood, for nearly 60 years.

The transaction, which is subject to approval by Baltek's shareholders, has received the approval of Baltek's board of directors and the support of its major shareholders. Completion is subject to other usual conditions for a transaction of

this nature, although no clearances from anti-trust or competition authorities are required. Alcan expects the transaction to be completed in the second quarter of 2003.

Acquisition of VAW Packaging

On April 30, 2003 the Company completed the purchase of VAW Packaging group of businesses (FlexPac) from Norsk Hydro for approximately €345 million. FlexPac includes 14 plants in 8 countries and has 5,400 employees. FlexPac comprises a set of custom manufacturing businesses producing high-quality flexible packaging products for a wide variety of end-use customers and manufacturers' of consumer goods, including those in the food, dairy and pharmaceutical industries. The purchase price is subject to post-closing adjustments.

In the opinion of management, all adjustments necessary for a fair presentation of interim period results have been included in the financial statements. These interim results are not necessarily indicative of results for the full year.

Item 2. Management's Discussion and Analysis of Financial Conditions and Results of Operations.

The Company reported first quarter net income of US\$0.04 per share compared to US\$0.26 per share a year earlier and US\$0.08 per share in the fourth quarter of 2002.

The results for the first quarter of 2003 included a non-cash, after-tax charge of US\$96 million (US\$0.30 per share) for the effects of foreign currency balance sheet translation in addition to Other Specified Items, after-tax, of US\$13 million (US\$0.04 per share) that comprised mainly tax adjustments relating to prior years. Foreign currency balance sheet translation effects and Other Specified Items, after-tax, reduced earnings by US\$21 million (US\$0.07 per share) in the first quarter a year ago, and by US\$98 million (US\$0.30 per share) in the fourth quarter of 2002.

Certain terms used in this section are defined under "Definitions" below.

Consolidated Review

(US\$ millions, unless otherwise noted)	FIRST QUARTER 2003	2002	FOURTH QUARTER 2002
Sales & operating revenues	3,273	2,937	3,180
<i>Shipments (thousands of tonnes)</i>			
Ingot products ¹	338	315	396
Rolled products	511	497	503
Conversion of customer-owned metal	105	75	119
Aluminum used in engineered products & packaging	147	126	141
Total aluminum volume	1,101	1,013	1,159
Ingot product realizations (US\$ per tonne)	1,578	1,497	1,498
Average London Metal Exchange 3-month price (US\$ per tonne)	1,392	1,395	1,359
Net income	13	86	26
Included in Net income are:			
Foreign currency balance sheet translation	(96)	(14)	(12)

Other Specified Items	(13)	(7)	(86)
1			

includes primary and secondary ingot and scrap, as well as shipments resulting from trading activities

Year-over-year, sales and operating revenues for the quarter improved by 11% as a result of increased aluminum shipments and other fabricated product volumes, better ingot product realizations, the stronger Euro and a higher-value product mix, despite pricing pressure in Engineered Products and Packaging. Higher LME prices and market premiums, the stronger Euro and improved Engineered Products and Packaging volumes strengthened results compared to the fourth quarter, despite lower aluminum shipments.

Total aluminum volume of 1,101 thousand tonnes (kt) was 9% higher than a year earlier, but 5% lower than the preceding quarter. The year-over-year increase reflects the recently acquired interest in the Alouette smelter in Quebec; production restarts in Kitimat, British Columbia and in Brazil, and improved rolled product shipments in Europe and South America. Compared to the previous quarter, volume decreased as a result of seasonally lower smelter production and decreased rolled product shipments in North and South America.

Ingot product realizations of US\$1,578 per tonne increased by US\$81 per tonne from the year-ago quarter, despite a slight decrease in the London Metal Exchange (LME) price, mainly reflecting higher market premiums. Compared to the previous quarter, realizations improved by US\$80 per tonne in line with LME prices and the increase in market premiums.

For the quarter, net income of US\$13 million compared to US\$86 million in the year-ago quarter and US\$26 million in the previous quarter. The differences were largely due to the unfavourable effects of foreign currency balance sheet translation compared to both prior periods, partially offset by a decrease in Other Specified Items relative to the fourth quarter of 2002. Results compared to the year-ago quarter were positively influenced by the benefits from the Company's restructuring and merger-related synergies programs, higher overall volumes and better product mix offset by rising fuel and recycled metal costs, as well as higher depreciation expense. On a quarter-over-quarter basis, the benefits from increased sales were offset by higher fuel, recycled metal and pension expenses.

