PART 1 – FINANCIAL INFORMATION

ITEM 1 – FINANCIAL STATEMENTS

EVANS BANCORP, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

THREE MONTHS ENDED MARCH 31, 2013 AND 2012

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies followed by Evans Bancorp, Inc. (the “Company”), a financial holding company, and its two direct, wholly-owned subsidiaries: (i) Evans Bank, National Association (the “Bank”), and the Bank’s subsidiaries, Evans National Leasing, Inc. (“ENL”), Evans National Holding Corp. (“ENHC”) and Suchak Data Systems, LLC (“SDS”); and (ii) Evans National Financial Services, LLC (“ENFS”), and ENFS’s subsidiary, The Evans Agency, LLC (“TEA”), and TEA’s subsidiaries, Frontier Claims Services, Inc. (“FCS”) and ENB Associates Inc. (“ENBA”), in the preparation of the accompanying interim unaudited consolidated financial statements conform with U.S. generally accepted accounting principles (“GAAP”) and with general practice within the industries in which it operates. Except as the context otherwise requires, the Company and its direct and indirect subsidiaries are collectively referred to in this report as the “Company.”

The accompanying consolidated financial statements are unaudited. In the opinion of management, all adjustments necessary for a fair presentation of the Company’s financial position and results of operations for the interim periods have been made. Certain reclassifications have been made to the 2012 unaudited consolidated financial statements to conform to the presentation used in 2013. During the quarter ended March 31, 2013, the Company revised the three month period ended, March 31, 2012 Consolidated Statement of Cash Flows to correct a \$194 thousand error within “Depreciation and Amortization” and “Changes in Other Assets Affecting Cash Flow.” The Company has assessed the materiality of this correction and concluded, based on qualitative and quantitative considerations, that the adjustments are not material to the Consolidated Statements of Cash Flows as a whole.

The results of operations for the three month period ended March 31, 2013 are not necessarily indicative of the results to be expected for the full year. The accompanying unaudited consolidated financial statements should be read in conjunction with the Audited Consolidated Financial Statements and the Notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2012. The Company has evaluated subsequent events for potential recognition and/or disclosure through the date of filing.

2. SECURITIES

The amortized cost of securities and their approximate fair value at March 31, 2013 and December 31, 2012 were as follows:

Total securities	\$ 91,798	\$ 4,074	\$ (88)	\$ 95,784

Available for sale securities with a total fair value of \$90.1 million and \$68.0 million at March 31, 2013 and December 31, 2012, respectively, were pledged as collateral to secure public deposits and for other purposes required or permitted by law.

The Company uses the Federal Home Loan Bank of New York (“FHLBNY”) as its primary source of overnight funds and also has several long-term advances with FHLBNY. The Company had a total of \$12.0 million and \$19.0 million in borrowed funds with FHLBNY at March 31, 2013 and December 31, 2012, respectively. The Company has placed sufficient collateral in the form of residential and commercial real estate loans at FHLBNY that meet FHLB collateral requirements. As a member of the Federal Home Loan Bank (“FHLB”) System, the Bank is required to hold stock in

FHLBNY. The Bank held \$1.5 million in FHLBNY stock as of March 31, 2013 and \$1.8 million as of December 31, 2012 at amortized cost.

The scheduled maturities of debt and mortgage-backed securities at March 31, 2013 and December 31, 2012 are summarized below. All maturity amounts are contractual maturities. Actual maturities may differ from contractual maturities because certain issuers have the right to call or prepay obligations with or without call premiums.

In regard to municipal securities, the Company's general investment policy is that in-state securities must be rated at least Moody's Baa (or equivalent) at the time of purchase. The Company reviews the ratings report and municipality financial statements and prepares a pre-purchase analysis report before the purchase of any municipal securities. Out-of-state issues must be rated by Moody's at least Aa (or equivalent) at the time of purchase. The Company did not own any out-of-state municipal bonds at March 31, 2013 or December 31, 2012. Bonds rated below A are reviewed periodically to ensure their continued credit worthiness. While purchase of non-rated municipal securities is permitted under the Company's investment policy, such purchases are limited to bonds issued by municipalities in the Company's general market area. Those municipalities are typically customers of the Bank whose financial situation is familiar to management. The financial statements of the issuers of non-rated securities are reviewed by the Bank and a credit file of the issuers is kept on each non-rated municipal security with relevant financial information.

Although concerns have been raised in the marketplace recently about the health of municipal bonds, the Company has not experienced any significant credit troubles in this portfolio and does not believe any credit troubles are imminent with respect to its portfolio. Aside from the non-rated municipal securities to local municipalities discussed above that are considered held-to-maturity, all of the Company's available-for-sale municipal bonds are investment-grade government obligation ("G.O.") bonds. G.O. bonds are generally considered safer than revenue bonds because they are backed by the full faith and credit of the government while revenue bonds rely on the revenue produced by a particular project. All of the Company's municipal bonds are issued by municipalities in New York State. To the Company's knowledge, there has never been a default of a NY G.O. in the history of the state. The Company believes that its risk of loss on default of a G.O. municipal bond for the Company is relatively low. However, historical performance does not guarantee future performance.

Management has assessed the securities available for sale in an unrealized loss position at March 31, 2013 and December 31, 2012 and determined the decline in fair value below amortized cost to be temporary. In making this determination, management considered the period of time the securities were in a loss position, the percentage decline in comparison to the securities' amortized cost, and the financial condition of the issuer (primarily government or government-sponsored enterprises). In addition, management does not intend to sell these securities and it is not more likely than not that the Company will be required to sell these securities before recovery of their amortized cost. Management believes the decline in fair value is primarily related to market interest rate fluctuations and not to the credit deterioration of the individual issuers.

The Company had not recorded any other-than-temporary impairment ("OTTI") charges as of March 31, 2013 and did not record any OTTI changes during 2012. The gross unrealized losses in the Company's securities portfolio were at an immaterial level during each of those periods, amounting to less than 0.2% of the total fair value of the securities portfolio at March 31, 2013 and December 31, 2012. Nevertheless, it remains possible that there could be deterioration in the asset quality of the securities portfolio in the future. The credit worthiness of the Company's portfolio is largely reliant on the ability of U.S. government sponsored agencies such as FHLB, Federal National Mortgage Association ("FNMA"), Government National Mortgage Association ("GNMA"), and Federal Home Loan Mortgage Corporation ("FHLMC"), and municipalities throughout New York State to meet their obligations. In addition, dysfunctional markets could materially alter the liquidity, interest rate, and pricing risk of the portfolio. The relatively stable past performance is not a guarantee for similar performance of the Company's securities portfolio going forward.

3. FAIR VALUE MEASUREMENTS

The Company follows the provisions of ASC Topic 820, "Fair Value Measurements and Disclosures." Those provisions relate to financial assets and liabilities carried at fair value and fair value disclosures related to financial assets and liabilities. ASC Topic 820 defines fair value and specifies a hierarchy of valuation techniques based on the nature of the inputs used to develop the fair value measures. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

There are three levels of inputs to fair value measurements:

- Level 1, meaning the use of quoted prices for identical instruments in active markets;
- Level 2, meaning the use of quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in markets that are not active or are directly or indirectly observable; and
- Level 3, meaning the use of unobservable inputs.

Observable market data should be used when available.

FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE ON A RECURRING BASIS

The following table presents for each of the fair-value hierarchy levels as defined in this footnote, those financial instruments which are measured at fair value on a recurring basis at March 31, 2013 and December 31, 2012:

	Level 1	Level 2	Level 3	Fair Value
March 31, 2013				
Securities available-for-sale:				
U.S. government agencies	\$ -	\$ 28,127	\$ -	\$ 28,127
States and political subdivisions	-	34,032	-	34,032
Mortgage-backed securities	-	29,381	-	29,381
Mortgage servicing rights	-	-	455	455
December 31, 2012				
Securities available-for-sale:				
U.S. Treasury and other U.S. government agencies	\$ -	\$ 28,332	\$ -	\$ 28,332
States and political subdivisions	-	31,469	-	31,469
Mortgage-backed securities	-	32,262	-	32,262
Mortgage servicing rights	-	-	467	467

Securities available for sale

Fair values for securities are determined using independent pricing services and market-participating brokers. The Company's independent pricing service utilizes evaluated pricing models that vary by asset class and incorporate available trade, bid and other market information for structured securities, cash flow and, when available, loan performance data. Because many fixed income securities do not trade on a daily basis, the evaluated pricing applications apply information as applicable through processes, such as benchmarking of like securities, sector groupings, and matrix pricing, to prepare evaluations. In addition, model processes, such as the Option Adjusted Spread model, are used to assess interest rate impact and develop prepayment scenarios. The models and the process take into account market convention. For each asset class, a team of evaluators gathers information from market sources and integrates relevant credit information, perceived market movements and sector news into the evaluated pricing applications and models. The company's service provider may occasionally determine that it does not have sufficient verifiable information to value a particular security. In these cases the Company will utilize valuations from another pricing service.

Management believes that it has a sufficient understanding of the third party service's valuation models, assumptions and inputs used in determining the fair value of securities to enable management to maintain an appropriate system of internal control. On a quarterly basis the Company reviews changes in the market value of its security portfolio. Individual changes in valuations are reviewed for consistency with general interest rate movements and any known credit concerns for specific securities. Additionally, on an annual basis the Company has its entire security portfolio priced by a second pricing service to determine consistency with another market evaluator. If, on the

Company's review or in comparing with another servicer, a material difference between pricing evaluations were to exist, the Company may submit an inquiry to the service provider regarding the data used to value a particular security. If the Company determines it has market information that would support a different valuation than the initial evaluation it can submit a challenge for a change to that security's valuation. There were no material differences in valuations noted in the first quarter of 2013 or during fiscal year 2012.

Securities available for sale are classified as Level 2 in the fair value hierarchy as the valuation provided by the third-party provider uses observable market data.

Mortgage servicing rights

Mortgage servicing rights ("MSRs") do not trade in an active, open market with readily observable prices. Accordingly, the Company obtains the fair value of the MSRs using a third-party pricing provider. The provider determines the fair value by discounting projected net servicing cash flows of the remaining servicing portfolio. The valuation model used by the provider considers market loan prepayment predictions and other economic factors which management considers to be significant unobservable inputs. The fair value of MSRs is mostly affected by changes in mortgage interest rates since rate changes cause the loan prepayment acceleration factors to increase or decrease. All assumptions are market driven. Management has a sufficient understanding of the third party service's valuation models, assumptions and inputs used in determining the fair value of MSRs to enable management to maintain an appropriate system of internal control. Mortgage servicing rights are classified within Level 3 of the fair value hierarchy as the valuation is model driven and primarily based on unobservable inputs.

The following table summarizes the changes in fair value for mortgage servicing rights during the three month periods ended March 31, 2013 and 2012, respectively:

	Three months ended March 31,	
	2013	2012
Beginning balance, Dec 31	\$ 467	\$ 407
Losses included in earnings	(20)	(7)
Additions from loan sales	8	54
Ending balance, March 31	\$ 455	\$ 454

Quantitative information about the significant unobservable inputs used in the fair value measurement of MSRs at the respective dates is as follows:

	3/31/2013		3/31/2012	
Servicing fees	0.25	%	0.25	%
Discount rate	10.05	%	10.09	%
Prepayment rate (CPR)	15.06	%	15.48	%

FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE ON A NONRECURRING BASIS

The Company is required, on a nonrecurring basis, to adjust the carrying value of certain assets or provide valuation allowances related to certain assets using fair value measurements. The following table presents for each of the

fair-value hierarchy levels as defined in this footnote, those financial instruments which are measured at fair value on a nonrecurring basis at March 31, 2013 and December 31, 2012:

	Level 1	Level 2	Level 3	Fair Value
March 31, 2013				
Impaired loans	\$ -	-	13,103	\$ 13,103
December 31, 2012				
Impaired loans	\$ -	-	12,303	\$ 12,303

Impaired loans

The Company evaluates and values impaired loans at the time the loan is identified as impaired, and the fair values of such loans are estimated using Level 3 inputs in the fair value hierarchy. Each loan's collateral has a unique appraisal and management's discount of the value is based on factors unique to each impaired loan. The significant unobservable input in determining the fair value is management's subjective discount on appraisals of the collateral securing the loan, which ranges from 10%-50%. Collateral may consist of real estate and/or business assets including equipment, inventory and/or accounts receivable and the value of these assets is determined based on appraisals by qualified licensed appraisers hired by the Company. Appraised and reported values may be discounted based on management's historical knowledge, changes in market conditions from the time of valuation, estimated costs to sell, and/or management's expertise and knowledge of the client and the client's business.

The Company has an appraisal policy in which appraisals are obtained upon a commercial loan being downgraded on the Company internal loan rating scale to a 5 (special mention) or a 6 (substandard) depending on the amount of the loan, the type of loan and the type of collateral. All impaired commercial loans are either graded a 6 or 7 on the internal loan rating scale. For consumer loans, the Company obtains appraisals when a loan becomes 90 days past due or is determined to be impaired, whichever occurs first. Subsequent to the downgrade or reaching 90 days past due, if the loan remains outstanding and impaired for at least one year more, management may require another follow-up appraisal. Between receipts of updated appraisals, if necessary, management may perform an internal valuation based on any known changing conditions in the marketplace such as sales of similar properties, a change

in the condition of the collateral, or feedback from local appraisers. Impaired loans had a gross value of \$14.2 million, with a valuation allowance of \$1.1 million, at March 31, 2013, compared to a gross value for impaired loans of \$13.6 million, with a valuation allowance of \$1.3 million, at December 31, 2012.

FAIR VALUE OF FINANCIAL INSTRUMENTS

At March 31, 2013 and December 31, 2012, the estimated fair values of the Company's financial instruments, including those that are not measured and reported at fair value on a recurring basis or nonrecurring basis, were as follows:

	March 31, 2013		December 31, 2012	
	Carrying Amount (in thousands)	Fair Value	Carrying Amount (in thousands)	Fair Value
Financial assets:				
Level 1:				
Cash and cash equivalents	\$ 100,598	\$ 100,598	\$ 90,477	\$ 90,477
Level 2:				
Available for sale securities	91,540	91,540	92,063	92,063
FHLB and FRB stock	2,946	2,946	3,249	3,249
Level 3:				
Held to maturity securities	3,734	3,707	3,744	3,721
Loans and leases, net	577,932	612,984	573,163	607,916
Mortgage servicing rights	455	455	467	467
Financial liabilities:				
Level 1:				
Demand deposits	\$ 123,084	\$ 123,084	\$ 123,405	\$ 123,405
NOW deposits	73,016	73,016	65,753	65,753
Regular savings deposits	391,739	391,739	380,924	380,924
Junior subordinated debentures	11,330	11,330	11,330	11,330
Commitments to extend credit	90	90	49	49
Securities sold under agreement to repurchase	13,784	13,784	12,111	12,111
Level 2:				
Other borrowed funds	12,000	12,377	19,000	19,503
Level 3:				

Time deposits	110,461	113,347	108,910	111,883
---------------	---------	---------	---------	---------

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practical to estimate that value.

