PERVASIP CORP.

Notes To Condensed Consolidated Financial Statements (Unaudited)

Note 1-Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and in accordance with the rules and regulations of the Securities and Exchange Commission for Form 10-Q. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three-month period ended February 28, 2011 are not necessarily indicative of the results that may be expected for the year ended November 30, 2011. For further information, refer to the consolidated financial statements and footnotes thereto included in our Annual Report on Form 10-K for the year ended November 30, 2010.

Note 2 – Going Concern Matters and Realization of Assets

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the ordinary course of business. However, we have sustained substantial losses from operations in recent years and we have negative working capital and a stockholders' equity deficiency. In addition, we are experiencing difficulty in generating sufficient cash flow to meet our obligations and sustain our operations. We have been unable to provide our Chief Executive Officer and our Chief Information Officer with the cash compensation levels that we agreed to pay them. If either officer ceases to work for us, we may have to discontinue our operations. We expect our operating losses and cash deficits to continue until we are able to generate sufficient revenues to cover our operating costs. We need to raise additional cash through some combination of borrowings, sales of equity or debt securities or sales of assets to enable us to meet our cash requirements.

We may not be able to raise sufficient additional debt, equity or other cash on acceptable terms, if at all. Failure to generate sufficient revenues, achieve certain other business plan objectives or raise additional funds could have a material adverse effect on our results of operations, cash flows and financial position, including our ability to continue as a going concern, and may require us to significantly reduce, reorganize, discontinue or shut down our operations.

In view of the matters described above, recoverability of a major portion of the recorded asset amounts shown in the accompanying balance sheet is dependent upon continued operations of our company which, in turn, is dependent upon our ability to meet our financing requirements on a continuing basis, and to succeed in our future operations. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or amounts and classification of liabilities that might be necessary should we be unable to continue operating. Management's plans include:

1. Seeking to raise \$150,000 in debt or equity in the near term, and additional equity later in the year. With additional cash available to us, we can cover monthly cash losses and allocate funds toward marketing our products to achieve additional sales and consequently cut monthly operating losses.
2. Seeking to raise debt or equity to replace our current lender. Our lender has come to terms with a non-affiliated strategic investor (the "Investor") to sell all of our debt at a discount of approximately 75%. The Investor, our lender and we have signed a purchase and assignment agreement that requires the Investor to make a down payment of \$200,000 and then monthly payments over a 24-month period to purchase half of our debt for \$1,625,000. The

agreement also grants an option to the Investor, which expires on February 28, 2012, to purchase the remaining half of our debt for \$1,625,000. Among other things, the agreement prevents our lender from attempting to collect any payments from us or from attempting to foreclose on our assets, as long as the Investor continues to make the specified monthly payments. We believe the Investor has sent a first payment of \$100,000 and plans to remit an additional payment that will render the agreement effective. The Investor has indicated to us that they will restructure such debt in a manner that is significantly favorable to us; however, there can be no assurance that they will do so.

3. Continuing to develop new uses and distribution channels for our voice-over-IP-enabled mobile phone service ("Mobile VoIP"). Our Mobile VoIP product currently runs on several Nokia smart phones. It is also an application that can be downloaded to hundreds of mobile devices, and industry analysts estimate that more than 100 million of such devices are currently in use by consumers.

4. Continue to develop new distribution channels for the Worldgate Ojo Vision VoIP video phone. We estimate that positive cash flow from operations will be reached upon the addition of 5,000 video phone customers utilizing our VoIP service. We sell this product on various web sites, through agents and through a multi-level marketing firm.

There can be no assurance that we will be able to achieve our business plan objectives or that we will achieve or maintain cash-flow-positive operating results. If we are unable to generate adequate funds from operations or raise additional funds, we may not be able to repay our existing debt, continue to operate our network, respond to competitive pressures or fund our operations. As a result, we may be required to significantly reduce, reorganize, discontinue or shut down our operations. Our financial statements do not include any adjustments that might result from this uncertainty.