Starting in 2003, the Company presents EVA[®] as a range of numbers using two weighted average costs of capital (WACC) that are better aligned with current capital markets. This approach reflects the dynamic nature of capital costs over time and the differing methodologies used to calculate them. Prior period amounts have been restated accordingly. Since the Company uses EVA[®] as its primary measure for variable compensation, it will continue to use a fixed WACC of 10% for internal purposes.

Economic Value Added (EVA [®]) (US\$ millions)	FIRST QUARTER		FOURTH QUARTER
	2003	2002	2002
At WACC of 9%	(163)	(163)	(154)
At WACC of 8%	(127)	(127)	(118)

®

EVA is a registered trademark of Stern, Stewart & Company. There is no comparable GAAP measure.

Segment Review

Earnings before interest, taxes, depreciation and amortization (EBITDA) is a financial measure used by management for measuring the performance of the operating segments. The total EBITDA from operating segments is reconciled to net income. Reconciling items include depreciation and amortization; restructuring, impairment and other special charges; intersegment, corporate offices and other items; interest; income taxes; and minority interests. These reconciling items, except for depreciation and amortization, are not under the control of the operating segments but are managed by the Company's corporate head office, which focuses on strategy development and oversees governance, policy, legal, compliance, human resources and finance matters. Significant changes in these items are explained below under Reconciliation to Net Income.

24

(US\$ millions)	FIRST QUARTER		FOURTH QUARTER
	2003	2002	2002
Earnings before interest, taxes, depreciation and amortization (EBITDA)			
Bauxite, Alumina and Specialty Chemicals	54	64	44
Primary Metal	214	214	201
Rolled Products, Americas and Asia	80	92	95
Rolled Products, Europe	47	30	30
Engineered Products	23	27	19
Packaging	93	76	91
EBITDA from operating segments (sub-total)	511	503	480
Depreciation & amortization	(231)	(205)	(224)
Restructuring, impairment and other special charges	(2)	(14)	(42)
Intersegment, corporate offices and other	(74)	(70)	(103)
Interest	(49)	(50)	(51)
Income taxes	(141)	(78)	(30)
Minority interests	(1)	-	(4)
Net income	13	86	26

Segments

First quarter EBITDA of US\$54 million for Bauxite, Alumina and Specialty Chemicals were 16% lower than in the previous year. Benefits from cost initiatives, higher alumina realizations and favourable caustic soda prices were more than offset by increased foreign currency balance sheet translation losses and higher energy costs. Compared to the preceding quarter, EBITDA increased by 23% mainly due to higher alumina selling prices which lag the LME price by one quarter, partially offset by higher foreign currency balance sheet translation losses resulting from the quarter-to-quarter strengthening in the Canadian and Australian dollars.

For Primary Metal, EBITDA of US\$214 million for the first quarter was unchanged from the year-ago quarter and 6% higher than the preceding quarter. The results relative to both comparable periods were favourably affected by the benefits from merger synergies, restructuring programs and other profit improvement initiatives and improved ingot product realizations; offset by significantly higher foreign currency balance sheet translation charges and cost increases related to currency, fuel and pensions. Compared to the year-ago quarter, earnings also reflected higher sales

volumes from the acquisition of a 40% interest in the Alouette smelter in Quebec and production restarts, as well as increased power sales. Losses on foreign currency balance sheet translation and the currency-related increase in operating costs resulted primarily from the strengthening of the Canadian dollar during the quarter.

EBITDA for Rolled Products Americas and Asia, at US\$80 million, was 13% lower than in the previous year. Favourable volumes were more than offset by the unfavourable impact of metal price movements, recycled metal costs, and a stronger Korean won. Compared to the preceding quarter, EBITDA decreased by 16%, despite cost improvements, due to the impact of higher energy costs, unfavourable metal price lags, lower volumes and recycled metal spreads.

Driven by an 11% increase in shipments as well as the streamlining of operations, Rolled Products Europe EBITDA, at US\$47 million for the first quarter, improved substantially from the US\$30 million in the previous year. Results also increased by US\$17 million from the previous quarter due to seasonally higher volumes. Earnings relative to both prior periods benefited from a stronger Euro and continued cost improvements.