Cash and Cash Equivalents. For these short-term instruments, the carrying amount is a reasonable estimate of fair value. "Cash and Cash Equivalents" includes interest-bearing deposits at other banks.

FHLB and FRB stock. The carrying value of FHLB and FRB stock approximate fair value.

Securities held to maturity. The Company holds certain municipal bonds as held-to-maturity. These bonds are generally small in dollar amount and are issued only by certain local municipalities within the Company's market area. The original terms are negotiated directly and on an individual basis consistent with our loan and credit guidelines. These bonds are not traded on the open market and management intends to hold the bonds to maturity. The fair value of held-to-maturity securities is estimated by discounting the future cash flows using the current rates at which similar agreements would be made with municipalities with similar credit ratings and for the same remaining maturities.

Loans and Leases, net. The fair value of fixed rate loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities, net of the

appropriate portion of the allowance for loan losses. For variable rate loans, the carrying amount is a reasonable estimate of fair value. This fair value calculation is not necessarily indicative of the exit price, as defined in ASC 820.

Deposits. The fair value of demand deposits, NOW accounts, muni-vest accounts and regular savings accounts is the amount payable on demand at the reporting date. The fair value of time deposits is estimated using the rates currently offered for deposits of similar remaining maturities.

Junior Subordinated Debentures. The carrying amount of Junior Subordinated Debentures is a reasonable estimate of fair value due to the fact that they bear a floating interest rate that adjusts on a quarterly basis.

Commitments to extend credit and standby letters of credit. As described in Note 8 - "Contingent Liabilities and Commitments" to these Unaudited Consolidated Financial Statements, the Company was a party to financial instruments with off-balance sheet risk at March 31, 2013 and December 31, 2012. Such financial instruments consist of commitments to extend permanent financing and letters of credit. If the options are exercised by the prospective borrowers, these financial instruments will become interest-earning assets of the Company. If the options expire, the Company retains any fees paid by the counterparty in order to obtain the commitment or guarantee. The fees collected for these commitments are recorded as "unearned commitment fees" in Other Liabilities. The carrying value approximates the fair value.

Securities Sold Under Agreement to Repurchase. The fair value of the securities sold under agreement to repurchase approximates its carrying value.

Other Borrowed Funds. The fair value of the short-term portion of other borrowed funds approximates its carrying value. The fair value of the long-term portion of other borrowed funds is estimated using a discounted cash flow analysis based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

4. LOANS, LEASES, AND THE ALLOWANCE FOR LOAN AND LEASE LOSSES

Loan and Lease Portfolio Composition

The following table presents selected information on the composition of the Company's loan and lease portfolio as of the dates indicated:

	March 31, 2013	December 31, 2012
Mortgage loans on real estate:	(in thousands)	
Residential Mortgages	\$ 74,713	\$ 68,135
Commercial and multi-family	321,777	323,777
Construction-Residential	991	811
Construction-Commercial	26,789	28,941
Home equities	54,787	56,366
Total real estate loans	479,057	478,030
Direct financing leases	929	1,612
Commercial and industrial loans	105,982	99,951
Consumer loans	1,047	1,294
Other	340	1,342
Net deferred loan origination costs	731	666
Total gross loans	588,086	582,895
Allowance for loan losses	(10,154)	(9,732)
Loans, net	\$ 577,932	\$ 573,163

The Bank sells certain fixed rate residential mortgages to FNMA, while maintaining the servicing rights for those mortgages. During the three month periods ended March 31, 2013 and 2012, the Bank sold mortgages to FNMA totaling \$0.8 million and \$6.2 million,

respectively. At March 31, 2013, the Bank had a loan servicing portfolio principal balance of \$70.4 million upon which it earns servicing fees, as compared with \$73.7 million at December 31, 2012. The value of the mortgage servicing rights for that portfolio was \$0.5 million at March 31, 2013 and December 31, 2012. Residential mortgage loans held-for-sale were \$0.4 million at March 31, 2013, compared with \$0.9 million at December 31, 2012. The Company had no commercial loans held-for-sale at March 31, 2013 and at December 31, 2012. The Company has never been contacted by FNMA to repurchase any loans due to improper documentation or fraud.

As noted in Note 1, these financial statements should be read in conjunction with the Audited Consolidated Financial Statements and the Notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2012. Disclosures related to the basis for accounting for loans and leases, the method for recognizing interest income on loans and leases, the policy for placing loans and leases on nonaccrual status and the subsequent recording of payments and resuming accrual of interest, the policy for determining past due status, a description of the Company's accounting policies and methodology used to estimate the allowance for loan and lease losses, the policy for charging off loans and leases, the accounting policies for impaired loans, and more descriptive information on the Company's credit risk ratings are all contained in the Notes to the Audited Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the Company's year ended December 31, 2012. Unless otherwise noted in this Form 10-Q, the policies and methodology described in the Annual Report for the year ended December 31, 2012 are consistent with those utilized by the Company in the three months ended March 31, 2013.

Credit Quality Indicators

The Bank monitors the credit risk in its loan portfolio by reviewing certain credit quality indicators ("CQI"). The primary CQI for its commercial mortgage and commercial and industrial ("C&I") portfolios is the individual loan's credit risk rating. The following list provides a description of the credit risk ratings that are used internally by the Bank when assessing the adequacy of its allowance for loan and lease losses:

- 1-3-Pass
- 4-Watch
- 5-O.A.E.M. (Other Assets Especially Mentioned) or Special Mention
- 6-Substandard
- 7-Doubtful
- 8-Loss

The Company's consumer loans, including residential mortgages and home equities, and commercial leases are not individually risk rated or reviewed in the Company's loan review process. Consumers are not required to provide the Company with updated financial information as is a commercial customer. Consumer loans also carry smaller balances. Given the lack of updated information since the initial underwriting of the loan and small size of individual loans, the Company uses delinquency status as the credit quality indicator for consumer loans.

There were no changes in the Company's allowance for loan and lease loss methodology in the three month period ended March 31, 2013.

16

The following tables provide data, at the class level, of credit quality indicators of certain loans and leases for the dates specified:

The Company had three commercial loans identified as impaired with an unpaid principal balance of \$2.8 million as of March 31, 2013, and two commercial loans identified as impaired with an unpaid principal balance of \$2.6 million as of December 31, 2012, in which it was unable to perform an appropriate impairment calculation due to the lack of reliable financial information from the borrower. The reserve on these loans were \$0.3 million at March 31, 2013 and December 31, 2012, as determined according to the credit risk rating per the Company's allowance for loan and lease

losses methodology, as described in Note 1 – “Organization and Summary of Significant Accounting Policies” within the Annual Report for the year ended December, 31, 2012.