Note 3 – Recent Accounting Pronouncements

In December 2010, the Financial Accounting Standards Board ("FASB") issued accounting standard ASU 2010-28, "Intangibles-Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts (a consensus of the FASB Emerging Issues Task Force)." ASU 2010-28 provides amendments to Topic 350 that modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. As a result, goodwill impairments may be reported sooner than under current practice. ASU 2010-28 is effective for fiscal years and interim periods within those years, beginning after December 15, 2010, with early adoption not permitted. We do not expect that the adoption of ASU 2010-28 will have a material impact on our consolidated results of operation and financial condition.

In December 2010, FASB issued accounting standard ASU 2010-29, "Business Combinations (Topic 805): Disclosure of Supplementary Pro Forma Information for Business Combinations (a consensus of the FASB Emerging Issues Task Force)." ASU 2010-29 provides amendments to subtopic 805-10 of the FASB ASC, that requires a public entity to disclose pro forma information for business combinations that occurred in the current reporting period. ASU 2010-29 is effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010, with early adoption permitted. We do not expect that the adoption of ASU 2010-28 will have a material impact on our consolidated results of operation and financial condition.

Note 4-Major Customers

During the three-month periods ended February 28, 2011 and 2010, one customer accounted for approximately 27% and 15% of our revenues, respectively. At February 28, 2011 and November 30, 2010, monies owed to us from our major customer accounted for 15% and 5%, respectively, of our total accounts receivable balances.

Note 5-Net Loss Per Common Share

Basic loss per common share is calculated by dividing net loss by the weighted average number of common shares outstanding during the period.

Approximately 4,627,000 and 16,879,000 shares of common stock issuable upon the exercise of our outstanding stock options or warrants were excluded from the calculation of diluted net loss per share for the three-month periods ended February 28, 2011 and February 28, 2010, respectively, because the effect would be anti-dilutive.

Note 6-Risks and Uncertainties

We have created a proprietary Internet Protocol ("IP") telephony network and have transitioned from being a reseller of traditional wireline telephone services into a voice over IP service provider to take advantage of the network cost savings that are inherent in an IP network and the growth of the mobile IP industry. While the IP telephony business continues to grow, we face strong competition. We have built our IP telephony business with significantly less financial resources than many of our competitors. The survival of our business currently is dependent upon the success of our IP operations. Future results of operations involve a number of risks and uncertainties. Factors that could affect future operating results and cash flows and cause actual results to vary materially from historical results include, but are not limited to:

- The availability of additional funds to successfully pursue our business plan;
- The cooperation of our lender, which has not demanded repayment of our debt that was due in September 2010;
 - The cooperation of industry service partners that have signed agreements with us;
- Our ability to market our services to current and new customers and to generate customer demand for our products and services in the geographical areas in which we operate;
- The impact of changes the Federal Communications Commission or State Public Service Commissions may make to existing telecommunication laws and regulations, including laws dealing with Internet telephony;
 - Our ability to comply with provisions of our financing agreements;
 - The highly competitive nature of our industry;
- The acceptance of telephone calls over the Internet by mainstream consumers;
 - Our ability to retain key personnel;
- Our ability to maintain adequate customer care and manage our churn rate;
- The impact of adverse tax or regulatory rulings or actions affecting our operations, including the imposition of taxes, fees and penalties;
- Our ability to maintain, attract and integrate internal management, technical information and management information systems;
 - Our ability to manage rapid growth while maintaining adequate controls and procedures;
- The availability and maintenance of suitable vendor relationships, in a timely manner, at reasonable cost;
 - The decrease in telecommunications prices to consumers; and
 - General economic conditions.

Note 7-Stock-Based Compensation Plans

We issue stock options to our employees, consultants and outside directors pursuant to stockholder-approved and non-approved stock option programs and record the applicable expense in accordance with the authoritative guidance of the Financial Accounting Standards Board. This expense is a non-cash expense and it derives from the issuance of stock options, stock purchase warrants and restricted stock (see Note 13). For the three-month periods ended February 28, 2011 and February 28, 2010, we recorded approximately \$24,000 and \$20,000, respectively, in employee stock-based compensation expense, which was included in our selling, general and administrative expenses. As of February 28, 2011, there was approximately \$126,000 of unrecognized stock-compensation expense that will be expensed over the next two years.

