Form 10-Q  
November 13, 2003

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE

SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2003

Commission file number 1-3677

ALCAN INC.

(Exact name of registrant as specified in its charter)

	<b>1188 Sherbrooke Street West, Montreal, Quebec, Canada H3A 3G2</b>	
	(Address of Principal Executive Offices and Postal Code)	

(Registrant's Telephone Number, including Area Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant is an accelerated filer (as defined in Rule 12b-2 of the Exchange Act).

Yes  No

At September 30, 2003, the registrant had 322,040,012 shares of common stock (without nominal or par value) outstanding.

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2003

(Unaudited)

(in millions of US\$, except per share amounts)

**1. ACCOUNTING POLICIES**

The unaudited interim consolidated financial statements are based upon accounting policies and methods of their application consistent with those used and described in the Company's annual financial statements, except for the recently adopted accounting policies described below. The interim financial statements do not include all of the financial statement disclosures included in the annual financial statements prepared in accordance with Canadian generally accepted accounting principles (GAAP) and therefore should be read in conjunction with the most recent annual financial statements.

Recently Adopted Accounting Policies

Impairment of Long-lived Assets

On January 1, 2003, the Company prospectively adopted the Canadian Institute of Chartered Accountants (CICA) section 3063, Impairment of Long-lived Assets, under which an impairment loss is recognized when the carrying amount of a long-lived asset held for use is not recoverable and exceeds its fair value. Under this standard, an impairment loss of \$7 and \$15 (Packaging - \$4 and \$12; Engineered Products - \$3 and \$3) was recorded in the third quarter and nine months of 2003, respectively, to reduce the carrying values of these long-lived assets to estimated fair values. Accepted valuation techniques were used to estimate fair values. The impairment losses are reported in Other expenses (income) - net, except for \$3 and \$4 for the third quarter and nine months of 2003, respectively, which are reported in Restructuring, impairment and other special charges.

Disposal of Long-lived Assets and Discontinued Operations

On January 1, 2003, the Company elected to early adopt the CICA section 3475, Disposal of Long-lived Assets and Discontinued Operations. Under this standard, a long-lived asset to be disposed of by sale is measured at the lower of its carrying amount or fair value less cost to sell, and is not amortized while classified as held for sale. Assets and liabilities classified as held for sale are reported as assets held for sale and liabilities of operations held for sale on the balance sheet. A long-lived asset to be disposed of other than by sale, such as by abandonment, before the end of its

previously estimated useful life, is classified as held for use until it is disposed of and depreciation estimates revised to reflect the use of the asset over its shortened useful life. Also, the standard requires that the results of operations of a component of an enterprise, that has been disposed of either by sale or abandonment or is classified as held for sale, be reported as discontinued operations if the operations and cash flows of the component have been, or will be, eliminated from the ongoing operations as a result of the disposal transaction and the Company will not have any significant continuing involvement in the operations of the component after the disposal transaction. A component of an enterprise comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the enterprise. Disposal activities relating to long-lived assets initiated by the Company in the second quarter of 2003 are described in note 3 - Discontinued Operations and Assets Held for Sale.

### Guarantees

On January 1, 2003, the Company adopted the CICA accounting guideline AcG-14, disclosure of guarantees, which addresses disclosure requirements for a guarantor that issues a guarantee. See note 11 - Commitments and Contingencies.

-8-

CONTENTS

---

### Recently Issued Accounting Policies

#### Asset Retirement Obligations

The CICA issued section 3110, Asset Retirement Obligations, which will be effective for the Company's fiscal year beginning on January 1, 2004. This standard establishes accounting standards for the recognition, measurement and disclosure of liabilities and the associated asset retirement cost for legal obligations associated with the retirement of a tangible long-lived asset. Under this standard, a liability would generally be recognized for such an obligation at its fair value when incurred and a corresponding asset retirement cost would be added to the carrying amount of the related asset.

#### Consolidation of Variable Interest Entities

The CICA issued accounting guideline AcG-15, Consolidation of Variable Interest Entities, which will be effective for the Company's fiscal year beginning on January 1, 2004. The Guideline provides guidance as to when to apply consolidation principles to certain entities that are subject to control on a basis other than ownership of voting shares and thus determining when an enterprise includes the assets, liabilities and results of activities of such an entity (a variable interest entity) in its consolidated financial statements.

2.

#### Goodwill and Other Intangible Assets

On January 1, 2002, the Company adopted the CICA standard concerning goodwill and other intangible assets. Under this standard, goodwill and other intangible assets with an indefinite life are no longer amortized but are carried at the lower of carrying value and fair value. Goodwill and other intangible assets with an indefinite life are tested for impairment on an annual basis. An impairment of \$748 (including \$8 relating to assets held for sale) was identified in the goodwill balance as at January 1, 2002, and was charged to opening retained earnings in 2002 upon adoption of the accounting standard. Any further impairment arising subsequent to January 1, 2002, will be taken as a charge against income. As a result of the new standard, the Company no longer amortizes goodwill.

In the second quarter of 2003, the Company committed to a plan to sell certain non-strategic Packaging operations. These businesses are classified as held for sale and are included in discontinued operations. An impairment charge of \$22, after tax, and \$135, after tax for the third quarter and nine months, respectively, was recorded in discontinued operations to reduce the carrying values of these businesses to estimated fair values less costs to sell. Accepted valuation techniques were used to estimate fair values. Certain financial information has been reclassified in the prior periods to present these businesses as discontinued operations on the income statement, as assets held for sale and liabilities of operations held for sale on the balance sheet and as cash flows from (used for) discontinued operations on the statement of cash flows. All of these divestments are expected to be completed by June 30, 2004.

-9-

CONTENTS

Selected financial information for the businesses included in discontinued operations is reported below:

<u>Periods ended September 30</u>	<u>Third Quarter</u>		<u>Nine Months</u>

CONTENTS

## 4.

Basic and diluted income from continuing operations per common share are based on the weighted average number of shares outstanding during the period. The treasury stock method for calculating the dilutive impact of stock options is used. The following table outlines the calculation of basic and diluted income from continuing operations per common share.

Periods ended September 30	Third Quarter		Nine Months	
	2003	2002	2003	2002
Numerator for basic and diluted income from continuing operations per common share:				
Income from continuing operations attributable to common shareholders	116	191	150	348
Denominator				
(number of common shares in millions):				
Denominator for basic income from continuing operations per common share - weighted average of outstanding shares	322	321	322	321
Effect of dilutive stock options	1	1	-	2
Denominator for diluted income from continuing operations per common share - adjusted weighted average of outstanding shares	323	322	322	323
Income from continuing operations per common share - basic and diluted	0.36	0.59	0.47	1.07

In the third quarter and nine months of 2003, options to purchase 3,058,425 and 7,765,925 common shares, respectively (2002: 6,249,403 and 1,016,500) at a weighted average price of CAN\$55.05 and CAN\$49.50 per share, respectively (2002: CAN\$48.79 and CAN\$60.96) were outstanding during the periods but were not included in the computation of diluted earnings per share because the options' exercise price was greater than the average price of the common shares.