23

Non-performing loans and leases

The following table sets forth information regarding non-performing loans and leases as of the dates specified:

	March 31, 2013	December 31, 2012		
	(in thousands)			
Non-accruing loans and leases:				
Commercial and industrial loans	\$ 1,169	\$ 914

Total non-performing loans and leases to total assets	0.98 %	1.02 %		
Total non-performing loans and leases to total loans and leases	1.37 %	1.41 %		

Troubled debt restructurings

The Company had \$12.0 million in loans and leases that were restructured in a troubled debt restructuring (“TDR”) at March 31, 2013, compared with \$11.5 million at December 31, 2012. \$5.7 million and \$6.0 million of those balances were in non-accrual status at March 31, 2013 and December 31, 2012, respectively. Any TDR that is placed on non-accrual is not reverted back to accruing status until the borrower makes timely payments as contracted for at least six months. Those loans and leases that are in accruing status have shown evidence of performance for at least six months as of March 31, 2013 and December 31, 2012. One residential mortgage for \$0.4 million was made under a government assistance program in 2012. Two commercial loans with a combined balance of \$0.3 million restructured in 2013, in addition to five loans restructured prior to 2013 with a combined balance of \$1.1 million, are covered under the Bank’s loss-sharing arrangement with the FDIC. For additional details on this agreement, see discussion under “Covered Loans and the Related Allowance” below. All of the Company’s restructurings were allowed in an effort to maximize its ability to collect on loans and leases where borrowers were experiencing financial difficulty. Modifications made to loans in a troubled debt restructuring did not have a material impact on the Company’s net income for the three month periods ended March 31, 2013 and 2012. The reserve for a TDR is based upon the present value of the future expected cash flows discounted at the loan’s original effective rate or upon the fair value of the collateral less costs to sell, if the loan is deemed collateral dependent. This reserve methodology is used because all TDR loans are considered impaired. As of March 31, 2013, there were no commitments to lend additional funds to debtors owing loans or leases whose terms have been modified in TDRs. The Company’s TDRs involve interest only payments and lengthening of terms as concessions to try and maximize the collectability of the loans.

The following tables summarize the loans and leases that were classified as troubled debt restructurings as of the dates indicated:

	March 31, 2013 (\$ in thousands)			
	Total	Nonaccruing	Accruing	Related Allowance

The general practice of the Bank is to work with borrowers so that they are able to pay back their loan or lease in full. If a borrower continues to be delinquent or cannot meet the terms of a TDR and the loan or lease is determined to be uncollectible, the loan or lease will be charged off. The following table presents loans and leases which were classified as TDR's during the previous 12 months which have defaulted during the three month periods ended March 31, 2013 and 2012:

	Three Months Ended March 31, 2013 (\$ in thousands)		Three Months Ended March 31, 2012

Direct financing leases	-	-	-	-
Consumer loans	-	-	-	-
Other	-	-	-	-

Covered Loans and the Related Allowance

On July 24, 2009, the Bank entered into a definitive purchase and assumption agreement with the FDIC under which the Bank assumed approximately \$51.0 million in liabilities, consisting almost entirely of deposits, and purchased substantially all of the assets of Waterford Village Bank. The loan portfolio acquired in the transaction totaled \$42.0 million. The loans acquired in that acquisition are referred to as "covered" loans because they are "covered" by a loss sharing agreement with the FDIC. The agreement calls for the FDIC to reimburse the Bank for 80% of losses up to \$5.6 million and 95% of losses beyond that threshold. At acquisition, the Company marked the covered loan portfolio to its market value and the allowance for loan and lease losses related to the covered loans was zero. Since acquisition, management has provisioned for any incremental increases in estimated credit losses due to deterioration in specific loans or increased risk factors on pools of loans. As a result of the FDIC guarantees, the provision for loan and lease losses and the allowance for loan and lease losses at March 31, 2013 and December 31, 2012 are presented

net of FDIC guarantees related to covered loans. The following table depicts the allowance for loan and lease losses related to covered loans as of March 31, 2013 and December 31, 2012:

	March 31, 2013	December 31, 2012
	(in thousands)	
Covered loans	\$ 17,444	\$ 20,787
Incremental estimated credit losses since acquisition	885	595
FDIC guarantee	(708)	(476)
Allowance for loan and lease losses, covered loans	\$ 177	\$ 119

5. PER SHARE DATA

The common stock per share information is based upon the weighted average number of shares outstanding during each period. For the three month period ended March 31, 2013, the Company had an average of 36,617 dilutive shares. The Company had an average of 4,674 dilutive shares for the three month period ended March 31, 2012.

Potential common shares that would have the effect of increasing diluted earnings per share are considered to be anti-dilutive and not included in calculating diluted earnings per share. For the three month periods ended March 31, 2013 and 2012, there was an average of 90,071 and 203,394 shares, respectively, that were not included in calculating diluted earnings per share because their effect was anti-dilutive.

6. OTHER COMPREHENSIVE INCOME

The following tables summarize the changes in the components of accumulated other comprehensive income (loss) during the three months ended March 31, 2013 and 2012:

	Balance at December 31, 2012	Net Change	Balance at March 31, 2013
Net unrealized loss on investment securities	\$ 2,457	\$ 261	\$ 2,196

7. SEGMENT INFORMATION

The Company is comprised of two primary business segments, banking and insurance agency activities. The following tables set forth information regarding these segments for the three month periods ended March 31, 2013 and 2012.

	Three Months Ended March 31, 2013 (in thousands)		
	Banking Activities	Insurance Agency Activities	Total
Net interest income (expense)	\$ 6,854	\$ (28)	\$ 6,826
Provision for loan and lease losses	450	-	450
Net interest income (expense) after provision for loan and lease losses	6,404	(28)	6,376
Non-interest income	1,311	-	1,311
Insurance service and fees	91	1,908	1,999
Non-interest expense	5,906	1,170	7,076
Income before income taxes	1,900	710	2,610
Income tax provision	529	265	794
Net income	\$ 1,371	\$ 445	\$ 1,816

	Three Months Ended March 31, 2012 (in thousands)		
	Banking Activities	Insurance Agency Activities	Total
Net interest income (expense)	\$ 6,883	\$ (31)	\$ 6,852
Provision for loan and lease losses	(249)	-	(249)
Net interest income (expense) after provision for loan and lease losses	7,132	(31)	7,101
Non-interest income	1,344	-	1,344
Insurance service and fees	-	1,945	1,945
Non-interest expense	5,668	1,241	6,909
Income before income taxes	2,808	673	3,481
Income tax provision	842	260	1,102
Net income	\$ 1,966	\$ 413	\$ 2,379

8. CONTINGENT LIABILITIES AND COMMITMENTS

The unaudited consolidated financial statements do not reflect various commitments and contingent liabilities, which arise in the normal course of business, and which involve elements of credit risk, interest rate risk and liquidity risk. These commitments and contingent liabilities consist of commitments to extend credit and standby letters of credit. A summary of the Bank's commitments and contingent liabilities is as follows:

	March 31, 2013	December 31, 2012
	(in thousands)	
Commitments to extend credit	\$ 152,955	\$ 135,028
Standby letters of credit	7,115	8,042
Total	\$ 160,070	\$ 143,070

Commitments to extend credit and standby letters of credit include some exposure to credit loss in the event of nonperformance of the customer. The Bank's credit policies and procedures for credit commitments and financial guarantees are the same as those for extensions of credit that are recorded on the Company's unaudited consolidated balance sheets. Because these instruments have fixed maturity dates, and because they may expire without being drawn upon, they do not necessarily represent cash requirements of the Bank. The Bank has not incurred any losses on its commitments and has not recorded a reserve for its commitments during 2012 and 2013.

Certain lending commitments for construction residential mortgage loans are considered derivative instruments under the guidelines of GAAP. The changes in the fair value of these commitments, due to interest rate risk, are not recorded on the consolidated balance sheets as the fair value of these derivatives is not considered material.

The Company is subject to possible litigation proceedings in the normal course of business. As of March 31, 2013 and December 31, 2012, there were no claims pending against the Company that management considered material.

9. NET PERIODIC BENEFIT COSTS

On January 31, 2008, the Bank froze its defined benefit pension plan. The plan covered substantially all Company employees. The plan provides benefits that are based on the employees' compensation and years of service. Under the freeze, eligible employees will receive at retirement the benefits already earned through January 31, 2008, but have not accrued any additional benefits since then. As a result, service cost is no longer incurred.