Note 8-Accounts Payable and Accrued Expenses

At February 28, 2011 and November 30, 2010, included in the caption accounts payable and accrued expenses, were liabilities of approximately \$796,000 for items in conjunction with transactions related to the sale of former subsidiaries. We believe the total remaining liability is significantly less, based upon public disclosures made by the entity that purchased our former subsidiaries. However, the purchaser has not confirmed the reduction to us directly and, accordingly, we have not reduced the amount of the liability. One of our former subsidiaries filed for bankruptcy protection on September 23, 2008, and is now in a Chapter 7 liquidation. We believe the bankruptcy filing further decreases our potential liability to the purchaser. However, there can be no assurance that we will be successful in reducing such potential liabilities and, ultimately, we may have to pay such amounts.

Note 9-Defined Benefit Plan

We sponsor a defined benefit plan covering a number of former employees. Our funding policy with respect to the defined benefit plan was to contribute annually not less than the minimum required by applicable law and regulation to cover the normal cost and to fund supplemental costs, if any, from the date each supplemental cost was incurred. Contributions are intended to provide not only for benefits attributable to service to date, but also for those expected in the future.

We do not expect to make the required quarterly contributions to the defined benefit plan in fiscal 2011 and we reported to the Pension Benefit Guarantee Corporation ("PBGC") that we were unable to pay all the required quarterly contributions in fiscal 2009 and that the plan no longer can make monthly pension payments to the plan participants. Beginning in October 2010, the PBGC has funded the pension payments due to the plan participants.

Note 10 – Principal Financing Arrangements

The following table summarizes components of long-term debt and capital lease obligations as of February 28, 2011 and November 30, 2010:

	Feb. 28, 2011	Nov. 30, 2010	Interest Rate	
Principal lender:				
Note dated November 30, 2005	\$2,289,224	\$2,261,281	5.25	%
Note dated May 31, 2006	1,662,350	1,642,059	5.25	%
Note dated September 28, 2007	5,266,564	5,153,932	9.75	%
Note dated May 28, 2008	2,320,846	2,230,658	20.00	%
Note dated October 29, 2008	1,460,031	1,414,968	15.00	%
Note date February 15, 2009	811,653	792,164	20.00	%
Note dated October 6, 2009	12,010	11,634	5.25	%
Note dated November, 2009	53,506	52,849	5.25	%
Total principal lender debt	13,876,184	13,559,545		
Short-term borrowings	493,668	487,576	12.00% - 24.00	%
Capital lease obligations	69,058	83,457	12.00% - 17.00	%

Total	\$14,438,910	\$14,130,578
-------	--------------	--------------

Debt with Principal Lender

As of February 28, 2011 and November 30, 2010, we owed our principal lender \$13,876,184 and \$13,559,545, respectively. All of such debt became due by its terms on September 30, 2010. We have not made payments of principal or interest when due, and we are in default of our agreements with our principal lender. In connection with this debt, in prior years, we had issued warrants to our lender. During the year ended November 30, 2010, the warrants were cancelled by the lender. In connection with the financings, we agreed, so long as 25% of the principal amount of the financings is outstanding, to certain restrictive covenants, including, among others, that we will not declare or pay any dividends; issue any preferred stock that is subject to mandatory redemption prior to the one year anniversary of the maturity date, as defined in the agreement; redeem any of our preferred stock or other equity interests; dissolve, liquidate or merge with any other party unless, in the case of a merger, we are the surviving entity; materially alter or change the scope of our business; incur any indebtedness except as defined in the agreement; or assume, guarantee, endorse or otherwise become directly or contingently liable in connection with any other party's obligations. To secure the payment of all obligations to the lender, we entered into a master security agreement that assigns and grants to the lender a continuing security interest and first lien on all of our assets and the assets of our subsidiaries.

Short-Term Borrowings and Capital Lease Obligations

We are in default on substantially all of our capital lease obligations and we have recorded such obligations as current obligations. Short-term borrowings include demand notes from our chief executive officer of \$473,141, at annual interest rates ranging from 12% and 24% and convertible debentures outstanding of \$20,527, at annual interest rates ranging from 6% to 12%.

