Item. 2.02 Results of Operations and Financial Condition

Edgar Filing: BNP RESIDENTIAL PROPERTIES INC - Form 8-K

In late January 2005, BNP Residential Properties, Inc. acquired Boddie Investment Company ("BIC") in exchange for shares of our common stock valued at \$8.2 million. As a result of this acquisition, in addition to other significant assets, we acquired certain economic interests in three limited partnerships:

- o Marina Shores Associates One Limited Partnership ("Marina Shores Partnership") - 50% interest as general partner;
- o The Villages of Chapel Hill Limited Partnership ("Villages Partnership") - 1% interest as general partner; and
- o The Villages of Chapel Hill - Phase 5 Limited Partnership ("Villages - Phase 5 Partnership") - 1% interest as general partner.

We described this transaction, along with our accounting treatment for our general partner interests in each of these partnerships, in detail in our Current Report on Form 10-Q for the quarterly period ended March 31, 2005.

You should read the following discussion in conjunction with our Current Report on Form 10-Q for the quarterly period ended March 31, 2005.

Since release of our first quarter 2005 10-Q, we have received numerous requests from members of the investment community for additional information regarding the impact of including the accounts of the Marina Shores Partnership and the Villages Partnership in our consolidated financial statements for the first time in that report. We are providing the following supplemental summary consolidating information in response to those requests.

Funds from Operations

Funds from operations is frequently referred to as "FFO." FFO is defined by the National Association of Real Estate Investment Trusts ("NAREIT") as "net income (computed in accordance with generally accepted accounting principles), excluding gains (losses) from sales of property, plus depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures." Our calculation of FFO is consistent with FFO as defined by NAREIT. Because we hold all of our assets in and conduct all of our operations

Edgar Filing: BNP RESIDENTIAL PROPERTIES INC - Form 8-K

through the operating partnership, we measure FFO at the operating partnership level (i.e., before minority interest in the operating partnership).

Historical cost accounting for real estate assets implicitly assumes that the value of real estate assets diminishes predictably over time. In fact, real estate values have historically risen or fallen with market conditions. FFO is intended to be a standard supplemental measure of operating performance that excludes historical cost depreciation from - or "adds it back" to - GAAP net income. We consider FFO to be useful in evaluating potential property acquisitions and measuring operating performance.

Funds from operations does not represent net income as defined by generally accepted accounting principles. You should not consider FFO to be an alternative to net income as a reliable measure of the company's operating performance. Further, FFO as disclosed by other REITs might not be comparable to our calculation of FFO.

The following table provides consolidating information underlying our calculation of FFO of the operating partnership included in our Current Report on Form 10-Q for the period ended March 31, 2005 (all amounts in table and accompanying footnotes in thousands):