As at September 30, 2003, there were 322,040,012 (2002: 321,308,059) common shares outstanding.

**ACCOUNTING PRINCIPLES (GAAP)**

Significant differences between Canadian and United States GAAP are described below:

### Derivatives

Beginning in 2001, the Company elected not to adopt the optional hedge accounting provisions of the FASB Statements Nos. 133 and 138, Accounting for Derivative Instruments and Hedging Activities. Accordingly, for U.S. GAAP reporting purposes only, beginning in 2001, unrealized gains and losses resulting from the valuation of derivatives at fair value are recognized in net income as the gains and losses arise and not concurrently with the recognition of the transactions being hedged. On January 1, 2003, the Company adopted, for certain transactions, the optional hedge accounting provisions; see "Recently Adopted Accounting Standards" below. In its primary Canadian GAAP financial statements, the Company continues to recognize the gains and losses on derivative contracts in income concurrently with the recognition of the transactions being hedged, except for certain foreign currency forward contracts and swaps that are used to hedge certain foreign currency denominated debt and foreign currency denominated loans and oil put options, which are recorded at fair value.

-11-

CONTENTS

---

### Currency translation

The difference between Deferred translation adjustments under Canadian GAAP and U.S. GAAP arises from the different treatment of exchange on long-term debt at January 1, 1983, resulting from the adoption of accounting standards on foreign currency translation on such date.

### Investments

Under U.S. GAAP, certain portfolio investments, which are considered to be "available-for-sale" securities, are measured at market value, with the unrealized gains or losses included in Comprehensive income. Under Canadian GAAP, the concept of comprehensive income does not exist and these investments are measured at cost.

### Minimum pension liability

Under U.S. GAAP, if the accumulated benefit obligation exceeds the market value of plan assets, a minimum pension liability for the excess is recognized to the extent that the liability recorded in the balance sheet is less than the minimum liability. Any portion of this additional liability that relates to unrecognized prior service cost is recognized as an intangible asset while the remainder is charged to Comprehensive income. Canadian GAAP has no such requirement to record a minimum liability and does not have the concept of comprehensive income.

### Impairment of goodwill

Under U.S. GAAP, goodwill impairment identified as at January 1, 2002 is charged to income as the cumulative effect of an accounting change. Under Canadian GAAP, an impairment loss identified as at January 1, 2002 is recognized as a charge to opening retained earnings in 2002.

### Asset retirement obligations

Under U.S. GAAP, standards are established for the recognition, measurement and disclosure of liabilities for legal obligations associated with the retirement of a tangible long-lived asset that result from its acquisition, construction, development or normal operation. A liability is generally recognized for such an obligation at its fair value when incurred and a corresponding asset retirement cost is added to the carrying amount of the related asset. In subsequent periods, the carrying amount of the liability is adjusted to reflect the passage of time and any changes in the timing or

amount of the underlying future cash flows. The asset retirement cost is amortized to expense over the asset's useful life. Under Canadian GAAP, a similar standard will be effective for the Company's fiscal year beginning on January 1, 2004.

#### Deferred translation adjustments

Under U.S. GAAP, deferred translation adjustments are reported as a component of Comprehensive income. Under Canadian GAAP, the concept of Comprehensive income does not exist and deferred translation adjustments are reported as a component of shareholders' equity.

-12-

CONTENTS

---

#### Recently Adopted Accounting Standards

On January 1, 2003, the Company adopted, for certain transactions, the optional hedge accounting provisions contained in the FASB Statements Nos. 133 and 138, Accounting for Derivative Instruments and Hedging Activities. If certain conditions are met, a derivative may be specifically designated as (a) a hedge of the exposure to changes in the fair value of a recognized asset or liability or an unrecognized firm commitment, (b) a hedge of the exposure to variable cash flows of a forecasted transaction, or (c) a hedge of the foreign currency exposure of a net investment in a foreign operation, an unrecognized firm commitment, an available-for-sale security, or a foreign-currency denominated forecasted transaction. Under this statement, when the Company elects to apply hedge accounting, it is required to establish at the inception of the hedge the method it will use for assessing the effectiveness of the hedging derivative and the measurement approach for determining the ineffective aspect of the hedge. Those methods must be consistent with the Company's approach to managing risk.

On January 1, 2003, the Company adopted the FASB Statement No. 143, Accounting for Asset Retirement Obligations. This statement establishes accounting standards for the recognition, measurement and disclosure of liabilities for legal obligations associated with the retirement of a tangible long-lived asset that result from its acquisition, construction, development or normal operation. Under this standard, a liability is generally recognized for such an obligation at its fair value when incurred and a corresponding asset retirement cost is added to the carrying amount of the related asset. In subsequent periods, the carrying amount of the liability is adjusted to reflect the passage of time and any changes in the timing or amount of the underlying future cash flows. The asset retirement cost is amortized to expense over the asset's useful life.

Under the FASB Statement No. 143, the Company recognized, for U.S. GAAP reporting only, additional liabilities, at fair value, of approximately \$106 as at January 1, 2003, for existing legal asset retirement obligations. Such liabilities are adjusted for accretion costs. The related asset retirement costs are capitalized as increases to the carrying amount of the associated long-lived assets and accumulated depreciation on these capitalized costs recognized. These liabilities consist primarily of environmental remediation costs, resulting from normal operations, associated with certain bauxite residue disposal sites at its alumina refineries and the disposal of certain of its spent potlining associated with smelter facilities.

As a result of the new standard, as at January 1, 2003, Property, plant and equipment - cost has been increased by \$140, Property, plant and equipment - accumulated depreciation has been increased by \$90, Deferred credits and other liabilities have been increased by \$106, Deferred income taxes have been reduced by \$17 and an after-tax charge of \$39 recorded in Net income for the cumulative effect of accounting change. The cumulative effect of accounting change related primarily to costs for spent potlining disposal for pots currently in operation. Net income for the year ended December 31, 2002 would not have been materially different if this standard had been adopted effective January 1, 2002. For the third quarter and nine months ended September 30, 2003, net income was reduced by \$2 and

\$24, respectively, due to the adoption of the standard, resulting principally from higher balance sheet translation exchange losses of \$18 for the nine months ended September 30, 2003, relating to Deferred credits and other liabilities.

-13-

CONTENTS

Recently Adopted Accounting Standards (cont'd)

The following is a reconciliation of the aggregate carrying amount of liabilities for asset retirement obligations and the pro forma impact for the year ended December 31, 2002, as if the standard had been adopted effective January 1, 2002.

For the period ended	September 30, 2003	(pro forma) December 31, 2002
Balance - beginning of period	389	363
Liabilities incurred	10	12
Liabilities settled	(20)	(12)
Accretion expense	15	17
Exchange	66	9
Balance - end of period	460	389

On January 1, 2003, the Company adopted the recognition and measurement provisions of the FASB Interpretation No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. The provisions are applied on a prospective basis to guarantees issued or modified after December 31, 2002. There were no significant guarantees issued or modified after December 31, 2002. See note 11 - Commitments and Contingencies.