The convertible debentures consist of a \$50,000 convertible debenture that we issued in exchange for a \$50,000 cash payment, and three debentures, which we issued in the aggregate total of \$93,170, in exchange for a reduction in notes and trade payables that totaled \$93,170. Conversion features allow the holders to convert into shares of our common stock at a discount to the trading price of our common stock, ranging from 10% to 50%. We can pre-pay any portion of the debentures at any time at a 15% to 25% premium to the principal amount that is retired. From December 1, 2010 to April 15, 2011 we issued a total of 5,358,606 shares of our common stock for debt conversions to pay approximately \$92,000 in debt. We determined that the conversion option should be classified as a derivative liability as the number of shares issuable pursuant to the conversion option is undeterminable. The derivative liability was calculated using the Black Scholes method over the expected terms of the convertible debentures, with a risk free rate of .14% and volatility of 327%. At February 28, 2011, the aggregate derivative liability for the convertible debentures was adjusted to a marked to market value of \$61,374, using the Black Scholes method.

Note 11-Income Taxes

At November 30, 2010, we had net operating loss carryforwards for federal income tax purposes of approximately \$34,000,000 that expire in the years 2011 through 2030. We have provided an allowance for the full value of the related deferred tax asset since it is more likely than not that none of such benefit will be realized. Utilization of the net operating losses may be subject to annual limitation provided by Section 382 of the Internal Revenue Code and similar State provisions.

Note 12 – Related Party Transactions

In connection with use of software development costs, we paid fees to a third-party intellectual property development firm (the “Consultant”) for the three-month periods ended February 28, 2011 and 2010 of \$48,000 and \$63,000, respectively. One of our officers has performed work for the Consultant, including the function of distributing such funds to appropriate vendors. Our officer received fees from the Consultant of \$15,000 during the three-month period ended February 28 2010. The fees for services performed by the Consultant were deemed to be operating costs.

At February 28, 2011, we owed our chief executive officer was approximately \$690,000 for loans he provided to the Company, unpaid salary and unpaid business expenses. Our chief executive officer also participated in private placements to purchase 1,250,000 shares of common stock and warrants to purchase 2,500,000 shares of common stock at a price of \$0.10 per share, for a total cost of \$125,000 during the period of January 2011 to March 2011. In addition, on April 14, 2011, our chief executive officer sold three demand notes that we issued to him, totaling \$50,000, to a third-party investor for a price of \$50,000. The third-party investor also received conversion rights to convert the debt into our common stock at a 45% discount to its trading price. Our chief executive officer lent us the \$50,000 he received from the third-party investor and we issued him a \$50,000 demand note, with interest payable at 24% per annum.

Note 13 – Equity

During the first quarter of fiscal 2011, we issued stock and warrants to purchase stock in conjunction with a private placement of securities. In December 2010, we issued 200,000 shares of common stock and a warrant to purchase 400,000 shares of common stock at a price of \$0.10 per share, to an employee for an aggregate purchase price of \$20,000. In January 2011, we issued 350,000 shares of common stock and a warrant to purchase 700,000 shares of common stock at a price of \$0.10 per share, to our chief executive officer for an aggregate purchase price of \$35,000. In March 2011, we issued 900,000 shares of common stock and a warrant to purchase 1,800,000 shares of common stock at a price of \$0.10 per share, to our chief executive officer for an aggregate purchase price of \$90,000.

In December 2010, we issued 75,000 shares of common stock, at a price of \$0.10 per share, in conjunction with the exercise of stock options granted under our equity incentive plans.

From December 1, 2010 to April 15, 2011 we issued 6,982,980 shares of our common stock to settle notes and trade payables totaling approximately \$112,000.

Note 14 – Fair Value

The Fair Value Measurements Topic of the FASB Accounting Standards Codification establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to measurements involving significant unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the company has the ability to access at the measurement date.

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 inputs are unobservable inputs for the asset or liability.

Under the Fair Value Measurements Topic of the FASB Accounting Standards Codification, we base fair value on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is our policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements, in accordance with the fair value hierarchy. Fair value measurements for assets and liabilities where there exists limited or no observable market data and, therefore, are based primarily upon management's own estimates, are often calculated based on current pricing policy, the economic and competitive environment, the characteristics of the asset or liability and other such factors. Therefore, the results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. Additionally, there may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows that could significantly affect the results of current or future value.