The Bank used an actuarial method of amortizing prior service cost and unrecognized net gains or losses which result from actual expense and assumptions being different than those that are projected. The amortization method the Bank used recognized the prior service cost and net gains or losses over the average remaining service period of active employees.

The Bank also maintains a nonqualified supplemental executive retirement plan covering certain members of the Company's senior management. The Bank uses an actuarial method of amortizing unrecognized net gains or losses which result from actual expense and assumptions being different than those that are projected. The amortization method the Bank uses recognizes the net gains or losses over the average remaining service period of active employees.

The Bank contributed \$95 thousand to the defined benefit pension plan in the first three months of 2013 and plans to contribute an additional \$135 thousand before the end of the year.

The following table presents the net periodic cost for the Bank's defined benefit pension plan and supplemental executive retirement plan for the three month periods ended March 31, 2013 and 2012:

Three months ended March 31,
(in thousands)

	Pension Benefits		Supplemental Executive Retirement Plan	
	2013	2012	2013	2012
Service cost	\$ -	\$ -	\$ 41	\$ 45
Interest cost	48	53	31	38
Expected return on plan assets	(65)	(57)	-	-
Amortization of prior service cost	-	-	17	22
Amortization of the net loss	17	16	27	27
Net periodic cost	\$ -	\$ 12	\$ 116	\$ 132

10. RECENT ACCOUNTING PRONOUNCEMENTS

Accounting Standards Update (“ASU”) 2012-06, Subsequent Accounting for an Indemnification Asset Recognized at the Acquisition Date as a Result of a Government-Assisted Acquisition of a Financial Institution. Accounting for a business combination requires that at each subsequent reporting date, an acquirer measure an indemnification asset on the same basis as the indemnified liability or asset, subject to any contractual limitations on its amount, and, for an indemnification asset that is not subsequently measured at its fair value, management’s assessment of the collectability of the indemnification asset. The objective of this ASU is to address the diversity in practice about how to interpret the terms on the same basis and contractual limitations when subsequently measuring an indemnification asset recognized in a government-assisted (Federal Deposit Insurance Corporation) acquisition of a financial institution that includes a loss-sharing agreement (indemnification agreement). The new guidance is effective for interim and annual periods beginning after December 15, 2012. The Company adopted this ASU effective January 1, 2013. The Company does have an indemnification agreement with the FDIC related to its acquisition of Waterford Village Bank in July 2009. The agreement ends for non-single family loans in July 2014 and for single family loans in July 2019. The adoption of the ASU did not have a material impact on the Company’s financial statements.

ASU 2013-02, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. The objective of this ASU is to improve the reporting of reclassifications out of accumulated other comprehensive income by requiring an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income, if the amount being reclassified is required to be reclassified into net income in its entirety. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail about those amounts. This ASU is effective for reporting periods beginning after December 15, 2012. The Company adopted this ASU effective January 1, 2013, as noted herein at Note 6 – “Other Comprehensive Income.”

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q may contain certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), that involve substantial risks and uncertainties. When used in this report, or in the documents incorporated by reference herein, the words "anticipate," "believe," "estimate," "expect," "intend," "may," "plan," "seek," and similar expressions identify such forward-looking statements. These forward-looking statements include statements regarding the Company's business plans, prospects, growth and operating strategies, statements regarding the asset quality of the Company's loan and investment portfolios, and estimates of the Company's risks and future costs and benefits.

These forward-looking statements are based largely on the expectations of the Company's management and are subject to a number of risks and uncertainties, including but not limited to general economic conditions, either nationally or in the Company's market areas, that are worse than expected; increased competition among depository or other financial institutions; inflation and changes in the interest rate environment that reduce the Company's margins or reduce the fair value of financial instruments; changes in laws or government regulations affecting financial institutions, including changes in regulatory fees, monetary policy, and capital requirements; the Company's ability to enter new markets successfully and capitalize on growth opportunities; the Company's ability to successfully integrate acquired entities; changes in accounting pronouncements and practices, as adopted by financial institution regulatory agencies, the Financial Accounting Standards Board and the Public Company Accounting Oversight Board; changes in consumer spending, borrowing and saving habits; changes in the Company's organization, compensation and benefit plans; and other factors discussed elsewhere in this Quarterly Report on Form 10-Q, as well as in the Company's periodic reports filed with the SEC, in particular the "Risk Factors" discussed in Item 1A of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2012. Many of these factors are beyond the Company's control and are difficult to predict.

Because of these and other uncertainties, the Company's actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained herein. Forward-looking statements speak only as of the date they are made. The Company undertakes no obligation to publicly update or revise forward-looking information, whether as a result of new, updated information, future events or otherwise.

APPLICATION OF CRITICAL ACCOUNTING ESTIMATES

The Company's Unaudited Consolidated Financial Statements included in this Quarterly Report on Form 10-Q are prepared in accordance with U.S. GAAP and follow general practices within the industries in which it operates. Application of these principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the Company's Unaudited Consolidated Financial Statements and Notes. These

estimates, assumptions and judgments are based on information available as of the date of the Unaudited Consolidated Financial Statements. Accordingly, as this information changes, the Unaudited Consolidated Financial Statements could reflect different estimates, assumptions and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions and judgments, and as such, have a greater possibility of producing results that could be materially different than originally reported. Estimates, assumptions and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried on the financial statements at fair value warrants an impairment write-down or valuation reserve to be established, or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and the information used to record valuation adjustments for certain assets and liabilities are based either on quoted market prices or are provided by other third-party sources, when available. When third-party information is not available, valuation adjustments are estimated in good faith by management primarily through the use of internal cash flow modeling techniques. Refer to Note 3 – “Fair Value Measurements” to the Company’s Unaudited Consolidated Financial Statements included in Item 1 of this Quarterly Report on Form 10-Q for further detail on fair value measurement.

Significant accounting policies followed by the Company are presented in Note 1 – “Organization and Summary of Significant Accounting Policies” to the Audited Consolidated Financial Statements included in Item 8 in its Annual Report on Form 10-K for the year ended December 31, 2012. These policies, along with the disclosures presented in the other Notes to the Company's Audited Consolidated Financial Statements contained in its Annual Report on Form 10-K and in this financial review, provide information on how significant assets and liabilities are presented in the Company’s Unaudited Consolidated Financial Statements and how those values are determined.

Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions and estimates underlying those amounts, management has identified the determination of the allowance for loan and lease losses and valuation of goodwill to be the accounting areas that require the most subjective or complex judgments, and as such, could be most subject to revision as new information becomes available.

Allowance for Loan and Lease Losses

The allowance for loan and lease losses represents management's estimate of probable losses in the Company's loan and lease portfolio. Determining the amount of the allowance for loan and lease losses is considered a critical accounting estimate because it requires significant judgment on the part of management and the use of estimates related to the amount and timing of expected future cash flows on impaired loans and leases, estimated losses on pools of homogeneous loans and leases based on historical loss experience and consideration of current economic trends and conditions, all of which may be susceptible to significant change. The loan and lease portfolio also represents the largest asset type on the Company's Unaudited Consolidated Balance Sheets. Note 1 to the Audited Consolidated Financial Statements included in Item 8 in the Company's Annual Report on Form 10-K for the year ended December 31, 2012, describes the methodology used to determine the allowance for loan and lease losses.