On January 1, 2003, the Company prospectively adopted the FASB Statement No. 146, Accounting for Costs Associated with Exit or Disposal Activities. This standard requires that a liability associated with an exit or disposal activity be recognized when the liability is incurred rather than at the date of the Company's commitment to an exit plan.

On July 1, 2003, the Company adopted the FASB Statement No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities. This statement amends and clarifies financial accounting and reporting for derivatives and for hedging activities under the FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities. This standard has no impact on the Company's financial statements.

On July 1, 2003, the Company adopted the FASB Statement No. 150, Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity. This standard requires that certain financial instruments embodying an obligation to transfer assets or to issue equity securities be classified as liabilities. This standard has no impact on the Company's financial statements.

Recently Issued Accounting Standards

In January 2003, the FASB issued Interpretation 46 (FIN 46), Consolidation of Variable Interest Entities. This interpretation requires that existing unconsolidated variable interest entities be consolidated by their primary beneficiaries if the entities do not effectively disperse risks among parties involved. An entity that holds a significant variable interest but is not the primary beneficiary is subject to specific disclosure requirements. On October 9, 2003

the FASB issued FIN 46-6, whereby the effective date was deferred to December 31, 2003 for applying the provisions of FIN 46 for interests held by public entities in variable interest entities or potential variable interest entities created before February 1, 2003. For Alcan's existing assets, the Company does not expect its financial statements to be significantly impacted by Interpretation 46.

Provision balance as at September 30	40	-	25	65

In the third quarter of 2003, the Company recorded charges of \$5 pre-tax, \$3 pre-tax in Malaysia for asset writedowns (Rolled Products Americas and Asia) and \$2 pre-tax for other costs in the United Kingdom (Packaging). In the second quarter of 2003, the Company recorded a net gain of \$16 pre-tax principally for the sale of the Borgofranco power facilities in Italy (Rolled Products Europe) partly offset by other costs of \$2 pre-tax (Packaging). In the first quarter of 2003, the Company recorded charges of \$1 pre-tax for asset writedowns (Engineered Products) and \$1 pre-tax for other costs (Packaging).

CONTENTS

6.

In 2002, the Company recorded charges of \$89 pre-tax related to the restructuring program, which consisted of severance costs of \$36 related to workforce reductions of approximately 950 employees (Q1: nil, Q2: 295 employees, Q3: 315 employees, Q4: 340 employees), impairment of long-lived assets of \$26 and other exit costs related to the shutdown of facilities of \$27. Severance charges of \$36 (Q1: nil, Q2: 14, Q3: 6, Q4: 16) related primarily to the closure of the Burntisland facility, U.K. (Bauxite, Alumina and Specialty Chemicals), certain cable operations in North America (Engineered Products) and extrusion operations in Malaysia and light-gauge operations in Fairmont, West Virginia (Rolled Products Americas and Asia). Asset impairment charges of \$26 (Q1: 9, Q2: nil, Q3: 13, Q4: 4) related primarily to the extrusion operations in Pieve, Italy (Engineered Products) and the Borgofranco plant in Italy (Rolled Products Europe). Other exit costs of \$27 (Q1: 5, Q2: (3), Q3: (4), Q4: 29) consisted principally of closure costs of \$19 for the Burntisland facility, U.K., a loss of \$5 on the sale of the extrusion operations in Thailand that arose from the realization of deferred translation losses (Rolled Products Americas and Asia), a loss of \$4 on the sale of the rolled products circles production unit at Pieve, Italy (Rolled Products Europe), other costs of \$3 and was offset in part by income of \$4 from the write-back of excess contract loss provisions upon settlement with a customer (Engineered Products).

In 2001, Restructuring, impairment and other special charges of \$654 pre-tax were recorded, which included restructuring and asset impairment charges of \$408 and other special charges of \$246. The charges of \$408 included severance costs of \$111, which related to workforce reductions of approximately 2,190 employees, impairment of long-lived assets of \$268 and other exit costs related to the shutdown facilities of \$29. Other special charges of \$246 related to environmental provisions for treatment costs of \$150 for stored spent potlining in Canada as well as remediation costs of \$96 for bauxite residue disposal sites in Canada and the U.K.

Workforce reductions relating to the 2001 restructuring program are as follows:

	2001	2002	Total
Bauxite, Alumina and Specialty Chemicals	-	380	380
Primary Metal	500	-	500

Rolled Products Americas and Asia	200	250	450
Rolled Products Europe	400	-	400
Engineered Products	-	200	200
Packaging	790	120	910
Other	300	-	300
Planned workforce reductions	2,190	950	3,140

As at September 30, 2003, approximately 2,920 of a total of 3,140 employees had been terminated.

In the context of the Company's objective of value maximization, a detailed business portfolio review was undertaken in 2001 to identify high cost operations, excess capacity and non-core products. Impairment charges arose as a result of negative projected cash flows and recurring losses, and related principally to buildings, machinery and equipment and some previously capitalized project costs.

In 2002, the Company completed the sale of certain glass packaging operations located in Park Hills, Missouri, and Mays Landing, Williamstown and Millville, New Jersey for proceeds of \$15 equal to book value. As well, the Company sold its rolled product circles production unit at its Pieve plant in Italy for proceeds of \$14 and its two Pharmatech rubber stopper and aluminum seals operations located in Salisbury, Maryland, U.S. for proceeds of \$9 equal to book value.

The restructuring program was completed in 2002, with the exception of the closure of facilities at Glasgow, U.K. and the sales of the extrusion operations in Malaysia and the recycling operations at the Borgofranco plant in Italy, all of which are planned to be completed in 2003, as scheduled per the Company's plans. The closure plans include the orderly shutdown of facilities after existing customer requirements have been satisfied and in some situations, the transfer of production operations to other facilities. The provision balance of \$65 at September 30, 2003 is expected to

be largely paid out in 2003.

7.

The following presents selected information by operating segment, viewed on a stand-alone basis. The operating management structure is comprised of six operating segments; Bauxite, Alumina and Specialty Chemicals; Primary Metal; Rolled Products Americas and Asia; Rolled Products Europe; Engineered Products; and Packaging. The Company's measure of the profitability of its operating segments is referred to as business group profit (BGP). BGP comprises earnings before interest, income taxes, minority interests, depreciation and amortization and excludes certain items, such as corporate costs, restructuring, impairment and other special charges, and pension actuarial gains, losses and other adjustments, that are not under the control of the business groups or are not considered in the measurement of their profitability. These items are generally managed by the Company's corporate head office, which focuses on strategy development and oversees governance, policy, legal, compliance, human resources and finance matters. Transactions between operating segments are conducted on an arm's-length basis and reflect market prices. Thus, earnings from the Primary Metal group represent mainly profit on metal produced by the Company, whether sold to third parties or used in the Company's Rolled Products, Engineered Products or Packaging groups. Earnings from the Rolled Products, Engineered Products and Packaging groups represent only the fabricating profit on their respective products. The accounting principles used to prepare the information by operating segment are the same as those used to prepare the consolidated financial statements of the Company. The operating segments are described below.