Derivative Liability

The table below presents the amounts of liabilities measured at fair value on a recurring basis as of February 28, 2011 and November 30, 2010.

The fair value of the derivatives that are traded in less active over-the counter markets are generally measured using pricing models with market observable inputs such as interest rates and equity index levels. These measurements are classified as Level 2 within the fair value of hierarchy.

	Total	(Level 1)	(Level 2)	(Level 3)
February 28, 2011				
Derivative liability	\$61,374	-	\$61,374	-
November 30, 2010				
Derivative liability	\$70,519	-	\$70,519	-

Item 2. Management's Analysis and Discussion of Financial Condition and Results of Operations

The statements contained in this Report that are not historical facts are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to our financial condition, results of operations and business, which can be identified by the use of forward-looking terminology, such as "estimates," "projects," "plans," "believes," "expects," "anticipates," "intends," or the negative thereof or other variations thereon, or by discussions of strategy that involve risks and uncertainties. Management wishes to caution the reader of the forward-looking statements that such statements, which are contained in this Report, reflect our current beliefs with respect to future events and involve known and unknown risks, uncertainties and other factors, including, but not limited to, economic, competitive, regulatory, technological, key employee, and general business factors affecting our operations, markets, growth, services, products, licenses and other factors discussed in our other filings with the Securities and Exchange Commission, and that these statements are only estimates or predictions. No assurances can be given regarding the achievement of future results, as actual results may differ materially as a result of risks facing us, and actual events may differ from the assumptions underlying the statements that have been made regarding anticipated events. Factors that may cause our actual results, performance or achievements, or industry results, to differ materially from those contemplated by such forward-looking statements include, without limitation those factors set forth under Note 6 – Risks and Uncertainties.

These forward-looking statements are subject to numerous assumptions, risks and uncertainties that may cause our actual results to be materially different from any future results expressed or implied by us in those statements. These risk factors should be considered in connection with any subsequent written or oral forward-looking statements that we or persons acting on our behalf may issue. All written and oral forward looking statements made in connection with this Report that are attributable to us or persons acting on our behalf are expressly qualified in their entirety by these cautionary statements. Given these uncertainties, we caution investors not to unduly rely on our forward-looking statements. We do not undertake any obligation to review or confirm analysts' expectations or estimates or to release publicly any revisions to any forward-looking statements to reflect events or circumstances after the date of this Report or to reflect the occurrence of unanticipated events. Further, the information about our intentions contained in this Report are statements of our intentions as of the date of this Report and are based upon, among other things, the existing regulatory environment, industry conditions, market conditions and prices, the economy in general and our assumptions as of such date. We may change our intentions, at any time and without notice, based upon any changes in such factors, in our assumptions or otherwise.

Overview

We are a provider of video and voice over Internet Protocol, or VoIP, telephony services. We provide these services using a proprietary Linux-based, open-source softswitch, which utilizes an Internet Protocol ("IP") telephony product. IP telephony is the real time transmission of voice communications in the form of digitized "packets" of information over the Internet or a private network, which is analogous to the way in which e-mail and other data is transmitted. We provide our IP telephone services primarily on a wholesale basis to other service providers, such as cable operators, Internet service providers, WiFi and fixed wireless broadband providers, data integrators, value-added resellers, and satellite broadband providers. Our technology also works efficiently over mobile phone networks. In lieu of routing a call from a mobile phone over the voice side of a mobile phone network, we route the call over the data side of the network. The data side of the mobile phone network is simply another avenue upon which we can run our IP telephony services. It is a low-cost method of delivering telephone service. We believe it will attract a significant number of subscribers to our service from the large and more expensive mobile phone carriers. We refer to our use of the data side of mobile phone networks as voice-over-IP enabled mobile phone service ("Mobile VoIP").