Goodwill

The amount of goodwill reflected in the Company's Unaudited Consolidated Financial Statements is required to be tested by management for impairment on at least an annual basis. The test for impairment of goodwill on the identified reporting unit is considered a critical accounting estimate because it requires judgment on the part of management and the use of estimates related to the growth assumptions and market multiples used in the valuation model. The goodwill impairment testing is typically performed annually on December 31st. No impairment charges were incurred in the most recent test and the fair value of the tested reporting unit substantially exceeded its fair value. There were no triggering events in the three month period ended March 31, 2013 that resulted in an interim impairment test.

ANALYSIS OF FINANCIAL CONDITION

Loan and Lease Activity

Total loans and leases grew to \$588.1 million at March 31, 2013, reflecting a \$5.2 million or 0.9% increase from \$582.9 million at December 31, 2012. Since March 31, 2012, the loan portfolio has grown \$8.4 million, or 1.4%.

Loans secured by real estate were \$479.1 million at March 31, 2013, an increase of \$1.0 million or 0.2% from December 31, 2012. The Company's commercial real estate portfolio has historically been the fastest growing part of the portfolio. However, with rates at all-time lows, several customers have decided to pay off their loans before maturity, despite prepayment penalties, and re-finance their loans at lower rates with other institutions. Financial institutions are generally healthier after enduring a difficult credit cycle during the recession. In addition, banks are experiencing higher liquidity levels with loan demand relatively weak while deposit growth remains steady. These circumstances have converged into an environment of stiff competition for loans over the past year, making loan

growth difficult. Commercial and multi-family loans decreased 0.6% from \$323.8 million at December 31, 2012 to \$321.8 million at March 31, 2013.

With commercial real estate loan growth slowing and investment yields at all-time lows, the Company retained more of its originated residential mortgages during the first quarter of 2013, selling fewer loans to FNMA than it has in the past. Residential mortgages increased to \$74.7 million at March 31, 2013, a \$6.6 million, or 9.7% increase from \$68.1 million at December 31, 2012. Residential mortgage originations increased to \$8.6 million in the three month period ended March 31, 2013, compared with \$7.3 million in the three month period ended March 31, 2012.

The Bank sells certain fixed rate residential mortgages to FNMA, while maintaining the servicing rights for those mortgages. During the three month period ended March 31, 2013, the Bank sold mortgages to FNMA totaling \$0.8 million, compared with \$6.2 million during the three month period ended March 31, 2012. At March 31, 2013, the Bank had a loan servicing portfolio principal balance of \$70.4 million upon which it earns servicing fees, as compared with \$73.7 million at December 31, 2012. The value of the mortgage servicing rights for that portfolio was \$0.5 million at March 31, 2013 and December 31, 2012. Residential mortgage loans held-for-sale were \$0.4 million at March 31, 2013 and \$0.9 million at December 31, 2012. The Company has never been contacted by FNMA to repurchase any loans due to improper documentation or fraud.

The Company continues to focus on commercial and industrial ("C&I") lending as a way to diversify its loan portfolio, which has historically experienced strong growth rates in real estate loans. However, the Company faces the headwinds of a low growth economy and a very competitive local market. Declining line of credit usage and loan payoffs had resulted in a decrease in C&I balances during 2012. In 2013, line of credit usage increased such that C&I balances increased 6.0% in the first quarter of 2013, from \$100.0 million at December 31, 2012 to \$106.0 million at March 31, 2013.

The leasing portfolio continued to roll-off under the Company's 2009 decision to exit the direct financing leasing business. Direct financing leases were \$0.9 million at March 31, 2013, compared with \$1.6 million at December 31, 2012.

Credit Quality of Loan Portfolio

Total non-performing loans and leases, defined as accruing loans and leases greater than 90 days past due and non-accrual loans and leases, totaled \$8.0 million, or 1.37% of total loans and leases outstanding, at March 31, 2013, compared with \$8.2 million, or 1.41%, of total loans and leases outstanding at December 31, 2012.

While non-performing loans and leases were flat in the quarter, “special mention” and “substandard” commercial credits increased from \$10.0 million and \$5.9 million, respectively, at December 31, 2012 to \$13.2 million and \$7.4 million at March 31, 2013. As noted in Note 4 to these Unaudited Financial Statements, internal risk ratings are the credit quality indicators used by the Company’s management to determine the appropriate allowance for loan and lease losses for commercial credits. Special mention and substandard loans are weaker credits with a higher risk of loss than “pass” or “watch” credits. While there were several upgrades and downgrades as part of the risk rating balances increasing, there were two loans driving the overall increase – a \$6.5 million commercial real estate loan was downgraded to special mention and a \$1.0 million commercial real estate loan was downgraded to substandard. While management increased the allowance for loan and lease losses as a result of the increased risk inherent in the downgrades, it should be noted that the loans are not impaired and management continues to expect to collect full principal and interest as contracted.

The allowance for loan and lease losses totaled \$10.2 million, or 1.73% of total loans and leases outstanding as of March 31, 2013, compared with \$9.7 million or 1.67% at December 31, 2012. The increase in the allowance over the prior year end resulted from a \$0.5 million provision for loan and lease losses recorded during the first quarter of 2013, and minimal net charge-offs of less than \$0.1 million during the quarter. The provision for loan and lease losses resulted from the increase in special mention and substandard loans discussed above. The net charge-off ratio in the first quarter of 2013 equated to 0.02% of average net loans and leases. This compares with a 0.32% ratio in the first quarter of 2012.

The coverage ratio of the allowance for loan and lease losses to non-performing loans and leases increased from 118% at December 31, 2012 to 126% at March 31, 2013 as the allowance for loan and lease losses increased while non-performing loans and leases decreased during the first quarter of 2013.

Investing Activities

Total securities were \$95.3 million at March 31, 2013, compared with \$95.8 million at December 31, 2012. Interest-bearing deposits at other banks, which consist of overnight funds kept at correspondent banks and the Federal Reserve, increased from \$78.1 million at December 31, 2012 to \$88.1 million at March 31, 2013. Interest-bearing cash increased as deposit growth outpaced loan growth in the first quarter. Securities and interest-bearing deposits at correspondent banks made up 23.5% of the Bank’s total average interest earning assets in the first quarter of 2013, compared with 18.4% in the first quarter of 2012.

The Company's highest concentration in its securities portfolio is in tax-advantaged debt securities issued by state and political subdivisions with 35.7% at March 31, 2013, compared with 32.9% at December 31, 2012. The concentration in U.S. government-sponsored agency bonds was 29.5% of the portfolio at March 31, 2013, compared with 29.6% of the portfolio at December 31, 2012. U.S. government-sponsored mortgage-backed securities comprised 30.8% of the securities portfolio at March 31, 2013, compared with 33.7% at December 31, 2012.

The credit quality of the securities portfolio as a whole is believed to be strong as the portfolio has no individual securities in a significant unrealized loss position. While interest rates remained near historic lows, long-term rates were slightly higher at March 31, 2013 when compared with December 31, 2012. As a result, the net unrealized gain position of the available-for-sale investment portfolio decreased from \$4.0 million at December 31, 2012 to \$3.6 million at March 31, 2013.

The Company monitors extension and prepayment risk in the securities portfolio to limit potential exposures. Available-for-sale securities with a total fair value of \$90.1 million at March 31, 2013, as compared with \$68.0 million at December 31, 2012, were pledged as collateral to secure public deposits and for other purposes required or permitted by law. The Company has no direct exposure to subprime mortgages, nor does the Company hold private mortgage-backed securities, credit default swaps, or FNMA or FHLMC preferred stock investments in its investment portfolio.