Bauxite, Alumina and Specialty Chemicals

Headquartered in Montreal, Canada comprising the Company's worldwide activities related to bauxite mining, alumina refining and the production of specialty chemicals. The Bauxite, Alumina and Specialty Chemicals Business Group owns, or has an interest in, seven bauxite mines and deposits in five countries and five alumina plants in three countries.

Primary Metal

Also headquartered in Montreal, comprising smelting operations, power generation and production of primary value-added ingot in the form of sheet ingot, extrusion billet, rod and foundry ingot, as well as engineering services and trading operations for alumina and aluminum, operating or having interests in 16 smelters in seven countries.

Rolled Products Americas and Asia

Headquartered in Cleveland, U.S.A. encompassing aluminum sheet and light gauge products, operating 15 plants in five countries.

Rolled Products Europe

Headquartered in Zurich, Switzerland comprising aluminum sheet, including automotive, can and lithographic sheet, plate and foil stock operating 11 plants in four countries.

Engineered Products

Headquartered in Neuhausen, Switzerland producing fabricated aluminum products, including wire and cable, components for the mass transportation, automotive, building, display, electromechanical and other industrial markets, as well as sales and service centres worldwide, operating 60 plants in 20 countries.

-22-

CONTENTS

7.

Packaging

Headquartered in Zurich, consisting of the Company's worldwide food flexible, foil, specialty, pharmaceutical and cosmetics packaging businesses, operating 90 plants in 18 countries. Seven of these plants have been excluded from the operating segment information as they have been reclassified to discontinued operations and assets held for sale.

Intersegment and other

This classification includes the deferral or realization of profits on intersegment sales of aluminum and alumina, corporate office costs as well as other non-operating items.

CONTENTS

The Company does not recognize compensation expense in earnings for options granted under the share option plan for employees as stock options are granted at an exercise price equal to the market price of the underlying stock on the grant date. For pro forma income purposes, the fair value of options granted is being amortized over their respective vesting periods. The Black-Scholes valuation model is used to determine the fair value of the options granted. Pro forma net income and net income per common share - basic and diluted, as if the Company had elected to recognize compensation expense using the fair value method for all stock options, is presented below:

Periods ended September 30	Third Quarter		Nine Months	
	2003	2002	2003	2002
Net income as reported	100	191	24	348
Compensation expense if the fair value method was used	5	2	9	9
Pro forma net income	95	189	15	339

Pro forma net income per common share - basic and diluted	0.29	0.59	0.03	1.04

Edgar Filing: ALCAN INC - Form 10-Q

For stock-based employee compensation awards that can be settled in cash, the compensation cost, which is based on the change in the share price during the period, is recognized in income. For the third quarter and nine months of 2003, total compensation cost (income) for such awards was \$9 and \$14, respectively (2002: \$(5) and \$(3)).

	Third Quarter		Nine Months	
	2003	2002	2003	2002
Current	57	45	280	206
Deferred	20	19	89	59
	77	64	369	265

The composite of the applicable statutory corporate income tax rates in Canada is 39.2% (39.1% for 2002). In 2003, the difference between income taxes calculated at the Canadian composite rate and the amounts reported is primarily attributable to exchange, partly offset by lower tax rates in foreign jurisdictions. In 2002, the difference is primarily attributable to exchange.

In 1997, as part of the claim settlement arrangements related to the British Columbia Government's cancellation of the Kemano Completion Project, the Company obtained the right to transfer a portion of a power supply contract with BC Hydro to a third party. The Company sold the right to supply this portion to Enron Power Marketing Inc. (EPMI), a subsidiary of Enron Corporation (Enron) for cash consideration. In order to obtain the consent of BC Hydro to this sale, the Company was required to retain a residual obligation for EPMI's performance under the power supply contract in the event that EPMI became unable to perform, to a maximum aggregate amount of \$100, with mitigation and subrogation rights. BC Hydro assigned its rights to receive the power to BC Hydro's affiliate, Powerex Corporation (Powerex). On December 2, 2001, EPMI and Enron filed for protection under Chapter 11 of the U.S. Bankruptcy Code. Powerex alleged that the power supply contract with EPMI was terminated and that Powerex was owed a termination payment of more than \$100. On March 22, 2002 Alcan received a demand for payment in the amount of \$100 from Powerex. On January 17, 2003, an arbitrator's decision confirmed Powerex's claim for \$100. In early 2003, Alcan commenced legal proceedings in the U.S. Federal Court (Oregon) seeking judicial review of the arbitration award. Powerex also commenced a proceeding in the British Columbia Supreme Court to recognize and enforce the arbitration award. On July 10, 2003 the B.C. Supreme Court stayed the British Columbia proceedings until the U.S. Federal Court had decided the various matters before it. On September 18, 2003, a Magistrate Judge of the US Federal Court issued his recommendations. The Magistrate Judge recommended that the Company's motion for judicial review of the arbitration award be denied. On September 29, 2003, the Company filed an objection with the U.S. Federal Court objecting to the recommendations of the Magistrate Judge and Powerex shortly thereafter filed a reply to the objection. The Magistrate Judge's recommendations, the objection and the reply to the objection have been

submitted to an Article 3 judge of the U.S. Federal Court who will make the final decision. A provision of \$100 pre tax was recorded in the fourth quarter of 2002.

The Company has guaranteed the repayment of approximately \$7 of indebtedness by third parties. Alcan believes that none of these guarantees is likely to be invoked. These guarantees are primarily for employee housing loans and potential environmental remediation at former Alcan sites.

Alcan, in the course of its operations, is subject to environmental and other claims, lawsuits and contingencies. The Company has environmental contingencies relating to approximately 30 existing and former Alcan sites and third-party sites. Accruals have been made in specific instances where it is probable that liabilities will be incurred and where such liabilities can be reasonably estimated.

-26-

CONTENTS

Although it is possible that liabilities may arise in other instances for which no accruals have been made, the Company does not believe that such an outcome will significantly impair its operations or have a material adverse effect on its financial condition or liquidity in any particular reporting period. The Company does not believe that additional material losses, in excess of amounts accrued, are reasonably possible.

Total interest costs in continuing operations in the third quarter and nine months of 2003 were \$55 and \$161 respectively (2002: \$52 and \$151) of which \$3 and \$5 (2002: nil) were capitalized.

On May 1, 2003, the Company issued \$500 of 4.5% global notes due May 15, 2013.

#### 9; VAW Flexible Packaging

On April 30, 2003, the Company completed the acquisition of VAW Flexible Packaging from Norsk Hydro for a cost of \$341, subject to post-closing adjustments. The business combination is accounted for using the purchase method of accounting and the results of operations are included in the Consolidated Financial Statements since acquisition.

As part of the acquisition of VAW Flexible Packaging in the second quarter of 2003, the Company acquired, directly and indirectly, 63% of the total issued share capital of Strongpack Plc in Thailand. Strongpack is engaged in packaging businesses, providing production and processing services on all types of flexible packaging materials. On June 20, 2003, the Company acquired an additional 11% of Strongpack at a price of \$4.