The continued growth in both mobile telephone services and VoIP telephone services has resulted in a new Mobile VoIP market. Adding VoIP to mobile telephone services allows subscribers to make inexpensive VoIP calls from

their mobile phones instead of using costly airtime minutes. We have an easy-to-download VoIP application that enables users to make low-cost VoIP calls over our IP network all over the world. The application can be downloaded to hundreds of handset models, including Symbian, Windows Mobile, iPhone, Maemo, Android and Palm handsets with 3G or WiFi coverage. The user needs to have a data plan that allows the handset to surf the Internet. Without the data connection, a VoIP application will not work. We sell the VoIP application to consumers who are looking to save money on wireless telephone service but do not want to buy a new mobile phone, or decide they cannot buy one because they are in a contract with a mobile service carrier. Our VoIP application comes with a variety of features, such as its own telephone number and voice mail to distinguish it from the other phone number(s) the consumer may have ringing to his or her smart phone.

Today we support thousands of active users around the world through our wholesale channel and our direct-to-consumer channel. We have built a privately-managed, state-of-the-art global telecommunications platform using IP technology and we offer a broad suite of private label VoIP products and services, as well as a back-office platform. Our operations management tools include, among others: account provisioning; e-commerce-based payment processing systems; billing and account management; operations management; web development; network management; and customer care. Based on our customizable VoIP solutions, our wholesale customers can offer private label video and voice-over-IP services to their own customer bases under their own brand name, a “white-label” brand (in which no brand name is indicated and different customers can offer the same product), or our own brand, which is VoX Communications. We are able to provide customized solutions that other VoIP providers, with more financial resources, are not able to provide. For example, for customers who use the Ojo Vision Digital Video Phone on our network, we can provide video voice mail, simultaneous ringing (for example, dial one number and ten phones in ten locations ring at the same time), video ads to consumers, photo ads to consumers, and video calling without the one- or two-second delay that other carriers experience. We are able to provide our services at a cost per user that is generally lower than that charged by traditional service providers because we minimize our network costs by using efficient packet-switched technology and interconnecting to a wide variety of termination options, which allows us to benefit from pricing differences between vendors to the same termination points.

Plan of Operation

Our objective is to build a profitable worldwide video and voice communications IP telephone company on a stable and scalable platform with minimal network costs. We intend to provide the best possible voice and video products and services, at an affordable price, to businesses and residential consumers and enhance the ways in which these customers connect, communicate and collaborate with each other on a worldwide basis. We want to be known for our high quality of service, robust features and ability to deliver any new product to a wholesale customer or a web store without delay.

Specific strategies to accomplish this objective include:

- Capitalize on our technology expertise to support new products and features. Our proprietary VoIP technology gives us the ability to offer leading-edge services and control our product development cycle. Our ability to quickly test new IP devices on our network, including video softphones, IPTV, WiFi-enabled VoIP phones and Mobile VoIP phones, allows us to continuously offer the best and newest products as they become available. We are not dependent upon one or two device manufacturers, which has resulted in considerable cost savings, greater capacity and flexibility per port, and the ability to provide convergent solutions with new features, services and service creation capabilities in a timely manner.
- Focus on offering enhanced calling features to Video calling services. The video phone that we support contains compression technology that allows us to provide real-time video calling with very efficient bandwidth usage. Our ability to customize the video phone to the needs of wholesale customers, such as sending video ads to the phone, allowing simultaneous ringing to more than one video phone, allowing our video customers to make calls to video phones on a competitors’ network, or routing certain calls to a switch specified by the customer, has allowed us to enter discussions and attract customers in several instances where our competitors had no solutions to offer.
- Continue to utilize back-office automation. We believe that to achieve our objective we need to have “cradle to grave” automation of our back-office web and billing systems. We have written our software for maximum automation, flexibility and changeability. We know from experience in provisioning complex telecom orders that back-office automation is a key factor in keeping overhead costs low. Technology continues to work 24 hours a day and we believe that the fewer people a company has in the back office, the more efficiently it can run, which should drive down the cost per order.