Funding Activities

Total deposits at March 31, 2013 were \$698.3 million, reflecting a \$19.3 million or 2.8% increase from December 31, 2012. The growth was driven by seasonal inflows of municipal deposits. The growth in municipal deposits in the first quarter totaled \$20.1 million and was spread across several deposit categories: demand (\$2.8 million), NOW (\$5.1 million), and savings (\$12.2 million). It is expected that the Company's municipal deposits will decline through the rest of the year due to normal seasonal fluctuations.

The Company's retail deposit growth vehicle for the last three years has been its complementary Better Checking and Better Savings products, which are included in the NOW and regular savings deposit categories, respectively, on the Company's balance sheet. The Better Checking product is unique in the Bank's Western New York footprint as it pays a premium interest rate as a reward to

customers who demonstrate a deep relationship with the Bank as evidenced by regular use of their debit card, use of direct deposit, and electronic statements. However, the growth in NOW and savings deposits slowed in the first quarter as the Better Checking and Better Savings products begin to mature and the Company continued to lower rates on selected deposit products given the Company's current excess liquidity and declining net interest margin in this extended low rate environment.

Time deposits were \$110.5 million at March 31, 2013, an increase of \$1.6 million, or 1.4%, from December 31, 2012. Time deposit rates remain near historic lows, resulting in balance declines or low growth for the past three years, as customers have preferred liquid savings deposits.

Other borrowings, which typically include the Bank's overnight line of credit and other advances with the FHLBNY, were \$12.0 million at March 31, 2013 and \$19.0 million at December 31, 2012 as a \$7.0 million advance with FHLBNY matured and was not replaced. The Company's deposit growth has outpaced its loan growth this year and remains in an overall liquid position. Therefore, the Company has not needed to replace or add to its wholesale borrowings.

ANALYSIS OF RESULTS OF OPERATIONS

Average Balance Sheet

The following tables present the significant categories of the assets and liabilities of the Company, interest income and interest expense, and the corresponding yields earned and rates paid for the periods indicated. The assets and liabilities are presented as daily averages. The average loan and lease balances include both performing and non-performing loans and leases. Investments are included at amortized cost. Yields are presented on a non-tax-equivalent basis.

	Three Months Ended March 31, 2013			Three Months Ended March 31, 2012		
	Average Outstanding Balance (dollars in thousands)	Interest Earned/ Paid	Yield/ Rate	Average Outstanding Balance (dollars in thousands)	Interest Earned/ Paid	Yield/ Rate

Net interest earnings		\$ 6,826			\$ 6,852	
Net interest margin			3.63 %			3.93 %
Interest rate spread			3.48 %			3.71 %

Net Income

Net income decreased to \$1.8 million, or \$0.43 per diluted share, in the first quarter of 2013, down 23.7% from net income of \$2.4 million, or \$0.58 per diluted share, in the first quarter of 2012. The decline in net income reflected a \$0.7 million year-over-year increase in the provision for loan and lease losses. Return on average equity was 9.55% for the first quarter of 2013 compared with 13.59% in the first quarter of 2012.

Other Results of Operations – Quarterly Comparison

Net interest income was \$6.8 million for the 2013 first quarter, down 0.4% when compared with the first quarter of 2012, and down 3.9% when compared with the fourth quarter of 2012. The performance of net interest income has been driven by slow growth in the loan portfolio and a declining net interest margin. Average net loans and leases of \$576.0 million in the first quarter of 2013 were \$7.1 million, or 1.2% higher than last year's first quarter, but \$9.5 million, or 1.6% lower than the average balance in the fourth quarter of 2012.

The Company's net interest margin decreased to 3.63% for the first quarter of 2013, down from the fourth quarter 2012 margin of 3.78% and down from 3.93% in the first quarter of 2012. The decrease in the net interest margin is a result of the continued declining interest rate environment. When compared with last year's first quarter, the Company was able to only partially offset the 57 basis point decrease in yield on interest-earning assets through re-pricing its interest bearing liabilities by 34 basis points. The contribution of interest-free funds declined by 7 basis points in the first quarter of 2013 when compared with the first quarter of 2012.

The Company's loan and investment portfolios continue to re-price into lower yields, as evidenced by a decrease in yield on interest-earning assets of 25 basis points from the fourth quarter of 2012.

The provision for loan and lease losses increased to \$0.5 million in the first quarter of 2013 from a reserve release of (\$0.2) million in the prior year's first quarter. The first quarter of 2012 benefitted from a release of \$0.4 million in leasing reserves after continued improvement in the leasing portfolio's performance, compared with less than \$0.1 million in leasing reserve release in the first quarter of 2013. The provision for loan losses (excluding leases) increased from \$0.2 million in the first quarter of 2012 to \$0.5 million in first quarter of 2013 due to the increase in special mention and substandard loans, as discussed in the "Credit Quality of the Loan Portfolio" section of the "Analysis of Financial Condition," above, in this Management's Discussion and Analysis.

Non-interest income, which represented 32.7% of total revenue in the first quarter of 2013, increased 0.7%, or \$22 thousand, to \$3.3 million when compared with the first quarter of 2012. Insurance agency revenue of \$2.0 million was up \$54 thousand, or 2.8%, when compared with the 2012 first quarter due mostly to an increase in commercial lines revenue. Service charges on deposits increased 10.6% to \$0.5 million due to more competitive pricing and the acquisition of commercial deposit customers. These positive variances were somewhat offset by decreases in premiums on loans sold and a lower mortgage servicing rights value due to fewer loans being sold to FNMA.

Total non-interest expense was \$7.1 million in the first quarter of 2013, an increase of 2.4%, from \$6.9 million in the first quarter of 2012. The largest component of the increase was in occupancy expense and salaries and employee benefits expense. The increase in occupancy expense of \$0.1 million can be attributed to a write-off of software which is no longer going to be utilized. The increase in salaries and benefits expense of \$0.1 million, or 1.8%, reflects merit salary increases for employees.

As a result of the increase in non-interest expense and lack of growth in revenue, the efficiency ratio increased to 69.20% for the first quarter of 2013 from 67.10% for the first quarter of 2012.

Income tax expense for the quarter ended March 31, 2013, was \$0.8 million, representing an effective tax rate of 30.4% compared with an effective tax rate of 31.7% in the first quarter of 2012. The decrease in tax rate in the first quarter was primarily due to the recognition of a previously unrecognized tax benefit related to the expiration of a statute from the 2009 tax year.

CAPITAL

The Company consistently maintains regulatory capital ratios measurably above the federal “well capitalized” standard, including a Tier 1 leverage ratio of 9.87% and 9.69% at March 31, 2013 and December 31, 2012, respectively. Book value per share of the Company’s common stock was \$18.26 at March 31, 2013, compared with \$17.94 at December 31, 2012. Tangible book value per share (a non-GAAP measure) at March 31, 2013 was \$16.26, compared with \$15.92 at December 31, 2012. The increase in both book value and tangible book value per share is a result of the Company’s \$1.8 million in net income.