Also, as part of the acquisition of VAW Flexible Packaging, the Company acquired 70% of the total issued share capital of Rotopak in Turkey. Rotopak is engaged in the food flexible packaging business. On August 28, 2003, the Company acquired an additional 30% of Rotopak at a price of \$24.

Assets acquired and liabilities assumed are:

Current assets	322
Deferred charges and other assets	1
Property, plant and equipment	261
Excess of purchase price over book value of net assets acquired	64

	648
Current liabilities	183
Debt not maturing within one year	15
Deferred credits and other liabilities	59
Minority interests	22
Fair value of net assets	369

-27-

CONTENTS

The Company is in the process of determining the allocation of the excess of the purchase price over book value of net assets acquired to the fair values of the assets acquired and liabilities assumed. For financial statements reporting purposes, the excess of purchase price over book value of net assets acquired is included in Property, plant and equipment as at September 30, 2003.

Baltek Corporation

On July 1, 2003, the Company completed the acquisition of Baltek Corporation for a cost of \$38. The business combination is accounted for using the purchase method of accounting and the results of operations are included in the Consolidated Financial Statements since acquisition.

Assets acquired and liabilities assumed are:

Current assets	31
Deferred charges and other assets	1
Property, plant and equipment	17
Excess of purchase price over book value of net assets acquired	9
	58
Current liabilities	18
Debt not maturing within one year	1
Deferred credits and other liabilities	1
Fair value of net assets	38

The Company is in the process of determining the allocation of the excess of the purchase price over book value of net assets acquired to the fair values of the assets acquired and liabilities assumed. For financial statements reporting purposes, the excess of purchase price over book value of net assets acquired is included in Property, plant and equipment as at September 30, 2003.

Aluminium Company of Malaysia / Alcan Nikkei Siam Limited

In the third quarter of 2003, the Company increased its ownership position in Aluminium Company of Malaysia from 36% to 59% by acquiring additional shares, with a value of \$30, from Nippon Light Metal Company, Ltd in exchange for its ownership in Alcan Nikkei Siam Limited in Rangsit, Thailand, with a value of \$24, and a cash payment of \$6. The sale of Alcan Nikkei Siam Limited resulted in the realization of deferred translation losses of \$13, which is recorded in Other expenses (income) - net. Aluminium Company of Malaysia is a manufacturer of light gauge aluminum products.

Uniwood/Fome-Cor

On October 6, 2003, the Company completed the acquisition of the Uniwood/Fome-Cor division of Nevamar for \$95, subject to post-closing adjustments. Uniwood/Fome-Cor is one of the largest U.S. based manufacturers of foam-based display boards, with its head offices and production facilities in Statesville, North Carolina and another production site in Glasgow, Kentucky.

Joint Venture Agreement with the Qingtonxia Aluminum Company and the Ningxia Electric Power Development and Investment Co. Ltd. in China

On October 23, 2003, the Company announced the signing of a definitive joint venture agreement with the Qingtonxia Aluminum Company and the Ningxia Electric Power Development and Investment Co. Ltd. Under the agreement the Company will invest up to \$150, following necessary regulatory approvals for a 50-percent participation and secure power supply in an existing 150-kilotonne modern pre-bake smelter located in the Ningxia autonomous region, in the Peoples' Republic of China. The agreement provides for the joint venture to obtain long-term access to dedicated power on competitive terms sufficient to meet the energy requirements of the smelter. The agreement also gives Alcan a substantial operating role and the option to acquire, through additional investment, up to 80 per cent of new 250-kilotonne potline, already under construction. The investment is expected to take place in the first quarter of 2004.

CONTENTS

---

On July 7, 2003, the Company announced its intention to launch a tender offer to acquire all of the outstanding shares, convertible debentures, Bonus Allocation Rights and American Depositary Shares (ADSs) of Pechiney. On July 7, 2003, the Company filed its offer documents relating to the initial offer with the French Conseil des marchés financiers (CMF), the French Commission des opérations de bourse (COB) and the United States Securities and Exchange Commission (SEC). On July 16, 2003, the CMF declared the Company's initial offer acceptable (*recevable*). On September 12, 2003, the Company and Pechiney reached an agreement on the terms of a revised offer. On September 15, 2003, the Company filed the offer documents for the Company's revised offer with the CMF, and on September 16, 2003, the Company filed its revised offer documents with the SEC.

On October 7, 2003, following the clearance by the COB of the documentation relating to the Company's offer in France for Pechiney and the publication in France of such documentation, the CMF published the notification of the opening of the offer. Accordingly, the French offer was open for acceptance beginning on October 7, 2003.

On October 24, 2003, following the completion by the SEC of a review of Pechiney's annual disclosure documentation, the registration statement on Form S-4 filed with the SEC in connection with the U.S. offer for Pechiney was declared effective. Accordingly, the U.S. offer was open for acceptance beginning on October 27, 2003.

On October 29, 2003, the CMF set the closing date of the Company's offer in France for Pechiney. The French offer will close on November 24, 2003. The U.S. offer will close on the same date.

The offer is conditional upon the tendering to the French offer and the U.S. offer of more than 50% of the total share capital and voting rights in Pechiney, calculated on a fully diluted basis.

In the offers, the Company is offering to exchange for each Pechiney Common Share, each 10 Pechiney Bonus Allocation Rights (each Pechiney Bonus Allocation Right entitling the holder to 0.1 of a Pechiney Common Share) or each 2 Pechiney ADS (each Pechiney ADS representing one-half of one Pechiney Common Share) tendered:

- €24.60 in cash, and
- the number of the Company's Common Shares equal to 22.9 divided by the "Reference Value", defined as the greater of (a) 27.4 and (b) an average trading price of the Company's Common Shares to be determined before the open of the fifth French trading day before the expiration of the offers, this average being referred to as the "Average Value", and provided, however, that this number of the Company's Common Shares shall in no event be less than 0.6001.

The Company reserves the option to substitute an equivalent amount of cash in place of all or a portion of the Company's Common Shares to be issued as consideration in the offers, valued at the Average Value. The Company will announce before the opening in Paris of the fifth French trading day (November 17, 2003) prior to the last day of the offer period, the Average Value of the Company's Common Share for the purposes of the offers, as well as any decision to exercise its cash substitution option.

The Company is also offering to exchange €83.40 in cash for each Pechiney OCEANE (*obligations à option de conversion en actions nouvelles et/ou d'échange en actions existantes*) tendered.

If, following the conclusion of the U.S. offer and the French offer (including any subsequent offering period), the number of Pechiney securities tendered into the offers represents more than 95% of the capital and voting rights of Pechiney, the Company will provide the following additional consideration to the tendering Pechiney securityholders:

- €1 for each Pechiney Common Share, each 10 Pechiney Bonus Allocation Rights or each 2 Pechiney ADSs tendered
- €0.10 for each Pechiney Bonus Allocation Right tendered
- €0.50 for each Pechiney ADS tendered
- €0.40 for each Pechiney OCEANE tendered.

-29-

## CONTENTS

As of September 30, 2003, the total number of outstanding Pechiney common shares was 83,076,971, of which 4,767,044 were owned by Pechiney and one of its subsidiaries. As of September 30, 2003, the total number of outstanding OCEANES was 7,908,636.