Our approach to VoIP does not require expensive network equipment to provide telephony services. Instead we rely on our proprietary software and a “server cluster” or “server farm” architecture. Unlike the typical telecom model where one large expensive machine performs almost every task, we have a server farm comprised of a cluster of Dell servers and Cisco routers, where each machine performs a different task and has from one to three backup machines to ensure that services never go down. By not relying on the equipment and related software of telecom equipment vendors, we are able to control our own destiny and scale without the limitations and delays associated with equipment financing, installation and the integration of new machines and source code updates that equipment vendors impose on VoIP carriers. Our philosophy is that VoIP is an application and should be treated the same way that companies such as Google, Inc. process their data. Consequently, data servers and routers are the appropriate vehicle on which to process our VoIP calls.

Three Months Ended February 28, 2011 vs. Three Months Ended February 28, 2010

Our revenue for the three-month period ended February 28, 2011 decreased by approximately \$55,000, or approximately 15%, to approximately \$320,000 as compared to approximately \$375,000 reported for the three-month period ended February 28, 2010. The decrease in our revenues resulted from the loss of our largest customer in December 2009.

For the three-month period ended February 28, 2011, our gross profit amounted to approximately \$122,000, which was an increase of approximately \$59,000 from the gross profit of approximately \$63,000 reported in the three-month period ended February 28, 2010. Although we had a reduction of revenue due to the loss of our largest customer, we were able to reduce our cost of completing calls to phone numbers that are not on our network and to increase some of the fees we charge to our customers.

Selling, general and administrative expenses decreased by approximately \$147,000, or approximately 25%, to approximately \$436,000 for the three-month period ended February 28, 2010 from approximately \$583,000 reported in the same prior-year fiscal period. We made significant reductions to our salary and consulting expense for the period resulting in a saving of approximately \$137,000.

Interest expense increased by approximately \$154,000 to approximately \$482,000 for the three months ended February 28, 2011 as compared to approximately \$328,000 for the three months ended February 28, 2010. The increase was attributable to higher debt balances, including the additional notes payable that we issued in the fourth quarter of fiscal 2010 and the first quarter of fiscal 2011.

A mark-to-market adjustment for derivative liabilities resulted in other income for the three-month period ended February 28, 2011 of approximately \$8,000, which was primarily due to a decrease in the per share market value of our common stock at February 28, 2011, in comparison to the per share value when the liabilities were incurred. There was no income or expense for mark-to-market adjustment in the three-month period ended February 28, 2010.

Liquidity and Capital Resources

At February 28, 2011, we had cash and cash equivalents of approximately \$26,000 and negative working capital of approximately \$16,829,000.

Net cash used in operating activities aggregated approximately \$155,000 and \$124,000 in the three-month periods ended February 28, 2011 and February 28, 2010, respectively. The principal use of cash for the quarter ended February 28, 2011 was the loss from operations of approximately \$314,000, which was offset in part by an increase in accounts payable and accrued expense of approximately \$105,000. The principal use of cash for the quarter ended February 28, 2010 was a loss from operations of approximately \$520,000, which was offset in part by an increase in accounts payable and accrued expense of approximately \$243,000.

Net cash provided by financing activities aggregated approximately \$149,000 and \$90,000 in the three-month periods ended February 28, 2011 and February 28, 2010, respectively. In fiscal 2011, cash provided by financing activities resulted from proceeds of stock issuances of \$85,000 and short-term borrowings. In fiscal year 2010, cash provided by financing activities resulted from short-term loans and proceeds from the exercise of options and issuance of stock.

For the three months ended February 28, 2011 and 2010, we had no capital expenditures. We do not expect to make equipment purchases in the second fiscal quarter of 2011. We expect that any capital expenditures over the next 12 months will relate primarily to a continued roll-out of our IP telephony network for our video-over-IP products and our ability to obtain financing.