Tangible book value per share is a non-GAAP financial measure. [The Company calculates tangible book value per share by dividing tangible book value by the number of common shares outstanding, as compared to GAAP book value per share, which the Company calculates by dividing GAAP book value by the number of common shares outstanding.] Management believes that this information is consistent with treatment by bank regulatory agencies, which exclude intangible assets from the calculation of risk-based capital

ratios. Accordingly, management believes that this non-GAAP financial measure provides information that is important to investors and that is useful in understanding the Company's capital position and ratios. Further, management believes that presentation of this measure, together with the accompanying reconciliation, provides a complete understanding of factors and trends affecting the Company's business and allows investors to view the Company's performance in a manner similar to management, the financial services industry, bank stock analysts and regulatory agencies. However, this non-GAAP financial measure is supplemental and is not a substitute for an analysis based on GAAP financial measures. Note that other companies may use different calculations for this measure, and therefore the Company's presentation of tangible book value per share may not be comparable to similarly titled measures reported by other companies. Investors should review the Company's consolidated financial statements in their entirety and should not rely on any single financial measure. A reconciliation of this non-GAAP financial measure, tangible book value per share, to the most directly comparable GAAP financial measure, book value, is set forth in the following table:

(\$ in thousands, except per share data)	March 31, 2013	December 31, 2012
Stockholders' equity ("book value")	\$ 76,495	\$ 74,828
Goodwill	(8,101)	(8,101)
Intangible assets	(266)	(329)
Tangible book value	\$ 68,128	\$ 66,398
Number of common shares outstanding	4,190,257	4,171,473
Tangible book value per share	\$ 16.26	\$ 15.92

On December 12, 2012, the Company declared an accelerated cash dividend of \$0.24 per share on the Company's outstanding common stock. The dividend was paid on December 31, 2012 to shareholders of record as of December 24, 2012. The dividend represented an accelerated payment of the Company's semi-annual dividend that otherwise would have been paid in April 2013.

LIQUIDITY

The Bank utilizes cash flows from the investment portfolio and federal funds sold balances to manage the liquidity requirements related to loan demand and deposit fluctuations. The Bank also has many borrowing options. As a member of the FHLB the Bank is able to borrow funds at competitive rates. Advances of up to \$139.5 million can be drawn on the FHLB via an Overnight Line of Credit Agreement between the Bank and the FHLB. An amount equal to 25% of the Bank's total assets could be borrowed through the advance programs under certain qualifying

circumstances. The Bank also has the ability to purchase up to \$14.0 million in federal funds from its correspondent banks. By placing sufficient collateral in safekeeping at the Federal Reserve Bank, the Bank could borrow at the discount window. The Bank's liquidity needs also can be met by more aggressively pursuing time deposits, or accessing the brokered time deposit market, including the Certificate of Deposit Account Registry Service ("CDARS") network. The Company's primary source of liquidity is dividends from the Bank. Additionally, the Company has access to capital markets as a funding source.

Cash flows from the Bank's investment portfolio are laddered, so that securities mature at regular intervals, to provide funds from principal and interest payments at various times as liquidity needs may arise. Contractual maturities are also laddered, with consideration as to the volatility of market prices. At March 31, 2013, approximately 5.0% of the Bank's securities had contractual maturity dates of one year or less and approximately 25.3% had maturity dates of five years or less.

Management, on an ongoing basis, closely monitors the Company's liquidity position for compliance with internal policies, and believes that available sources of liquidity are adequate to meet funding needs in the normal course of business. As part of that monitoring process, management calculates the 90-day liquidity each month by analyzing the cash needs of the Bank. Included in the calculation are liquid assets and potential liabilities. Management stresses the potential liabilities calculation to ensure a strong liquidity position. Included in the calculation are assumptions of some significant deposit run-off as well as funds needed for loan closings and investment purchases. At March 31, 2013, in the Company's internal stress test, the Company had net short-term liquidity of \$56.5 million as compared with \$75.5 million at December 31, 2012. Available assets of \$186.5 million, divided by public and purchased funds of \$130.0 million, resulted in a long-term liquidity ratio of 143% at March 31, 2013, compared with 155% at December 31, 2012.

Management does not anticipate engaging in any activities, either currently or in the long term, for which adequate funding would not be available and which would therefore result in significant pressure on liquidity. However, continued economic recession could negatively impact the Company's liquidity.

The Company believes that the Bank maintains a sufficient level of U.S. government and government agency securities and New York State municipal bonds that can be pledged as collateral for municipal deposits.

ITEM 3 - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Additional information responsive to this Item is contained in the Liquidity section of Management's Discussion and Analysis of Financial Condition and Results of Operations, which information is incorporated herein by reference.

Market risk is the risk of loss from adverse changes in market prices and/or interest rates of the Bank's financial instruments. The primary market risk the Company is exposed to is interest rate risk. The core banking activities of lending and deposit-taking expose the Bank to interest rate risk, which occurs when assets and liabilities reprice at different times and by different amounts as interest rates change. As a result, net interest income earned by the Bank is subject to the effects of changing interest rates. The Bank measures interest rate risk by calculating the variability of net interest income in future periods under various interest rate scenarios using projected balances for interest-earning assets and interest-bearing liabilities. Management's philosophy toward interest rate risk management is to limit the variability of net interest income to changes in net interest rates. The balances of financial instruments used in the projections are based on expected growth from forecasted business opportunities, anticipated prepayments of loans, and expected maturities of investment securities, loans and deposits. Management supplements the modeling technique described above with analysis of market values of the Bank's financial instruments and changes to such market values given changes in the interest rates.

The Bank's Asset-Liability Committee, which includes members of senior management, monitors the Bank's interest rate sensitivity with the aid of a model that considers the impact of ongoing lending and deposit taking activities, as well as interrelationships in the magnitude and timing of the repricing of financial instruments, including the effect of changing interest rates on expected prepayments and maturities. When deemed prudent, management has taken actions, and intends to do so in the future, to mitigate exposure to interest rate risk through the use of on- or off-balance sheet financial instruments. Possible actions include, but are not limited to, changing the pricing of loan and deposit products, and modifying the composition of interest-earning assets and interest-bearing liabilities, and other financial instruments used for interest rate risk management purposes.

The following table demonstrates the possible impact of changes in interest rates on the Bank's net interest income over a 12-month period of time:

SENSITIVITY OF NET INTEREST INCOME TO CHANGES IN INTEREST RATES

Changes in interest rates	Calculated increase in projected annual net interest income (in thousands)	
	March 31, 2013	December 31, 2012
+200 basis points	\$ 1,279	\$ 1,055
+100 basis points	1,755	1,588
-100 basis points	NM	NM
-200 basis points	NM	NM

Many assumptions were utilized by management to calculate the impact that changes in interest rates may have on the Bank's net interest income. The more significant assumptions related to the rate of prepayments of mortgage-related assets, loan and deposit volumes and pricing, and deposit maturities. The Bank assumed immediate changes in rates including 200 basis point rate changes. In the event that the 200 basis point rate changes cannot be achieved, the applicable rate changes are limited to lesser amounts such that interest rates cannot be less than zero. These assumptions are inherently uncertain and, as a result, the Bank cannot precisely predict the impact of changes in interest rates on net interest income. Actual results may differ significantly due to the timing, magnitude, and frequency of interest rate changes in market conditions and interest rate differentials (spreads) between maturity/repricing categories, as well as any actions such as those previously described, which management may take to counter such changes. In light of the uncertainties and assumptions associated with the process, the amounts presented in the table and changes in such amounts are not considered significant to the Bank's projected net interest income.

ITEM 4 - CONTROLS AND PROCEDURES

DISCLOSURE CONTROLS AND PROCEDURES

The Company's management, with the participation of the Company's principal executive officer and principal financial officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of March 31, 2013 (the end of the period covered by this Report). Based on that evaluation, the Company's principal executive and principal financial officers concluded that as of March 31, 2013 the Company's disclosure controls and procedures were effective.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

No changes in the Company's internal control over financial reporting were identified in connection with the evaluation required by paragraph (d) of Rule 13a-15 or Rule 15d-15 under the Exchange Act that occurred during the fiscal quarter ended March 31, 2013 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 6 – EXHIBITS

The information called for by this item is incorporated herein by reference to the Exhibit Index included immediately following the signature page to this Quarterly Report on Form 10-Q.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