In connection with this transaction, the Company has entered into a bridge credit facility permitting borrowing in the amount of up to \$4,000, which may be used to finance the acquisition of the Pechiney securities pursuant to the offers and to refinance certain debt of Pechiney.

Pechiney is an international group listed on the Paris and New York Stock exchanges. Its three core businesses are primary aluminum, aluminum conversion and packaging. Pechiney employs 34,000 employees.

In the opinion of management, all adjustments necessary for a fair presentation of interim period results have been included in the financial statements. These interim results are not necessarily indicative of results for the full year.

-30-

## CONTENTS

### Item 2. Management's discussion and analysis of financial conditions and results of operations

The Company reported third quarter income from continuing operations of US\$0.36 per share versus US\$0.59 per share a year ago and US\$0.07 per share in the second quarter of 2003.

Edgar Filing: ALCAN INC - Form 10-Q

Income from continuing operations for the third quarter of 2003 included a non-cash, after-tax charge of US\$8 million (US\$0.02 per share) for the effects of foreign currency balance sheet translation as compared to a gain of US\$55 million (US\$0.17 per share) in the year-ago quarter. Also included in income from continuing operations for the third quarter of 2003 was an after-tax net charge of US\$25 million (US\$0.08 per share) from Other Specified Items. Other Specified Items included the realization of deferred translation losses of US\$13 million on the sale of a subsidiary in Thailand and after-tax charges of US\$7 million for environmental provisions related to certain operations in the United States and Switzerland.

Foreign currency balance sheet translation effects and Other Specified Items, after-tax, resulted in a net gain of US\$39 million (US\$0.12 per share) in the third quarter of 2002, and a net charge of US\$120 million (US\$0.37 per share) in the second quarter of 2003. Other Specified Items of US\$16 million in the year-ago quarter were mainly related to an asset impairment charge and increases to legal provisions. Other Specified Items in the second quarter of 2003 comprised mainly after-tax gains of US\$41 million for the sale of non-core assets in Italy and a remaining portfolio investment in Japan, partially offset by US\$8 million of after-tax charges for plant closures. In the first quarter, Other Specified Items were US\$13 million after tax (US\$0.04 per share) and comprised mainly tax adjustments relating to prior years.

The terms "foreign currency balance sheet translation" and Other Specified Items" are defined under "Definitions" below.

After including results from discontinued operations, the Company reported net income of US\$100 million (US\$0.31 per share) for the quarter, compared to net income of US\$191 million (US\$0.59 per share) in the year-ago quarter and a net loss of US\$89 million (US\$0.28 per share) in the second quarter of 2003.

## Continuing operations

Sales and operating revenues of US\$3.5 billion in the third quarter benefited from the acquisitions of packaging (VAW FlexPac) and composite (Baltek) businesses, higher metal prices and the strengthening of the Euro. Increased third-party shipments of alumina and aluminum, together with better pricing, also contributed to the improvement over the year-ago quarter. While revenues were higher than in the second quarter of 2003, they were nonetheless affected by the summer slow-down in Europe and softer demand for rolled products in the United States.

Total aluminum volume of 1,146 thousand tonnes (kt) was 15 kt higher than a year earlier but 9 kt lower than the preceding quarter. The year-over-year increase reflects incremental volume arising from the acquisition of the second tranche of the Alouette smelter in Quebec and production restarts in Kitimat, British Columbia, partially offset by lower rolled product volumes in Europe due to business exits. Compared to the second quarter, increased third-party shipments of ingot were more than offset by the seasonal decline in rolled and fabricated product demand in Europe and weaker rolled product volumes in the United States.

Ingot product realizations, at US\$1,552 per tonne, were US\$57 per tonne higher than in the year-ago quarter largely reflecting the benefit of higher LME prices. Compared with the second quarter, realizations declined US\$18 per tonne due to lower market premia and a changed sales mix.

Income from continuing operations was US\$118 million, down US\$74 million from the year-ago quarter. Benefits from cost reduction initiatives and improved prices were more than offset by higher pension, fuel and recycled metal costs, higher depreciation expense and the negative impact of foreign currency balance sheet translation, which represented a loss of US\$8 million in the third quarter of 2003 versus a gain of US\$55 million a year earlier. Income from continuing operations rose by US\$94 million compared to the second quarter of 2003, which was negatively impacted by foreign currency balance sheet translation losses of US\$146 million.

-32-

CONTENTS

## Discontinued operations

In line with its objective of maximizing value, the Company decided in the second quarter to sell certain non-strategic Packaging operations in order to release cash for higher value-adding opportunities. A re-evaluation of the expected proceeds on sale versus the book value of these assets resulted in an additional non-cash, after-tax impairment charge of US\$22 million in the third quarter. Net of an after-tax operating profit of \$4 million, the loss from discontinued operations in the third quarter was \$18 million.

SEGMENT REVIEW

<b>Income from continuing operations</b>	<b>118</b>	<b>192</b>	<b>155</b>	<b>351</b>	<b>24</b>

## Segments

Business group profit (BGP) comprises earnings before interest, taxes, depreciation and amortization excluding certain items, such as corporate costs and asset impairments, that are not under the control of the business groups.

These items are managed by the Company's head office, which focuses on strategy development and oversees governance, policy, legal, compliance, human resources and finance matters.

Third quarter BGP of US\$72 million for Bauxite, Alumina and Specialty Chemicals was 8% lower than the previous year. Benefits from cost initiatives and higher alumina realizations were more than offset by increased foreign currency balance sheet translation losses, higher energy costs and the impact of currency movements on operating costs. Compared to the second quarter, BGP was up by 20% mainly due to higher realizations on alumina sales and the negative impact of foreign currency balance sheet translation in the earlier quarter.

For the Primary Metal Group, BGP was US\$239 million for the third quarter, up US\$7 million year-over-year. The benefits from ongoing profit improvement initiatives, higher metal realizations and sales volumes more than offset the negative impact of strengthening local currencies, on both costs and balance sheet translation, as well as higher raw material and pension costs. BGP increased by 41% over the second quarter, reflecting the ongoing benefits of profit improvement initiatives, higher sales volumes, marginally better metal realizations, and the absence of foreign currency balance sheet translation losses, which were US\$27 million in the earlier quarter.

-33-

CONTENTS

---

BGP for Rolled Products Americas and Asia, at US\$86 million, was unchanged from the previous year's third quarter. Ongoing benefits from cost initiatives and the positive impact of metal pricing lags were offset by lower volumes in North America and lower recycled metal spreads. Compared to the preceding quarter, BGP declined by 8% as the positive impact of metal pricing lags and improving recycled metal spreads were more than offset by lower volumes and an unfavorable product mix in North America.

Rolled Products Europe achieved a BGP of US\$46 million in the third quarter, representing an improvement of US\$9 million over the year-ago quarter. Earnings benefited from an enhanced product mix, continued cost discipline and the stronger Euro. Compared to the record second quarter, BGP decreased by US\$11 million mainly due to lower volumes resulting from the effects of the normal summer slow-down and tightening market conditions.