The accompanying financial statements have been prepared in conformity with generally accepted accounting principles, which contemplate continuation of our company as a going concern. However, we have sustained net losses from operations during the last three years, and we have limited liquidity. Management anticipates that we will be dependent, for the near future, on additional capital to fund our operating expenses and anticipated growth and the report of our independent registered public accounting firm for the year ended November 30, 2010 expresses doubt about our ability to continue as a going concern. Our operating losses have been funded through the issuance of equity securities and borrowings, including borrowings from our primary lender on eight separate occasions over the past six years and funding from our chief executive officer. Although we are not yet profitable and we are not generating cash from operations, our lender has indicated verbally that it plans to continue to be cooperative with us, although it cannot provide us with any additional funding. Our lender, up to this point in time, has not been requiring any payments of interest and principal on a monthly basis and has not demanded repayment. We need immediate funding in order to continue our business operations. Our lender has been speaking with potential investors since October 2010 in an effort to sell, at a discounted price, the debt that we owe to our lender. We anticipate that any investor that purchases such debt will also want to fund our company's operations going forward so that the investment it made in purchasing the debt from our lender would not become worthless. Our lender has come to terms with a non-affiliated strategic investor (the "Investor") to sell all of our debt at a discount of approximately 75%. The Investor, our lender and we have signed a purchase and assignment agreement that requires the Investor to make a down payment of \$200,000 and then monthly payments over a 24-month period to purchase half of our debt for \$1,625,000. The agreement also grants an option to the Investor, which expires on February 28, 2012, to purchase the remaining half of our debt for \$1,625,000. Among other things, the agreement prevents our lender from attempting to collect any payments from us or from attempting to foreclose on our assets, as long as the Investor continues to make the specified monthly payments. We believe the Investor has sent a first payment of \$100,000 and plans to remit an additional payment that will render the agreement effective. The Investor has indicated to us that they will restructure such debt in a manner that is significantly favorable to us; however, there can be no assurance that they will do so. While we continually look for other financing sources, in the current economic environment, the procurement of outside funding is extremely difficult and there can be no assurance that such financing will be available or, if available, that such financing will be at a price that will be acceptable to us. Failure to generate sufficient revenues, raise additional capital, or renegotiate payment terms of our debt will have an adverse impact on our ability to achieve our longer-term business objectives, and will adversely affect our ability to continue operating as a going concern.

Item 4. Controls and Procedures

(a) Disclosure Controls and Procedures. Our management, with the participation of our chief executive officer/chief financial officer, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this Report. Based on such evaluation, our chief executive officer/chief financial officer has concluded that, as of the end of such period, for the reasons set forth below, our disclosure controls and procedures were not effective.

(b) Internal Control Over Financial Reporting. There have not been any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the first quarter of fiscal 2011 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Under the supervision and with the participation of our chief executive officer/chief financial officer, management has evaluated internal control over financial reporting by the Company using the framework for effective internal control established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Management assessed the effectiveness of our internal control over

financial reporting as of February 28, 2011. During the course of this assessment, management identified material weaknesses relating primarily to:

- recording complex financial transactions, primarily in the analysis and calculation of debt financings, transaction involving taxes and the issuance of warrants and options.
-

We have a lack of staffing within our accounting department, both in terms of the small number of employees performing our financial and accounting functions and their lack of experience to account for complex financial and taxation transactions. This lack of staffing continued throughout fiscal 2010 and as of the date of this Report. Management believes the lack of qualified accounting and financial personnel amounts to a material weakness in our internal control over financial reporting and, as a result, at February 28, 2011 and on the date of this Report, our internal control over financial reporting is not effective. We will continue to evaluate the employees involved, the need to engage outside consultants with accounting and tax expertise to assist us in accounting for complex transactions and the hiring of additional accounting staff. However, we will be unable to remedy this material weakness in our internal controls until we have the financial resources that allow us to hire additional qualified employees.

Our management, including our chief executive officer/chief financial officer, does not expect that our disclosure controls and procedures or our internal control over financial reporting are or will be capable of preventing or detecting all errors or all fraud. Any control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements, due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns may occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of any evaluation of controls effectiveness to future periods are subject to risk.

PERVASIP CORP.

PART II-OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

In December 2010, we issued 200,000 shares of restricted common stock and warrants to purchase 400,000 shares of common stock in conjunction with a private placement. The shares were issued in reliance on the exemption from registration provided by Section 4(2) of the Securities Act of 1933 (the "Act").

In the period January through March 2011, we issued 1,250,000 shares of restricted common stock and warrants to purchase 2,500,000 shares of common stock to our chief executive officer in conjunction with a private placement. The shares were issued in reliance on the exemption from registration provided by Section 4(2) of the Act.