25

EBITDA for Engineered Products, at US\$23 million, was lower by 15% compared to the same quarter in 2002. Despite solid improvements in extrusion and composite volumes and a stronger Euro, EBITDA for the North American Cable business was US\$9 million lower due to weak energy cable and building wire markets. EBITDA was 21% higher than the previous quarter due to better volumes, mainly in extrusion and composite markets, and the stronger Euro; partly offset by price erosion in North American energy cable and building wire markets.

Packaging Group EBITDA, at US\$93 million, increased by US\$17 million compared to the same quarter in 2002 and was US\$2 million higher than the previous quarter. The improvement over both periods was driven by cost saving initiatives, and the positive impact of a stronger Euro which lead to higher revenues (17% increase in continuing businesses compared to the year-ago quarter).

Reconciliation to Net Income

Depreciation and amortization of US\$231 million was 13% higher than the year-ago quarter, largely due to the acquisition of Alouette, and 3% higher than the previous quarter.

"Intersegment, corporate offices and other" includes the elimination of profits on intersegment sales of aluminum as well as other non-operating items. Rising LME prices and seasonally higher inventories resulted in an unfavourable impact from such profit eliminations. Corporate office expenses decreased relative to both prior periods due to lower consulting fees, despite increases in pension costs. The fourth quarter of 2002 included a provision of US\$100 million for the previously announced ruling on a contract dispute with Powerex partially offset by a gain on the sale of more than half of the Company's portfolio investment in Nippon Light Metal Company, Ltd.

The Company's effective tax rate was 91% in the quarter, reflecting mostly the effects of foreign currency balance sheet translation and Other Specified Items. Excluding these items, the Company's effective tax rate was 36%.

Liquidity and Capital Resources

Operating Activities

Cash generated from operating activities during the first three months of 2003 increased to US\$294 million as a result of improved earnings, excluding foreign currency balance sheet translation and Other Specified Items compared to US\$258 million in the comparable period of 2002.

Financing Activities

Cash used for financing activities in the first three months of 2003 was US\$162 million compared to US\$211 million in the same period in 2002. Debt as a percent of invested capital at March 31, 2003 declined to 30%, compared to 31% at the end of the fourth quarter of 2002 and 32% for the year-ago quarter, resulting from continued financial discipline that was reflected in strong free cash flows.

There was little change in interest expense of US\$49 million.

On April 28, 2003, the Company announced a public offering issue in the United States of US\$500 million 4½% percent global notes, due May 15, 2013. Net proceeds to the Company from the sale of the notes will be used to help fund the previously announced acquisition of VAW Flexpac and to retire commercial paper.

Investment Activities

Capital expenditures during the first three months of 2003 were US\$134 million compared to US\$107 million a year earlier. Capital expenditures for the full year are expected to be below depreciation expense.

Critical Accounting Policies

The preparation of financial statements in conformity with GAAP in Canada and the United States requires management to make estimates, judgements and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. The most significant estimates are associated with the critical accounting policies relating to post-retirement benefits; environmental liabilities and contingencies; property, plant and equipment; goodwill; and income taxes. These critical accounting policies are those that are both most important to the portrayal of the Company's financial condition and results and require management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

The Company's critical accounting policies are more fully described in the Management's Discussion and Analysis, while all significant accounting policies are included in note 2 to the Consolidated Financial Statements, both contained in the 2002 Annual Report.

Cautionary Statement

Readers are cautioned that forward looking statements contained in this Management's Discussion and Analysis should be read in conjunction with "Cautionary Statement for Purposes of the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995" at Exhibit No. 99.

Definitions

"GAAP" refers to Canadian Generally Accepted Accounting Principles

The term "foreign currency balance sheet translation" means gains and losses arising from translating balance sheet items mainly in Canada and Australia (principally accounts payable, deferred credits and other liabilities, and deferred income taxes) at period-end exchange rates.

Other Specified Items include, for example: restructuring charges; asset impairment charges; unusual environmental charges; gains and losses on non-routine sales of assets, businesses or investments; gains and losses from legal claims; gains and losses on the redemption of debt; income tax adjustments related to prior years and the effects of changes in income tax rates; and other items that do not typify normal business activities.