Despite continued economic weakness, Engineered Products posted a BGP of US\$28 million, which was 22% higher than the year-ago quarter and 33% above the second quarter of 2003. Cost-reduction initiatives, the successful integration of the Baltek acquisition, and a stronger Euro were the main factors contributing to the improved results. Composites and cable businesses recorded solid profit improvements over both the year-ago quarter and second quarter of 2003, and profits from extrusion operations were up year over year. Automotive and transportation segments and service centers continue to be affected by weak demand. Subsequent to quarter-end, Alcan added to its composites portfolio with the acquisition of Uniwood/Fome-Cor, a manufacturer of foam-based display boards.

Packaging BGP was US\$102 million in the third quarter, US\$19 million ahead of the previous year, largely due to the FlexPac acquisition. Despite the adverse impact of volume weakness, results continue to improve, driven by benefits arising from foreign currency exchange, business disposals, merger synergies and restructuring programs. Packaging sales and operating revenues for the third quarter, at US\$849 million, were 23% higher than a year earlier. The sharp increase reflected the FlexPac acquisition and the impact of the stronger Euro, partially offset by lower volumes. Compared to both the year-ago quarter and second quarter of 2003, demand across most segments of the flexible packaging market was markedly lower due to seasonal factors and customer de-stocking.

Reconciliation to Net income

"Intersegment, corporate offices and other" includes the elimination of profits on intersegment sales of aluminum, as well as other non-operating items. The increase of US\$64 million from the year-ago quarter reflects the impact of

higher pension costs, environmental provisions and the restructuring of businesses in Southeast Asia that resulted in the realization of a deferred translation loss of US\$13 million on the sale of a subsidiary in Thailand. This sale completes the restructuring that started in the second quarter with the disposal of the Company's remaining portfolio investment in Nippon Light Metal Company, Ltd., which generated a gain of US\$33 million.

Restructuring, impairment and other special charges for the third quarter arose mainly from operations in the United Kingdom and Malaysia. The second quarter of 2003 included a gain on sale of non-core assets in Italy amounting to US\$18 million.

Depreciation and amortization of US\$237 million was US\$30 million higher than in the year-ago quarter largely due to the impact of the stronger Euro, the purchase of FlexPac and increased ownership in the Alouette smelter. Compared to the second quarter of 2003, depreciation was US\$6 million higher due in large part to the FlexPac acquisition.

The Company's effective tax rate on income from continuing operations was 40% in the quarter and 69% for the first nine months of the year, reflecting the effects of balance sheet translation and Other Specified Items. Included in the quarter's results was the realization of a non-tax deductible deferred translation loss on the sale of the Company's subsidiary in Thailand. Currency-related items increased the effective tax rate by 7 percentage points for the quarter and 39 percentage points for year to date.

#### Liquidity and Capital Resources

##### Operating Activities

Cash generated from operating activities during the first nine months of 2003 amounted to US\$1,190 million compared to US\$1,078 million in the comparable period of 2002. The improvement mainly reflects ongoing efforts to reduce operating working capital levels, which have declined \$74 million in the first nine months of 2003.

-34-

CONTENTS

---

##### Financing Activities

Cash used for financing activities in the first nine months of 2003 was US\$241 million compared to US\$378 million in the same period in 2002. In the second quarter of 2003, the Company issued US\$500 million of 4.5% global notes due May 15, 2013. Net proceeds were used to fund the acquisition of VAW FlexPac and retire commercial paper.

With debt of \$3,931 million at the end of the third quarter, debt as a percentage of invested capital was 31% as compared to 32% at both the end of the second quarter of 2003 and the end of the year-ago third quarter. Debt as a percent of invested capital does not have a uniform definition. Because other issuers may calculate debt as a percent of invested capital differently, our calculation may not be comparable to other issuers' calculations. The reconciliations of borrowings, equity and total invested capital in the table below are presented to explain our calculation. The figure is calculated by dividing borrowings into total invested capital. Total invested capital is equal to the sum of borrowings and equity. Borrowings is the sum of the amounts for short-term borrowings, debt maturing within one year, debt not maturing within one year and debt of operations held for sale. Equity is the sum of the amounts for common shareholders' equity, redeemable non-retractable preference shares and minority interests. Minority interests, which represent the equity in the Company's consolidated subsidiaries that is owned by third parties, are included in equity as the Company believes that, for purposes of calculating debt as a percent of invested capital, minority interests have characteristics that are more similar to equity than to debt. Minority interests do not have characteristics such as fixed payment terms or interest terms that are associated with debt. The full amount of debt of consolidated

subsidiaries is included in borrowings and accordingly, equity, for purposes of calculating debt as a percent of invested capital, includes both the Company's equity in consolidated subsidiaries and the minority interest shareholders' equity in the Company's consolidated subsidiaries. The Company believes that debt as a percent of invested capital can be a useful supplemental measure of the Company's financial leverage because it indicates the extent to which it is financed by debtholders. The measure is widely used to assess the relative amounts of capital put at risk by debtholders and equity investors.

(US\$ millions, unless otherwise noted)	30 September 2003	2002	30 June 2003
Debt			
Short-term borrowings - continuing operations	385	384	348
Short-term borrowings - discontinued operations	(4)	2	-
Debt maturing within one year	181	612	235
Debt not maturing within one year	3,369	3,042	3,517
Debt	3,931	4,040	4,100
Equity			
Minority interest	148	139	195
Redeemable non-retractable preference shares	160	160	160
Common shareholders' equity	8,556	8,366	8,431
Equity	8,864	8,665	8,786
Total invested capital	12,795	12,705	12,886
Debt as a percent of invested capital (%)	31%	32%	32%

Interest expense of US\$52 million was unchanged from the year-ago quarter and US\$4 million lower than in the preceding quarter.

#### Investment Activities

Capital expenditures during the first nine months of 2003 were US\$578 million compared to US\$413 million a year earlier. The increase principally reflects the impact of exchange rates and accelerated spending for the expansion of the Alouette smelter in Quebec, in which Alcan has a 40% interest. Capital expenditures for the full year are expected to be below depreciation expense.

#### Commitments and Contingencies

The Company, in the course of its operations, is subject to environmental and other claims, lawsuits and contingencies. The Company has environmental contingencies relating to approximately 30 existing and former Alcan sites and third-party sites. Accruals have been made in specific instances where it is probable that liabilities will be incurred and where such liabilities can be reasonably estimated.

Although it is possible that liabilities may arise in other instances for which no accruals have been made, the Company does not believe that such an outcome will significantly impair its operations or have a material adverse effect on its financial condition or liquidity in any particular reporting period. The Company does not believe that additional material losses, in excess of amounts accrued, are reasonably possible.

#### Critical Accounting Policies

The preparation of financial statements in conformity with GAAP in Canada and the United States requires management to make estimates, judgements and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. The most significant estimates are associated with the critical accounting policies relating to post-retirement benefits; environmental liabilities and contingencies; property, plant and equipment; goodwill; and income taxes. These critical accounting policies are those that are both most important to the portrayal of the Company's financial condition and results and require management's most difficult, subjective or complex judgements, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

The Company's critical accounting policies are more fully described in the Management's Discussion and Analysis, while a description of significant accounting policies is included in note 2 to the Consolidated Financial Statements, both contained in the Form 10-K/A for the year ended December 31, 2002, filed with the Securities and Exchange Commission on September 11, 2003, (the "Form 10-K/A").