EVA® indicates the difference between the return on capital and the cost of using that capital over the same period. See the discussion of EVA in Item 7 of the Company's 2002 Annual Report on Form 10-K.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company has estimated the potential impact of a 10% adverse change in interest rates, in foreign currency exchange rates or in aluminum prices based upon its financial instrument and derivative commodity contract positions outstanding at March 31, 2003.

Interest Rates

The impact of a 10% increase in interest rates on the Company's variable rate debt outstanding at March 31, 2003 net of its invested surplus cash and time deposits at March 31, 2003 would be to reduce net income by \$2 million. Transactions in interest rate financial instruments for which there is no underlying interest rate exposure to the Company is prohibited. For accounting policies for interest rate swaps used to hedge interest costs on certain debt, see page 45 of the Annual Report to Shareholders for the year ended December 31, 2002 "Annual Report".

Foreign Currency Exchange Rates

The effect on net income of a movement of plus or minus 10% in foreign currency exchange rates on the Company's financial instruments (principally forward and option contracts) outstanding at March 31, 2003 is detailed below*.

In millions of US\$

Currency	Plus 10% movement	Minus 10% movement
AUD	18	(19)
EUR	(23)	23
CHF	(4)	5
BRL	3	(3)
Other	2	(1)
Total	(4)	5

*Increase (decrease) net income.

Any negative impact of currency movements on the currency contracts that the Company has taken out to hedge identifiable foreign currency commitments to purchase or sell goods and services, would be offset by an equal and opposite favourable exchange impact on the commitments being hedged. Transactions in currency related financial

instruments for which there is no underlying foreign currency exchange rate exposure to the Company are prohibited. For accounting policies relating to currency contracts, see page 44 of the Annual Report.

Derivative Commodity Contracts

The effect of a reduction of 10% in aluminum prices on the Company's aluminum forward and options contracts outstanding at March 31, 2003 would be to reduce 2003 net income by approximately \$14 million, of which \$1 million relates to the net cost of option premiums and \$13 million to forward contracts (principally forward purchase contracts). These results reflect a 10% reduction from March 31, 2003, three-month LME aluminum closing price of \$1,346 and assume an equal 10% drop has occurred throughout the aluminum forward price curve existing as at March 31, 2003.

Virtually all of the Company's aluminum forward contract positions are taken out to hedge those future purchases of metal which are required for firm sales commitments to fabricated products customers. Consequently, any negative impact of movements in the price of aluminum on the forward contracts would be offset by an equal and opposite impact on the purchases being hedged.

Transactions in metal related financial instruments for which there is no underlying metal price exposure to the Company are prohibited, except for a small trading portfolio of metal forwards not exceeding 10,000 tonnes, which is marked to market. In addition, see Annual Report, pages 38 and 39.

28

Item 4. Controls and Procedures.

Within the 90-day period prior to the filing of this report, an evaluation was carried out under the supervision and with the participation of the Company's management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-14(c) under the Securities Exchange Act of 1934). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of these disclosure controls and procedures were effective. No significant changes were made in our internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation.

29

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Information called for by this Item is incorporated by reference to the first paragraph of Note 10 of Item 1, Part I of this quarterly report on Form 10-Q.

Items 2. through 5.

The registrant has nothing to report under these items.

Item 6. Exhibits and Reports on Form 8-K

(a)Exhibits

- (10) Alcan Inc. Pension Plan for Officers dated January 2003. (Filed herewith)
- (99) Cautionary statement for purposes of the "Safe Harbor" provisions of the Private Securities Litigation Reform Act of 1995. (Filed herewith)

(b)Report on Form 8-K

A report on Form 8-K was filed on January 21, 2003 under Item 5 thereof, reporting that Alcan had received a decision following arbitration on a contractual dispute between Powerex and Alcan where Powerex's claim for \$100 million was confirmed.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

CERTIFICATION

I, Travis Engen, President and Chief Executive Officer of Alcan Inc. ("Alcan"), certify that:

1. I have reviewed this quarterly report on Form 10-Q of Alcan;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;

3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:

a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;

b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and

c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):

a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

CERTIFICATION

I, Geoffery E. Merszei, Executive Vice President and Chief Financial Officer of Alcan Inc. ("Alcan"), certify that:

1. I have reviewed this quarterly report on Form 10-Q of Alcan;

2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;

3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:

a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;

b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and

c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):

a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