#### Cautionary Statement

Statements made in this quarterly report which describe the Company's or management's objectives, projections, estimates, expectations or predictions of the future may be "forward-looking statements" within the meaning of securities laws, which can be identified by the use of forward-looking terminology such as "believes," "expects," "may," "will," "should," "estimates," "anticipates" or the negative thereof or other variations thereon. The Company cautions that, by their nature, forward-looking statements involve risk and uncertainty and that the Company's actual actions or results could differ materially from those expressed or implied in such forward-looking statements or could affect the extent to which a particular projection is realized. Important factors which could cause such differences include global supply and demand conditions for aluminum and other products, aluminum ingot prices and changes in raw materials' costs and availability, changes in the relative value of various currencies, cyclical demand and pricing within the principal markets for the Company's products, changes in government regulations, particularly those affecting environmental, health or safety compliance, economic developments, relationships with and financial and operating conditions of customers and suppliers, the effects of integrating acquired businesses and the ability to attain expected benefits and other factors within the countries in which the Company operates or sells its products and other factors relating to the Company's ongoing operations including, but not limited to, litigation, labour negotiations and fiscal regimes.

#### Definitions

"GAAP" refers to Canadian Generally Accepted Accounting Principles.

The term "foreign currency balance sheet translation" means gains and losses arising from translating balance sheet items mainly in Canadian and Australian dollars (principally accounts payable, deferred credits and other liabilities, and deferred income taxes) at period-end exchange rates.

Other Specified Items include, for example: restructuring charges; asset impairment charges; unusual environmental charges; gains and losses on non-routine sales of assets, businesses or investments; gains and losses from legal claims; gains and losses on the redemption of debt; income tax adjustments related to prior years and the effects of changes in

income tax rates; and other items that do not typify normal business activities.

CONTENTS

### Item 3. Quantitative and Qualitative Disclosures about Market Risk

#### Interest Rates

The impact of a 10% increase in interest rates on the Company's variable rate debt outstanding at September 30, 2003 net of its invested surplus cash and time deposits at September 30, 2003 would be to reduce net income for 2003 by \$1 million. Transactions in interest rate financial instruments for which there is no underlying interest rate exposure to the Company are prohibited. For accounting policies for interest rate swaps used to hedge interest costs on certain debt, see page 34 of the Form 10-K/A.

#### Currency Derivatives

The schedule below presents fair value information and contract terms relevant to determining future cash flows categorized by expected maturity dates of the Company's currency derivatives (principally forward and option contracts) outstanding at September 30, 2003.

In US\$ millions, except for  
average contract rate

		2003	2004	2005	2006	2007	2008	2009	Total nominal amount	Fair value
To purchase USD against the foreign currency										
CHF	Nominal amount	26	41	31	18	2	1	1	120	(7)
	Average contract rate	1.452	1.415	1.357	1.312	1.287	1.261	1.238		
To sell USD against the foreign currency										
EUR	Nominal amount	1,131	-	-	-	-	-	-	1,131	16
	(1) Average contract rate	1.176	-	-	-	-	-	-		
AUD	Nominal amount	60	147	-	-	-	-	-	207	38
	Average contract rate	0.529	0.550	-	-	-	-	-		
GBP	Nominal amount	10	4	6	-	-	-	-	20	1
	Average contract rate	1.598	1.420	1.555	-	-	-	-		
To sell EUR against the foreign currency

	Average contract rate	1.436	1.369	1.383	-	-	-	-		

(1) Option contracts to purchase EUR for the anticipated acquisition of Pechiney

CONTENTS

The Company changed the disclosure alternative for reporting currency derivatives in the second quarter of 2003 from sensitivity analysis to fair value presentation. Information for the Company's currency derivatives outstanding as at December 31, 2002 is presented below for comparative purposes. The reason for the change is that the fair value presentation provides greater detail regarding the Company's currency derivatives.

In US\$ millions, except for  
average contract rate

		2003	2004	2005	2006	2007	2008	2009	Total nominal amount	Fair value
To purchase USD against the foreign currency										
CHF	Nominal amount	60	18	5	3	-	-	-	86	(5)
	Average contract rate	1.085	1.460	1.203	1.190	-	-	-		
GBP	Nominal amount	15	-	-	-	-	-	-	15	(1)
	Average contract rate	1.541	-	-	-	-	-	-		
To sell USD against the foreign currency										
AUD	Nominal amount	186	122	-	-	-	-	-	308	9
	Average contract rate	0.532	0.550	-	-	-	-	-		
BRL	Nominal amount	29	-	-	-	-	-	-	29	(1)
	Average contract rate	3.400	-	-	-	-	-	-		
To purchase EUR against the foreign currency										
GBP	Nominal amount	22	1	-	-	-	-	-	23	-
	Average contract rate	0.641	0.637	-	-	-	-	-		
To sell EUR against the foreign currency										
USD	Nominal amount	231	16	4	4	3	2	-	260	(10)
	Average contract rate	0.977	0.953	0.959	0.960	0.963	0.968	-		
CHF	Nominal amount	128	-	-	-	-	-	-	128	-
	Average contract rate	1.457	-	-	-	-	-	-		

Any negative impact of currency movements on the currency contracts that the Company has taken out to hedge identifiable foreign currency commitments to purchase or sell goods and services, would be offset by an equal and opposite favourable exchange impact on the commitments being hedged. Transactions in currency related financial instruments for which there is no underlying foreign currency exchange rate exposure to the Company are prohibited. For accounting policies relating to currency contracts, see page 33 of the Form 10-K/A.

#### Derivative Commodity Contracts

The effect of a reduction of 10% in aluminum prices on the Company's aluminum forward and options contracts outstanding at September 30, 2003 would be to reduce net income over the period ending December 2009 by approximately \$1 million, relating to forward contracts (principally forward purchase contracts). These results reflect a 10% reduction from the September 30, 2003, three-month LME aluminum closing price of \$1,421

and assume an equal 10% drop has occurred throughout the aluminum forward price curve existing as at September 30, 2003.

-38-

CONTENTS

---

Virtually all of the Company's aluminum forward contract positions are taken out to hedge those future purchases of metal which are required for firm sales commitments to fabricated products customers. Consequently, any negative impact of movements in the price of aluminum on the forward contracts would be offset by an equal and opposite impact on the purchases being hedged.

Transactions in metal related financial instruments for which there is no underlying metal price exposure to the Company are prohibited, except for a small trading portfolio of metal forwards not exceeding 10,000 tonnes, which is marked to market. In addition, see the Form 10-K/A, pages 21 and 22.

Item 4. Disclosure Controls and Procedures

As of September 30, 2003, an evaluation was carried out under the supervision and with the participation of the Company's management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of these disclosure controls and procedures were effective.
